PREFACE

This is the 14th edition of a work first published in 1951, authored then by one of the most insightful minds in the law of torts during the 20th century, William Lloyd Prosser. He established a tradition of excellence in scholarship combined with ease of use. That tradition was continued and enhanced for almost three decades by our late colleague, Dean John W. Wade. Each of them contributed not just to the learning of countless students through their work on this casebook, but also to the development of the law through their scholarly writings and service as reporters to the American Law Institute Restatement of Torts (Second).

The casebook has benefitted from a half century of learning from many other sources and we, the current authors, Victor Schwartz, Kathryn Kelly, and David Partlett, feel a special sense of responsibility to be faithful to that tradition while keeping it current. As we worked on this edition, we did more than read cases (thousands of cases), statutes, and law review articles. We consulted with law professors who have adopted our book in the past, as well as with those who had not, about how it could be improved. Through emails, letters, and telephone calls, they sent us their thoughts. Some of their ideas were broad and conceptual, others were technical, and a few were chastising; the book benefitted from all of them. We sought comments from students who have studied from our book, including former students, now practicing lawyers, who took time from their busy law practices to send us cases, comment on the trends they observe from the

frontlines of tort law, and share their reflections on the best ways to prepare for the practice of tort law.

With that goal and all of those suggestions in mind, we eliminated cases that were deemed unproductive; we pruned cases that were thought too lengthy; we added cases, not for the purpose of "change," but to make the subject more interesting and to assure that current and vital issues are discussed. The law has seen many changes in the last two decades. We would like to highlight three of them.

First, a new Restatement of Torts (Third) is being published by the American Law Institute in segments. Victor Schwartz has served as an Adviser to the first three sections, the Restatement (Third) of Torts: Products Liability (1998); the Restatement (Third) of Torts: Apportionment of Liability (2000); and the Restatement (Third) of Torts: Liability for Physical and Emotional Harm (2010 and 2012). The Restatement (Third) of Torts: Liability for Economic Harm has been approved and is being published in 2020. References to all of these are included throughout. David Partlett is presently an Adviser on two new Restatements relating to liability for intentional torts and for defamation and privacy just established by the ALL

Second, while fully respecting the traditional common law development of torts, we have drawn attention to the role of modern

legislatures in creating, and limiting the domain of, tort law and the response of the state judiciary to that phenomenon. The outcome of this struggle between the courts and the legislatures over the shaping of America's tort law is yet to be written. As much as tort law

has moved dramatically to the center stage of social policy and political gamesmanship, it continues to be the subject of jurisprudential probing at a time of rapid technological change. Although we cannot cabin this rich debate, we have, throughout the book, provided references to it.

Third, this edition appears at a time of rapid globalization of the law, disruption of traditional business models, and a world reeling from the coronavirus pandemic. In defamation, for example, old doctrines based upon publications confined to regions are strained to the breaking point when publications pulsate instantaneously to all corners of the globe via the Internet. Over half of Amazon.com's sales are for third-party vendors. If one of those products injures someone, is Amazon a seller for strict liability purposes? Withdrawal of governmental regulation has prompted a rekindling of the common law as in nuisance. An increase in large scale natural and man-made disasters has tested the limits of common law liability. How will the tort law react to the myriad of legal issues raised by the coronavirus pandemic?

Throughout the text, we have held fast to a cardinal principle that has been a hallmark of this text for seven decades: the casebook is not used to present any particular philosophy of tort law. We leave that to the law reviews, the Congressional testimony, and the amicus briefs. This casebook aspires to provide teachers with the raw material to inform and challenge students to learn the law and to think critically about it.

While the size and breadth of this casebook may give pause to some, we believe that all students should be given an opportunity if

they wish to peruse topics excluded due to exigencies of class coverage. The casebook easily can be adapted for use in a first-year course of different credit hours and in optional advanced courses.

As in previous editions of this casebook, the deletion of a part of the text from a published opinion is indicated by the use of lacunae (***). When only citations are omitted, the letter "c" is used for "citation." To indicate that several citations have been deleted, "cc" is used. The letter is capitalized or not, depending on whether the citation was placed in the middle of a sentence or started a new sentence.

Those of you learning torts from this casebook will make the law in the 21st century. That is an important undertaking. We hope that you will find the first step of that undertaking, learning torts from this 14th Edition, challenging and enjoyable.

Victor Schwartz

UNIVERSITY CASEBOOK SERIES®

Prosser, Wade, and Schwartz's Torts CASES AND MATERIALS FOURTEENTH EDITION

[BLANK PAGE]

CHAPTER 1 DEVELOPMENT OF LIABILITY BASED UPON FAULT

"Tort" comes from the Latin word "tortus," which means twisted, and the French word "tort," which means injury or wrong. A tort is a civil wrong, other than a breach of contract, for which the law provides a remedy. This area of law imposes duties on persons to act in a manner that will not injure other persons. A person who breaches a tort duty has committed a tort and may be liable to pay damages in a lawsuit brought by a person injured because of that tort.

Over the years, tort law has been principally a part of the common law, developed by the courts through the opinions of the judges in the cases before them. Within some areas of tort law, however, statutes have long been common--e.g., trespass to real property, limitation of actions, wrongful death actions; and in recent years the legislature has had an increasingly more significant role in modifying the common law.

Modern Tort Law--Beyond the Casebooks Into the Field of Public Debate. From the time this casebook began with its first edition in the early 1950s, tort law was of concern primarily to law students, law professors, and attorneys who practiced in the field. The public, in general, knew very little, if anything, about the subject. In the past few decades, however, this has changed quite dramatically. Prior to coming to law school, you probably read about healthcare providers who were unable to obtain affordable medical malpractice coverage, about people injured through someone else's fault who could not recover compensation because the cost of the lawsuit would have

been more than they could recover, or about manufacturers going out of business or declining to put new and useful products on the market, all because of problems in the area of "tort law."

The Federal Government and all state governments have examined these issues and legislation affecting tort law has multiplied in recent years. As you study the law of torts, you may find that you will be reading news stories about the subject from a new perspective. You may decide that many stories oversimplify the tort system and perhaps miss critical points. It is important to pay attention to these stories because the subject you are studying is dynamic, complex, and at the center of major public policy debates.

In studying the subject, you should consider the major purposes of tort law: (1) to provide a peaceful means for adjusting the rights of parties who might otherwise "take the law into their own hands"; (2) to deter wrongful conduct; (3) to encourage socially responsible behavior; (4) to restore injured parties to their original condition, insofar as the law can

do this, by compensating them for their injury; and (5) to vindicate individual rights of redress. Should people always be compensated when they have been injured by the action of another? If your answer to this question is in the affirmative, think about whether it is always necessary to have a trial, with a plaintiff, a defendant, and lawyers. On the other hand, if tort law should not compensate every person who is injured by another, what are appropriate rules and standards to determine whom to compensate and under what circumstances? This is the primary problem to which the law of torts

addresses itself. Consider also how tort law evolves to meet changing circumstances--the great virtue of the common law. See Schwartz, Silverman & Goldberg, Neutral Principles of Stare Decisis in Tort Law, 58 S.C. L. Rev. 317 (2005) (suggesting principles for departure from traditional common law concepts).

The casebook will explore the system that has been accused of having caused these crises. Evaluate it carefully, and remember that you are not only learning a legal subject, but also becoming an educated citizen who can and should participate in the debate about the direction tort law should take through the 21st Century.

Historical Origins. Historians have differed as to how the law of torts began. There is one theory that it originated with liability based upon "actual intent and actual personal culpability," with a strong moral tinge, and slowly formulated external standards that took less account of personal fault. 0. Holmes, The Common Law, Lecture I (1881). It seems quite likely that the most flagrant wrongs were the first to receive redress.

Another, and more generally accepted theory, is that the law began by imposing liability on those who caused physical harm, and gradually developed toward the acceptance of moral standards as the basis of liability. Wigmore, Responsibility for Tortious Acts: Its History, 7 Harv. L. Rev. 315, 383 & 441 (1894). Ames, Law and Morals, 22 Harv. L. Rev. 97 (1908). An alternative theory is that there has been no steady progression from liability without fault to liability based on fault. The difference between no-fault periods and fault-based periods is, rather, one of degree. Isaacs, Fault and Liability, 31 Harv. L. Rev. 954, 965 (1918).

Certainly at one time the law was not very much concerned with the moral responsibility of the defendant. "The thought of man shall not be tried," said Chief Justice Brian, in Y.B. 7 Edw. IV, f. 2, pl. 2 (1468), "for the devil himself knoweth not the thought of man." The courts were interested primarily in keeping the peace between individuals by providing a substitute for private vengeance, as the party injured was just as likely to take the law into his own hands when the injury was an innocent one. The person who hurt another by unavoidable accident or in self-defense was required to make good the damage inflicted. "In all civil acts," it was said, in Lambert v. Bessey, T.Raym. 421, 83 Eng.Rep. 220

(K.B.1681), "the law doth not so much regard the intent of the actor, as the loss and damage of the party suffering."

Forms of Action. In the early English law, after the Norman conquest, remedies for wrongs were dependent upon the issuance of writs (orders) to bring the defendant into court. In the course of the 13th Century, the principle was established that no one could bring an action in the King's common law courts without the King's writ. As a result of the jealous insistence of the nobles and others upon the prerogatives of their local courts, the number of writs that the King could issue was limited, and their forms were strictly prescribed. There were, in other words, "forms of action," and unless the plaintiff's claim could be fitted into the form of some established and recognized writ, the plaintiff could not seek money damages in the King's courts. The result was a highly formalized system of procedure that governed and controlled the law as to the substance

of the wrongs that might be remedied. You may learn more about how the forms of action affected the law of procedure in your civil procedure classes.

Two common law writs are the genesis of tort law--the writ of trespass and the writ of trespass on the case, often called action on the case. Here, "trespass" is used in the general sense of doing something to hurt or offend someone rather than the more specific sense of harming someone by intruding onto their land.

The form of action in trespass originally had a criminal character. It would lie only in cases of forcible breaches of the King's peace, and it was only on this basis that the royal courts assumed jurisdiction over the wrong. The purpose of the remedy was at first primarily that of punishment of the crime; but to this there was added later the satisfaction of the injured party's claim for redress. If the defendant was found guilty, damages were awarded to the successful plaintiff, and the defendant was imprisoned, and allowed to purchase his release by payment of a fine. What similarity remains between tort and crime is to be traced to this common beginning. See Woodbine, The Origin of the Action of Trespass, 33 Yale L.J. 799 (1923), 34 Yale L.J. 343 (1934); F. Maitland, The Forms of Action at Common Law, 65 (1941).

The writ of trespass on the case developed out of the practice of applying, in cases in which no writ could be found in the Register to cover the plaintiff's claim, for a special writ, in the nature of trespass, drawn to fit the particular case. Historians have differed as to the origin of this practice. Attempts to trace it are found in C. Fifoot,

History and Sources of the Common Law: Tort and Contract, 66-74 (1949), and Kiralfy, The Action on the Case, Chapter I (1951).

Whatever may have been its origin, it was through this action on the case, rather than through trespass, that most of modern tort and contract law developed. Thus, in the field of tort law, actions for nuisance, conversion, deceit, defamation, malicious prosecution, interference with

economic relations, and the modern action for negligence all developed out of the action on the case.

The distinction between trespass and case lay in the direct and immediate application of force to the person or property of the plaintiff. Trespass would lie only for direct and forcible injuries; case, for other tangible injuries to person or property. The classic illustration of this distinction is that of a log thrown into the highway. A person struck by the rolling log could maintain trespass against the thrower, since the injury was direct and immediate; but one who came along later and was hurt by stumbling over the stationary log could maintain only an action on the case. Leame v. Bray, 3 East 593, 102 Eng.Rep. 724 (1802).

Note that the distinction was not one between intentional and negligent conduct. The emphasis was upon the causal sequence, rather than the character of the defendant's wrong. Trespass would lie for all forcible, direct injuries, whether or not they were intended, while the action on the case might be maintained for injuries intended but not forcible or not direct. There were two additional significant points of difference between the two actions. Trespass,

because of its quasi-criminal character, required no proof of any actual damage, since the invasion of the plaintiff's rights by the criminal conduct was regarded as a tort in itself; while in the action on the case, which developed purely as a civil remedy, there could ordinarily be no liability unless actual damage was proved. Also, in its earlier stages trespass was identified with the view that liability might be imposed without regard to the defendant's fault, while case always had required proof of culpability: either a wrongful intent or wrongful conduct (negligence).

The criminal aspect of trespass disappeared in 1697, when the statute of 5-6 William & Mary, c. 12, abolished the fine and left the action as an exclusively civil remedy. Out of adherence to precedent, however, the courts continued to allow the action even though no real injury was suffered. They were, however, disinclined to extend the scope of trespass beyond the existing precedents, perhaps because of the belief that punishment was primarily the function of the criminal law and the civil action should be used only to compensate for harm done. This explains why in modern law there is a requirement of proving actual damages except in cases of assault, offensive but harmless battery, false imprisonment, and trespass to land. If harm was done, the injured party could still sue in case and recover, even though the defendant's wrong did not amount to a trespass. If no harm was done, the recovery of punitive damages in a civil action was limited to the most flagrant cases, where the criminal law did not apply or was not effective as a deterrent.

5

Hulle v. Orynge (The Case of Thorns)

King's Bench, 1466.

Y.B.M. 6 Edw. IV, folio 7, placitum 18.

BRIAN. In my opinion if a man does a thing he is bound to do it in such a manner that by his deed no injury or damage is inflicted upon others. As in the case where I erect a building, and when the timber is being lifted a piece of it falls upon the house of my neighbor and bruises his house, he will have a good action, and that, although the erection of my house was lawful and the timber fell without my intent.

Similarly, if a man commits an assault upon me and I cannot avoid him if he wants to beat me, and I lift my stick in self-defense in order to prevent him, and there is a man in back of me and I injure him in lifting my stick, in that case he would have an action against me, although my lifting the stick was lawful to defend myself and I injured him without intent.

NOTES AND QUESTIONS

1. This passage, translated from the Norman French, is one of the few bits and fragments of the early English law of torts that have come down to us. Although Brian, who became Chief Justice of the Court of Common Pleas in 1471, was apparently only arguing as counsel in this case, he appears to have been summarizing accepted law.

Weaver v. Ward

King's Bench, 1616.

Hobart 134, 80 Eng.Rep. 284.

Weaver brought an action of trespass of assault and battery against Ward. The defendant pleaded, that he was amongst others by the commandment of the Lords of the Council a trained soldier in London, of the band of one Andrews captain; and so was the plaintiff, and that they were skirmishing with their muskets charged with powder for the exercise in re militari [in a military matter], against another captain and his band; and as they were so skirmishing the defendant casualiter & per infortunium & contra voluntatem suam [accidentally and by misfortune and against his will] in discharging his piece did hurt and wound the plaintiff, which is the same, & c. absque hoc [without this], that he was guilty aliter sive alio modo [otherwise or in another manner].

And upon demurrer by the plaintiff, judgment was given for him; for though it were agreed, that if men tilt or turney in the presence of the King, or if two masters of defence playing their prizes kill one another, that this shall be no felony; or if a lunatick kill a man, or the like, because felony must be done animo felonico [with a felonious mind]; yet in trespass, which tends only to give damages according to hurt or loss, it is not so; and therefore if a lunatick hurt a man, he shall be answerable in

trespass; and therefore no man shall be excused of a trespass (for this is in the nature of an excuse, and not of a justification, prout ei bene licuit [as is properly permitted to him]), except it may be judged utterly without his fault.

As if a man by force take my hand and strike you, or if here the defendant had said, that the plaintiff ran cross his piece when it was

discharging, or had set forth the case with the circumstances, so as it had appeared to the Court that it had been inevitable and that the defendant had committed no negligence to give occasion to the hurt.

NOTES AND QUESTIONS

1. This is the earliest known case in which it was clearly recognized that a defendant might not be liable, even in a trespass action, for a purely accidental injury occurring entirely without his fault. Note that the burden rests upon the defendant to plead and prove his freedom from all fault.

2. The next two centuries saw a gradual blurring of the distinction between trespass and case. The procedural distinction is now long antiquated, although some vestige of it still remains in jurisdictions retaining common law pleading in a modified form. Modern law has almost entirely abandoned the artificial classification of injuries as direct and indirect, and looks instead to the intent or negligence of the wrongdoer.

3. The first step was taken when the action on the case was held to cover injuries that were merely negligent but were directly inflicted, as in Williams v. Holland, 10 Bing. 112, 131 Eng.Rep. 848 (1833) (plaintiff's cart was overturned by collision with wheel of defendant's gig, which was engaged in a race with another gig). Although this left the plaintiff an election between trespass and case, the action of case came to be used quite generally in all cases of negligence, whether direct or indirect, while trespass remained as the remedy for intentional injuries inflicted by acts of violence. Terms such as battery, assault, and false imprisonment, which were varieties of trespass, gradually came to be associated only with intent, and

negligence emerged as a separate tort. The shift was a slow one, and the courts seem to have been quite unconscious of it at the time. When in the 19th Century the old forms of action were replaced in most jurisdictions by code procedure, the new classification remained. Prichard, Trespass, Case and the Rule in Williams v. Holland, 1964 Cambridge L.J. 234. There was occasional confusion, and some talk, for example, of a negligent battery, as in Anderson v. Arnold's Ex'r, 79 Ky. 370 (1881), but, in general, these old trespass terms are now restricted to actions involving intentional conduct. Ryan v. Napier, 245 Ariz. 54, 425 P.3d 230 (2018) (because negligence and intent are mutually exclusive grounds for liability, there can be no claim for the negligent use of intentional force in case involving police officer's use of police dog to "bite and hold").

4. Although we no longer have "forms of action," it usually is helpful from the vantage point of advocacy to place one's claim under a tort label that will be familiar to the court--e.g., "battery," "assault," "negligence,"

"defamation," "nuisance"--and that is still the common practice in both state and federal courts.

5. With certain exceptions, actions for injuries to the person, or to tangible property, now require proof of an intent to inflict them or of failure to exercise proper care to avoid them. As to the necessity of proving actual damage, the courts have continued the distinctions found in the older actions of trespass and case. Thus, whether damage is essential to the existence of a cause of action for a

particular tort depends largely upon its ancestry in terms of the old procedure.

6. Thoughtful perspectives on the problems presented in this chapter can be found in Malone, Ruminations on the Role of Fault in the History of the Common Law of Torts, 31 La. L. Rev. 1 (1970) and David Ibbetson, A Historical Introduction to the Law of Obligations (Oxford University Press 2000).

Brown v. Kendall

Supreme Judicial Court of Massachusetts, 1850.

60 Mass. (6 Cush.) 292.

This was an action of trespass for assault and battery. ***[Two dogs, owned by plaintiff and defendant, were fighting. Defendant tried to separate them by hitting them with a stick. In doing so he backed up toward the plaintiff, and in raising his stick over his shoulder, struck plaintiff in the eye, injuring him.]

Whether it was necessary or proper for the defendant to interfere in the fight between the dogs; whether the interference, if called for, was in a proper manner, and what degree of care was exercised by each party on the occasion; were the subject of controversy between the parties, upon all the evidence in the case ***

[The trial judge, refusing to give requested instructions to the contrary, instructed the jury that if hitting the dogs was a necessary act which defendant was under a duty to do, defendant was required to use only ordinary care in doing it; but if it were only a proper and permissible act, defendant was liable unless he exercised

extraordinary care; and that the burden of proving the extraordinary care was on the defendant.]

The jury under these instructions returned a verdict for the plaintiff; whereupon the defendant alleged exceptions.

SHAW, C.J. This is an action of trespass, vi et armis, brought by George Brown against George K. Kendall, for an assault and battery. ***The facts set forth in the bill of exceptions preclude the supposition, that the blow, inflicted by the hand of the defendant upon the person of the plaintiff, was intentional. The whole case proceeds on the assumption, that the damage sustained by the plaintiff, from the stick held by the defendant, was inadvertent and unintentional; and the case involves the question how far, and under what qualifications, the party by whose unconscious act the damage was done is responsible for it. We use the

term "unintentional" rather than involuntary, because in some of the cases, it is stated, that the act of holding and using a weapon or instrument, the movement of which is the immediate cause of hurt to another, is a voluntary act, although its particular effect in hitting and hurting another is not within the purpose or intention of the party doing the act.

It appears to us, that some of the confusion in the cases on this subject has grown out of the long-vexed question, under the rule of the common law, whether a party's remedy, where he has one, should be sought in an action of the case, or of trespass. This is very distinguishable from the question, whether in a given case, any action will he. The result of these cases is, that if the damage

complained of is the immediate effect of the act of the defendant, trespass vi et armis lies; if consequential only, and not immediate, case is the proper remedy. [Cc]

In these discussions, it is frequently stated by judges, that when one receives injury from the direct act of another, trespass will lie. But we think this is said in reference to the question, whether trespass and not case will lie, assuming that the facts are such, that some action will lie. These dicta are no authority, we think, for holding, that damage received by a direct act of force from another will be sufficient to maintain an action of trespass, whether the act was lawful or unlawful, and neither wilful, intentional, or careless. *** [Evidence showed that the striking of plaintiff was not intentional, but rather done as he was backing up and plaintiff, behind him, was moving forward.]

We think, as the result of all the authorities, the rule is correctly stated by Mr. Greenleaf, that the plaintiff must come prepared with evidence to show either that the intention was unlawful, or that the defendant was in fault; for if the injury was unavoidable, and the conduct of the defendant was free from blame, he will not be liable. 2 Greenl. Ev. §§ 85 to 92; [c]. If, in the prosecution of a lawful act, a casualty purely accidental arises, no action can be supported for an injury arising therefrom. [Cc] In applying these rules to the present case, we can perceive no reason why the instructions asked for by the defendant ought not to have been given; to this effect, that if both plaintiff and defendant at the time of the blow were using ordinary care, or if at that time the defendant was using ordinary care, and the plaintiff was not, or if at that time, both the plaintiff and defendant were not using ordinary care, then the plaintiff could not recover.

In using this term, ordinary care, it may be proper to state, that what constitutes ordinary care will vary with the circumstances of cases. In general, it means that kind and degree of care, which prudent and cautious men would use, such as is required by the exigency of the case, and such as is necessary to guard against probable danger. A man, who should have occasion to discharge a gun, on an open and extensive marsh, or in a forest, would be required to use less circumspection and care, than if he were to do the same thing in an inhabited town, village, or city.

9

To make an accident, or casualty, or as the law sometimes states it, inevitable accident, it must be such an accident as the defendant could not have avoided by the use of the kind and degree of care necessary to the exigency, and in the circumstances in which he was placed.

We are not aware of any circumstances in this case, requiring a distinction between acts which it was lawful and proper to do, and acts of legal duty. There are cases, undoubtedly, in which officers are bound to act under process, for the legality of which they are not responsible, and perhaps some others in which this distinction would be important. We can have no doubt that the act of the defendant in attempting to part the fighting dogs, one of which was his own, and for the injurious acts of which he might be responsible, was a lawful and proper act, which he might do by proper and safe means. If, then, in doing this act, using due care and all proper precautions necessary to the exigency of the case, to avoid hurt to others, in raising his stick for that purpose, he accidentally hit the plaintiff in his

eye, and wounded him, this was the result of pure accident, or was involuntary and unavoidable, and therefore the action would not lie. ***

The court instructed the jury, that if it was not a necessary act, and the defendant was not in duty bound to part the dogs, but might with propriety interfere or not as he chose, the defendant was responsible for the consequences of the blow, unless it appeared that he was in the exercise of extraordinary care, so that the accident was inevitable, using the word not in a strict but a popular sense. This is to be taken in connection with the charge afterwards given, that if the jury believed, that the act of interference in the fight was unnecessary, (that is, as before explained, not a duty incumbent on the defendant,) then the burden of proving extraordinary care on the part of the defendant, or want of ordinary care on the part of the plaintiff, was on the defendant.

The court are of opinion that these directions were not conformable to law. If the act of hitting the plaintiff was unintentional, on the part of the defendant, and done in the doing of a lawful act, then the defendant was not liable, unless it was done in the want of exercise of due care, adapted to the exigency of the case, and therefore such want of due care became part of the plaintiff's case, and the burden of proof was on the plaintiff to establish it. [Cc]

Perhaps the learned judge, by the use of the term extraordinary care, in the above charge, explained as it is by the context, may have intended nothing more than that increased degree of care and diligence, which the exigency of particular circumstances might require, and which men of ordinary care and prudence would use

under like circumstances, to guard against danger. If such was the meaning of this part of the charge, then it does not differ from our views, as above explained. But we are of opinion, that the other part of the charge, that the burden of proof was on the defendant, was incorrect. Those facts which are essential to enable the plaintiff to recover, he takes the burden of proving. The evidence may

10

be offered by the plaintiff or by the defendant; the question of due care, or want of care, may be essentially connected with the main facts, and arise from the same proof; but the effect of the rule, as to the burden of proof, is this, that when the proof is all in, and before the jury, from whatever side it comes, and whether directly proved, or inferred from circumstances, if it appears that the defendant was doing a lawful act, and unintentionally hit and hurt the plaintiff, then unless it also appears to the satisfaction of the jury, that the defendant is chargeable with some fault, negligence, carelessness, or want of prudence, the plaintiff fails to sustain the burden of proof, and is not entitled to recover.

New trial ordered.

NOTES AND QUESTIONS

1. Why a new trial? Why not simply a judgment for the defendant?

2. What has gone on in the law since Hulle v. Orynge in 1466? How would Justice Shaw have decided Weaver v. Ward?

3. This decision is the earliest clear statement of the rule commonly applied: liability must be based on legal fault.

4. While Brown v. Kendall dealt with a defendant who was separating dogs, many tort defendants in Massachusetts at the time were industrial employers. Does this fact, plus the social policy of the time, have a bearing on the legal change reflected in the opinion? See Schwartz, The Character of Early American Tort Law, 36 U.C.L.A. L. Rev. 641, 667--670 (1989).

5. In some jurisdictions, the old distinction between trespass and case survived into the 20th Century, in the form of decisions holding that if the injury is one for which trespass would lie, the defendant must sustain the burden of proving that he was not at fault, while if only case would lie the burden of proving fault is on the plaintiff. The distinction was not finally abandoned in England until Fowler v. Lanning, [1959] 1 Q.B. 426.

Cohen v. Petty

Court of Appeals of the District of Columbia, 1933.

62 App.D.C. 187, 65 F.2d 820.

Groner, Associate Justice. Plaintiffs declaration [complaint] alleged that on December 14, 1930, she was riding as a guest in defendant's automobile; that defendant failed to exercise reasonable care in its operation, and drove it at a reckless and excessive rate of speed so that he lost control of the car and propelled it off the road against an embankment on the side of the road, as the result of which plaintiff received permanent injuries. The trial judge gave binding instructions [directed a verdict], and the plaintiff appeals.

There were four eyewitnesses to the accident, namely, plaintiff and her sister on the one side, and defendant and his wife on the other.

All four were occupants of the car. Defendant was driving the car, and his

11

wife was sitting beside him. Plaintiff and her sister were in the rear seat. ***After passing the Country Club, and when somewhere near Four Corners and five or six miles from Silver Spring, the automobile suddenly swerved out of the road, hit the abutment of a culvert, and ran into the bank, throwing plaintiff and her sister through the roof of the car onto the ground.

Plaintiffs sister estimated the speed of the car just before the accident somewhere between thirty-five and forty miles an hour, and plaintiff herself, who had never driven a car, testified she thought it was nearer forty-five. The place of the accident was just beyond a long and gradual curve in the road. Plaintiff testified that just before the accident, perhaps a minute, she heard the defendant, who, as we have said, was driving the car, exclaim to his wife, "I feel sick," and a moment later heard his wife exclaim in a frightened voice to her husband, "Oh, John, what is the matter?" Immediately thereafter the car left the road and the crash occurred. Her sister, who testified, could not remember anything that occurred on the ride except that, at the time they passed the Country Club, the car was being driven about thirty-five or forty miles an hour and that the occupants of the car were engaged in a general conversation. The road was of concrete and was wide. Plaintiff, when she heard defendant's wife exclaim, "What is the matter?" instead of looking at the driver of the car, says she continued to look down the road, and as a result she

did not see and does not know what subsequently occurred, except that there was a collision with the embankment.

Defendant's evidence as to what occurred just before the car left the road is positive and wholly uncontradicted. His wife, who was sitting beside him, states that they were driving along the road at the moderate rate of speed when all of a sudden defendant said, "Oh, Tree, I feel sick"--defendant's wife's name is Theresa, and he calls her Tree. His wife looked over, and defendant had fainted. "His head had fallen back and his hand had left the wheel and I immediately took hold of the wheel with both hands, and then I do not remember anything else until I waked up on the road in a strange automobile." The witness further testified that her husband's eyes were closed when she looked, and that his fainting and the collision occurred in quick sequence to his previous statement, "Oh, Tree, I feel so sick." The defendant himself testified that he had fainted just before the crash, that he had never fainted before, and that so far as he knew he was in good health, that on the day in question he had had breakfast late, and had had no luncheon, but that he was not feeling badly until the moment before the illness and the fainting occurred.
***

The sole question is whether, under the circumstances we have narrated, the trial court was justified in taking the case from the jury. We think its action was in all respects correct.

It is undoubtedly the law that one who is suddenly stricken by an illness, which he had no reason to anticipate, while driving an

automobile, which renders it impossible for him to control the car, is not chargeable with negligence. [Cc]

In the present case the positive evidence is all to the effect that defendant did not know and had no reason to think he would be subject to an attack such as overcame him. Hence negligence cannot be predicated in this case upon defendant's recklessness in driving an automobile when he knew or should have known of the possibility of an accident from such an event as occurred.

As the plaintiff wholly failed to show any actionable negligence prior to the time the car left the road, or causing or contributing to that occurrence, and as the defendant's positive and uncontradicted evidence shows that the loss of control was due to defendant's sudden illness, it follows the action of the lower court was right. Even if plaintiffs own evidence tended more strongly than it does to imply some act of negligence, it would be insufficient to sustain a verdict and judgment upon proof such as the defendant offered here of undisputed facts, for in such a case the inference must yield to uncontradicted evidence of actual events.

Affirmed.

NOTES AND QUESTIONS

1. Defendant, asleep on the rear seat of an automobile, unconsciously pushed with his foot against the front seat in which plaintiff, the driver, was sitting. Plaintiffs arms were forced off the wheel, the car crashed into a culvert and overturned, and plaintiff was injured. Is defendant liable? Lobert v. Pack, 337 Pa. 103, 9 A.2d 365 (1939) (defendant not liable because he did not act with volition). The Restatement (Third) reporters note that the cases are

"impressively unanimous" in finding no liability for injuries that occur due to an actor's sudden and unforeseeable seizure or loss of consciousness. Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 11(b), comment d (2010) and Reporters' Notes thereto.

2. Defendant, driving an automobile, fell asleep at the wheel. The car went into the ditch and injured the plaintiff. Is defendant liable for his conduct while he is asleep? What if he knew that he was getting sleepy and continued to drive? Is this not always the case? At least one court has found that falling asleep at the wheel of a car is always negligence unless the driver was suddenly overcome with illness. Bushnell v. Bushnell, 103 Conn. 583, 131 A. 432 (1925). Defendant became so frightened when she realized that her brakes were not working that she fainted and was thus unconscious when she collided with plaintiff's car. Liability? Kohler v. Sheffert, 250 Iowa 899, 96 N.W.2d 911 (1959) (fact that she was unconscious at time of collision did not excuse previous negligence in causing the situation that frightened her).

3. Knowing that he was subject to epileptic seizures, driver had a seizure while driving and lost control of the car, which ran into the plaintiff and injured him. Is driver liable? Eleason v. Western Casualty & Surety Co.,

254 Wis. 134, 35 N.W.2d 301 (1948) (liability based on testimony that driver knew he was subject to "spells" that could render him unconscious even though he did not know he had epilepsy). What if he had never had a seizure before? Moore v. Capital Transit Co.,

226 F.2d 57 (D.C.Cir.1955), cert, denied, 350 U.S. 966 (1956) (no liability because never had spell before and no reason to anticipate).

4. A patient was given prescription drugs and discharged from the hospital, without being warned that they would impair his mental and physical abilities. The patient drove his automobile, lost control and struck a tree, injuring his passenger. Is the driver liable to his passenger? Is his doctor? Is the manufacturer of the drugs? Cf. Kirk v. Michael Reese Hospital and Medical Center, 117 III.2d 507, 111 III.Dec. 944, 513 N.E.2d 387 (1987) and McKenzie v. Hawai'i Permanente Medical Group, Inc., 98 Haw. 296, 47 P.3d 1209 (2002).

5. Do you agree with the result of the principal case? What about the argument that anyone who drives an automobile should bear the risk that others will be injured if he loses consciousness while driving, and should be liable for their loss? In a case where an epileptic had an unanticipated seizure, plaintiff's counsel argued most strongly that since defendant had liability insurance, he should bear the risk. Do you find this argument for strict liability persuasive? See Hammontree v. Jenner, 20 Cal.App.3d 528, 97 Cal.Rptr. 739 (1971). The court rejected this contention.

Spano v. Perini Corp.

Court of Appeals of New York, 1969.

25 N.Y.2d 11, 250 N.E.2d 31, 302 N.Y.S.2d 527, on remand,

33 A.D.2d 516, 304 N.Y.S.2d 15 (1969).

FULD, CHIEF Judge. The principal question posed on this appeal is whether a person who has sustained property damage caused by blasting on nearby property can maintain an action for damages

without a showing that the blaster was negligent. Since 1893, when this court decided the case of Booth v. Rome, W. & O.T.R.R. Co., 140 N.Y. 267, 35 N.E. 592, 24 L.R.A. 105, it has been the law of this State that proof of negligence was required unless the blast was accompanied by an actual physical invasion of the damaged property--for example, by rocks or other material being cast upon the premises. We are now asked to reconsider that rule.

The plaintiff Spano is the owner of a garage in Brooklyn which was wrecked by a blast occurring on November 27, 1962. There was then in that garage, for repairs, an automobile owned by the plaintiff Davis which he also claims was damaged by the blasting. Each of the plaintiffs brought suit against the two defendants who, as joint venturers, were engaged in constructing a tunnel in the vicinity pursuant to a contract with the City of New York. ***

It is undisputed that, on the day in question (November 27, 1962), the defendants had set off a total of 194 sticks of dynamite at a

construction site which was only 125 feet away from the damaged premises. Although both plaintiffs [also] alleged negligence in their complaints, no attempt was made to show that the defendants had failed to exercise reasonable care or to take necessary precautions when they were blasting. Instead, they chose to rely, upon the trial, solely on the principle of absolute liability ***

The concept of absolute liability in blasting cases is hardly a novel one. The overwhelming majority of American jurisdictions have adopted such a rule. [Cc] Indeed, this court itself, several years ago, noted that a change in our law would "conform to the more widely

(indeed almost universally) approved doctrine that a blaster is absolutely liable for any damages he causes, with or without trespass". [C]

We need not rely solely however upon out-of-state decisions in order to attain our result. Not only has the rationale of the Booth case [c] been overwhelmingly rejected elsewhere but it appears to be fundamentally inconsistent with earlier cases in our own court which had held, long before Booth was decided, that a party was absolutely liable for damages to neighboring property caused by explosions. (See, e.g., Hay v. Cohoes Co., 2 N.Y. 159; Heeg v. Licht, 80 N.Y. 579.) In the Hay case (2 N.Y. 159, supra), for example, the defendant was engaged in blasting an excavation for a canal and the force of the blasts caused large quantities of earth and stones to be thrown against the plaintiff's house, knocking down his stoop and part of his chimney. The court held the defendant absolutely liable for the damage caused ***

Although the court in Booth drew a distinction between a situation--such as was presented in the Hay case--where there was "a physical invasion" of, or trespass on, the plaintiffs property and one in which the damage was caused by "setting the air in motion, or in some other unexplained way," [c], it is clear that the court, in the earlier cases, was not concerned with the particular manner by which the damage was caused but by the simple fact that any explosion in a built-up area was likely to cause damage. Thus, in Heeg v. Licht, 80 N.Y. 579, the court held that there should be absolute liability where the damage was caused by the accidental explosion of stored gunpowder, even in the absence of a physical trespass (p. 581):

"The defendant had erected a building and stored materials therein, which from their character were liable to and actually did explode, causing injury to the plaintiff. The fact that the explosion took place tends to establish that the magazine was dangerous and liable to cause damage to the property of persons residing in the vicinity. ***The fact that the magazine was liable to such a contingency, which could not be guarded against or averted by the greatest degree of care and vigilance, evinces its dangerous character, ***In such a case, the rule which exonerates a party engaged in a lawful business, when free from negligence, has no application."

15

Such reasoning should, we venture, have led to the conclusion that the intentional setting off of explosives--that is, blasting--in an area in which it was likely to cause harm to neighboring property similarly results in absolute liability. However, the court in the Booth case rejected such an extension of the rule for the reason that "[t]o exclude the defendant from blasting to adapt its lot to the contemplated uses, at the instance of the plaintiff, would not be a compromise between conflicting rights, but an extinguishment of the right of the one for the benefit of the other" [c], The court expanded on this by stating, "This sacrifice, we think, the law does not exact. Public policy is sustained by the building up of towns and cities and the improvement of property. Any unnecessary restraint on freedom of action of a property owner hinders this."

This rationale cannot withstand analysis. The plaintiff in Booth was not seeking, as the court implied, to "exclude the defendant from blasting" and thus prevent desirable improvements to the latter's

property. Rather, he was merely seeking compensation for the damage which was inflicted upon his own property as a result of that blasting. The question, in other words, was not whether it was lawful or proper to engage in blasting but who should bear the cost of any resulting damage--the person who engaged in the dangerous activity or the innocent neighbor injured thereby. Viewed in such a light, it clearly appears that Booth was wrongly decided and should be forthrightly overruled ***

[The court then remanded the case to the appellate division to determine the sufficiency of the evidence on causation because the appellate division had affirmed the trial court judge on the sole ground that no negligence had been proven and thus had no occasion to consider whether the blasting caused the plaintiffs' damage.]

NOTES AND QUESTIONS

1. The early common law absolute or strict liability of the Weaver v. Ward type has persisted stubbornly in connection with trespass to real property and has been exorcised only in mid-20th Century. Thus, in Randall v. Shelton, 293 S.W.2d 559 (Ky.1956), defendant's truck ran over a large stone in the gravel highway and the tire cast it out so that it hit plaintiff, who was standing in her yard, and injured her. The appellate court found no negligence and held that the defendant's motion for judgment notwithstanding the verdict should have been granted. To do this, it had to overrule an earlier Kentucky case in which a runaway street car invaded plaintiff's property and did damage. The special rule for trespass explains some of the early New York cases discussed in the opinion of the principal case.

2. The procedural distinction long made in New York, between an action of trespass for blasting causing physical invasion by casting rocks on the plaintiff's land, for which there was strict liability, and the action of nuisance for vibration or concussion that shook plaintiff's house to pieces,

16

which would require proof of negligence, was denounced as a marriage of procedural technicality with scientific ignorance. This distinction, abandoned by New York in the principal case, has lost its significance in states that apply strict liability to blasting operations because blasting is an abnormally dangerous activity. See, e.g., Stocks v. CFW Construction Co., Inc., 472 So.2d 1044 (Ala. 1985). The question of strict liability for damage by blasting and other activities that have been deemed extrahazardous or abnormally dangerous is considered at greater length in Chapter 14.

3. For the present, it is sufficient to note that this case represents one type of situation in which strict liability may be applied, without any showing of intent or negligence, by the majority of the courts that have considered the question. This has sometimes been called absolute liability, or liability without fault. The first Restatement of Torts § 519 (1938) conferred the name of "ultrahazardous activities" upon these cases. The drafters of Restatement (Second) of Torts § 519 (1977) concluded that a better name is "abnormally dangerous activities," since the emphasis is more upon the abnormal character of what the defendant does in relation to the surroundings than upon the high degree of danger. That label was retained by the drafters of

Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 20 (2010).

4. Strict liability also has been imposed upon manufacturers of products when defects in their wares have caused injury. This position is now generally followed when the defect causing the injury is due to an error in the manufacturing process. There is less agreement as to the application of strict liability for failure to use a safer design or to warn of dangers. This application of strict liability to products liability is discussed in Chapter 15.

5. Strict liability involves a good many issues that are to be considered later in Chapters 14 and 15. For present purposes, note merely that there are three possible bases of tort liability:

A. Intentional conduct.

B. Negligent conduct that creates an unreasonable risk of causing harm.

C. Conduct that is neither intentional nor negligent but that subjects the actor to strict liability because of public policy.

6. These will be considered in turn, which will carry us through Chapter 15. The remainder of this book covers particular fields of case law in which special problems arise, and in most of which intent, negligence, and strict liability are all involved and intermingled as possible bases for recovery.

CHAPTER 2 INTENTIONAL INTERFERENCE WITH PERSON OR PROPERTY

1. Intent

Garratt v. Dailey

Supreme Court of Washington, 1955.

46 Wash.2d 197, 279 P.2d 1091.

HILL, Justice. The liability of an infant for an alleged battery is presented to this court for the first time. Brian Dailey (age five years, nine months) was visiting with Naomi Garratt, an adult and a sister of the plaintiff, Ruth Garratt, likewise an adult, in the back yard of the plaintiff's home, on July 16, 1951. It is plaintiff's contention that she came out into the back yard to talk with Naomi and that, as she started to sit down in a wood and canvas lawn chair, Brian deliberately pulled it out from under her. The only one of the three present so testifying was Naomi Garratt. (Ruth Garratt, the plaintiff did not testify as to how or why she fell.) The trial, court, unwilling to accept this testimony, adopted instead Brian Dailey's version of what happened, and made the following findings:

"III. ***that while Naomi Garratt and Brian Dailey were in the back yard the plaintiff, Ruth Garratt, came out of her house into the back yard. Some time subsequent thereto defendant, Brian Dailey, picked up a lightly built wood and canvas lawn chair which was then and there located in the back yard of the above described premises,

moved it sideways a few feet and seated himself therein, at which time he discovered the plaintiff, Ruth Garratt, about to sit down at the place where the lawn chair had formerly been, at which time he hurriedly got up from the chair and attempted to move it toward Ruth Garratt to aid her in sitting down in the chair; that due to the defendant's small size and lack of dexterity he was unable to get the lawn chair under the plaintiff in time to prevent her from falling to the ground. That plaintiff fell to the ground and sustained a fracture of her hip, and other injuries and damages as hereinafter set forth.

"IV. That the preponderance of the evidence in this case establishes that when the defendant, Brian Dailey moved the chair in question he did not have any wilful or unlawful purpose in doing so; that he did not have any intent to injure the plaintiff, or any intent to bring about any unauthorized or offensive contact with her person or any objects appurtenant thereto; that the circumstances which immediately preceded the fall of the plaintiff established that the defendant, Brian

Dailey, did not have purpose, intent or design to perform a prank or to effect an assault and battery upon the person of the plaintiff." (Italics ours, for a purpose hereinafter indicated.)

It is conceded that Ruth Garratt's fall resulted in a fractured hip and other painful and serious injuries. To obviate the necessity of a retrial in the event this court determines that she was entitled to a judgment against Brian Dailey, the amount of her damage was found to be $11,000. Plaintiff appeals from a judgment dismissing the action and asks for the entry of a judgment in that amount or a new trial.

The authorities generally, but with certain notable exceptions, [c] state that when a minor has committed a tort with force he is liable to be proceeded against as any other person would be. ***

In our analysis of the applicable law, we start with the basic premise that Brian, whether five or fifty-five, must have committed some wrongful act before he could be liable for appellant's injuries. ***

It is urged that Brian's action in moving the chair constituted a battery. A definition (not all-inclusive but sufficient for our purpose) of a battery is the intentional infliction of a harmful bodily contact upon another. ***

We have in this case no question of consent or privilege. We therefore proceed to an immediate consideration of intent and its place in the law of battery. In the comment on clause (a) of § 13, the Restatement says:

"Character of Actor's Intention. In order that an act may be done with the intention of bringing about a harmful or offensive contact or an apprehension thereof to a particular person, either the other or a third person, the act must be done for the purpose of causing the contact or apprehension or with knowledge on the part of the actor that such contact or apprehension is substantially certain to be produced." [C]

We have here the conceded volitional act of Brian, i.e., the moving of a chair. Had the plaintiff proved to the satisfaction of the trial court that Brian moved the chair while she was in the act of sitting down, Brian's action would patently have been for the purpose or with the intent of causing the plaintiff's bodily contact with the ground, and

she would be entitled to a judgment against him for the resulting damages. [Cc]

The plaintiff based her case on that theory, and the trial court held that she failed in her proof and accepted Brian's version of the facts rather than that given by the eyewitness who testified for the plaintiff. After the trial court determined that the plaintiff had not established her theory of a battery (i.e., that Brian had pulled the chair out from under the plaintiff while she was in the act of sitting down), it then became concerned with whether a battery was established under the facts as it found them to be.

19

In this connection, we quote another portion of the comment on the "Character of actor's intention," relating to clause (a) of the rule from [Restatement (First) Torts, 29, § 13]:

"It is not enough that the act itself is intentionally done and this, even though the actor realizes or should realize that it contains a very grave risk of bringing about the contact or apprehension. Such realization may make the actor's conduct negligent or even reckless but unless he realizes that to a substantial certainty, the contact or apprehension will result, the actor has not that intention which is necessary to make him liable under the rule stated in this section."

A battery would be established if, in addition to plaintiffs fall, it was proved that, when Brian moved the chair, he knew with substantial certainty that the plaintiff would attempt to sit down where the chair had been. If Brian had any of the intents which the trial court found, in the italicized portions of the findings of fact quoted above, that he did not have, he would of course have had the knowledge to which

we have referred. The mere absence of any intent to injure the plaintiff or to play a prank on her or to embarrass her, or to commit an assault and battery on her would not absolve him from liability if in fact he had such knowledge. [C] Without such knowledge, there would be nothing wrongful about Brian's act in moving the chair and, there being no wrongful act, there would be no liability.

While a finding that Brian had no such knowledge can be inferred from the findings made, we believe that before the plaintiffs action in such a case should be dismissed there should be no question but that the trial court had passed upon that issue; hence, the case should be remanded for clarification of the findings to specifically cover the question of Brian's knowledge, because intent could be inferred therefrom. If the court finds that he had such knowledge the necessary intent will be established and the plaintiff will be entitled to recover, even though there was no purpose to injure or embarrass the plaintiff. [C] If Brian did not have such knowledge, there was no wrongful act by him and the basic premise of liability on the theory of a battery was not established.

It will be noted that the law of battery as we have discussed it is the law applicable to adults, and no significance has been attached to the fact that Brian was a child less than six years of age when the alleged battery occurred. The only circumstance where Brian's age is of any consequence is in determining what he knew, and there his experience, capacity, and understanding are of course material.

From what has been said, it is clear that we find no merit in plaintiff's contention that we can direct the entry of a judgment for $11,000 in her favor on the record now before us.

Nor do we find any error in the record that warrants a new trial.

***

20

The cause is remanded for clarification, with instructions [for the trial court judge] to make definite findings on the issue of whether Brian Dailey knew with substantial certainty that the plaintiff would attempt to sit down where the chair which he moved had been, and to change the judgment if the findings warrant it. ***

Remanded for clarification.

[On remand, the trial judge concluded that it was necessary for him to consider carefully the time sequence, as he had not done before; and this resulted in his finding "that the arthritic woman had begun the slow process of being seated when the defendant quickly removed the chair and seated himself upon it, and that he knew, with substantial certainty, at that time that she would attempt to sit in the place where the chair had been." He entered judgment for the plaintiff in the amount of $11,000, which was affirmed on a second appeal in Garratt v. Dailey, 49 Wash.2d 499, 304 P.2d 681 (1956).]

NOTES AND QUESTIONS

1. The trial court judge found that plaintiff suffered damages in the amount of $11,000. For most intentional torts, the court will award nominal damages even if no actual damages were proved. Of course, if the plaintiff does prove actual damages, as she did in this case, defendant is liable for those actual damages. How would Ms. Garratt's lawyer prove actual damages? See Chapter 10, Damages.

2. Note that the trial judge was the finder of fact both times. Why do you think his findings of fact were different the second time? Might he have been influenced by the appellate court's view of the facts as well as its pronouncement of the law?

3. Can a child five years and nine months old have an intent to do harm to another? And if so, how can that intent be "fault"? Suppose that a boy of seven, playing with a bow and arrow, aims at the feet of a girl of five but the arrow hits her in the eye. Is he liable? Weisbart v. Flohr, 260 Cal.App.2d 281, 67 Cal.Rptr. 114 (1968) (yes).

4. Can a four-year-old child who strikes his babysitter in the throat, crushing her larynx, be held liable for an intentional tort? Bailey v. C.S., 12 S.W.3d 159 (Tex. App. 2000) (rejecting argument that four-year-old was incapable of intent). What about a two-year-old child who bites an infant? See Fromenthal v. Clark, 442 So.2d 608 (La.App.1983), cert, denied, 444 So.2d 1242 (1984) (affirming trial court ruling that two-year-old was too young to form intent).

5. At common law, parents are not liable for the torts of their children unless the plaintiff can show some fault on the part of the parents through, for example, negligence in supervising the child. (We will explore Negligence in Chapter 4.) Some states enacted statutes that make parents liable for their child's malicious torts. Can a young child commit a tort in a "malicious" state of mind? Ortega v. Montoya, 97 N.M. 159, 637 P.2d 841 (1981) (eight-year-old

boy could be capable of willful and malicious conduct and it was for jury to determine whether he had acted in such a manner).

Wagner v. State

Supreme Court of Utah, 2005.

2005 UT 54, 122 P.3d 599.

[Mrs. Wagner was standing in line at a K-Mart store when she was suddenly attacked from behind by Mr. Giese who grabbed her by the head and hair and threw her to the ground. Mr. Giese was a mentally disabled patient accompanied by state employees who had brought him to K-Mart as part of his treatment program and remained there to supervise him. Mrs. Wagner and her husband filed negligence claims against the State, alleging its employees did not properly supervise Mr. Giese. The trial court granted a 12(b)(6) motion to dismiss based on the State's argument that the attack constituted a battery, a tort for which the State has retained immunity from suit. The appellate court affirmed that ruling and the Wagners then petitioned the Utah Supreme Court for review. It too affirmed.]

Wilkins, Associate Chief Justice: ***The Wagners argue that Mr. Giese's attack could not legally constitute a battery because that intentional tort requires the actor to intend harm or offense through his deliberate contact, an intent Mr. Giese was mentally incompetent to form. The State, on the other hand, argues that the only intent required ***is simply the intent to make a contact. The contact must be harmful or offensive by law, but the actor need not intend harm so long as he intended contact.

***While there is some variation among the definitions of the tort of battery, Prosser and Keeton on the Law of Torts § 8, at 33-34 (W. Page Keeton et al. eds., 5th ed.1984) (hereinafter Prosser), Utah

has adopted the Second Restatement of Torts to define the elements of this intentional tort, including the element of intent. ***

We conclude that the plain language of the Restatement, the comments to the Restatement, Prosser and Keeton's exhaustive explanation of the meaning of intent as described in the Restatement, and the majority of case law on the subject in all jurisdictions including Utah, compels us to agree with the State that only intent to make contact is necessary.

In order for a contact to constitute a battery at civil law, two elements must be satisfied. First, the contact must have been deliberate. Second, the contact must have been harmful or offensive at law. We hold that the actor need not intend that his contact be harmful or offensive in order to commit a battery so long as he deliberately made the contact and so long as that contact satisfies our legal test for what is harmful or offensive.

22

Section 2 of the Restatement (Second) of Torts defines the term "act" as "an external manifestation of the actor's will and does not include any of its results, even the most direct, immediate, and intended." Id. § 2. To illustrate this point, the comments clarify that when an actor points a pistol at another person and pulls the trigger, the act is the pulling of the trigger. Id. at cmt. c. The consequence of that act is the "impingement of the bullet upon the other's person." Id. It would be improper to describe the act as "the shooting," since the shooting is actually the conflation of the act with the consequence. For another example, the act that has taken place when one intentionally strikes another with his fist "is only the movement of the

actor's hand and not the contact with the others body immediately established." Id. Thus, presuming that the movement was voluntary rather than spastic, whether an actor has committed an intentional or negligent contact with another, and thus a tort sounding in battery or negligence, depends not upon whether he intended to move his hand, but upon whether he intended to make contact thereby.

The example the Restatement sets forth to illustrate this point is that of an actor firing a gun into the Mojave Desert. Restatement (Second of Torts) § 8A cmt. a. In both accidental and intentional shootings, the actor intended to pull the trigger. Id. Battery liability, rather than liability sounding in negligence, will attach only when the actor pulled the trigger in order to shoot another person, or knowing that it was substantially likely that pulling the trigger would lead to that result. Id. § 8A cmts. a & b. An actor who intentionally fires a bullet, but who does not realize that the bullet would make contact with another person, as when "the bullet hits a person who is present in the desert without the actor's knowledge," is not liable for an intentional tort. Id.

***We agree with the Wagners that not all intentional contacts are actionable as batteries, and that the contact must be harmful or offensive in order to be actionable. We do not agree, however, that, under our civil law, the actor must appreciate that his act is harmful or offensive in order for his contact to constitute a battery. ***

Prosser echoed the Restatement when he clarified that "[t]he intent with which tort liability is concerned is not necessarily a hostile intent, or a desire to do harm. Rather, it is an intent to bring about a result which will invade the interests of another in a way that the law

forbids." Prosser, supra, § 8, at 36. ***[Prosser] lists as one type of intentional tort the act of "intentionally invading the rights of another under a mistaken belief of committing no wrong." Id. § 8, at 37.

***We recognize that, in this instance, the retained immunity doctrine bars the caretakers of a handicapped person from taking responsibility for the conduct of their charge. It is unfortunate, and perhaps it is improvident of the State to retain immunity in this area. But it is not our role as a judiciary to override the legislature in this matter; it is for us only to interpret and apply the law as it is. We will not limit the recoveries of all other plaintiffs similarly injured by defining the

tort of battery in such a way as to make it far more burdensome for plaintiffs to satisfy its elements and recover, nor will we distort the plain language of the Restatement so as to elevate an actor's "right" to deliberately touch others at will over an individual's right to the preservation of her bodily integrity.

***Applying the rule we have laid out today to the facts of this case, it is clear that Mr. Giese's attack constituted a battery upon Mrs. Wagner. There is no allegation that his action was the result of an involuntary muscular movement or spasm. Further, the Wagners concede that Mr. Giese affirmatively attacked her; they do not argue that he made muscular movements that inadvertently or accidentally brought him into contact with her.

***So long as he intended to make that contact, and so long as that contact was one to which Mrs. Wagner had not given her consent, either expressly or by implication, he committed a battery. Because

battery is a tort for which the State has retained immunity, we affirm the court of appeals' decision to dismiss the case for failure to state a claim.

[Concurring opinion omitted.]

NOTES AND QUESTIONS

1. The Wagner court's conclusion that plaintiff must prove only that defendant intended to touch plaintiff, resulting in offense or harm, is sometimes referred to as "single" intent. Other courts have required what is sometimes called "dual" intent: plaintiff must prove that defendant intended to offend or harm plaintiff by causing bodily contact. See, for example, Carlsen v. Koivumaki, 227 Cal.App.4th 879, 174 Cal.Rptr.3d 339 (2014) (stating that California requires that plaintiff prove that defendant touched the plaintiff, or caused the plaintiff to be touched, with the intent to harm or offend the plaintiff). For a survey of the viewpoints on whether "single" intent or "dual" intent should be required for the intentional torts, focused largely on battery, see Simons, A Restatement (Third) of Intentional Torts? 48 Ariz. L. Rev. 1061 (2006) and King, The Torts Restatement's Inchoate Definition of Intent for Battery, and Reflections on the Province of Restatements, 38 Pepp. L. Rev. 623 (2011).

2. Distinguish:

A. The intent to do an act. The defendant throws a rock.

B. The intent to bring about the consequences of the act. The rock hits someone. Liability for intentional torts is premised on the intent to bring about the consequences. For battery, the consequence is a

touching. The touching must in law be regarded as objectively harmful or offensive.

C. The intent to bring about a specific harm (e.g., broken leg). This is sufficient to establish intent, but not necessary.

D. An actor's knowledge that particular consequences (e.g., touching that is harmful or offensive) are substantially certain to follow is sufficient to establish intent.

E. An actor's knowledge that she is merely risking particular consequences (e.g., touching that is harmful or offensive) is not sufficient to establish intent--although it may be negligence if the risk is an unreasonable one under the circumstances.

F. The motive for the act. Defendant's motive is irrelevant. Hudgens v. Prosper, Inc., 2011 WL 8181959 (Utah Dist. Ct. 2011) (allegations of intent sufficient even if motive was to provide incentive to team members and increase profits rather than to injure plaintiff).

3. Distinguish:

A. The defendant does not act. He is carried onto plaintiff's land against his will. Smith v. Stone, Style 65, 82 Eng.Rep. 533 (1647) (no liability).

B. He acts intentionally, but under fear or threats. Twelve armed men compel him to enter plaintiffs land and steal a horse. Gilbert v. Stone, Style 72, 82 Eng.Rep. 539 (1648) (intent, but may have excuse if acted under duress).

C. He acts intentionally, but without any desire to affect the plaintiff, or any certainty that he will do so. He rides a horse, which runs away with him and runs the plaintiff down. Gibbons v. Pepper, 1 Ld.Raym. 38, 91 Eng.Rep. 922 (1695) (no liability if someone else struck the horse; liability if defendant's spurring caused runaway).

D. He acts with the desire to affect the plaintiff, but for an entirely permissible or laudable purpose. He shoots the plaintiff in self-defense or while a soldier defending his country. See Chapter 3, Privileges (satisfies intent requirement but may result in no liability if conduct is privileged).

4. It may not seem important to distinguish between negligent and intentionally wrongful conduct: the defendant usually will be held liable to the plaintiff in either situation. Nevertheless, the distinction may be legally significant. In addition to the principal case, consider the following:

A. Will defendant be liable for punitive damages? See Chapter 10, Section 3.

B. Will the plaintiff be required to produce an affidavit of medical malpractice from an expert to prove consent lacking due to lack of informed consent? See page 228 and Humboldt Gen. Hosp. v. Sixth Judicial Dist. Crt., 132 Nev. 544, 376 P.3d 167 (2016) (failure to obtain informed consent is not battery but medical malpractice and therefore subject to the requirement of an affidavit).

C. Will the defense of contributory negligence be available to defendant? See page 663, note 7.

D. Will defendant's employer be liable under the doctrine of respondeat superior? See page 757, note 3.

E. How far will the law trace the consequences of defendant's wrongful act? See Tate v. Canonica, 180 Cal.App.2d 898, 5 Cal.Rptr. 28 (1960) (more inclined to find defendant's conduct was legal cause of harm if tort was

intentional) and R.D. v. W.H., 875 P.2d 26 (Wyo.1994) (court imposes higher degree of responsibility on those who commit intentional act).

F. Will the defendant be reimbursed through a liability insurance policy? See Allstate Ins. Co. v. Hiseley, 465 F.2d 1243 (10th Cir.1972) (applying Oklahoma law) (following an incident outside a bar, one car pursued another at speeds over 100 miles an hour and then bumped it, causing its driver to lose control and crash); Automobile Ins. Co. of Hartford v. Cook, 7 N.Y.3d 131, 850 N.E.2d 1152, 818 N.Y.S.2d 176 (2006) (insured shot an acquaintance in self-defense inside insured's home); and State Farm Fire and Casualty Co. v. Tully, 322 Conn. 566, 142 A.3d 1079 (2016) (finding that evidence of voluntary intoxication does not negate intent in case involving homeowners insurance coverage for lawsuit alleging sexual assault of minor by homeowner). Pryor, The Stories We Tell: Intentional Harm and the Quest for Insurance Funding, 75 Tex. L. Rev. 1721 (1997).

G. Has the state statute of limitations run? Baska v. Scherzer, 283 Kan. 750, 156 P.3d 617 (2007) (statute of limitations for intentional tort applies to cause of action brought against two teenagers who hit

the mother of one of their friends when the mother stepped between them to stop a fight). Estate of Puckett v. Clement, 238 So.3d 1139 (Miss. 2018) (despite plaintiff's characterization of the claim as negligent discharge of a firearm, court applied the statute of limitations for intentional torts where defendant shot at plaintiff as she was removing a planter from his porch).

H. Will an employer be subject to liability to an employee in spite of a general worker compensation immunity shield? Some state worker compensation statutes provide an exception to the immunity for intentional wrongdoing. Does an employer's intentional failure to train an employee to perform a dangerous task supply the requisite intent to injure under the worker compensation intentional injury exception? See Reed Tool Co. v. Copelin, 689 S.W.2d 404 (Tex.1985). What about an employer's deliberate exposure of employees to dangerous products or equipment dangerous because it is in ill repair? See Millison v. E.I. du Pont de Nemours & Co., 101 N.J. 161, 501 A.2d 505 (1985) and Bardere v. Zafir, 102 A.D.2d 422, 477 N.Y.S.2d 131, aff'd, 63 N.Y.2d 850, 472 N.E.2d 37, 482 N.Y.S.2d 261 (1984) (plaintiff must show "specific acts [by the employer] directed at causing harm to particular employees"); Lucenti v. Laviero, 327 Conn. 764, 176 A.3d 1 (2018) (employee failed to show that employer had subjective intent to create a dangerous condition with substantial certainty that injury would occur in its temporary fix of excavator).

I. Will the plaintiff be able to bring a cause of action against the United States or a state government, which may be liable for the negligent acts of its employees, but not for their intentional acts? See note 5B, page 744 and City of Watauga v. Gordon, 434 S.W.3d 586

(Tex. 2014) (arrestee's action for injury caused by handcuffs was an action for battery rather than one for negligence, and thus city was immune because it had not waived its immunity for intentional torts).

5. Do you think that a court's characterization of a defendant's conduct as "negligent" or "intentional" sometimes might be influenced by the

legal effect of its finding? Since the court is not bound by either party's characterization of the events, such influence could occur, but only in close cases. At the receiving dock of a meatpacking plant, plaintiff was unloading a truck when a government meat inspector leapt out at him, screamed "boo," pulled his wool stocking cap over his eyes, and jumped on his back. Plaintiff fell forward and struck his face on some meat hooks, severely injuring his mouth and teeth. Plaintiff's complaint was for negligent conduct, apparently because the defendant's employer, the United States, would be liable for its employee's negligence, but not his battery. Cf. Lambertson v. United States, 528 F.2d 441 (2d Cir.1976), cert, denied, 426 U.S. 921 (1976) (court did not permit plaintiff to recover by "dressing up the substance" of battery in the "garments" of negligence). See also Wright v. University of Utah, 876 P.2d 380, 386 (Utah App. 1994) (describing plaintiffs attempt to circumvent the governmental immunity statute by recasting her claim as one sounding in negligence rather than battery as "fruitless, albeit creative").

6. For a discussion of the treatment of intent in English and American tort law, see Finnis, "Intention in Tort Law" in Owen, Philosophical Foundations of Tort Law 229 (Clarendon Press 1995).

See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 1 (2010).

Ranson v. Kitner

Appellate Court of Illinois, 1889.

31 Ill.App. 241.

CONGER, J. This was an action brought by appellee against appellants to recover the value of a dog killed by appellants, and a judgment rendered for $50.

The defense was that appellants were hunting for wolves, that appellee's dog had a striking resemblance to a wolf, that they in good faith believed it to be one, and killed it as such.

Many points are made, and a lengthy argument failed to show that error in the trial below was committed, but we are inclined to think that no material error occurred to the prejudice of appellants.

The jury held them liable for the value of the dog, and we do not see how they could have done otherwise under the evidence. Appellants are clearly liable for the damages caused by their mistake, notwithstanding they were acting in good faith.

We see no reason for interfering with the conclusion reached by the jury, and the judgment will be affirmed.

NOTES AND QUESTIONS

1. Did the defendant intend to kill the dog? The court calls it "mistake." Why not accident?

2. Defendant fuel oil distributor had a contract to deliver oil to a residence. One day, during the delivery, the oil overflowed and damaged surrounding lawn and shrubberies. The tank overflowed because it already

had been filled by another company, hired by the new owner. The previous owner apparently had not canceled his contract when he moved. Is the fuel oil distributor liable for trespass? Serota v. M. & M. Utilities, Inc., 55 Mise.2d 286, 285 N.Y.S.2d 121 (1967) (reasonable mistake no defense to trespass).

3. Defendant, seeking to confront the driver who frightened his horses the previous day, pushed back the hat of the wrong man. Does he intend to touch him? Seigel v. Long, 169 Ala. 79, 53 So. 753 (1910). What if a surgeon operates on the wrong patient? Gill v. Selling, 125 Or. 587, 267 P. 812 (1928). Defendant cuts and removes timber from plaintiff's land under a reasonable belief that it was on his own land. Did he intend to take plaintiff's timber? Perry v. Jefferies, 61 S.C. 292, 39 S.E. 515 (1901). After purchasing some sheep, defendant butcher was driving them down the road into town when some of plaintiff's sheep became intermingled with them. Defendant stopped and sorted most of plaintiff's sheep out of the herd, but plaintiff proved that four of his were taken into town and butchered with those of defendant's. Were defendant's actions intentional? Dexter v. Cole, 6 Wis. 319, 70 Am.Dec. 465 (1857). Generally, mistake as to the identity of the person or animal does not negate intent and thus defendant is liable.

4. On the other hand, some of the defendant's privileges depend, not upon the existence of a fact, but upon the reasonable belief that the fact exists. Defendant, seeing the plaintiff reach for a handkerchief in his pocket, reasonably believes that he is reaching for a gun, and strikes plaintiff to defend himself. See page 121. Mistakes as to the existence of a privilege, like self-defense, are dealt with in Chapter 3 in connection with the privilege itself.

McGuire v. Almy

Supreme Judicial Court of Massachusetts, 1937.

297 Mass. 323, 8 N.E.2d 760.

QUA, JUSTICE. This is an action of tort for assault and battery. The only question of law reported is whether the judge should have directed a verdict for the defendant.

The following facts are established by the plaintiff's own evidence: In August, 1930, the plaintiff was employed to take care of the defendant. The plaintiff was a registered nurse and was a graduate of a training school for nurses. The defendant was an insane person. Before the plaintiff was hired she learned that the defendant was a "mental case and was in good physical condition," and that for some time two nurses had been taking care of her. The plaintiff was on "24 hour duty." The plaintiff slept in the room next to the defendant's room. Except when the plaintiff was with the defendant, the plaintiff kept the defendant locked in the defendant's room. ***

On April 19, 1932, the defendant, while locked in her room, had a violent attack. The plaintiff heard a crashing of furniture and then knew that the defendant was ugly, violent and dangerous. The

defendant told the plaintiff and a Miss Maroney, "the maid," who was with the plaintiff

28

in the adjoining room, that if they came into the defendant's room, she would kill them. The plaintiff and Miss Maroney looked into the defendant's room, "saw what the defendant had done," and "thought it best to take the broken stuff away before she did any harm to herself with it." They sent for a Mr. Emerton, the defendant's brother-in-law. When he arrived the defendant was in the middle of her room about ten feet from the door, holding upraised the leg of a low-boy as if she were going to strike. The plaintiff stepped into the room and walked toward the defendant, while Mr. Emerton and Miss Maroney remained in the doorway. As the plaintiff approached the defendant and tried to take hold of the defendant's hand which held the leg, the defendant struck the plaintiffs head with it, causing the injuries for which the action was brought.

The extent to which an insane person is liable for torts has not been fully defined in this Commonwealth. ***

Turning to authorities elsewhere, we find that courts in this country almost invariably say in the broadest terms that an insane person is liable for his torts. As a rule no distinction is made between those torts which would ordinarily be classed as intentional and those which would ordinarily be classed as negligent, nor do the courts discuss the effect of different kinds of insanity or of varying degrees of capacity as bearing upon the ability of the defendant to understand the particular act in question or to make a reasoned decision with respect to it, although it is sometimes said that an

insane person is not liable for torts requiring malice of which he is incapable. Defamation and malicious prosecution are the torts more commonly mentioned in this connection. ***These decisions are rested more upon grounds of public policy and upon what might be called a popular view of the requirements of essential justice than upon any attempt to apply logically the underlying principles of civil liability to the special instance of the mentally deranged. Thus it is said that a rule imposing liability tends to make more watchful those persons who have charge of the defendant and who may be supposed to have some interest in preserving his property; that as an insane person must pay for his support, if he is financially able, so he ought also to pay for the damage which he does; that an insane person with abundant wealth ought not to continue in unimpaired enjoyment of the comfort which it brings while his victim bears the burden unaided; and there is also a suggestion that courts are loath to introduce into the great body of civil litigation the difficulties in determining mental capacity which it has been found impossible to avoid in the criminal field.

The rule established in these cases has been criticized severely by certain eminent text writers both in this country and in England, principally on the ground that it is an archaic survival of the rigid and formal mediaeval conception of liability for acts done, without regard to fault, as opposed to what is said to be the general modern theory that liability in tort should rest upon fault. Notwithstanding these criticisms,

we think, that as a practical matter, there is strong force in the reasons underlying these decisions. They are consistent with the general statements found in the cases dealing with the liability of infants for torts, [cc] including a few cases in which the child was so young as to render his capacity for fault comparable to that of many insane persons, [cc]. Fault is by no means at the present day a universal prerequisite to liability, and the theory that it should be such has been obliged very recently to yield at several points to what have been thought to be paramount considerations of public good. Finally, it would be difficult not to recognize the persuasive weight of so much authority so widely extended.

But the present occasion does not require us either to accept or to reject the prevailing doctrine in its entirety. For this case it is enough to say that where an insane person by his act does intentional damage to the person or property of another he is liable for that damage in the same circumstances in which a normal person would be liable. This means that in so far as a particular intent would be necessary in order to render a normal person liable, the insane person, in order to be liable, must have been capable of entertaining that same intent and must have entertained it in fact. But the law will not inquire further into his peculiar mental condition with a view to excusing him if it should appear that delusion or other consequence of his affliction has caused him to entertain that intent or that a normal person would not have entertained it. ***

Coming now to the application of the rule to the facts of this case, it is apparent that the jury could find that the defendant was capable of entertaining and that she did entertain an intent to strike and to injure the plaintiff and that she acted upon that intent. See American Law

Institute Restatement, Torts, §§ 13, 14. We think this was enough.
***

[The rest of the opinion holds that whether the plaintiff consented to the attack or assumed the risk of it is an issue to be left to the jury. There was no evidence that the defendant had previously attacked any one or made any serious threat to do so. The plaintiff had taken care of the defendant for fourteen months without being attacked. When the plaintiff entered the room the defendant was breaking up the furniture, and it could be found that the plaintiff reasonably feared that the defendant would do harm to herself. Under such circumstances it cannot be ruled as a matter of law that the plaintiff assumed the risk.]

Judgment for the plaintiff on the verdict.

NOTES AND QUESTIONS

1. Can someone who is mentally ill have an intent to do harm to another? And, if so, how can such an intent be "fault"? How does the mentally ill defendant differ from the automobile driver who loses consciousness due to a heart attack or stroke or other illness, as in Cohen v. Petty, page 10?

2. Note that the tort law standards differ from the criminal law standards for holding the mentally ill responsible for their actions. Polmatier v. Russ, 206 Conn. 229, 537 A.2d 468 (1988) (defendant liable for battery of plaintiffs decedent even though he was found not guilty by reason of insanity in criminal case arising out of same incident); Delahanty v. Hinckley, 799 F.Supp. 184 (D.D.C. 1992)

(rejecting defendant's argument that he should not be liable to plaintiff police officer who was injured when defendant shot at President Reagan because defendant was in a "deluded and psychotic state of mind" and found not guilty by reason of insanity in criminal prosecution arising out of the same incident).

3. Despite some criticism, the American decisions are unanimous in their agreement with the principal case. Mentally disabled persons may be held responsible for their intentional torts as long as plaintiff can prove that they formed the requisite intent. Restatement (Second) § 895J (1979). See also White v. Muniz, 999 P.2d 814, 818 (Colo. 2000) (in battery claim against defendant with Alzheimer's, plaintiff must prove defendant desired to cause contact that was offensive or harmful) ("insanity is not a defense to an intentional tort according to the ordinary use of that term, but is a characteristic, like infancy, that may make it more difficult to prove the intent element of battery").

4. Several jurisdictions have carved out a narrow exception to this general rule, holding that an institutionalized mentally disabled patient who cannot control or appreciate the consequences of his conduct cannot be held liable for injuries caused to those employed to care for the patient. The jurisdictions that have addressed this issue have done so in the context of both intentional torts and negligence, with the negligence cases finding no duty on the part of the patient to those who had been hired to care for the patient. Gould v. American Family Mutual Ins. Co., 198 Wis.2d 450, 543 N.W.2d 282 (1996) (negligence action brought against patient with Alzheimer's); Creasy v. Rusk, 730 N.E.2d 659 (Ind. 2000) (same); Anicet v. Gant, 580 So.2d 273 (Fla.App.1991) (assault and battery

against twenty- three-year-old man suffering from "irremediable mental difficulties" who was unable to control himself from acts of violence); Berberian v. Lynn, 179 N.J. 290, 845 A.2d 122 (2004) (negligence case against Alzheimer's patient who pushed nurse down stairs). California recently extended this exception to in-home caregivers. Gregory v. Cott, 59 Cal.4th 996, 331 P.3d 179, 176 Cal.Rptr.3d 1 (2014) (in-home caregiver hired through agency injured while caring for Alzheimer's patient). There, the ruling was based on primary implied assumption of the risk, which will be discussed in Chapter 12.

5. Mental illness may prevent the specific kind of intent necessary for certain torts, such as deceit, that require the plaintiff to prove that the defendant knew that he was not speaking the truth. See Irvine v. Gibson, 117 Ky. 306, 77 S.W. 1106 (1904) (slander requires proof that defendant knew the statement was false) and Chaddock v. Chaddock, 130 Mise. 900, 226 N.Y.S. 152 (1927) (fraud requires proof that defendant knew the statement was false).

6. A negligent supervision action may lie against those responsible for caring for the mentally ill person, but only if defendant had assumed a

caretaking responsibility. Familial relationship alone is not enough. Rausch v. McVeigh, 105 Mise.2d 163, 431 N.Y.S.2d 887 (1980) (cause of action for negligent supervision stated against parents of 22-year-old autistic son who attacked his therapist because parents had assumed responsibility for his care); Shirdon v. Houston, 2006 WL 2522394 (Ohio App.) (no duty to supervise adult son even

though father knew his son could be aggressive and combative); and Kaminski v. Town of Fairfield, 216 Conn. 29, 578 A.2d 1048 (1990) (accord).

7. Intoxication. What if the defendant is intoxicated? Does intoxication preclude a showing of intent? Bar patron passed out or fell asleep at bar and others agreed to drive him home. Bar employee helped patron from bar and was putting him into the back seat of a car when patron began shouting obscenities and kicked the employee in the face, seriously injuring him. Sufficient intent for battery? Janelsins v. Button, 102 Md.App. 30, 648 A.2d 1039 (1994) (voluntary intoxication does not vitiate intent). See also State Farm Fire and Casualty Co. v. Tully, 322 Conn. 566, 142 A.3d 1079 (2016) (finding that evidence of voluntary intoxication does not negate intent in case involving homeowners insurance coverage for sexual assault).

Talmage v. Smith

Supreme Court of Michigan, 1894.

101 Mich. 370, 59 N.W. 656.

MONTGOMERY, J. The plaintiff recovered in an action of trespass. The case made by plaintiff's proofs was substantially as follows: ***Defendant [Charles Smith] had on his premises certain sheds. He came up to the vicinity of the sheds, and saw six or eight boys on the roof of one of them. He claims that he ordered the boys to get down, and they at once did so. He then passed around to where he had a view of the roof of another shed, and saw two boys on the roof. The defendant claims that he did not see the plaintiff, and the proof is not

very clear that he did, although there was some testimony from which it might have been found that he was within his view. Defendant ordered the boys in sight to get down, and there was testimony tending to show that the two boys in defendant's view started to get down at once. Before they succeeded in doing so, however, defendant took a stick, which is described as being two inches in width, and of about the same thickness, and about 16 inches long, and threw it in the direction of the boys; and there was testimony tending to show that it was thrown at one of the boys in view of the defendant. The stick missed him, and hit the plaintiff just above the eye with such force as to inflict an injury which resulted in the total loss of the sight of the eye. ***George Talmage, the plaintiffs father, testifies that defendant said to him that he threw the stick, intending it for Byron Smith,--one of the boys on the roof,--and this is fully supported by the circumstances of the case. ***

The circuit judge charged the jury as follows: "If you conclude that [Charles] Smith did not know the Talmage boy was on the shed, and that

he did not intend to hit [Byron] Smith, or the young man that was with him, but simply, by throwing the stick, intended to frighten [Byron] Smith, or the other young man that was there, and the club hit Talmage, and injured him, as claimed, then the plaintiff could not recover. If you conclude that [Charles] Smith threw the stick or club at [Byron] Smith, or the young man that was with [Byron] Smith,--intended to hit one or the other of them,--and you also conclude that the throwing of the stick or club was, under the circumstances,

reasonable, and not excessive, force to use towards [Byron] Smith and the other young man, then there would be no recovery by this plaintiff. But if you conclude from the evidence in this case that he threw the stick, intending to hit [Byron] Smith, or the young man with him,--to hit one of them,--and that that force was unreasonable force, under all the circumstances, then [the defendant] would be doing an unlawful act, if the force was unreasonable, because he had no right to use it. He would be liable then for the injury done to this boy[, Talmage], with the stick." ***

[The jury rendered a verdict for the plaintiff.]

We think the charge is a very fair statement of the law of the case. ***The right of the plaintiff to recover was made to depend upon an intention on the part of the defendant to hit somebody, and to inflict an unwarranted injury upon some one. Under these circumstances, the fact that the injury resulted to another than was intended does not relieve the defendant from responsibility. ***

The judgment will be affirmed, with costs.

NOTES AND QUESTIONS

1. This doctrine of "transferred intent" was derived originally from the criminal law and dates back to the time when tort damages were awarded as a side issue in criminal prosecutions. It is familiar enough in the criminal law, and has been applied in many tort cases where the defendant has shot at A, struck at him, or thrown a punch or rock at him, but hit B instead. See, for example, Lopez v. Surchia, 112 Cal.App.2d 314, 246 P.2d 111 (1952) (shooting); Carnes v. Thompson, 48 S.W.2d 903 (Mo. 1932) (striking with pliers); Singer v. Marx, 144 Cal.App.2d 637, 301 P.2d 440 (1956) (throwing a rock);

and Baska v. Scherzer, 283 Kan. 750, 156 P.3d 617 (2007) (while throwing punches at each other, teenagers hit a woman who stepped between them to stop the fight).

2. The doctrine is discussed in Prosser, Transferred Intent, 45 Tex. L. Rev. 650 (1967). The conclusion there is that it applies whenever both the tort intended and the resulting harm fall within the scope of the old action of trespass--that is, where both involve direct and immediate application of force to the person or to tangible property. There are five torts that fell within the trespass writ: battery, assault, false imprisonment, trespass to land, and trespass to chattels. When the defendant intends any one of the five, and accomplishes any one of the five, the doctrine applies and the defendant is liable, even if the plaintiff was not the intended target. Restatement (Third)

of Torts § 33, comment c, (2010) suggests courts likely would apply transferred intent to Conversion actions as well. Conversion is discussed at page 98.

3. Thus defendant is liable when he shoots to frighten A (assault) and the bullet unforeseeably hits a stranger (battery). Brown v. Martinez, 68 N.M. 271, 361 P.2d 152 (1961) (facts similar to principal case--defendant fired warning shot to scare intruders away from his watermelon patch and hit plaintiff whom he did not know was there) and Hall v. McBryde, 919 P.2d 910 (Colo.App.1996) (firing at passing car and hitting neighbor). Or when he shoots at a dog (trespass to chattels) and hits a boy scout (battery). Corn v. Sheppard, 179 Minn. 490, 229 N.W. 869 (1930). What if defendant, believing a house to be empty, intends arson (trespass to chattels) and accomplishes

battery (sleeping man killed by smoke inhalation)? Cf. Lewis v. Allstate Ins. Co., 730 So.2d 65 (Miss. 1998).

4. On the other hand, when either the tort intended or the one accomplished does not fall within the trespass action, the doctrine does not apply. Clark v. Gay, 112 Ga. 777, 38 S.E. 81 (1901) (defendant committed murder in plaintiff's house and plaintiff sought value of house because his family refused to live there after the murder); McGee v. Vanover, 148 Ky. 737, 147 S.W. 742 (1912) (defendant inflicted beating on A, causing mental distress to plaintiff bystander).

2. Battery

Cole v. Turner

Nisi Prius, 1704.

6 Modern Rep. 149, 90 Eng.Rep. 958.

At Nisi Prius, upon evidence in trespass for assault and battery, Holt, C.J., declared:

1. That the least touching of another in anger is a battery.

2. If two or more meet in a narrow passage, and without any violence or design of harm, the one touches the other gently it will be no battery.

3. If any of them use violence against the other, to force his way in a rude inordinate manner, it is a battery; or any struggle about the passage, to that degree as may do hurt, is a battery.

NOTES AND QUESTIONS

1. Defendant approached the plaintiff, took hold of the breast of his coat, and said "Mr. Salmon, I am Ortega, you have insulted me, and I seek satisfaction." Is this a battery? United States v. Ortega, 4 Wash.C.C. 531, 27 Fed.Cas. 359 (E.D.Pa.1825). What about spitting in the plaintiffs face? Alcorn v. Mitchell, 63 III. 553 (1872). Or forcibly removing his hat? Seigel v. Long, 169 Ala. 79, 53 So. 753 (1910). Or an attempted search of his pockets? Piggly-Wiggly Alabama Co. v. Rickles, 212 Ala. 585, 103 So. 860 (1925).

34

Or touching her private parts? Skousen v. Nidy, 90 Ariz. 215, 367 P.2d 248 (1961). Cf. Gates v. State, 110 Ga.App. 303, 138 S.E.2d 473 (1964) (stranger touching woman on the buttocks). All are examples of offensive touching.

2. What about tapping plaintiff on the shoulder to attract his attention? "Pardon me, sir, could you direct me, etc."? Coward v. Baddeley, 4 H. & N. 478, 157 Eng.Rep. 927 (1859). Tapping someone on the shoulder to get their attention is a common example of touching that is not offensive.

Wallace v. Rosen

Court of Appeals of Indiana, 2002.

765 N.E.2d 192.

KIRSCH, J. Mable Wallace appeals the jury verdict in favor of Indianapolis Public Schools (IPS) and Harriet Rosen, a teacher for IPS. On appeal, Wallace raises the following issues:

I. Whether the trial court erred in refusing to give her tendered jury instruction regarding battery. ***

We affirm.

FACTS AND PROCEDURAL HISTORY

[Rosen was a teacher at Northwest High School in Indianapolis. On April 22, 1994, the high school had a fire drill while classes were in session. The drill was not previously announced to the teachers and occurred just one week after a fire was extinguished in a bathroom near Rosen's classroom. On the day the alarm sounded, Wallace, who was recovering from foot surgery, was at the high school delivering homework to her daughter Lalaya. Wallace saw Lalaya just as Wallace neared the top of a staircase and stopped to speak to her. Two of Lalaya's friends also stopped to talk. Just then, the alarm sounded and students began filing down the stairs while Wallace took a step or two up the stairs to the second floor landing. As Rosen escorted her class to the designated stairway she noticed three or four people talking together at the top of the stairway and blocking the students' exit. Rosen did not recognize any of the individuals but approached "telling everybody to move it." Wallace, with her back to Rosen, was unable to hear Rosen over the noise of the alarm and Rosen had to touch her on the back to get her attention. Rosen then told Wallace, "you've got to get moving because this is a fire drill." At trial, Wallace testified that Rosen pushed her and she slipped and fell down the stairs. Rosen denied pushing Wallace, but admitted touching her back. At the close of the trial, the trial court judge refused to give the jury an instruction concerning civil battery that was requested by plaintiff. The jury

found in favor of IPS and Rosen on the negligence count, and Wallace appealed.]

35

DISCUSSION AND DECISION

***

I. Battery Instruction

Wallace first argues that it was error for the trial court to refuse to give the jury the following tendered instruction pertaining to battery:

A battery is the knowing or intentional touching of one person by another in a rude, insolent, or angry manner.

Any touching, however slight, may constitute an assault and battery.

Also, a battery may be recklessly committed where one acts in reckless disregard of the consequences, and the fact the person does not intend that the act shall result in an injury is immaterial. ***

The Indiana Pattern Jury Instruction for the intentional tort of civil battery is as follows: "A battery is the knowing or intentional touching of a person against [his] [her] will in a rude, insolent, or angry manner." 2 Indiana Pattern Jury Instructions (Civil) 31.03 (2d ed. Revised 2001). [2] Battery is an intentional tort. [C] In discussing intent, Professors Prosser and Keeton made the following comments:

* * *

[2] The Indiana Pattern Jury Instructions are prepared under the auspices of the Indiana Judges Association and the Indiana Judicial Conference Criminal and Civil Instruction Committees. Although not

formally approved for use, they are tacitly recognized by Indiana Trial Rule 51(E). [C]

In a loose and general sense, the meaning of "intent" is easy to grasp. As Holmes observed, even a dog knows the difference between being tripped over and being kicked. This is also the key distinction between two major divisions of legal liability--negligence and intentional torts....

It is correct to tell the jury that, relying on circumstantial evidence, they may infer that the actor's state of mind was the same as a reasonable person's state of mind would have been. Thus... the defendant on a bicycle who rides down a person in full view on a sidewalk where there is ample room to pass may learn that the factfinder (judge or jury) is unwilling to credit the statement, "I didn't mean to do it."

On the other hand, the mere knowledge and appreciation of a risk--something short of substantial certainty--is not intent. The defendant who acts in the belief or consciousness that the act is causing an appreciable risk of harm to another may be negligent, and if the risk is great the conduct may be characterized as reckless or wanton, but it is not an intentional wrong. In such cases the distinction between intent and negligence obviously is a matter of degree. The line has to be drawn by the courts at the point where the known danger ceases

to be only a foreseeable risk which a reasonable person would avoid, and becomes in the mind of the actor a substantial certainty.

The intent with which tort liability is concerned is not necessarily a hostile intent, or a desire to do any harm. Rather it is an intent to bring about a result which will invade the interests of another in a way that the law forbids. The defendant may be liable although intending nothing more than a good- natured practical joke, or honestly believing that the act would not injure the plaintiff, or even though seeking the plaintiff's own good.

W. PAGE KEETON et al., PROSSER AND KEETON ON THE LAW OF TORTS, § 8, at 33, 36-37 (5th ed.1984) (footnotes omitted).

[Witnesses] testified that Rosen touched Wallace on the back causing her to fall down the stairs and injure herself. For battery to be an appropriate instruction, the evidence had to support an inference not only that Rosen intentionally touched Wallace, but that she did so in a rude, insolent, or angry manner, i.e., that she intended to invade Wallace's interests in a way that the law forbids.

Professors Prosser and Keeton also made the following observations about the intentional tort of battery and the character of the defendant's action:

In a crowded world, a certain amount of personal contact is inevitable and must be accepted. Absent expression to the contrary, consent is assumed to all those ordinary contacts which are customary and reasonably necessary to the common intercourse of life, such as a tap on the shoulder to attract attention, a friendly grasp of the arm, or a casual jostling to make a passage....

The time and place, and the circumstances under which the act is done, will necessarily affect its unpermitted character, and so will the relations between the parties. A stranger is not to be expected to

tolerate liberties which would be allowed by an intimate friend. But unless the defendant has special reason to believe that more or less will be permitted by the individual plaintiff, the test is what would be offensive to an ordinary person not unduly sensitive as to personal dignity.

KEETON et al., § 9, at 42 (emphasis added). ***

[The court quoted from the trial transcript concerning the nature of the touching.]

Viewed most favorably to the trial court's decision refusing the tendered instruction, the foregoing evidence indicates that Rosen placed her fingertips on Wallace's shoulder and turned her 90 degrees toward the exit in the midst of a fire drill. The conditions on the stairway of

37

Northwest High School during the fire drill were an example of Professors Prosser and Keeton's "crowded world." Individuals standing in the middle of a stairway during the fire drill could expect that a certain amount of personal contact would be inevitable. Rosen had a responsibility to her students to keep them moving in an orderly fashion down the stairs and out the door. Under these circumstances, Rosen's touching of Wallace's shoulder or back with her fingertips to get her attention over the noise of the alarm cannot be said to be a rude, insolent, or angry touching. Wallace has failed to show that the trial court abused its discretion in refusing the battery instruction. ***

[Other issues raised by the appeal were then discussed.]

Affirmed. [The concurring opinions are omitted.]

NOTES AND QUESTIONS

1. Has the law of battery undergone any substantial changes since Cole v. Turner in 1704?

2. Do you agree that there was not enough evidence to let the jury decide whether the touching was offensive? One of the concurring opinions notes that there was testimony that the teacher had grabbed plaintiffs arm or shoulder to turn her around and that when plaintiff told her she was a parent, the teacher responded, "I don't care who you are, move it."

3. Note that the court refers to Indiana's pattern jury instruction on battery. Many jurisdictions have pattern or sample instructions that are available to the parties to use in requesting the instructions for their particular cases.

4. In the principal case, in a section omitted from this excerpt, the court noted that the third paragraph of the proposed instruction--that battery may be recklessly committed--was not an accurate statement of Indiana law and could have misled or confused the jury under the facts of the case. The court's discussion of the intent requirement makes it clear that it is an essential element. With the modern shift of emphasis to intent and negligence, as distinguished from trespass and case, "battery" has become exclusively an intentional tort. Thus there is no battery when defendant negligently, or even recklessly, drives his car into plaintiff and injures him, without intending to hit him. Cook v. Kinzua Pine Mills Co., 207 Or. 34, 293 P.2d 717 (1956). The same shift of emphasis accounts for the modern cases allowing

recovery when the contact inflicted intentionally is not direct and immediate, but indirect.

RESTATEMENT (SECOND) OF TORTS (1965)

§ 13. Battery: Harmful Contact

An actor is subject to liability to another for battery if

38

(a) he acts intending to cause a harmful or offensive contact with the person of the other or a third person, or an imminent apprehension of such a contact, and

(b) a harmful contact with the person of the other directly or indirectly results.

§ 18. Battery: Offensive Contact

(1) An actor is subject to liability to another for battery if

(a) he acts intending to cause a harmful or offensive contact with the person of the other or a third person, or an imminent apprehension of such a contact, and

(b) an offensive contact with the person of the other directly or indirectly results.

(2) An act which is not done with the intention stated in Subsection (1, a) does not make the actor liable to the other for a mere offensive contact with the other's person although the act involves an unreasonable risk of inflicting it and, therefore, would be negligent or reckless if the risk threatened bodily harm.

NOTES AND QUESTIONS

1. When defendant intentionally causes plaintiff to undergo an offensive contact and the resulting injuries are more extensive than a reasonable person might have anticipated, the defendant will still be liable for those injuries. See Baldinger v. Banks, 26 Mise.2d 1086, 201 N.Y.S.2d 629 (1960) (six-year-old boy shoves four-year-old girl) (broken elbow); Harrigan v. Rosich, 173 So.2d 880 (La.App.1965) (defendant, wishing to get rid of the plaintiff, pushed him with his finger, and said, "Go home, old man.") (detached retina).

2. In Vosburg v. Putney, 80 Wis. 523, 50 N.W. 403 (1891), one schoolboy, during a class hour, playfully kicked another on the shin. He intended no harm, and the touch was so slight that the plaintiff did not actually feel it until a few minutes later, but their teacher saw it happen. It had, however, the effect of "lighting up" an infection in the leg from a previous injury, and as a result the plaintiff suffered damages found by the jury to be $2,500. The court found liability for battery even though the seriousness of the injury could not have been foreseen by defendant. The case is entertainingly and exhaustively discussed in Zile, Vosburg v. Putney: A Centennial Story, [1992] Wis. L. Rev. 877 (1992).

3. Does it make any difference if the defendant is trying to help the plaintiff? In Clayton v. New Dreamland Roller Skating Rink, Inc., 14 N.J.Super. 390, 82 A.2d 458 (1951), cert, denied, 13 N.J. 527, 100 A.2d 567 (1953), plaintiff fell at a skating rink and broke her arm. Over the protests of plaintiff and her husband, defendant's employees, one of whom was a prize fight manager who had first aid

experience, proceeded to manipulate the arm in an attempt to set it. Is this battery?

39

4. While her husband was helping her get dressed in her hospital room the day after her back surgery, patient found a washable tattoo of a rose on her lower abdomen. Surgeon says he had placed it there to improve her spirits and help her heal and that none of his other patients had complained. Patient is very upset. Does she have a cause of action for battery? If so, what would her damages be? See Todd McHale, "Doctor is Sued for Giving Woman Tattoo in Surgery," Burlington County Times, July 17, 2008, at 1, available at 2008 WLNR 13781779.

5. Can the plaintiff make the defendant liable for contact that would not be offensive to a reasonable person, such as a tap on the shoulder to attract attention, by specifically forbidding that conduct? The Restatement (Second) of Torts § 19, leaves the question open. See Richmond v. Fiske, 160 Mass. 34, 35 N.E. 103 (1893), where defendant, against orders, entered plaintiff's bedroom and woke him up to present a milk bill. This was held to be battery, but no doubt it would be offensive to a reasonable person. What if caterer employer, which requires its employees to eat only food prepared on the premises, tells employees who have religious objections to eating pork or beef that the meatballs being served are made from turkey. Then employer switches back to meatballs made from pork and beef without telling employees. Battery? Kumar v. Gate Gourmet Inc., 180 Wash.2d 481, 325 P.3d 193 (2014) (employees' allegation that Gate Gourmet deceived them into eating food in violation of their religious

beliefs, knowing that this would cause offensive contact, is sufficient to support a claim for battery).

6. Can there be liability for battery for a contact of which plaintiff is unaware at the time? Did Sleeping Beauty have a cause of action against Prince Charming? What if an unauthorized surgical operation is performed while plaintiff is under an anaesthetic? Does it make any difference whether the operation is harmful or beneficial? See Mohr v. Williams, page 111.

7. Does the exposure to a virus, such as herpes, through sexual activity constitute a battery? Does consent to the sexual activity operate as a defense? See Doe v. Johnson, 817 F.Supp. 1382 (W.D.Mich. 1993) (battery action alleged in transmission of HIV; consent to intercourse does not bar action). Liability in Tort for the Sexual Transmission of Disease: Genital Herpes and the Law, 70 Cornell L. Rev. 101 (1984).

8. Does a mortician who embalms a body unaware that it was infected with the AIDS virus have a cause of action for battery? Cf., Funeral Services by Gregory v. Bluefield Community Hospital, 186 W.Va. 424, 413 S.E.2d 79 (1991). What about the patients of a dentist who does not disclose he has AIDS? What if the dentist always wore gloves during treatment procedures? Would the reasonable person find such touching offensive? See Brzoska v. Olson, 668 A.2d 1355 (Dela. 1995).

Fisher v. Carrousel Motor Hotel, Inc.

Supreme Court of Texas, 1967.

424 S.W.2d 627.

[Action for assault and battery. Plaintiff, a mathematician employed by NASA, was attending a professional conference on telemetry

equipment at defendant's hotel. The meeting included a buffet luncheon. As plaintiff was standing in line with others, he was approached by one of defendant's employees, who snatched the plate from his hand, and shouted that a "Negro could not be served in the club." Plaintiff was not actually touched, and was in no apprehension of physical injury; but he was highly embarrassed and hurt by the conduct in the presence of his associates. The jury returned a verdict for $400 actual damages for his humiliation and indignity, and $500 exemplary (punitive) damages in addition. The trial court set aside the verdict and gave judgment for the defendants notwithstanding the verdict. This was affirmed by the Court of Civil Appeals. Plaintiff appealed to the Supreme Court.]

GREENHILL, Justice. ***Under the facts of this case, we have no difficulty in holding that the intentional grabbing of plaintiff's plate constituted a battery. The intentional snatching of an object from one's hand is as clearly an offensive invasion of his person as would be an actual contact with the body. "To constitute an assault and battery, it is not necessary to touch the plaintiff's body or even his clothing; knocking or snatching anything from plaintiff's hand or touching anything connected with his person, when done in an offensive manner, is sufficient." Morgan v. Loyacomo, 190 Miss. 656, 1 So.2d 510 (1941).

Such holding is not unique to the jurisprudence of this State. In S.H. Kress & Co. v. Brashier, 50 S.W.2d 922 (Tex.Civ.App. 1932, no writ),

the defendant was held to have committed "an assault or trespass upon the person" by snatching a book from the plaintiff's hand. The jury findings in that case were that the defendant "dispossessed plaintiff of the book" and caused her to suffer "humiliation and indignity."

The rationale for holding an offensive contact with such an object to be a battery is explained in 1 Restatement (Second) of Torts § 18 (Comment p. 31) as follows:

"Since the essence of the plaintiff's grievance consists in the offense to the dignity involved in the unpermitted and intentional invasion of the inviolability of his person and not in any physical harm done to his body, it is not necessary that the plaintiffs actual body be disturbed. Unpermitted and intentional contacts with anything so connected with the body as to be customarily regarded as part of the other's person and therefore as partaking of its inviolability is actionable as an offensive contact with his person. There are some things such as clothing or a cane or, indeed, anything directly grasped by the hand which are so intimately connected with one's body as to be universally regarded as part of the person."

We hold, therefore, that the forceful dispossession of plaintiff Fisher's plate in an offensive manner was sufficient to constitute a battery, and the trial court erred in granting judgment notwithstanding the verdict on the issue of actual damages. ***

41

Damages for mental suffering are recoverable without the necessity for showing actual physical injury in a case of willful battery because the basis of that action is the unpermitted and intentional invasion of

the plaintiff's person and not the actual harm done to the plaintiff's body. Restatement (Second) of Torts § 18. Personal indignity is the essence of an action for battery; and consequently the defendant is liable not only for contacts which do actual physical harm, but also for those which are offensive and insulting. [Cc]. We hold, therefore, that plaintiff was entitled to actual damages for mental suffering due to the willful battery, even in the absence of any physical injury. ***

[The court then held that the defendant corporation was liable for the tort of its employee.]

The judgments of the courts below are reversed, and judgment is here rendered for the plaintiff for $900 with interest from the date of the trial court's judgment, and for costs of this suit.

NOTES AND QUESTIONS

1. What if the plate had been snatched without a racial epithet? Or, suppose the waiter had not touched plaintiffs plate, but said in a loud voice, "Get out, we don't serve Negroes here!"? What if the doorman at the hotel shouted a racial epithet and kicked plaintiff's car when he was about to leave. Battery? Childress v. Boeing Aerospace Ops., Inc., 8 Wash.App.2d 1054 (2019) (plaintiff's claim that security guard struck the hood of his car during an altercation about illegal parking did not state cause of action for battery). Cf. Van Eaton v. Thon, 764 S.W.2d 674 (Mo.App.1988) (defendant struck horse plaintiff was riding).

2. Does the utilization of the tort of battery confuse things? Why not characterize what happened as "intentional infliction of emotional harm"? Might the case be regarded as one of imaginative lawyering, assuming the state was not ready to recognize intentional infliction of

emotional harm as a tort? What other remedies might have been available to plaintiff? Compare this with the State Rubbish Collectors case, page 58.

3. Defendant, unreasonably suspecting the plaintiff of shoplifting, forcibly seized a package from under her arm and opened it. Morgan v. Loyacomo, 190 Miss. 656, 1 So.2d 510 (1941) (battery). Defendant deliberately blew pipe smoke in plaintiffs face, knowing she was allergic to it. Richardson v. Hennly, 209 Ga.App. 868, 434 S.E.2d 772 (1993), rev'd on other grounds, 264 Ga. 355, 444 S.E.2d 317 (1994) (battery). Defendant, coming up behind coworker in break room, snatched a ten dollar bill from his hand. Reynolds v. MacFarlane, 322 P.3d 755, 759 (Utah App. 2014) (quoting Prosser and Keeton on the Law of Torts: "contact with the plaintiffs clothing, or with a cane, a paper, or any other object held in plaintiff's hand" is enough for bodily contact).

4. A is standing with his arm around B's shoulder and leaning on him. C, passing by, violently jerks B's arm, as a result of which A falls down.

42

To whom is C liable for battery? Reynolds v. Pierson, 29 Ind.App. 273, 64 N.E. 484 (1902).

3. Assault

I de S et ux. v. W de S

At the Assizes, 1348.

Y.B.Lib.Ass. folio 99, placitum 60.

I de S and M, his wife, complain of W de S concerning this, that the said W, in the year, etc., with force and arms did make an assault upon the said M de S and beat her. And W pleaded not guilty. And it was found by the verdict of the inquest that the said W came at night to the house of the said I and sought to buy of his wine, but the door of the tavern was shut and he beat upon the door with a hatchet which he had in his hand, and the wife of the plaintiff put her head out of the window and commanded him to stop, and he saw and he struck with the hatchet but did not hit the woman. Whereupon the inquest said that it seemed to them that there was no trespass since no harm was done.

THORPE, C.J. There is harm done and a trespass for which he shall recover damages since he made an assault upon the woman, as has been found, although he did no other harm. Wherefore tax the damages, etc. And they taxed the damages at half a mark. Thorpe awarded that they should recover their damages, etc., and that the other should be taken. And so note that for an assault a man shall recover damages, etc.

NOTES AND QUESTIONS

1. This is the great-grandparent of all assault cases. Why allow the action if "no harm was done"?

2. Why does the court refer to "trespass"?

Western Union Telegraph Co. v. Hill

Court of Appeals of Alabama, 1933.

25 Ala.App. 540, 150 So. 709.

Action for damages for assault by J.B. Hill against the Western Union Telegraph. Company. From a judgment for plaintiff, defendant appeals.

SAMFORD, JUDGE. The action in this case is based upon an alleged assault on the person of plaintiff's wife by one Sapp, an agent of defendant in charge of its office in Huntsville, Ala. The assault complained of consisted of an attempt on the part of Sapp to put his hand on the person of plaintiff's wife coupled with a request that she come behind the counter in defendant's office, and that, if she would come and allow Sapp to love and pet her, he "would fix her clock."

43

The first question that addresses itself to us is, Was there such an assault as will justify an action for damages? ***

While every battery includes an assault, an assault does not necessarily require a battery to complete it. What it does take to constitute an assault is an unlawful attempt to commit a battery, incomplete by reason of some intervening cause; or, to state it differently, to constitute an actionable assault there must be an intentional, unlawful, offer to touch the person of another in a rude or angry manner under such circumstances as to create in the mind of the party alleging the assault a well-founded fear of an imminent battery, coupled with the apparent present ability to effectuate the attempt, if not prevented. ***

What are the facts here? Sapp was the agent of defendant and the manager of its telegraph office in Huntsville. Defendant was under contract with plaintiff to keep in repair and regulated an electric clock

in plaintiff's place of business. When the clock needed attention, that fact was to be reported to Sapp, and he in turn would report to a special man, whose duty it was to do the fixing. At 8:13 o'clock p.m. plaintiff's wife reported to Sapp over the phone that the clock needed attention, and, no one coming to attend the clock, plaintiff's wife went to the office of defendant about 8:30 p.m. There she found Sapp in charge and behind a desk or counter, separating the public from the part of the room in which defendant's operator worked. The counter is four feet and two inches high, and so wide that, Sapp standing on the floor, leaning against the counter and stretching his arm and hand to the full length, the end of his fingers reaches just to the outer edge of the counter. The photographs in evidence show that the counter was as high as Sapp's armpits. Sapp had had two or three drinks and was "still slightly feeling the effects of whisky; I felt all right; I felt good and amiable." When plaintiff's wife came into the office, Sapp came from towards the rear of the room and asked what he could do for her. She replied: "I asked him if he understood over the phone that my clock was out of order and when he was going to fix it. He stood there and looked at me a few minutes and said: 'If you will come back here and let me love and pet you, I will fix your clock.' This he repeated and reached for me with his hand, he extended his hand toward me, he did not put it on me; I jumped back. I was in his reach as I stood there. He reached for me right along here (indicating her left shoulder and arm)." The foregoing is the evidence offered by plaintiff tending to prove assault. Per contra, aside from the positive denial by Sapp of any effort to touch Mrs. Hill, the physical surroundings as evidenced by the photographs of the locus tend to rebut any evidence going to prove that Sapp could

have touched plaintiff's wife across that counter even if he had reached his hand in her direction unless she was leaning against the counter or Sapp should have stood upon something so as to elevate him and allow him to reach beyond the counter. However, there is testimony tending to prove that, notwithstanding the width of the counter and the height of Sapp, Sapp could have reached from six to eighteen inches

44

beyond the desk in an effort to place his hand on Mrs. Hill. The evidence as a whole presents a question for the jury. This was the view taken by the trial judge, and in the several rulings bearing on this question there is no error. ***

[Reversed on the ground that Sapp had not acted within the scope of his employment and thus did not subject his employer to liability for his actions.]

NOTES AND QUESTIONS

1. Defendant, standing three or four feet from plaintiff, made a "kissing sign" at her by puckering his lips and smacking them. He did not touch her and made no effort to kiss her or to use any force. Is this an assault? Cf. Fuller v. State, 44 Tex.Crim. 463, 72 S.W. 184 (1903) (leering alone is not enough). Defendant Ku Klux Klan members dressed in KKK robes and carrying guns rode around in a shrimp boat on Galveston Bay from dock to dock frightening Vietnamese fishermen and their families. What would the family members have to prove to recover for assault? See Vietnamese Fishermen's Ass'n v. Knights of the K.K.K., 518 F.Supp. 993 (S.D.Tex. 1981) (applying Texas law).

2. Defendant, a hundred yards from plaintiff, starts running toward him, throwing rocks as he runs. At what point does this become an assault? Cf. State v. Davis, 23 N.C. (1 Ired.) 125, 35 Am.Dec. 735 (1840) (at the point where defendant is close enough so that plaintiff's apprehension of imminent contact is reasonable).

3. What about mere preparation, such as holding a rock or carrying a gun? Cf. Penny v. State, 114 Ga. 77, 39 S.E. 871 (1901) (jury could have found that holding a rock, without more, was not enough). What if plaintiff's testified a shotgun was aimed at them and defendant claimed it remained lying in his lap? See Castiglione v. Galpin, 325 So.2d 725 (La.App.1976) (based on defendant's threats to shoot plaintiffs if they turned his water off for nonpayment, plaintiffs' apprehension was reasonable whether shotgun was pointed at them or stayed in defendant's lap).

4. What if the threat is not imminent? Brower v. Ackerley, 88 Wash.App. 87, 943 P.2d 1141, 1145 (1997) (threats of future action--"I'm going to find out where you live and kick your ass" and "you're finished; cut you in your sleep"--not imminent enough to state cause of action for assault.) Does a complaint state a cause of action for assault if it alleges that the defendants threatened plaintiffs with violence and that the defendants showed the plaintiffs that the defendants were carrying blackjacks but did not allege that happened on the same occasion? Cucinotti v. Ortmann, 399 Pa. 26, 159 A.2d 216 (1960) ("words in themselves, no matter how threatening, do not constitute an assault").

5. Is there an assault if defendant threatens the plaintiff with an unloaded gun? See Allen v. Hannaford, 138 Wash. 423, 244 P. 700,

701 (1926) ("We have a right to live in society without being put in fear of personal harm. But it must be a reasonable fear of which we complain. And it surely is not unreasonable for a person to entertain a fear of personal injury, when a pistol

is pointed at him in a threatening manner, when, for aught he knows, it may be loaded, and may occasion his immediate death.").

6. For the tort of assault, the victim must have a reasonable apprehension of contact, and it is not necessary that the defendant have the actual ability to carry out the threatened contact. The definition of assault in the criminal law of many states differs from tortious assault. Some states require proof of fear rather than just apprehension (i.e., awareness) on the part of the victim, some require neither, and some require that the defendant have the actual present ability to contact the victim rather than merely the apparent present ability. Depending upon the jurisdiction, a defendant could be subject to either criminal prosecution or civil damages, or both.

7. In the criminal case of State v. Barry, 45 Mont. 598, 124 P. 775 (1912), it was held that there was no assault where the plaintiff did not learn that a gun was aimed at him with intent to shoot him until it was all over. The Restatement (Second) of Torts § 22, Attempt Unknown to Other (1965), applies that principle to the tort of assault. See also Reynolds v. MacFarlane, 322 P.3d 755, 758 (Utah App. 2014) (no assault where ten dollar bill was snatched from plaintiff's hand from behind because no evidence that plaintiff was aware of defendant's impending action to grab the bill before defendant completed the act of taking the bill).

8. Although the court uses the term "fear" of an imminent battery, assault requires only apprehension or anticipation. Suppose Hill had a black belt in karate and was contemptuous of Sapp? Assault? Cf. Brady v. Schatzel, [1911] Q.St.R. 206, 208 (police officer testified he was not afraid when defendant pulled a gun on him because he did not believe he would fire it). Why might a lawyer plead and try to prove fear if it is not a necessary element of the tort?

9. What if there is a threatening gesture (not just words), but these words accompany the gesture? Assault?

A. With his hand upon his sword, "If it were not assize-time, I would not take such language from you." Tuberville v. Savage, 1 Modern Rep. 3 (1699).

B. "Were you not an old man, I would knock you down." State v. Crow, 23 N.C. (1 Ired.) 375 (1841).

C. "If it were not for your gray hairs, I would tear your heart out." Commonwealth v. Eyre, 1 Serg. & Rawle 347 (Pa. 1815).

D. "I have a great mind to hit you." State v. Hampton, 63 N.C. 13 (1868).

E. "If you do not pay me my money, I will have your life"? Keefe v. State, 19 Ark. 190 (1857).

10. Can words make an assault out of conduct that would otherwise not be sufficient for the tort? Suppose that while defendant and plaintiff are engaged in a violent quarrel, defendant reaches for his hip pocket. Does it make any difference whether he says, "I'll blow your brains out," or "Pardon me, I need a handkerchief'?

11. What about words that threaten harm from an independent source? "Look out! There is a rattlesnake behind you!"

4. False Imprisonment

Big Town Nursing Home, Inc. v. Newman

Court of Civil Appeals of Texas, 1970.

461 S.W.2d 195.

MCDONALD, Chief Justice. This is an appeal by defendant Nursing Home from a judgment for plaintiff Newman for actual and exemplary damages in a false imprisonment case.

Plaintiff Newman sued defendant Nursing Home for actual and exemplary damages for falsely and wrongfully imprisoning him against his will from September 22, 1968 to November 11, 1968. ***

Plaintiff is a retired printer 67 years of age, and lives on his social security and a retirement pension from his brother's printing company. He has not worked since 1959, is single, has Parkinson's disease, arthritis, heart trouble, a voice impediment, and a hiatal hernia. He has served in the army attaining the rank of Sergeant. He has never been in a mental hospital or treated by a psychiatrist. Plaintiff was taken to defendant nursing home on September 19, 1968, by his nephew who signed the admission papers and paid one month's care in advance. Plaintiff had been arrested for drunkenness and drunken driving in times past (the last time in 1966) and had been treated twice for alcoholism. Plaintiff testified he was not intoxicated and had nothing to drink during the week prior to

admission to the nursing home. The admission papers provided that patient "will not be forced to remain in the nursing home against his will for any length of time." Plaintiff was not advised he would be kept at the nursing home against his will. On September 22, 1968, plaintiff decided he wanted to leave and tried to telephone for a taxi. Defendant's employees advised plaintiff he could not use the phone, or have any visitors unless the manager knew them, and locked plaintiffs grip and clothes up. Plaintiff walked out of the home, but was caught by employees of defendant and brought back forceably, and thereafter, placed in Wing 3 and locked up. Defendant's Administrator testified Wing 3 contained senile patients, drug addicts, alcoholics, mentally disturbed, incorrigibles and uncontrollables, and that "they were all in the same kettle of fish." Plaintiff tried to escape from the nursing home five or six times but was caught and brought back each time against his will. He was carried back to Wing 3 and locked and taped in a "restraint chair", for more than five hours. He was put back in the chair on subsequent occasions. He was not seen by the home doctor for some 10 days after he was admitted, and for 7 days after being placed in Wing 3. The doctor wrote the social security office to change payment of plaintiff's social security checks without plaintiff's authorization.

47

Plaintiff made every effort to leave and repeatedly asked the manager and assistant manager to be permitted to leave. The home doctor is actually a resident studying pathology and has no patients other than those in two nursing homes. Finally, on November 11, 1968, plaintiff escaped and caught a ride into Dallas, where he called a taxi and was taken to the home of a friend. During plaintiff's ordeal

he lost 30 pounds. There was never any court proceeding to confine plaintiff. ***

False imprisonment is the direct restraint of one person of the physical liberty of another without adequate legal justification. There is ample evidence to sustain [the jury's finding that plaintiff was falsely imprisoned], ***

Defendant placed plaintiff in Wing 3 with insane persons, alcoholics and drug addicts knowing he was not in such category; punished plaintiff by locking and taping him in the restraint chair; prevented him from using the telephone for 51 days; locked up his clothes; told him he could not be released from Wing 3 until he began to obey the rules of the home; and detained him for 51 days during which period he was demanding to be released and attempting to escape. ***

Defendant may be compelled to respond in exemplary damages if the act causing actual damages is a wrongful act done intentionally in violation of the rights of plaintiff. [Cc]

Defendant acted in the utter disregard of plaintiffs legal rights, knowing there was no court order for commitment, and that the admission agreement provided he was not to be kept against his will. ***

[The court of appeals found that the amount of damages was excessive and offered plaintiff a remittitur. Plaintiff subsequently agreed to the remittitur and the judgment below, so reformed, was affirmed.]

NOTES AND QUESTIONS

1. Plaintiff has a ticket to enter defendant's race track, but defendant refuses to admit him because the stewards have banned him from the track. False imprisonment? Marrone v. Washington Jockey Club, 35 App.D.C. 82 (1910) (mere refusal to admit not false imprisonment). Plaintiff attempts to enter a dance hall during a public dance, but is prevented by defendant who is under the mistaken belief that she is under eighteen. False imprisonment? Cullen v. Dickenson, 33 S.D. 27, 144 N.W. 656 (1913) (no). Suppose the exclusion is based on race or religion? There may be a civil rights action, but not false imprisonment. See 42 U.S.C. § 2000a, page 86, note 4.

2. Can there be false imprisonment in a moving automobile? Cieplinski v. Severn, 269 Mass. 261, 168 N.E. 722 (1929) (yes). In a city? Allen v. Fromme, 141 App.Div. 362, 126 N.Y.S. 520 (1910) (yes). In the state of Rhode Island? Texas? Cf. Albright v. Oliver, 975 F.2d 343 (7th Cir. 1992) (in dicta, court notes that actionable confinement could be "as large as an entire state," citing Restatement (Second) of Torts § 36, illustration 7 (1965)).

When plaintiff is not permitted to leave the country? Cf. Shen v. Leo A. Daly Co., 222 F.3d 472 (8th Cir. 2000) (applying Nebraska law) (although difficult to define exactly how close the restraint must be, the country of Taiwan is clearly too great an area within which to be falsely imprisoned).

3. If one exit of a room or a building is locked with plaintiff inside, but another reasonable means of exit is left open, there is no imprisonment. Davis & Allcott Co. v. Boozer, 215 Ala. 116, 110 So.

28 (1926) (door through which plaintiff had entered was locked but other door was not); Furlong v. German-American Press Ass'n, 189 S.W. 385, 389 (Mo.1916) ("If a way of escape is left open which is available without peril of life or limb, no imprisonment"). See also the classic case of Bird v. Jones, 7 A. & E., N.S., 742, 115 Eng.Rep. 668 (1845) (the portion of Hammersmith Bridge across the Thames River ordinarily used as a footpath was obstructed by seats that defendant had erected for viewing a regatta on the river and defendant's agents refused to let plaintiff pass along the footpath; no false imprisonment because plaintiff could have returned the way he had come or crossed the bridge in the carriage way).

4. The Restatement (Second) of Torts § 36, comment a, treats the means of escape as unreasonable if it involves exposure of the person (plaintiff in the water and defendant steals his clothes), material harm to the clothing, or danger of substantial harm to another. Plaintiff would not be required to make his escape by crawling through a sewer.

5. A means of escape is not a reasonable one if the plaintiff does not know of its existence, and it is not apparent. Talcott v. National Exhibition Co., 144 App.Div. 337, 128 N.Y.S. 1059 (1911).

6. What if it's just a joke? Employees of airline that prides itself on being a "fun-loving, spirited company" arranged for local police officers to perform a mock arrest of a new employee, complete with handcuffs and a suggestion that she find someone to post bail, as a prank to celebrate the end of her employment probation. Fuerschbach v. Southwest Airlines Co., 439 F.3d 1197 (10th Cir.

2006) (applying New Mexico law) (neither brevity of seizure nor its characterization as a prank enabled officers to avoid liability).

7. Along with battery and assault, false imprisonment is exclusively an intentional tort. The Restatement (Second) of Torts § 35, comment h, points out, however, that for negligence resulting in the confinement of another, a negligence action will lie, but only if some actual damage results. False imprisonment is also like battery and assault in that no actual damages need be proved. Nominal damages may be awarded. Banks v. Fritsch, 39 S.W.3d 474 (Ky. App. 2001) (teacher who chained student to tree because of repeated absenteeism liable for nominal damages if student could not prove actual damages).

49

Parvi v. City of Kingston

Court of Appeals of New York, 1977.

41 N.Y.2d 553, 362 N.E.2d 960, 394 N.Y.S.2d 161.

[Police, responding to a complaint, found two brothers engaged in a noisy quarrel in an alley behind a commercial building with railroad tracks running nearby. Plaintiff was with them, apparently trying to calm them. According to police testimony, all three were showing "the effects of alcohol." Plaintiff told the police he had no place to go, so rather than arrest him, they took him outside the city limits to an abandoned golf course used by campers and equipped with several lean-to shelters to "dry out." There was conflicting testimony as to whether he went willingly. Within an hour, plaintiff had wandered 350 feet and onto the New York State Thruway, where he was struck by a

car and severely injured. On cross-examination, he admitted he had no recollection of what happened that night.

Action for false imprisonment. The trial court dismissed the case and the Appellate Division affirmed.]

FUCHSBERG, JUSTICE. ***With these facts before us, we initially direct our attention to Parvi's cause of action for false imprisonment. Only recently, we had occasion to set out the four elements of that tort[:] ***"the plaintiff must show that: (1) the defendant intended to confine him, (2) the plaintiff was conscious of the confinement, (3) the plaintiff did not consent to the confinement and (4) the confinement was not otherwise privileged".

Elements (1) and (3) present no problem here. When the plaintiff stated he had no place to go, he was faced with but one alternative--arrest. This was hardly the stuff of which consent is formed, especially in light of the fact that Parvi was, in a degree to be measured by the jury, then under the influence of alcohol. It is also of no small moment in this regard that the men's request to be released at a place they designated was refused. Moreover, one of the policemen testified that his fellow officer alone selected the location to which Parvi was taken; indeed, this was a place to which the police had had prior occasion to bring others who were being "run out of town" because they evidenced signs of intoxication. Further, putting aside for the time being the question of whether such an arrest would have been privileged, it can hardly be contended that, in view of the direct and willful nature of their actions, there was no proof that the police officers intended to confine Parvi.

Element (2), consciousness of confinement, is a more subtle and more interesting subissue in this case. On that subject, we note that, while respected authorities have divided on whether awareness of confinement by one who has been falsely imprisoned should be a sine qua non for making out a case, [cc] Broughton [v. State of New York], 37 N.Y.2d p. 456, 373 N.Y.S.2d p. 92, 335 N.E.2d p. 313 has laid that question to rest in this State. Its holding gives recognition to the fact that false

50

imprisonment, as a dignitary tort, is not suffered unless its victim knows of the dignitary invasion. Interestingly, the Restatement (Second) of Torts § 42 too has taken the position that there is no liability for intentionally confining another unless the person physically restrained knows of the confinement or is harmed by it.

However, though correctly proceeding on that premise, the Appellate Division, in affirming the dismissal of the cause of action for false imprisonment, erroneously relied on the fact that Parvi, after having provided additional testimony in his own behalf on direct examination, had agreed on cross that he no longer had any recollection of his confinement. In so doing, that court failed to distinguish between a later recollection of consciousness and the existence of that consciousness at the time when the imprisonment itself took place. The latter, of course, is capable of being proved though one who suffers the consciousness can no longer personally describe it, whether by reason of lapse of memory, incompetency, death or other cause. Specifically, in this case, while it may well be that the alcohol Parvi had imbibed or the injuries he sustained, or

both, had had the effect of wiping out his recollection of being in the police car against his will, that is a far cry from saying that he was not conscious of his confinement at the time when it was actually taking place. And, even if plaintiffs sentient state at the time of his imprisonment was something less than total sobriety, that does not mean that he had no conscious sense of what was then happening to him. To the contrary, there is much in the record to support a finding that the plaintiff indeed was aware of his arrest at the time it took place. By way of illustration, the officers described Parvi's responsiveness to their command that he get into the car, his colloquy while being driven to Coleman Hill and his request to be let off elsewhere. At the very least, then, it was for the jury, in the first instance, to weigh credibility, evaluate inconsistencies and determine whether the burden of proof had been met. ***

[Reversed and remanded for a new trial.]

BREITEL, CHIEF Judge (dissenting). ***[P]laintiff has failed even to make out a prima facie case that he was conscious of his purported confinement, and that he failed to consent to it. His memory of the entire incident had disappeared; at trial, Parvi admitted that he no longer had any independent recollection of what happened on the day of his accident, and that as to the circumstances surrounding his entrance into the police car, he only knew what had been suggested to him by subsequent conversations. In light of this testimony, Parvi's conclusory statement that he was ordered into the car against his will is insufficient, as a matter of law, to establish a prima facie case. ***

NOTES AND QUESTIONS

1. In addition to the false imprisonment claim, plaintiff filed a negligence claim based on the police officers' conduct. For a more recent case

with eerily similar facts, see Deuser v. Vecera, 139 F.3d 1190 (8th Cir. 1998) (negligence claim against United States for negligence of park rangers who had briefly detained plaintiff's decedent for public drunkenness, but not arrested him, and then released him in a parking lot from which he wandered onto interstate where he was killed by a passing motorist).

2. What if the plaintiff, a diabetic who is unconscious from insulin shock, is wrongfully arrested and confined in jail overnight in the belief that he is drunk, but is released before he regains consciousness. Is there a tort? See Prosser, False Imprisonment: Consciousness of Confinement, 55 Colum. L. Rev. 847 (1955); Restatement (Second) of Torts § 42 (1965).

3. Called upon to make an emergency evaluation, a doctor diagnoses a person as mentally ill and has her detained in a mental institution. Is this false imprisonment? See Williams v. Smith, 179 Ga.App. 712, 348 S.E.2d 50 (1986) (no false imprisonment if statutory commitment procedures were followed even if doctor was negligent in diagnosis); Foshee v. Health Mgt. Assocs., 675 So.2d 957 (Fla.App. 1996) (false imprisonment if statutory commitment procedures were not followed by nurse who physically prevented patient from leaving a psychiatric facility and coerced her into signing voluntary admission papers). What if a hospital detains a woman for two hours while its staff initiates involuntary commitment

proceedings because she is agitated and threatened suicide? Riffe v. Armstrong, 197 W.Va. 626, 477 S.E.2d 535 (1996) (hospital's action justified in light of plaintiff's condition upon arrival). Note that these cases are based on state statutes in derogation of the common law that require a showing of "danger to self or others," but which vary in specifics like who can initiate the emergency hold, the extent of judicial oversight, and the rights of patients during the hold.

Hardy v. LaBelle's Distributing Co.

Supreme Court of Montana, 1983.

203 Mont. 263. 661 P.2d 35.

GULBRANDSON, JUSTICE. ***Defendant, LaBelle's Distributing Company (LaBelle's) hired Hardy as a temporary employee on December 1, 1978. She was assigned duty as a sales clerk in the jewelry department.

On December 9, 1978, another employee for LaBelle's, Jackie Renner, thought she saw Hardy steal one of the watches that LaBelle's had in stock. Jackie Renner reported her belief to LaBelle's showroom manager that evening.

On the morning of December 10, Hardy was approached by the assistant manager of LaBelle's jewelry department and told that all new employees were given a tour of the store. He showed her into the showroom manager's office and then left, closing the door behind him.

There is conflicting testimony concerning who was present in the showroom manager's office when Hardy arrived. Hardy testified that David Kotke, the showroom manager, Steve Newsom, the store's

loss prevention manager, and a uniformed policeman were present. Newsom

52

and one of the policemen in the room testified that another policeman, instead of Kotke, was present.

Hardy was told that she had been accused of stealing a watch. Hardy denied taking the watch and agreed to take a lie detector test. According to conflicting testimony, the meeting lasted approximately from twenty to forty-five minutes.

Hardy took the lie detector test, which supported her statement that she had not taken the watch. The showroom manager apologized to Hardy the next morning and told her that she was still welcome to work at LaBelle's. The employee who reported seeing Hardy take the watch also apologized. The two employees then argued briefly, and Hardy left the store.

Hardy brought this action claiming that defendants had wrongfully detained her against her will when she was questioned about the watch.

On appeal Hardy raises basically two issues: (1) Whether the evidence is sufficient to support the verdict and judgment and (2) Whether the District Court erred in the issuance of its instructions.

The two key elements of false imprisonment are the restraint of an individual against his will and the unlawfulness of such restraint. [Cc] The individual may be restrained by acts or merely by words which he fears to disregard. [Cc]

Here, there is ample evidence to support the jury's finding that Hardy was not unlawfully restrained against her will. While Hardy stated that she felt compelled to remain in the showroom manager's office, she also admitted that she wanted to stay and clarify the situation. She did not ask to leave. She was not told she could not leave. No threat of force or otherwise was made to compel her to stay. Although she followed the assistant manager into the office under pretense of a tour, she testified at trial that she would have followed him voluntarily if she had known the true purpose of the meeting and that two policemen were in the room. Under these circumstances, the jury could easily find that Hardy was not detained against her will. ***

[The court also found that the District Court did not err in issuance of jury instructions on the law of false imprisonment, and affirmed the District Court's judgment in favor of defendants based on the jury's verdict.]

NOTES AND QUESTIONS

1. The Restatement suggests that, in addition to physical barriers, a false imprisonment can be accomplished by force, threat of force, duress, or asserted legal authority. Restatement (Second) of Torts §§ 37-41 (1965).

2. False imprisonment has not been extended beyond such direct duress to person or to property. As the principal case shows, persuading someone it is in her best interest to stay is not enough. If the plaintiff submits

merely to persuasion, and accompanies the defendant to clear himself of suspicion, without any implied threat of force, the action does not lie. James v. MacDougall & Southwick Co., 134 Wash. 314, 235 P. 812 (1925). Suppose the defendant says to the plaintiff, "You must remain in this room, or I will never speak to you again"? Compare Fitscher v. Rollman & Sons Co., 31 Ohio App. 340, 167 N.E. 469 (1929), where defendant threatened to make a scene on the street unless plaintiff remained.

3. Seizing of plaintiff's property sometimes may provide the "restraint" necessary to constitute false imprisonment. See Fischer v. Famous-Barr Co., 646 S.W.2d 819 (Mo.App. 1982), where plaintiff set off the security alarm when exiting a store because the salesperson forgot to remove the sensor tag from clothing she had purchased. Because an employee of the store took possession of the bag containing her purchases, spoke harshly to her, and ordered her to return to the fourth floor where she had made her purchase, plaintiff felt she had to follow. Compare Marcano v. Northwestern Chrysler-Plymouth Sales, Inc., 550 F.Supp. 595 (N.D.Ill.1982) (applying Illinois law), where plaintiff went to a car dealership to discuss a dispute over payments on her loan and voluntarily gave her keys to the dealer so he could inspect the car. The dealer locked the car and kept the keys. Plaintiff stayed at the dealership for five hours. The court held that there was no false imprisonment because she could have left and because the intention of defendant was not to confine her personally, but only to keep the car.

4. An employee is suspected of stealing property from her employer and is told a trip to her home is necessary to recover the property. If the employee feels mentally compelled for fear of losing her job to go

in an automobile with her supervisor to her home, has she been confined involuntarily? See Faniel v. Chesapeake & Potomac Tel. Co., 404 A.2d 147 (D.C.App. 1979) (fear of losing one's job is a powerful incentive, but it does not render behavior involuntary).

5. It is generally agreed that false imprisonment resembles assault, in that threats of future action are not enough. Thus the action does not lie where the defendant merely threatens to call the police and have the plaintiff arrested unless he remains. Sweeney v. F.W. Woolworth Co., 247 Mass. 277, 142 N.E. 50 (1924).

6. On the shopkeeper's privilege to detain a suspected thief, see Bonkowski v. Arlan's Department Store, page 133.

Enright v. Groves

Colorado Court of Appeals, 1977.

39 Colo.App. 39, 560 P.2d 851.

SMITH, Judge. Defendants Groves and City of Ft. Collins appeal from judgments entered against them upon jury verdicts awarding plaintiff $500 actual damages and $1,000 exemplary damages on her claim of false imprisonment ***.

The evidence at trial disclosed that on August 25, 1974, Officer Groves, while on duty as a uniformed police officer of the City of Fort

Collins, observed a dog running loose in violation of the city's "dog leash" ordinance. He observed the animal approaching what was later identified as the residence of Mrs. Enright, the plaintiff. As Groves approached the house, he encountered Mrs. Enright's

eleven-year-old son, and asked him if the dog belonged to him. The boy replied that it was his dog, and told Groves that his mother was sitting in the car parked at the curb by the house. Groves then ordered the boy to put the dog inside the house, and turned and started walking toward the Enright vehicle.

Groves testified that he was met by Mrs. Enright with whom he was not acquainted. She asked if she could help him. Groves responded by demanding her driver's license. She replied by giving him her name and address. He again demanded her driver's license, which she declined to produce. Groves thereupon advised her that she could either produce her driver's license or go to jail. Mrs. Enright responded by asking, "Isn't this ridiculous?" Groves thereupon grabbed one of her arms, stating, "Let's go!" ***

She was taken to the police station where a complaint was signed charging her with violation of the "dog leash" ordinance and bail was set. Mrs. Enright was released only after a friend posted bail. She was later convicted of the ordinance violation. ***

Appellants contend that Groves had probable cause to arrest Mrs. Enright, and that she was in fact arrested for and convicted of violation of the dog-at-large ordinance. They assert, therefore, that her claim for false imprisonment or false arrest cannot lie, and that Groves' use of force in arresting Mrs. Enright was permissible. We disagree.

False arrest arises when one is taken into custody by a person who claims but does not have proper legal authority. W. Prosser, Torts § 11 (4th ed.). Accordingly, a claim for false arrest will not lie if an officer has a valid warrant or probable cause to believe that an

offense has been committed and that the person who was arrested committed it. Conviction of the crime for which one is specifically arrested is a complete defense to a subsequent claim of false arrest. [Cc]

Here, however, the evidence is clear that Groves arrested Mrs. Enright, not for violation of the dog leash ordinance, but rather for refusing - to produce her driver's license. This basis for the arrest is exemplified by the fact that he specifically advised her that she would either produce the license or go to jail. We find no statute or case law in this jurisdiction which requires a citizen to show her driver's license upon demand, unless, for example, she is a driver of an automobile and such demand is made in that connection. ***

Here, there was no testimony that Groves ever even attempted to explain why he was demanding plaintiff's driver's license, and it is clear that she had already volunteered her name and address. Groves admitted that he did not ask Mrs. Enright if she had any means of

identification on her person, instead he simply demanded that she give him her driver's license.

We conclude that Groves' demand for Mrs. Enright's driver's license was not a lawful order and that refusal to comply therewith was not therefore an offense in and of itself. Groves was not therefore entitled to use force in arresting Mrs. Enright. Thus Groves' defense based upon an arrest for and conviction of a specific offense must, as a matter of law, fail. ***

Judgment affirmed.

NOTES AND QUESTIONS

1. It is not necessary that the defendant be an officer to assert authority of law. Suppose a filling station attendant asserts legal authority to detain the plaintiff, believing he had stolen cash from the station? Daniel v. Phillips Petroleum Co., 229 Mo.App. 150, 73 S.W.2d 355 (1934). (upholding jury verdict for plaintiff). Plaintiff, alighting from defendant's train, fell and broke his leg. Defendant's conductor told plaintiff that the law required him to remain and fill out a statement about the accident. Plaintiff did so, and his cab was held for fifteen or twenty minutes, during which plaintiff was in considerable pain, while the statement was filled out and signed. This was held to be false imprisonment. Whitman v. Atchison, T. & S.F.R. Co., 85 Kan. 150, 116 P. 234 (1911).

2. A private citizen who physically aids a police officer in making a false arrest can be held liable to plaintiff for false imprisonment. If, however, the police officer requests assistance, the private citizen will not be liable unless he knows the arrest is an unlawful one. See Restatement (Second) of Torts §§ 45A and 139 (1965).

3. Merely providing information to the police, even if it turns out to be incorrect information, is not enough to support a claim of false imprisonment. Holcomb v. Walter's Dimmick Petroleum, Inc., 858 N.E.2d 103, 107 (Ind. 2006) ("Liability will not be imposed when the defendant does nothing more than detail his version of the facts to a policeman and ask for his assistance, leaving it to the officer to determine what is the appropriate response, at least where his representation of the facts does not prevent the intelligent exercise

of the officer's discretion.") See also Highfill v. Hale, 186 S.W.3d 277 (Mo. 2006) (because deputy's decision to arrest neighbors for stalking was based at least partly on deputy's own investigation, complainant was not liable).

Whittaker v. Sandford

Supreme Judicial Court of Maine, 1912.

110 Me. 77, 85 A. 399.

[Plaintiff was a member and her husband was a minister of a religious sect, of which defendant was the leader. The sect had a colony in Maine and at Jaffa (now part of Tel Aviv), the latter of which plaintiff had joined. Plaintiff decided to abandon the sect and to return to America.

56

While she and her four children were in Jaffa awaiting passage on a steamer, defendant offered her passage back to America on his yacht. When plaintiff told defendant that she was afraid that he would not let her off the yacht until she was "won to the movement again," defendant assured her repeatedly that under no circumstances would she be detained on board. Plaintiff accepted this assurance and sailed for America on the yacht. On arrival in port, defendant refused to furnish her with a boat so that she could leave the yacht, saying it was up to her husband whether she could leave. When plaintiff raised the issue with her husband, he said it was up to defendant, the leader of the sect and the owner of the yacht. She remained on board for nearly a month, during which time defendant and plaintiffs husband attempted to persuade her. to rejoin the sect.

On several occasions, plaintiff, always in the company of her husband, was allowed to go ashore to the mainland and to various islands. She was not allowed to leave the yacht unaccompanied. She finally obtained her release and that of her four children with the assistance of the sheriff and a writ of habeas corpus. She then brought this action for false imprisonment. The jury returned a verdict in her favor for $1100. Defendant excepted to the court's instructions, and appealed from an order denying his motion for a new trial.]

SAVAGE, J. ***The court instructed the jury that the plaintiff to recover must show that the restraint was physical, and not merely a moral influence; that it must have been actual physical restraint, in the sense that one intentionally locked into a room would be physically restrained but not necessarily involving physical force upon the person; that it was not necessary that the defendant, or any person by his direction, should lay his hand upon the plaintiff; that if the plaintiff was restrained so that she could not leave the yacht Kingdom by the intentional refusal to furnish transportation as agreed, she not having it in her power to escape otherwise, it would be a physical restraint and unlawful imprisonment. We think the instructions were apt and sufficient. If one should, without right, turn the key in a door, and thereby prevent a person in the room from leaving, it would be the simplest form of unlawful imprisonment. The restraint is physical. The four walls and the locked door are physical impediments to escape. Now is it different when one who is in control of a vessel at anchor, within practical rowing distance from the shore, who has agreed that a guest on board shall be free to leave, there being no means to leave except by rowboats, wrongfully refuses the guest the use of a boat? The boat is the key. By refusing

the boat he turns the key. The guest is as effectually locked up as if there were walls along the sides of the vessel. The restraint is physical. The impassable sea is the physical barrier. ***

A careful study of the evidence leads us to conclude that the jury were warranted in finding that the defendant was guilty of unlawful imprisonment. This, to be sure, is not an action based upon the defendant's failure to keep his agreement to permit the plaintiff to leave

57

the yacht as soon as it should reach shore. But his duty under the circumstances is an important consideration. It cannot be believed that either party to the agreement understood that it was his duty merely to bring her to an American harbor. The agreement implied that she was to go ashore. There was no practical way for her to go ashore except in the yacht's boats. The agreement must be understood to mean that he would bring her to land, or to allow her to get to land, by the only available means. The evidence is that he refused her a boat. His refusal was wrongful. The case leaves not the slightest doubt that he had the power to control the boats, if he chose to exercise it. It was not enough for him to leave it to the husband to say whether she might go ashore or not. She had a personal right to go on shore. If the defendant personally denied her the privilege, as the jury might find he did, it was a wrongful denial. ***

[Verdict upheld on liability but remittitur of $500 ordered as to damages.]

NOTES AND QUESTIONS

1. A woman tells her boyfriend she does not want to see him anymore, but agrees to ride with him just to the store and back. When they return to her parents' house and she opens the car door, the boyfriend suddenly starts the car off, making it dangerous for her to exit the moving vehicle. False imprisonment? See Noguchi v. Nakamura, 2 Haw.App. 655, 638 P.2d 1383 (1982) (defendant had duty to allow plaintiff to exit vehicle if her limited consent had expired).

2. In Talcott v. National Exhibition Co., 144 App.Div. 337, 128 N.Y.S. 1059 (1911), plaintiff was one of a crowd seeking admission to the baseball game between the Chicago Cubs and the New York Giants that played off the tie for the 1908 National League pennant. This was necessary because of a one-to-one tie in an earlier game between the same teams, produced when Fred Merkle of the Giants pulled his famous "bonehead play" in failing to touch second base. For a fascinating account of that game told by other players in it, see L. Ritter, The Glory of Their Times 98-100 and 124-218 (1966) (picture of the after-game crowd in the Polo Grounds at page 126). The Giants, who would have won the pennant except for the Merkle misstep, lost the playoff game. Plaintiff succeeded in entering an enclosure where tickets were being sold, but found that he could not get into the stands. Defendant closed the entrance gates behind him to prevent injuries from the crush. There was another exit, but because defendant failed to inform plaintiff of its existence, he remained within the enclosure for more than an hour. In his action for false imprisonment, a verdict and judgment in his favor were affirmed. It was held that while the defendant might have been

justified in closing the gates, it was then under a duty to inform plaintiff of the other exit.

3. Plaintiff boarded a plane in Washington, D.C., for a flight to New York where he was to attend a reception at the United Nations. After sitting on the tarmac for over an hour waiting for his flight to take off, plaintiff

realized he would miss the reception and demanded to be returned to the terminal. Is the airline liable for failing to allow him to leave the airplane after it had pulled away from the gate? After it had sat on the tarmac for an hour? Somewhere above New Jersey? See Abourezk v. New York Airlines, 895 F.2d 1456 (D.C.Cir.1990) (no duty to release passenger until plane reached New York absent exigent circumstances not present in the case).

4. Members of a religious cult are abducted by agents of their relatives and subjected to deprogramming. Is this false imprisonment? Eilers v. Coy, 582 F.Supp. 1093, 1096 (D.Minn. 1984) (applying Minnesota law) ("By their own admission, the defendants intended to confine the plaintiff for at least one week. While the defendants maintain that their purpose was to help the plaintiff, it is not a defense to false imprisonment that the defendants may have acted with good motives. Malice toward the person confined is not an element of false imprisonment.").

5. Intentional Infliction of Emotional Distress

State Rubbish Collectors Ass'n v. Siliznoff

Supreme Court of California, 1952.

38 Cal.2d 330, 240 P.2d 282.

[The State Rubbish Collectors Association sued Siliznoff to collect on certain promissory notes. Siliznoff sought cancellation of the notes because of duress and want of consideration. In addition, he sought general and punitive damages because of alleged "assaults" made on him. The evidence was that Siliznoff had collected the trash from the Acme Brewing Company, which the Association regarded as within the territory of another member of the Association named Abramoff. The defendant was called before the Association and ordered to pay over the collected money to Abramoff, as a result of which he signed the notes in question. Further facts appear in the opinion.

The jury returned a verdict for Siliznoff on the original complaint and on the counterclaim. Siliznoff obtained a judgment against the Association for $1,250 general and special damages and $4,000 punitive damages. The Association appealed the judgment.]

TRAYNOR, J. ***Plaintiffs primary contention is that the evidence is insufficient to support the judgment. Defendant testified that: ***

Andikian [an inspector of the Association] told defendant that " 'We will give you up till tonight to get down to the board meeting and make some kind of arrangements or agreements about the Acme Brewery, or otherwise we are going to beat you up.' ***He says he either would hire somebody or do it himself. And I says, 'Well, what

would they do to me?' He says, well, they would physically beat me up first, cut up the truck tires or burn the truck, or otherwise put me out of business completely. He said if I didn't appear at that meeting and make some kind of an agreement that they would do that, but he says up to then they would let

59

me alone, but if I walked out of that meeting that night they would beat me up for sure." Defendant attended the meeting and protested that he owed nothing for the Acme account and in any event could not pay the amount demanded. He was again told by the president of the association that "that table right there [the board of directors] ran all the rubbish collecting in Los Angeles and if there was any routes to be gotten that they would get them and distribute them among their members * * After two hours of further discussion defendant agreed to join the association and pay for the Acme account. He promised to return the next day and sign the necessary papers. He testified that the only reason "they let me go home, is that I promised that I would sign the notes the very next morning." The president "made me promise on my honor and everything else, and I was scared, and I knew I had to come back, so I believe he knew I was scared and that I would come back. That's the only reason they let me go home." Defendant also testified that because of the fright he suffered during his dispute with the association he became ill and vomited several times and had to remain away from work for a period of several days.

Plaintiff contends that the evidence does not establish an assault against defendant because the threats made all related to action that

might take place in the future; that neither Andikian nor members of the board of directors threatened immediate physical harm to defendant. [C] We have concluded, however, that a cause of action is established when it is shown that one, in the absence of any privilege, intentionally subjects another to the mental suffering incident to serious threats to his physical well-being, whether or not the threats are made under such circumstances as to constitute a technical assault.

In the past it has been frequently stated that the interest in emotional and mental tranquility is not one that the law will protect from invasion in its own right. [Cc] As late as 1934 the Restatement of Torts took the position that "The interest in mental and emotional tranquility and, therefore, in freedom from mental and emotional disturbance is not, as a thing in itself, regarded as of sufficient importance to require others to refrain from conduct intended or recognizably likely to cause such a disturbance." Restatement, Torts, § 46, comment c. The Restatement explained the rule allowing recovery for the mere apprehension of bodily harm in traditional assault cases as an historical anomaly (§ 24, comment c), and the rule allowing recovery for insulting conduct by an employee of a common carrier as justified by the necessity of securing for the public comfortable as well as safe service (§ 48, comment c). ***

The California cases have been in accord with the Restatement in allowing recovery where physical injury resulted from intentionally subjecting the plaintiff to serious mental distress. [Cc]

The view has been forcefully advocated that the law should protect emotional and mental tranquillity as such against serious and

intentional invasions, [cc] and there is a growing body of case law

supporting this position. [Cc] In recognition of this development the American Law Institute amended section 46 of the Restatement of Torts in 1947 to provide:

"One who, without a privilege to do so, intentionally causes severe emotional distress to another is liable (a) for such emotional distress, and (b) for bodily harm resulting from it."

In explanation it is stated that "The interest in freedom from severe emotional distress is regarded as of sufficient importance to require others to refrain from conduct intended to invade it. Such conduct is tortious. The injury suffered by the one whose interest is invaded is frequently far more serious to him than certain tortious invasions of the interest in bodily integrity and other legally protected interests. In the absence of a privilege, the actor's conduct has no social utility; indeed it is anti-social. No reason or policy requires such an actor to be protected from the liability which usually attaches to the wilful wrongdoer whose efforts are successful." (Restatement of the Law, 1948 Supplement, Torts, § 46, comment d.)

There are persuasive arguments and analogies that support the recognition of a right to be free from serious, intentional and unprivileged invasions of mental and emotional tranquility. If a cause of action is otherwise established, it is settled that damages may be given for mental suffering naturally ensuing from the acts complained of [cc], and in the case of many torts, such as assault, battery, false imprisonment and defamation, mental suffering will frequently constitute the principal element of damages. [C] In cases where

mental suffering constitutes a major element of damages it is anomalous to deny recovery because the defendant's intentional misconduct fell short of producing some physical injury.

It may be contended that to allow recovery in the absence of physical injury will open the door to unfounded claims and a flood of litigation, and that the requirement that there be physical injury is necessary to insure that serious mental suffering actually occurred. The jury is ordinarily in a better position, however, to determine whether outrageous conduct results in mental distress than whether that distress in turn results in physical injury. From their own experience jurors are aware of the extent and character of the disagreeable emotions that may result from the defendant's conduct, but a difficult medical question is presented when it must be determined if emotional distress resulted in physical injury. [C] Greater proof that mental suffering occurred is found in the defendant's conduct designed to bring it about than in physical injury that may or may not have resulted therefrom. ***

In the present case plaintiff caused defendant to suffer extreme fright. By intentionally producing such fright it endeavored to compel him either to give up the Acme account or pay for it, and it had no right or privilege to adopt such coercive methods in competing for business. In these circumstances liability is clear. ***

61

The judgment is affirmed.

NOTES AND QUESTIONS

1. Why not assault? Why not false imprisonment? Assuming neither tort occurred, how many attorneys in 1952 would have thought of bringing a cross-complaint, as counterclaims are known in California, in this case for "intentional infliction of emotional harm"? How many judges would have adopted it?

2. But what form of tort has been unleashed? Is it as definite in character as those that arose out of the writ of trespass? What would the result have been in the main case if the Association had only threatened to close down Siliznoff's business, but had not made threats to his physical wellbeing? Do you agree that the jury can more easily determine whether conduct is outrageous than whether physical injury resulted from emotional harm? If so, does this fact suggest that a claim should be allowed?

3. Kentucky has referred to the tort as a gap filler: "Clearly, the conduct in question must be extreme, or outrageous and intolerable. It must violate generally accepted standards of decency and morality. It must be more than bad manners, and must cause severe emotional distress, not just hurt feelings. Many instances of criminal conduct would likely qualify, but any conduct that shocks the conscience could be unlawful as well because others have the right to be free of such conduct, even if the conduct does not rise to the level of a crime. The purpose behind recognizing the tort of intentional infliction of emotional distress was to allow a cause of action for severe emotional distress, caused by truly outrageous behavior, where there was no remedy because the victim did not have an injury directly to his person or intangible personal attributes such as reputation. The tort is grounded in harassing or abusive behaviors that cause severe emotional distress. To this extent, it is a

'gap-filler' tort.... And while the intentional infliction of emotional distress could be pleaded alternatively, a litigant cannot prevail on both a negligence claim and an intentional infliction of emotional distress claim on the same set of facts." Childers v. Geile, 367 S.W.3d 576, 581 (Ky. 2012) (internal citations omitted).

In Texas, intentional infliction of emotional distress is intended to supplement existing forms of recovery and allow for recovery in rare instances in which a defendant intentionally inflicts severe emotional distress in an unusual manner so the victim has no other recognized theory of redress. Hoffmann LaRoche, Inc. v. Zeltwanger, 144 S.W.3d 438 (Tex. 2004) (when the gravamen of the plaintiff's complaint is for workplace sexual harassment, the plaintiff must proceed solely under a statutory claim unless there are additional facts, unrelated to sexual harassment, to support an independent tort claim for intentional infliction of emotional distress). Properly limited, the tort is not available when the actor intends to invade some other legally protected interest, even if emotional distress results. Conley v. Driver, 175 S.W.3d 882, 888 (Tex. App. 2005)

4. One of the earliest cases to allow recovery for the intentional infliction of mental distress as a distinct tort was Wilkinson v. Downton,

62

[1897] 2 Q.B. 57, in which a practical joker amused himself by telling the plaintiff that her husband had been smashed up in an accident, was lying at The Elms [a pub on the High Road] in Leytonstone with both legs broken, and that she was to go to him at once in a cab with two pillows to fetch him home. The shock to her nervous system

caused serious physical illness with permanent consequences, and at one time threatened her reason. The cause of action through which defendant was held liable is unclear to the reader of the opinion and apparently to the court as well.

5. Interference with Human Bodies. Before the recognition of a separate tort for intentional infliction of emotional distress, a number of courts had allowed recovery for mental distress at the intentional mutilation or disinterment of a dead body or for interference with proper burial. See, for example, Aiderman v. Ford, 146 Kan. 698, 72 P.2d 981 (1937) (autopsy performed without widow's consent or any legal authority); Gostkowski v. Roman Catholic Church, 262 N.Y. 320, 186 N.E. 798 (1933) (priest had ordered the grave of plaintiffs late wife to be moved to another part of the cemetery without notifying him); Papieves v. Lawrence, 437 Pa. 373, 263 A.2d 118 (1970) (defendant had assisted a teenage motorist who had accidentally struck and killed a pedestrian in hiding and then burying the body); Whaley v. County of Tuscola, 58 F.3d 1111 (6th Cir.1995) (discussing Ohio and Michigan law) (unauthorized removal of corneas and eyeballs by coroner). In Gadbury v. Bleitz, 133 Wash. 134, 233 P. 299 (1925), where the body was held without burial with demand for payment of another debt, the court avoided difficulties surrounding right of ownership by recognizing that the tort was in reality the intentional infliction of mental distress upon the survivors by extreme outrage. In accord, Gray Brown-Service Mortuary, Inc. v. Lloyd, 729 So.2d 280, 285 (Ala. 1999) ("It has long been the law of Alabama that mistreatment of burial places and human remains will support the recovery of damages for mental suffering.")

6. Common Carriers and Innkeepers have been held to a higher standard of conduct and sometimes held liable for using insulting language to their passengers and patrons. See, e.g., Lipman v. Atlantic Coast Line R.R. Co., 108 S.C. 151, 93 S.E. 714 (1917) (carrier); Emmke v. De Silva, 293 F. 17 (8th Cir. 1923) (hotel). But cf. Wallace v. Shoreham Hotel Corp., 49 A.2d 81 (D.C. Mun. App. 1946) (restaurant patron did not state cause of action based on waiter's insult); Bethel v. N.Y.C. Transit Authority, 92 N.Y.2d 348, 681 N.Y.S.2d 201, 703 N.E.2d 1214 (1998) (abolishing higher standard of care for common carriers); and Nunez v. Professional Transit Mgt. of Tucson, Inc., 229 Ariz. 117, 271 P.3d 1104 (2012) (abandoning the "highest degree of care standard" for common carriers).

7. As the principal case indicates, § 46 of the Restatement of Torts was changed in the 1948 Supplement to recognize the cause of action for the intentional infliction of severe emotional distress, called "outrage" in some jurisdictions. As with any newly recognized cause of action, the courts in each jurisdiction must struggle with what its contours will be. What sorts of conduct constitutes "extreme and outrageous" conduct? Are words alone enough? Should the plaintiff's individual vulnerabilities be taken into account? How does the jury determine whether the emotional distress is "severe"?

63

Is it necessary that the defendant intended to cause the mental disturbance, or that it was substantially certain to follow, within the rule stated in Garratt v. Dailey, page 17?

Slocum v. Food Fair Stores of Florida

Supreme Court of Florida, 1958.

100 So.2d 396.

DREW, Justice. This appeal is from an order dismissing a complaint for failure to state a cause of action. Simply stated, the plaintiff sought money damages for mental suffering or emotional distress, and an ensuing heart attack and aggravation of pre-existing heart disease, allegedly caused by insulting language of the defendant's employee directed toward her while she was a customer in its store. Specifically, in reply to her inquiry as to the price of an item he was marking, he replied: "If you want to know the price, you'll have to find out the best way you can ***you stink to me." She asserts, in the alternative, that the language was used in a malicious or grossly reckless manner, "or with intent to inflict great mental and emotional disturbance to said plaintiff."

No great difficulty is involved in the preliminary point raised as to the sufficiency of damages alleged, the only direct injury being mental or emotional with physical symptoms merely derivative therefrom. [C] While that decision [precedent cited by the court] would apparently allow recovery for mental suffering, even absent physical consequences, inflicted in the course of other intentional or malicious torts, it does not resolve the central problem in this case, i.e. whether the conduct here claimed to have caused the injury, the use of insulting language under the circumstances described, constituted an actionable invasion of a legally protected right. Query: does such an assertion of a deliberate disturbance of emotional equanimity state an independent cause of action in tort?

Appellant's fundamental argument is addressed to that proposition. The case is one of first impression in this jurisdiction, and she contends that this Court should recognize the existence of a new tort, an independent cause of action for intentional infliction of emotional distress.

A study of the numerous references on the subject indicates a strong current of opinion in support of such recognition, in lieu of the strained reasoning so often apparent when liability for such injury is predicated upon one or another of several traditional tort theories. ***

A most cogent statement of the doctrine covering tort liability for insult has been incorporated in the Restatement of the Law of Torts, 1948 supplement, sec. 46, entitled "Conduct intended to cause emotional distress only." It makes a blanket provision for liability on the part of "one, who, without a privilege to do so, intentionally causes severe emotional distress to another," indicating that the requisite intention

64

exists "when the act is done for the purpose of causing the distress or with knowledge ***that severe emotional distress is substantially certain to be produced by [such] conduct." Comment (a), Sec. 46, supra. Abusive language is, of course, only one of the many means by which the tort could be committed.

However, even if we assume, without deciding, the legal propriety of that doctrine, a study of its factual applications shows that a line of demarcation should be drawn between conduct likely to cause mere "emotional distress" and that causing "severe emotional distress," so as to exclude the situation at bar. [C] "So far as it is possible to

generalize from the cases, the rule which seems to be emerging is that there is liability only for conduct exceeding all bounds which could be tolerated by society, of a nature especially calculated to cause mental damage of a very serious kind." [C] And the most practicable view is that the functions of court and jury are no different than in other tort actions where there is at the outset a question as to whether the conduct alleged is so legally innocuous as to present no issue for a jury. [C]

This tendency to hinge the cause of action upon the degree of the insult has led some courts to reject the doctrine in toto. [C] Whether or not this is desirable, it is uniformly agreed that the determination of whether words or conduct are actionable in character is to be made on an objective rather than subjective standard, from common acceptation. The unwarranted intrusion must be calculated to cause "severe emotional distress" to a person of ordinary sensibilities, in the absence of special knowledge or notice. There is no inclination to include all instances of mere vulgarities, obviously intended as meaningless abusive expressions. While the manner in which language is used may no doubt determine its actionable character, appellant's assertion that the statement involved in this case was made to her with gross recklessness, etc., cannot take the place of allegations showing that the words were intended to have real meaning or serious effect.***

[W]hether or not these rules [recognizing the cause of action for intentional infliction of emotional distress] are ultimately adopted in this jurisdiction, the facts of the present case cannot be brought within their reasonable intendment.

Affirmed.

NOTES AND QUESTIONS

1. Why is the intentional infliction of mental or emotional disturbance by the insult not a tort in itself?

2. "Against a large part of the frictions and irritations and clashing of temperaments incident to participation in a community life, a certain toughening of the mental hide is a better protection than the law could ever be. ***Of course there is danger of getting into the realm of the trivial in this matter of insulting language. No pressing social need requires that every

abusive outburst be converted into a tort; upon the contrary, it would be unfortunate if the law closed all the safety valves through which irascible tempers might legally blow off steam." Magruder, Mental and Emotional Disturbance in the Law of Torts, 49 Harv. L. Rev. 1033, 1035, 1053 (1936). "The law intercedes only when the distress is so severe that no reasonable person should be expected to endure it. [C] Forgetting to take out the garbage and other garden-variety frictions will not rise to this level." Richardson v. Richardson, 906 N.W.2d 369, 377, 2017 S.D. 92 (S.D. 2017) (permitting claim of ex-wife to go forward based on abusive conduct of ex-husband before marriage took place).

What if animal rights protesters came to plaintiff's place of business and to his house, making speeches through bullhorns and chanting slogans that included the phrase "we know where you sleep at night"? Ortberg v. Goldman Sachs Group, 64 A.3d 158, 164 (D.C.

2014) (conduct complained of is part and parcel "of the frictions and irritations and clashing of temperaments incident to participation in a community life," especially life in a society that recognizes a right to public political protest).

What if an ABC News crew filmed an auto accident victim's treatment, death, and his family being told of his death without their knowledge or consent and then aired it as part of segment on medical trauma? Chanko v. ABC, Inc., 27 N.Y.3d 46, 49 N.E.3d 1171 (N.Y. 2016) ("The conduct at issue here...--the broadcasting of a recording of a patient's last moments of life without consent--would likely be considered reprehensible by most people, and we do not condone it. Nevertheless, it was not so extreme and outrageous as to satisfy our exceedingly high legal standard.")

3. None of these was found actionable: Halliday v. Cienkowski, 333 Pa. 123, 3 A.2d 372 (1939) ("Scotch bitch," "bastard," and "bum"); Atkinson v. Bibb Mfg. Co., 50 Ga.App. 434, 178 S.E. 537 (1935) (foreman cursing discharged woman with open knife in his hand); Kramer v. Ricksmeier, 159 Iowa 48, 139 N.W. 1091 (1913) (profanity and abuse over the telephone, with threats of future violence); Barry v. Baugh, 111 Ga.App. 813, 143 S.E.2d 489 (1965) ("crazy"); and Booker v. Silverthorne, 111 S.C. 553, 99 S.E. 350, 351 (1919) ('You are a God damned liar. If I were there, I would break your God damned neck.") (language attributed to defendant "merits severest condemnation and subjects the user to the scorn and contempt of his fellow men. But it is not civilly actionable.").

4. What if the slurs or insults focus on racial, ethnic, or sexual characteristics? Most courts have found them not so outrageous as

to be intolerable in a civilized society. See, for example, Harville v. Lowville Central School Dist., 245 A.D.2d 1106, 667 N.Y.S.2d 175 (App. Div. 1997) (student called "Polish Nazi" by teacher); Ugalde v. W.A. McKenzie Asphalt Co., 990 F.2d 239 (5th Cir. 1993) (applying Texas law) (worker called "wetback" by supervisor); Taggart v. Drake Univ., 549 N.W.2d 796 (Iowa 1996) (in fit of temper, dean addresses faculty member as "young woman" and refers to her in a "sexist and condescending manner"). Such words may be considered along with other conduct, however, in making a claim. Contreras v. Crown Zellerbach Corp., 88 Wash.2d 735, 736, 565 P.2d 1173, 1174 (1977) ("continuous humiliation and embarrassment by reason of racial

jokes, slurs and comments made in his presence" by coworkers and supervisors held to state a claim).

5. In rare circumstances, the First Amendment's free speech clause may provide a defense to state tort actions, including claims for intentional infliction of emotional distress. Plaintiff Snyder's son Mathew was killed in action in Iraq and his funeral was held at his parish church in Westminster, Maryland. Defendant Phelps and members of his family and congregation picketed on public land adjacent to public streets near Mathew's funeral. The Westboro Baptist Church congregation believes that God hates and punishes the United States for its tolerance of homosexuality, particularly in America's military. Their picket signs reflected that belief. A jury found that defendants were liable to Snyder for intentional infliction of emotional distress, but the Supreme Court found that the speech was protected by the First Amendment and vacated the judgment.

Snyder v. Phelps, 562 U.S. 443, 458 (U.S. 2011). ("What Westboro said, in the whole context of how and where it chose to say it, is entitled to 'special protection' under the First Amendment, and that protection cannot be overcome by a jury finding that the picketing was outrageous.")

6. Note the last sentence of the opinion in the principal case. The Supreme Court of Florida did not adopt intentional infliction of emotional distress until almost thirty years later. Metropolitan Life Ins. Co. v. McCarson, 467 So.2d 277 (Fla. 1985).

Harris v. Jones

Court of Appeals of Maryland, 1977.

281 Md. 560, 380A.2d 611.

MURPHY, Chief Judge. ***The plaintiff, William R. Harris, a 26-year-old, 8-year employee of General Motors Corporation (GM), sued GM and one of its supervisory employees, H. Robert Jones, in the Superior Court of Baltimore City. The declaration alleged that Jones, aware that Harris suffered from a speech impediment which caused him to stutter, and also aware of Harris' sensitivity to his disability, and his insecurity because of it, nevertheless "maliciously and cruelly ridiculed ***[him] thus causing tremendous nervousness, increasing the physical defect itself and further injuring the mental attitude fostered by the Plaintiff toward his problem and otherwise intentionally inflicting emotional distress." It was also alleged in the declaration that Jones' actions occurred within the course of his employment with GM and that GM ratified Jones' conduct.

The evidence at trial showed that Harris stuttered throughout his entire life. While he had little trouble with one syllable words, he had great difficulty with longer words or sentences, causing him at times to shake his head up and down when attempting to speak.

During part of 1975, Harris worked under Jones' supervision at a GM automobile assembly plant. Over a five-month period, between March and August of 1975, Jones approached Harris over 30 times at

work and verbally and physically mimicked his stuttering disability. In addition, two or three times a week during this period, Jones approached Harris and told him, in a "smart manner," not to get nervous. As a result of Jones' conduct, Harris was "shaken up" and felt "like going into a hole and hide."

On June 2, 1975, Harris asked Jones for a transfer to another department; Jones refused, called Harris a "troublemaker" and chastised him for repeatedly seeking the assistance of his committeeman, a representative who handles employee grievances. On this occasion, Jones, "shaking his head up and down" to imitate Harris, mimicked his pronunciation of the word "committeeman," which Harris pronounced "mmitteeman." ***

Harris had been under the care of a physician for a nervous condition for six years prior to the commencement of Jones' harassment. He admitted that many things made him nervous, including "bosses." Harris testified that Jones' conduct heightened his nervousness and his speech impediment worsened. He saw his

physician on one occasion during the five-month period that Jones was mistreating him; the physician prescribed pills for his nerves.

Harris admitted that other employees at work mimicked his stuttering. Approximately 3,000 persons were employed on each of two shifts, and Harris acknowledged the presence at the plant of a lot of "tough guys," as well as profanity, name-calling and roughhousing among the employees. He said that a bad day at work caused him to become more nervous than usual. He admitted that he had problems with supervisors other than Jones, that he had been suspended or relieved from work 10 or 12 times, and that after one such dispute, he followed a supervisor home on his motorcycle, for which he was later disciplined.

On this evidence, ***the jury awarded Harris $3,500 compensatory damages and $15,000 punitive damages against both Jones and GM. [This was reversed by the Court of Special Appeals.]

In concluding that the intentional infliction of emotional distress, standing alone, may constitute a valid tort action, the Court of Special Appeals relied upon Restatement (Second) of Torts, ch. 2, Emotional Distress, § 46 (1965), which provides, in pertinent part:

"§ 46. Outrageous Conduct Causing Severe Emotional Distress

"(1) One who by extreme and outrageous conduct intentionally or recklessly causes severe emotional distress to another is subject to liability for such emotional distress, and if bodily harm to the other results from it, for such bodily harm."

The court noted that the tort was recognized, and its boundaries defined, in W. Prosser, Law of Torts § 12, at 56 (4th ed. 1971), as

follows:

68

"So far as it is possible to generalize from the cases, the rule which seems to have emerged is that there is liability for conduct exceeding all bounds usually tolerated by decent society, of a nature which is especially calculated to cause, and does cause, mental distress of a very serious kind."

The trend in other jurisdictions toward recognition of a right to recover for severe emotional distress brought on by the intentional act of another is manifest. Indeed, 37 jurisdictions appear now to recognize the tort as a valid cause of action. ***

[F]our elements ***must coalesce to impose liability for intentional infliction of emotional distress:

(1) The conduct must be intentional or reckless;

(2) The conduct must be extreme and outrageous;

(3) There must be a causal connection between the wrongful conduct and the emotional distress;

(4) The emotional distress must be severe. ***

[The intermediate Court of Special Appeals had found that the first two elements were established but reversed on the ground that the last two elements were not.]

Whether the conduct of a defendant has been "extreme and outrageous," so as to satisfy that element of the tort, has been a particularly troublesome question. Section 46 of the Restatement, comment d, states that "Liability has been found only where the

conduct has been so outrageous in character, and so extreme in degree, as to go beyond all possible bounds of decency, and to be regarded as atrocious, and utterly intolerable in a civilized community." The comment goes on to state that liability does not extend, however: "to mere insults, indignities, threats, annoyances, petty oppressions, or other trivialities. The rough edges of our society are still in need of a good deal of filing down, and in the meantime plaintiffs must necessarily be expected and required to be hardened to a certain amount of rough language, and to occasional acts that are definitely inconsiderate and unkind. ***"

In determining whether conduct is extreme and outrageous, it should not be considered in a sterile setting, detached from the surroundings in which it occurred. [C] The personality of the individual to whom the misconduct is directed is also a factor. "There is a difference between violent and vile profanity addressed to a lady, and the same language to a Butte miner and a United States marine." Prosser, Intentional Infliction of Mental Suffering: A New Tort, 37 Mich. L. Rev. 874, 887 (1939). ***

It is for the court to determine, in the first instance, whether the defendant's conduct may reasonably be regarded as extreme and outrageous; where reasonable men may differ, it is for the jury to

determine whether, in the particular case, the conduct has been sufficiently extreme and outrageous to result in liability. ***

While it is crystal clear that Jones' conduct was intentional, we need not decide whether it was extreme or outrageous, or causally related to the emotional distress which Harris allegedly suffered. [2] The fourth

element of the tort--that the emotional distress must be severe--was not established by legally sufficient evidence justifying submission of the case to the jury. That element of the tort requires the plaintiff to show that he suffered a severely disabling emotional response to the defendant's conduct. The severity of the emotional distress is not only relevant to the amount of recovery, but is a necessary element to any recovery. ***

* * *

[2] The fact that Harris may have had some pre-existing susceptibility to emotional distress does not necessarily preclude liability if it can be shown that the conduct intensified the preexisting condition of psychological stress. [Cc]

Assuming that a causal relationship was shown between Jones' wrongful conduct and Harris' emotional distress, we find no evidence, legally sufficient for submission to the jury, that the distress was "severe" within the contemplation of the rule requiring establishment of that element of the tort. The evidence that Jones' reprehensible conduct humiliated Harris and caused him emotional distress, which was manifested by an aggravation of Harris' pre-existing nervous condition and a worsening of his speech impediment, was vague and weak at best. ***While Harris' nervous condition may have been exacerbated somewhat by Jones' conduct, his family problems antedated his encounter with Jones and were not shown to be attributable to Jones' actions. Just how, or to what degree, Harris' speech impediment worsened is not revealed by the evidence. Granting the cruel and insensitive nature of Jones' conduct toward Harris, and considering the position of authority

which Jones held over Harris, we conclude that the humiliation suffered was not, as a matter of law, so intense as to constitute the "severe" emotional distress required to recover for the tort of intentional infliction of emotional distress.

Judgment affirmed; costs to be paid by appellant.

NOTES AND QUESTIONS

1. Conduct Exceeding All Bounds Usually Tolerated by Decent Society. How culpable must defendant's conduct be before it reaches the level of being extreme enough to be deemed tortious? Some guidelines can be found in decided cases. For example, it is generally held that the mere solicitation of a woman to illicit intercourse is not only not an assault but does not give rise to any other cause of action. Reed v. Maley, 115 Ky. 816, 74 S.W. 1079 (1903). "The view being, apparently, that there is no harm in asking." Magruder, Mental and Emotional Disturbance in the Law of Torts, 49 Harv. L. Rev. 1033, 1055 (1936). Jones v. Clinton, 990 F.Supp. 657, 677 (E.D.Ark. 1998) (applying Arkansas law) ("While the Court will certainly agree that

plaintiff's allegations describe offensive conduct, the Court, as previously noted, has found that the Governor's alleged conduct does not constitute sexual assault. Rather, the conduct as alleged by plaintiff describes a mere sexual proposition or encounter, albeit an odious one.... The Court is not aware of any authority holding that such a sexual encounter or proposition of the type alleged in this case, without more, gives rise to a claim of outrage.")

In Samms v. Eccles, 11 Utah 2d 289, 358 P.2d 344 (1961), a married woman was hounded by continued telephone calls from May to December, some of them late at night; and on one occasion defendant came to her home and made an indecent exposure of his person. The court stated that under usual circumstances solicitation would not be actionable ("It seems to be a custom of long standing and one which in all likelihood will continue"), but found the "aggravated circumstances" in this case sufficient to make the defendant liable.

Plaintiff alleged that her rabbi had induced her to enter into a sexual relationship with him in the guise of therapy to assist her in finding a husband. Marmelstein v. Kehillat New Hempstead: The Rav Aron Jofen Community Synagogue, 11 N.Y.3d 15, 22, 892 N.E.2d 375, 862 N.Y.S.2d 311 (2008) (even if plaintiff could prove that her acquiescence was obtained through lies, manipulation, or other morally opprobrious conduct, the rabbi's conduct was not so outrageous in character and extreme in degree so as to go beyond all possible bounds of decency and be utterly intolerable in a civilized community).

2. Courts are reluctant to subject either internal family disputes or petty but strongly felt antagonisms to the sanctions of tort law. However, when conduct exceeds all reasonable bounds of behavior tolerated by society, courts are likely to find that a claim has been stated. Cf. Miller v. Currie, 50 F.3d 373 (6th Cir.1995) (applying Ohio law) (plaintiffs brother and sister-in- law and the employees of a nursing home prevented her from seeing her ninety-eight-year old mother); Halio v. Lurie, 15 A.D.2d 62, 222 N.Y.S.2d 759 (1961) (man who had jilted a woman wrote her jeering verses and taunting

letters); Jackson v. Brown, 904 P.2d 685 (Utah 1995) (last minute cancellation of wedding not enough for outrage, but courting woman, proposing, and making arrangements for wedding including applying for license while married to someone else may be); Smith v. Malouf, 722 So.2d 490 (Miss. 1998) (teenager and her parents hid her location from the father of her baby so that baby could be secretly placed with strangers for adoption); Flamm v. Van Nierop, 56 Mise.2d 1059, 291 N.Y.S.2d 189 (1968) (defendant constantly drove behind plaintiff at a "dangerously close distance," phoned him unnecessarily at his home and business and either hung up or remained on the line in silence, and "dashed" at him in public places).

3. Is filing a frivolous lawsuit against someone conduct that is sufficiently outrageous to permit recovery for intentional infliction of emotional distress? After being injured in a fight in a parking lot that was poorly lit, crowded, and chaotic, plaintiff identified a man as her assailant even though she only had a vague impression of the physical characteristics of the person responsible for breaking her leg and someone else had

apologized for causing her injury. After the man she identified was found not guilty on the criminal charges arising out of her identification, she filed a civil suit against the man. He counterclaimed for intentional infliction of emotional distress. Davis v. Currier, 704 A.2d 1207 (Maine 1997) (no cause of action for intentional infliction of emotional distress); Swerdlick v. Koch, 721 A.2d 849 (R.I, 1998) (no cause of action against neighbor who

repeatedly photographed and maintained a log of activity in attempt to prove plaintiffs were illegally operating a mail-order business out of their home). What if a juror, found in contempt for failing to show up one day two weeks into the trial of someone accused of torturing and killing six people, was placed alone in a jail cell with the alleged murderer, was questioned and berated by the alleged murderer, and was laughed at by the jailors who placed her there? Johnson v. Wayne County, 213 Mich.App. 143, 540 N.W.2d 66 (1995) (states a cause of action).

4. What if a hospital had a policy of placing patients infected with the HIV virus in the same rooms as patients who were not, without disclosing that fact? Patient accidentally used his roommate's razor to shave and was then informed by the roommate that roommate was infected with HIV. Patient alleges that the hospital's conduct is outrageous and that he suffered severe emotional distress as a result. Liability? What other information would you like to have before deciding this issue? Bain v. Wells, 936 S.W.2d 618 (Tenn. 1997). Suppose a surgeon, angry at an operating-room nurse, throws a surgical drape into her face, covering her with the patient's blood and tissue. Both the nurse and the patient underwent a series of tests for HIV, hepatitis, and other communicable diseases. All were negative. Is her testimony that she feared for her life and suffered severe emotional distress at the thought of the risk sufficient? Grantham v. Vanderzyl, 802 So.2d 1077 (Ala. 2001) (court finds as a matter of law that the mere fear of contracting a disease, without actual exposure to it, cannot be sufficient to cause the level of distress necessary for tort of outrage).

5. Is there any common theme or set of similar factors running through the following cases?

A. State Rubbish Collectors Association v. Siliznoff, page 58.

B. Defendant, a private detective representing that he was a police officer, threatened to charge the plaintiff, a resident alien, with espionage unless she turned over to him certain private letters in her possession. She suffered severe mental disturbance and was made seriously ill. The defendant was held liable. Janvier v. Sweeney, [1919] 2 K.B. 316.

C. Defendants, school authorities, called a high school girl to the school office and bullied and badgered her for a considerable length of time, threatening her with prison and with public disgrace for herself and her family, unless she confessed to immoral conduct with various men. They succeeded in extorting from her a confession of misconduct, of which she was innocent. She suffered severe mental disturbance and resulting illness. Defendants were held liable. Johnson v. Sampson, 167 Minn. 203, 208 N.W. 814 (1926). See also Hunt v. State, 69 A.3d 360 (Del. 2013) (uniformed police

officer threatened eight-year-old child while questioning him without parental permission about a bullying incident at school).

D. Collecting Agencies. While reasonable attempts to collect a debt lead to no liability, even though they may be expected to, and do, cause serious mental distress, more extreme conduct may produce a different result. Defendant, a creditor, had plaintiff called to the telephone of her neighbor, with the message that it was an

emergency call. Defendant began the conversation by telling plaintiff that "this is going to be a shock; it is as much of a shock to me to have to tell you as it will be to you." When plaintiff said that she was prepared for the message, the defendant let her have it: "This is the Federal Outfitting Company--why don't you pay your bill?" Plaintiff suffered severe nervous shock and resulting serious illness. A complaint alleging these facts was held to state a cause of action. Bowden v. Spiegel, Inc., 96 Cal.App.2d 793, 216 P.2d 571 (1950). A veterinarian and an animal hospital threaten to "do away with" plaintiffs' dog unless plaintiffs paid in cash a bill for treating the dog for injuries suffered when struck by an automobile. See Lawrence v. Stanford and Ashland Terrace Animal Hospital, 655 S.W.2d 927 (Tenn. 1983). See also Cadle Co. v. Hobbs, 673 So.2d 1363 (La. App. 1996) (implying that because plaintiff was African-American, no one would take her word against debt collector's).

E. There are similar cases involving the outrageous tactics of insurance adjusters seeking to force a settlement. Continental Cas. Co. v. Garrett, 173 Miss. 676, 161 So. 753 (1935). See also, as to refusal of a liability insurer to settle a claim, Fletcher v. Western Nat. Life Ins. Co., 10 Cal.App.3d 376, 89 Cal.Rptr. 78 (1970). When the insurance company is reasonable in its refusal to settle a claim, it will not be held liable simply because its client happened to be an excessive worrier about fiscal problems. See Rossignol v. Noel, 289 A.2d 691 (Me. 1972).

F. Other cases have involved evicting landlords, Kaufman v. Abramson, 363 F.2d 865 (4th Cir.1966), and even high pressure salesmen. See Turner v. ABC Jalousie Co., 251 S.C. 92, 160 S.E.2d 528 (1968).

Does this statement capture the common theme? "Whether an actor's conduct is extreme and outrageous depends on the facts of each case, including the relationship of the parties, whether the actor abused a position of authority over the other person, whether the other person was especially vulnerable and the actor knew of the vulnerability, the motivation of the actor, and whether the conduct was repeated or prolonged." Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 46, comment d (2012).

6. Many cases, like the principal case, arise out of workplace behavior. Anderson v. Oklahoma Temp. Svcs., Inc., 925 P.2d 574 (Okla. App. 1996) (supervisor's use of profanity, smoking around employee after being asked to stop, and vulgar behavior not enough to state a cause of action for extreme and outrageous conduct) and Ford v. Revlon, Inc., 153 Ariz. 38, 734 P.2d 580 (1987) (employer liable for intentional infliction of emotional distress of plaintiff due to co-employee's actions in repeatedly subjecting plaintiff to physical assaults and vulgar remarks). In the employment context, some

courts have held that a plaintiff's status as an employee should entitle him to a greater degree of protection from insult and outrage by a supervisor with authority over him than if he were a stranger while others do not. Compare Alcorn v. Anbro Eng'g, Inc., 2 Cal.3d 493, 468 P.2d 216, 86 Cal.Rptr. 88 (1970) with Texas Farm Bureau Mut. Ins. Cos. v. Sears, 84 S.W.3d 604, 611 (Tex. 2002) (while an employer's conduct might in some instances be unpleasant, the employer must have some discretion to "supervise, review, criticize, demote, transfer, and discipline" its workers; thus, only very unusual

employment disputes will give rise to cause of action for intentional infliction of emotional distress).

7. Vulnerability of Plaintiff. The plaintiff's sensitivities may be a factor in deeming defendant's conduct extreme and outrageous. Cf. Korbin v. Berlin, 177 So.2d 551 (Fla.App. 1965), where defendant approached a six- year-old girl and said to her: "Do you know that your mother took a man away from his wife? Do you know that God is going to punish them? Do you know that a man is sleeping in your mother's room? God will punish them." It was alleged that the child suffered serious mental distress and resulting physical injury. Should a demurrer to a complaint pleading these facts be overruled? Cf. Delta Fin. Co. v. Ganakas, 93 Ga.App. 297, 91 S.E.2d 383 (1956) (eleven-year-old child home alone frightened by threats she would be taken to jail if she did not open door for defendant seeking to repossess television set). Drejza v. Vaccaro, 650 A.2d 1308 (D.C. App. 1994) (outrageousness of police officer's conduct while interviewing rape victim must be evaluated in light of the fact that it occurred only an hour after the rape, when she would be expected to be more susceptible to emotional distress). Brandon v. County of Richardson, 261 Neb. 636, 624 N.W.2d 604 (2001) (same).

After fourteen years, Plaintiff's illness made her no longer able to care for her two beloved Appaloosa horses, so she made arrangements for them to be pastured on defendants' property. Although defendants assured her they would take good care of the horses and return them to her if they could no longer keep them, they in fact sold them to a buyer for slaughter within a week of when they arrived. When plaintiff came to visit them and discovered them gone, defendants lied about their whereabouts and covered up the

sale until it was too late for plaintiff to save the horses from the slaughter house. Burgess v. Taylor, 44 S.W.Sd 806 (Ky. App. 2001) (in upholding jury verdict for plaintiff, court notes it appropriate to take into account defendants' knowledge of plaintiffs vulnerability to emotional distress based on her attachment to the horses).

8. Should special protection be accorded to pregnant women? When a creditor came to the house of a woman seven months pregnant and screamed profanity, abuse, and accusations of dishonesty in the presence of others and she suffered severe emotional disturbance which resulted in a miscarriage, she was allowed to recover in Kirby v. Jules Chain Stores Corp., 210 N.C. 808, 188 S.E. 625 (1936). See Bartow v. Smith, 149 Ohio St. 301, 78 N.E.2d 735 (1948), a holding that otherwise was overruled by Yeager v. Local Union 20, 6 Ohio St.3d 369, 453 N.E.2d 666 (1983).

9. Should protection also be given to the hypersensitive or idiosyncratic plaintiff? In one early landmark case, protection was allowed. Plaintiff, an eccentric woman who had in the past been treated for mental illness, believed that her ancestors had concealed a pot of gold by burying it. After a fortune teller gave her a map that purportedly showed the land upon which the pot was buried, she spent months digging for it. Defendants filled a pot with rocks and dirt and buried it where plaintiff would find it, placing a note on it that directed the finder to gather all the heirs and wait three days before opening it. A large number of townspeople, including the practical jokers, the heirs, a judge, and other town officials, gathered at the local bank to observe plaintiff open the pot in circumstances of

extreme public humiliation. She suffered acute mental distress, with resulting serious illness, which apparently further unsettled her reason and contributed to her early death. The "pot of gold" came in the form of a judgment to her heirs against the practical jokers. Nickerson v. Hodges, 146 La. 735, 84 So. 37 (1920).

10. Severe Emotional Distress. All jurisdictions require that the plaintiff prove severe not just mere emotional distress. This is frequently characterized as distress so severe that no reasonable person could be expected to endure it. Note that unlike most torts, the severity of the damage affects not just how much the plaintiff will recover, but whether the plaintiff recovers at all.

11. Proof of Severe Emotional Distress. Testimony that the plaintiff was upset and cried will not be enough. Hatch v. State Farm Fire and Cas. Co., 930 P.2d 382, 397 (Wyo. 1997) ("evidence of crying, being upset and uncomfortable is insufficient to demonstrate severe emotional distress that attains a level no reasonable person could be expected to endure"). Some jurisdictions require that the severe emotional distress be proved by expert witness testimony. Vallinoto v. DiSandro, 688 A.2d 830, 838 (R.I. 1997) (plaintiff must produce "competent medical evidence showing objective physical manifestation of her alleged psychic injuries"). Most, however, do not generally require expert proof to establish severe emotional distress caused by defendant's conduct, preferring to rely on such factors as the flagrant and serious nature of the defendant's conduct, subjective testimony from plaintiff and others, and physical symptoms, if present. Miller v. Willbanks, 8 S.W.3d 607 (Tenn. 1999) (collecting cases from other jurisdictions); Kloepfel v. Bokor, 149 Wash.2d 192, 66 P.3d 630 (2003) (rejecting argument that objective

symptomatology is required to prove severe emotional distress); Brandon v. County of Richardson, 261 Neb. 636, 624 N.W.2d 604 (2001) (noting connection between outrageousness of conduct and proof of severe emotional distress); Sacco v. High Country Independent Press, Inc., 271 Mont. 209, 896 P.2d 411 (1995) (evidence of physical injury not necessary to determine whether plaintiff suffered severe emotional distress).

75

Taylor v. Vallelunga

District Court of Appeal of California, 1959.

171 Cal.App.2d 107, 339 P.2d 910.

O'Donnell, Justice pro tem. ***In the first count, plaintiff Clifford Gerlach alleges that on December 25, 1956, defendants struck and beat him causing him bodily injury for which he seeks damages. In the second count, plaintiff and appellant Gail E. Taylor incorporates by reference the charging allegations of the first count and proceeds to allege that she is the daughter of plaintiff Clifford Gerlach, that she was present at and witnessed the beating inflicted upon her father by defendants, and that as a result thereof, she suffered severe fright and emotional distress. She seeks damages for the distress so suffered. It is not alleged that any physical disability or injury resulted from the mental distress. A general demurrer to the second count of the complaint was interposed by defendants. The demurrer was sustained and appellant was granted ten days leave to amend. Appellant failed to amend and judgment of dismissal of the second count was entered. The appeal is from the judgment of dismissal.

The California cases have for some time past allowed recovery of damages where physical injury resulted from intentionally subjecting the plaintiff to serious mental distress. [C] In the Siliznoff case [page 58] the Supreme Court extended the right of recovery to situations where no physical injury follows the suffering of mental distress, saying that "a cause of action is established when it is shown that one, in the absence of any privilege, intentionally subjects another to the mental suffering incident to serious threats to his physical well-being, whether or not the threats are made under such circumstances as to constitute a technical assault." [C] In arriving at this result the court relied in substantial part upon the development of the law in this field of torts as traced by the American Law Institute, and it quotes with approval [c] section 46, as amended, of the Restatement of Torts, (Restatement of the Law, 1948 Supplement, Torts, § 46) which reads: "One who, without a privilege to do so, intentionally causes severe emotional distress to another is liable (a) for such emotional distress, and (b) for bodily harm resulting from it." In explanation of the meaning of the term "intentionally" as it is employed in said section 46, the Reporter says in subdivision (a) of that section: "An intention to cause severe emotional distress exists when the act is done for the purpose of causing the distress or with knowledge on the part of the actor that severe emotional distress is substantially certain to be produced by his conduct. See Illustration 3." Illustration 3 referred to reads as follows: "A is sitting on her front porch watching her husband B, who is standing on the sidewalk, C, who hates B and is friendly to A, whose presence is known to him, stabs B, killing him. C is liable to A

for the mental anguish, grief and horror he causes." [Emphasis added.]

76

The failure of the second count of the complaint in the case at bar to meet the requirements of section 46 of the Restatement of Torts is at once apparent. There is no allegation that defendants knew that appellant was present and witnessed the beating that was administered to her father; nor is there any allegation that the beating was administered for the purpose of causing her to suffer emotional distress, or, in the alternative, that defendants knew that severe emotional distress was substantially certain to be produced by their conduct. ***

Appellant argues that the intent to cause her severe emotional distress or knowledge that such distress was substantially certain to be produced might be proved upon the trial. Her complaint failed to allege such facts and since she was granted leave to amend and failed to do so, we are limited on appeal to a determination of whether the complaint states a cause of action, not whether it might be amended to do so. [C]

Judgment affirmed.

NOTES AND QUESTIONS

1. Plaintiffs proof of intent is relatively straightforward if the conduct is aimed at the plaintiff or if plaintiff can show that defendant knew that extreme emotional distress was substantially certain to follow from the conduct. Blakeley v. Shortal's Estate, 236 Iowa 787, 20 N.W.2d 28 (1945) (Shortal committed suicide by slitting his own

throat in Blakely's kitchen). Generally, committing a murder or a suicide is not a tort against an eyewitness; however, it may be if the act is directed at the plaintiff or if defendant knew that extreme emotional distress was substantially certain to follow. Lourcey v. Scarlett, 146 S.W.3d 48 (Tenn. 2004) (plaintiff, while delivering mail, encountered Scarlett and his wife, who was nude from the waist up, in the middle of the road. Scarlett asked for help and then, while plaintiff was calling 911, Scarlett shot his wife, turned toward the plaintiff, and shot himself); Mahnke v. Moore, 197 Md. 61, 77 A.2d 923, 927 (1951) (overturning demurrer where child's father killed her mother with a shotgun in her presence, kept child in cottage with her mother's body for a week, then killed himself with shotgun, spattering child with his blood). Why not use "transferred intent"? See note 2, page 32.

2. As California did in the principal case, many jurisdictions continue to require that the conduct not only be intentional and outrageous, but also directed at the plaintiff or take place in the presence of the plaintiff, with the defendant's awareness. Christensen v. Superior Court of Los Angeles Cty., 54 Cal.3d 868, 2 Cal.Rptr.2d 79, 820 P.2d 181 (1991) (claim of family members for intentional infliction of emotional distress arising out of mishandling of remains of family members did not state cause of action because it did not allege that conduct was directed at family members or done in their presence); Koontz v. Keller, 52 Ohio App. 265, 3 N.E.2d 694 (1936) (recovery denied where defendant murdered plaintiffs sister and plaintiff later discovered body); Ellsworth v. Massacar, 215 Mich. 511, 184 N.W. 408 (1921) (plaintiff later discovered attack on her husband). But see

Doe v. Roman Catholic Diocese of Nashville, 154 S.W.3d 22 (Tenn. 2005)

77

(conduct need not be directed at a specific person or occur in the presence of the plaintiff).

3. Consider how you would prove intent in a case arising out of these facts: After a fatal car accident, a state trooper forwarded horrific photographs taken at the accident site of a teenage girl's decapitated body to some of the trooper's family and friends, who in turn forwarded them to others, and the photos ended up posted on numerous websites. The teenage girl's parents and sisters sought damages for their severe emotional distress. The distress was extreme and it was caused by the trooper's outrageous conduct. But could you prove that the state trooper did it for the purpose of causing distress to the family or with knowledge that with substantial certainty his action would bring about such distress when he knew nothing about the teenager or whether she had a family? See Catsouras v. Dept, of Cal. Hwy. Patrol, 181 Cal.App.4th 856, 104 Cal.Rptr.3d 352 (2010) (court found allegations of intent were sufficient to withstand demurrer and then case settled before trial).

4. The Restatement (Second) § 46(2) would allow recovery if defendant knows of bystander's presence and (1) the conduct was directed at a member of bystander's immediate family or (2) bystander suffers bodily harm as a result of her distress. Hill v. Kimball, 76 Tex. 210, 13 S.W. 59 (1890) (defendant inflicted a bloody battery upon two people in the presence of a pregnant woman who suffered a miscarriage as the result of her mental disturbance). What

does it mean to be "present"? Bevan v. Fix, 42 P.3d 1013 (Wyo. 2002) (claim on behalf of young children who could hear their mother being attacked in adjacent hallway) ("sensory and contemporaneous observance of defendant's acts," does not necessarily require being able to see what is happening). Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 46, comment m ("contemporaneous perception of the event") (2012).

5. Some courts, however, have permitted recovery even though plaintiff was not present. Knierim v. Izzo, 22 Ill.2d 73, 174 N.E.2d 157 (1961) (defendant threatened a woman that he would murder her husband and then carried out the threat outside of her presence); Schurk v. Christensen, 80 Wash.2d 652, 497 P.2d 937 (1972) (mother of five-year-old permitted to recover against teenage babysitter who molested child). In R.D. v. W.H., 875 P.2d 26 (Wyo. 1994), the husband and minor child of decedent sued her stepfather for events leading to her death by suicide. Plaintiffs alleged that the stepfather had sexually abused the decedent, provided her with a firearm with which she attempted suicide, and then provided her with prescription narcotics with which she killed herself. Although emphasizing that the generally better practice is to limit recovery to plaintiffs who were present during the outrageous conduct, the court recognized a narrow exception for this case. See also Republic of Sudan v. Owens, 194 A.3d 38 (D.C. 2018) (answering certified question from D.C. Circuit) (relatives of victims of state- sponsored terrorism stated a claim for intentional infliction of emotional distress even though they were not present when the bombs went off despite usual requirement of presence under D.C. law).

6. How far should these narrow exceptions go? Should there be a cause of action on behalf of those who witness in person the assassination of the president? For those who saw it live on television? For those who saw it replayed a few minutes later? The next day? On the first anniversary? This scenario is based on Restatement (Second) of Torts § 46, comment I (1965). See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 46, comment i (2012) (noting that courts generally do not allow recovery for bystanders' emotional distress even though it can be shown to be substantially certain to follow).

7. The classic articles on the infliction of mental distress are Magruder, Mental and Emotional Distress in the Law of Torts, 49 Harv. L. Rev. 1033 (1936); Prosser, Insult and Outrage, 44 Cal. L. Rev. 40 (1956); Wade, Tort Liability for Abusive and Insulting Language, 4 Vand. L. Rev. 63 (1950); Partlett, Tort Liability and the American Way: Reflections on Liability for Emotional Distress, Am. J. Comp. L. 601 (1997); and Kircher, The Four Faces of Tort Law: Liability for Emotional Harm, 90 Marq. L. Rev. 789 (2007) (including an appendix with case law from all fifty-one jurisdictions).

6. Trespass to Land

Dougherty v. Stepp

Supreme Court of North Carolina, 1835.

18 N.C. 371.

This was an action of trespass quare clausum fregit, tried at Buncombe on the last Circuit, before his Honor Judge Martin. The only proof introduced by the plaintiff to establish an act of trespass,

was, that the defendant had entered on the unenclosed land of the plaintiff, with a surveyor and chain carriers, and actually surveyed a part of it, claiming it as his own, but without marking trees or cutting bushes. This, his Honor held not to be a trespass, and the jury under his instructions, found a verdict for the defendant, and the plaintiff appealed. ***RUFFIN, Chief Justice. In the opinion of the Court, there is error in the instructions given to the jury. The amount of damages may depend on the acts done on the land, and the extent of injury to it therefrom. But it is an elementary principle, that every unauthorized, and therefore unlawful entry, into the close of another, is a trespass. From every such entry against the will of the possessor, the law infers some damage; if nothing more, the treading down the grass or herbage, or as here, the shrubbery. ***

Let the judgment be reversed, and a new trial granted.

NOTES AND QUESTIONS

1. We are here concerned only with intentional trespass to land. There may be negligent entry onto land, but it is governed by the ordinary rules

applicable to negligence actions. One of these is that when the entry upon the land is merely negligent, proof of some actual damage is essential to the cause of action. Restatement (Second) of Torts § 165. Thus, the word "trespass" may be used to describe the kind of interest that defendant has invaded but usually is reserved for an intentional invasion of that interest--the right to exclusive possession of land.

2. Because the cause of action is for exclusive possession of land, it belongs to the party with the right of possession. If there is a tenant, it would be the tenant who could bring the trespass action. The owner also might have a claim, for trespass on the case, but that requires a showing of actual damage to the owner's reversionary interest. Owner would have to show some permanent injury to the property that would affect him after it reverted to him.

3. The trespass is intentional even when the defendant enters the land in the honest and reasonable belief that it is his own. See Glade v. Dietert, 156 Tex. 382, 387, 295 S.W.2d 642, 645 (1956) (dictum). Cf. Ranson v. Kitner, page 26 and Serota v. M. & M. Utilities, Inc., 55 Mise.2d 286, 285 N.Y.S.2d 121 (1967), page 26, note 2.

4. In a trespass action, plaintiff will be awarded nominal damages if there are no actual (compensatory) damages. Why nominal damages when the trespass does no harm? Why bother? The explanation sometimes given is that the action of trespass is frequently either a suit intended to try title or is directed at the vindication of the legal right, without which the defendant's conduct, if repeated, might ripen into a prescriptive right--the entitlement to use the land in a particular way granted to a longtime user even though the user did not have the owner's explicit permission. Hence there is no room for the application of the maxim, de minimis non curat lex. See 1 T. Street, Foundations of Legal Liability, 25 (1906). Suppose a car equipped with a panoramic digital camera drove down a private road and pulled into a driveway and photographed plaintiff's residence and swimming pool and those photographs were then posted as part of the Street View images of Google Maps. Trespass? Boring v. Google Inc., 362 Fed.Appx. 273 (3d Cir. 2010)

(applying Pennsylvania law) (reinstating plaintiffs' trespass claim, court noted that "it may well be that, when it comes to proving damages from the alleged trespass, the Borings are left to collect one dollar and whatever sense of vindication that may bring, but that is for another day"). At common law, one reason underlying the rule was to keep the peace. Is the rule justified today? What about punitive damages? Should they be available if only nominal damages were awarded? See Jacque v. Steenberg Homes, Inc., 209 Wis.2d 605, 563 N.W.2d 154 (1997) (upholding punitive damages award even though no compensatory damages were proved where defendant had bulldozed a path in the snow across plaintiffs' field to deliver a mobile home to their neighbor despite plaintiffs' repeated refusals to permit the defendant to cross their land to make the delivery).

5. When a trespassory invasion is found, the fact that defendant's conduct was socially useful or even beneficial to plaintiff does not affect liability. See Longenecker v. Zimmerman, 175 Kan. 719, 267 P.2d 543 (1954)

(even if jury finds that defendant's trimming of plaintiffs trees was beneficial to the trees, at least nominal damages would be available).

6. Of course, if the plaintiff does suffer compensatory damages, those too are recoverable in the trespass action. What about emotional distress damages? Defendant landlord, seeking to persuade tenants to vacate a townhouse, entered the premises without their consent, changed the locks on the garage, blocked the

driveway, and repeatedly threatened and harassed the tenants. Johnson v. Marcel, 251 Va. 58, 465 S.E.2d 815 (1996) (where alleged trespass is deliberate and accompanied by aggravating circumstances, emotional distress damages may be recovered even in the absence of physical injury).

7. In addition to a cause of action for trespass, the plaintiff might have a cause of action for ejectment. Ejectment would lie if the defendant was in possession of the land, rather than just having been on it temporarily. A judgment in plaintiff's favor would entitle plaintiff to the sheriffs help in removing the defendant from her land. If the plaintiff is in possession of the land, but the defendant is claiming to own it, a quiet title action would lie.

8. Since the tort protects plaintiff's right to exclusive possession of his land, traditionally there has been a requirement that the invasion be a physical one, which usually must be accomplished by a tangible mass, like a person, a fence, a building, or equipment. Intangible intrusions like smoke, odor, light, and noise are not typically actionable under a trespass theory. Thus, in Amphitheaters, Inc. v. Portland Meadows, 184 Or. 336, 198 P.2d 847 (1948), it was held to be no trespass where race track lights were reflected onto plaintiff's outdoor movie theater. See also Schuman v. Greenbelt Homes, Inc., 212 Md.App. 451, 69 A.3d 512 (2013) (cigarette smoke from neighbor's apartment not trespass) and Babb v. Lee Cty. Landfill, 405 S.C. 129, 747 S.E.2d 468 (2013) (odor from landfill not actionable trespass).

Would any other action lie? Trespass has often been contrasted with the tort of nuisance, which protects plaintiff's use and enjoyment of

the land. In an action for nuisance, courts usually do not require a physical invasion of land, do require some actual damage, and do take into account the social utility of defendant's activity. See Chapter 16, Nuisance. What about pesticide that drifts on to neighboring land? Johnson v. Paynesville Farmers Union Co-Op., 817 N.W.2d 693 (Minn. 2012) (not trespass because claim is that it interferes with the enjoyment and use of the land as an organic farm, not with possession of the land). What about microscopic particles of heavy metal from defendant's copper smelting plant that accumulate on neighbors' land? What about noise (sound waves) from a shooting gallery that invade the land on which an elementary school sits? With respect to invasions of the land by intangible items, courts consistently have required a showing of actual damage, as is required in a nuisance action, even when sometimes referring to it as "intangible trespass."

81

Herrin v. Sutherland

Supreme Court of Montana, 1925.

74 Mont. 587, 241 P. 328.

***[Plaintiff alleged that] defendant, while engaged in hunting ducks and other migratory game birds, and while standing on the lands of another, repeatedly discharged a Winchester shotgun at water fowl in flight over plaintiffs said premises ***"to plaintiff's damage in the sum of $10." ***

After defendant's general demurrer ***was overruled, he declined to answer, and his default was entered. Upon the suggestion of counsel

for plaintiff that only nominal damages would be demanded, the court rendered judgment in favor of the plaintiff for damages in the sum of $1. From this judgment the defendant has appealed.

CALLAWAY, C.J. ***It must be held that when the defendant, although standing upon the land of another, fired a shotgun over plaintiff's premises, dwelling and cattle, he interfered with the "quiet, undisturbed, peaceful enjoyment of the plaintiff," and thus committed a technical trespass at least. The plaintiff was the owner of the land. "Land," says Blackstone, "in its legal significance has an indefinite extent, upwards as well as downwards; whoever owns the land possesses all the space upwards to an indefinite extent; such is the maxim of the law." ***

Sir Frederick Pollock, in the tenth edition of his valuable work on Torts, page 363, observes that it has been doubted whether it is a trespass to pass over land without touching the soil, as one may in a balloon, or to cause a material object as a shot fired from a gun, to pass over it. ***Continuing, he [Pollock] observes:

"As regards shooting, it would be strange if we could object to shots being fired point blank across our land only in the event of actual injury being caused, and the passage of the foreign object in the air above our soil being thus a mere incident [in] a distinct trespass to person or property."

But he concludes that when taking into account the extreme flight of projectiles fired from modern artillery which may pass thousands of feet above the land, the subject is not without difficulty. That shortly it will become one of considerable importance is indicated by the rapid approach of the airplane as an instrumentality of commerce, as is

suggested in a valuable note found in 32 Harvard Law Review, 569. However, it seems to be the consensus of the holdings of the courts in this country that the air space, at least near the ground, is almost as inviolable as the soil itself. ***It is a matter of common knowledge that the shotgun is a firearm of short range. To be subjected to the danger incident to and reasonably to be anticipated from the firing of this weapon at water fowl in flight over one's dwelling house and cattle would seem to be far from inconsequential, and while plaintiff's allegations are

very general in character, it cannot be said that a cause of action is not stated, for nominal damages at least. ***

The judgment is affirmed.

NOTES AND QUESTIONS

1. A, disturbed at night by the howling of a cat atop B's shed, shoots the cat. The bullet remains in the cat, and neither bullet nor cat touches the ground. Is this a trespass to B's land? Davies v. Bennison, (1927) 22 Tasmanian L.Rep. 52 (Austl.).

2. During a dispute between neighbors over a backyard fence, one of them extends her arm over the fence, without touching it. Is this a trespass? Hannabalson v. Sessions, 116 Iowa 457, 90 N.W. 93 (1902) (mere fact that plaintiff did not step across the boundary line does not make her any less a trespasser if she reached her arm across the line). What about eaves that overhang plaintiff's property? Smith v. Smith, 110 Mass. 302 (1872) (eaves of barn overhanging neighbor's property constitute trespass).

3. "Cujus est solum, ejus est usque ad coelum et ad inferos." [Whose is the soil, his it is also unto the sky and the depths.] Coke, Littleton, 4a.

4. The Restatement of Torts, §§ 159, 194, had provided that air travel was a trespass but may be privileged. For historical treatment, see R. Wright, The Law of Air Space (1968). Restatement (Second) of Torts § 159, now provides that air travel is a trespass only if it "enters into immediate reaches of the air space next to the land, and ***interferes substantially with the others' use and enjoyment of the land."

In effect, the Restatement approach changes a fundamental aspect of the tort of trespass (see Dougherty v. Stepp, page 78). Some courts have been more explicit in doing so and have held that flight by aircraft is never trespassory and plaintiffs remedy lies in negligence or nuisance. See Atkinson v. Bernard, Inc., 223 Or. 624, 355 P.2d 229 (1960); Nestle v. Santa Monica, 6 Cal.3d 920, 496 P.2d 480, 101 Cal.Rptr. 568 (1972). What is the disadvantage to plaintiff in these approaches?

5. What about a drone with a camera attached flying over homeowner's backyard? Trespass? What if defendant's subsurface hydraulic fracturing (fracking) injects fluid into the rock formations under plaintiff's land? See Coastal Oil & Gas Corp. v. Garza Energy Trust, 268 S.W.3d 1 (Texas 2008) (declining to decide whether fracking so far below the surface was a trespass at all, holding only that the property rule of capture precluded a trespass action seeking a share in the value of the gas extracted) and Briggs v. Southwestern Energy Prod. Co., 224 A.3d 334 (Pa. 2020)

(developers who use hydraulic fracturing may rely on pressure differentials to drain oil and gas from under another's property, at least in the absence of a physical invasion).

6. When government overflights have substantially affected habitability of the land below, a court may find a "taking" within the meaning of the Fifth Amendment to the United States Constitution and the government will be required to compensate the owner. See, for example,

Brown v. United States, 73 F.3d 1100 (Fed.Cir. 1996) (owners of recreational ranch sought compensation for taking based on noise from low overflights by Air Force planes doing touch and go exercises at adjacent airstrip in remote West Texas, near Mexican border). See also, R. Epstein, Takings: Private Property and the Power of Eminent Domain, pp. 41-49 (1985). Local government is subject to the same constitutional responsibility. See Griggs v. Allegheny County, 369 U.S. 84 (1962) (county operated airport).

7. For treatment of noise and vibration as a nuisance and of the application of inverse condemnation, see Boomer v. Atlantic Cement Co., Inc., 26 N.Y.2d 219, 257 N.E.2d 870, 309 N.Y.S.2d 312 (1970), page 930. Remedies for ground damage as the result of airline crashes are considered in the chapters on Negligence, Chapter 4, and Strict Liability, Chapter 14.

8. The interest in the possession of land also extends below the surface, and may present similar problems and similar limitations. In Edwards v. Sims, 232 Ky. 791, 24 S.W.2d 619 (1929), plaintiff discovered that the cave that defendant had developed, advertised,

and turned into a tourist attraction ran a considerable distance under plaintiff's land. Plaintiff sought to compel a survey of the cave, an injunction to stop the trespasses of the tourists, and an accounting for a portion of defendant's profits. The trial court ordered the survey and the appellate court refused to prohibit it, relying on the maxim "cujus est solum." [note 3 above], and noting that the owner of realty is "entitled to the free and unfettered control of his own land above, upon and beneath the surface. So whatever is in a direct line between the surface of the land and the center of the earth belongs to the owner of the surface." The dissent thought the principle should not extend so far above or so far below the land that the owner could not make use of it. Cf. Boehringer v. Montalto, 142 Mise. 560, 254 N.Y.S. 276 (1931) (sewer line at depth of 150 feet not trespass because beyond where owner could reasonably use land); Chance v. BP Chemicals, 77 Ohio St.3d 17, 670 N.E.2d 985 (1996) (in case involving industrial waste that had been injected far below the surface of defendant's land and then migrated to far below the surface of plaintiff's land, court noted that property rights are no longer as clear-cut as they were before airplanes and injection wells). In mining cases, most jurisdictions hold that it is a trespass to mine under the land of another, but some of the western states provide that the miner is permitted to follow the vein wherever it may lead, so long as it is unbroken.

Rogers v. Board of Road Com'rs for Kent County

Supreme Court of Michigan, 1947.

319 Mich. 661, 30 N.W.2d 358.

REID, Justice. Plaintiff instituted this suit to recover damages because of the death of her husband, Theodore Rogers, which plaintiff claims was caused by the trespass and negligence of the defendant board of county road commissioners. Defendant filed a motion to dismiss, based on the pleadings and on the ground of governmental immunity. The lower court granted defendant's motion and dismissed the cause. Plaintiff appeals from the judgment of dismissal of her cause.

84

Plaintiff claims that for two winter seasons previous to the date of the fatal injury to her husband the defendant board of road commissioners had obtained a license to place a snow fence in decedent's field parallel to the roadway past decedent's farm. Plaintiff claims in her declaration that the placing of the snow fence there was with the distinct understanding and agreement between the defendant and decedent that all of the fence together with the anchor posts should be removed by defendant at the end of each winter season when the necessity for snow fences for that season no longer existed.... [T]he defendant's agents and employees removed the snow fence but did not remove a steel anchor post which protruded from 6 to 8 inches above the ground. Plaintiff further claims that the place where the post was located was a meadow where the grass grew to a considerable height, so that the anchor post was entirely hidden, and that on July 23, 1945, after decedent's [plaintiffs?] husband had mowed several swaths around the field where the snow fence had been, with his mowing machine attached to his neighbor's tractor, and without any negligence or want of proper method of operation on his part, the mowing bar struck the

steel stake and as a result of the impact decedent was forcibly thrown from the seat of the mowing machine to and upon the wheels of the mowing machine and upon the ground. ***

The court dismissed plaintiffs cause of action, ruling that the action was plainly an action based upon negligence, that there was no basis for any finding of trespass and that the defense of governmental immunity applied to the facts set forth in plaintiff's declaration.

Failure to remove the anchor stake upon expiration of the license to have it on defendant's [decedent's?] land was a continuing trespass and is alleged by plaintiff to have been a proximate cause of the damage for which she seeks to recover.

"§ 160. Failure to remove a thing placed on the land pursuant to a license or other privilege

"A trespass, actionable under the rule stated in § 158, may be committed by the continued presence on the land of a structure, chattel or other thing which the actor or his predecessor in legal interest therein has placed thereon

"(a) with the consent of the person then in possession of the land, if the actor fails to remove it after the consent has been effectively terminated, or

"(b) pursuant to a privilege conferred on the actor irrespective of the possessor's consent, if the actor fails to remove it after the privilege has been terminated, by the accomplishment of its purpose or otherwise." Restatement of the Law, Torts, p. 368. ***

[The court also concluded that governmental immunity did not apply to the claims against the County.]

85

The judgment of the court dismissing the cause of action is reversed and the cause remanded for such further proceedings as shall be found necessary.

NOTES AND QUESTIONS

1. Historically, under English common law, trespass would not lie unless defendant entered the land illegally (breaking of the close). As the principal case reflects, the distinction between trespass and case is no longer controlling, and a trespass can arise today when a visitor who entered land with the consent of the possessor "overstays" his welcome. Of course, the visitor must be aware that he no longer has the possessor's consent to remain. Mitchell v. Mitchell, 54 Minn. 301, 55 N.W. 1134 (1893) (Widow admitted administrators of her husband's estate into her house to pick up his books but then asked them to leave when they tried to take all the books in the house, including some that were hers rather than her late husband's. They refused to leave and stayed for several hours, attempting to persuade her to turn over the books, thus committing a trespass from the time she asked them to leave.).

2. A privileged entry onto the land of another may be limited not only by time and space, but also by purpose. In Brown v. Dellinger, 355 S.W.2d 742 (Tex.Civ.App. 1962), two children, who had been permitted to play in their neighbor's yard, on one occasion ignited a charcoal burner in the garage and caused $28,000 worth of damages. They were treated as trespassers. In Copeland v.

Hubbard Broadcasting, Inc., 526 N.W.2d 402 (Minn.App.1995), the Copelands gave permission to their veterinarian to bring with him to their home a student who said she was considering a career in veterinary medicine. She did not disclose that she was an employee of a local television station doing a report on their veterinarian's practice. While in plaintiffs' home, she secretly videotaped the treatment of their cat. When the videotape of their home was broadcast as part of the report, the Copelands sued for trespass. The court found that there was a trespass because the entrant moved beyond the scope of the Copelands' invitation by using the visit for something other than educational or vocational purposes.

3. Consequences of Trespass. Note that in the principal case the defendant is held liable to the plaintiff for the death of her husband resulting from the trespass, without any question of negligence in failing to remove the anchor post. Compare the following:

A. Defendant, a trespasser, entered plaintiff's blacksmith shop and built a fire in the forge. After he left, and without any showing of negligence on the part of defendant, the shop caught fire and was destroyed. Defendant was held liable for the loss of the shop on the basis of the trespass. Wyant v. Crouse, 127 Mich. 158, 86 N.W. 527 (1901).

B. Defendant's employee, delivering a package at plaintiff's residence, entered a side door into a sun porch, left the door open, and crossed the porch to knock at an inner door. Plaintiffs child, whom defendant did not see, fell through the open door and was injured. The jury was permitted to find that

he was a trespasser, and to return a verdict against defendant. Keesecker v. G.M. McKelvey Co., 141 Ohio St. 162, 47 N.E.2d 211 (1943).

C. Plaintiffs, husband and wife, arrived home to find a parked car blocking their driveway. Defendants, neighbors of the plaintiffs, were loading the trunk with tools that they had just used to dig a trench across plaintiffs' driveway. Defendants and plaintiffs argued about the trench. Plaintiff went into the house to call the police. When she returned three minutes later, she found her husband lying face-down in a mud puddle and saw the defendants driving away. Husband was pronounced dead from a heart attack in the Emergency Room. Court held that damages (heart attack) caused by a trespasser need not be foreseeable to be compensable. Baker v. Shymkiv, 6 Ohio St.3d 151, 451 N.E.2d 811 (1983).

4. Restrictions on Right to Exclude Persons from Premises. Public utilities, innkeepers, and common carriers cannot exclude members of the public. Restatement (Second) of Tort § 191 (1965). Federal and state statutes require certain landowners and possessors of land to make their premises open to the public without discrimination. See, for example, 42 U.S.C. § 2000a (1965) (all places of public accommodation whose business affects interstate commerce must serve customers "without discrimination or segregation on the ground of race, color, religion, or national origin"). A private individual may control an area so extensive that it becomes "public" for the purposes of First Amendment freedom of speech provisions. See, for example, Marsh v. Alabama, 326 U.S. 501 (1946) (company town). A few states provide similar restrictions. See, for example, Robins v.

Pruneyard Shopping Ctr., 23 Cal.3d 899, 153 Cal.Rptr. 854, 592 P.2d 341 (1979) (privately owned shopping mall).

7. Trespass to Chattels

Glidden v. Szybiak

Supreme Court of New Hampshire, 1949.

95 N.H. 318, 63 A.2d 233.

Actions at law under the provisions of R.L. c. 180, §§ 23, 24, to recover for a dog bite sustained by the plaintiff Elaine Glidden upon September 29, 1946, and for medical expenses incurred by her father, Harold Glidden. Trial by the Court, with verdicts for the plaintiffs. The plaintiff Elaine Glidden, who was four years old at the time of the occurrence here involved, left her home about noon on the day of her injury, to go to a neighborhood store for candy. On the porch of the store Elaine encountered a dog named Toby and engaged in play with him. She eventually climbed on his back and pulled his ears. The dog snapped at her and bit her nose, inflicting wounds for which a recovery is sought. She was treated by two physicians and a successful result obtained. Such scars as were left are "in no way disfiguring but discernible on close view." ***

87

[The Court made the following finding]: "Elaine is found to have been of such tender years as to be incapable of being guilty of contributory negligence in her conduct toward the dog Toby. If she was too young to be guilty of negligence, she cannot be found to have been guilty of

a trespass or a tort at the time she received her injury." To this finding the defendants duly excepted.

BRANCH, Chief Justice. The statute under which these actions were brought reads as follows: "23. Liability of owner. Any person to whom or to whose property damage may be occasioned by a dog not owned or kept by him shall be entitled to recover such damage of the person who owns or keeps the dog, or has it in possession, unless the damage was occasioned to him while he was engaged in the commission of a trespass or other tort."

It is the contention of the defendants that the plaintiff Elaine was engaged in the commission of a trespass [to chattels] at the time of her injury and is, therefore, barred from recovery under the statute. The law in regard to a trespass to chattels is thus summarized in the Restatement of the Law of Torts, s. 218: "One who without consensual or other privilege to do so, uses or otherwise intentionally intermeddles with a " chattel which is in possession of another is liable for a trespass to such person if, (a) the chattel is impaired as to its condition, quality or value, or (b) the possessor is deprived of the use of the chattel for a substantial time, or (c) bodily harm is thereby caused to the possessor or harm is caused to some person or thing in which the possessor has a legally protected interest." In comment (f) to clauses (a) and (b), it is pointed out that "the interest of a possessor of a chattel in its inviolability, unlike the similar interest of a possessor of land, is not given legal protection by an action for nominal damages for harmless intermeddlings with the chattel. ***Sufficient legal protection of the possessor's interest in the mere inviolability of his chattel is afforded by his privilege to use

reasonable force to protect his possession against even harmless interference."

No claim was advanced at the trial that the dog Toby was in any way injured by the conduct of the plaintiff Elaine. Consequently she could not be held liable for a trespass to the dog. Consequently her conduct did not constitute a trespass which will prevent her recovery under the statute here invoked. ***

Judgment on the verdict against the defendant Jane. ***

NOTES AND QUESTIONS

1. Why does the court need to address the question of the elements of trespass to chattels in a dog bite case?

2. The earliest cases in which trespass was applied to chattels involved asportation, or carrying off, and a special form of the writ, known as trespass de bonis asportatis ("d.b.a.") was developed for such situations.

Later the action was extended to cases where the chattels were damaged but not taken, as where animals were killed or beaten. It at last became applicable to any physical interference with a chattel in the possession of the plaintiff. Thus Parker v. Mise, 27 Ala. 480, 62 Am.Dec. 776 (1855) (shooting dog); Bruch v. Carter, 32 N.J.L. 554 (1867) (moving horse from one place to another); Cole v. Schweer, 159 III.App. 278 (1910) (releasing fish from the seine of a rival fisherman).

3. Trespass to chattels is now quite universally limited to intentional interferences with them. Thus in Mountain States Tel. & Tel. Co. v.

Horn Tower Const. Co., 147 Colo. 166, 363 P.2d 175 (1961), it was held that there was no trespass when defendant unintentionally severed plaintiffs telephone conduit. An action would lie for negligent interference that causes damage, but that action has been absorbed into the general field of negligence actions, and no longer is called trespass to chattels.

4. As in the case of trespass to land, the conduct is treated as intentional even though the defendant acts under an innocent mistake, as where he drives off the plaintiff's sheep, believing that they are his own. Dexter v. Cole, 6 Wis. 319, 70 Am.Dec. 465 (1857).

5. Unlike trespass to land, trespass to chattels will not lie unless there is actual dispossession or actual damage to the chattel itself or to its owner or his property. Wintringham v. Lafoy, 7 Cow. 735 (N.Y. 1827) (holding that where an officer mistakenly levied execution upon goods belonging to the plaintiff, the deprivation of possession was regarded as damage in itself, and no other is required). But where there is merely interference with the chattel, as by laying hands on a horse or an automobile, the few American decisions have held that the action cannot be maintained without proof of actual damages. Marentille v. Oliver, 2 N.J.L. 379 (1808); Paul v. Slason, 22 Vt. 231, 54 Am.Dec. 75 (1850); Graves v. Severens, 40 Vt. 636 (1868). In accord is the Restatement (Second) of Torts, § 218. What should be the result if defendant places a Yankees bumper sticker on a Red Sox fan's car?

6. English writers have contended that the analogy of trespass to land should apply to trespass to chattels and that there is a real

necessity for an action for nominal damages to protect property from intermeddlers. See Salmond and Heuston, Torts 89-90 (20th ed. 1992), citing several British cases apparently holding this, including Thurston v. Charles, 21 T.L.R. 659 (K.B.1905), holding liability for showing a private letter to an unauthorized person (£400 damages).

7. The development of the action of trover, which evolved into the tort of conversion, provided a convenient substitute for trespass to chattels in most situations. Trespass to chattels survives as a possible remedy for interferences when the plaintiff wants to keep the chattel and sue for the harm rather than allow defendant to keep the chattel in exchange for its full market value. See, for example, Van Eaton v. Thon, 764 S.W.2d 674 (1988) (diminution in value of horse, which became "head-shy" after incident in which defendant struck it in jaw with his fist) and the next principal case.

89

CompuServe Inc. v. Cyber Promotions, Inc.

United States District Court, Southern District of Ohio, 1997.

962 F.Supp. 1015.

GRAHAM, District Judge. This case presents novel issues regarding the commercial use of the Internet, specifically the right of an online computer service to prevent a commercial enterprise from sending unsolicited electronic mail advertising to its subscribers.

Plaintiff CompuServe Incorporated ("CompuServe") is one of the major national commercial online computer services. It operates a

computer communication service through a proprietary nationwide computer network. In addition to allowing access to the extensive content available within its own proprietary network, CompuServe also provides its subscribers with a link to the much larger resources of the Internet. This allows its subscribers to send and receive electronic messages, known as "e-mail," by the Internet. Defendants Cyber Promotions, Inc. and its president Sanford Wallace are in the business of sending unsolicited e-mail advertisements on behalf of themselves and their clients to hundreds of thousands of Internet users, many of whom are CompuServe subscribers. CompuServe has notified defendants that they are prohibited from using its computer equipment to process and store the unsolicited e-mail and has requested that they terminate the practice. Instead, defendants have sent an increasing volume of e-mail solicitations to CompuServe subscribers. CompuServe has attempted to employ technological means to block the flow of defendants' e-mail transmission to its computer equipment, but to no avail.

This matter is before the Court on the application of CompuServe for a preliminary injunction which would extend the duration of the temporary restraining order issued by this Court on October 24, 1996 and which would in addition prevent defendants from sending unsolicited advertisements to CompuServe subscribers. ***

Defendants refer to this as "bulk e-mail," while plaintiff refers to it as "junk e-mail." In the vernacular of the Internet, unsolicited e-mail advertising is sometimes referred to pejoratively as "spam." [1] ***

* * *

[1] This term is derived from a skit performed on the British television show Monty Python's Flying Circus, in which the word "spam" is repeated to the point of absurdity in a restaurant menu.

Over the past several months, CompuServe has received many complaints from subscribers threatening to discontinue their subscription unless CompuServe prohibits electronic mass mailers from using its equipment to send unsolicited advertisements. CompuServe asserts that the volume of messages generated by such mass mailings places a significant burden on its equipment which has finite processing and storage capacity. CompuServe receives no payment from the mass mailers for processing their unsolicited advertising. ***

In an effort to shield its equipment from defendants' bulk e-mail, CompuServe has implemented software programs designed to screen out the messages and block their receipt. In response, defendants have modified their equipment and the messages they send in such a fashion as to circumvent CompuServe's screening software. Allegedly, defendants have been able to conceal the true origin of their messages by falsifying the point-of-origin information contained in the header of the electronic messages. Defendants have removed the "sender" information in the header of their messages and replaced it with another address. Also, defendants have developed the capability of configuring their computer servers to conceal their true domain name and appear on the Internet as another computer, further concealing the true origin of the messages. By manipulating this data, defendants have been able to

continue sending messages to CompuServe's equipment in spite of CompuServe's protests and protective efforts. Defendants assert that they possess the right to continue to send these communications to CompuServe subscribers. CompuServe contends that, in doing so, the defendants are trespassing upon its personal property. ***

CompuServe predicates this aspect of its motion for a preliminary injunction on the common law theory of trespass to personal property or to chattels, asserting that defendants' continued transmission of electronic messages to its computer equipment constitutes an actionable tort.

Trespass to chattels has evolved from its original common law application, concerning primarily the asportation of another's tangible property, to include the unauthorized use of personal property: Its chief importance now, is that there may be recovery... for interferences with the possession of chattels which are not sufficiently important to be classed as conversion, and so to compel the defendant to pay the full value of the thing with which he has interfered. Trespass to chattels survives today, in other words, largely as a little brother of conversion. Prosser & Keeton, Prosser and Keeton on Torts, § 14, 85-86 (1984). ***

Both plaintiff and defendants cite the Restatement (Second) of Torts to support their respective positions. In determining a question unanswered by state law, it is appropriate for this Court to consider such sources as the restatement of the law and decisions of other jurisdictions. [Cc]

The Restatement § 217(b) states that a trespass to chattel may be committed by intentionally using or intermeddling with the chattel in possession of another. Restatement § 217, comment e defines, physical "intermeddling" as follows intentionally bringing about a physical contact with the chattel. The actor may commit a trespass by an act which brings him into an intended physical contact with a chattel in the possession of another [.] Electronic signals generated and sent by computer have been held to be sufficiently physically tangible to support a trespass cause of action. [Cc] It is undisputed that plaintiff has a

91

possessory interest in its computer systems. Further, defendants' contact with plaintiff's computers is clearly intentional. Although electronic messages may travel through the Internet over various routes, the messages are affirmatively directed to their destination.

Defendants, citing Restatement (Second) of Torts § 221, which defines "dispossession," assert that not every interference with the personal property of another is actionable and that physical dispossession or substantial interference with the chattel is required. Defendants then argue that they did not, in this case, physically dispossess plaintiff of its equipment or substantially interfere with it. However, the Restatement (Second) of Torts § 218 defines the circumstances under which a trespass to chattels may be actionable: One who commits a trespass to a chattel is subject to liability to the possessor of the chattel if, but only if, (a) he dispossesses the other of the chattel, or (b) the chattel is impaired as to its condition, quality, or value, or (c) the possessor is deprived of the use of the chattel for

a substantial time, or (d) bodily harm is caused to the possessor, or harm is caused to some person or thing in which the possessor has a legally protected interest.--" Therefore, an interference resulting in physical dispossession is just one circumstance under which a defendant can be found liable. Defendants suggest that "unless an alleged trespasser actually takes physical custody of the property or physically damages it, courts will not find the 'substantial interference' required to maintain a trespass to chattel claim." ***To support this rather broad proposition, defendants cite only two cases which make any reference to the Restatement. In Glidden v. Szybiak, 95 N.H. 318, 63 A.2d 233 (1949), the court simply indicated that an action for trespass to chattels could not be maintained in the absence of some form of damage. The court held that where plaintiff did not contend that defendant's pulling on her pet dog's ears caused any injury, an action in tort could not be maintained. 63 A.2d at 235. In contrast, plaintiff in the present action has alleged that it has suffered several types of injury as a result of defendants' conduct. In Koepnick v. Sears Roebuck & Co., 158 Ariz. 322, 762 P.2d 609 (1988) the court held that a two-minute search of an individual's truck did not amount to a "dispossession" of the truck as defined in Restatement § 221 or a deprivation of the use of the truck for a substantial time. It is clear from a reading of Restatement § 218 that an interference or intermeddling that does not fit the § 221 definition of "dispossession" can nonetheless result in defendants' liability for trespass.

***In the present case, any value CompuServe realizes from its computer equipment is wholly derived from the extent to which that equipment can serve its subscriber base. Michael Mangino, a

software developer for CompuServe who monitors its mail processing computer equipment, states by affidavit that handling the enormous volume of mass mailings that CompuServe receives places a tremendous burden on its equipment. ***Defendants' more recent practice of evading

92

CompuServe's filters by disguising the origin of their messages commandeers even more computer resources because CompuServe's computers are forced to store undeliverable e-mail messages and labor in vain to return the messages to an address that does not exist. ***To the extent that defendants' multitudinous electronic mailings demand the disk space and drain the processing power of plaintiff's computer equipment, those resources are not available to serve CompuServe subscribers. Therefore, the value of that equipment to CompuServe is diminished even though it is not physically damaged by defendants' conduct..

Next, plaintiff asserts that it has suffered injury aside from the physical impact of defendants' messages on its equipment. Restatement § 218(d) also indicates that recovery may be had for a trespass that causes harm to something in which the possessor has a legally protected interest. Plaintiff asserts that defendants' messages are largely unwanted by its subscribers, who pay incrementally to access their e- mail, read it, and discard it. Also, the receipt of a bundle of unsolicited messages at once can require the subscriber to sift through, at his expense [because the subscriber paid by the hour for the use of the service], all of the messages in order to find the ones he wanted or expected to receive. These

inconveniences decrease the utility of CompuServe's e-mail service and) are the foremost subject in recent complaints from CompuServe subscribers. ***

Many subscribers have terminated their accounts specifically because of the unwanted receipt of bulk e-mail messages. ***Defendants' intrusions into CompuServe's computer systems, insofar as they harm plaintiff's business reputation and goodwill with its customers, are actionable under Restatement § 218(d). ***

Defendants argue that plaintiff made the business decision to connect to the Internet and that therefore it cannot now successfully maintain an action for trespass to chattels. Their argument is analogous to the argument that because an establishment invites the public to enter its property for business purposes, it cannot later restrict or revoke access to that property, a proposition which is erroneous under Ohio law. ***

Based on the foregoing, plaintiffs motion for a preliminary injunction is GRANTED. The temporary restraining order filed on October 24, 1996 by this Court is hereby extended in duration until final judgment is entered in this case. Further, defendants Cyber Promotions, Inc. and its president Sanford Wallace are enjoined from sending any unsolicited advertisements to any electronic mail address maintained by plaintiff CompuServe during the pendency of this action. It is so ORDERED.

93

NOTES AND QUESTIONS

1. You probably will run into cases in your other classes, as well as this one, where you will see the courts struggling with the application of traditional legal concepts to the new frontier of the Internet. Notice that both plaintiffs and defendants used the Restatement (Second) of Torts to support their arguments that defendant's conduct was trespass to chattels vel non. If you had been CompuServe's lawyer, would you have remembered the Glidden case from your law school casebook and thought to apply its principles to your client's problem with spam?

2. Beyond spam, plaintiffs have sought recovery for trespass to chattels where their web sites were visited by data search and collection robots, sometimes known as spiders, that seek to collect information (like email addresses) to use to create searchable databases, Web catalogues, and comparison shopping services. See, for example, eBay, Inc. v. Bidder's Edge, Inc., 100 F. Supp.2d 1058 (N.D. Cal. 2000) and Register.com, Inc. v. Verio, Inc., 356 F.3d 393 (2d Cir. 2004) (applying New York law) (both finding that although the activity of the defendant alone would not incapacitate plaintiffs' systems, others would soon follow and the combined effect would).

3. What if a disgruntled former worker uses a company's email system to send messages to all 30,000 of its employees? Trespass to chattels? Intel Corp. v. Hamidi, 30 Cal.4th 1342, 71 P.3d 296, 1 Cal.Rptr.3d 32 (2003) (no trespass to chattels because no showing that the six messages sent over eighteen months either damaged or impaired computer system in a way that affected its functioning even though each message went to all 30,000 employees).

4. Could a CompuServe subscriber bring her own cause of action for trespass to chattels against Cyber Promotions for interference with her own computer? Would she be able to show harm to the chattel? What if the chattel was harmed by a software update? Plaintiffs allege that Sony provided a software update that intentionally rendered the Sony Dash, a personal Internet device, inoperable, essentially turning it into a brick. Trespass to chattels? Grisafi v. Sony Electronics Inc., 2019 WL 1930756 (D.N.J. 2019) (physical contact with the chattel, for instance, where a person kicks another's car bumper, is not required--all that is required is interference with the chattel as a direct or indirect result of an act done by the actor).

8. Conversion

(A) Nature of the Tort

Pearson v. Dodd

United States Court of Appeals, District of Columbia Circuit, 1969.

410 F.2d 701, cert, denied, 395 U.S. 947, 89 S.Ct. 2021, 23 L.Ed.2d 465 (1969).

J. Skelly Wright, Circuit Judge: This case arises out of the exposure of the alleged misdeeds of Senator Thomas Dodd of Connecticut by newspaper columnists Drew Pearson and Jack Anderson. The District

Court has granted partial summary judgment to Senator Dodd, appellee here, finding liability on a theory of conversion. At the same time, the court denied partial summary judgment on the theory of

invasion of privacy. Both branches of the court's judgment are before us on interlocutory appeal. We affirm the District Court's denial of summary judgment for invasion of privacy and reverse its grant of summary judgment for conversion.

The undisputed facts in the case were stated by the District Court as follows: " ***[O]n several occasions in June and July, 1965, two former employees of the plaintiff, at times with the assistance of two members of the plaintiffs staff, entered the plaintiffs office without authority and unbeknownst to him, removed numerous documents from his files, made copies of them, replaced the originals, and turned over the copies to the defendant Anderson, who was aware of the manner in which the copies had been obtained. The defendants Pearson and Anderson thereafter published articles containing information gleaned from these documents."

[The court first discussed the separate count of invasion of privacy. See Chapter 18, Privacy.]

The District Court ruled that appellants' receipt and subsequent use of photocopies of documents which appellants knew had been removed from appellee's files without authorization established appellants' liability for conversion. We conclude that appellants are not guilty of conversion on the facts shown.

Dean Prosser has remarked that "[c]onversion is the forgotten tort." That it is not entirely forgotten is attested by the case before us. History has largely defined its contours, contours which we should now follow except where they derive from clearly obsolete practices or abandoned theories.

Conversion is the substantive tort theory which underlay the ancient common law form of action for trover. A plaintiff in trover alleged that he had lost a chattel which he rightfully possessed, and that the defendant had found it and converted it to his own use. With time, the allegations of losing and finding became fictional, leaving the question of whether the defendant had "converted" the property the only operative one.

The most distinctive feature of conversion is its measure of damages, which is the value of the goods converted. The theory is that the "converting" defendant has in some way treated the goods as if they were his own, so that the plaintiff can properly ask the court to decree a forced sale of the property from the rightful possessor to the converter.

Because of this stringent measure of damages, it has long been recognized that not every wrongful interference with the personal property of another is a conversion. Where the intermeddling falls short of the complete or very substantial deprivation of possessory rights in the

property, the tort committed is not conversion, but the lesser wrong of trespass to chattels.

The Restatement (Second) of Torts has marked the distinction by defining conversion as: " ***[A]n intentional exercise of dominion or control over a chattel which so seriously interferes with the right of another to control it that the actor may justly be required to pay the other the full value of the chattel." Less serious interferences fall under the Restatement's definition of trespass [to chattels].

The difference is more than a semantic one. The measure of damages in trespass [to chattels] is not the whole value of the property interfered with, but rather the actual diminution in its value caused by the interference. More important for this case, a judgment for conversion can be obtained with only nominal damages, whereas liability for trespass to chattels exists only on a showing of actual damage to the property interfered with. Here the District Court granted partial summary judgment on the issue of liability alone, while conceding that possibly no more than nominal damages might be awarded on subsequent trial. Partial summary judgment for liability could not have been granted on a theory of trespass to chattels without an undisputed showing of actual damages to the property in question.

It is clear that on the agreed facts appellants committed no conversion of the physical documents taken from appellee's files. Those documents were removed from the files at night, photocopied, and returned to the files undamaged before office operations resumed in the morning. Insofar as the documents' value to appellee resided in their usefulness as records of the business of his office, appellee was clearly not substantially deprived of his use of them.

This of course is not an end of the matter. It has long been recognized that documents often have value above and beyond that springing from their physical possession. They may embody information or ideas whose economic value depends in part or in whole upon being kept secret. The question then arises whether the information taken by means of copying appellee's office files is of the type which the law of conversion protects. The general rule has been that ideas or information are not subject to legal protection, but the

law has developed exceptions to this rule. Where information is gathered and arranged at some cost and sold as a commodity on the market, it is properly protected as property. Where ideas are formulated with labor and inventive genius, as in the case of literary works or scientific researches, they are protected. Where they constitute instruments of fair and effective commercial competition, those who develop them may gather their fruits under the protection of the law.

The question here is not whether appellee had a right to keep his files from prying eyes/but whether the information taken from those files falls under the protection of the law of property, enforceable by a suit for conversion. In our view, it does not. The information included the

96

contents of letters to appellee from supplicants, and office records of other kinds, the nature of which is not fully revealed by the record. Insofar as we can tell, none of it amounts to literary property, to scientific invention, or to secret plans formulated by appellee for the conduct of commerce. Nor does it appear to be information held in any way for sale by appellee, analogous to the fresh news copy produced by a wire service. ***

Because no conversion of the physical contents of appellee's files took place, and because the information copied from the documents in those files has not been shown to be property subject to protection by suit for conversion, the District Court's ruling that appellants are guilty of conversion must be reversed. "

So ordered.

NOTES AND QUESTIONS

1. Conversion is a tort whose detailed complications exceed the time that can conveniently be allotted to it in any Torts course. There are thousands of conversion cases, but most of them have been concerned with settling the title to disputed goods, and there are relatively few in which the tort itself has been in issue. The topic of conversion has tended to be shunted back and forth between the courses in Torts and Property. Many of the practical problems relating to title and conversion are covered in Article 2 of the Uniform Commercial Code and law school courses in sales or commercial law.

2. The hand of history lies heavily on the tort. It is the lineal descendant of the old common law action of trover and for that reason is commonly listed under the heading "Trover and Conversion." (You may have seen a reference to it this way in your Civil Procedure course. Because it developed out of a common law writ, parties are entitled to a jury trial in such actions brought in federal courts.) Trespass and trover were both actions founded upon possession, and for some centuries they remained as alternative remedies for the wrongful taking or damaging of chattels. There was, however, one important difference between them, as to the measure of damages. The theory of trespass to chattels was that the plaintiff remained the owner of the chattel, with possession merely interrupted or interfered with, so that when the chattel was returned, the owner had to accept it and recovery was limited to damages to the chattel, or to reimbursement for the time it was missing. The theory of trover was that the defendant, by "converting" the chattel to the defendant's own use had appropriated the plaintiff's property, for

which he was required to make compensation--generally computed as market value at the time and place of conversion. The defendant did not have the option of simply returning the chattel and paying damages for repair of the chattel or for compensation for the time it was gone.

3. Plaintiff was holding a ten dollar bill loosely in his hand when defendant snatched it. Defendant immediately returned the bill, taunting "that was too easy." Conversion? Trespass to chattels? Cf. Reynolds v. MacFarlane, 322 P.3d 755, 759 (Utah App. 2014).

97

4. In each of the following cases, was the interference with the plaintiff's chattel serious enough to warrant an action for conversion?

A. Plaintiff and defendant owned a house as tenants in common. During a dispute over ownership, defendant notified plaintiff that if he did not remove his furniture she would have it removed. She did so, informing him of the location. Zaslow v. Kroenert, 29 Cal.2d 541, 176 P.2d 1 (1946) (no conversion, trespass to chattels for which plaintiff may recover only actual damages suffered by reason of the loss of use of the property).

B. Similar facts, except that defendant removes the furniture to a warehouse at a distance, so that plaintiff is subject to substantial inconvenience and expense in recovering it. This is a conversion. Forsdick v. Collins, 1 Starkie 173, 171 Eng.Rep. 437 (1816); and cf. Electric Power Co. v. Mayor of New York, 36 App.Div. 383, 55 N.Y.S. 460 (1899).

C. Similar facts, except that defendant does not notify plaintiff. This is a conversion. McGonigle v. Victor H.J. Belleisle Co., 186 Mass. 310, 71 N.E. 569 (1904); Borg & Powers Furniture Co. v. Reiling, 213 Minn. 539, 7 N.W.2d 310 (1942).

D. Similar facts, except that defendant stores the furniture in his own name, with the intent to keep it for himself. This is a conversion. Hicks Rubber Co., Distributors v. Stacy, 133 S.W.2d 249 (Tex.Civ.App. 1939).

E. Similar facts, except that while the furniture is in the warehouse, and before plaintiff can remove it, it is destroyed by fire. This is a conversion. McCurdy v. Wallblom Furniture & Carpet Co., 94 Minn. 326, 102 N.W. 873 (1905).

5. What would plaintiff show as actual damages to support a cause of action for trespass to chattels if the dispossession was not serious enough for conversion?

6. A conversion may occur when one who is authorized to use a chattel uses it in a manner exceeding the authorization. See Swish Mfg. Southeast v. Manhattan Fire & Marine Ins., 675 F.2d 1218 (11th Cir.1982) (applying Georgia law) (lease permitted use of aircraft for transporting passengers but lessee used aircraft for transportation of contraband). A type of case that once was common is Doolittle v. Shaw, 92 Iowa 348, 60 N.W. 621 (1894). Defendant rented a horse from plaintiff, to be driven to Manchester and back. Defendant drove the horse six or seven miles into the country beyond Manchester, without damaging it. It was held that this was not a conversion. But if the horse had been seriously injured in an accident while it was beyond Manchester, with or without the defendant's fault, there

would have been a conversion. Palmer v. Mayo, 80 Conn. 353, 68 A. 369 (1907) (horse); Baxter v. Woodward, 191 Mich. 379, 158 N.W. 137 (1916) (car).

7. Is a human body part "property" that can be converted? Plaintiffs spleen was removed as part of his treatment for cancer. Later, plaintiff discovered that his doctors had used cells from the removed spleen to develop a cell line for which they obtained a patent. The patent was then licensed for commercial development. Does plaintiff have a conversion action against the doctors and the commercial developer? See Moore v. Regents of the University of California, 51 Cal.3d 120, 793 P.2d 479, 271 Cal.Rptr. 146

(1990) (no conversion for excised body parts). Accord, Culpepper v. Pearl Street Bldg., Inc., 877 P.2d 877 (Colo. 1994) (in action by parents against those involved in mistaken cremation of son's body, court ruled there is no property right in a body that would support a conversion claim).

Most courts do, however, recognize that the next of kin have some protected interests in the possession for burial or cremation and to prevent mutilation of the body, sometimes called a quasi-property right or the right of sepulcher. See, for example, Whaley v. County of Tuscola, 58 F.3d 1111 (6th Cir.1995) (unauthorized removal of corneas and eyes during autopsies) (discussing Ohio and Michigan law re protected interests of next of kin to possess and prevent mutilation of body). Those rights do not extend to being informed that body parts had been withheld by the coroner for further testing or the right to later claim the withheld body parts for interment or disposal.

Albrecht v. Treon, 118 Ohio St.3d 348, 889 N.E.2d 120 (2008) (answering in the negative certified question from federal district court that had before it a putative class action against all of Ohio's coroners); In re Certified Question from U.S. District Court for the E.D. of Mich., 488 Mich. 1, 793 N.W.2d 560 (2010) (no Michigan case law gives next of kin a possessory right to decedent's brain following a lawful forensic examination); and Shipley v. City of New York, 25 N.Y.3d 645, 37 N.E.3d 58, 16 N.Y.S.3d 1 (2015) (no requirement that medical examiner notify next of kin that some specimens were removed from the body and no requirement that those specimens be returned).

Some states have clarified these issues through legislation. See, for example, Section 711.002(a) of the Texas Health and Safety Code, which prescribes who has the right to control the disposition of a decedent's remains and SCI Texas Funeral Services, Inc. v. Nelson, 540 S.W.3d 539 (Tex. 2018) (discussing rights of siblings of deceased versus those of her adult child).

8. What if defendant went through the trash in the common area of an office building and took plaintiff's papers? Conversion? Greenpeace, Inc. v. Dow Chemical Co., 97 A.3d 1053 (D.C. App. 2014) (no recognized property interest in anything that was purposefully thrown away or abandoned).

9. Is an Internet domain name a form of intangible property that can be converted? Kremen v. Cohen, 337 F.3d 1024 (9th Cir. 2003) (applying California law) (finding that plaintiffs complaint stated a cause of action for conversion of the domain name sex.com).

The Restatement (Second) of Torts has undertaken to identify the factors that influence courts in determining if a conversion has taken place when there has been interference with a chattel. It provides:

§ 222A. What Constitutes Conversion

(1) Conversion is an intentional exercise of dominion or control over a chattel which so seriously interferes with the right of another to control it that the actor may justly be required to pay the other the full value of the chattel.

99

(2) In determining the seriousness of the interference and the justice of requiring the actor to pay the full value the following factors are important:

(a) the extent and duration of the actor's exercise of dominion or control;

(b) the actor's intent to assert a right in fact inconsistent with the other's right of control;

(c) the actor's good faith;

(d) the extent and duration of the resulting interference with the other's right of control;

(e) the harm done to the chattel;

(f) the inconvenience and expense caused to the other.

The ways in which an actor may convert a chattel--i.e., intentionally exercise dominion and control over it that so seriously interferes with the owner's right to control it that it is just to require the actor to pay its full value--include the following:

(1) acquiring possession of it--e.g., stealing the chattel;

(2) damaging or altering it--e.g., intentionally running over an animal and killing it;

(3) using it--e.g., a bailee seriously violates the terms of the bailment;

(4) receiving it--e.g., obtaining possession after a purchase from a thief;

(5) disposing of it--e.g., a bailee wrongfully sells the chattel;

(6) misdelivering it--e.g., delivery to wrong person by mistake so that the chattel is lost; and

(7) refusing to surrender it--e.g., bailee refuses to return the chattel.

See Restatement (Second) of Torts § 223 and following sections.

(B) Effect of Good Faith

An individual may be subject to liability for conversion although he was not subjectively at fault. This can occur in at least two ways:

1. When the defendant intends to affect the chattel in a manner inconsistent with the plaintiff's right of control, the fact that he acted in good faith and under a reasonable mistake does not prevent liability for conversion. Thus, if a bailee delivers goods to an imposter or on the basis of a forged document, he is liable to the bailor or owner. See Baer v. Slater, 261 Mass. 153, 158 N.E. 328 (1927) (defendant delivers goods to imposter); Potomac Ins. Co. v. Nickson, 64 Utah 395, 231 P. 445 (1924)

(garage delivers car to person who presented a stolen duplicate parking ticket); Suzuki v. Small, 214 App.Div. 541, 212 N.Y.S. 589 (1925) (steel sent to wrong company). Compare Ranson v. Kitner, page 26.

Some special rules have developed at common law for the protection of bailees and servants who deal with the chattels of third persons under directions from their bailors or employers. These are rules of commercial convenience and the reason underlying them is clearly the practical necessity of permitting someone to receive goods for storage or safekeeping or transportation, without inquiry as to the title of the person from whom they are received. If, for example, a garage accepting an automobile for overnight parking were to be held liable for conversion when it turned out to be a stolen car, there would be few people willing to operate parking garages.

This privilege does not extend to a case in which the goods are in the hands of the bailee and they are claimed from him by both the bailor and the true owner. In this case, the bailee is required, at his peril, to see that he delivers to the right person, and he becomes liable for conversion if he delivers to the wrong one. To avoid this risk, the law provides interpleader or other modern statutes that permit the contested goods to be deposited by the bailee in court, leaving it to the claimants to establish who among them is the true owner.

2. The other major area in which an innocent conversion may take place concerns good faith purchasers, those who buy the goods not knowing they were converted. An innocent purchaser cannot obtain title from a thief because the thief does not have title. The purchaser

acts at her peril and may be sued in conversion by the true owner. O'Keeffe v. Snyder, 83 N.J. 478, 416 A.2d 862 (1980) (title to three of Georgia O'Keeffe's paintings could not have passed to the putative owner because the artist testified that they had been stolen from her late husband's gallery some thirty years before they reappeared at defendant's gallery). The good faith purchaser is protected, however, if the goods were obtained by the converter through fraud rather than theft because title passes in a fraudulent transaction subject to the equitable right of rescission. That is, when the seller discovers the fraud, he can rescind the sale and take back the title. But, the right to rescind for fraud is terminated when a bona fide purchaser acquires both title and possession from the defrauding party. Phelps v. McQuade, 220 N.Y. 232, 115 N.E. 441 (1917) (jewels sold on credit to imposter who sold them to bona fide purchaser and then disappeared without paying for them could not be reclaimed by jewelers from bona fide purchaser because title had passed before the sale could be rescinded for fraud). There is thus a distinction between stolen goods, as to which the legal title does not pass and a bona fide purchaser is therefore not protected, and goods obtained by fraud, as to which the title does pass, subject to an equitable right of rescission, which is cut off by a bona fide purchase. Finally, the Uniform Commercial

Code provides that a bona fide purchaser is protected in a sale by goods from a merchant "who deals in goods of that kind." U.C.C. § 2-403(2).

Consider whether a bona fide purchaser is protected under these circumstances: 1) Teenager leaves his bicycle in the front yard and it is stolen by a thief who cleans it up and sells it to college student through an ad on Craigslist. College student is a converter and would have to pay teenager the full value of the bicycle. 2) Teenager is tricked into trading his bicycle for a foreign stamp the trickster claims is worth at least a thousand dollars. By the time teenager learns the stamp is worthless, the bicycle has been sold to college student. College student is not a converter and teenager has lost the right to rescind the deal. 3) Teenager leaves his bicycle at a shop that sells and repairs bicycles. Merchant sells the bicycle to college student. College student is not a converter because the merchant "deals in goods of that kind." In all three scenarios, teenager would have a cause of action for conversion against the thief, trickster, or merchant. The college student may be easier to find, however.

Money and negotiable instruments (e.g., checks) may not be treated the same way as tangible chattels. Kelley Kar Co. v. Maryland Casualty Co., 142 Cal.App.2d 263, 298 P.2d 590 (1956). If thief steals teenager's twenty dollar bill and trades it to college student for two tens, college student is not a converter and teenager's only recourse is against thief.

(C) Necessity of Demand; Return of Chattel

Demand. Some states have followed the rule that possession by a bona fide purchaser or other innocent converter is not in itself a sufficiently serious defiance of the owner's rights and hold that the possessor is liable only if refusing to return the goods on demand. In

most states, however, a conversion occurs as soon as the defendant takes dominion and control over the goods in a manner inconsistent with plaintiff's ownership. In these states, there may be a separate act of conversion for an initial taking of possession and for a later refusal to return on demand, and the owner can elect between them. Restatement (Second) of Torts § 229.

Return. When a converter offers to return the converted goods and the owner accepts, the return does not bar the action for conversion, but it must be taken into account to reduce the damages recovered. If the chattel is in the same condition as when it was taken, has not changed in value and the plaintiff has suffered no special damage through being deprived of possession, the effect may be to reduce his recovery to nominal damages.

When the plaintiff refuses to accept the offered return, the older rule was that the defendant could not force the goods back upon him in reduction of the damages. The plaintiff could insist upon the full value of the goods as the measure of damages, and the defendant had to keep them. The English courts and some American jurisdictions have held

that when the conversion is an innocent one committed under an honest mistake, the court may require the plaintiff to take back the goods and credit the defendant with their value in any case in which the goods are undamaged and there has been no change in the plaintiff's position. The matter is within the sound discretion of the trial court, and even in these jurisdictions there is no absolute right to the return as a matter of law. See Rutland & W.R. Co. v. Bank of

Middlebury, 32 Vt. 639 (1860). The Restatement (Second) of Torts has followed this approach in § 922.

Payment of the chattel's value by a converter to the original owner effectuates a common law forced sale of the chattel and precludes the original owner's further recovery of damages for subsequent conversions. Baram v. Farugia, 606 F.2d 42 (3d Cir.1979) (applying Pennsylvania law) (Trainer of race horse gave horse to defendants as payment of trainer's debt. Plaintiff, owner of race horse, filed a conversion action against defendants and was awarded value of horse and punitive damages. On appeal, court found that because plaintiff already had collected the full value of the horse from trainer, the acceptance of that payment was a "forced sale" to trainer and thus plaintiff did not have a conversion action against defendants.) Is a judgment for plaintiff sufficient for this purpose too?

(D) Damages

The measure of damages for conversion is the value of the property converted. Usually, this is the market value--what the property could have been sold for in the open market by a willing seller to a willing buyer. For elaboration on this and indication of other recoverable damages, see Restatement (Second) of Torts § 927.

The market value is determined at the time and place of the conversion. The theory is that if the chattel is available on the market, the owner should mitigate damages by purchasing another chattel. This need not be done at the very moment of the conversion. While some courts would give him the highest intermediate value between the time of conversion and the time of the suit or the judgment, the rule approved by most commentators is the highest

intermediate value between the time of conversion and a reasonable time for making a replacement. If there is no market value, other methods may be used, such as manufacturing cost, less depreciation. See Restatement (Second) of Torts § 911.

Damages may be available both for the fair market value and for loss-of-use of the chattel until it is replaced. J&D Towing, LLC v. Am. Alt. Ins. Corp., 478 S.W.3d 649 (Tex. 2016) (four month period before resuming operations after tow truck totally destroyed).

Sometimes the property destroyed or damaged has little market worth, but has a particular value to the owner. Damages cannot be recovered for sentiment alone, but if defendant's conduct is outrageous, plaintiff may be able to recover damages for emotional harm suffered

from the loss. See La Porte v. Associated Independents, Inc., 163 So.2d 267 (Fla. 1964) (trash collector killed pet dachshund by throwing garbage can at it); Womack v. Von Rardon, 133 Wash.App. 254, 135 P.3d 542 (2006) (teenagers took cat from porch, doused it with gasoline, and set it on fire). In cases where the converted chattels were of limited extrinsic or market value, the original or replacement cost or cost of repair of the chattel may be awarded. Lakewood Engineering and Mfg. Co. v. Quinn, 91 Md.App. 375, 604 A.2d 535 (1992) (allowing replacement value of household items lost in fire). Damages for a chattel that is the product of creative effort as to which no original or replacement cost can fairly be assigned may be based upon the value of the time that it took or would take to create the chattel. Wood v. Cunard, 192 F. 293 (2d Cir. 1911) (taking

into account the value of two years of intermittent labor required to reproduce lost manuscript); Rajkovich v. Alfred Mossner Co., 199 Ill.App. 3d 655, 557 N.E.2d 496, 145 Ill.Dec. 726 (1990) (compensating for 172 hours of architectural time at specified rate necessary to redo damaged architectural drawings); United States v. Arora, 860 F.Supp. 1091 (D. Md. 1994) (compensation based on hourly rate of lab technician to recreate cell line destroyed by rival scientist); U.D.C. v. Vossoughi, 963 A.2d 1162 (D.C. 2009) (colleagues testified as to value of college professor's class notes, teaching materials, research notes, laboratory equipment, and experiments in progress); Redwine v. Fitzhugh, 78 Wyo. 407, 329 P.2d 257 (1958) (allowing recovery for value of seed and for labor expended in sowing and cultivating seed).

Punitive damages may be allowed when the conversion was malicious but not when it was done innocently.

(E) What May Be Converted

Because of its origin as an action against the finder of lost goods, trover was limited to the conversion of things that were capable of being lost and found. It would lie for any chattel, but not for land, which in the eyes of the law could not be lost. Hence the dispossession or withholding of real property could not be a conversion. Nor could the severance of timber, minerals, crops or fixtures attached to the land. Once there was severance, however, the goods became chattels and the plaintiff could bring trover for their removal from the land. These rules are still applied.

Since intangible rights, such as those of a stockholder in a corporation, could not be lost and found, the original common law

rule was that they could not be the subject of a conversion. This has been considerably modified. See Rubin, Conversion of Choses in Action, 10 Fordham L. Rev. 415 (1941). It was first held that damages could be recovered for the conversion of intangible rights when they were merged and identified with a special instrument, such as a promissory note, a check, a bill of lading or a stock certificate, and that instrument itself was converted. This has now been generally extended to permit recovery for the conversion of rights of a kind customarily merged with such an

instrument, such as those of a stockholder, without any conversion of the stock certificate itself. Herrick v. Humphrey Hardware Co., 73 Neb. 809, 103 N.W. 685 (1905) (refusal to register a transfer on the books of the corporation, depriving the new owner of his rights as a stockholder). But see Thompson v. UBS Financial Services, Inc., 443 Md. 47, 115 A.3d 125 (Md. 2015) (Maryland remains among the many jurisdictions that maintain the requirement of conversion of a document as an element of conversion of intangible property and thus court rejected the principle behind Restatement (Second) of Torts § 242(2)) and American Biomedical Grp., Inc. v. Techtrol, Inc., 374 P.3d 820 (Okla. 2016) (Oklahoma does not recognize the tort of conversion of intangible property in the same manner as it does for personal property, but does recognize the tort of misappropriation of business information).

A claim for nonpayment of wages is limited to contract law and does not constitute a conversion. Voris v. Lampert, 7 Cal.5th 1141, 446 P.3d 284, 250 Cal.Rptr.3d 779 (2019) (employee's claim is not that

the employer has wrongfully exercised dominion over a specifically identifiable pot of money that already belongs to the employee--in other words, the sort of wrong that conversion is designed to remedy. Rather, the employee's claim is that the employer failed to reach into its own funds to satisfy its debt to him).

What about data stored electronically on a computer? Thyroff v. Nationwide Mut. Ins. Co., 8 N.Y.3d 283, 864 N.E.2d 1272, 832 N.Y.S.2d 873 (2007) (answering certified question in the affirmative, court found personal and client information of former insurance agent's stored on computer that belonged to insurance company to be property for purposes of agent's conversion claim).

What if an attorney who is leaving a law firm takes with her the files of seventy of the firm's clients? Is she liable for conversion of the files? Is the law firm who becomes her new employer? See Parker v. Kowalsky & Hirschhorn, 124 Md.App. 447, 722 A.2d 441, 447 (1999) ("While we agree with the lower court's conclusion that [first law firm] stated a viable cause of action in conversion against [attorney], we do not believe that this allegation demonstrates that [first law firm] had a possessory interest in the fees that were received by [second law firm, from work performed for clients whose files had been converted.]")

(F) Who May Maintain the Action

Trover, like trespass, was founded upon the plaintiff's possession. From this has come the rule that anyone in possession of a chattel at the time of a conversion can maintain an action for it. Thus a finder can recover for conversion. See Aigler, Rights of Finders, 21 Mich. L. Rev. 664, 57 Am. L. Rev. 511 (1928); Moreland, Rights of Finders,

16 Ky. L.J. 1 (1927). The same is true of a bailee to whom the chattel is loaned, although he has no other interest in it, or a sheriff who has seized it on execution.

105

Thus, plaintiffs only have to show that their right to the chattel is superior to the defendant's. So, for example, even if the exact sequence of events involving two paintings that were confiscated by the Nazis when their owners were sent to concentration camps was not shown, the court could find the heirs had superior title to the art dealer defendant's. Reif v. Nagy, 106 N.Y.S.3d 5, 175 A.D.3d 107, 132 (N.Y. App. 2019) ("The tragic consequences of the Nazi occupation of Europe on the lives, liberty and property of the Jews continue to confront us today. We are informed by the intent and provisions of the HEAR Act which highlights the context in which plaintiffs, who lost their rightful property during World War II, bear the burden of proving superior title to specific property in an action under the traditional principles of New York law. We also note that New York has a strong public policy to ensure that the state does not become a haven for trafficking in stolen cultural property, or permitting thieves to obtain and pass along legal title [c]. It is important to note that we are not making a declaration as a matter of law that plaintiffs established the estate's absolute title to the Artworks. Rather, we are adjudicating the parties' respective superior ownership and possessory interests. We find that plaintiffs have met their burden of proving superior title to the Artworks.")

Recovery has been permitted even when the plaintiff's possession is wrongful and in defiance of the true owner. Thus, one converter may

recover from another. Jeffries v. Great Western R. Co., 5 El. & Bl. 802, 119 Eng.Rep. 680 (1856). In this case, however, the plaintiff usually has had some colorable claim of right to the chattel; and it has been held that in the absence of such a claim there is no recovery. Turley v. Tucker, 6 Mo. 583, 35 Am.Dec. 449 (1840); Rexroth v. Coon, 15 R.I. 35, 23 A. 37 (1885).

Trover was also extended to permit recovery by one who did not have possession, but had the immediate right to it, as in the case of a bailor at will who was entitled to possession on demand. Manders v. Williams, 4 Exch. 339, 154 Eng.Rep. 1242 (1849). Or a mortgagee after default. Nichols & Shepard Co. v. Minnesota Threshing Mfg. Co., 70 Minn. 528, 73 N.W. 415 (1897). This, too, has carried over into the modern law of conversion.

[BLANK PAGE]

CHAPTER 3 PRIVILEGES

RESTATEMENT (THIRD) OF TORTS: LIABILITY FOR PHYSICAL AND EMOTIONAL HARM (2010)

§ 5. Liability for Intentional Physical Harm

An actor who intentionally causes physical harm is subject to liability for that harm.

Comment b. Subject to liability: the affirmative defenses. The language of "subject to liability" acknowledges the possibility of various affirmative defenses and other liability-limiting doctrines. These may include consent, self-defense, defense of third persons, protection of land and chattels, and privileges relating to discipline. The various affirmative defenses identify those situations in which the law has concluded that the intentional infliction of physical harm is either justifiable or excusable.

1. Consent

O'Brien v. Cunard S.S. Co.

Supreme Judicial Court of Massachusetts. 1891.

154 Mass. 272, 28 N.E. 266.

Tort, for an assault, and for negligently vaccinating the plaintiff, who was a steerage passenger on the defendant's steamship. The trial

court directed a verdict for the defendant, and the plaintiff brings exceptions. [Plaintiff alleged that she suffered ulceration at the site and blistering all over her body due either to contamination of the vaccine or of the vaccination site. There was conflicting medical expert testimony as to the cause of her injuries.]

KNOWLTON, J. ***To sustain the first count, which was for an alleged assault, the plaintiff relied on the fact that the surgeon who was employed by the defendant vaccinated her on ship-board, while she was on her passage from Queenstown to Boston. On this branch of the case the question is whether there was any evidence that the surgeon used force upon the plaintiff against her will. In determining whether the act was lawful or unlawful, the surgeon's conduct must be considered in connection with the surrounding circumstances. If the plaintiff's behavior was such as to indicate consent on her part, he was justified in

his act, whatever her unexpressed feelings may have been. In determining whether she consented, he could be guided only by her overt acts and the manifestations of her feelings. [Cc] It is undisputed that at Boston there are strict quarantine regulations in regard to the examination of emigrants, to see that they are protected from small-pox by vaccination, and that only those persons who hold a certificate from the medical officer of the steam-ship, stating that they are so protected, are permitted to land without detention in quarantine, or vaccination by the port physician. It appears that the defendant is accustomed to have its surgeons vaccinate all emigrants who desire it, and who are not protected by

previous vaccination, and give them a certificate which is accepted at quarantine as evidence of their protection. Notices of the regulations at quarantine, and of the willingness of the ship's medical officer to vaccinate such as needed vaccination, were posted about the ship in various languages, and on the day when the operation was performed the surgeon had a right to presume that she and the other women who were vaccinated understood the importance and purpose of vaccination for those who bore no marks to show that they were protected. By the plaintiffs testimony, which, in this particular, is undisputed, it appears that about 200 women passengers were assembled below, and she understood from conversation with them that they were to be vaccinated; that she stood about 15 feet from the surgeon, and saw them form in a line, and pass in turn before him; that he "examined their arms, and, passing some of them by, proceeded to vaccinate those that had no mark;" that she did not hear him say anything to any of them; that upon being passed by they each received a card, and went on deck; that when her turn came she showed him her arm; he looked at it, and said there was no mark, and that she should be vaccinated; that she told him she had been vaccinated before, and it left no mark; "that he then said nothing; that he should vaccinate her again;" that she held up her arm to be vaccinated; that no one touched her; that she did not tell him she did not want to be vaccinated; and that she took the ticket which he gave her, certifying that he had vaccinated her, and used it at quarantine. She was one of a large number of women who were vaccinated on that occasion, without, so far as appears, a word of objection from any of them. They all indicated by their conduct that they desired to avail themselves of the provisions

made for their benefit. There was nothing in the conduct of the plaintiff to indicate to the surgeon that she did not wish to obtain a card which would save her from detention at quarantine, and to be vaccinated, if necessary, for that purpose. Viewing his conduct in the light of the surrounding circumstances, it was lawful; and there was no evidence tending to show that it was not. The ruling of the court on this part of the case was correct. ***

Exceptions overruled.

109

NOTES AND QUESTIONS

1. With the principal case, contrast Mulloy v. Hop Sang, 1 W.W.R. 714 (Alberta C.A.) (1935). Patient arrived at the hospital with a hand that had been badly injured in an automobile accident wrapped in cloth, telling the surgeon to fix it but not cut it off as he wanted to have it looked after in his hometown. The surgeon replied that he would do whatever was necessary once the anesthesia was administered and he was able to get a look at the hand. Patient did not reply. Surgeon amputated his hand. Appellate court ruled that consent had not been given where patient with limited English did not reply or make objections to surgeon's statement that he would do what was necessary after patient had given limited consent that did not include amputation.

2. Suppose that in the course of an argument defendant announces that he is going to punch plaintiff in the nose. Plaintiff stands his ground but says and does nothing, and defendant punches him. Is there consent?

3. On a park bench in the moonlight, a young man informs his fiancée that he is going to kiss her. She says and does nothing, and he kisses her. Is he liable for battery? What if it is their first date? What if he is a stranger who has just sat down next to her when he makes his announcement? Consent is informed by cultural norms and can be complicated by considerations of viewpoint, capacity, and regret. How should these issues affect the tort law? See Kim, Consentability: Consent and Its Limits (Cambridge University Press 2019). Would it be clearer to divide consent into actual consent, apparent consent, and implied-in-law consent as the draft of Restatement (Third) of Torts: Intentional Torts to Persons does? See §§ 12--16, Tentative Draft No. 4 (April 1, 2019).

Hackbart v. Cincinnati Bengals, Inc.

United States Court of Appeals, Tenth Circuit, 1979.

601 F.2d 516, cert, denied, 444 U.S. 931, 100 S.Ct. 275, 62 L.Ed.2d 188 (1979).

William E. Doyle, Circuit Judge. The question in this case is whether in a regular season professional football game an injury which is inflicted by one professional football player on an opposing player can give rise to liability in tort where the injury was inflicted by the intentional striking of a blow during the game.

The injury occurred in the course of a game between the Denver Broncos and the Cincinnati Bengals, which game was being played in Denver in 1973. The Broncos' defensive back, Dale Hackbart, was the recipient of the injury and the Bengals' offensive back, Charles "Booby" Clark, inflicted the blow which produced it. ***

The trial court's finding was that Charles Clark, "acting out of anger and frustration, but without a specific intent to injure ***stepped forward and struck a blow with his right forearm to the back of the kneeling plaintiffs head and neck with sufficient force to cause both players to fall forward to the ground." Both players, without complaining

110

to the officials or to one another, returned to their respective sidelines since the ball had changed hands and the offensive and defensive teams of each had been substituted. Clark testified at trial that his frustration was brought about by the fact that his team was losing the game. ***

Despite the fact that the defendant Charles Clark admitted that the blow which had been struck was not accidental, that it was intentionally administered, the trial court ruled as a matter of law that the game of professional football is basically a business which is violent in nature, and that the available sanctions are imposition of penalties and expulsion from the game. Notice was taken of the fact that many fouls are overlooked; that the game is played in an emotional and noisy environment; and that incidents such as that here complained of are not unusual. ***

Indeed, the evidence shows that there are rules of the game which prohibit the intentional striking of blows. Thus, Article 1, Item 1, Subsection C, provides that: "All players are prohibited from striking on the head, face or neck with the heel, back or side of the hand, wrist, forearm, elbow or clasped hands." Thus the very conduct

which was present here is expressly prohibited by the rule which is quoted above.

The general customs of football do not approve the intentional punching or striking of others. That this is prohibited was supported by the testimony of all of the witnesses. They testified that the intentional striking of a player in the face or from the rear is prohibited by the playing rules as well as the general customs of the game. Punching or hitting with the arms is prohibited. Undoubtedly these restraints are intended to establish reasonable boundaries so that one football player cannot intentionally inflict a serious injury on another. Therefore, the notion is not correct that all reason has been abandoned, whereby the only possible remedy for the person who has been the victim of an unlawful blow is retaliation. ***

In sum, having concluded that the trial court did not limit the case to a trial of the evidence bearing on defendant's liability but rather determined that as a matter of social policy the game was so violent and unlawful that valid lines could not be drawn, we take the view that this was not a proper issue for determination and that plaintiff was entitled to have the case tried on an assessment of his rights and whether they had been violated. ***

Reversed and remanded for a new trial.

NOTES AND QUESTIONS

1. In order to recover, plaintiff must show that defendant acted intentionally, not just that he violated the game's safety rules. See Gauvin v. Clark, 404 Mass. 450, 537 N.E.2d 94 (1989) (jury found college hockey player was not acting willfully when his stick struck

the abdomen of other player). Greer v. Davis, 921 S.W.2d 325 (Tex.App. 1996) (question for jury

whether base runner acted intentionally or merely negligently in colliding with catcher rather than sliding or stepping out of baseline to avoid the tag).

2. Plaintiff and defendant were opposing players in a family softball game. Defendant, sliding into second base, knocked the plaintiff down and broke two bones in his ankle. Is there liability? Tavernier v. Maes, 242 Cal.App.2d 532, 51 Cal.Rptr. 575 (1966). What other facts do you want to know about the game to decide if the plaintiff consented to the contact? Would it make a difference if the conduct occurred while players were warming up rather than during the game? Cf. Savino v. Robertson, 273 Ill.App. 3d 811, 210 Ill.Dec. 264, 652 N.E.2d 1240 (1995) (no difference).

3. What about a course of roughhouse practical joking between the parties in the past? Wartman v. Swindell, 54 N.J.L. 589, 25 A. 356 (1892). (question for the jury to decide whether the parties had been perpetrating practical jokes upon each other in such a way that the defendant could believe the plaintiff would accept the act (removing reins from plaintiff's horse so that he could not ride or lead horse) as a joke). Wulf v. Kunnath, 285 Neb. 472, 827 N.W.2d 248 (2013) (doctors and nurses joking around in break room at lunchtime when one thumped the other on the back of the neck).

4. Defendant taps plaintiff on the shoulder to attract his attention for a reasonable purpose. May consent be assumed? Wiffin v. Kincard, 2 Bos. & P.N.R. 471, 127 Eng.Rep. 713 (1807); Coward v. Baddeley,

4 Hurl. & N. 478, 157 Eng.Rep. 927 (1859); Wallace v. Rosen, 765 N.E.2d 192 (Ind. App. 2002), page 34. Is this a battery, to begin with?

5. Local custom permits the public to take fish from small lakes and ponds. Defendant passes over plaintiff's property to reach such a lake. Consent? See Marsh v. Colby, 39 Mich. 626 (1878).

Mohr v. Williams

Supreme Court of Minnesota, 1905.

95 Minn. 261, 104 N.W. 12.

[Plaintiff consulted defendant, an ear specialist, concerning trouble with her right ear. On examining her, he found a diseased condition of the right ear, and she consented to an operation upon it. When she was unconscious under the anaesthetic, defendant concluded that the condition of the right ear was not serious enough to require an operation; but he found a more serious condition of the left ear, which he decided required an operation. Without reviving the plaintiff to ask her permission, he operated on the left ear. The operation was skillfully performed, and was successful. Plaintiff nevertheless brought an action for battery. In the court below the jury returned a verdict in favor of the plaintiff for $14,322.50. The trial judge denied defendant's motion for judgment notwithstanding the verdict, but granted a new trial on the ground that the damages were excessive. Both parties appeal.]

BROWN, J. ***The evidence tends to show that, upon the first examination of plaintiff, defendant pronounced the left ear in good condition, and that, at the time plaintiff repaired to the hospital to

submit to the operation on her right ear, she was under the impression that no difficulty existed as to the left. In fact, she testified that she had not previously experienced any trouble with that organ. It cannot be doubted that ordinarily the patient must be consulted, and his consent given, before a physician may operate upon him. ***

The physician impliedly contracts that he possesses, and will exercise in the treatment of patients, skill and learning, and that he will exercise reasonable care and exert his best judgment to bring about favorable results. The methods of treatment are committed almost exclusively to his judgment, but we are aware of no rule or principle of law which would extend to him free license respecting surgical operations. Reasonable latitude must, however, be allowed the physician in a particular case; and we would not lay down any rule which would unreasonably interfere with the exercise of his discretion, or prevent him from taking such measures as his judgment dictated for the welfare of the patient in a case of emergency. If a person should be injured to the extent of rendering him unconscious, and his injuries were of such a nature as to require prompt surgical attention, a physician called to attend him would be justified in applying such medical or surgical treatment as might reasonably be necessary for the preservation of his life or limb, and consent on the part of the injured person would be implied. And again, if, in the course of an operation to which the patient consented, the physician should discover conditions not anticipated before the operation was commenced, and which, if not removed, would endanger the life or health of the patient, he would, though no express consent was obtained or given, be justified in extending the

operation to remove and overcome them. But such is not the case at bar. The diseased condition of plaintiffs left ear was not discovered in the course of an operation on the right, which was authorized, but upon an independent examination of that organ, made after the authorized operation was found unnecessary. Nor is the evidence such as to justify the court in holding, as a matter of law, that it was such an affection [affliction?] as would result immediately in the serious injury of plaintiff, or such an emergency as to justify proceeding without her consent. She had experienced no particular difficulty with that ear, and the questions as to when its diseased condition would become alarming or fatal, and whether there was an immediate necessity for an operation, were, under the evidence, question of fact for the jury.

The contention of defendant that the operation was consented to by plaintiff is not sustained by the evidence. At least, the evidence was such as to take the question to the jury. This contention is based upon the fact that she was represented on the occasion in question by her family physician; that the condition of her left ear was made known to him, and the propriety of an operation thereon suggested, to which he made no objection. It is urged that by his conduct he assented to it, and that plaintiff was bound thereby. It is not claimed that he gave his express consent.

113

It is not disputed but that the family physician of plaintiff was present on the occasion of the operation, and at her request. But the purpose of his presence was not that he might participate in the operation, nor does it appear that he was authorized to consent to any change

in the one originally proposed to be made. Plaintiff was naturally nervous and fearful of the consequences of being placed under the influence of anaesthetics, and the presence of her family physician was requested under the impression that it would allay and calm her fears. The evidence made the question one of fact for the jury to determine.

The last contention of defendant is that the act complained of did not amount to an assault and battery. This is based upon the theory that, as plaintiffs left ear was in fact diseased, in a condition dangerous and threatening to her health, the operation was necessary, and having been skillfully performed at a time when plaintiff had requested a like operation on the other ear, the charge of assault and battery cannot be sustained; that, in view of these conditions, and the claim that there was no negligence on the part of defendant, and an entire absence of any evidence tending to show an evil intent, the court should say, as a matter of law, that no assault and battery was committed, even though she did not consent to the operation. In other words, that the absence of a showing that defendant was actuated by a wrongful intent, or guilty of negligence, relieves the act of defendant from the charge of an unlawful assault and battery. We are unable to reach that conclusion, though the contention is not without merit. It would seem to follow from what has been said on the other features of the case that the act of defendant amounted at least to a technical assault and battery. If the operation was performed without plaintiff's consent, and the circumstances were not such as to justify its performance without, it was wrongful; and, if it was wrongful, it was unlawful. As remarked in 1 Jaggard on Torts, 437, every person has a right to complete immunity of his

person from physical interference of others, except in so far as contact may be necessary under the general doctrine of privilege; and any unlawful or unauthorized touching of the person of another, except it be in the spirit of pleasantry, constitutes an assault and battery. In the case at bar, as we have already seen, the question whether defendant's act in performing the operation upon plaintiff was authorized was a question for the jury to determine. If it was unauthorized, then it was, within what we have said, unlawful. It was a violent assault, not a mere pleasantry; and, even though no negligence is shown, it was wrongful and unlawful. The case is unlike a criminal prosecution for assault and battery, for there an unlawful intent must be shown. But that rule does not apply to a civil action, to maintain which it is sufficient to show that the assault complained of was wrongful and unlawful or the result of negligence. [C]

The amount of plaintiff's recovery, if she is entitled to recover at all, must depend upon the character and extent of the injury inflicted upon her, in determining which the nature of the malady intended to be healed

114

and the beneficial nature of the operation should be taken into consideration, as well as the good faith of the defendant.

Order affirmed.

[Reference to the records of the District Court of Ramsey County, Minnesota, discloses that on the second trial the plaintiff again prevailed, receiving a verdict and judgment for $39. There was no appeal.]

NOTES AND QUESTIONS

1. Why did plaintiff's attorney sue under a theory of battery instead of ordinary negligent medical malpractice? Should there be recovery if defendant used all reasonable care in the operation? Cf. Rogers v. Board of Road Commissioners, page 83. Contrast Mayr v. Osborne, 293 Va. 74, 795 S.E.2d 731 (Va. 2017) (patient consented to spine fusion surgery but surgeon fused the wrong part of the spine--medical malpractice, not battery, because no intent to touch and fuse wrong vertebrae).

2. Plaintiff, a boy 15 years of age, was run over by a train and his foot was crushed. When he arrived at the hospital he was unconscious and bleeding. Defendant, the house surgeon, concluded that immediate amputation of the foot was necessary to save the boy's life. Finding no relatives present, he performed the operation without consent. Is he liable? Why? Luka v. Lowrie, 171 Mich. 122, 136 N.W. 1106 (1912).

3. What if the plaintiff had remained conscious, and had insisted on prohibiting the operation, saying that he would rather die than lose his foot? See Mulloy v. Hop Sang, 1 W.W.R. 714 (Alberta C.A.) (1935) (automobile accident victim arrived at hospital asking that his badly injured hand be treated but not amputated). Construction worker, believing that he saw "666, the sign of the devil" on his hand cut it off with a power saw. His co-workers rushed him and his severed hand, packed in ice, to the hospital. A hand surgeon was standing by ready to attempt to reattach it. Patient refused permission, saying it was against his religion. What should surgeon do? See "Man Who Severed His Hand Loses Suit," Roanoke Times

& World News, Sept. 11, 1997 at B5 available at 1997 WLNR 1359032.

4. Medical care providers may act in the absence of express consent if (1) the patient is unable to give consent (unconscious, intoxicated, mentally ill, incompetent); (2) there is a risk of serious bodily harm if treatment is delayed; (3) a reasonable person would consent to treatment under the circumstances; and (4) the physician has no reason to believe this patient would refuse treatment under the circumstances. See, e.g., Kozup v. Georgetown U. Hosp., 851 F.2d 437 (D.C.Cir.1988) (parents' consent to baby's transfusion was not implied simply because it was necessary to save baby's life where there was no showing that condition was so urgent that there was no time to seek consent); Stewart-Graves v. Vaughn, 162 Wash.2d 115, 170 P.3d 1151 (2007) (father's consent implied as a matter of law even though he was in nearby waiting room because there was no meaningful opportunity for a deliberate, informed decision concerning treatment where failure to treat would have meant certain and immediate death of newborn).

115

5. The principal case has been regarded for years as the leading case on unauthorized operations. It is still sound law. Most surgery is performed in hospitals, which have their own rules and standardized practices, including consent forms. In many cases, it has been found that the consent is sufficiently general in its terms to justify the physician in doing whatever the physician believes necessary in the course of the operation. See for example Rothe v. Hull, 352 Mo. 926, 180 S.W.2d 7 (1944); Baxter v. Snow, 78 Utah 217, 2 P.2d 257

(1931). Does that mean the consent should be as broadly worded as possible? What if an obstetrician who has privileges at a hospital fails to obtain consent for a blood transfusion? The obstetrician would be liable. Would the hospital? Ward v. Lutheran Hospitals & Homes Soc. of Am., Inc., 963 P.2d 1031 (Alaska 1998) (noting that overwhelming weight of authority holds that hospital does not owe duty to patient to obtain consent for treatment when patient is under care of independent physician).

6. Plaintiff consents to an operation under general anesthesia on the condition that her own physician be present during the procedure. He was not. Is consent vitiated? Pugsley v. Privette, 220 Va. 892, 263 S.E.2d 69 (1980) (jury verdict on battery claim upheld). What if the plaintiff specifically insists that the procedure shall go thus far, and no further? For example, she consents to an incision and an examination of her stomach under ether, but expressly forbids anything more. If the surgeon goes ahead and removes a tumor found there, is he liable? Schloendorff v. Society of New York Hospital, 211 N.Y. 125, 105 N.E. 92 (1914) (yes--every adult of sound mind has the right to determine what shall be done with her body). What if patient limits her consent to female health care providers, explaining that her religious beliefs prohibit her from being seen unclothed by a member of the opposite sex? During surgery, a male nurse sees and touches her as part of proper medical treatment. Liability for battery? Cohen v. Smith, 269 Ill.App. 3d 1087, 207 Ill.Dec. 873, 648 N.E.2d 329 (1995) (violation of plaintiffs right to bodily integrity by unconsented to touching is the essence of battery). What if the consent form states anesthesia will be administered by "a physician privileged to practice anesthesia" and

an EMT in training is permitted to do her first intubation on the patient? Mullins v. Parkview Hosp., Inc., 865 N.E.2d 608 (Ind. 2007) (battery claim stated against anesthesiologist but not student EMT who did not know that consent had not been obtained). What if patient, about to undergo an MRI, limits her consent to particular drugs--Demerol and morphine--because she is concerned about a possible allergic reaction. The nurse gives her fentanyl. Battery? Duncan v. Scottsdale Med. Imaging Ltd., 205 Ariz. 306, 70 P.3d 435 (2003) (rejecting argument that the patient consented to the administration of pain medication and therefore the nature of the procedure was the same no matter which drug was used). What if a patient withdraws her consent during the procedure? Schreiber v. Physicians Ins. Co. of Wisconsin, 223 Wis.2d 417, 588 N.W.2d 26 (1999) (withdrawal of consent means that physician must conduct new informed consent discussion, cannot continue to rely on previously given consent); Coulter v. Thomas, 33 S.W.3d 522 (Ky. 2000) (withdrawal of consent while medical procedure in progress must be unquestionable response from clear and rational mind and it must be medically feasible for doctor to stop).

7. May a competent, informed adult refuse medical treatment that is necessary to preserve life? Thor v. Superior Court, 5 Cal.4th 725, 855 P.2d 375, 21 Cal.Rptr.2d 357 (1993) (right to refuse treatment not limited to those who are suffering from terminal conditions).

8. Brother Joseph Fox, an 83-year-old member of the Marianists, a Roman Catholic order, had previously expressed a desire not to have his life artificially prolonged by extraordinary means of

treatment if there was no reasonable hope for recovery. During surgery to repair a hernia, he suffered permanent brain damage due to cardiac arrest. Was his refusal of extraordinary means of treatment (a respirator) still effective after he became incompetent? Matter of Storar, 52 N.Y.2d 363, 438 N.Y.S.2d 266, 420 N.E.2d 64, cert, denied, 454 U.S. 858 (1981). This issue is resolved in many jurisdictions by statutory provisions for "living wills" or "advance directives" that state the patient's consent and limitations on treatment.

9. When plaintiff refused to consent to a transfusion on religious grounds, the court in Application of the President and Directors of Georgetown College, 331 F.2d 1000 (D.C.Cir.1964), granted a declaratory judgment to proceed, with the judge who issued the emergency order finding that the patient felt that the blood transfusion would not be her responsibility if the judge ordered the transfusion. A similar request was denied in In re Osborne, 294 A.2d 372 (D.C.App.1972), where a bedside hearing disclosed that the patient would regard a transfusion under any circumstances as violative of his religious beliefs. See also Stamford Hospital v. Vega, 236 Conn. 646, 674 A.2d 821 (1996) (patient competent to make decisions entitled to refuse blood transfusion even if that decision is fatal).

10. What happens if health care personnel ignore a "do not resuscitate order"? If the patient (or his family) has a cause of action for battery, what is the measure of damages? Campbell v. Delbridge, 670 N.W.2d 108 (Iowa 2003) (plaintiff entitled to emotional distress damages for unauthorized transfusion); Anderson v. St. Francis-St. George Hospital, Inc., 77 Ohio St.3d 82, 671 N.E.2d 225 (1996)

(where the battery was physically harmless, plaintiff entitled only to nominal damages, not compensatory damages for wrongful living or wrongful prolongation of life.) See also Oddi, The Tort of Interference with the Right to Die: The Wrongful Living Cause of Action, 75 Geo. L. J. 625 (1986) and Milani, Better Off Dead Than Disabled?: Should Courts Recognize a "Wrongful Living" Cause of Action When Doctors Fail to Honor Patients' Advance Directives?, 54 Wash. & Lee L. Rev. 149 (1997).

11. All of the cases above assume an adult plaintiff. In the case of a minor child, consent of the parent is necessary for any medical procedure, except in an emergency. Zoski v. Gaines, 271 Mich. 1, 260 N.W. 99 (1935) (9!4 years) (tonsillectomy); Bonner v. Moran, 126 F.2d 121 (D.C.Cir.1941) (15 years) (skin graft). A minor 17 or 18 years of age, however, has been held capable of legally consenting, at least to minor procedures, Gulf & S.I.R. Co. v. Sullivan, 155 Miss. 1, 119 So. 501 (1928) (smallpox vaccination), but not to major ones, Lacey v. Laird, 166 Ohio St. 12, 139 N.E.2d 25 (1956) (nose job). Is consent from a parent necessary to prescribe contraception? The right of mature teenage females to give or withhold consent to abortions is

governed by statute in most jurisdictions and the statutes, in turn, must fall within constitutional parameters.

12. When a parent refuses on religious or other grounds to allow a hospital to provide medical treatment for a child, courts are likely to grant a hospital's application to overrule the parent if the treatment is for a life threatening condition, but not if it will only improve the

child's comfort or appearance. Compare In re Sampson, 29 N.Y.2d 900, 328 N.Y.S.2d 686, 278 N.E.2d 918 (1972) (approving) with In re Green, 448 Pa. 338, 292 A.2d 387 (1972) (disallowing).

13. Can parents "consent" on behalf of their child to be a donor in a transplant operation for the benefit of a sibling? See Hart v. Brown, 29 Conn.Supp. 368, 289 A.2d 386 (1972) (approving parents' consent to have one twin donate a kidney to the other). Can a guardian consent to an incompetent's donation of an organ? See Strunk v. Strunk, 445 S.W.2d 145 (Ky.1969) (approving donation by mentally incompetent adult to his brother, noting that because of their close relationship the donor's well-being would be more jeopardized by the loss of his brother than the loss of his kidney). Can a parent consent to a child's participation in nontherapeutic research in which there is a risk of injury or damage to the health of the child? Grimes v. Kennedy Krieger Institute, Inc., 366 Md. 29, 782 A.2d 807 (2001) (parent cannot consent). Does the mother's consent to an abortion prevent the child who was injured by the failed abortion from bringing a personal injury action against the physician? Vandervelden v. Victoria, 177 Wis.2d 243, 502 N.W.2d 276 (App.1993) (no battery action on behalf of child because parent had consented to procedure).

De May v. Roberts

Supreme Court of Michigan, 1881.

46 Mich. 160, 9 N.W. 146.

MARTSON, C.J. The declaration in this case in the first count sets forth that the plaintiff was at a time and place named a poor married

woman, and being confined in child-bed and a stranger, employed in a professional capacity defendant De May who was a physician; that defendant visited the plaintiff as such, and against her desire and intending to deceive her wrongfully, etc., introduced and caused to be present at the house and lying-in room of the plaintiff and while she was in the pains of parturition the defendant Scattergood, who intruded upon the privacy of the plaintiff, indecently, wrongfully and unlawfully laid hands upon her and assaulted her, the said Scattergood, which was well known to defendant De May, being a young unmarried man, a stranger to the plaintiff and utterly ignorant of the practice of medicine, while the plaintiff believed that he was an assistant physician, a competent and proper person to be present and to aid her in her extremity. ***

The evidence on the part of the plaintiff tended to prove the allegations of the declaration. On the part of the defendants evidence was given tending to prove that Scattergood very reluctantly accompanied Dr.

118

De May at the urgent request of the latter; that the night was a dark and stormy one, the roads over which they had to travel in getting to the house of the plaintiff were so bad that a horse could not be rode or driven over them; that the doctor was sick and very much fatigued from overwork, and therefore asked the defendant Scattergood to accompany and assist him in carrying a lantern, umbrella and certain articles deemed necessary upon such occasions; that upon arriving at the house of the plaintiff the doctor knocked, and when the door was opened by the husband of the plaintiff, De May said to him "that

I had fetched a friend along to help carry my things;" he, plaintiff's husband, said all right, and seemed to be perfectly satisfied. They were bid to enter, treated kindly and no objection whatever made to the presence of defendant Scattergood. That while there Scattergood, at Dr. De May's request, took hold of plaintiffs hand and held her during a paroxysm of pain, and that both of the defendants in all respects throughout acted in a proper and becoming manner actuated by a sense of duty and kindness. ***

Dr. De May therefore took an unprofessional young unmarried man with him, introduced and permitted him to remain in the house of the plaintiff, when it was apparent that he could hear at least, if not see all that was said and done, and as the jury must have found, under the instructions given, without either the plaintiff or her husband having any knowledge or reason to believe the true character of such third party. It would be shocking to our sense of right, justice and propriety to doubt even but that for such an act the law would afford an ample remedy. To the plaintiff the occasion was a most sacred one and no one had a right to intrude unless invited or because of some real and pressing necessity which it is not pretended existed in this case. The plaintiff had a legal right to the privacy of her apartment at such a time, and the law secures to her this right by requiring others to observe it, and to abstain from its violation. The fact that at the time, she consented to the presence of Scattergood supposing him to be a physician, does not preclude her from maintaining an action and recovering substantial damages upon afterwards ascertaining his true character. In obtaining admission at such a time and under such circumstances without fully disclosing his true character, both parties were guilty of deceit, and

the wrong thus done entitles the injured party to recover the damages afterwards sustained, from shame and mortification upon discovering the true character of the defendants. ***

Judgment for plaintiff affirmed.

NOTES AND QUESTIONS

1. The court says that the plaintiff consented to Scattergood's presence "supposing him to be a physician" and that the defendants introduced him without "fully disclosing his true character." In order for a consent to be valid, how much does defendant have to disclose? What if the plaintiff asks no questions? Under what circumstances can consent be assumed?

119

Breast cancer patient, on a routine visit to her oncologist's office, is shown into a private examining room. Her doctor arrives, accompanied by another man, who is introduced as someone who is following his work. She says nothing. Following her doctor's instructions, she disrobes and he examines her breasts and lower abdomen in the other man's presence. As she leaves the office, she asks the receptionist who the other man is and is told he is a "drug salesman." Consent? Cf. Sanchez-Scott v. Alza Pharmaceuticals, 86 Cal.App.4th 365, 103 Cal.Rptr.2d 410 (2001) (because true status of drug company representative was not disclosed to patient, no consent was implied by failure to object).

2. Defendant calls on plaintiff, a woman with an artificial leg, in her house. Representing himself to be a doctor referred by the company that made her leg, he induces her to remove her dress, expose her

person, and to permit him to touch her. He is in fact a doctor, but of theology. Battery? Cf. Commonwealth v. Gregory, 132 Pa.Super. 507, 1 A.2d 501 (1938) (consent not valid because defendant led plaintiff to belief he was a physician when he was not). Defendant gives plaintiff some chocolate candy, which contains an irritant poison. In ignorance of this fact, plaintiff eats the candy, and is made ill. Is there liability for a battery? Cf. Commonwealth v. Stratton, 114 Mass. 303, 19 Am.Rep. 350 (1873) (consent not valid because defendant did not disclose the food had been laced with "love powder"). Defendant represents himself to be a licensed physician, but he is not. Cf. Taylor v. Johnston, 985 P.2d 460 (Alaska 1999) (battery claim may lie if person falsely claiming to be physician touches patient, even for purpose of providing medical treatment). O'Brien v. Synnott, 193 Vt. 546, 72 A.3d 331 (Vt. 2013) (consent not valid because nurse in hospital did not disclose that blood draw was for law enforcement analysis rather than medical treatment).

On the effect, in general, of fraud and mistake on consent, see Restatement (Second) of Torts § 892B (1979).

3. Suppose that A consents to sexual intercourse with B, in ignorance of the fact that B has a sexually transmitted disease. A contracts the disease. Has she a battery action against B? Kathleen K. v. Robert B., 150 Cal.App.3d 992, 198 Cal.Rptr. 273 (1984). Crowell v. Crowell, 180 N.C. 516, 105 S.E. 206 (1920); cf. De Vail v. Strunk, 96 S.W.2d 245 (Tex.Civ.App. 1936). A woman consents to sexual intercourse with a man only after he assured her that "I can't possibly get anyone pregnant," knowing that the statement was false. She then suffers an ectopic pregnancy and must undergo surgery, which saves her life but makes her sterile. Liability? Barbara

A. v. John G., 145 Cal.App.3d 369, 193 Cal.Rptr. 422 (1983). Does it make a difference if he also does not know? See McPherson v. McPherson, 712 A.2d 1043 (Me. 1998) (no liability because husband who infected wife with venereal disease neither knew nor had reason to know that he was infected). A wife consents to sexual intercourse with her husband, in ignorance of the fact that he is having an affair. After learning of the affair, she sues him for battery, claiming that her consent was obtained by fraud. Liability? Neal v. Neal, 125 Idaho 617, 873 P.2d 871 (1994) (plaintiff's battery claim should have gone to the jury on the issue of consent even though defendant husband proved that she also had consented to sexual intercourse after she learned of the affair).

4. Law Professor agrees to appear in the dunking booth at a law school fair. She was told that the proceeds would be donated to a fund to provide debt reduction for students who embark on public interest careers but later learned that the students spent the money on a fancy graduation reception for their parents. Consent valid? Consent induced by fraud or misrepresentation as to a collateral matter, rather than fraud as to the essential character of the act itself, will not invalidate consent. See Restatement (Second) of Torts §§ 55, 57 (1965).

5. "'Informed Consent." The doctrine of "informed consent" requires a physician or surgeon to disclose to the patient the risks of proposed medical or surgical treatment. If she does not do so, she may be liable when injury results from the treatment. In early cases, this liability was placed on the ground of battery, by analogy to De

May v. Roberts, and the cases in the preceding notes. Among the cases so holding have been Bang v. Charles T. Miller Hospital, 251 Minn. 427, 88 N.W.2d 186 (1958) and Gray v. Grunnagle, 423 Pa. 144, 223 A.2d 663 (1966). Around 1960, the failure to disclose the risk began to be treated as a breach of the doctor's professional duty, and hence as a matter of negligence. The cases now generally proceed on that basis. The matter is therefore treated in Chapter 4, Negligence. When the physician exceeds the boundaries of consent, the matter is still treated as battery as set forth in Mohr v. Williams.

6. Note that most of the "consent induced by fraud" cases involve battery. What if the underlying tort is trespass? Compare these two cases against ABC, which broadcasts PrimeTime Live. Plaintiff, an ophthalmic surgeon who owned several clinics, was approached by a producer of PrimeTime Live and told the show was doing a segment on cataract operations. The producer told plaintiff that the segment would not involve ambush interviews or undercover surveillance and would be fair and balanced. Plaintiff cooperated by permitting film crews and interviews of doctors, patients, and technicians at his clinic in Chicago. Unbeknownst to plaintiff, the producer also had dispatched seven undercover test "patients" equipped with concealed cameras to other clinic locations owned by plaintiff. The resulting show was very critical of the clinics. Plaintiff sued for trespass, claiming the consent given to the seven test patients with concealed cameras was induced by fraud. Liability? Desnick v. American Broadcasting Co., Inc., 44 F.3d 1345 (7th Cir.1995) (applying Illinois law) (no trespass because not an interference with the ownership or possession of land). Plaintiff, the Food Lion grocery store chain, was the target of a PrimeTime Live

exposé on meat handling. Employees of ABC created false identities and applied for work at several Food Lion stores. While working for Food Lion, they filmed various activities with hidden cameras. Food Lion sued for trespass, claiming its consent to the ABC employees' presence in its deli and meatpacking departments was obtained by fraud. Food Lion, Inc. v. Capital Cities/ABC, Inc., 194 F.3d 505 (4th Cir. 1999) (applying North and South Carolina law) (jury verdict of trespass affirmed). See also Copeland v. Hubbard Broadcasting, Inc., 526 N.W.2d 402 (Minn.App.1995) (reporter posing as student interested in observing veterinarian liable in trespass to pet owners

who allowed her in their home to observe). For a discussion of the invasion of privacy claims in these cases, see Chapter 18, Privacy.

7. Plaintiff is in a bar, so intoxicated that he does not know what he is doing when he agrees to "Indian wrestle" with defendant. Valid consent? Cf. Hollerud v. Malamis, 20 Mich.App. 748, 174 N.W.2d 626 (1969) (consent ineffective if plaintiff incapable of expressing rational will).

8. Consent to Illegal Activity. Plaintiff consented to participate in a prize fight, an illegal activity in that state. He died as a result of a blow received in the fight and his estate filed a battery claim against the other fighter who demurred on the basis of consent. Is consent to an illegal act a valid consent? Hart v. Geysel, 159 Wash. 632, 294 P. 570 (1930) (recognizing split of authority among jurisdictions as to whether consent to an illegal act is valid consent); Janelsins v. Button, 102 Md.App. 30, 648 A.2d 1039 (1994) (same). The question of when plaintiffs consent should be invalidated because defendant

violated a criminal statute may depend on several considerations: (a) the policy of denying compensation to an intentional wrongdoer who himself may have committed a crime and been injured as a result of it; (b) the effect of deterring him, and others like him, by denying him recovery if he gets hurt; (c) the effect of potential liability in deterring defendant and others like him; (d) the fact that plaintiff has after all been intentionally battered by defendant; (e) the policy expressed by the maxim, In pari delicto potior est conditio defendentis [In equal guilt, the position of the defendant is the stronger].

Even states that generally recognize the validity of consent to an illegal act will not deny recovery to those whom the statute making the conduct illegal was designed to protect. For example, plaintiff, a 15-year-old girl, consents to intercourse with a 50-year-old man in a state with criminal penalties for men who have sexual relations with children that age. Most courts have held plaintiffs consent to be ineffective. See Gaither v. Meacham, 214 Ala. 343, 108 So. 2 (1926). A competent adult woman, however, cannot maintain an action for her own seduction, even if intercourse between unmarried adults is illegal in the state. See Rouse v. Creech, 203 N.C. 378, 166 S.E. 174 (1932). Defendant provides plaintiffs decedent with sleeping pills, knowing he intends to use them to commit suicide. The state's criminal law prohibits both aiding and abetting suicide and attempted suicide. Schwartz, Civil Liability for Causing Suicide: A Synthesis of Law and Psychiatry, 24 Vand. L. Rev. 217, 220-222 (1971), evaluating the factors set forth above, suggests that a claim should be allowed.

2. Self-Defense

The privilege of self-defense is covered in Criminal Law, and detailed discussion must be left to that course. Cases involving tort liability are infrequent. When they arise, the criminal law rules are carried over and applied without much variation. The following brief summary will indicate how self-defense fits into the tort picture:

122

1. Existence of Privilege. Anyone is privileged to use reasonable force to defend himself against a threatened battery on the part of another. The recognition of this privilege came about 1400, and it always has been an affirmative defense to be pleaded and proved by the defendant. In some jurisdictions, the burden of proof is reversed if the defendant is a police officer. Then, plaintiff would have to show as his prima facie battery case that the use of force was unreasonable (and thus not privileged). See, for example, Edson v. City of Anaheim, 63 Cal.App.4th 1269, 74 Cal.Rptr.2d 614 (1998) (collecting cases from other jurisdictions). The trial court judge will make the initial determination whether a self-defense instruction is warranted by the facts. See, for example, Goldfuss v. Davidson, 79 Ohio St.3d 116, 679 N.E.2d 1099 (1997) in which the Supreme Court of Ohio approved the trial court judge's refusal to give a jury instruction on self-defense where defendant fired a shot from his kitchen window at two men who had broken in to his pole barn. Defendant and his family were inside the house with all the doors locked, the police had been called, the pole barn was a hundred feet from the house, and the men were running away when defendant fired.

2. Retaliation. The privilege is one of defense against threatened battery, and not one of retaliation. When the battery is no longer threatened, the privilege terminates; and thereafter the original victim himself becomes liable for battery. Germolus v. Sausser, 83 Minn. 141, 85 N.W. 946 (1901) (defendant had grabbed a whip away from plaintiff and then knocked him unconscious with it); cf. Drabek v. Sabley, 31 Wis.2d 184, 142 N.W.2d 798 (1966) (battery and false imprisonment of boy who had thrown a snowball at defendant).

Even if a person initially was an aggressor, once he has retreated he has a right to self-defense against the person he initially threatened. Edgar v. Emily, 637 S.W.2d 412 (Mo.App.1982) (After coming to his sister's house armed with a stick, defendant walked back to his car intending to leave. At that point, the sister's husband came out of the house and grabbed defendant's shirt sleeve, which ripped as he tried to leave. The two men began fighting and the sister came at defendant with a hatchet or hammer and hit him in the face with her fist. He then hit his sister with the stick).

3. Reasonable Belief. The privilege exists when the defendant reasonably believes that the force is necessary to protect himself against battery, even though there is in fact no necessity. This is an instance in which a reasonable mistake on the part of the actor will protect him. The reason that the rule in Ranson v. Kitner, page 26, is not applied is apparently the importance attached by the courts to "self-preservation as the first law of nature." Smith v. Delery, 238 La. 180, 114 So.2d 857 (1959) (newspaper delivery boy shot while retrieving his dog from the back of defendant's house); Bunten v. Davis, 82 N.H. 304, 133 A. 16

(1926) (defendant fired at plaintiff and his companions who were out riding around on the Fourth of July setting off fireworks).

A. Plaintiff and defendant were on bad terms. They met in the highway, and defendant accosted plaintiff, asking why plaintiff had been slandering him. Plaintiff, who had a reputation for shooting people, suddenly put his hand into his pocket. Defendant, believing that he was about to draw a revolver, struck him on the head with a cane and knocked him down. It was held that the jury should have been instructed that defendant was liable only if he did not have reasonable grounds to fear an immediate attack by plaintiff. Keep v. Quailman, 68 Wis. 451, 32 N.W. 233 (1887).

B. Defendant ejected from a dance an intoxicated individual named Noble, who had not paid his admission fee. Defendant was then informed that Noble was outside, "getting some bricks." Defendant stepped into the doorway, looking out into the darkness for Noble. At this moment, plaintiff, arriving late for the dance, came running rapidly up the steps, which were dimly lighted. Defendant, believing that he was being attacked by Noble, struck plaintiff and knocked him down the steps. Defendant was held not liable. Crabtree v. Dawson, 119 Ky. 148, 83 S.W. 557 (1904).

4. Provocation. Should insults, verbal threats, or opprobrious language justify the exercise of self-defense? Almost every court that has passed upon the question has held that they do not. See Crotteau v. Karlgaard, 48 Wis.2d 245, 179 N.W.2d 797 (1970) ("Get out of the way, you dumb son of a bitch"); Prell Hotel Corp. v. Antonacci, 86 Nev. 390, 469 P.2d 399 (1970) ("hateful, degrading

name"). In many states, the offending words can be introduced to oppose the imposition of punitive damages on the party claiming to have been provoked. Manning v. Michael, 188 Conn. 607, 452 A.2d 1157 (1982) (provocation does not justify battery but may limit liability to actual damages).

Although the general rule of law is relatively clear, its application in the context of a particular dispute may not be. If the abusive words are accompanied by an actual threat of physical violence reasonably warranting an apprehension of imminent bodily harm, one may be privileged to defend, (Silas v. Bowen, 277 F.Supp. 314 (D.S.C.1967)); and one does not have to wait for the blow to fall before acting, (Martin v. Estrella, 107 R.I. 247, 266 A.2d 41 (1970)). Further, when accompanied by an overt hostile act, oral abuse may amount to a challenge to fight and thus may constitute consent in some jurisdictions. Restatement (Second) of Torts § 69 (1965).

5. Amount of Force. The privilege is limited to the use of force that is or reasonably appears to be necessary for protection against a threatened battery. Differences in age, size and relative strength are proper considerations. Thus, a 5'6", 135-pound middle-aged man was permitted to ward off a 6'6", 230-pound young athlete with a shot aimed near his feet. Silas v. Bowen, 277 F.Supp. 314 (D.S.C.1967) (it missed and

hit plaintiff). Similarly a small ten-year-old was permitted to throw a broom at a larger ten-year-old in McDonald v. Terrebonne Parish School Bd., 253 So.2d 558 (La.App.1971), cert, denied, 260 La. 128, 255 So.2d 353 (1971) (it missed and took out plaintiffs eye). But a

teenage boy engaged in a fistfight with another was not justified in using a baseball bat to protect himself from threatened injury in Andrepont v. Naquin, 345 So.2d 1216 (La.App.1977).

6. Use of Deadly Force. To justify resistance with a deadly weapon, defendant must have a reasonable apprehension of loss of life or great bodily injury. See Greenberg v. Mobil Oil Corp., 318 F.Supp. 1025 (N.D.Tex.1970). Generally, defendant has the burden of proving that the use of force was reasonable under the circumstances, although some jurisdictions shift the burden to the plaintiff if the defendant is a police officer. See, for example, Edson v. City of Anaheim, 63 Cal.App.4th 1269, 74 Cal.Rptr.2d 614 (1998) (collecting cases from other jurisdictions).

Retreat Before Use of Deadly Force. One basic disagreement in approach to the privilege of self-defense focuses on whether the defendant must retreat if he can do so without increasing his danger, rather than stand his ground and use deadly force. All agree that he may stand his ground and use any force short of that likely to cause serious injury. The English common law rule was that, rather than kill his assailant or seriously wound him, defendant must first "retreat to the wall" unless defendant is in his dwelling place. A minority of the American courts still apply this rule, and it is adopted by the Restatement (Second) of Torts § 65 (1965). The Restatement provides that the victim may use deadly force if there is the slightest reasonable doubt that the retreat can be safely made, and "in determining whether his doubt is reasonable every allowance must be made for the predicament in which his assailant has placed him." Restatement (Second) of Torts § 65, comment g. The majority of courts, on the other hand, have insisted upon a higher importance of

the dignity and honor of the individual and have held that the defendant may stand his ground and use deadly force, and even kill his assailant without having first to retreat. A recent wave of legislation goes even further, extending the area in which one can stand his ground and use deadly force to include any place where he has a right to be, no longer limiting it to his home or place of work. Some of those statutes apply only to criminal prosecution while others also affect civil (tort) liability as well. See, for example, Fla. Stat. Ann. § 776.013(3) and 18 Pa. C.S.A. § 505(b). Florida's statute, which grants "immunity" in both criminal and civil cases, has been interpreted to require a separate showing of entitlement to immunity in each type of case arising from the same incident. Kumar v. Patel, 227 So.3d 557 (Fla. 2017) (determination of immunity by judge in criminal case is not controlling in subsequent civil case arising out of the same bar fight).

7. Injury to Third Party. A small number of cases have dealt with the situation in which the defendant, defending himself against A,

unintentionally harms B instead. The privilege of self-defense is carried over, and the defendant is held not to be liable to B in the absence of some negligence toward him. And in determining whether there is negligence, the emergency, and the necessity of defense against A, are to be considered. Morris v. Platt, 32 Conn. 75 (1864); Shaw v. Lord, 41 Oki. 347, 137 P. 885 (1914). Cf. Thompson v. Beliauskas, 341 Mass. 95, 167 N.E.2d 163 (1960) (defense of property).

3. Defense of Others

1. Nature of Privilege. A privilege similar to that of self-defense is recognized for the defense of third persons. The early English common law recognized a feudal privilege in the master of the household to defend members of his family and his servants against attack. Most of the cases have involved members of the same family defending one another, or the relation of master and servant, as in Frew v. Teagarden, 111 Kan. 107, 205 P. 1023 (1922), but the privilege is not so limited.

As in the case of self-defense, the closest questions concern whether defendant used reasonable force in the circumstances. For cases upholding the privilege, see e.g., Boyer v. Waples, 206 Cal.App.2d 725, 24 Cal.Rptr. 192 (1962) (plaintiff, who had previously made serious threats to members of defendant's family and was seen outside the defendant's home at night with an object in hand that looked like dynamite, but was, in fact, a flashlight, was shot and wounded); McCullough v. McAnelly, 248 So.2d 7 (La.App.1971), cert, denied, 259 La. 748, 252 So.2d 451 (1971) (three teenaged boys attacked defendant's son and would not desist when warned; father shot and wounded one). Compare Lopez v. Surchia, 112 Cal.App.2d 314, 246 P.2d 111 (1952) (defendant shot boy who was fighting with defendant's son on front lawn--force exceeded privilege).

2. Reasonable Mistake. One question over which the courts have differed is that of the effect of a reasonable mistake as to the necessity for taking action. Some courts hold that the intervenor steps into the shoes of the person he is defending, and is privileged only when that person would be privileged to defend himself. If it turns out that he has intervened to help the aggressor, he is liable.

Robinson v. Decatur, 32 Ala.App. 654, 29 So.2d 429 (1947); cf. State v. Wenger, 58 Ohio St.2d 336, 390 N.E.2d 801 (Ohio 1979) (in criminal prosecution of bystander who struck plain clothes police officer making lawful arrest, court cited tort law that defendant had privilege only to extent that the one he was defending would have had). Other courts hold that the defendant is privileged to use reasonable force to defend another even when he is mistaken in his belief that intervention is necessary, so long as his mistake was reasonable. The Restatement (Second) of Torts § 76 (1965) has adopted this position.

126

4. Defense of Property

Katko v. Briney

Supreme Court of Iowa, 1971.

183 N.W.2d 657.

MOORE, Chief Justice. The primary issue presented here is whether an owner may protect personal property in an unoccupied boarded-up farm house against trespassers and thieves by a spring gun capable of inflicting death or serious injury.

We are not here concerned with a man's right to protect his home and members of his family. Defendants' home was several miles from the scene of the incident to which we refer infra.

Plaintiffs action is for damages resulting from serious injury caused by a shot from a 20-gauge spring shotgun set by defendants in a bedroom of an old farm house which has been uninhabited for

several years. Plaintiff and his companion ***had broken and entered the house to find and steal old bottles and dated fruit jars which they considered antiques. ***

The jury returned a verdict for plaintiff and against defendants for $20,000 actual and $10,000 punitive damages.

After careful consideration of defendants' motions for judgment notwithstanding the verdict and for new trial, the experienced and capable trial judge overruled them and entered judgment on the verdict. Thus we have this appeal by defendants. ***

[Caption: Mr. and Mrs. Edward Briney in front of their vacant farmhouse near Oskaloosa, Iowa.]

[The house was inherited from Mrs. Briney's grandparents and had been unoccupied for some time. There had been a series of intrusions and thefts.] Defendants through the years boarded up the windows and doors in an attempt to stop the intrusions. They had posted "no trespass" signs

on the land several years before 1967. The nearest one was 35 feet from the house. On June 11, 1967 defendants set "a shotgun trap" in the north bedroom. After Mr. Briney cleaned and oiled his 20-gauge shotgun, the power of which he was well aware, defendants took it to the old house where they secured it to an iron bed with the barrel pointed at the bedroom door. It was rigged with wire from the doorknob to the gun's trigger so it would fire when the door was opened. Briney first pointed the gun so an intruder would be hit in the stomach but at Mrs. Briney's suggestion it was lowered to hit the

legs. He admitted he did so "because I was mad and tired of being tormented" but "he did not intend to injure anyone." He gave no explanation of why he used a loaded shell and set it to hit a person already in the house. Tin was nailed over the bedroom window. The spring gun could not be seen from the outside. No warning of its presence was posted. ***

[Plaintiff] entered the old house by removing a board from a porch window which was without glass. ***As he started to open the north bedroom door the shotgun went off striking him in the right leg above the ankle bone. Much of his leg, including part of the tibia, was blown away. Only by ***assistance [from his accomplice] was plaintiff able to get out of the house and after crawling some distance was put in his vehicle and rushed to a doctor and then to a hospital. He remained in the hospital 40 days. ***

[Caption: Plaintiff Marvin E. Katko.]

There was undenied medical testimony plaintiff had a permanent deformity, a loss of tissue, and a shortening of the leg. ***

128

The main thrust of defendants' defense in the trial court and on this appeal is that "the law permits use of a spring gun in a dwelling or warehouse for the purpose of preventing the unlawful entry of a burglar or thief." ***

Instruction 6 stated: "An owner of premises is prohibited from willfully or intentionally injuring a trespasser by means of force that either takes life or inflicts great bodily injury; and therefore a person owning a premise is prohibited from setting out 'spring guns' and like

dangerous devices which will likely take life or inflict great bodily injury, for the purpose of harming trespassers. The fact that the trespasser may be acting in violation of the law does not change the rule. The only time when such conduct of setting a 'spring gun' or a like dangerous device is justified would be when the trespasser was committing a felony of violence or a felony punishable by death, or where the trespasser was endangering human life by his act." ***

The overwhelming weight of authority, both textbook and case law, supports the trial court's statement of the applicable principles of law. ± * *

Restatement of Torts § 85, 180, states: "The value of human life and limb, not only to the individual concerned but also to society, so outweighs the interest of a possessor of land in excluding from it those whom he is not willing to admit thereto that a possessor of land has, as is stated in § 79, no privilege to use force intended or likely to cause death or serious harm against another whom the possessor sees about to enter his premises or meddle with his chattel, unless the intrusion threatens death or serious bodily harm to the occupiers or users of the premises. ***A possessor of land cannot do indirectly and by a mechanical device that which, were he present, he could not do immediately and in person. Therefore, he cannot gain a privilege to install, for the purpose of protecting his land from intrusions harmless to the lives and limbs of the occupiers or users of it, a mechanical device whose only purpose is to inflict death or serious harm upon such as may intrude, by giving notice of his intention to inflict, by mechanical means and indirectly, harm which he could not, even after request, inflict directly were he present." *k * *

The facts in Allison v. Fiscus, 156 Ohio St. 120, 100 N.E.2d 237, decided in 1951, are very similar to the case at bar. There plaintiffs right to damages was recognized for injuries received when he feloniously broke a door latch and started to enter defendant's warehouse with intent to steal. As he entered a trap of two sticks of dynamite buried under the doorway by defendant owner was set off and plaintiff seriously injured. The court held the question whether a particular trap was justified as a use of reasonable and necessary force against a trespasser engaged in the commission of a felony should have been submitted to the jury. The Ohio Supreme Court recognized plaintiffs right to recover punitive or exemplary damages in addition to compensatory damages. ***

129

In addition to civil liability many jurisdictions hold a landowner criminally liable for serious injuries or homicide caused by spring guns or other set devices. [Cc] ***

[The court declined to rule on whether punitive damages were allowable because defendant's attorney had not raised that issue in the trial court.]

Study and careful consideration of defendants' contentions on appeal reveal no reversible error.

Affirmed.

LARSON, Justice [dissented, noting that the trial judge's instructions "failed to tell the jury it could find the installation was not made with the intent or purpose of striking or injuring the plaintiff," that the principle espoused by the court had never been applied to a burglar,

but only "in the case of a mere trespasser in a vineyard," and that punitive damages should not be allowed where the injured party's conduct was criminal.]

Notes and Questions

1. Katko pled guilty to petty larceny and received a 30-day suspended sentence and a $50 fine. The Brineys had to sell 80 acres of their 120-acre farm in order to pay the judgment in this case. A strange development later arose between the parties. When the 80 acres were put up for judgment sale and there were no bids above the minimum price of $10,000, three neighbors borrowed money to purchase the land for a dollar more, expecting to hold it for the Brineys until they won their appeal. When they did not win, the neighbors leased the land back to them for enough to pay taxes and interest costs on the money the neighbors had borrowed. Several years later when land values rose, the neighbors offered to sell it back to Brineys at a price they could not afford. One of the neighbors then bought the property from the others for $16,000 and sold it to his son for $16,500. The Brineys and Katko, to whom the Brineys still owed money from the judgment, then sued the neighbors, arguing that the land was being held in trust for the Brineys and that they were therefore entitled to the profit from the increase in value. Just before the case came to trial, it was settled for a sum large enough to pay the remainder of Brineys' judgment to Katko. Further background about the case can be found in Palmer, Katko v. Briney: A Study in American Gothic, 56 Iowa L.Rev. 1219 (1971).

2. The United Press International (UPI) reported the results of the trial court decision in this case, stating in part that Katko was "shot

and seriously injured in the home of Mr. and Mrs. Edward Briney." (Emphasis added.) A public outcry about the decision resulted in the introduction of "Briney Bills" in several state legislatures. The Nebraska Legislature enacted a self-defense act that provided in part that "no person ***shall be placed in ***jeopardy ***for protecting, by any means necessary, himself, his family, or his real or personal property ***." The statute was held to be unconstitutional by the Supreme Court of Nebraska on the ground of

improper delegation of sentencing authority. See State v. Goodseal, 186 Neb. 359, 183 N.W.2d 258 (1971), cert, denied, 404 U.S. 845 (1971).

3. The privilege to defend one's land against an intruder is limited to unlawful intrusions. Thus, there is no privilege to use force to defend against those who are authorized to enter. Magnuson v. Billmayer, 189 Mont. 458, 616 P.2d 368 (1980) (land owner not justified in using force to stop workers removing telephone poles where telephone company had easement). Possessor who used force to defend property in a reasonably mistaken belief that he was entitled to privilege is not protected unless the intruder in some way misled the possessor as to his identity or authorization.

4. As in the case of self-defense, the privilege to defend property is limited to the use of force reasonably necessary to the situation as it appears to the defendant. What constitutes reasonable force is normally a question for the jury, but there are several recognized limitations. When the invasion is peaceful and occurs in the presence of the possessor, the use of any force at all will be

unreasonable unless a request has been made to depart. Chapell v. Schmidt, 104 Cal. 511, 38 P. 892 (1894) (defendant caned elderly person who had entered defendant's yard and was picking flowers); Emmons v. Quade, 176 Mo. 22, 75 S.W. 103 (1903) (mill worker used a club on a twelve-year-old boy who was trying to scoop up grain that had been left in a railroad car after it was unloaded). A request does not have to be made, however, when the conduct of the intruder would indicate to a reasonable person that it would be useless or that it could not safely be made in time. See Higgins v. Minaghan, 78 Wis. 602, 47 N.W. 941 (1891) (mob approaching house firing guns in air, shouting, and drumming on pans).

5. Use of Force Calculated to Cause Death or Serious Injury. The principal case caused a good deal of discussion about when, if ever, force calculated to cause death or serious injury may be utilized to defend property. Cases involving burglars or thieves attempting to recover from their intended victims are rare.

A. In Hott v. Wilkes, 3 B. & Aid. 304, 106 Eng.Rep. 674 (1820), it was held that a landowner who placed spring guns on his land to keep off poachers was not liable to a trespasser who was shot. The result of this decision was a storm of public disapproval, which led to an act of Parliament making the setting of such devices a crime. In Bird v. Holbrook, 4 Bing. 628, 130 Eng.Rep. 911 (1828), a case which arose before the statute was passed, but was decided afterward, the court overruled the Ilott case and a defendant who set a spring gun was held liable to a trespasser.

B. Most American courts, including the Iowa Supreme Court, and the Restatement (Second) of Torts § 85 (1965) have followed Bird v.

Holbrook. Many jurisdictions have placed the restrictions on the use of deadly force in their state statutory codes. See statutes collected in Posner, Killing or Wounding to Protect a Property Interest, 14 J.L. & Econ. 201, 228-232 (1971).

C. The general rule prohibiting deadly force is modified in some states if defendant gives the plaintiff clear notice of the danger. See Starkey v. Dameron, 92 Colo. 420, 21 P.2d 1112 (1933) (dictum); State v. Marfaudille,

131

48 Wash. 117, 92 P. 939 (1907). This is especially likely to occur when defendant's use of force involved a vicious dog. See Hood v. Waldrum, 58 Tenn.App. 512, 434 S.W.2d 94 (1968); Sappington v. Sutton, 501 P.2d 814 (Oki. 1972). Compare Loomis v. Terry, 17 Wend. 496, 31 Am.Dec. 306 (N.Y. 1837) (no warning, defendant liable). Barbed wire may give notice in and of itself. See Quigley v. Clough, 173 Mass. 429, 53 N.E. 884 (1899). What privilege is operating in these cases? In most jurisdictions, even posted warnings will not protect the landholder if he would not be privileged to use this amount of force were he there in person. See State v. Plumlee, 177 La. 687, 149 So. 425 (1933); State v. Childers, 133 Ohio St. 508, 14 N.E.2d 767 (1938). See Restatement (Second) of Torts § 84, comment e (1965).

D. When the invader threatens the personal safety of the defendant or his family, the defendant may use deadly force if it is necessary in the circumstances. This is likely to occur when the invader attempts to enter the homestead at night. See Tipsword v. Potter, 31 Idaho

509, 174 P. 133 (1918); Coleman v. New York & N.H.R. Co., 106 Mass. 160 (1870).

E. There also is a privilege to use reasonable force to prevent the commission of a crime. With a serious felony, the amount of permissible force is greater, and some states have permitted deadly force. See Tex. Civ. Prac. & Rem. Code Ann. § 83.001 (crime prevention statute provides immunity from civil suit for defendant who uses deadly force to prevent certain crimes, including kidnapping, murder, sexual assault, and robbery) and Ariz. Rev. Stat. §§ 13--411 and 13--413 (no civil liability for person using deadly force to prevent certain crimes, including arson of an occupied structure, burglary in the first or second degree, manslaughter, sexual conduct with a minor, child molestation, and armed robbery). In those jurisdictions that do not permit the use of deadly force to defend property, would it make a difference if the property was a government laboratory where deadly biological agents were stored for research?

F. What if the landholder claims that he intended only to frighten and not to injure the intruder? How does this correlate with the doctrine of transferred intent? See Allison v. Fiscus, 156 Ohio St. 120, 100 N.E.2d 237 (1951) (defendant argued that he did not think the two sticks of dynamite buried in the floor of tool shed would injure anyone). In Goldfuss v. Davidson, 79 Ohio St.3d 116, 679 N.E.2d 1099 (1997), defendant yelled at men he saw running away from his pole barn and fired from his kitchen window warning shots "over their heads" to try to get them to stop until the police arrived. One of the men was killed by the shots and his father filed a wrongful death action against defendant. The court found no prejudicial error in the

trial court judge's instruction that the jury was to determine whether defendant's discharge of a firearm was reasonably necessary to prevent the theft of his property. The jury awarded $150,000 to the estate of the thief.

6. The limitations on the possessor's privilege may also restrict his power to eject the plaintiff from his property into a position of unreasonable physical danger. Thus, a teenager stealing a ride on a railroad train cannot be thrown off at thirty miles an hour. Chesapeake & O. Ry. Co. v. Ryan's Adm'r, 183 Ky. 428, 209 S.W. 538 (1919). In Depue v. Flateau, 100 Minn. 299, 111 N.W. 1 (1907), plaintiff, a travelling cattle buyer, called at

defendant's farmhouse on a cold winter evening, and was asked to stay for dinner. After dinner plaintiff was overcome by a "fainting spell," and became very weak and seriously ill. He asked permission to stay overnight, which was refused. Defendant led him out to his sleigh, put him into it, adjusted the robes around him, and threw the reins, which he was too weak to hold, over his shoulders. Defendant then started the horses on the road to town. Plaintiff was found the following morning by the side of the road about three- quarters of a mile away, badly frost-bitten, and nearly frozen to death. Case was permitted to go to the jury. Suppose the landowner places a drunken guest in his car to go home? Or hotel security ejects drunken and disorderly guests from its premises in the middle of the night? See Westin v. Groh, 347 P.3d 606 (Colo. 2015) (hotel may be responsible for harm to intoxicated guest ejected into a foreseeably dangerous environment. Whether a foreseeably dangerous environment existed

at the time of eviction depends on the guest's physical state and the conditions into which guest was evicted, including the time, the surroundings, and the weather.).

7. On the other hand, if the plaintiff's presence endangers the personal safety of those on the premises, the privilege of self-defense, or that of defense of third persons, may justify the ejection. In Tucker v. Burt, 152 Mich. 68, 115 N.W. 722 (1908), plaintiff, the mother-in-law of the janitor of an apartment house, fell ill with a highly contagious disease. Defendant, the owner of the building, ejected her. It was held that defendant was not liable. One of the interesting facts about Tucker v. Burt is that the plaintiff's description of her trip from her daughter's apartment (from which she was ejected by defendant landlord) to her own apartment includes walking a block to the street car stop, two street car rides (including a transfer), and then walking two blocks to her apartment. She obviously exposed many more people to her illness during the trip than she would have had she stayed put at her daughter's apartment. How could that point be used in the case to support a public policy argument in favor of plaintiff's recovery from her daughter's landlord?

5. Recovery of Property

1. Nature of Privilege. The privilege of an owner dispossessed of a chattel to use force to recapture it appears to have been first recognized in cases in which there was only a momentary interruption of his possession, so that it was easy to regard him as in effect defending his original possession rather than interfering with that of another. This was extended later to situations in which the

wrongdoer had obtained the chattel by force or fraud, and had made his escape with it, but the pursuit was "fresh." These limitations have continued to be applied to the privilege. As to the requirement of force or fraud, see Watson v. Rheinderknecht, 82 Minn. 235, 84 N.W. 798 (1901) (in breach of contract action--no force or fraud--defendant seller not entitled to take back his sheep from buyer).

2. Fresh pursuit is limited to prompt discovery of the dispossession, and prompt and persistent efforts to recover the chattel.

133

Any undue lapse of time during which the pursuit has not been commenced, or has come to a halt, will mean that the owner is no longer privileged to fight himself back into possession, but must resort to the law. Restatement (Second) of Torts § 103. A resort to any force at all will not be justified until a demand has been made for the return of the property; but this is not required when it reasonably appears that demand would be useless or dangerous. Restatement (Second) of Torts § 104.

3. The privilege is limited to force reasonable under the circumstances. Hamilton v. Barker, 116 Mich. 684, 75 N.W. 133 (1898) (defendant could use only the force necessary to recover the plums gathered from his tree by plaintiff). As in the case of the defense of possession, it is not reasonable to use force calculated to inflict serious bodily harm to protect a property interest. Gortarez v. Smitty's Super Valu, Inc., 140 Ariz. 97, 680 P.2d 807 (1984) (shopowner's use of a choke hold on teenage boy after chasing him in parking lot because of suspected shoplifting was not reasonable). Restatement (Second) of Torts § 106. If the wrongdoer resists, the

owner may use any force reasonably required to prevent the property from being taken and to defend his own person. Gyre v. Culver, 47 Barb. (N.Y.) 592 (1867) (persistent efforts of plaintiff to take the wood she had gathered from defendant's property even after defendant had taken it from her justified use of additional force by defendant).

4. How much force would be reasonable to defend a pet? During an argument, defendant's former girlfriend grabbed his small dog and took it to her car, refusing to release it even after defendant kicked her car. Defendant then pulled plaintiffs hair and hit her in the face with a closed fist. Reasonable? Cf. Raynes v. Rogers, 183 Vt. 513, 955 A.2d 1135 (2008) (in considering whether protective order under abuse-prevention statute should issue, court discusses privilege to defend property (the dog) but does not decide whether this was reasonable force).

Bonkowski v. Arlan's Department Store

Court of Appeals of Michigan, 1968.

12 Mich.App. 88, 162 N.W.2d 347.

NEAL E. Fitzgerald, Judge. This appeal from a jury verdict for false arrest and slander, rendered against the defendant store whose agent stopped and questioned the plaintiff whom he suspected of larceny, surprisingly presents questions that are novel to the appellate courts of this jurisdiction.

The plaintiff, Mrs. Marion Bonkowski, accompanied by her husband, had left the defendant's Saginaw, Michigan store about 10:00 p.m.

on the night of December 18, 1962 after making several purchases, when Earl Reinhardt, a private policeman on duty that night in the defendant's store, called to her to stop as she was walking to her car about 30 feet

away in the adjacent parking lot. Reinhardt motioned to the plaintiff to return toward the store and when she had done so, Reinhardt said that someone in the store had told him the plaintiff had put three pieces of costume jewelry into her purse without having paid for them. Mrs. Bonkowski denied she had taken anything unlawfully, but Reinhardt told her he wanted to see the contents of her purse. On a cement step in front of the store, plaintiff emptied the contents of her purse into her husband's hands. The plaintiff produced sales slips for the items she had purchased, and Reinhardt, satisfied that she had not committed larceny, returned to the store.

Plaintiff brought this action against Earl Reinhardt and Arlan's Department Store, seeking damages on several counts. She complains that as a result of defendant's tortious acts she has suffered numerous psychosomatic symptoms, including headaches, nervousness, and depression. Arlan's Department Store filed a third-party complaint against Earl Reinhardt's employer, Gerald Kaweck, doing business as Michigan Security Police Service, who defaulted. On the counts of false arrest and slander the case went to the jury, who returned a verdict of $43,750. The defendant's motions for judgment notwithstanding the verdict, remittitur, and new trial were denied by the trial court. ***

We conclude the plaintiff established a case entitling her to go to the jury on a charge of false arrest. [The court first concluded that the private policeman Reinhardt was the agent of defendant department store, which was responsible for his acts.]

To the common-law tort of false arrest, privilege is a common-law defense, and we recognize as applicable here a privilege similar to that recognized by the American Law Institute in the Restatement (Second) of Torts. In section 120A, the Institute recognizes a privilege in favor of a merchant to detain for reasonable investigation a person whom he reasonably believes to have taken a chattel unlawfully. We adopt the concept embodied in section 120A, and we state the rule for this action as follows: if defendant Arlan's agent, Earl Reinhardt, reasonably believed the plaintiff had unlawfully taken goods held for sale in the defendant's store, then he enjoyed a privilege to detain her for a reasonable investigation of the facts.

The Commissioners' [sic; Institute's] comment states the strong reason behind recognizing such a privilege:

"The privilege stated in this section is necessary for the protection of a shopkeeper against the dilemma in which he would otherwise find himself when he reasonably believes that a shoplifter has taken goods from his counter. If there were no such privilege, he must either permit the suspected person to walk out of the premises and disappear, or must arrest him, at the risk of liability for false arrest if the theft could not be proved." [C]

135

That the problem of shoplifting, faced by merchants, has reached serious dimensions is common knowledge, and we find compelling

reason to recognize such a privilege, similar to that recognized in other jurisdictions. [Cc]

In Montgomery Ward & Co., Inc., v. Freeman, the United States Court of Appeals for the Fourth Circuit, in a case arising in Virginia and involving a detention considerably longer than the detention here of [Mrs.] Bonkowski, reversed a verdict for the plaintiff because of the trial court's too narrow instruction on the point of justifiable detention and sent the case back, stating that "the instruction should submit the reasonableness of the detention to the jury and should set out the facts which, if found, would constitute reasonable grounds for the defendant's conduct." 199 F.2d 720, 724.

The privilege we recognize here goes beyond that set forth in the Restatement, for the Commissioners [sic] there stated a caveat that "the Institute expresses no opinion as to whether there may be circumstances under which this privilege may extend to the detention of one who has left the premises but is in their immediate vicinity." [C]

In their comment, the Commissioners [sic] state that, by their caveat, in the absence of express authority, they intended to leave the question open. [C] We think the privilege should be so extended here because we think it entirely reasonable to apply it to the circumstances of the case at bar, for the reason that a merchant may not be able to form the reasonable belief justifying a detention for a reasonable investigation before a suspected person has left the premises. In Montgomery Ward, supra, the court recognized the privilege as applicable even though the plaintiff was stopped by a manager after she had left the store.

On remand, on the cause for false arrest, therefore, it will be the duty of the jury to determine in accordance with the rule we have set down, whether or not the defendant's agent, Earl Reinhardt, reasonably believed the plaintiff had unlawfully taken any goods held for sale at the defendant's store. If the jury finds the defendant's agent did so reasonably believe, then it must further determine whether the investigation that followed was reasonable under all the circumstances. If the jury finds the defendant does not come within this privilege, then from the facts as discussed above, it could find a false arrest. ***

Reversed and remanded for new trial in accordance with this opinion. The award of costs to await final determination of the cause.

[In Bonkowski v. Arlan's Department Store, 383 Mich. 90, 174 N.W.2d 765 (1970), the Supreme Court of Michigan dismissed the false imprisonment claim on the ground that there was insufficient evidence that defendant intended to take plaintiff into custody, (see Chapter 2, Section 4. False Imprisonment, moral persuasion cases) but, in dictum, the court affirmed the existence of the privilege.]

136

NOTES AND QUESTIONS

1. Shoplifting is a major problem for merchants. It costs them, in the aggregate, hundreds of millions of dollars every year, which the public of course pays. It puts the merchant in the dilemma that, if he has the suspected person arrested he may be liable for false imprisonment if there was no theft or if a jury fails to convict, while if he does nothing, and permits the suspect to walk out, the merchandise and all hope of proof will disappear forever.

2. Although some states have adopted this privilege by case law (see Collyer v. S.H. Kress Co., 5 Cal.2d 175, 54 P.2d 20 (1936)), it is statutory in many jurisdictions. The scope of the privilege differs in the various states. The more important variables include the following:

A. Whether force can be utilized and, if so, how much? The Restatement would allow reasonable force short of bodily harm. A "request" to stay must be made if it is practicable to do so. See Restatement (Second) of Torts § 120A, comment k. If the merchant is not allowed to use force, is the privilege of any real benefit?

B. What constitutes "reasonable grounds" or "probable cause" to detain a shopper and whether that issue is to be decided by the court or a jury? See Moore v. Pay'N Save Corp., 20 Wash.App. 482, 581 P.2d 159 (1978) (court uses analogous probable cause reasoning from criminal cases); Turner v. Hudson Salvage, Inc., 709 So.2d 425 (Miss. 1998) (unreasonable for second employee to detain plaintiff after first employee had questioned her and determined she had not stolen shoes).

C. What constitutes a reasonable time or manner of detention? The Virginia statute specifies that the detention cannot exceed an hour. Va. Code § 18.2--105.1. Most courts would agree that defendant is liable when he demands a signed confession, and says that he will detain the plaintiff until it is signed. Moffatt v. Buffums' Inc., 21 Cal.App.2d 371, 69 P.2d 424 (1937); W.T. Grant Co. v. Owens, 149 Va. 906, 141 S.E. 860 (1928). Defendant also is liable when he threatens to detain the plaintiff until he pays. Cox v. Rhodes Avenue Hospital, 198 III.App. 82 (1916).

D. Whether the privilege should extend beyond the premises? Should the answer to this problem vary with the type of business in which the defendant is engaged?

E. Who is entitled to the privilege? Some states have extended the privilege beyond merchants to suppliers of services when defendant has failed to pay. See Standish v. Narragansett S.S. Co., Ill Mass. 512, 15 Am.Rep. 66 (1873) (boat ride).

3. The merchant's privilege usually does not extend to protection against an action for defamation. See Chapter 17.

137

6. Necessity

Surocco v. Geary

Supreme Court of California, 1853.

3 Cal. 69, 58 Am.Dec. 385.

MURRAY, Chief Justice. This was an action, commenced in the court below, to recover damages for blowing up and destroying the plaintiffs' house and property, during the fire of the 24th of December, 1849.

Geary, at that time Alcalde of San Francisco, justified, on the ground that he had authority, by virtue of his office, to destroy said building, and also that it had been blown up by him to stop the progress of the conflagration then raging.

It was in proof, that the fire passed over and burned beyond the building of the plaintiffs', and that at the time said building was

destroyed, they were engaged in removing their property, and could, had they not been prevented, have succeeded in removing more, if not all of their goods.

The cause was tried by the court sitting as a jury, and a verdict rendered for the plaintiffs, from which the defendant prosecutes this appeal under the Practice Act of 1850.

The only question for our consideration is, whether the person who tears down or destroys the house of another, in good faith, and under apparent necessity, during the time of a conflagration, for the purpose of saving the buildings adjacent, and stopping its progress, can be held personally liable in an action by the owner of the property destroyed. ***

The right to destroy property, to prevent the spread of a conflagration, has been traced to the highest law of necessity, and the natural rights of man, independent of society or civil government. "It is referred by moralists and jurists to the same great principle which justifies the exclusive appropriation of a plank in a shipwreck, though the life of another be sacrificed; with the throwing overboard goods in a tempest, for the safety of a vessel; with the trespassing upon the lands of another, to escape death by an enemy. It rests upon the maxim, Necessitas inducit privilegium quod jura privata" [Necessity provides a privilege for private rights].

The common law adopts the principles of the natural law, and places the justification of an act otherwise tortious precisely on the same ground of necessity. [C]

This principle has been familiarly recognized by the books from the time of the saltpetre case, and the instances of tearing down houses

to prevent a conflagration, or to raise bulwarks for the defense of a city, are made use of as illustrations, rather than as abstract cases, in which its exercise is permitted. At such times, the individual rights of property give way to the higher laws of impending necessity.

138

A house on fire, or those in its immediate vicinity, which serve to communicate the flames, becomes a nuisance, which it is lawful to abate, and the private rights of the individual yield to the considerations of general convenience, and the interests of society. Were it otherwise, one stubborn person might involve a whole city in ruin, by refusing to allow the destruction of a building which would cut off the flames and check the progress of the fire, and that, too, when it was perfectly evident that his building must be consumed. ***

The counsel for the respondent has asked, who is to judge of the necessity of the destruction of property?

This must, in some instances, be a difficult matter to determine. The necessity of blowing up a house may not exist, or be as apparent to the owner, whose judgment is clouded by interest, and the hope of saving his property, as to others. In all such cases the conduct of the individual must be regulated by his own judgment as to the exigencies of the case. If a building should be torn down without apparent or actual necessity, the parties concerned would undoubtedly be liable in an action of trespass. But in every case the necessity must be clearly shown. It is true, many cases of hardship may grow out of this rule, and property may often in such cases be destroyed, without necessity, by irresponsible persons, but this

difficulty would not be obviated by making the parties responsible in every case, whether the necessity existed or not.

The legislature of the State possess the power to regulate this subject by providing the manner in which buildings may be destroyed, and the mode in which compensation shall be made; and it is to be hoped that something will be done to obviate the difficulty, and prevent the happening of such events as those supposed by the respondent's counsel.

In the absence of any legislation on the subject, we are compelled to fall back upon the rules of the common law.

The evidence in this case clearly establishes the fact, that the blowing up of the house was necessary, as it would have been consumed had it been left standing. The plaintiffs cannot recover for the value of the goods which they might have saved; they were as much subject to the necessities of the occasion as the house in which they were situate; and if in such cases a party was held liable, it would too frequently happen, that the delay caused by the removal of the goods would render the destruction of the house useless.

The court below clearly erred as to the law applicable to the facts of this case. The testimony will not warrant a verdict against the defendant.

Judgment reversed.

NOTES AND QUESTIONS

1. Defendant is fighting a forest fire that threatens an entire county. From an airplane he sprays fire-retardant chemicals onto plaintiff's

land, which damage plaintiff's timber. Is defendant liable? Cf. Stocking v. Johnson

139

Flying Service, 143 Mont. 61, 387 P.2d 312 (1963). During floods along the Mississippi River, the town of Prairie du Rocher, Illinois blew up a levee, deliberately flooding a plain north of town to relieve pressure on another levee protecting the historic town. According to newspaper reports, the dynamiting of the levee saved the town but ruined farmland above the town because the floodwaters carried away the rich topsoil. Could the owner of the farm recover for the loss to that property? See Lev, " 'Trap' Appears to Hold Back Flood From Town," Chicago Tribune (Aug. 5, 1993), available at 1993 WLNR 4083897.

2. Defendant, a public officer, burns the clothing worn by a person who has died of smallpox. Is he liable to the heir, who would have been the new owner of the clothing? Cf. Seavey v. Preble, 64 Me. 120 (1874) (physician orders removal of wall paper from room of smallpox patient); State v. Mayor of Knoxville, 80 Tenn. 146, 47 Am.Rep. 331 (1883) (clothing and beds used by smallpox patients, whether they recovered or died, were directed to be burnt); Juragua Iron Co. v. U.S., 212 U.S. 297 (1909) (U.S. military destroyed buildings to destroy all places of occupation or habitation which might contain yellow fever germs). Putnam v. Payne, 13 Johns. (N.Y.) 312 (1816) (shooting mad dog in the street). South Dakota Dept, of Health v. Heim, 357 N.W.2d 522 (S.D.1984) (state destroyed plaintiffs herd of elk, which were suffering from a contagious disease).

3. In December, 1941, the United States Army destroyed stored petroleum, terminal facilities, and vital parts of the plant of an oil company in Manila, in order to prevent them from falling into the hands of the advancing Japanese army. It was held that this was privileged use of the police power and not a compensable taking for public use. United States v. Caltex, Inc., 344 U.S. 149 (1952). Contra, that the Crown has no such privilege, Burmah Oil Co., Ltd. v. Lord Advocate, [1964] 2 All E.R. 348. Plaintiff Burmah Oil was unable to enforce the judgment in its favor, however, due to Parliament's passage of the War Damage Act 1965 that retroactively exempts the Crown from paying compensation for damage from "acts lawfully done by, or on the authority of, the Crown during, or in contemplation of the outbreak of, a war in which the Sovereign was, or is, engaged."

4. To be privileged, must the defendant be a public officer? In Harrison v. Wisdom, 54 Tenn. 99 (1872), private citizens of the town of Clarksville, Tenn., destroyed all the liquor in the town just before the entry of the Union army. It was held that the court properly charged the jury that if they found that there was imminent danger, and a real public necessity, this was privileged. To the same effect is Restatement (Second) of Torts §§ 196 and 262. Suppose it only appeared to be necessary?

5. Even if the "champion of the public" is not liable, should not the city or other community, whose interests he protects, be required to make compensation to the plaintiff? See Hall and Wigmore, Compensation for Property Destroyed to Stop the Spread of a Conflagration, 1 III.L.Rev. 501 (1907), written just after the San Francisco earthquake of 1906 and Wegner v. Milwaukee Mutual Ins.

Co., 479 N.W.2d 38 (Minn. 1991) (holding municipality liable for damage done to plaintiff's house by SWAT team using

tear gas and "flash-bang" grenades to force out suspected felon who had taken refuge there). Some jurisdictions have provided for compensation by statute.

6. Constitutional provisions against taking private property for public use without due compensation do not apply to action under the police power to protect the public against the spread of contagious diseases or devastating fires and floods or other exigencies. See, e.g., Kelley v. Story County Sheriff, 611 N.W.2d 475 (Iowa 2000) (claim by owner of rental property for damage done by sheriff's office while breaking in to make an arrest was not a taking of private property under Iowa Constitution but exercise of police power for which there could be no recovery); Customer Co. v. City of Sacramento, 10 Cal.4th 368, 895 P.2d 900, 41 Cal.Rptr.2d 658 (1995) (rejecting claim under just compensation clause of California Constitution of owner of convenience store that was substantially damaged by SWAT team attempting to flush out fugitive); and Lech v. Johnson, 791 Fed. Appx. 711 (10th Cir. 2019) (Colorado law that provided no compensation to family whose home was rendered uninhabitable by police actions during standoff with home invader was action under police powers and thus did not violate the Takings Clause of either the state or federal Constitutions). The Government must show that the danger to the public was imminent and the taking was a necessity, not just a convenience. See TrinCo Inv. Co. v. United States, 722 F.3d 1375 (Fed. Cir. 2013) (landowner seeking

compensation for timber lost due to Forest Service's intentionally lighting of fires to manage a group of wildfires) and Brewer v. State of Alaska, 341 P.3d 1107, 1118 (Alaska 2014) (firefighters acting at direction of State Dept, of Forestry set fire to landowners' vegetation) ("The essence of the doctrine is that the government is acting 'under pressure of public necessity and to avert impending peril' and chooses to damage private property as the lesser of two evils. It is that choice, in that moment, for which necessity may provide a defense.").

Vincent v. Lake Erie Transp. Co.

Supreme Court of Minnesota, 1910.

109 Minn. 456, 124 N.W. 221.

Action by R.C. Vincent and others against the Lake Erie Transportation Company. Verdict for plaintiffs. From an order denying a new trial, defendant appeals.

O'BRIEN, J. The steamship Reynolds, owned by the defendant, was for the purpose of discharging her cargo on November 27, 1905, moored to plaintiffs' dock in Duluth. While the unloading of the boat was taking place a storm from the northeast developed, which at about 10 o'clock p.m., when the unloading was completed, had so grown in violence that the wind was then moving at 50 miles per hour and continued to increase during the night. There is some evidence that one, and perhaps two, boats were able to enter the harbor that night, but it is plain that navigation was practically suspended from the hour mentioned until the morning of the 29th,

when the storm abated, and during that time no master would have been justified in attempting to navigate his vessel, if he could avoid

141

doing so. After the discharge of the cargo the Reynolds signaled for a tug to tow her from the dock, but none could be obtained because of the severity of the storm. If the lines holding the ship to the dock had been cast off, she would doubtless have drifted away; but, instead, the lines were kept fast, and as soon as one parted or chafed it was replaced, sometimes with a larger one. The vessel lay upon the outside of the dock, her bow to the east, the wind and waves striking her starboard quarter with such force that she was constantly being lifted and thrown against the dock, resulting in its damage, as found by the jury, to the amount of $500.

We are satisfied that the character of the storm was such that it would have been highly imprudent for the master of the Reynolds to have attempted to leave the dock or to have permitted his vessel to drift away from it. ***Nothing more was demanded of them than ordinary prudence and care, and the record in this case fully sustains the contention of the appellant that, in holding the vessel fast to the dock, those in charge of her exercised good judgment and prudent seamanship, w * *

The appellant contends by ample assignments of error that, because its conduct during the storm was rendered necessary by prudence and good seamanship under conditions over which it had no control, it cannot be held liable for any injury resulting to the property of others, and claims that the jury should have been so instructed. An analysis of the charge given by the trial court is not necessary, as in

our opinion the only question for the jury was the amount of damages which the plaintiffs were entitled to recover, and no complaint is made upon that score.

The situation was one in which the ordinary rules regulating property rights were suspended by forces beyond human control, and if, without the direct intervention of some act by the one sought to be held liable, the property of another was injured, such injury must be attributed to the act of God, and not to the wrongful act of the person sought to be charged. If during the storm the Reynolds had entered the harbor, and while there had become disabled and been thrown against the plaintiffs' dock, the plaintiffs could not have recovered. Again, if while attempting to hold fast to the dock the lines had parted, without any negligence, and the vessel carried against some other boat or dock in the harbor, there would be no liability upon her owner. But here those in charge of the vessel deliberately and by their direct efforts held her in such a position that the damage to the dock resulted, and, having thus preserved the ship at the expense of the dock, it seems to us that her owners are responsible to the dock owners to the extent of the injury inflicted. ***

In Ploof v. Putnam, 81 Vt. 471, 71 A. 188 (1908), the Supreme Court of Vermont held that where, under stress of weather, a vessel was without permission moored to a private dock at an island in Lake Champlain owned by the defendant, the plaintiff was not guilty of

trespass, and that the defendant was responsible in damages because his representative upon the island unmoored the vessel, permitting it to drift upon the shore, with resultant injuries to it. If, in

that case, the vessel had been permitted to remain, and the dock had suffered an injury, we believe the shipowner would have been held liable for the injury done.***

Let us imagine in this case that for the better mooring of the vessel those in charge of her had appropriated a valuable cable lying upon the dock. No matter how justifiable such appropriation might have been, it would not be claimed that, because of the overwhelming necessity of the situation, the owner of the cable could not recover its value.

This is not a case where life or property was menaced by any object or thing belonging to the plaintiff, the destruction of which became necessary to prevent the threatened disaster. Nor is it a case where, because of the act of God, or unavoidable accident, the infliction of the injury was beyond the control of the defendant, but is one where the defendant prudently and advisedly availed itself of the plaintiff's property for the purpose of preserving its own more valuable property, and the plaintiffs are entitled to compensation for the injury done.

Order affirmed.

[The dissenting opinion of LEWIS, J. is omitted.]

NOTES AND QUESTIONS

1. The cases all appear to be in agreement with the principal case concerning defendant's obligation to compensate plaintiff even though the intentional entry onto land was privileged and thus not tortious. See Newcomb v. Tisdale, 62 Cal. 575 (1881); Bohlen, Incomplete Privilege to Inflict Intentional Invasions of Interests of

Property and Personality, 39 Harv.L.Rev. 307 (1926); and Ripstein, Tort Law in a Liberal State, 1 J. of Tort Law, Iss. 2, Article 3 (2007) (discussing jurisprudential basis of incomplete privilege for trespass). See also Restatement (Second) of Torts, §§ 197 and 263. If defendant has not been at fault, why should he pay?

2. What result in the principal case if it was necessary to moor the vessel to allow crewmen to escape onto land? See Mouse's Case, 12 Co.Rep. 63, 77 Eng.Rep. 1341 (1609) (no compensation for loss of casket that was thrown overboard to keep the Gravesend to London ferry from capsizing during a great tempest).

3. A traveler upon the public highway is normally held to be privileged to turn out to avoid an obstruction (snowdrifts, ice, washouts, rock slides, downed tree), and to pass over the abutting land. Morey v. Fitzgerald, 56 Vt. 487, 48 Am.Rep. 811 (1884); Irwin v. Yeagar, 74 Iowa 174, 37 N.W. 136 (1888). See also Dodwell v. Missouri Pac. R. Co., 384 S.W.2d 643 (Mo. 1964) (boy crawling through train that blocked crossing); Ploof v. Putnam, 81 Vt. 471, 71 A. 188 (1908) (discussed in principal case).

143

4. Can a person who is homeless and moves into a vacant house use private necessity to defend against a trespass action? See London Borough of Southwark v. Williams, [1971] 1 Ch. 734, [1971] 2 All. E.R. 175 (rejecting necessity defense) and Restatement (Second) of Torts § 263 (1965) (requiring threat of serious, imminent harm). Can a protester use private necessity to defend against a trespass action? Cases, most involving criminal rather than civil trespass, consistently hold that necessity is not available to

trespassers making various protests against war, use of nuclear weapons, availability of abortions, and the draft.

5. An extortioner arrives at the office of business tycoon and threatens to drop a package of explosives if not paid $1 million. Business tycoon attempts to placate him, but when the negotiations fail, the extortioner drops the package and there is an explosion. Is the tycoon liable if he leaps behind a bystander and is thereby protected from the blast? If he pulls the bystander in front of himself? Cf. Laidlaw v. Sage, 158 N.Y. 73, 52 N.E. 679 (1899).

6. Should the necessity privilege ever extend to the intentional taking of life? In criminal law the answer has generally been "no." Thus, in Arp v. State, 97 Ala. 5, 12 So. 301 (1893), the court affirmed the trial court's refusal to allow the defendant to be excused on the basis that two other men armed with shotguns had been present and threatened to shoot him unless he killed the deceased. On the other hand, § 2.09 of the Model Penal Code permits duress as a defense if the force or threat of force was such that a person "of reasonable firmness in his situation would be unable to resist." Which is the better approach in tort law?

7. In Regina v. Dudley, 15 Cox C.C. 624, 14 Q.B.D. 273 (1884), four survivors of a shipwreck were adrift in an open boat, a thousand miles from land, and dying of hunger. Three of them killed the fourth, a boy, and ate him. They were held criminally liable for his death. See Simpson, Cannibalism and the Common Law (1984) for an interesting exploration of the social mores of the time and how those mores influence the law and vice versa. In United States v. Holmes, 1 Wall.Jr. 1, 26 Fed.Cas. 360 (E.D.Pa.1842), after a passenger ship

had hit an iceberg and sunk, nine members of her crew and thirty-two passengers were adrift in a badly overloaded lifeboat. The wind freshened, the sea began to rise, and the boat was in imminent danger of being swamped. The crew then threw overboard fourteen adult male passengers to lighten the boat. The following morning those remaining in the lifeboat were rescued by a passing ship. Holmes, who had taken a leading part in throwing the passengers over, was tried for manslaughter, convicted and sentenced to hard labor for six months. The president later remitted the sentence. The story is told in full in Hicks, Human Jettison (1927). What if the family members of those thrown overboard had sued Holmes for wrongful death? What should be the position of tort law in these situations?

8. For an exhaustive and most stimulating discussion about the theoretical jurisprudence of many of these problems, see Fuller, The Case of the Speluncean Explorers, 62 Harv.L.Rev. 616 (1949) and Robert Cover, Justice Accused: Antislavery and the Judicial Process (Yale University Press 1984 ed.).

7. Authority of Law

The defense of legal authority is a subject for a course in itself. It can only be touched on here. Police officers, military personnel, prison officials, regulatory inspectors, or officials at mental health facilities may act under authority of law, engaging in conduct that otherwise would be tortious. If the defendant is duly commanded or authorized by law to do what he does, he is of course not liable for doing it. The problem is to discover how far the legal sanction extends. For example, the police are privileged to enter a home to serve an arrest

warrant, but reporters accompanying them on a media ride-along are not. Wilson v. Layne, 526 U.S. 603 (1999) (because law had not been clear before decision, qualified immunity protected police officer).

Arrest

One common form of action under authority of law is arrest of the person, which consists of taking him into the custody of the law. An arrest may be made under a warrant, which is a signed order issued by a court directing that the person in question be arrested; or it may be made without a warrant.

Arrest under a warrant, or the seizure of goods under civil process, to which the same rules apply, is an act generally considered to be "ministerial," so that the officer is liable only if he acts improperly as, for example, by using excessive force. If the court issuing the warrant is entirely without jurisdiction to do it, it is commonly held that the invalid order affords the officer no protection. Warren v. Kelley, 80 Me. 512, 15 A. 49 (1888) (state court had no jurisdiction to issue attachment to enforce lien on seagoing vessel because admiralty jurisdiction is exclusive to federal court); Smith v. Hilton, 147 Ala. 642, 41 So. 747 (1906) (conversion action for bale of cotton that was seized pursuant to attachment order issued by man whose term as a justice of peace had expired). But if the court has general jurisdiction to issue similar process, it is generally held that the officer is privileged if the warrant is "fair on its face," even though there may have been errors and irregularities in its issuance that affected the jurisdiction of the court in the particular case. The officer does not have to investigate the propriety of a warrant that appears

valid. David v. Larochelle, 296 Mass. 302, 5 N.E.2d 571(1936) (officer is entitled to rely upon the face of his precept and is not expected to inquire into extrinsic facts which might render it invalid in the particular instance).

Even if the warrant is entirely valid, however, it does not protect the officer unless he actually carries out the order given him, even though he makes a perfectly reasonable mistake in good faith. Thus, an officer who has a warrant for the arrest of A, and who reasonably believes B to be A and arrests him, is liable to B for false arrest unless he can show that he acted with due diligence to identify the person arrested. After being stopped for speeding, Robert Pierson was told that there was an

outstanding warrant for the arrest of "Ronald Pierson" who sometimes went by the name "Robert." The description and birth date on the warrant matched, but the speeding driver claimed the fugitive was actually his twin brother who sometimes used his name. The officer, who had "heard that song before," arrested him anyway. Fingerprinting at the police station revealed Robert was telling the truth and he sued for false arrest after his release. Pierson v. Multnomah Cty., 301 Or. 48, 718 P.2d 738 (1986) (jury question whether police officer had met his burden of proving due diligence).

Arrest without a warrant may be made by a police officer, or by a private citizen. The common law imposed limitations upon the authority of each, with that of the private citizen, as might be expected, more narrowly restricted. The original common law rules concerning arrest without a warrant were as follows:

1. Either an officer or a citizen may arrest without a warrant to prevent a felony, or a breach of the peace (public offense done by violence or likely to cause an immediate disturbance of public order) that is being committed or reasonably appears about to be committed, in his presence.

2. An officer may make an arrest if he has information that affords reasonable grounds for thinking that a felony has been committed and that he has the right person. The citizen may arrest without a warrant if a felony has in fact been committed, and he has reasonable grounds to suspect the person arrested; but his authority depends upon the fact of the crime, and he must take the full risk if none has been committed.

3. For a past breach of the peace that is not a felony, an officer or a citizen may arrest without a warrant only if the offense was committed in his presence and he is in fresh pursuit.

4. For mere misdemeanors, the old common law rule was that neither the officer nor the citizen could arrest without a warrant. This has now been modified in some jurisdictions to extend the power to arrest to an officer if the misdemeanor was committed in his presence.

5. Even if an arrest was otherwise lawful, an officer may be subject to liability if he uses excessive force in the process of apprehending the suspect. Most of the cases focus on this issue.

The common law rules have been modified by statute in many jurisdictions.

8. Discipline

Parent and Child. There are a number of relationships in which the necessity of some orderly discipline gives persons who have the control of others the privilege of exercising reasonable force and restraint upon them. One of the most important examples of this privilege is that given to a parent or one who is deemed to stand in place of a parent. See Clasen v. Pruhs, 69 Neb. 278, 95 N.W. 640 (1903) (six-year-old child sent from

Germany to Nebraska to live with maternal aunt; aunt claimed discipline privilege in suit brought by child claiming aunt had whipped her); Fortinberry v. Holmes, 89 Miss. 373, 42 So. 799 (1907) (one caring for a child "who was to be taken and treated as one of the children of the family"). The scope of the privilege was rarely tested for many years because parents were immune from suits by their children. Interestingly enough, this very immunity was first recognized in a case where a court may have been unwilling to delineate the scope of the privilege of discipline. See Hewellette v. George, 68 Miss. 703, 9 So. 885 (1891) (claim of false imprisonment based on parent's confining daughter to mental institution). The Restatement suggests several factors to use to determine whether the conduct was within the privilege of discipline or falls outside of it: age, sex, and condition of child; nature of the child's offense and the apparent motive for it; influence of child's conduct as example on other children in same family; whether force or confinement is reasonably necessary and appropriate to compel obedience; whether it is disproportionate to the offense, unnecessarily degrading, or likely to cause serious or permanent harm. Restatement (Second) of Torts § 150 (1965).

Generally, the privilege of parents to discipline their children also covers those who are temporarily responsible for them. This may include other family members, teenage babysitters, adult daycare providers, housekeepers, piano teachers, school bus drivers, and others. The amount of force that is acceptable is less than what would be acceptable for a parent to use. Restatement (Second) of Torts § 150(a) (1965).

While some early decisions stated that a parent delegates his authority to discipline his child to a teacher when the youngster is in school, the teacher's privilege to discipline is more properly predicated on the need to maintain reasonable order in the classroom and other school facilities. See LaFrentz v. Gallagher, 105 Ariz. 255, 462 P.2d 804 (1969) (swearing at umpire during PE class); Suits v. Glover, 260 Ala. 449, 71 So.2d 49 (1954) (scuffling in school hallway). Thus discipline may be exercised even though the parent has objected. As is the case with Authority of Law, most litigation has concerned the scope of the privilege.

Generally, the conduct must occur on school grounds or during a school-sponsored trip although there is some case law that would extend the privilege to activities conducted away from school that have some connection with the educational program. Second, an instructor can use only reasonable and appropriate force and will be subject to liability if the force used is excessive. See Johnson v. Horace Mann Mut. Ins. Co., 241 So.2d 588 (La.App.1970) (PE teacher struck boy repeatedly with paddle, which broke during the whipping, for failing to line up properly to do 200 yard dash). Significant variables gleaned from the cases include (1) the nature of the punishment, (2) the conduct of the student, (3) the age and

physical condition of the student, and (4) the motive of the instructor, e.g., did he act in anger or out of dislike, rather than in an

147

attempt to discipline. See Story v. Martin, 217 So.2d 758 (La.App.1969) (in locker room after class, karate instructor struck plaintiff in anger, apparently misunderstanding what he had said); Tinkham v. Kole, 252 Iowa 1303, 110 N.W.2d 258 (1961) (teacher slapped seated plaintiff repeatedly, fracturing his eardrum, for failing to quickly remove the marching band gloves of a classmate). Finally, most school systems today tightly regulate the use of corporal punishment, so most of the litigation in this area involves interpretation of specific state statutes or school board regulations rather than the common law. See, for example, Rinehart v. Board of Education, 87 Ohio App.3d 214, 621 N.E.2d 1365 (1993) (Ohio statute provides immunity to teacher as long as teacher follows a particular protocol before paddling student).

Corporal punishment has been held not to violate the due process clause or the Eighth Amendment privilege against cruel and unusual punishment. Ingraham v. Wright, 430 U.S. 651 (1977) (child's liberty interest is subject to historical limitations expressed in the common law privilege).

Others. Other examples of the privilege of discipline are those of military and naval officers over their subordinates, which are largely governed by military law and dealt with by courts martial; and the authority of the master of a ship over both the crew and the passengers. Again the privilege, in the latter case, is limited to force reasonable under the circumstances; and the captain will be liable if

he puts a passenger in irons for calling him the landlord of a floating hotel. King v. Franklin, 1 F. & F. 360, 175 Eng.Rep. 764 (1858).

9. Justification

Sindle v. New York City Transit Authority

New York Court of Appeals, 1973.

33 N.Y.2d 293, 307 N.E.2d 245, 352 N.Y.S.2d 183.

JASEN, JUDGE. At about noon on June 20, 1967, the plaintiff, then 14 years of age, boarded a school bus owned by the defendant, New York City Transit Authority, and driven by its employee, the defendant Mooney. It was the last day of the term at the Elias Bernstein Junior High School in Staten Island and the 65 to 70 students on board the bus were in a boisterous and exuberant mood. Some of this spirit expressed itself in vandalism, a number of students breaking dome lights, windows, ceiling panels and advertising poster frames. There is no evidence that the plaintiff partook in this destruction.

The bus made several stops at appointed stations. On at least one occasion, the driver admonished the students about excessive noise and damage to the bus. When he reached the Annadale station, the driver discharged several more passengers, went to the rear of the bus,

inspected the damage and advised the [remaining] students that he was taking them to the St. George police station.

The driver closed the doors of the bus and proceeded, bypassing several normal stops. ***

The plaintiff, joined with his father, then commenced an action to recover damages for ***false imprisonment. ***At the close of the plaintiffs' case, the court denied defendants' motion to amend their answers to plead the defense of justification. The court also excluded all evidence bearing on the justification issue.

We believe that it was an abuse of discretion for the trial court to deny the motion to amend and to exclude the evidence of justification. It was the defendants' burden to prove justification--a defense that a plaintiff in an action for false imprisonment should be prepared to meet--and the plaintiffs could not have been prejudiced by the granting of the motion to amend. The trial court's rulings precluded the defendants from introducing any evidence in this regard and were manifestly unfair. Accordingly, the order of the Appellate Division must be reversed and a new trial granted.

In view of our determination, it would be well to outline some of the considerations relevant to the issue of justification. In this regard, we note that, generally, restraint or detention, reasonable under the circumstances and in time and manner, imposed for the purpose of preventing another from inflicting personal injuries or interfering with or damaging real or personal property in one's lawful possession or custody is not unlawful. (Cf. Penal Law, §§ 35.20, 35.25; see, also, General Business Law, § 218, which affords a retail merchant a defense to an action for false arrest and false imprisonment where a suspected shoplifter is reasonably detained for investigation or questioning.) Also, a parent, guardian or teacher entrusted with the

care or supervision of a child may use physical force reasonably necessary to maintain discipline or promote the welfare of the child. (Penal Law, § 35.10.)

Similarly, a school bus driver, entrusted with the care of his student-passengers and the custody of public property, has the duty to take reasonable measures for the safety and protection of both--the passengers and the property. In this regard, the reasonableness of his actions--as bearing on the defense of justification--is to be determined from a consideration of all the circumstances. At a minimum, this would seem to import, a consideration of the need to protect the persons and property in his charge, the duty to aid the investigation and apprehension of those inflicting damage, the manner and place of the occurrence, and the feasibility and practicality of other alternative courses of action. ***

For the reasons stated, the order of the Appellate Division should be reversed and the case remitted for a new trial.

149

NOTES AND QUESTIONS

1. What privileges did the court rely on by analogy? Are there others--not mentioned by the court--that might be relevant?

2. Can you think of other examples of conduct that might justify an apparent intentional tort although they do not fit within the traditional common law privileges discussed in this chapter? In Peterson v. Sorlien, 299 N.W.2d 123 (Minn. 1980), cert, denied, 450 U.S. 1031 (1981), the Supreme Court of Minnesota held that the parent-child relationship justified limitations the defendant parents placed upon

their adult child's mobility during "deprogramming" that would otherwise support a judgment of false imprisonment. See LeMoult, Deprogramming Members of Religious Sects, 46 Fordham L.Rev. 599, 635 (1978).

[BLANK PAGE]

CHAPTER 4 NEGLIGENCE

1. History

Negligence was scarcely recognized as a separate tort before the early part of the 19th Century. Prior to that time, the word had been used in a very general sense to describe the breach of any legal obligation, or to designate a mental element, usually one of inadvertence or inattention or indifference, entering into the commission of other torts. As a result, some writers once maintained that negligence was merely one way of committing any tort, just as some courts, for example, spoke occasionally of a "negligent battery," meaning a negligent touching that was harmful or offensive.

One of the earliest appearances of what we now know as the tort of negligence was in the liability of those who professed to be competent in certain "public" callings. A common carrier, an innkeeper, a blacksmith, or a surgeon was regarded as holding himself out to the public as one in whom confidence might be reposed, and hence as assuming an obligation to give proper service, for the breach of which, by any negligent conduct, he might be liable. But in other fields such as trespass and nuisance the idea developed, thinly disguised, that there might be liability for negligence; and in later years the action on the case produced a large, undigested group of situations in which negligence was the essence of the tort.

Somewhere around the year 1825, negligence began to emerge out of the action on the case, and to be recognized as a separate basis of tort liability, independent of other causes of action. Its rise

coincided to a marked degree with the Industrial Revolution in England. "It was probably stimulated a good deal by the enormous increase of industrial machinery in general and by the invention of railways in particular. At that time railway trains were notable neither for speed nor for safety. They killed any object from a Minister of State to a wandering cow, and this naturally reacted upon the law." P. Winfield, Law of Tort 404 (5th ed. 1950).

The separate recognition of negligence was undoubtedly greatly encouraged by the disintegration of the old forms of action, and the disappearance of the distinction between direct and indirect injuries, found in trespass and case. Intentional injuries, whether direct or indirect, began to be grouped as a distinct field of liability, and negligence took separate form as the basis for unintended torts. Today, it is widely recognized that distinct problems and principles, as well as distinct questions of policy, arise in negligence cases.

152

For more on the history of negligence in early law, and its development as an independent tort, see Winfield, The History of Negligence in the Law of Torts, 42 L.Q. Rev. 184 (1926); Wigmore, Responsibility for Tortious Acts: Its History, 7 Harv. L. Rev. 315, 441, 453 (1894); White, The Emergence and Doctrinal Development of Tort Law, 1870-1930, 11 LT. St. Thomas L.J. 463 (2014); and Langbein, Lerner, and Smith, History of the Common Law: The Development of Anglo-American Institutions (Walters Kluwer 2009).

2. Elements of Cause of Action

"Negligent" is the word often used to describe the conduct of the person being evaluated. But a cause of action for negligence requires more than negligent conduct. The traditional formula for the elements necessary to the cause of action includes the following:

1. A duty to use reasonable care. This is an obligation recognized by the law, requiring the actor to conform to a certain standard of conduct, for the protection of others against unreasonable risks of harm.

2. A failure to conform to the required standard. This is commonly called breach of the duty. These two elements make up what the courts refer to as negligent behavior; but the term frequently is applied to the second alone. Thus it may be said that the defendant was negligent (acted unreasonably), but is not liable because he was under no duty to the plaintiff to use reasonable care. Whether a duty is owed is a question of law for the court to decide. Whether the duty was breached is usually a question for the jury. See Cabral v. Ralphs Grocery Co., 51 Cal.4th 764, 122 Cal.Rptr.3d 313, 248 P.3d 1170,1175 (2011) ("we preserve the crucial distinction between a determination that the defendant owed the plaintiff no duty of ordinary care, which is for the court to make, and a determination that the defendant did not breach the duty of ordinary care, which in a jury trial is for the jury to make"). The judge, of course, can always determine (as he did in the next principal case) that no reasonable jury could find that the duty was breached under those circumstances.

3. A reasonably close causal connection between the conduct and the resulting injury. This is commonly called causation. Causation

involves a combination of two elements--causation in fact and legal or "proximate" causation. They receive separate treatment in Chapters 5 and 6.

4. Actual loss or damage resulting to the interests of another. The action for negligence developed chiefly out of the old form of action on the case; and it retained the rule of that action that pleading and proof of damage was an essential part of the plaintiff's case. Nominal damages to vindicate a technical right cannot be recovered in a negligence action if no actual damage has occurred. See, for example, Right v. Breen, 277 Conn. 364, 890 A.2d 1287 (2006) (reiterating common law rule allowing

recovery only upon proof of causation and actual damages where plaintiff's right was negligently--rather than intentionally--invaded). If defendant's risk-creating negligent conduct threatens but does not harm plaintiff, however, he may be able to obtain an injunction and stop the activity as a "nuisance." While the modern law of torts has retained the requirement that proof of damage is an essential part of the law of negligence, the question of what constitutes damage is less certain than it once was. Has the plaintiff suffered damage if the wrongful act causes her to fear that she will develop a disease in the future or reduces her chance of surviving a disease? See Chapter 10, Damages.

Although the negligence formula is useful in segregating and drawing attention to the elements of the cause of action the courts require, it is misleading to view the elements as discrete. None of the elements can really be defined except by reference to the others or

as always containing within each element the same concepts. Professor David Owen has counted about 30 states that divide up the elements into the four above and about 20 that organize them into a three-element construct of duty, breach, and injury proximately caused by breach. Professor Owen argues that the more precise way to conceptualize the elements is to divide into five categories, with cause in fact and proximate cause listed separately. Owen, The Five Elements of Negligence, 35 Hofstra L. Rev. 1671 (2007).

Another commonly used rubric for negligence is conduct that falls below the standard of care established by law for the protection of others against the unreasonable risk of harm. This is the wording of jury instructions in many jurisdictions. Kelley & Wendt, What Judges Tell Juries about Negligence: A Review of Pattern Jury Instructions, 77 Chi- Kent L. Rev. 587 (2002) (collecting and discussing pattern jury instructions on various negligence issues from all states).

Most of the cases in this chapter involve the allegedly negligent conduct of the defendant from whom the plaintiff is seeking compensatory damages. Sometimes, however, it is the plaintiff's conduct that is being measured against the standard of the reasonable person because the defendant has pled the affirmative defense of contributory negligence: the defendant is claiming the plaintiffs conduct was negligent and that the plaintiffs negligent conduct also contributed to the cause of plaintiff's injuries. Chapter 12, Defenses, will explore this affirmative defense in detail. For now, keep in mind that the standard--reasonable care under the circumstances--applies to all parties, whether they are plaintiffs or defendants in a particular case.

3. A Negligence Formula

Lubitz v. Wells

Superior Court of Connecticut, 1955.

19 Conn.Sup. 322, 113 A.2d 147.

TROLAND, Judge. The complaint alleges that James Wells was the owner of a golf club and that he left it for some time lying on the ground in the backyard of his home. That thereafter his son, the defendant James Wells, Jr., aged eleven years, while playing in the yard with the plaintiff, Judith Lubitz, aged nine years, picked up the golf club and proceeded to swing at a stone lying on the ground. In swinging the golf club, James Wells, Jr., caused the club to strike the plaintiff about the jaw and chin.

Negligence alleged against the young Wells boy is that he failed to warn his little playmate of his intention to swing the club and that he did swing the club when he knew she was in a position of danger.

In an attempt to hold the boy's father, James Wells, liable for his son's action, it is alleged that James Wells was negligent because although he knew the golf club was on the ground in his backyard and that his children would play with it, and that although he knew or "should have known" that the negligent use of the golf club by children would cause injury to a child, he neglected to remove the golf club from the backyard or to caution James Wells, Jr., against the use of the same.

The demurrer challenges the sufficiency of the allegations of the complaint to state a cause of action or to support a judgment against the father, James Wells.

It would hardly be good sense to hold that this golf club is so obviously and intrinsically dangerous that it is negligence to leave it lying on the ground in the yard. The father cannot be held liable on the allegations of this complaint. [Cc]

The demurrer is sustained.

NOTES AND QUESTIONS

1. Why might the boy be found negligent if the father was not?

2. Is a householder negligent for leaving in his backyard an object such as a baseball bat or a hose with a nozzle, which one child might pick up and swing at another? What if the object had been a hoe? A pitchfork? A loaded shotgun?

3. What result in the principal case if plaintiff had tripped over the golf club? Cf. Johnson v. Krueger, 36 Colo.App. 242, 539 P.2d 1296 (1975).

4. A twelve-year-old boy lost his eye from a pellet from a slingshot fired by his eleven-year-old playmate. Was it negligence to provide the slingshot to the boy by selling it to him? See Moning v. Alfono, 400 Mich. 425, 254 N.W.2d 759 (1977).

5. Defendant parks his car on the edge of a city street without a curb, in front of a house where a mother and a 13-month old toddler are sitting on a front porch, about 16 feet away. Defendant goes across

the street to visit a friend there. He comes back in 5 minutes, gets in the car and drives off. As he pulls away, there is a bump that he thought was a paving stone, but that turned out to be the toddler who had crawled under the car. Was driver negligent? Should he have checked under his car before pulling away from the curb? Williams v. Jordan, 208 Tenn. 456, 346 S.W.2d 583 (1961).

Blyth v. Birmingham Waterworks Co.

Court of Exchequer, 1856.

11 Exch. 781, 156 Eng.Rep. 1047.

[Defendants had installed water mains in the street, with fire plugs at various points. The plug opposite the plaintiff's house sprung a leak during a severe frost, because the connection between the plug and the water main was forced out by the expansion of freezing water. As a result, a large quantity of water escaped through the earth and into plaintiff's house, causing damage. The apparatus had been laid down 25 years ago, and had worked well during that time. The trial court left the question of defendant's negligence to the jury, which returned a verdict for plaintiff. Judgment was entered on the verdict, and defendant appealed.] ALDERSON, B. I am of opinion that there was no evidence to be left to the jury. The case turns upon the question, whether the facts proved show that the defendants were guilty of negligence. Negligence is the omission to do something which a reasonable man, guided upon those considerations which ordinarily regulate the conduct of human affairs, would do or doing something which a prudent and reasonable man would not do. The defendants might have been liable for negligence, if unintentionally, they omitted to do that which a reasonable person would have done,

or did that which a person taking reasonable precautions would not have done. A reasonable man would act with reference to the average circumstances of the temperature in ordinary years. The defendants had provided against such frosts as experience would have led men, acting prudently, to provide against; and they are not guilty of negligence, because their precautions proved insufficient against the effects of the extreme severity of the frost of 1855, which penetrated to a greater depth than any which ordinarily occurs south of the polar regions. Such a state of circumstances constitutes a contingency against which no reasonable man can provide. The result was an accident for which the defendants cannot be held liable.

Verdict to be entered for the defendants.

[The concurring opinions of MARTIN, B., and BRAMWELL, B., are omitted.]

156

NOTES AND QUESTIONS

1. In 1951, plaintiff's goods, in freight cars in the yards of defendant railroad company at Topeka, were destroyed by a flood that swept over the yards. There never had been any prior flood that had come anywhere near the yards; and when defendant first learned that the water was likely to reach them, it was too late to move the cars. Is defendant negligent in not moving them sooner? Ismert-Hincke Milling Co. v. Union Pacific R. Co., 238 F.2d 14 (10th Cir.1956) (applying Kansas law) (flood was much more severe and came much sooner than was anticipated by anyone due to unheard of torrential rains that fell without advance notice in the watershed).

During Hurricane Katrina, a casino barge floated free of its moorings and traveled roughly one mile, finally alliding with and coming to rest on top of the Biloxi Beachfront Hotel. Eli Investments, LLC v. Silver Slipper Casino Venture, LLC, 118 So. 3d 151 (Miss. 2013) (expert testified that storm surge caused by Hurricane Katrina was foreseeable in light of prior storm history in the Gulf of Mexico). At what point do changes in averages caused by climate change affect the standard of care?

2. Is a contractor building a skyscraper in Chicago required to take precautions against an earthquake? In San Francisco?

3. Could it be negligence to fail to take precautions against a stroke of lightning near an oil storage tank? Tex-Jersey Oil Corp. v. Beck, 292 S.W.2d 803 (Tex.Civ.App. 1956). On a golf course? Compare Hames v. State of Tennessee, 808 S.W.2d 41 (Tenn. 1991) (risk too remote) with Maussner v. Atlantic City Country Club, Inc., 299 N.J.Super. 535, 691 A.2d 826 (1997) (even remote risks can be foreseeable). What else would you like to know before deciding this?

4. To refill the gasoline tank on a tractor, a farm worker was removing the bunghole cap from a drum used to distribute gasoline when a spark caused by the damaged threads (from repeated hammering on it during its nine-year life) caused flames to burst from it. In the negligence action against the company that owned the drum and distributed the gasoline, witnesses claimed that "no such happening had ever before been heard of by them" and thus the owner should not be liable for failing to anticipate the danger. Gulf Refining v. Williams, 183 Miss. 723, 185 So. 234 (1938) (affirming jury verdict for the plaintiff because the defendants knew (or should have known)

of the condition of the bunghole cap and that such condition gave rise to a risk of harm even if they were not aware of incidents where the exact risk had manifested itself).

Pipher v. Parsell

Supreme Court of Delaware, 2007.

930 A.2d 890.

HOLLAND, Justice. The plaintiff-appellant, Kristyn Pipher ("Pipher"), appeals from the Superior Court's judgment as a matter of law in favor of the defendant-appellee, Johnathan Parsell ("Parsell"). Pipher argues that the Superior Court erred when it ruled that, as a matter of law,

157

Parsell was not negligent. We agree and hold that the issue of Parsell's negligence should have been submitted to the jury.

Facts

On March 20, 2002, around 6 p.m., Pipher, Parsell and Johnene Beisel ("Beisel"), also a defendant, [3] were traveling south on Delaware Route 1 near Lewes, Delaware, in Parsell's pickup truck. All three were sitting on the front seat. Parsell was driving, Pipher was sitting in the middle, and Beisel was in the passenger seat next to the door. They were all sixteen-years-old at the time.

* * *

[3] Pipher was awarded $70,150.00 in damages against Beisel. However, Beisel was not located before, during, or after trial.

As they were traveling at 55 mph, Beisel unexpectedly "grabbed the steering wheel causing the truck to veer off onto the shoulder of the road." Parsell testified that Beisel's conduct caused him both shock and surprise. Although Beisel's conduct prompted him to be on his guard, Parsell further testified that he did not expect Beisel to grab the wheel again. Nevertheless, his recognition of how serious Beisel's conduct was, shows he was aware that he now had someone in his car who had engaged in dangerous behavior.

Parsell testified that he did nothing in response to Beisel's initial action. Approximately thirty seconds later, Beisel again yanked the steering wheel, causing Parsell's truck to leave the roadway, slide down an embankment and strike a tree. Pipher was injured as a result of the collision.

Pipher's testimony at trial was for the most part consistent with Parsell's testimony. Pipher recalled that the three occupants in the vehicle were talking back and forth and that the mood was light as they drove south on Route 1. She also testified that after Beisel yanked the steering wheel for the first time, Parsell was able to regain control of the truck. According to Pipher, despite the dangerous nature of the conduct, Parsell and Beisel just laughed about it like it was a joke. Pipher testified she felt that Beisel grabbed the steering wheel a second time because Parsell "laughed it off' the first time.

At trial, Parsell acknowledged that he could have taken different steps to try to prevent Beisel from grabbing the steering wheel a second time. First, Parsell acknowledged, he could have admonished Beisel not to touch the steering wheel again. Second,

he acknowledged that he could have pulled over to the side of the road and required Beisel to get into the back seat. Third, Parsell acknowledged that he could have warned Beisel that he would put her out of the vehicle.

The trial judge concluded that, as a matter of law, Parsell had no duty to do anything after Beisel yanked the wheel the first time because it would be reasonable for the driver to assume that it would not happen again. The trial judge also ruled that (1) there was no negligence in

158

failing to discharge the dangerous passenger and (2) that failing to admonish the dangerous passenger was not negligence. ***

Duty of Driver

A "driver owes a duty of care to her [or his] passengers because it is foreseeable that they may be injured if, through inattention or otherwise, the driver involves the car she [or he] is operating in a collision." [C] Almost forty-five years ago, this Court held that a minor who operates a motor vehicle on the highways of Delaware will be held to the same standard of care and "must accord his [or her] own passengers the same diligence and protection which is required of an adult motorist under similar circumstances." ***

Pipher argues that after Beisel grabbed the steering wheel initially, Parsell was on notice that a dangerous situation could reoccur in the truck. Pipher further argues that once Parsell had notice of a possibly dangerous situation, he had a duty to exercise reasonable care to protect his passengers from that harm. Finally, Pipher

concludes that Parsell was negligent when he kept driving without attempting to remove, or at least address, that risk.

In a similar case, the Supreme Court of Vermont held a driver was liable for damages resulting from the passenger seizing the driver's arm. [C] In that case, a drunken passenger known for being a "playful fellow," and having previously attempted to shake hands with the driver of the vehicle over the course of fifteen minutes, then seized the arm of the driver, causing the vehicle to collide with a farm wagon. The Vermont Court held that the knowledge the passenger was "a playful fellow" and had in the course of the ride "persisted in trying to shake hands" with the driver "should have forecast the peril of an accident to an operator of reasonable prudence and vigilance." [Cc] In such cases, the driver is expected to make a reasonable attempt to prevent the passenger from taking such actions again.

In general, where the actions of a passenger that cause an accident are not foreseeable, there is no negligence attributable to the driver. [C] But, when actions of a passenger that interfere with the driver's safe operation of the motor vehicle are foreseeable, the failure to prevent such conduct may be a breach of the driver's duty to either other passengers or to the public. [Cc] Under the circumstances of this case, a reasonable jury could find that Parsell breached his duty to protect Pipher from Beisel by preventing Beisel from grabbing the steering wheel a second time.

Conclusion

The issue of Parsell's alleged breach of duty to Pipher, the foreseeability of Beisel's repeat conduct, and the proximate cause of Pipher's injuries were all factual determinations that should have

been submitted to the jury. [C] Accordingly, the judgment of the Superior

159

Court, that was entered as a matter of law, is reversed. This matter is remanded for further proceedings in accordance with this opinion.

NOTES AND QUESTIONS

1. Note that the passenger who grabbed the wheel also was a defendant in the case. What would the cause of action against her have been?

2. Why does the Delaware Supreme Court refer to a Vermont case?

3. Do you think the Delaware Supreme Court would have ruled that the case should have gone to the jury if the accident had occurred the first time the passenger grabbed the wheel?

4. The court's ruling suggests that the sixteen-year-old driver had 30 seconds (between the first and second grabs) to do something to prevent the passenger from grabbing the wheel the second time. Should the driver's age and inexperience be taken into account in evaluating his response? This issue will be explored in the next section, at page 187.

5. In Tullgren v. Amoskeag Mfg. Co., 82 N.H. 268, 133 A. 4 (1926), defendant escorted an employee with a "sick headache" part way home and left her to walk about 700 feet over a difficult road. On reaching her home she died. On motion for rehearing after reversing a directed verdict for defendant, the court said in part: "Danger consists in the risk of harm, as well as the likelihood of it, and a danger calling for anticipation need not be of more probable

occurrence than less. If there is some probability of harm sufficiently serious that ordinary men would take precautions to avoid it, then failure to do so is negligence. That the danger will more probably than otherwise not be encountered on a particular occasion does not dispense with the exercise of care. One who crosses a railroad track may not reasonably anticipate that a train will in fact be met but, by reason of the risk that one may be, he is called upon to do what is reasonably required to find out. In going around a sharp turn on a highway, where the view is obstructed, a driver may be careless toward opposite travel in speed or other ways, though the probabilities may be against meeting any one. If the chance is so great that ordinary men would drive differently, then it is careless not to do so. ***The test is not of balance of probabilities, but of the existence of some probability of sufficient moment to induce action to avoid it on the part of a reasonable mind."

6. Could there be an unreasonable risk of harm in mislabeling a bottle of water as "kerosene"? In Pease v. Sinclair Refining Co., 104 F.2d 183 (2d Cir.1939), plaintiff, a high school science teacher, wrote to defendant requesting an advertised free "science exhibit," consisting of bottles of petroleum products. Defendant sent him the exhibit and plaintiff, in preparation for a classroom demonstration, poured what was labeled "kerosene" onto metallic sodium to preserve it. Unfortunately, the bottle actually contained water, which caused an explosion seriously injuring the teacher. Do you see how the circumstances can make a difference?

7. The toilet in a railway coach car was heated by steam passing through an uninsulated iron pipe that went around the corner under the

wash basin and a water cooler. Plaintiff, a passenger, fainted and fell with her face against the pipe, seriously burning it. Is the railroad negligent? Hauser v. Chicago, Rhode Island & Pacific Ry., 205 Iowa 940, 219 N.W. 60 (1928) (not unreasonable to fail to insulate pipe that ran underneath the wash basin and water cooler).

8. Bartender allowed an Akita (large dog that stood three feet high) to remain in the bar. Dog bit one of the customers in the face. Negligence? Rowland v. Log Cabin, Inc., 2003 S.D. 20, 658 N.W.2d 76 (2003) ("Whether a reasonable person would have realized that a large, unknown dog roaming free in a small bar with drunken patrons involved an unreasonable risk of harm is a question for a jury.")

9. Is it unreasonable conduct to send someone a text message if you know they are driving and will view the text while driving? Kubert v. Best, 432 N.J.Super. 495, 75 A.3d 1214 (App. 2013) ("We conclude that a person sending text messages has a duty not to text someone who is driving if the texter knows, or has special reason to know, the recipient will view the text while driving.")

Chicago, B. & Q.R. Co. v. Krayenbuhl

Supreme Court of Nebraska, 1902.

65 Neb. 889, 91 N.W. 880.

[Action to recover for personal injuries sustained by plaintiff, a child four years old, in playing on a railroad turntable maintained by defendant. The trial resulted in a verdict and judgment for plaintiff, and defendant brings error.

The turntable was located between two branches of defendant's line. A path or footway, in common use by the general public and by plaintiff's family, passed within about 70 feet of the turntable. The turntable had a movable bolt by which it could be held in position and was provided with a padlock. The defendant's rules required its employees to keep the turntable locked when not in use, but there was evidence that this rule was frequently disregarded and that one of the staples was so loose that the turntable could be unfastened without difficulty. Plaintiff, in company with other young children, found the turntable unlocked and unguarded. Plaintiff got on the turntable, and when the other children set it in motion, plaintiffs foot was caught between the rails and severed at the ankle joint.

The court first held that the fact that the children were trespassers on the defendant's property did not deprive them of the right to enforce defendant's duty to use reasonable care to make its premises safe. As to this, see Chapter 9, Owners and Occupiers of Land.]

ALBERT, C. ***It is true, as said in Loomis v. Terry, 17 Wend. 496, 31 Am.Dec. 306, "the business of life must go forward"; the means by which it is carried forward cannot be rendered absolutely safe. ***The business of life is better carried forward by the use of dangerous

machinery; hence the public good demands its use, although occasionally such use results in the loss of life or limb. It does so because the danger is insignificant, when weighed against the benefits resulting from the use of such machinery and for the same reason demands its reasonable, most effective, and unrestricted

use, up to the point where the benefits resulting from such use no longer outweigh the danger to be anticipated from it. At that point the public good demands restrictions. For example, a turntable is a dangerous contrivance, which facilitates railroading; the general benefits resulting from its use outweigh the occasional injuries inflicted by it; hence the public good demands its use. We may conceive of means by which it might be rendered absolutely safe, but such means would so interfere with its beneficial use that the danger to be anticipated would not justify their adoption; therefore the public good demands its use without them. But the danger incident to its use may be lessened by the use of a lock which would prevent children, attracted to it, from moving it; the interference with the proper use of the turntable occasioned by the use of such lock is so slight that it is outweighed by the danger to be anticipated from an omission to use it; therefore the public good, we think demands the use of the lock. The public good would not require the owner of a vacant lot on which there is a pond to fill up the pond or inclose the lot with an impassable wall to insure the safety of children resorting to it, because the burden of doing so is out of proportion to the danger to be anticipated from leaving it undone. [C] But where there is an open well on a vacant lot, which is frequented by children, of which the owner of the lot has knowledge, he is liable for injuries sustained by children falling into the well, because the danger to be anticipated from the open well, under the circumstances, outweighs the slight expense or inconvenience that would be entailed in making it safe. ***

Hence, in all cases of this kind in the determination of the question of negligence, regard must be had to the character and location of the

premises, the purpose for which they are used, the probability of injury therefrom, the precautions necessary to prevent such injury, and the relations such precautions bear to the beneficial use of the premises. The nature of the precautions would depend on the particular facts in each case. In some cases a warning to the children or the parents might be sufficient; in others, more active measures might be required. But in every case they should be such as a man of ordinary care and prudence would observe under like circumstances. If, under all the circumstances, the owner omits such precautions as a man of ordinary care and prudence, under like circumstances, would observe, he is guilty of negligence. ***

[The judgment was reversed for error in instructions to the jury amounting to improper comment on the evidence and remanded for a new trial.]

162

NOTES AND QUESTIONS

1. There are risks associated with the operation of trains, airplanes, automobiles, snowmobiles. How does the jury decide whether the risk is an unreasonable one (negligent) or not?

2. In addition to the factors discussed by the court in the principal case, note that the court mentions that the defendant had an internal policy or rule that the turntable be kept locked when it was not in use. Such a policy can be used as evidence of what the standard of care should be, but it is not determinative of the issue. See, for example, Morgan v. Scott, 291 S.W.3d 622 (Ky. 2009) (adopting and then failing to follow its own in-house rule that a salesperson accompany a prospective buyer on a test drive does not impose a

duty to do so on car dealership) and Jenkins v. Jordan Valley Water Conservancy Dist., 2013 UT 59, 321 P.3d 1049 (2013) (internal determination that a pipeline should be replaced does not establish a tort law duty to do so because internal decisions may be made for any number of reasons--convenience, caution, maximization of budget, mistake--having little to do with the standard of care).

3. Defendant, excavating in the highway, set out an open flare pot at night to give warning of the excavation. It left the flare pot until 10:00 a.m. in a street in which it knew that children were accustomed to play. A child meddled with the flare pot and was seriously burned. Should defendant be liable? Why? Would it make a difference if the child was injured at 10:00 a.m. or 10:00 p.m.? Ott v. Washington Gas Light Co., 205 F.Supp. 815 (D.D.C.1962), aff'd, 317 F.2d 138 (D.C.Cir.1963).

Davison v. Snohomish County

Supreme Court of Washington, 1928.

149 Wash. 109, 270 P. 422.

BEALS, J. Plaintiffs instituted this action against Snohomish county as defendant, seeking to recover damages alleged to have been suffered by them as the result of negligence of defendant in the construction and maintenance of the elevated approach to a bridge known as the Bascule bridge across Ebey slough. ***

At about 8 o'clock in the evening of November 11, 1926, plaintiffs were driving their Ford automobile toward the city of Snohomish, and proceeded to cross the bridge from the west to east at a low rate of speed. Plaintiff Edwin F. Davison was driving, and, as the car

rounded the curve to the east of the slough, he lost control, the car skidded, struck the railing on the east or outer edge of the approach just around the curve, broke through the railing, and, with plaintiffs, fell to the ground. Both plaintiffs suffered severe and painful injuries, and the automobile was wrecked; for all of which damage plaintiffs prayed for judgment in a large amount.

Defendant answered plaintiffs' complaint, denying all the allegations of negligence on its part and affirmatively pleading

163

contributory negligence on the part of plaintiffs. The action came on regularly for trial, and resulted in a verdict in plaintiffs' favor in the sum of $2,500. Defendant seasonably moved for judgment in its favor notwithstanding the verdict, or, in the alternative, for a new trial. Both of these motions were denied by the trial court, which thereupon entered judgment upon the verdict, from which judgment defendant appeals, w *

[Respondents contended that the bridge was unsafe because of] the insufficiency of the railing or guard to prevent respondents' automobile from skidding off the approach ***.

The use of the automobile as a means of transportation of passengers and freight has, during recent years, caused certain changes in the law governing the liability of municipalities in respect to the protection of their roads by railings or guards. A few years ago, when people traveled either on foot or by horse-drawn vehicles, a guardrail could to a considerable extent, actually prevent pedestrians or animals drawing vehicles from accidentally leaving the roadbed; but as a practical proposition, municipalities cannot be

required to protect long stretches of roadway with railings or guards capable of preventing an automobile, moving at a rapid rate, from leaving the road if the car be in any way deflected from the roadway proper and propelled against the railing. As was said by this court in the case of Leber v. King County, 69 Wash. 134, 124 P. 397:

"Roads must be built and traveled, and to hold that the public cannot open their highways until they are prepared to fence their roads with barriers strong enough to hold a team and wagon when coming in violent contact with them, the condition being the ordinary condition of the country, would be to put a burden upon the public that it could not bear. It would prohibit the building of new roads and tend to the financial ruin of the counties undertaking to maintain the old ones."

This principle applies with special force to elevated causeways constructed of wood, such as the approach from which respondents' automobile fell, as upon such a structure the railing can be anchored or secured only to the deck of the causeway. Upon the ground, in situations of special danger, strength can be given to a guard or railing by driving posts into the earth, and a guard of any desired strength can be constructed in that manner. A concrete viaduct can be constructed with side walls of considerable resisting power; but the same degree of protection cannot be expected from a guard or railing along the side of an elevated frame causeway or viaduct. Respondents introduced some testimony to the effect that the posts which supported the railing were, to some extent, rotted. We have carefully considered this testimony, and, for the purposes of this opinion, assume that it was true; but we still do not think that it was sufficient to take the case to the jury upon the question of appellant's

negligence in connection with the condition of the railing at the time of the accident. ***

164

The judgment is reversed, with directions to dismiss the action.

NOTES AND QUESTIONS

1. Compare a later decision of the same court in Bartlett v. Northern Pacific R. Co., 74 Wash.2d 881, 447 P.2d 735 (1968). With almost identical facts the trial court had granted summary judgment to the defendant on the basis of the Davison case. The Supreme Court reversed and remanded, saying: "The reasoning in Davison ***was based on the impracticality as a matter of engineering and on prohibitive costs. We do not consider the ideas of the court, expressed 40 years ago, as necessarily authoritative on the engineering and financial phases of the same problem today. We are satisfied that the parties should have the opportunity of presenting their evidence as to the practicality (cost wise or otherwise) of guardrails or barriers on dangerous or misleading roadways to stop slow-moving vehicles."

2. Note that in the principal case experts testified to provide expertise and to assist the parties in establishing the standard of care. Where the behavior to be evaluated is so distinctly related to some science, profession, or occupation as to be beyond the ken of the average layperson, expert testimony to establish the standard of care is required. See, e.g., Burke v. Air Intern., Inc., 685 F.3d 1102 (D.C. Cir. 2012) (applying D.C. law) (in case where former British soldier was injured while providing private security to an NGO in Afghanistan, court found that the precise precautions a security

contractor should take in a war zone are plainly beyond the ken of the average layperson and thus needed to be established by expert testimony).

3. In determining whether a choice of alternatives is reasonable, must the risk of harm to third persons be taken into account? Defendant's engineer, operating a train, unexpectedly finds a truck load of furniture on a crossing ahead of him. He can stop the train abruptly and avoid the collision, but if he does he will almost certainly throw his passengers about and injure them. What is he to do? Lucchese v. San Francisco-Sacramento R. Co., 106 Cal.App. 242, 289 P. 188 (1930) (conduct to be evaluated in light of all the circumstances, including possible injury to others). Defendant, driving a truck heavily loaded with pipe, is suddenly confronted with a situation requiring him to stop abruptly or injure the plaintiff's intestate. If he stops the pipe may be expected to shift forward and crush defendant driver to death. What is he to do? Thurmond v. Pepper, 119 S.W.2d 900 (Tex.Civ.App. 1938) (the reasonable care standard does not hold him to a higher duty to preserve deceased from injury than to preserve himself). Who decides? The tort law does not answer the question what the defendant should do but rather whether he will be liable to someone he injures for failing to do it.

United States v. Carroll Towing Co.

United States Circuit Court of Appeals, Second Circuit, 1947.

159 F.2d 169.

[Libel in admiralty for the sinking of libelant's barge, the Anna C. The Anna C was owned by the Conners Co. and had been chartered to the

165

Pennsylvania Railroad Co., which had loaded it with a cargo of flour that belonged to the United States. The charter required that the Conners Co. provide a bargee between the hours of 8:00 a.m. and 4:00 p.m. Carroll Towing Co. was the owner of a tug whose servants negligently shifted the Anna Cs mooring lines, causing her to break free from her pier. After the Anna C broke away, she drifted up against a tanker at the next pier down the North River. Unbeknownst to those in the harbor responding to the problem, the tanker's propeller broke a hole in the Anna C at or near her bottom. Sometime thereafter, she careened, dumped her cargo of flour belonging to the United States, and sank. The United States sought compensation for the flour and Conners Co. sought compensation for the barge. Carroll Towing Co. argued that the barge could have been kept afloat and her cargo saved if it had been known that she had been damaged by the propeller, but because her bargee had gone ashore, there was no one on board to observe that she was leaking. The trial court divided the damages, according to the admiralty rule, because it found Conners Co. partly responsible for the loss of the cargo and the barge in not having a custodian on board the barge at the time it was damaged by the negligent actions of Carroll Towing.]

[Caption: Judge learned Hand.]

166

Learned Hand, Circuit Judge. ***[The court reviewed a number of decisions in other cases involving absentee bargees.] It appears from the foregoing review that there is no general rule to determine when the absence of a bargee or other attendant will make the owner of the barge liable for injuries to other vessels if she breaks away from her moorings. However, in any cases where he would be so liable for injuries to others, obviously he must reduce his damages proportionately, if the injury is to his own barge. It becomes apparent why there can be no such general rule, when we consider the grounds for such a liability. Since there are occasions when every vessel will break from her moorings, and, since, if she does, she becomes a menace to those about her, the owner's duty, as in other similar situations, to provide against resulting injuries is a function of three variables: (1) The probability that she will break away; (2) the gravity of the resulting injury, if she does; (3) the burden of adequate precautions. Possibly it serves to bring this notion into relief to state it in algebraic terms: if the probability be called P; the injury L; and the burden B; liability depends upon whether B is less than L multiplied by P; i.e., whether B is less than PL.

Applied to the situation at bar, the likelihood that a barge will break from her fasts, and the damage she will do, vary with the place and time; for example, if a storm threatens, the danger is greater; so it is, if she is in a crowded harbor where moored barges are constantly being shifted about. On the other hand, the barge must not be the bargee's prison, even though he lives aboard; he must go ashore at times. ***We hold that it is not in all cases a sufficient answer to a bargee's absence without excuse, during working hours, that he has

properly made fast his barge to a pier, when he leaves her. In the case at bar the bargee left at five o'clock on the afternoon of January 3rd, and the flotilla broke away at about two o'clock in the afternoon of the following day, twenty-one hours afterwards. The bargee had been away all the time, and we hold that his fabricated story was affirmative evidence that he had no excuse for his absence. At the locus in quo--especially during the short January days and in the full tide of war activity--barges were being constantly drilled in and out. Certainly it was not beyond reasonable expectation that, with the inevitable haste and bustle, the work might not be done with adequate care. In such circumstances we hold--and that is all that we do hold--that it was a fair requirement that the Conners Co. should have a bargee aboard (unless he had some excuse for his absence), during the working hours of daylight.

[Conners Co. was found partly responsible for the losses due to the absence of the bargee.]

NOTES AND QUESTIONS

1. In an earlier opinion, Conway v. O'Brien, 111 F.2d 611, 612 (2d Cir.1940) (applying Vermont law), Judge Learned Hand had stated in part: "The degree of care demanded of a person by an occasion is the resultant of three factors: the likelihood that his conduct will injure others, taken with the

seriousness of the injury if it happens, and balanced against the interest which he must sacrifice to avoid the risk. All these are practically not susceptible of any quantitative estimate, and the second two are generally not so, even theoretically. For this reason a

solution always involves some preference, or choice between incommensurables, and it is consigned to a jury because their decision is thought most likely to accord with commonly accepted standards, real or fancied." Is a court well equipped to weigh these considerations? A jury?

2. In Florida, in a lawsuit against the United States, plaintiff alleged that the United States had acted negligently in failing to provide adequate security for the handling of anthrax samples, resulting in the death of plaintiff's husband who was exposed to anthrax when the newspaper for which he worked received an envelope from an unknown person containing anthrax that was traced to Fort Detrick. United States v. Stevens, 994 So.2d 1062, 1067 (Fla. 2008) (answering a certified question from the Eleventh Circuit) ("as a general proposition, the greater the risk of harm to others that is created by a person's chosen activity, the greater the burden or duty to avoid injury to others becomes. Thus, as the risk grows greater, so does the duty, because the risk to be perceived defines the duty that must be undertaken.")

3. Plaintiff fell and injured her wrist while removing her shoes to go through airport security. She alleged that the Transportation Security Administration ("TSA") was negligent in failing to provide a chair in the passenger screening area. Barnes v. United States, 485 F.3d 341, 343 (6th Cir. 2007) (applying Tennessee law in a Federal Tort Claims Act case). The trial court judge granted summary judgment for the United States and the appellate court affirmed: "(A]cceptance of the plaintiff's argument would impose a burden that is not commensurate with the apparently small likelihood and gravity of the potential harm. ***The TSA provided passengers the ability to

stabilize themselves by placing a hand on the table near the x-ray machine. Although the TSA could have provided a chair and the Government does not dispute that such an option was feasible, requiring the TSA to do so would impose a general burden that potentially far exceeds the benefit of providing a chair in this particular case. In particular, there would be an affirmative duty on premises owners to provide chairs anytime footwear must be removed, including entrances to mosques and temples, and entrances to homes in stormy weather, or indeed whenever someone must simply bend down, as when retrieving an item at the grocery store that is located on the bottom shelf. The possibility of an occasional fall does not warrant the widespread precautionary provision of chairs."

4. In the midst of a storm involving freezing rain and sleet, driver stepped from his vehicle at a gas station and slipped on ice. Driver argued that state's continuing storm doctrine, which required premises owners to remove ice and snow after the storm was over, should not apply to businesses that chose to stay open during storms. The court rejected the exception urged by plaintiff, noting that the citizens of Delaware benefitted from gas stations and convenience stores remaining open during storms: "As sad as the plaintiff's injuries were, the reality is that there is no foolproof way to avoid the risk of slipping on ice. Some injuries are not the legal fault of anyone, they just are

the result of the reality that nothing in life is entirely safe, and surely not walking on ice or snow." Laine v. Speedway, LLC, 177 A.3d 1227

(Del. 2018) (upholding trial court judge's grant of summary judgment to gas station defendant).

5. Defendant left her car unlocked and its engine running in her own driveway when she went to retrieve her pocketbook that she had forgotten. In the three minutes she was gone, a thief high on meth stole her car, got into a highspeed chase with police, and caused a crash that seriously injured plaintiffs. Plaintiffs argued that the burden on defendant was low--she could easily have removed her keys from the ignition and locked her car before returning to her house. The court, in affirming the trial court's grant of summary judgment for the defendant noted that the "burden that this factor addresses is not, however, the effortlessness in removing the keys, but rather the burden that will result from imposing a duty not to leave the motor running temporarily in a vehicle parked in one's driveway. It must be remembered that the imposition of a duty not to leave the motor running in a vehicle in one's driveway would apply across the board, and would create potential liability for every person in Wyoming who, on a cold winter day, starts his or her car to warm it up and defrost the windshield before driving upon the public highways." Lucero v. Holbrook, 288 P.3d 1228, 1235 (Wyo. 2012).

RESTATEMENT (THIRD) OF TORTS: LIABILITY FOR PHYSICAL AND EMOTIONAL HARM (2010)

§ 3. Negligence

A person acts negligently if the person does not exercise reasonable care under all the circumstances. Primary factors to consider in

ascertaining whether the person's conduct lacks reasonable care are the foreseeable likelihood that the person's conduct will result in harm, the foreseeable severity of any harm that may ensue, and the burden of precautions to eliminate or reduce the risk of harm.

A note about the Restatement of Torts: The original Restatement of Torts, with Francis Bohlen as Reporter, was a four volume work that was published over several years and was completed 1939. William Prosser and then John Wade shepherded the Restatement Second, which was begun in the late 1950s and finally completed in 1979. When the American Law Institute concluded that tort law had evolved so much that a Restatement Third was appropriate, it divided the work into separate portions, each taking up an important subfield. The first one to be completed was Products Liability, published in 1998, and which will be discussed in Chapter 15. The second, Apportionment of Liability, was published in 2000, and will be discussed principally in Chapter 7. The third area was published in two volumes and is called Liability for Physical and Emotional Harm. The first volume, published in 2010, includes liability for

intentional physical harm and for negligence causing physical harm, duty, strict liability, factual cause, and scope of liability (traditionally called proximate cause). The second volume, dealing with affirmative duties, emotional harm, landowner liability, and liability of actors who retain independent contractors, was published in 2012. The ALI has completed and approved Restatement (Third) of Torts: Liability for Economic Harm (2020) and is currently working on Restatement (Third) of Torts: Intentional Torts to Persons. In 2019

the ALI announced the launch of the final three components of the Restatement (Third) of Torts, tentatively titled: Remedies; Defamation and Privacy; and Concluding Provisions. When those projects are completed, the entire body of work will supersede the Restatement (Second). In the meantime some areas of the law (like the elements of the specific intentional torts) have not changed since the Second Restatement was published and thus remain in effect. Where applicable, references to both the Second and Third Restatements are included.

4. The Standard of Care

(A) The Reasonable Prudent Person

Vaughan v. Menlove

Court of Common Pleas, 1837.

3 Bing. (N.C.) 468, 132 Eng.Rep. 490.

[Defendant built a hay rick near the boundary of his land not far from the plaintiff's cottages. It was alleged that the rick was likely to ignite, thereby endangering the plaintiff's cottages, of which the defendant had notice; that the defendant was negligent in maintaining the rick in this dangerous condition; and that the rick did ignite and the fire spread to plaintiff's land, burning his cottages. Defendant denied that he was negligent.]

At the trial it appeared that the rick in question had been made by the defendant near the boundary of his own premises; that the hay was in such a state when put together, as to give rise to discussions on the probability of fire; that though there [were] conflicting opinions

on the subject, yet during a period of five weeks, the defendant was repeatedly warned of his peril; that his stock was insured; and that upon one occasion, being advised to take the rick down to avoid all danger, he said, "he would chance it." He made an aperture or chimney through the rick; but in spite, or perhaps in consequence of his precaution, the rick at length burst into flames from the spontaneous heating of its materials; the flames communicated to the defendant's barn and stables, and thence to the plaintiff's cottages, which were entirely destroyed.

170

PATTERSON, J., before whom the cause was tried, told the jury that the question for them to consider, was, whether the fire had been occasioned by gross negligence on the part of the defendant; adding, that he was bound to proceed with such reasonable caution as a prudent man would have exercised under such circumstances.

A verdict having been found for the plaintiff, a rule nisi for a new trial was obtained, on the ground that the jury should have been directed to consider, not, whether the defendant had been guilty of gross negligence with reference to the standard of ordinary prudence, a standard too uncertain to afford any criterion; but whether he had acted bona fide to the best of his judgment; if he had, he ought not to be responsible for the misfortune of not possessing the highest order of intelligence. The action under such circumstances, was of the first impression.

[Caption: Chief Justice Tindal.]

TINDAL, C.J. I agree that this is a case primae impressionis; but I feel no difficulty in applying to it the principles of law as laid down in

other cases of a similar kind. ***[T]hough the defendant did not himself light the fire, yet mediately, he is as much the cause of it as if he had himself put a candle to the rick; for it is well known that hay will ferment and take fire if it be not carefully stacked. It has been decided that if an occupier burns weeds so near the boundary of his own land that damage ensues

171

to the property of his neighbor, he is liable to an action for the amount of injury done, unless the accident were occasioned by a sudden blast which he could not foresee. ***

It is contended, however, that the learned Judge was wrong in leaving this to the jury as a case of gross negligence, and that the question of negligence was so mixed up with reference to what would be the conduct of a man of ordinary prudence that the jury might have thought the latter the rule by which they were to decide; that such a rule would be too uncertain to act upon; and that the question ought to have been whether the defendant had acted honestly and bona fide to the best of his own judgment. ***The care taken by a prudent man has always been the rule laid down; and as to the supposed difficulty of applying it, a jury has always been able to say whether, taking that rule as their guide, there has been negligence on the occasion in question.

Instead, therefore, of saying that the liability for negligence should be co-extensive with the judgment of each individual, which would be as variable as the length of the foot of each individual, we ought rather to adhere to the rule which requires in all cases a regard to caution such as a man of ordinary prudence would observe. That was in

substance the criterion presented to the jury in this case, and therefore the present rule [nisi] must be discharged.

[The concurring opinions of PARK and VAUGHAN, JJ., are omitted. GASLEE, J., concurred in discharging the rule.]

NOTES AND QUESTIONS

1. "If, for instance, a man is born hasty and awkward, is always hurting himself or his neighbors, no doubt his congenital defects will be allowed for in the courts of Heaven, but his slips are no less troublesome to his neighbors than if they sprang from guilty neglect. His neighbors accordingly require him, at his peril, to come up to their standard, and the courts which they establish decline to take his personal equation into account." Holmes, The Common Law 108 (1881). See also Seavey, Negligence--Subjective or Objective? 41 Harv. L. Rev. 1 (1927).

2. How can an honest mistake in judgment be "fault"? Based on the evidence as summarized by Chief Justice Tindal, what other argument could defendant's lawyer have made on behalf of his client?

3. The standard formula for instructing the jury has been that of "a reasonable man of ordinary prudence." Variations on this have, however, been upheld, if they obviously mean the same thing. Thus the "ordinarily prudent man," Osborne v. Montgomery, 203 Wis. 223, 234 N.W. 372 (1931); the "typical prudent man," Warrington v. New York Power & Light Corp., 252 App.Div. 364, 300 N.Y.S. 154 (1937); the "average person of ordinary prudence," Charbonneau v. MacRury, 84 N.H. 501, 153 A. 457 (1931).

"The 'reasonable man' has been described by Greer, L.J. as 'the man in the street' or 'the man in the Clapham omnibus', or, as I recently read in an American author, 'the man who takes the magazines at home, and in the

172

evening pushes the lawn mower in his shirt sleeves.'" Hall v. Brooklands Club, [1933] 1 K.B. 205, 224. For whimsical treatments, see A. Herbert, Uncommon Law 1-6 (7th ed. 1952); R. Megarry, The Clapham Omnibus, in Miscellany-at-Law 260 (1955).

4. "[I]n applying the universally accepted standard of care: that of the ordinary, reasonable and prudent man under the circumstances, the term 'ordinary' should be given its true meaning by not requiring the conduct of an extraordinarily careful person. Such an 'ordinary' man is not necessarily a supercautious individual devoid of human frailties and constantly preoccupied with the idea that danger may be lurking in every direction about him at any time. We appreciate that to require such constant apprehension of danger from every possible source would indeed be beyond normal conduct and would be too exacting a standard." Whitman v. W.T. Grant Co., 16 Utah 2d 81, 395 P.2d 918, 920 (1964).

5. The courts have quite jealously guarded the integrity of the instruction to the jury, and in particular the entirely hypothetical character of the "reasonable man." Thus in Freeman v. Adams, 63 Cal.App. 225, 218 P. 600 (1923), it was held reversible error to charge the jury that:

"In determining what a reasonable and prudent man would do under the circumstances, you will remember that presumably a jury is

composed of such reasonable and prudent persons, and you may each ask yourself, Did the defendants do, or fail to do, anything which, under the circumstances, I would not have done or would have done?"

Historically, courts referred to this mythical person in the masculine gender. The form used here and in modern jury instructions is the reasonable, prudent person.

Delair v. McAdoo

Supreme Court of Pennsylvania, 1936.

324 Pa. 392, 188 A. 181.

KEPHART, Chief Justice. Plaintiff brought an action in trespass to recover for damages to his person and property sustained as a result of a collision between his automobile and that owned by the defendant. The accident occurred when defendant, proceeding in the same direction as plaintiff, sought to pass him. As defendant drew alongside of plaintiff, the left rear tire of his car blew out, causing it to swerve and come into contact with the plaintiff's car. The latter's theory at trial was that defendant was negligent in driving with defective tires. The jury found for plaintiff in the sum of $7,500. *** [The court below refused defendant's motion for a judgment n.o.v. and defendant appealed.]

It has been held in other states that the question whether a particular person is negligent in failing to know that his tires are in too poor a condition for ordinary operation on the highways is a question of fact for the jury. [Cc] In the instant case the testimony relative to the

defect was as follows: A witness for the plaintiff stated that the tire "was

173

worn pretty well through. You could see the tread in the tire--the inside lining." The witness later described this inside lining as the "fabric." The fact that the tire was worn through to and into the fabric over its entire area was corroborated by another witness. The repairman who replaced the tire which had blown out stated that he could see "the breaker strip" which is just under the fabric of a tire. This testimony was contradicted by the defendant. ***

The question was raised at bar whether plaintiff should not have had expert testimony to show that a tire in the condition testified to was dangerous. It would seem, however, that this is a matter as to which the ordinary man's experience is sufficient to enable him to make a sound judgment. ***

A jury is just as well qualified to pass judgment as to the risk of danger in the condition of an article in universal use under a given state of facts as experts. We have in this state more than a million automobiles and trucks, approximately two for every three families. Their daily use over the highways is common, and requires a certain amount of knowledge of the movable parts, particularly the tires; it is imperative that a duty or standard of care be set up that will be productive of safety for other users of the highways. Any ordinary individual, whether a car owner or not, knows that when a tire is worn through to the fabric, its further use is dangerous and it should be removed. When worn through several plies, it is very dangerous for further use. All drivers must be held to a knowledge of these

facts. An owner or operator cannot escape simply because he says he does not know. He must know. The hazard is too great to permit cars in this condition to be on the highway. It does not require opinion evidence to demonstrate that a trigger pulled on a loaded gun makes the gun a dangerous instrument when pointed at an individual, nor could one escape liability by saying he did not know it was dangerous. The use of a tire worn through to the fabric presents a similar situation. The rule must be rigid if millions are to drive these instrumentalities which in a fraction of a second may become instruments of destruction to life and property. There is no series of accidents more destructive or more terrifying in the use of automobiles than those which come from "blowouts." The law requires drivers and owners of motor vehicles to know the condition of those parts which are likely to become dangerous where the flaws or faults would be disclosed by a reasonable inspection. It will assume they do know of the dangers ascertainable by such examination.

Order [denying defendant's motion for a j.n.o.v.] affirmed.

NOTES AND QUESTIONS

1. Compare Michigan City v. Rudolph, 104 Ind.App. 643, 12 N.E.2d 970 (1938), holding that the driver is held to the knowledge that an automobile will go out of control if it is driven fast through loose sand. What if the driver is a teenager who has just obtained her license?

2. What are the facts that every mentally competent adult should know? The law of gravity--something dropped will fall? Seaboard Air Line R. Co. v. Hackney, 217 Ala. 382, 115 So. 869 (1928). The

principle of leverage--one end of a balanced board will fly up if the other is trod on? Cf. City of Huntingburg v. First, 15 Ind.App. 552, 43 N.E. 17 (1896). The fact that wood and paper will burn? Lillibridge v. McCann, 117 Mich. 84, 75 N.W. 288 (1898).

3. Suppose the individual has led a life that has not brought him into contact with information common in the particular community. A city dweller who never has seen a bull or a mule, or heard anything about their characteristics, visits a friend in the country, and makes a misguided attempt to fraternize with the animals. Tolin v. Terrell, 133 Ky. 210, 117 S.W. 290, 291 (1909) ("it is a matter of common knowledge and common experience that there is no telling when or under what circumstances a mule will or will not kick. The only way to escape danger from the feet of a mule is not to go within the radius of its heels.") A Notre Dame law student from Southern California, driving to the library in the midst of a lake effect snow storm, does not know that a driver is supposed to steer into a skid. Is it reasonable conduct not to?

4. Distinguish ignorance from the breach of a duty to find out. A stranger in a town is suddenly confronted with a purple traffic light. Can she continue to drive across town without stopping to find out what the light means? In Gobrecht v. Beckwith, 82 N.H. 415, 135 A. 20 (1926), defendant, a landlord, installed a gas heater in a closed and almost unventilated bathroom, in ignorance of the fact that it would fill the room with carbon monoxide. Plaintiff, a tenant, used the bathroom, lighted the heater, and was poisoned. It was held that it was unreasonable (negligent) for defendant not to make an inquiry or investigation as to the safety of the heater before installing it, but

reasonable (not negligent) for plaintiff not to make an inquiry and to rely on the landlord.

5. Suppose persons who do not hold themselves out as having superior skills or knowledge do actually have them. Should they be required to exercise those superior skills or knowledge to avoid harm to others? For example, in the principal case, suppose the defect was a latent one, but defendant could easily have discovered it because his hobby was auto mechanics. Should he be held liable? The Restatement (Second) of Torts suggests an affirmative answer in § 289(b), comment m.

Defendant in a medical malpractice case contended that patient, who also was a doctor, failed to tell him a crucial piece of information about his symptoms. Patient claimed he had told the doctor. The jury had to resolve the factual dispute at trial in deciding both negligence and contributory negligence. Should the jury consider the patient's superior knowledge (the significance of the symptom in making a diagnosis) in evaluating patient's conduct to determine contributory negligence? Jackson v. Axelrad, 221 S.W.3d 650 (Tex. 2007) (yes, citing Restatement (Second) of Torts § 289(b), comment m). See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 12 (2010) (yes, to be taken into account). But see

Fredericks v. Castora, 241 Pa.Super. 211, 360 A.2d 696 (1976) (court refused to impose higher standard on truck driver despite twenty years' experience).

6. It is commonly held that the reasonable person will not forget what is actually known, and that forgetfulness does not excuse

negligence. But when distracted attention, lapse of time or other similar factors make it reasonable to forget, it can be found that there is no negligence. See Ferrie v. D'Arc, 31 N.J. 92, 155 A.2d 257 (1959), rev'g, 55 N.J.Super. 65, 150 A.2d 83 (1959).

Trimarco v. Klein

Court of Appeals of New York, 1982.

56 N.Y.2d 98, 436 N.E.2d 502, 451 N.Y.S.2d 52.

FUCHSBERG, JUDGE. After trial by jury in a negligence suit for personal injuries, the plaintiff, Vincent N. Trimarco, recovered a judgment of $240,000. A sharply divided Appellate Division, 82 A.D.2d 20, 441 N.Y.S.2d 62, having reversed on the law and dismissed the complaint, our primary concern on this appeal is with the role of the proof plaintiff produced on custom and usage. The ultimate issue is whether he made out a case.

The controversy has its genesis in the shattering of a bathtub's glass enclosure door in a multiple dwelling in July, 1976. Taking the testimony most favorably to the plaintiff, as we must in passing on the presence of a prima facie case, we note that, according to the trial testimony, at the time of the incident plaintiff, the tenant of the apartment in which it happened, was in the process of sliding the door open so that he could exit the tub. It is undisputed that the occurrence was sudden and unexpected and the injuries he received from the lacerating glass most severe.

The door, which turned out to have been made of ordinary glass variously estimated as one sixteenth to one quarter of an inch in thickness, concededly would have presented no different

appearance to the plaintiff and his wife than did tempered safety glass, which their uncontradicted testimony shows they assumed it to be. Nor was there any suggestion that defendants ever brought its true nature to their attention. ***

As part of his case, plaintiff, with the aid of expert testimony, developed that, since at least the early 1950's, a practice of using shatterproof glazing materials for bathroom enclosures had come into common use, so that by 1976 the glass door here no longer conformed to accepted safety standards. This proof was reinforced by a showing that over this period bulletins of nationally recognized safety and consumer organizations along with official Federal publications had joined in warning of the dangers that lurked when plain glass was utilized in "hazardous locations", including "bathtub enclosures". ***And, on examination of the defendants' managing agent, who long had enjoyed

176

extensive familiarity with the management of multiple dwelling units in the New York City area, plaintiff's counsel elicited agreement that, since at least 1965, it was customary for landlords who had occasion to install glass for shower enclosures, whether to replace broken glass or to comply with the request of a tenant or otherwise, to do so with "some material such as plastic or safety glass".

In face of this record, in essence, the rationale of the majority at the Appellate Division was that, "assuming that there existed a custom and usage at the time to substitute shatterproof glass" and that this was a "better way or a safer method of enclosing showers" [c] unless prior notice of the danger came to the defendants either from the

plaintiff or by reason of a similar accident in the building, no duty devolved on the defendants to replace the glass [under the common law]. ***

[W]hen proof of an accepted practice is accompanied by evidence that the defendant conformed to it, this may establish due care [c], and, contrariwise, when proof of a customary practice is coupled with a showing that it was ignored and that this departure was a proximate cause of the accident, it may serve to establish liability [c]. Put more conceptually, proof of a common practice aids in "formulating] the general expectation of society as to how individuals will act in the course of their undertakings, and thus to guide the common sense or expert intuition of a jury or commission when called on to judge of particular conduct under particular circumstances" [c].

The source of the probative power of proof of custom and usage is described differently by various authorities, but all agree on its potency. Chief among the rationales offered is, of course, the fact that it reflects the judgment and experience and conduct of many (2 Wigmore, Evidence [3d ed], § 461; Prosser, Torts [4th ed], § 33). Support for its relevancy and reliability comes too from the direct bearing it has on feasibility, for its focusing is on the practicality of a precaution in actual operation and the readiness with which it can be employed (Morris, Custom and Negligence, 42 Col. L. Rev. 1147, 1148). Following in the train of both of these boons is the custom's exemplification of the opportunities it provides to others to learn of the safe way, if that the customary one be. (See Restatement (Second) Torts § 295A, comments a, b.)

From all this it is not to be assumed customary practice and usage need be universal. It suffices that it be fairly well defined and in the same calling or business so that "the actor may be charged with knowledge of it or negligent ignorance" (Prosser, Torts [4th ed], § 33, p. 168; Restatement (Second) Torts § 295A, p. 62, comment a).

However, once its existence is credited, a common practice or usage is still not necessarily a conclusive or even a compelling test of negligence [c], Before it can be, the jury must be satisfied with its reasonableness, just as the jury must be satisfied with the reasonableness of the behavior which adhered to the custom or the unreasonableness of that which did not [c], After all, customs and usages run the gamut of merit like

177

everything else. That is why the question in each instance is whether it meets the test of reasonableness. As Holmes' now classic statement on this subject expresses it, "[w]hat usually is done may be evidence of what ought to be done, but what ought to be done is fixed by a standard of reasonable prudence, whether it usually is complied with or not" (Texas & Pacific Ry. Co. v. Behymer, 189 U.S. 468, 470, 23 S.Ct. 622, 622-23, 47 L.Ed. 905).

So measured, the case the plaintiff presented, even without the [evidence concerning a statute which applied only to construction after 1973 which the court held should not have been admitted], was enough to send it to the jury and to sustain the verdict reached. ***Moreover, it was also for the jury to decide whether, at the point in time when the accident occurred, the modest cost and ready availability of safety glass and the dynamics of the growing custom

to use it for shower enclosures had transformed what once may have been considered a reasonably safe part of the apartment into one which, in the light of later developments, no longer could be so regarded.

Furthermore, the charge on this subject was correct. The Trial Judge placed the evidence of custom and usage "by others engaged in the same business" in proper perspective, when, among other things, he told the jury that the issue on which it was received was "the reasonableness of the defendant's conduct under all the circumstances". He also emphasized that the testimony on this score was not conclusive, not only by saying so but by explaining that "the mere fact that another person or landlord may have used a better or safer practice does not establish a standard" and that it was for the jurors "to determine whether or not the evidence in this case does establish a general custom or practice".

Nevertheless, we reverse and order a new trial because the General Business Law sections [concerning the statute which did not apply] should have been excluded. ***

Order reversed, with costs, and case remitted to Supreme Court, Bronx County, for a new trial in accordance with the opinion herein.

NOTES AND QUESTIONS

1. Who is interested in introducing evidence of the custom, plaintiff or defendant? Why? Do you see that industry custom is one way to show the jury what a reasonable person would do under the circumstances?

2. Defendant, driving an automobile on a private road, where no statute is applicable, violates the custom in the United States by driving on the left side of the road. In the absence of special circumstances, can he be found negligent in doing so? Cf. Eamiello v. Piscitelli, 133 Conn. 360, 51 A.2d 912 (1947) (walking on wrong side of road). What about special circumstances? Suppose the right side of the road is full of dangerous potholes? Texas & Pacific R. Co. v. Behymer, 189 U.S. 468 (1903), quoted in the principal case, where it was railway custom to make up a train by

bumping cars together with brakemen standing on top of them; and this was done on one occasion when the cars were covered with a sheet of ice.

3. What if the custom of the industry is a careless one? Defendant's tug boats were towing plaintiff's barges loaded with coal up the coast from Norfolk, Virginia to New York when they were lost in a gale off the Jersey Coast. The tugs were not equipped with a radio that would have allowed them to receive a warning from the Weather Bureau in time to pull into safety in the Delaware Breakwater. Defendants proved that it was the custom of barge lines not to provide radio receiving sets to the crews. In upholding the verdict against the defendants, Learned Hand wrote an oft- quoted passage, which summarizes the law in this area: "[I]n most cases reasonable prudence is in fact common prudence; but strictly it is never its measure; a whole calling may have unduly lagged in the adoption of new and available devices. It never may set its own tests, however persuasive be its usages. Courts must in the end say what is

required; there are precautions so imperative that even their universal disregard will not excuse their omission." The T.J. Hooper, 60 F.2d 737 (2d Cir.1932).

4. What if a custom violates a statute? Suppose everyone in town habitually jaywalks, crossing the street in the middle of the block? Cf. Fowler v. Key System Transit Lines, 37 Cal.2d 65, 230 P.2d 339 (1951) (even if conduct is against law, custom may be used to show expectations).

5. Are there customs that are so clearly unreasonable that they are not even to be admitted as evidence of due care? In Mayhew v. Sullivan Mining Co., 76 Me. 100 (1884), defendant mining company did not guard or even light ladder-holes in the platforms in its mine. A workman fell through such a hole and was injured. Barrow, J.: "If the defendants had proved that in every mining establishment that has existed since the days of Tubal Cain, it has been the practice to cut ladder-holes in their platforms, situated as this was while in daily use for mining operations, without guarding or lighting them, and without notice to contractors or workmen, it would have no tendency to show that the act was consistent with ordinary prudence or a due regard for the safety of those who were using their premises by their invitation."

6. Internal Company Policy. What if an internal company policy is violated by its employees? Like custom, it also can be evidence of negligence. Roddey v. Wal-Mart Stores East, 415 S.C. 580, 784 S.E.2d 670 (2016) (plaintiff driving getaway car for shoplifter was injured fleeing Wal-Mart when she crashed her car while being

pursued by security guard even though Wal-Mart policy provided that suspected shoplifters should not be pursued off premises).

Cordas v. Peerless Transportation Co.

City Court of New York, New York County, 1941.

27 N.Y.S.2d 198.

CARLIN, Justice. This case presents the ordinary man--that problem child of the law--in a most bizarre setting. As a lonely chauffeur in defendant's employ he became in a trice the protagonist in a breath-baiting

179

drama with a denouement almost tragic. It appears that a man, whose identity it would be indelicate to divulge, was feloniously relieved of his portable goods by two nondescript highwaymen in an alley near 26th Street and Third Avenue, Manhattan; they induced him to relinquish his possessions by a strong argument ad hominem couched in the convincing cant of the criminal and pressed at the point of a most persuasive pistol. Laden with their loot, but not thereby impeded, they took an abrupt departure, and he, shuffling off the coil of that discretion which enmeshed him in the alley, quickly gave chase through 26th Street toward 2d Avenue, whither they were resorting "with expedition swift as thought" for most obvious reasons. Somewhere on that thoroughfare of escape they indulged the stratagem of separation ostensibly to disconcert their pursuer and allay the ardor of his pursuit. He then centered on for capture the man with the pistol, whom he saw board the defendant's taxicab which quickly veered south toward 25th Street on 2d Avenue, where

he saw the chauffeur jump out while the cab still in motion, continued toward 24th Street; after the chauffeur relieved himself of the cumbersome burden of his fare the latter also is said to have similarly departed from the cab before it reached 24th Street.

The chauffeur's story is substantially the same except that he states that his uninvited guest boarded the cab at 25th Street while it was at a standstill waiting for a less colorful fare; that his "passenger" immediately advised him "to stand not upon the order of his going but go at once," and added finality to his command by an appropriate gesture with a pistol addressed to his sacroiliac. The chauffeur in reluctant acquiescence proceeded about fifteen feet, when his hair, like unto the quills of the fretful porcupine, was made to stand on end by the hue and cry of the man despoiled, accompanied by a clamorous concourse of the law-abiding who paced him as he ran; the concatenation of "stop thief," to which the patter of persistent feet did maddingly beat time, rang in his ears as the pursuing posse all the while gained on the receding cab with its quarry therein contained. The hold-up man sensing his insecurity suggested to the chauffeur that in the event there was the slightest lapse in obedience to his curt command that he, the chauffeur, would suffer the loss of his brains, a prospect as horrible to an humble chauffeur as it undoubtedly would be to one of the intelligentsia.

The chauffeur, apprehensive of certain dissolution from either Scylla, the pursuers, or Charybdis, the pursued, quickly threw his car out of first speed in which he was proceeding, pulled on the emergency, jammed on his brakes and, although he thinks the motor was still running, swung open the door to his left and jumped out of his car. He confesses that the only act that smacked of intelligence was that

by which he jammed the brakes in order to throw off balance the hold-up man, who was half-standing and half-sitting with his pistol menacingly poised. Thus abandoning his car and passenger the chauffeur sped toward 26th Street and then turned to look; he saw the cab proceeding south toward

180

24th Street, where it mounted the sidewalk. The plaintiff-mother and her two infant children were there injured by the cab, which, at the time, appeared to be also minus its passenger, who, it appears, was apprehended in the cellar of a local hospital where he was pointed out to a police officer by a remnant of the posse, hereinbefore mentioned. He did not appear at the trial. The three aforesaid plaintiffs and the husband-father sue the defendant for damages, predicating their respective causes of action upon the contention that the chauffeur was negligent in abandoning the cab under the aforesaid circumstances. Fortunately the injuries sustained were comparatively slight. ***

Negligence has been variously defined but the common legal acceptation is the failure to exercise that care and caution which a reasonable and prudent person ordinarily would exercise under like conditions or circumstances. ***Negligence is "not absolute or intrinsic," but "is always relevant to some circumstances of time, place or person." In slight paraphrase of the world's first bard it may be truly observed that the expedition of the chauffeur's violent love of his own security outran the pauser, reason, when he was suddenly confronted with unusual emergency which "took his reason prisoner." The learned attorney for the plaintiffs concedes that the chauffeur

acted in an emergency, but claims a right to recovery upon the following proposition taken verbatim from his brief: "It is respectfully submitted that the value of the interest of the public at large to be immune from being injured by a dangerous instrumentality such as a car unattended while in motion is very superior to the right of a driver to abandon same while it is in motion, even when acting under the belief that his life is in danger and by abandoning same he will save his life."

To hold thus under the facts adduced herein would be tantamount to a repeal by implication of the primal law of nature written in indelible characters upon the fleshy tablets of sentient creation by the Almighty Law-giver, "the supernal Judge who sits on high." There are those who stem the turbulent current for bubble fame, or who bridge the yawning chasm with a leap for the leap's sake, or who "outstare the sternest eyes that look, outbrave the heart most daring on the earth, pluck the young sucking cubs from the she-bear, yea, mock the lion when he roars for prey" to win a fair lady, and these are the admiration of the generality of men; but they are made of sterner stuff than the ordinary man upon whom the law places no duty of emulation. The law would indeed be fond if it imposed upon the ordinary man the obligation to so demean himself when suddenly confronted with a danger, not of his creation, disregarding the likelihood that such a contingency may darken the intellect and palsy the will of the common legion of the earth, the fraternity of the ordinary man--whose acts or omissions under certain conditions make the yardstick by which the law measures culpability or innocence, negligence or care. ***

Returning to our chauffeur. If the philosophic Horatio and the martial companions of his watch were "distilled almost to jelly with the act of fear" when they beheld "in the dead vast and middle of the night" the disembodied spirit of Hamlet's father stalk majestically by "with a countenance more in sorrow than in anger," was not the chauffeur, though unacquainted with the example of these eminent men-at-arms more amply justified in his fearsome reactions when he was more palpably confronted by a thing of flesh and blood bearing in its hand an engine of destruction which depended for its lethal purpose upon the quiver of a hair? When Macbeth was cross-examined by Macduff as to any reason he could advance for his sudden dispatch of Duncan's grooms he said in plausible answer, "Who can be wise, amazed, temperate and furious, loyal and neutral in a moment? No man." ***

Kolanko v. Erie Railroad Co., 215 App.Div. 82, 86, 212 N.Y.S. 714, 717, says: "The law in this state does not hold one in an emergency to the exercise of that mature judgment required of him under circumstances where he has an opportunity for deliberate action. He is not required to exercise unerring judgment, which would be expected of him, were he not confronted with an emergency requiring prompt action." The circumstances provide the foil by which the act is brought into relief to determine whether it is or is not negligent. If under normal circumstances an act is done which might be considered negligent, it does not follow as a corollary that a similar act is negligent if performed by a person acting under an emergency, not of his own making, in which he suddenly is faced with a patent danger with a moment left to adopt a means of extrication.

The chauffeur--the ordinary man in this case--acted in a split second in a most harrowing experience. To call him negligent would be to brand him coward; the court does not do so in spite of what those swaggering heroes, "whose valor plucks dead lions by the beard", may bluster to the contrary. The court is loathe to see the plaintiffs go without recovery even though their damages were slight, but cannot hold the defendant liable upon the facts adduced at the trial. Motions, upon which decision was reserved, to dismiss the complaint are granted, with exceptions to plaintiffs. Judgment for defendant against plaintiffs dismissing their complaint upon the merits.

NOTES AND QUESTIONS

1. Compare Vincent v. Lake Erie Transp. Co., page 140. Why a different result? Would it make any difference if plaintiffs in the principal case had been killed or seriously injured? Should it? Some legal scholars have observed that society tends to prohibit direct taking of life while permitting indirect, but statistically certain, deaths. See Calabresi, Reflections on Medical Experiments in Humans, 98 Daedalus 387 (1969).

2. Distinguish the sudden emergency doctrine from the situation where the defendant is unable to act due to sudden illness. The sudden

emergency instruction is intended only for circumstances in which a defendant "has acted in response to a perceived peril and has made a choice which in hindsight may be regarded as unwise or ill-considered, but which was not unreasonable or imprudent under the stress of surrounding circumstances." Hagenow v. Schmidt, 842

N.W.2d 661 (Iowa 2014). The instruction is not appropriate when it is physically impossible for the defendant to act volitionally. Hancock-Underwood v. Knight, 277 Va. 127, 670 S.E.2d 726 (2009) (sudden emergency instruction not applicable where driver suffered acute medical crisis and lost consciousness).

3. To qualify as a sudden emergency, the event must be unforeseen, sudden, and unexpected. Compare Lifson v. City of Syracuse, 17 N.Y.3d 492, 934 N.Y.S.2d 38, 958 N.E.2d 72 (2011) (blinding effect of setting sun's rays common and expected, no sudden emergency instruction) with Regenstreif v. Phelps, 142 S.W.3d 1 (Ky. 2004) (encounters with "black ice" on street, falling boulders, swooping airplanes, and darting children and animals all sudden emergencies).

The judge makes the threshold determination whether the sudden emergency instruction is to be given and then the jury decides whether there was a sudden and unforeseen emergency not of the defendant's own making and, if so, whether her response was reasonable under the circumstances. Four teenagers were driving home from the beach when a back seat passenger pulled the strings of the driver's bikini top, causing the top to fall and her breasts to be exposed. She reacted by letting go of the wheel to cover herself and lost control of the car. Is driver entitled to the sudden emergency instruction? Pelletier v. Lahm, 111 A.D.3d 807, 975 N.Y.S.2d 135 (N.Y. App. 2012), aff'd, 24 N.Y.3d 966, 19 N.E.3d 491 (2014) (majority of panel affirmed trial court judge's decision to give instruction but dissent pointed out that same passenger had engaged in other distracting conduct like opening an umbrella in the back seat and thus that it was not a sudden and unforeseen event).

4. The emergency does not excuse the actor from complying with the standard of the reasonable person. The actor's conduct still may be found to be unreasonable even in light of the emergency. Regenstreif v. Phelps, 142 S.W.3d 1, 5 (Ky. 2004) ("The sudden emergency doctrine is merely an expression of the reasonably prudent person standard of care. It expresses the notion that the law requires no more from an actor than is reasonable to expect in the event of an emergency."). Kreidt v. Burlington N. R.R., 615 N.W.2d 153, 156 (N.D. 2000) ("The sudden emergency doctrine is not so much doctrine as an illustration of how negligence law is applied in a specific situation.").

5. There is general agreement that if the emergency is created by the negligence of the actor, the emergency doctrine does not apply. See for example Lunzer v. Pittsburgh & L.E.R. Co., 296 Pa. 393, 145 A. 907 (1929) (driver put himself in position of peril by driving onto railroad tracks even though he saw train approaching) and Frisby v. Agerton Logging, Inc., 323 Ark. 508, 915 S.W.2d 718 (1996) (driver put himself in position of peril by driving down middle of road). It has been said, however, that in those circumstances it is not the conduct after the emergency has arisen that the

law does not excuse, but the negligent conduct that brought it about. Windsor v. McKee, 22 S.W.2d 65 (Mo.App.1929).

6. Are there situations in which one may be required to anticipate an emergency and be prepared to meet it? What if defendant is driving past a school and a child suddenly comes darting out of a driveway on a bicycle? Lederer v. Connecticut Co., 95 Conn. 520, 111 A. 785

(1920) (trolley car operator has duty to anticipate that child might cross in front of trolley); Conery v. Tackmaier, 34 Wis.2d 511, 149 N.W.2d 575 (1967) (driver's speed and failure to watch for children led to inability to stop in time when children stepped off sidewalk onto road). See also Restatement (Second) Torts § 290, comment k (motorist required to take into account the likelihood that child on sidewalk may suddenly dart into street). What if defendant's car hydroplaned, causing her to lose control, cross the median strip, and hit another car? She requested the emergency doctrine instruction, but the court found it was not warranted because the "occurrence of standing water on a roadway during a heavy rainstorm is simply another matter of common experience. The hazard this occurrence presents, including the possibility of hydroplaning, is one the driver of a vehicle along the roadway must anticipate and exercise reasonable care to avoid." Herr v. Wheeler, 272 Va. 310, 634 S.E.2d 317, 317 (2006).

7. In the principal case, unlike in most negligence cases, the judge acted as a trier of fact. In the more common situation where the jury acts as the fact-finder, legal disputes surrounding the emergency doctrine arise in regard to whether a judge should have instructed a jury about "the reasonable person in an emergency." Since the jury is usually instructed to view the reasonable person "in the circumstances," why seek a separate instruction? Lockhart v. List, 542 Pa. 141, 665 A. 2d 1176 (1995) (reaffirming that separate sudden emergency instruction should be given to explain context for judging behavior in light of circumstances). Should the defendant be required to alert the plaintiff that it plans to seek the instruction? In other words, is it an affirmative defense? Willis v. Westerfield, 839

N.E.2d 1179 (Ind. 2006) (although the proponent of the emergency doctrine bears the burden of establishing that the instruction should be given, it is not an affirmative defense that must be pled in the answer).

8. Not all jurisdictions permit a separate jury instruction, many finding that it puts undue emphasis on the one aspect of the circumstances and thus confuses juries. See, for example, Bedor v. Johnson, 292 P.3d 924 (Colo. 2013) (abolishing separate jury instruction on emergency doctrine and collecting cases with similar holdings from other jurisdictions).

Roberts v. State of Louisiana

Court of Appeal of Louisiana, 1981.

396 So.2d 566.

LABORDE, JUDGE. In this tort suit, William C. Roberts sued to recover damages for injuries he sustained in an accident in the lobby of the U.S. Post Office Building in Alexandria, Louisiana. Roberts fell after being

bumped into by Mike Burson, the blind operator of the concession stand located in the building.

Plaintiff sued the State of Louisiana, through the Louisiana Health and Human Resources Administration, advancing two theories of liability: respondeat superior and negligent failure by the State to properly supervise and oversee the safe operation of the concession

stand. The stand's blind operator, Mike Burson, is not a party to this suit although he is charged with negligence.

[The trial court ordered plaintiffs suit dismissed because he failed to establish negligent conduct on part of Burson.]

We affirm the trial court's decision for the reasons which follow.

On September 1, 1977, at about 12:45 in the afternoon, operator Mike Burson left his concession stand to go to the men's bathroom located in the building. As he was walking down the hall, he bumped into plaintiff who fell to the floor and injured his hip. Plaintiff was 75 years old, stood 5' 6" and weighed approximately 100 pounds. Burson, on the other hand, was 25 to 26 years old, stood approximately 6' and weighed 165 pounds. ***

Even though Burson was not joined as a defendant, his negligence or lack thereof is crucial to a determination of the State's liability. Because of its importance, we begin with it.

Plaintiff contends that operator Mike Burson traversed the area from his concession stand to the men's bathroom in a negligent manner. To be more specific, he focuses on the operator's failure to use his cane even though he had it with him in his concession stand.

In determining an actor's negligence, various courts have imposed differing standards of care to which handicapped persons are expected to perform. Professor William L. Prosser expresses one generally recognized modern standard of care as follows:

"As to his physical characteristics, the reasonable man may be said to be identical with the actor. The man who is blind... is entitled to live in the world and to have allowance made by others for his

disability, and he cannot be required to do the impossible by conforming to physical standards which he cannot meet.... At the same time, the conduct of the handicapped individual must be reasonable in the light of his knowledge of his infirmity, which is treated merely as one of the circumstances under which he acts... It is sometimes said that a blind man must use a greater degree of care than one who can see; but it is now generally agreed that as a fixed rule this is inaccurate, and that the correct statement is merely that he must take the precautions, be they more or less, which the ordinary reasonable man would take if he were blind." W. Prosser, The Law of Torts, Section 32, at Page 151-52 (4th ed. 1971).

185

A careful review of the record in this instance reveals that Burson was acting as a reasonably prudent blind person would under these particular circumstances. ***

On the date of the incident in question, Mike Burson testified that he left his concession stand and was on his way to the men's bathroom when he bumped into plaintiff. He, without hesitancy, admitted that at the time he was not using his cane, explaining that he relies on his facial sense which he feels is an adequate technique for short trips inside the familiar building. Burson testified that he does use a cane to get to and from work.

Plaintiff makes much of Burson's failure to use a cane when traversing the halls of the post office building. Yet, our review of the testimony received at trial indicates that it is not uncommon for blind people to rely on other techniques when moving around in a familiar setting. For example George Marzloff, the director of the Division of

Blind Services, testified that he can recommend to the blind operators that they should use a cane but he knows that when they are in a setting in which they are comfortable, he would say that nine out of ten will not use a cane and in his personal opinion, if the operator is in a relatively busy area, the cane can be more of a hazard than an asset. ***

The only testimony in the record that suggests that Burson traversed the halls in a negligent manner was that elicited from plaintiff's expert witness, William Henry Jacobson. Jacobson is an instructor in peripathology, which he explained as the science of movement within the surroundings by visually impaired individuals. Jacobson, admitting that he conducted no study or examination of Mike Burson's mobility skills and that he was unfamiliar with the State's vending program, nonetheless testified that he would require a blind person to use a cane in traversing the areas outside the concession stand. ***

Upon our review of the record, we feel that plaintiff has failed to show that Burson was negligent. Burson testified that he was very familiar with his surroundings, having worked there for three and a half years. He had special mobility training and his reports introduced into evidence indicate good mobility skills. He explained his decision to rely on his facial sense instead of his cane for these short trips in a manner which convinces us that it was a reasoned decision. Not only was Burson's explanation adequate, there was additional testimony from other persons indicating that such a decision is not an unreasonable one. Also important is the total lack of any evidence in the record showing that at the time of the incident, Burson engaged in any acts which may be characterized as

negligence on his part. For example, there is nothing showing that Burson was walking too fast, not paying attention, et cetera. Under all of these circumstances, we conclude that Mike Burson was not negligent.

186

Our determination that Mike Burson was not negligent disposes of our need to discuss liability on the part of the State.

For the above and foregoing reasons, the judgment of the trial court dismissing plaintiffs' claims against defendant is affirmed and all costs of this appeal are assessed against the plaintiff-appellant.

Affirmed.

NOTES AND QUESTIONS

1. Harris v. Uebelhoer, 75 N.Y. 169 (1878) (all are blind on a dark night--the duty is not to stay at home but to exercise reasonable care when one ventures forth). Accord, as to the other physical characteristics: Otterbeck v. Lamb, 85 Nev. 456, 456 P.2d 855 (1969) (deafness); Stephens v. Dulaney, 78 N.M. 53, 428 P.2d 27 (1967) (no sense of smell); Mahan v. State, to Use of Carr, 172 Md. 373, 191 A. 575 (1937) (short stature, unable to see over hood of automobile); Storjohn v. Fay, 246 Neb. 454, 519 N.W.2d 521 (1994) (epilepsy); Hodges v. Jewel Cos., 72 Ill.App. 3d 263, 28 Ill.Dec. 571, 390 N.E.2d 930 (1979) (paralysis). Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 11(a) (2010).

2. Is a blind person negligent in going out on the street unaccompanied? See Hill v. Glenwood, 124 Iowa 479, 100 N.W. 522 (1904), where a blind man was the injured party. Suppose he had

gone out without a cane. Smith v. Sneller, 147 Pa.Super. 231, 24 A.2d 61, 63 aff'd, 345 Pa. 68, 26 A.2d 452 (1942). ("A blind man may not rely wholly upon his other senses to warn him of danger but must use the devices usually employed, to compensate for his blindness.")

3. Should it make any difference if the party with a physical disability is a plaintiff or a defendant?

4. Suppose that instead of being physically disabled, the actor has superior endowments--he is stronger, can see farther, or distinguishes scents better than a bloodhound. Is it sufficient for him to exercise ordinary abilities or must he exercise his superior ones? Cf. Restatement (Second) of Torts § 289(b), comment m ("superior attention, perception, memory, knowledge, intelligence, and judgment") and Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 12 (2010) ("skills or knowledge that exceed those possessed by most others") (suggesting that actor should be held to higher standard but not citing any cases relating to superior physical characteristics as distinguished from superior skills or knowledge).

5. What about the obligation of the other party to take the possibility of such a disability as blindness into account? See Fletcher v. Aberdeen, 54 Wash.2d 174, 338 P.2d 743 (1959). ("While a city... owes no more than due, ordinary, or reasonable care toward a blind or other physically afflicted or handicapped pedestrian, in respect of the condition of walkways, the effect of the affliction or handicap may be considered in determining whether the required degree of care has been exercised").

6. The Americans with Disabilities Act ("ADA"), 42 U.S.C. §§ 12101-12213 (1990), is designed to require accommodations in all areas

(employment, public service, public accommodation, telecommunication) where a disabled person might encounter unnecessary barriers. In what ways might the ADA affect tort law?

7. Intoxication. Although intoxication arguably could be classified as a physical disability, the courts have consistently refused to make any allowance for it where it is "voluntary," or even negligent. Why? Is voluntary intoxication negligence in itself? What if the defendant indulged in a drug that impairs physical abilities? Cf. Janelsins v. Button, 102 Md.App. 30, 648 A.2d 1039 (1994) (in battery action by bartender against patron, court noted that voluntary intoxication does not vitiate intent).

8. What is defendant's obligation toward one who is intoxicated? One of the most famous judicial utterances is in Robinson v. Pioche, Bayerque & Co., 5 Cal. 460 (1855): "A drunken man is as much entitled to a safe street as a sober one, and much more in need of it."

Robinson v. Lindsay

Supreme Court of Washington, 1979.

92 Wash.2d 410, 598 P.2d 392.

UTTER, Chief Justice. [Billy Anderson, age 13 years, was driving a snowmobile belonging to defendant Lindsay, pulling plaintiff Kelly Robinson on an innertube attached to the snowmobile. Plaintiffs

thumb was severed when it was caught in the tow rope. The thumb was reattached, but still not fully functional at the time of trial. Plaintiff filed suit against Billy Anderson and Lindsay, the owner of the snowmobile.] ***After a jury verdict in favor of Anderson, the trial court ordered a new trial.

The single issue on appeal is whether a minor operating a snowmobile is to be held to an adult standard of care. The trial court failed to instruct the jury as to that standard and ordered a new trial because it believed the jury should have been so instructed. We agree and affirm the order granting a new trial.

The trial court instructed the jury under WPI 10.05 that: "In considering the claimed negligence of a child, you are instructed that it is the duty of a child to exercise the same care that a reasonably careful child of the same age, intelligence, maturity, training and experience would exercise under the same or similar circumstances." Respondent properly excepted to the giving of this instruction and to the court's failure to give an adult standard of care [instruction].

The question of what standard of care should apply to acts of children has a long historical background. Traditionally, a flexible standard of care has been used to determine if children's actions were negligent. Under some circumstances, however, courts have developed a rationale for applying an adult standard.

In the courts' search for a uniform standard of behavior to use in determining whether or not a person's conduct has fallen below minimal

acceptable standards, the law has developed a fictitious person, the "reasonable man of ordinary prudence." That term was first used in Vaughan v. Menlove, 132 Eng.Rep. 490 (1837).

Exceptions to the reasonable person standard developed when the individual whose conduct was alleged to have been negligent suffered from some physical impairment, such as blindness, deafness, or lameness. Courts also found it necessary, as a practical matter, to depart considerably from the objective standard when dealing with children's behavior. Children are traditionally encouraged to pursue childhood activities without the same burdens and responsibilities with which adults must contend. [C] As a result, courts evolved a special standard of care to measure a child's negligence in a particular situation.

In Roth v. Union Depot Co., 13 Wash. 525, 43 P. 641 (1896), Washington joined "the overwhelming weight of authority" in distinguishing between the capacity of a child and that of an adult. As the court then stated, at page 544, 43 P. at page 647: "[I]t would be a monstrous doctrine to hold that a child of inexperience--and experience can come only with years--should be held to the same degree of care in avoiding danger as a person of mature years and accumulated experience."

The court went on to hold, at page 545, 43 P. at page 647: "The care or caution required is according to the capacity of the child, and this is to be determined, ordinarily, by the age of the child. ***[A] child is held ***only to the exercise of such degree of care and discretion as is reasonably to be expected from children of his age."

***In the past we have always compared a child's conduct to that expected of a reasonably careful child of the same age, intelligence, maturity, training and experience. This case is the first to consider the question of a child's liability for injuries sustained as a result of his or her operation of a motorized vehicle or participation in an inherently dangerous activity.

Courts in other jurisdictions have created an exception to the special child standard because of the apparent injustice that would occur if a child who caused injury while engaged in certain dangerous activities were permitted to defend himself by saying that other children similarly situated would not have exercised a degree of care higher than his, and he is, therefore, not liable for his tort. Some courts have couched the exception in terms of children engaging in an activity which is normally one for adults only. See, e.g., Dellwo v. Pearson, 259 Minn. 452, 107 N.W.2d 859 (1961) (operation of a motorboat). We believe a better rationale is that when the activity a child engages in is inherently dangerous, as is the operation of powerful mechanized vehicles, the child should be held to an adult standard of care.

Such a rule protects the need of children to be children but at the same time discourages immature individuals from engaging in

inherently dangerous activities. Children will still be free to enjoy traditional childhood activities without being held to an adult standard of care. Although accidents sometimes occur as the result of such activities, they are not activities generally considered capable of resulting in "grave danger to others and to the minor himself if the

care used in the course of the activity drops below that care which the reasonable and prudent adult would use ***."

Other courts adopting the adult standard of care for children engaged in adult activities have emphasized the hazards to the public if the rule is otherwise. We agree with the Minnesota Supreme Court's language in its decision in Dellwo v. Pearson, supra, 259 Minn, at 457- 58, 107 N.W.2d at 863:

"Certainly in the circumstances of modern life, where vehicles moved by powerful motors are readily available and frequently operated by immature individuals, we should be skeptical of a rule that would allow motor vehicles to be operated to the hazard of the public with less than the normal minimum degree of care and competence."

Dellwo applied the adult standard to a twelve-year-old defendant operating a motor boat. Other jurisdictions have applied the adult standard to minors engaged in analogous activities. Goodfellow v. Coggburn, 98 Idaho 202, 203-04, 560 P.2d 873 (1977) (minor operating tractor); Williams v. Esaw, 214 Kan. 658, 668, 522 P.2d 950 (1974) (minor operating motorcycle); Perricone v. DiBartolo, 14 III.App. 3d 514, 520, 302 N.E.2d 637 (1973) (minor operating gasoline-powered minibike); Krahn v. LaMeres, 483 P.2d 522, 525-26 (Wyo.1971) (minor operating automobile). The holding of minors to an adult standard of care when they operate motorized vehicles is gaining approval from an increasing number of courts and commentators. [C]

The operation of a snowmobile likewise requires adult care and competence. Currently 2.2 million snowmobiles are in operation in the United States. 9 Envir.Rptr. (BNA) 876 [1978 Current

Developments]. Studies show that collisions and other snowmobile accidents claim hundreds of casualties each year and that the incidence of accidents is particularly high among inexperienced operators. [C]

At the time of the accident, the 13-year-old petitioner had operated snowmobiles for about 2 years. When the injury occurred, petitioner was operating a 30-horsepower snowmobile at speeds of 10-20 miles per hour. The record indicates that the machine itself was capable of 65 miles per hour. Because petitioner was operating a powerful motorized vehicle, he should be held to the standard of care and conduct expected of an adult.

The order granting a new trial is affirmed.

NOTES AND QUESTIONS

1. The standard used by a majority of jurisdictions usually is stated to be "what it is reasonable to expect of children of like age, intelligence and experience."

See Restatement (Second) of Torts § 283A and Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 10(a) (2010). This means that more may be required of a child of superior intelligence or experience.

2. After the judge has determined which standard, the jury applies it to the particular set of facts before it. Ordinarily, the question whether the child complied with the standard is one left to the jury; but if the only conclusion to be drawn from the evidence is that the child has behaved unreasonably in view of the child's estimated capacity, the

judge may direct a verdict against the child, just as it would for an adult. Norfolk and Portsmouth Belt Line RR Co. v. Barker, 221 Va. 924, 275 S.E.2d 613 (1981) (ten-year-old injured while attempting to jump onto a moving train).

3. A few courts use arbitrary age limits to set the standard for minors. See Price v. Kitsap Transit, 125 Wash.2d 456, 886 P.2d 556 (1994) (declining to abandon conclusive presumption that children under six are incapable of negligence). For example, a child under the age of seven may be, as a matter of law, incapable of any negligence; one between seven and 14 may be presumed incapable, but may be proved capable; one over 14 may be presumed capable, but may be proved incapable. Kuhns v. Brugger, 390 Pa. 331, 135 A.2d 395 (1957) (12-year-old injured cousin while playing with gun) (noting that Pennsylvania law presumes that children between the ages seven and 14 are incapable of negligence, but such presumption is rebuttable and grows weaker with each year). These arbitrary rules have been taken over from the common law rules as to the capacity of children to commit crime, originally derived from civil law.

Even the courts that usually make a case-by-case determination rather than using arbitrary age limits will hold that extremely young children are without the capacity. See, for example, Mastland, Inc. v. Evans Furniture, Inc., 498 N.W.2d 682 (Iowa 1993) (child under three who started fire playing with cigarette lighter in his crib was not capable of negligence as a matter of law even though Iowa had rejected the per se rules on the capacity of children for negligence) and Verni v. Johnson, 295 N.Y. 436, 68 N.E.2d 431 (1946) (children under four incapable of negligence over dissent's view that no fixed rule should be established). Restatement (Third) of Torts: Liability for

Physical and Emotional Harm § 10(b) (2010) provides that children less than five years of age are incapable of negligence. Nielsen v. Bell, 2016 UT 14, 370 P.3d 925 (2016) (adopting Restatement (Third) position in case where four- year-old defendant had seriously injured his babysitter by throwing a toy at her face).

4. The maximum age to which the special rule as to children has been applied appears to be 17, in Charbonneau v. MacRury, 84 N.H. 501, 153 A. 457 (1931). In Atlanta Gas Light Co. v. Brown, 94 Ga.App. 351, 94 S.E.2d 612 (1956), it was "presumed" that a 20-year-old was as capable as an adult. Indiana applies the adult standard to everyone over the age of 14. Penn Harris Madison School Corp. v. Howard, 861 N.E.2d 1190 (Ind. 2007).

5. As reflected in the decision in the principal case, the Restatement (Second) of Torts has taken the position that the special rule for children

should not be applied when the actor engages "in an activity which is normally undertaken only by adults, and for which adult qualifications are required." What activities fit that category? Thus far the adult standard has been found applicable when a child was driving an automobile, Nielsen v. Brown, 232 Or. 426, 374 P.2d 896 (1962); a motorboat, Dellwo v. Pearson, 259 Minn. 452, 107 N.W.2d 859 (1961); a motorcycle, Harrelson v. Whitehead, 236 Ark. 325, 365 S.W.2d 868 (1963) and Daniels v. Evans, 107 N.H. 407, 224 A.2d 63 (1966); a motor scooter, Adams v. Lopez, 75 N.M. 503, 407 P.2d 50 (1965); and when a teenager was playing golf, Neumann v. Shlansky, 58 Misc.2d 128, 294 N.Y.S.2d 628 (1968), aff'd, 63

Misc.2d 587, 312 N.Y.S.2d 951 (1970) (Gullota, J., dissenting), aff'd, 36 A.D.2d 540, 318 N.Y.S.2d 925 (1971). In contrast, the special standard for children was applied to those who were bicycle riding, Williams v. Gilbert, 239 Ark. 935, 395 S.W.2d 333 (1965) and Bixenman v. Hall, 251 Ind. 527, 242 N.E.2d 837 (1968); playing Monkey-in-the-Middle with a set of keys, Deliso v. Cangialosi, 117 Mise.2d 105, 457 N.Y.S.2d 396 (1982); deer hunting, Purtle v. Shelton, 251 Ark. 519, 474 S.W.2d 123 (1971); building a fire outdoors, Farm Bureau Ins. Group v. Phillips, 116 Mich.App. 544, 323 N.W.2d 477 (1982); and downhill skiing, Goss v. Allen, 70 N.J. 442, 360 A.2d 388 (1976). Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 10(c) (2010) would apply the adult standard to children engaged in "dangerous activity that is characteristically undertaken by adults" and would include the use of firearms in that category. Comment f.

6. There are some decisions in which a similar allowance has been made for the physical and mental deficiencies of old age, but most have involved plaintiffs and have tended to focus on particular infirmities rather than age itself. Tobia v. Cooper Hospital University Med. Ctr., 136 N.J. 335, 643 A.2d 1 (1994) (holding that infirmities, including those caused by age, should be taken into account in determining whether comparative negligence instruction is appropriate in case where eighty-five year-old patient fell while getting off a gurney in emergency room). Compare LaCava v. New Orleans, 159 So.2d 362 (La.App.1964) (seventy-year-old plaintiff showed no disability that should alter the standard of care for determining contributory negligence) and Johnson v. St. Paul City R. Co., 67 Minn. 260, 69 N.W. 900 (1897) (dicta) (old people, whose

senses are blunted, and mental faculties impaired, by age should be able to rely on those younger and stronger). See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 11, comment c (2010) (infirmities caused by age, but not age itself, should be taken into account).

Breunig v. American Family Ins. Co.

Supreme Court of Wisconsin, 1970.

45 Wis.2d 536, 173 N.W.2d 619.

[Action for personal injuries received by plaintiff when his truck was struck by an automobile driven on the wrong side of the highway by Mrs. Erma Veith. The action was brought against Mrs. Veith's automobile insurance company under Wisconsin procedure that permits direct action

192

against a liability insurer. The jury returned a verdict for plaintiff, and defendant appealed.]

HALLOWS, Chief Justice. There is no question that Erma Veith was subject at the time of the accident to an insane delusion which directly affected her ability to operate her car in an ordinarily prudent manner and caused the accident. ***

The evidence established that Mrs. Veith, while returning home after taking her husband to work, saw a white light on the back of the car ahead of her. She followed this light for three or four blocks. Mrs. Veith could not remember anything else except landing in a field,

lying on the side of the road, and people talking. She recalled awaking in the hospital.

The psychiatrist testified Mrs. Veith told him she was driving on a road when she believed that God was taking ahold of the steering wheel and was directing her car. She saw the truck coming and stepped on the gas in order to become air-borne because she knew she could fly because Batman does it. To her surprise she was not air-borne before striking the truck, but after the impact she was flying. ***The psychiatrist testified Erma Veith was suffering from "schizophrenic reaction, paranoid type, acute." He stated that from the time Mrs. Veith commenced following the car with the white light and ending with the stopping of her vehicle in the cornfield, she was not able to operate the vehicle with her conscious mind, and that she had no knowledge or forewarning that such illness or disability would likely occur. ***

The case was tried on the theory that some forms of insanity are a defense to and preclude liability for negligence. [C] Not all types of insanity vitiate responsibility for a negligent tort. The question of liability in every case must depend upon the kind and nature of the insanity. The effect of the mental illness or mental hallucination must be such as to affect the person's ability to understand and appreciate the duty which rests upon him to drive his car with ordinary care, or if the insanity does not affect such understanding and appreciation, it must affect his ability to control his car in an ordinarily prudent manner. And in addition, there must be an absence of notice or forewarning to the person that he may be suddenly subject to such a type of insanity or mental illness. ***

The policy basis of holding a permanently insane person liable for his tort is: (1) Where one of two innocent persons must suffer a loss it should be borne by the one who occasioned it; (2) to induce those interested in the estate of the insane person (if he has one) to restrain and control him; and (3) the fear an insanity defense would lead to false claims of insanity to avoid liability. ***

The cases holding an insane person liable for his torts have generally dealt with pre-existing insanity of a permanent nature and the question

193

here presented [sudden insanity without warning] was neither discussed nor decided. ***

We think the statement that insanity is no defense is too broad when it is applied to a negligence case where the driver is suddenly overcome without forewarning by a mental disability or disorder which incapacitates him from conforming his conduct to the standards of a reasonable man under like circumstances. These are rare cases indeed, but their rarity is no reason for overlooking their existence and the justification which is the basis of the whole doctrine of liability for negligence, i.e., that it is unjust to hold a man responsible for his conduct which he is incapable of avoiding and which incapability was unknown to him prior to the accident.

***[We hold] that a sudden mental incapacity equivalent in its effect to such physical causes as a sudden heart attack, epileptic seizure, stroke, or fainting should be treated alike and not under the general rule of insanity.

An interesting case holding this view in Canada is Buckley & Toronto Transp. Comm'n v. Smith Transport, Ltd. [1946] Ont.Rep. 798, 4 Dom.L.Rep. 721, which is almost identical on the facts with the case at bar. There, the court found no negligence when a truck driver was overcome by a sudden insane delusion that his truck was being operated by remote control of his employer and as a result he was in fact helpless to avert a collision.

[The court then considered whether Mrs. Veith had any warning or knowledge that would reasonably lead her to believe that hallucinations would occur and be such as to affect her driving an automobile. It concluded that, notwithstanding the testimony of the psychiatrist that in his opinion she did not, there was sufficient evidence of her past conduct to permit the jury to conclude that she did. After a visit to the Necedah Shrine, she had told her daughter that it was revealed to her through a vision that the end of the world was coming and that she was picked by God to survive. Later, she said she had visions of God judging people and sentencing them to Heaven or Hell; she thought Batman was good and was trying to help save the world and her husband was possessed of the devil. The question whether she had any warning was held therefore to have been properly left to the jury. Various other questions on appeal were also considered.]

Judgment affirmed.

NOTES AND QUESTIONS

1. Unlike Wisconsin in the principal case, most jurisdictions do not make any allowance for the mental illness of the defendant even if it is sudden and unexpected--the mentally ill party is judged by the

standard of the reasonable person. See, for example, Kuhn v. Zabotsky, 9 Ohio St.2d 129, 224 N.E.2d 137 (1967) (defendant, who could recall nothing between when

he left work and woke up in hospital, rammed the back of a stranger's car, tried to prevent stranger from calling police, and when police officer brought him a drink of water, threw it in his face); Johnson v. Lambotte, 147 Colo. 203, 363 P.2d 165 (1961) (patient walked out of hospital and took car that had been left idling in street and crashed in to two different cars within a couple of blocks of hospital); Cross v. Kent, 32 Md. 581 (1870) (barn set on fire by defendant whose insanity precluded criminal prosecution but left him liable in tort); Williams v. Hays, 143 N.Y. 442, 38 N.E. 449 (1894) (after boat was wrecked due to negligence of captain, he claimed insanity, but was held to standard of reasonable person); and Ellis v. Fixico, 174 Okla. 116, 50 P.2d 162 (1935) (defendant's car drove into back of plaintiffs).

2. Is this policy in accord with current understanding of mental illness? Does an "insane" defendant actually "know" about his condition and have the ability to make a rational decision not to drive? Cf. C.T.W. v. B.C.G., 809 S.W.2d 788 (Tex.App. 1991) (pedophile negligent for failing to seek professional help and to avoid situations where he would be alone with children). Should an exception be made for someone who is in treatment? See Shuman, Therapeutic Jurisprudence and Tort Law: A Limited Subjective Standard of Care, 46 SMU L. Rev. 409 (1992) (suggesting adoption of limited subjective standard of care for the mentally ill defendant

who initiated treatment prior to allegedly negligent conduct). Should an exception be made for someone who is institutionalized and has injured a paid caretaker? See note 6, page 31, re jurisdictions that have carved out a narrow exception for institutionalized mentally disabled patients unable to control or appreciate the consequences of their conduct, which results in injury to a paid caretaker.

3. Who was the actual "defendant" in the principal case? What bearing does that have on the issue?

4. Why treat the diminished capacity of mentally disabled adults differently from the diminished capacity of children? What if the defendant is suffering from Alzheimer's Disease? Should that be treated as a mental illness (no exception made, defendant held to the reasonable person standard) or a physical condition (defendant held to standard of reasonable person with Alzheimer's)? See Gould v. American Family Mutual Ins. Co., 198 Wis.2d 450, 543 N.W.2d 282 (1996). What if someone's mental capacity is so limited that he is more like a child than an adult? Compare Restatement (Second) § 283(B) (no allowance is made for "lack of intelligence") and Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 11(c) (2010) (no allowance for mental or emotional disability) with Lynch v. Rosenthal, 396 S.W.2d 272 (Mo.App. 1965) (expert testimony that farm hand's IQ of 65 meant that his mental ability was less than that of a 10-year- old child considered in evaluating his contributory negligence).

5. In most of the cases we have read on the standard for negligence, the courts are considering the conduct of the defendant; some are considering the conduct of the plaintiff in order to determine whether

the plaintiffs own negligence contributed to the cause of the accident. The effect of such a finding will be explored in more detail in Chapter 12, Defenses. With very few exceptions, the courts have consistently stated that the determination whether the reasonable person standard was met is the same, whether the

actor is a defendant or a plaintiff, despite some argument that it should be different. A couple of jurisdictions have exhibited some flexibility in cases involving mental health patients against their health care providers in medical malpractice actions involving the failure to prevent the patient's suicide. Maunz v. Perales, 276 Kan. 313, 76 P.3d 1027 (2003) (jury should use capacity based standard in determining comparative fault of patient who committed suicide in action against psychiatrist who had treated him). Dodson v. South Dakota Dept, of Human Services, 703 N.W.2d 353 (S.D. 2005) (same).

(B) The Professional

Heath v. Swift Wings, Inc.

Court of Appeals of North Carolina, 1979.

40 N.C.App. 158, 252 S.E.2d 526.

On 3 August 1975 a Piper 180 Arrow airplane crashed immediately after takeoff from the Boone-Blowing Rock Airport. ***[On board the plane were the pilot, Fred Heath, his wife, their son, and a family friend, Vance Smathers. All were killed in the crash. This action alleges that the negligence of the pilot Fred Heath caused the crash.

It was brought by the estates of his wife and son against the estate of the pilot (their husband and father) and Swift Wings, the owner of the airplane. Valerie Heath, the daughter of the pilot and his wife, was the sole survivor of the Heath family and the heir to the estates.]

Plaintiff's evidence, except to the extent it is quoted from the record, is briefly summarized as follows: Mary Payne Smathers Curry, widow of Vance Smathers, observed the takeoff of the Piper aircraft shortly after 5:00 o'clock on 3 August 1975. She observed Fred Heath load and reload the passengers and luggage, apparently in an effort to improve the balance of the aircraft. He also "walked around [the airplane] and looked at everything ***." The airplane engine started promptly and the plane was taxied to the end of the runway where it paused for approximately five minutes before takeoff. The airplane came very close to the end of the runway before takeoff. However " [t]he engine sounded good the entire time, and she did not recall hearing the engine miss or pop or backfire." After takeoff, the airplane "gained altitude but it didn't go up very high" and then "leveled off pretty low". ***

William B. Gough, Jr., a free-lance mechanical engineering consultant and pilot, testified concerning the operation and flight performance of the Piper 180 Arrow. He testified concerning the many factors affecting the takeoff capabilities of the Piper and the calculations to be made by the pilot before takeoff, utilizing flight performance charts. He testified that in his opinion, according to his calculations, the pilot should have used flaps to aid in the takeoff. Furthermore, he stated that in his opinion the reasonably prudent pilot should have made a controlled landing in the cornfield shortly after takeoff if he were experiencing

difficulty attaining flight speed, and that if he had done so [all] would have survived. ***

After the customary motions at the conclusion of all the evidence, the case was submitted to the jury upon voluminous instructions by the trial court. The jury returned a verdict answering the following issue as indicated: "1. Was Fred Heath, Jr., negligent in the operation of PA-28R 'Arrow' airplane on August 3, 1975 as alleged in the complaint?" Answer: "No". Plaintiff appeals[,] assigning error to the exclusion of certain evidence and to the charge to the jury. ***

MORRIS, Chief Judge. ***Assignment of error No. 4 is directed to the trial court's charge concerning the definition of negligence and the applicable standard of care:

"Negligence, ladies and gentlemen of the jury, is the failure of someone to act as a reasonably and careful and prudent person would under the same or similar circumstances. Obviously, this could be the doing of something or the failure to do something, depending on the circumstances. With respect to aviation negligence could be more specifically defined as the failure to exercise that degree of ordinary care and caution, which an ordinary prudent pilot having the same training and experience as Fred Heath, would have used in the same or similar circumstances."

It is a familiar rule of law that the standard of care required of an individual, unless altered by statute, is the conduct of the reasonably prudent man under the same or similar circumstances. [Cc] While the standard of care of the reasonably prudent man remains

constant, the quantity or degree of care required varies significantly with the attendant circumstances. [Cc]

The trial court improperly introduced a subjective standard of care into the definition of negligence by referring to the "ordinary care and caution, which an ordinary prudent pilot having the same training and experience as Fred Heath, would have used in the same or similar circumstances." (Emphasis added.) We are aware of the authorities which support the application of a greater standard of care than that of the ordinary prudent man for persons shown to possess special skill in a particular endeavor. See generally Prosser, Law of Torts (4th ed.) § 32. Indeed, our courts have long recognized that one who engages in a business, occupation, or profession must exercise the requisite degree of learning, skill, and ability of that calling with reasonable and ordinary care. ***[The court lists as examples cases involving a fire sprinkler contractor, an industrial designer, a physician, and an attorney.] Furthermore, the specialist within a profession may be held to a standard of care greater than that required of the general practitioner. [C] Nevertheless, the professional standard remains an objective standard. For example, the recognized standard for a physician is established as

"the standard of professional competence and care customary in similar communities among physicians engaged in his field of practice." [C]

Such objective standards avoid the evil of imposing a different standard of care upon each individual. The instructions in this case concerning the pilot's standard of care are misleading at best, and a

misapplication of the law. They permit the jury to consider Fred Heath's own particular experience and training, whether outstanding or inferior, in determining the requisite standard of conduct, rather than applying a minimum standard generally applicable to all pilots. The plaintiff is entitled to an instruction holding Fred Heath to the objective minimum standard of care applicable to all pilots. ***

This matter was well tried by both counsel for plaintiff and counsel for defendants, and several days were consumed in its trial. Nevertheless, for prejudicial errors in the charge, there must be a

New trial.

Harry C. Martin and Carlton, JJ., concur.

NOTES AND QUESTIONS

1. In evaluating professional services cases, the basic principles involved are relatively uncomplicated: the reasonable prudent person takes on the profession of the actor and an objective standard is applied. See The Germanic, 196 U.S. 589 (1905) (shipmaster--"external standard" applied by Justice Holmes).

2. The standard is expressed in objective form--the knowledge, training and skill (or ability and competence) of an ordinary member of the profession. See, e.g., Centman v. Cobb, 581 N.E.2d 1286 (Ind.App.1991) (holding defendant who had just graduated from medical school and was doing an internship at hospital to same standard of care as a physician) and Arpin v. U.S., 521 F.3d 769 (7th Cir. 2008) (applying Illinois law) (noting that the majority rule holds residents to the same standard of care as physicians who have completed their residency in the same field of medicine). "Average"

member is incorrect instruction because this would literally mean that half of the members could not meet the standard. See, e.g., Nowatske v. Osterloh, 198 Wis.2d 419, 543 N.W.2d 265 (1996) (finding that "average" should be eliminated from pattern jury instruction) and Corbitt v. Tatagari, 804 A.2d 1057 (Del. 2002) ("It is not the standard of care of the most highly skilled, nor is it necessarily that of average members of this profession, since those who have somewhat less than average skills may still possess the degree of skill and care to treat patients competently.") Cf. Gridley v. Johnson, 476 S.W.2d 475 (Mo. 1972) (phrase "in good standing" held to be too vague).

3. The "professional" contracts to render services, but the suit is usually in tort for damage caused by negligence. There is no need to contract specifically to exercise the ordinary skill of the professional--the law imposes the duty. Ordinarily, the professional is liable only for negligence, because the service performed does not have a guaranteed result. In a legal malpractice case, client alleged that the initial demand to settle her

underlying personal injury case was $20,000 but that it had settled for much less than that after mediation. Tarrant v. Ramunno, 2017 WL 664121 (Del. Super. Crt. 2017) (dismissing legal malpractice claim: "It may not have been the outcome that you wanted, but no one can guarantee when they are in litigations the outcome; never in jury trials, never in negotiations and mediations, and never before the judge. You never know how the fact finder is going to find the fact"), aff'd by 171 A.3d 138 (Del. 2017).

4. The service provider may, of course, choose to provide a guarantee, which would be enforceable through contract law. Absent such an express contract for a particular result, the cause of action is in tort. See, e.g., Sciacca v. Polizzi, 403 So.2d 728 (La. 1981) (cause of action for injuries caused by IUD sounded in tort rather than contract despite plaintiffs explicit wording in complaint because no specific guarantees were made by physician); Sullivan v. O'Connor, 363 Mass. 579, 296 N.E.2d 183 (1973) (plastic surgeon promised plaintiff Hedy Lamarr's nose); Haase v. Starnes, 323 Ark. 263, 915 S.W.2d 675 (1996) (ads promised a full, growing head of hair for life). What about an attorney's statement that if client's liquor license was not granted by the Liquor Control Commission, he would "kick ass" at the court of appeals? McComas v. Bocci, 166 Or.App. 150, 996 P.2d 506 (2000) (attorney had denied making statement and court found that statement, if made, constituted a gratuitous prediction that attorney had no contractual duty to produce). For a perspective on how jurors react to tort and contract claims in the same case, see the interviews with jurors from the Sullivan v. O'Connor case (plastic surgeon promised Hedy Lamarr's nose) in Danzig and Watson, The Capability Problem in Contract Law 22--28 (2d ed. 2004).

5. Expert Testimony. Because the professional is engaged in work that is technical in nature--not a matter of "common knowledge"--a lay jury is not in a position to understand without assistance the nature of the work or the application of the standard of care to this work. Thus, a plaintiff must offer expert testimony on the standard of care in order to establish her case. See, for example, Aetna Ins. Co. v. Hellmuth, Obata & Kassabaum, Inc., 392 F.2d 472 (8th Cir.1968)

(applying Missouri law) (expert testimony required to establish reasonable standard of professional care of architect when issues presented are beyond the ordinary competency of lay jurors) and Wong v. Ekberg, 148 N.H. 369, 807 A.2d 1266 (2002) (expert testimony required to establish standard of care for attorney for pretrial preparation of criminal defense case).

6. Professional negligence is commonly called malpractice. On the subject in general, see D. Partlett, Professional Negligence (1985) and Restatement (Second) of Torts § 299A. In addition to pilots, as in the principal case, professional malpractice also includes claims against accountants, architects and engineers, attorneys, chiropractors, doctors, dentists, financial advisors, nurses, optometrists, physical therapists, psychologists, pharmacists, surveyors, and veterinarians. But not clergy and teachers.

Clergy. Some parishioners have attempted to persuade their jurisdictions to recognize a separate tort for clergy malpractice, although none of them has yet succeeded. See, for example, Nally v. Grace Com.

Church of the Valley, 47 Cal.3d 278, 763 P.2d 948, 253 Cal.Rptr. 97 (1988), cert, denied 490 U.S. 1007 (1989) (failure to refer son to psychiatrist when he threatened suicide during pastoral counseling); Destefano v. Grabrian, 763 P.2d 275 (Colo. 1988) (priest engaged in intimate relationship with parishioner during marital counseling); Bladen v. First Presbyterian Church, 857 P.2d 789 (Okla. 1993) (same); Cherepski v. Walker, 323 Ark. 43, 913 S.W.2d 761 (1996) (same); F.G. v. MacDonell, 150 N.J. 550, 696 A.2d 697 (1997)

(same). Most of the cases involve allegations that the cleric engaged in consensual sexual relations with an adult parishioner, with some of the complaints also alleging that the parishioner was receiving marital counseling from the cleric. Others allege that the consent was obtained through intimidation or fraud. Marmelstein v. Kehillat New Hempstead: The Rav Aron Jofen Community Synagogue, 11 N.Y.3d 15, 22, 892 N.E.2d 375, 862 N.Y.S.2d 311 (2008) (plaintiff alleged that her rabbi had induced her to enter into a sexual relationship with him in the guise of therapy to assist her in finding a husband). The courts appear reluctant to recognize a new cause of action where the alleged acts already give rise to an existing cause of action (counseling malpractice or battery) or where such a recognition would entangle the court in defining reasonable conduct within the context of religious tenets. See also Lightman v. Flaum, 736 N.Y.S.2d 300, 97 N.Y.2d 128, 761 N.E.2d 1027 (2001) (declining to recognize cause of action for breach of fiduciary duty where rabbi disclosed--in affidavit in support of husband's bid for child custody--information about wife that she had confided in him during spiritual counseling, expressing fear of entanglement in sorting out whether the disclosure was in accord with religious tenets). But see Doe v. Evans, 814 So.2d 370 (Fla. 2002) (permitting breach of fiduciary duty case to go forward against a Catholic priest based on alleged abuse of marital counseling relationship).

Teachers. Courts generally have refused to recognize educational malpractice, partly because of difficulties in determining why the student failed to learn, partly because it would be difficult to choose among various educational theories to set the standard, and partly because of problems in financing an award. See, for example,

Brantley v. District of Columbia, 640 A.2d 181, 183 (D.C.App.1994) ("There is thus overwhelming judicial authority for the proposition that public school authorities' failure to educate students, or to assign them to the correct school or program, does not give rise to a suit for money damages") and Page v. Klein Tools, Inc., 461 Mich. 703, 610 N.W.2d 900 (2000) (allowing a claim for negligent instruction would avoid the practical reality that, in the end, it is the student who is responsible for his knowledge, including the limits of that knowledge.) But see Ethan Huff and Aaron Tang, "The New Education Malpractice Litigation," 99 Va. L. Rev. 419 (2013) (arguing that the new data-driven, value-added models should cause a rethinking of the rejection of educational malpractice claims). Contrast the educational malpractice claims with Sain v. Cedar Rapids Community School Dist., 626 N.W.2d 115 (Iowa 2001) (cause of action against guidance counselor for negligent misrepresentation of NCAA regulations to student athlete not educational malpractice and thus should have survived summary judgment) and Christensen v. Southern Normal

School, 790 So.2d 252 (Ala. 2001) (distinguishing breach of contract and fraud claims from educational malpractice).

7. Cases involving pharmacists are mixed and the law in this area is still evolving. Happel v. Wal-Mart Stores, Inc., 199 III.2d 179, 766 N.E.2d 1118 (2002) (pharmacy owes duty to warn either customer or her prescribing physician that drug was contraindicated for patient with allergies that pharmacist knew patient had); Kowalski v. Rose Drugs, 2011 Ark. 44, 378 S.W.3d 109 (2011) (joining majority of

jurisdictions that impose no general duty to warn on pharmacists); and Cottam v. CVS Pharmacy, 436 Mass. 316, 764 N.E.2d 814 (2002) (noting that pharmacists have no general duty to warn customers of potential side effects of prescription drugs but, by providing list of some side effects to customer, assume a duty to warn of all side effects) (collecting cases from other jurisdictions).

8. The standard is appropriately modified for specialists within a particular profession holding themselves out to have higher skills. Aves v. Shah, 997 F.2d 762 (10th Cir.1993) (applying Kansas law) (physician who held herself out as a specialist in obstetrics could not object to jury instruction that held her to the higher standard of care of a specialist); Duffey Law Office v. Tank Transport, Inc., 194 Wis.2d 674, 535 N.W.2d 91 (App. 1995) (attorney who held himself out as specialist in labor law held to higher standard).

9. Professionals providing their services pro bono owe the same duty of care as those whose services are compensated. See Becker v. Janinski, 15 N.Y.S. 675, 677 (1891) ("Whether the patient be a pauper or a millionaire, whether he be treated gratuitously or for reward, the physician owes him precisely the same measure of duty, and the same degree of skill and care.")

Hodges v. Carter

Supreme Court of North Carolina, 1954.

239 N.C. 517, 80 S.E.2d 144.

Civil action to recover compensation for losses resulting from the alleged negligence of defendant D.D. Topping and H.C. Carter, now

deceased, in prosecuting, on behalf of plaintiff, certain actions on fire insurance policies.

On 4 June 1948 plaintiffs drug store building located in Bellhaven, N.C., together with his lunch counter, fixtures, stock of drugs and sundries therein contained, was destroyed by fire. At the time plaintiff was insured under four policies of fire insurance against loss of, or damage to, said mercantile building and its contents. He filed proof of loss with each of the four insurance companies which issued said policies. The insurance companies severally rejected the proofs of loss, denied liability, and declined to pay any part of the plaintiff's losses resulting from said fire.

H.C. Carter and D.D. Topping were at the time attorneys practicing in Beaufort and adjoining counties. As they were the ones from whom

plaintiff seeks to recover, they will hereafter be referred to as the defendants. ***

On 3 May 1949 defendants, in behalf of plaintiff, instituted in the Superior Court of Beaufort County four separate actions--one against each of the four insurers. Complaints were filed and summonses were issued, directed to the sheriff of Beaufort County. In each case the summons and complaint, together with copies thereof, were mailed to the Commissioner of Insurance of the State of North Carolina. The Commissioner accepted service of summons and complaint in each case and forwarded a copy thereof by registered mail to the insurance company named defendant therein.

Thereafter each defendant [insurance company] made a special appearance and moved to dismiss the action against it for want of proper service of process for that the Insurance Commissioner was without authority, statutory or otherwise, to accept service of process issued against a foreign insurance company doing business in this State. [The statute provided that the Insurance Commissioner could be served. At that time, service meant personal delivery; there was no statutory authorization for service by mail. The attorneys followed a local custom of mailing the summons instead of having it served personally on the Insurance Commissioner. The insurance companies argued that the Insurance Commissioner did not have the authority to accept what amounted to substituted service by mail.] When the special appearance [objecting to the mode of service] and motion to dismiss came on for hearing at the February Term 1950, the judge presiding concluded that the acceptance of service of process by the Insurance Commissioner was valid and served to subject the movants to the jurisdiction of the court. Judgment was entered in each case denying the motion therein made. Each defendant excepted and appealed. This Court reversed. Hodges v. New Hampshire Fire Insurance Co., 232 N.C. 475, 61 S.E.2d 372. See also Hodges v. Home Insurance Co., 233 N.C. 289, 63 S.E.2d 819.

On 4 March 1952 plaintiff instituted this action in which he alleges that the defendants were negligent in prosecuting his said actions in that they failed to (1) have process properly served, and (2) sue out alias summonses* at the time the insurers filed their motions to dismiss the actions for want of proper service of summons, although

they then had approximately sixty days within which to procure the issuance thereof.

* * *

* [An alias summons is an additional summons issued when the original summons was not served. It is from the Latin "at another time, in another way." Ed.]

Defendants, answering, deny negligence and plead good faith and the exercise of their best judgment.

At the hearing in the court below the judge, at the conclusion of plaintiff's evidence in chief, entered judgment of involuntary nonsuit. Plaintiff excepted and appealed.

202

BARNHILL, Chief Justice. ***Ordinarily when an attorney engages in the practice of the law and contracts to prosecute an action in behalf of his client, he impliedly represents that (1) he possesses the requisite degree of learning, skill, and ability necessary to the practice of his profession and which others similarly situated ordinarily possess; (2) he will exert his best judgment in the prosecution of the litigation entrusted to him; and (3) he will exercise reasonable and ordinary care and diligence in the use of his skill and in the application of his knowledge to his client's cause. [Cc]

An attorney who acts in good faith and in an honest belief that his advice and acts are well founded and in the best interest of his client is not answerable for a mere error of judgment or for a mistake in a point of law which has not been settled by the court of last resort in

his State and on which reasonable doubt may be entertained by well-informed lawyers. [Cc]

Conversely, he is answerable in damages for any loss to his client which proximately results from a want of that degree of knowledge and skill ordinarily possessed by others of his profession similarly situated, or from the omission to use reasonable care and diligence, or from the failure to exercise in good faith his best judgment in attending to the litigation committed to his care. [Cc]

When the facts appearing in this record are considered in the light of these controlling principles of law, it immediately becomes manifest that plaintiff has failed to produce a scintilla of evidence tending to show that defendants breached any duty the law imposed upon them when they accepted employment to prosecute plaintiffs actions against his insurers or that they did not possess the requisite learning and skill required of an attorney or that they acted otherwise than in the utmost good faith.

The Commissioner of Insurance is the statutory process agent of foreign insurance companies doing business in this State, [cc], and when defendants mailed the process to the Commissioner of Insurance for his acceptance of service thereof, they were following a custom [mailing of Complaint and Summons to Commissioner of Insurance rather than personal service upon him] which had prevailed in this State for two decades or more. Foreign insurance companies had theretofore uniformly ratified such service, appeared in response thereto, filed their answers, and made their defense. The right of the Commissioner to accept service of process [by mail] in behalf of foreign insurance companies doing business in this State

had not been tested in the courts. Attorneys generally, throughout the State, took it for granted that under the terms of G.S. § 58-153 such acceptance of service was adequate. And, in addition, the defendants had obtained the judicial declaration of a judge of our Superior Courts that the acceptance of service by the Commissioner subjected the defendants to the jurisdiction of the court. Why then stop in the midst of the stream and pursue some other course?

203

Doubtless this litigation was inspired by a comment which appears in our opinion on the second appeal, Hodges v. Home Insurance Co., 233 N.C. 289, 63 S.E.2d 819. However, what was there said was pure dictum, injected--perhaps ill advisedly--in explanation of the reason we could afford plaintiff no relief on that appeal. We did not hold, or intend to intimate, that defendants had been in any wise neglectful of their duties as counsel for plaintiff.

The judgment entered in the court below is

Affirmed.

NOTES AND QUESTIONS

1. The dictum in the Hodges v. Home Ins. Co. case, referred to in the last major paragraph of the principal case, reads as follows: "At the time defendant entered its motion to dismiss the original action, the plaintiff still had more than sixty days in which to sue out an alias summons and thus keep his action alive. He elected instead to rest his case upon the validity of the service had. The unfortunate result is unavoidable." The statute of limitations had run and no new suit

could be brought. As a result the loss fell on the insured. Is this where it should fall?

2. As the principal case indicates, it is not legal malpractice to fail to advocate for or anticipate a substantial change in law requiring an overruling of controlling precedent. Minkina v. Frankl, 16 N.E.3d 492 (Mass. App. 2014). Nor is it malpractice to fail to anticipate correctly the resolution of an unsettled legal principle. Smith v. McLaughlin, 769 S.E.2d 7 (Va. 2015). Note that the principal case lists three areas in which an attorney's conduct may be questioned.

Possession of Knowledge or Skill. Defendant attorney, representing a wife in a divorce proceeding, failed to claim for his client her interests under the California community property law in her husband's retirement benefits. The attorney mistakenly believed that they were not subject to the claim. The trouble was that he failed to research the topic and would have found the law relatively clear that the retirement benefits were community property. The court upheld a judgment for $100,000. Smith v. Lewis, 13 Cal.3d 349, 530 P.2d 589, 118 Cal.Rptr. 621 (1975). Professionals are not expected to know everything, just what the ordinary member of the profession does. See, Lucas v. Hamm, 56 Cal.2d 583, 364 P.2d 685, 15 Cal.Rptr. 821 (1961), where a will had trust provisions that violated the rules against perpetuities and against restraints on alienation. Of these topics, it was said that "few, if any, areas of the law have been more fraught with more confusion or concealed traps for the unwary draftsman," and the court held the attorney not liable.

Exercise of Best Judgment. While most treatments of the standard of care for professionals have been confined to the element of

knowledge and skill, there are, as the opinion in this case indicates, two other significant elements. The first is the exercise of a discerning judgment. It is usually expressed by saying that the professional is not liable for a "mere error of judgment."

204

Crosby v. Jones, 705 So.2d 1356 (Fla. 1998) (tactical decisions or decisions made on debatable point of law are not actionable so long as attorney exercises best judgment); Thomas v. Bethea, 351 Md. 513, 718 A.2d 1187 (1998) (recommendation to settle); Wood v. McGrath, North, Mullin & Kratz, 256 Neb. 109, 589 N.W.2d 103 (1999) (recommendation to settle without disclosing that settlement agreement conceded issues that client might have won was not exercise of best judgment); Black v. Shultz, 530 F.3d 702 (8th Cir. 2008) (applying Nebraska law) (during legal representation on sexual harassment claim against employer, advice whether to accept severance package from employer and whether to seek other job were possible grounds for legal malpractice claim). The same language is used for doctors, particularly in the use of discretion in making a diagnosis and treatment recommendations. See Blankenship v. Baptist Memorial Hosp., 26 Tenn.App. 131, 168 S.W.2d 491 (1942) (as long as there is room for an honest difference of opinion among competent physicians, a physician who uses his best judgment cannot be liable in negligence, even though it may afterward develop that he was mistaken). Jury instructions must be worded carefully so that jury is not misled into thinking that professional is not liable so long as she exercised her "best judgment" even if that best judgment was in fact below the accepted standard of care. Pleasants v. Alliance Corp., 209 W.Va. 39, 543

S.E.2d 320 (2000) (while noting that "mistake of judgment" jury instruction is still used in many jurisdictions, court finds that it wrongfully injects an element of subjectivity into evaluation of standard of care) and Passarello v. Grumbine, 624 Pa. 564, 87 A.3d 285 (2014) (an instruction that physicians are not liable for their "errors in judgment" when making medical decisions poses a palpable and substantial risk of confusing a jury with respect to the standard of care in a medical malpractice case).

Use of Due Care. The other element involves the professional's use of due care in the application of the professional's skill and knowledge. This element describes steps that are mechanical rather than discretionary and hence because such steps implicate no professional judgment, courts are more likely to find liability. A prime illustration of this type of negligence for lawyers is failure to file a suit before the running of the statute of limitations. For doctors it would be failure to obtain the requisite data on which to exercise trained discretion to develop a diagnosis, by, for example, failing to read the test results.

3. While engaged in litigation, an attorney may run into problems involving all three aspects of the standard care. See the treatment in Woodruff v. Tomlin, 616 F.2d 924 (6th Cir.1980) (applying Tennessee law), alleging negligence in the conduct of personal injury litigation arising out of an automobile accident. The Report of an ABA study, Profile of Legal Malpractice Claims: 2012--2015, found that the most frequent areas of malpractice claims against lawyers are personal injury (18%), real estate (15%), family law (13%), estate and probate (12%), and collection and bankruptcy (10%). The most common alleged errors are failure to know or properly apply the law (13%),

procrastination or failure to follow up (9%), inadequate discovery or investigation (8%), planning error or error in procedure choice (7%), and lost file, document, or evidence (7%).

205

4. Just as the patient-plaintiff in a medical malpractice case must show that the patient would have recovered but for the malpractice, in attorney negligence cases the plaintiff-client must show that but for the attorney's negligence the client would have been successful in prosecuting or defending the claim. See Togstad v. Vesely, Otto, Miller & Keefe, 291 N.W.2d 686 (Minn. 1980). See also Chapter 5, notes 4-6, pages 309--311. On this causation issue, do you think it would be more difficult for a plaintiff-client to bring a successful attorney-negligence case where the claim is that the attorney inadequately prepared for trial or where the claim is that the attorney missed the statute of limitations?

Boyce v. Brown

Supreme Court of Arizona, 1938.

51 Ariz. 416, 77 P.2d 455.

LOCKWOOD, Judge. Berlie B. Boyce and Nannie E. Boyce, his wife, hereinafter called plaintiffs, brought suit against Edgar H. Brown, hereinafter called defendant, to recover damages for alleged malpractice by the defendant upon the person of Nannie E. Boyce. The case was tried to a jury and, at the close of the evidence for plaintiffs, the court granted a motion for an instructed verdict in favor of the defendant, on the ground that there was no competent testimony that he was guilty of any acts of commission or omission

sufficient, as a matter of law to charge him with malpractice. Judgment was rendered on the verdict, and, after the usual motion for new trial was overruled, this appeal was taken. ***

The sole question for our consideration, therefore, is whether, taking the evidence as strongly as is reasonably possible in support of plaintiffs' theory of the case, as we must do when the court instructs a verdict in favor of defendant, there was sufficient evidence to sustain a judgment in favor of plaintiffs. ***

About September 1, 1927, plaintiffs engaged the services of defendant, who for many years had been a practicing physician and surgeon in Phoenix, to reduce a fracture of Mrs. Boyce's ankle. This was done by means of an operation which consisted, in substance, of making an incision at the point of fracture, bringing the broken fragments of bone into apposition, and permanently fixing them in place by means of a metal screw placed in the bone. Defendant continued to attend Mrs. Boyce for three or four weeks following such operation until a complete union of the bone had been established, when his services terminated. There is no serious contention in the record that defendant did not follow the approved medical standard in the treatment of the fractured bone up to this time. No further professional relations existed between the parties until seven years later, in November, 1934, when Mrs. Boyce again consulted him, complaining that her ankle was giving her considerable pain. He examined the ankle, wrapped it with adhesive tape, and then filed the edge of an arch support, which he had made for her seven years before, and which, from use, had grown so thin that the edge was sharp.

About a week later he removed the bandage. Her ankle, however, did not improve after this treatment, but continued to grow more painful until January, 1936, some two years later. At this last-mentioned time she returned to defendant, who again examined the ankle. A few days later she went to visit Dr. Kent of Mesa, who, on hearing the history of the case, and noticing some discoloration and swelling, caused an X-ray of the ankle to be made. This X-ray showed that there had been some necrosis of the bone around the screw. Dr. Kent operated upon Mrs. Boyce, removing the screw, and she made an uneventful recovery, the ankle becoming practically normal.

There are certain general rules of law governing actions of malpractice, which are almost universally accepted by the courts, and which are applicable to the present situation. We state them as follows: ***[In order to sustain a verdict for the plaintiffs in an action for malpractice, the standard of medical practice in the community must be shown by affirmative evidence, and, unless there is evidence of such a standard, a jury may not be permitted to speculate as to what the required standard is, or whether the defendant has departed therefrom. Negligence on the part of a physician or surgeon in the treatment of a case is never presumed, but must be affirmatively proven, and no presumption of negligence nor want of skill arises from the mere fact that a treatment was unsuccessful, failed to bring the best results, or that the patient died. The accepted rule is that negligence on the part of a physician or surgeon, by reason of his departure from the proper standard of practice, must be established by expert medical testimony, unless

the negligence is so grossly apparent that a layman would have no difficulty in recognizing it. The testimony of other physicians that they would have followed a different course of treatment than that followed by the defendant is not sufficient to establish malpractice unless it also appears that the course of treatment followed deviated from one of the methods of treatment approved by the standard in that community.]

***The $_{ne}$ xt question is whether the examination and treatment given by defendant departed from the established standard for cases like that of Mrs. Boyce. The only testimony we have which, in any manner, bears upon medical standards or the proper treatment of Mrs. Boyce in November, 1934, is that of Dr. Kent, who performed the operation on the ankle in January, 1936, and of defendant. The latter testified that he did what was required by Mrs. Boyce's condition as it existed then. Dr. Kent's testimony as to the condition he found in 1936, and what he did, is clear and distinct. He was asked as to how long prior to that time the screw should have been removed, and stated that he could not answer; that, if the ankle was in the same condition as it was when he operated, he would say that the screw should have been removed, but that it was impossible for him to testify as to when the condition justifying removal arose. He was questioned more fully and answered substantially that his first conclusion, if he had been in the position of defendant, when Mrs. Boyce

called on the latter in November, 1934, would have been that arthritis in the ankle joint was causing the pain, but that he would not have

been fully satisfied without having an X-ray made of the ankle. On cross- examination he testified that the method of uniting bone used by defendant was a standard one, and that the screw was not removed, as a rule, unless it made trouble. Nowhere, however, did Dr. Kent testify as to what was the proper standard of medical care required at the time defendant treated Mrs. Boyce in 1934, or as to whether, in his opinion, the treatment given deviated from that standard. The nearest he came to such testimony was the statement that he personally would have had an X-ray taken, but he did not say the failure to do so was a deviation from the proper standard of treatment.

Counsel for plaintiffs, in their oral argument, apparently realized the weakness of their evidence on the vital point of what the proper medical standard required in 1934, and based their claim of negligence almost entirely upon the failure of defendant to take an X-ray of Mrs. Boyce's ankle at that time. They urge that this comes within the exception to the general rule, in that a failure to do so is such obvious negligence that even a layman knows it to be a departure from the proper standard. We think this contention cannot be sustained. It is true that most laymen know that the X-ray usually offers the best method of diagnosing physical changes of the interior organs of the body, and particularly of the skeleton, short of an actual opening of the body for ocular examination, but laymen cannot say that in all cases where there is some trouble with the internal organs that it is a departure from standard medical practice to fail to take an X-ray. Such things are costly and do not always give a satisfactory diagnosis, or even as good a one as other types of examination may give. In many cases the taking of an X- ray might

be of no value and put the patient to unnecessary expense, and, in view of the testimony in the present case as to the arthritis which Mrs. Boyce had, and which Dr. Kent testified would have been his first thought as to the cause of Mrs. Boyce's pain in 1934, we think it is going too far to say that the failure to take an X-ray of Mrs. Boyce's ankle at that time was so far a departure from ordinary medical standards that even laymen would know it to be gross negligence. Since, therefore, there was insufficient evidence in the record to show that defendant was guilty of malpractice, under the rules of law above set forth, the court properly instructed a verdict in favor of the defendant.

The judgment of the superior court is affirmed.

NOTES AND QUESTIONS

1. In the principal case, do you suppose that the defendant was not negligent or just not proved to be negligent? Did plaintiff lose because her attorney failed to ask the right questions of Dr. Kent or because Dr. Kent really did not believe that Dr. Brown violated the standard of care in failing

to take the x-ray? Why didn't Mrs. Boyce's attorney choose a different expert witness to establish the standard of care?

2. Customary Practice (Violation of). It is not enough that an expert witness testify that he would not personally follow the defendant's practice; he must also testify that the practice did not conform with the standard of care of an ordinary member of the profession. See, e.g., Johnson v. Riverdale Anesthesia Assocs., 275 Ga. 240, 563

S.E.2d 431 (2002) (because the standard of care in medical malpractice cases is that which is employed by the medical profession generally, and not what one individual physician would do under the same or similar circumstances, how a testifying medical expert personally would have treated a patient is not relevant to the issue of whether a physician committed malpractice). It may, however, be admissible to challenge the credibility of the expert witness if the witness's own practice is different from what he asserts for the standard of care. Condra v. Atlanta Orthopaedic Group, P.C., 285 Ga. 667, 681 S.E.2d 152 (2009).

3. Proof that a professional violated the standard of care usually must be established by expert testimony, unless the negligence is so obvious that it is within the common knowledge and experience of lay jurors. This is what the patient in the principal case argued--that failing to take an x-ray was so obviously negligent, there was no need for expert testimony. See also Welte v. Bello, 482 N.W.2d 437 (Iowa 1992) (during surgery on her nose, patient suffered third-degree burns on her arm caused by anesthesia that escaped from vein into surrounding tissue); Dickerson v. Fatehi, 253 Va. 324, 484 S.E.2d 880 (1997) (following surgery on her neck, patient had severe pain in her right arm and hand and 20 months later it was discovered that surgeon had failed to remove a hypodermic needle with a plastic attachment from the surgical site). For a detailed discussion of the common knowledge exception and scores of examples of rulings whether conduct was within the common knowledge exception, see King, The Common Knowledge Exception to the Expert Testimony Requirement for Establishing the Standard of Care in Medical Malpractice, 59 Ala. L. Rev. 51 (2007). See also McGathey v.

Brookwood Health Svcs., 143 So.3d 95 (Ala. 2013) (during arthroscopic shoulder surgery, patient suffered burns on her arm from a metal bar used to hold it in place during surgery that had not cooled sufficiently after having been sterilized by heating it) and the res ipsa loquitur cases, note 2, page 273.

4. The requirement of expert testimony to establish the standard of care applies to malpractice cases across the professions. See, for example, Singh v. Krueger, 39 Kan.App.2d 637, 183 P.3d 1, 4 (2008) ("The intricacies of the interplay between state and federal jurisdiction, the customs of a particular court, and the federal law surrounding immigration and deportation are all specialized areas of the law about which a lay juror would not know.") and Davis v. Enget, 779 N.W.2d 126, 127 (N.D. 2010) (plaintiff may have a firm belief that defendants' representation was insufficient, but his lay opinion cannot supplant that of an expert because the nature of the alleged errors are not so egregious or obvious that a layperson could perceive them). But see Yager v. Clauson, 101 A.3d 6 (N.H. 2014) (remanding to trial court to determine whether the facts of the case require an expert or are

within the realm of common knowledge in case involving failure to file the complaint within the statute of limitations).

5. Customary Practice (Compliance with). For the professions in general, evidence as to customary practice is admissible and may prove very influential. For the medical profession, it is usually found to be controlling and the jury are usually told that the plaintiff cannot recover unless the plaintiff proves that the defendant's conduct was

not in accord with recognized medical practice. There are very few cases where the plaintiff has been allowed to recover despite the fact that the defendant health care provider complied with the customary practice of the profession. See Helling v. Carey, 83 Wash.2d 514, 519 P.2d 981 (1974) (ophthalmologist held negligent as a matter of law for failing to routinely test patients under age 40 for glaucoma despite expert testimony from both sides that the standards of the profession did not require such testing of patients that age; decision based on balancing court's perception of seriousness of potential risk against cost of test). This decision has been criticized by the commentators and reversed by the Washington legislature. See e.g., King, In Search of a Standard of Care for the Medical Profession: The "Accepted Practice" Formula, 28 Vand. L. Rev. 1213 (1975) and Keeton, Medical Negligence--The Standard of Care, 10 Tex.Tech.L. Rev. 351 (1979).

For an interesting pair of cases with opposite results on this issue in the context of the obligation of a blood bank to do surrogate testing to screen for the AIDS virus before the AIDS antibody test was available, see Osborn v. Irwin Memorial Blood Bank, 5 Cal.App.4th 234, 7 Cal.Rptr.2d 101 (1992) ("professional prudence is defined by actual or accepted practice within a profession, rather than theories about what 'should' have been done"; j.n.o.v. for blood bank upheld) and United Blood Services v. Quintana, 827 P.2d 509 (Colo. 1992) (applicable standard of care adopted by a profession, as established by expert testimony, is presumed to constitute due care for those practicing in that profession, but that presumption may be rebutted; plaintiffs entitled to new trial and opportunity to prove universal practice of blood banks was negligent). See also Peters, The Quiet

Demise of Deference to Custom: Malpractice Law at the Millennium, 57 Wash. & Lee L. Rev. 163 (2000) (arguing that traditional deference to custom is eroding in many states).

Morrison v. MacNamara

District of Columbia Court of Appeals, 1979.

407 A.2d 555.

[Appellant Morrison reported to appellee medical laboratory in Washington, D.C., for a urethral smear test, which was physically invasive, for trichomonas, a urinary tract infection. The test was administered while Morrison was standing. Morrison had an adverse reaction to the test--he fainted and struck his head on a metal blood pressure stand and on the floor, causing permanent loss of his senses of smell and taste, among other injuries.

210

At trial, Morrison presented an expert witness from Michigan who testified that the test often causes the patient to feel faint and that the "national standard of care" requires that the patient sit or lie down during the test. The trial court refused to instruct the jury that a national standard of care applied, instead instructing them that a local standard applied. Morrison appeals that ruling. The defendants presented expert witnesses from Washington area laboratories who testified that they always administered the test with the patient standing.]

NEWMAN, Chief Judge: ***At the close of all the evidence, appellant submitted several jury instructions which were based on the national standard of care. Appellant maintained that in view of the national

certification of the laboratory, the laboratory was under a duty to adhere to nationally accepted standards for administering the urethral smear test, and that the jury should be so instructed. Appellees argued that the laboratory owed only the duty to adhere to that standard of medical care recognized in the Washington, D.C. metropolitan area. The trial court agreed with appellees.

***In medical malpractice, a term referring to ordinary negligence concepts in the area of medical diagnosis, treatment, and the like, the duty of care is generally formulated as that degree of reasonable care and skill expected of members of the medical profession under the same or similar circumstances. ***

The locality rule states that the conduct of members of the medical profession is to be measured solely by the standard of conduct expected of other members of the medical profession in the same locality or the same community. [Cc]

This doctrine is indigenous to American jurisprudence and appears to have developed in the late nineteenth century. [Cc] The rule was designed to protect doctors in rural areas who, because of inadequate training and experience, and the lack of effective means of transportation and communication, could not be expected to exhibit the skill and care of urban doctors. ***

In addition, it was argued that in view of the ability of urban areas to attract the most talented doctors, a rule which would hold rural doctors to urban standards of care would precipitate the departure of doctors from rural areas and thereby leave rural communities without sufficient medical care. [Cc] In sum, the locality rule was premised on the notion that the disparity in education and access to advances

in medical science between rural and urban doctors required that they be held to different standards of care.

The cases in this jurisdiction exhibit a lack of uniformity on the issue of the geographic area in which the conduct of members of the medical profession is to be measured. For example, a number of cases state that members of the medical profession are held to the skill and learning exercised by members of their profession in the District of Columbia. [Cc]

211

In other cases, the standard is referred to as that degree of care exercised by other members of the medical profession in the District or a similar locality. [Cc] Finally, a number of cases have articulated the medical standard of care without referring to any geographic limitation whatsoever. [Cc] Since courts in this jurisdiction were never directly presented with this issue, the empirical validity of the assumptions behind the locality rule has not previously been examined.

Even a cursory analysis of the policy behind the locality doctrine reveals that whatever relevance it has to the practice of medicine in remote rural communities, it has no relevance to medical practice in the District of Columbia. Clearly the nation's capital is not a community isolated from recent advances in the quality of care and treatment of patients. Rather, it is one of the leading medical centers in quality health care. ***

Moreover, any purported disparity between the skills of practitioners in various urban centers has for the most part been eliminated. Unlike the diversified and often limited training that was available a

hundred years ago, medical education has been standardized throughout the nation through a system of national accreditation. [Cc] Moreover, the significant improvements in transportation and communication over the past hundred years cast further doubt on continued vitality of the doctrine. ***In sum, the major underpinnings of the locality doctrine no longer obtain. The locality rule has been quite properly criticized as a relic of the nineteenth century which has no relevance to the realities of modern medical practice. [Cc]

Quite apart from the locality rule's irrelevance to contemporary medical practice, the doctrine is also objectionable because it tends to immunize doctors from communities where medical practice is generally below that which exists in other communities from malpractice liability. [Cc] Rather than encouraging medical practitioners to elevate the quality of care and treatment of patients to that existing in other communities, the doctrine may serve to foster substandard care, by testing the conduct of medical professionals by the conduct of other medical professionals in the same community.

The locality rule is peculiar to medical malpractice. Architects are not held to a standard of conduct exercised by other architects in the District or a similar locality. [C] Moreover, the conduct of lawyers is not measured solely by the conduct of other lawyers in the District or a similar community. [Cc]

Despite these criticisms, the locality rule is still followed in several jurisdictions. ***

Courts which have abandoned the locality rule have taken different approaches in defining the geographical boundary within which the

conduct of a medical practitioner is to be measured. For example, a number of courts have modified the locality rule by extending the

212

geographical reference group of the standard of care to include that of "the same or similar localities." [Cc]

This approach has been criticized because of the difficulty in determining whether two communities are similar. [Cc] In addition, the similar locality formulation has been criticized for containing the same deficiencies as the traditional locality rule, i.e., if the standard of conduct in a similar community is substandard, the similar locality rule would immunize those medical professionals whose conduct conforms to the substandard medical practice in a similar community. [Cc]

Other courts, noting that medical standards have been nationalized largely through a system of national board certification, have adopted a national standard of care, and accordingly have eliminated any reference to a geographically defined area in their formulation of the standard of care applicable to medical professionals. [Cc] The import of these decisions is that health care professionals who are trained according to national standards and who hold themselves out to the public as such, should be held to a national standard of care.

We are in general agreement with those courts which have adopted a national standard of care. Varying geographical standards of care are no longer valid in view of the uniform standards of proficiency established by national board certification. ***

Although we have found no cases which address the issue of the standard of care applicable to a clinical laboratory, the same reasons which justify the application of a national standard of care to physicians and hospitals appear to apply with equal validity to medical laboratories. Medical laboratories are often staffed and operated by doctors who undergo the same rigorous training as other physicians. The opportunities for keeping abreast of medical advances that are available to doctors are equally available to clinical laboratories. Indeed medical laboratories are often an integral part of a hospital. [C] Moreover, clinical laboratories generally conduct many of the routine tests that would normally be performed by physicians and hospitals. Accordingly, they owe similar duties in their care and treatment of patients. [C]

Thus we hold that at least as to board certified physicians, hospitals, medical laboratories, and other health care providers, the standard of care is to be measured by the national standard. It follows that an instruction which compares a nationally certified medical professional's conduct exclusively with the standard of care in the District or a similar community is erroneous.

In the present case, appellees concede that they are a nationally certified medical laboratory and that they hold themselves out to the public as such. Appellant's expert witness testified at trial that the proper procedure to be employed in conducting a urethral smear test, according to national standards, is with the patient in a sitting or prone position. Appellees' expert witnesses who were all from the Washington

metropolitan area testified that they were not aware of any national standards for conducting the test and that they always conducted the test with the patient in a standing position. However, the trial court instructed the jury that the appellees' conduct is to be compared solely with the standard of care prevailing in Washington, D.C. Thus, in effect the jury was instructed to ignore the testimony of appellant's expert witness on the standard of care. This instruction was error. The conflict in expert testimony was for the jury to resolve. Accordingly, we vacate the judgment in favor of appellees and order a new trial. ***Reversed.

NOTES AND QUESTIONS

1. What happens on remand at the new trial if each side's experts give the same testimony but the jury is given the correct instruction on considering expert testimony?

2. It was traditional with the medical profession to state the standard of knowledge and skill in terms of a practitioner in good standing in the local community in which the defendant practices. This is sometimes known as the "strict locality" rule. As the principal case notes, it arose in the days in which medical education was not standardized and there was wide variance in the knowledge, skill, and practices of doctors in different parts of the country, particularly between rural and urban areas.

The locality rule has not been generally followed in regard to the other professions. See, e.g., Russo v. Griffin, 147 Vt. 20, 510 A.2d 436 (1986) (adopting statewide standard of care in attorney malpractice case); Chapman v. Bearfield, 207 S.W.3d 736, 740 (Tenn. 2006) ("while there may be local rules of practice within the

various judicial districts of our State, there are no local standards of care')', and Hamilton v. Sommers, 2014 S.D. 76, 855 N.W.2d 855 (2014) (while locality may be relevant to the expectations a client has of his lawyer, a statewide focus would usually be appropriate.) But the expert must actually be qualified to opine on the standard of care and the qualification is more than just familiarizing himself with the case law of that state. Phillips v. Wilks, Lukoff & Bracegirdle, LLC, 2014 WL 4930693 (Del. 2014) (although competency requirements are not designed to preclude all testimony from out-of-state experts, expert witnesses must be "well acquainted or thoroughly conversant" with the degree of skill ordinarily employed in the local community and locality where the alleged malpractice occurred). If the out-of-locality expert consults with a local expert to familiarize herself with the local standard of care, plaintiff must disclose the non-testifying expert's identity. Quigley v. Kemp, 162 Idaho 408, 398 P.3d 141 (2017).

3. Critics of the strict locality rule in medical malpractice cases have charged that it reinforced the status quo of care in any given community, served as a disincentive for the elevation of the standard of care, and sometimes made it difficult for the plaintiff to locate an expert witness if physicians within the same community were reluctant to testify against each other. See, e.g., McGulpin v. Bessmer, 241 Iowa 1119, 43 N.W.2d 121 (1950)

(criticizing requirement of expert testimony of physician from same community).

4. Most jurisdictions now have adopted a "similar community in similar circumstances" test, which is designed to balance the need to avoid evaluating a general practitioner in a rural area by the same standards as a specialist in an urban teaching hospital with the need of the plaintiff for access to expert testimony. See, e.g., Cox v. Board of Hosp. Mgrs. for City of Flint, 467 Mich. 1, 651 N.W.2d 356 (2002) (reaffirming same or similar community as standard of care to be applied to nurse). But see Vergara v. Doan, 593 N.E.2d 185 (Ind. 1992) (standard of care does not focus on locality but uses it as one of factors to be considered, along with advances in profession, availability of facilities, and whether health care provider was specialist or general practitioner); Idaho Code Ann. § 6-1012 (standard of health care practice of the community in which such care allegedly was or should have been provided); and Nestorowich v. Ricotta, 97 N.Y.2d 393, 740 N.Y.S.2d 668, 767 N.E.2d 125 (N.Y. 2002) (quoting New York common law locality rule).

5. Some jurisdictions have gone further and adopted a "national standard," especially for specialists who are certified by a national board within their specialty areas. In addition to the principal case, see, e.g., Shilkret v. Annapolis Emergency Hosp. Ass'n., 276 Md. 187, 349 A.2d 245 (1975) (because "medical profession itself recognizes national standards for specialists that are not determined by geography, the law should follow suit"); Hall v. Hilbun, 466 So.2d 856 (Miss. 1985) (adopting a nationwide standard for care and skill but not for resources); and Jordan v. Bogner, 844 P.2d 664 (Colo. 1993) ("family practice" specialist who delivered baby in rural area held to national standard because specialist); Sheeley v. Memorial Hospital, 710 A.2d 161 (R.1.1998) (abandoning "same or similar"

community test for national standard). But see Robinson v. LeCorps, 83 S.W.3d 718 (Tenn. 2002) (same or similar community even though surgeon was specialist, based on language of statute).

6. To reduce the costs of defending professional malpractice claims where the plaintiff is ultimately unable to produce an expert witness to testify that the standard of care was violated, many jurisdictions require that the plaintiff have obtained an expert opinion before filing suit or shortly thereafter. Some of those statutes apply to all professionals and others apply only to medical malpractice. See, e.g., Pa. Rule of Civ. P. 1042.3 (certificate of merit must be filed within 60 days of filing of complaint in all professional malpractice cases); N.J. Stats. Ann. 2A:53A--27 (affidavit of merit must be filed within 60 days of filing of the answer to the complaint in all malpractice actions against a licensed professional); Fla. Stat. 766.104 (complaint in medical negligence case must contain certificate of counsel that a reasonable investigation gave rise to a good faith belief that grounds for negligence exist); and Ohio Rule of Civ. P. 10(D)(2) (affidavit of merit must be filed with complaint in action containing medical, dental, optometric, or chiropractic claim; plaintiff may seek extension of time to file affidavit for good cause). If the case is filed in federal court, must the plaintiff comply with the state statutory requirement? Liggon-Redding v. Sugarman, 659 F.3d 258 (3d Cir.

2011) (Pennsylvania's affidavit of merit statute is substantive state law under Erie analysis and thus had to be applied by federal court applying Pennsylvania malpractice law).

Scott v. Bradford

Supreme Court of Oklahoma, 1979.

606 P.2d 554.

DOOLIN, Justice. This appeal is taken by plaintiffs in trial below, from a judgment in favor of defendant rendered on a jury verdict in a medical malpractice action.

Mrs. Scott's physician advised her she had several fibroid tumors on her uterus. He referred her to defendant surgeon. Defendant admitted her to the hospital where she signed a routine consent form prior to defendant's performing a hysterectomy. After surgery, Mrs. Scott experienced problems with incontinence. She visited another physician who discovered she had a vesico-vaginal fistula which permitted urine to leak from her bladder into the vagina. This physician referred her to an urologist who, after three surgeries, succeeded in correcting her problems.

Mrs. Scott, joined by her husband, filed the present action alleging medical malpractice, claiming defendant failed to advise her of the risks involved or of available alternatives to surgery. She further maintained had she been properly informed she would have refused the surgery.

The case was submitted to the jury with instructions to which plaintiffs objected. The jury found for defendant and plaintiffs appeal.
***

The issue involved is whether Oklahoma adheres to the doctrine of informed consent as the basis of an action for medical malpractice,

and if so did the present instructions adequately advise the jury of defendant's duty.

Anglo-American law starts with the premise of thoroughgoing self-determination, each man considered to be his own master. This law does not permit a physician to substitute his judgment for that of the patient by any form of artifice. The doctrine of informed consent arises out of this premise.

Consent to medical treatment, to be effective, should stem from an understanding decision based on adequate information about the treatment, the available alternatives, and the collateral risks. This requirement, labeled "informed consent," is, legally speaking, as essential as a physician's care and skill in the performance of the therapy. The doctrine imposes a duty on a physician or surgeon to inform a patient of his options and their attendant risks. If a physician breaches this duty, patient's consent is defective, and physician is responsible for the consequences.

216

If treatment is completely unauthorized and performed without any consent at all, there has been a battery. However, if the physician obtains a patient's consent but has breached his duty to inform, the patient has a cause of action sounding in negligence for failure to inform the patient of his options, regardless of the due care exercised at treatment, assuming there is injury. ***

The first buds of court decisions heralding this new medical duty are found in Saigo v. Leland Stanford, Jr., University Board of Trustees, 154 Cal.App.2d 560, 317 P.2d 170 (1957). That court grounded the disclosure requirement in negligence law holding a physician violates

a duty to his patient and subjects himself to liability if he withholds any facts which are necessary to form the basis of an intelligent consent by the patient to the proposed treatment. The court strongly suggested a physician is obligated not only to disclose what he intends to do, but to supply information which addresses the question of whether he should do it. This view was a marked divergence from the general rule of "professional standard of care" in determining what must be disclosed. Under that standard, earlier decisions seemed to perpetuate medical paternalism by giving the profession sweeping authority to decide unilaterally what is in the patient's best interests. Under the "professional standard of care" a physician needed only to inform a patient in conformance with the prevailing medical practice in the community.

More recently, in perhaps one of the most influential informed consent decisions, Canterbury v. Spence, 150 U.S.App.D.C. 263, 464 F.2d 772 (D.C.Cir.1972), cert. den. 409 U.S. 1064, the doctrine received perdurable impetus. Judge Robinson observed that suits charging failure by a physician adequately to disclose risks and alternatives of proposed treatment were not innovative in American law. He emphasized the fundamental concept in American jurisprudence that every human being of adult years and sound mind has a right to determine what shall be done with his own body. True consent to what happens to one's self is the informed exercise of a choice. This entails an opportunity to evaluate knowledgeably the options available and the risks attendant upon each. It is the prerogative of every patient to chart his own course and determine which direction he will take.

The decision in Canterbury recognized the tendency of some jurisdictions to turn this duty on whether it is the custom of physicians practicing in the community to make the particular disclosure to the patient. That court rejected this standard and held the standard measuring performance of the duty of disclosure is conduct which is reasonable under the circumstances: "[We cannot] ignore the fact that to bind disclosure obligations to medical usage is to arrogate the decision on revelation to the physician alone." We agree. A patient's right to make up his mind whether to undergo treatment should not be delegated to the local medical group. What is reasonable disclosure in one instance may not be reasonable in another. We decline to adopt a standard based on

the professional standard. We, therefore, hold the scope of a physician's communications must be measured by his patient's need to know enough to enable him to make an intelligent choice. In other words, full disclosure of all material risks incident to treatment must be made. There is no bright line separating the material from the immaterial; it is a question of fact. A risk is material if it would be likely to affect patient's decision. When non-disclosure of a particular risk is open to debate, the issue is for the finder of facts.

This duty to disclose is the first element of the cause of action in negligence based on lack of informed consent. However, there are exceptions creating a privilege of a physician not to disclose. There is no need to disclose risks that either ought to be known by everyone or are already known to the patient. Further, the primary duty of a physician is to do what is best for his patient and where full

disclosure would be detrimental to a patient's total care and best interests a physician may withhold such disclosure, for example, where disclosure would alarm an emotionally upset or apprehensive patient. Certainly too, where there is an emergency and the patient is in no condition to determine for himself whether treatment should be administered, the privilege may be invoked.

The patient has the burden of going forward with evidence tending to establish prima facie the essential elements of the cause of action. The burden of proving an exception to his duty and thus a privilege not to disclose, rests upon the physician as an affirmative defense.

[The court then discussed the requirements of causation and damages in informed consent cases.]

In summary, in a medical malpractice action a patient suing under the theory of informed consent must allege and prove:

(1) defendant physician failed to inform him adequately of a material risk before securing his consent to the proposed treatment;

(2) if he had been informed of the risks he would not have consented to the treatment;

(3) the adverse consequences that were not made known did in fact occur and he was injured as a result of submitting to the treatment.

As a defense, a physician may plead and prove plaintiff knew of the risks, full disclosure would be detrimental to patient's best interests or that an emergency existed requiring prompt treatment and patient was in no condition to decide for himself.

Because we are imposing a new duty on physicians, we hereby make this opinion prospective only, affecting those causes of action

arising after the date this opinion is promulgated.

The trial court in the case at bar gave rather broad instructions upon the duty of a physician to disclose. The instructions objected to did instruct that defendant should have disclosed material risks of the

218

hysterectomy and feasibility of alternatives. Instructions are sufficient when considered as a whole they present the law applicable to the issues. Jury found for defendant. We find no basis for reversal.

Affirmed.

[Concurring in part and dissenting in part opinion would have adopted the reasonable person test set out in Canterbury v. Spence.]

NOTES AND QUESTIONS

1. The doctrine of informed consent developed first as a basis for vitiating the consent and holding that an action of battery would lie, but it proved to be too strong a remedy for the evil it purported to cure. The battery theory is now generally abandoned, except, of course, where the physician did not obtain any consent at all or exceeded the scope of consent. See, e.g., Mohr v. Williams, page 111 and cf. Mayr v. Osborne, 293 Va. 74, 795 S.E.2d 731 (2017) (fusing wrong level of patient's spine may be medical malpractice, but it is not battery or lack of informed consent).

Pennsylvania is one of a few jurisdictions that continue to categorize informed consent as a battery action. Thus, it applies only to surgery or other invasive procedures, and not to the prescribing of drugs. Morgan v. Rose, 550 Pa. 202, 704 A.2d 617 (1997) (reaffirming battery basis for action but noting statute extends informed consent

requirement to radiation, chemotherapy, blood transfusions, and experimental drug therapy).

2. With the widespread abandonment of the battery rationale, the courts held that the question was whether the doctor was negligent in failing to disclose the nature, consequences, material risks, and alternatives of any proposed treatment. This brought into play the doctrine of customary practice and the need of having expert medical testimony concerning the practice of a physician using customary care. Thus, if the cause of action is for informed consent, the plaintiff, like the plaintiff in the principal case, usually needs an expert witness, while she does not need an expert witness if the cause of action is for battery.

Because of gum disease, plaintiff was advised to have her teeth extracted. Her dentist anesthetized her entire oral cavity and began a full extraction of all thirty-two of her teeth. Plaintiff says dentist never told her he was planning to extract all her teeth at one visit and did not obtain her consent to do so. Dentist, arguing that the case was based on lack of informed consent, moved for summary judgment because plaintiff did not have an expert witness to establish the standard--the usual and customary information given to patients to procure consent in similar situations. The Tennessee Supreme Court found the case was for medical battery, not lack of informed consent, and did not require an expert witness: "Lack of informed consent in a medical malpractice action under Tenn. Code Ann. § 29-16-118 operates to negate a patient's authorization for a procedure thereby giving rise to a cause of action for battery. [C] There is, however, no prior authorization or consent in a medical battery case to be negated by expert testimony. The primary

consideration in a medical battery case is simply whether the patient knew and authorized a procedure. This determination

219

does not require the testimony of an expert witness." Blanchard v. Kellum, 975 S.W.2d 522, 524 (Tenn. 1998). See also Walls v. Shreck, 265 Neb. 683, 658 N.W.2d 686 (2003) (no expert testimony needed to establish standard for informed consent if surgeon operated on right eye after obtaining consent to operate on left eye).

3. This traditional, professional standard, which focuses on what physicians usually tell patients about a particular procedure, continues to be the rule in many jurisdictions. Some jurisdictions, however, have changed the test from what the reasonable physician would disclose to what the reasonable patient would want to know. See Culbertson v. Mernitz, 602 N.E.2d 98 (Ind. 1992) for a discussion of the competing policy concerns present in the alternative standards. If a state adopts the "reasonable patient" standard, does the patient still need expert testimony to establish a prima facie case? Carr v. Strode, 79 Haw. 475, 904 P.2d 489 (1995) (plaintiff retains the burden of providing expert medical testimony as to the nature of risks inherent in a particular treatment, the probabilities of therapeutic success, the frequency of the occurrence of particular risks, and the nature of available alternatives to treatment). If a state adopts the "reasonable patient" standard, is the doctor permitted to introduce expert witness testimony concerning the informed consent? Marsingill v. O'Malley, 128 P.3d 151 (Alaska 2006) (In response to late night call from patient in abdominal pain, physician recommended she go to emergency room but did not

speculate as to what might be wrong or the gravity of her condition. She decided to "tough it out for awhile," her husband later found her unconscious, and she suffered serious consequences from delaying her trip to the emergency room. Doctor was permitted to offer expert testimony about what the reasonable patient would want to know in those circumstances.) How detailed (graphic) does it have to be? Sargent v. Shaffer, 467 S.W.3d 198 (Ky. 2015) (is it enough for physician to say "nerve damage" to cover the possibility of paralysis and loss of bowel and bladder control?).

4. Note that the physician is required to inform about "material" risks. What does that mean? Is a 1-3 percent possibility material? Martin v. Richards, 192 Wis.2d 156, 531 N.W.2d 70 (1995) (in light of serious consequences, including death, a 1-3 percent possibility is not remote). Canterbury v. Spence, 464 F.2d 772 (D.C.Cir.1972) (although the risk of a complication may be small, such risk may be significant to a patient's decision in light of the potentially severe consequences).

5. Most informed consent cases involve whether to disclose particular risks of treatment or particular alternatives to treatment. But what if the physician fails to tell the patient that she could do nothing at all and the condition might disappear on its own? Wecker v. Amend, 22 Kan.App.2d 498, 918 P.2d 658 (1996) (if doing nothing is medically acceptable alternative, which was contested in case, then patient must be so informed). What if the physician fails to tell the patient of the risks of refusing a diagnostic test? Truman v. Thomas, 27 Cal.3d 285, 611 P.2d 902, 165 Cal.Rptr. 308 (1980) (physician liable for failing to warn patient of risk of refusing pap smear screening test for cervical cancer). What if the physician fails

to inform the patient of the availability of an alternative diagnostic test? Compare Martin

220

v. Richards, 192 Wis.2d 156, 531 N.W.2d 70 (1995) (physician liable for failing to inform parents of child who suffered head injury in bicycle accident of availability of CAT scan) with Hall v. Frankel, 190 P.3d 852 (Colo. App. 2008) (physician does not have a duty to disclose the availability of diagnostic and treatment procedures he or she has concluded are not medically indicated; errors of this sort are covered by claims of negligence). What if physician fails to inform patient of psychological (not physical) risks of a procedure? Curtis v. MRI Imaging Services II, 327 Or. 9, 956 P.2d 960 (1998) (physician may be liable for failing to inform patient of possible claustrophobic effects of MRI procedure). What if the physician fails to inform the patient that her condition has changed since the original informed consent was given? After suffering pregnancy complications, patient agreed to stay in hospital and be monitored for several weeks and to postpone the birth of her baby as long as possible to allow him time to develop more fully. During the ensuing weeks, tests revealed that her condition was worsening, but she alleged that the physician failed to tell her that. If he had told her, she would have withdrawn her agreement to wait and sought earlier delivery of her son. Is this a failure of informed consent? McQuitty v. Spangler, 410 Md. 1, 976 A.2d 1020 (2009) (finding that it could be).

6. Most informed consent cases are against physicians. If the treating physician with privileges at a hospital fails to obtain consent to a blood transfusion, does the hospital have a duty to obtain

consent? Does the blood bank that provided the blood? Ward v. Lutheran Hospitals & Homes Soc. of Am., Inc., 963 P.2d 1031 (Alaska 1998) (noting that overwhelming weight of authority holds that hospital does not owe duty to patient to obtain consent for treatment when patient is under care of independent physician--not an employee of the hospital--and finding that neither hospital nor blood bank owed patient a duty). But see Bryant v. HCA Health Svces., 15 S.W.3d 804 (Tenn. 2000) (such a duty might exist if federal regulations required hospital to obtain consent as requirement for its participation in FDA study of medical device). At least some courts have ruled that the duty cannot be delegated to a staff member. Shinai v. Toms, 640 Pa. 295, 162 A.3d 429 (2017) (without direct dialogue and a two-way exchange between the physician and patient, the physician cannot be confident that the patient comprehends the risks, benefits, likelihood of success, and alternatives).

Moore v. The Regents of the University of California

Supreme Court of California, 1990.

51 Cal.3d 120, 793 P.2d 479, 271 Cal.Rptr. 146.

Opinion by PANELLI, J.:

[Plaintiff, John Moore, first visited UCLA Medical Center in October 1976, shortly after being diagnosed with hairy-cell leukemia. Defendant Golde, his treating physician at UCLA, withdrew blood, bone marrow, and other bodily substances to test them. Dr. Golde then recommended that Moore's spleen be removed. Based upon

Dr. Golde's representation that the removal of the spleen was necessary to slow down the progress

221

of the disease, Moore consented to the recommended surgery. Moore alleged that Dr. Golde "formed the intent and made the arrangements to obtain portions of his spleen following the removal" to use them in research which was unrelated to Moore's medical care. Moore returned to UCLA Medical Center several times between November 1976 and September 1983 at Dr. Golde's direction and based on Dr. Golde's representations that the follow up was necessary for his treatment. After relocating to the Seattle area, Moore continued to return to UCLA because he had been told the procedures could only be performed there. In fact, Dr. Golde and some colleagues had discovered that Moore's cells were unusually useful in the genetic research they were performing. Dr. Golde and others developed and patented a cell line from Mr. Moore's cells and then licensed it for commercial development to Genetics Institute and Sandoz Pharmaceuticals, also named as defendants in the action.

Plaintiffs filed a complaint containing thirteen causes of action, including inter alia, conversion and lack of informed consent ***for failing to disclose the financial interest of the defendants. The trial court sustained a demurrer to the conversion count and then dismissed the entire complaint without ruling on the other counts because of its view that the other counts simply repeated the inadequate allegations of the conversion count. The Court of Appeal reversed in part and affirmed in part. This appeal followed.]

***

Moore repeatedly alleges that Golde failed to disclose the extent of his research and economic interests in Moore's cells before obtaining consent to the medical procedures by which the cells were extracted. These allegations, in our view, state a cause of action against Golde for invading a legally protected interest of his patient. This cause of action can properly be characterized either as the breach of a fiduciary duty to disclose facts material to the patient's consent or, alternatively, as the performance of medical procedures without first having obtained the patient's informed consent.

Our analysis begins with three well-established principles. First, "a person of adult years and in sound mind has the right, in the exercise of control over his own body, to determine whether or not to submit to lawful medical treatment." [Cc] Second, "the patient's consent to treatment, to be effective, must be an informed consent." [C] Third, in soliciting the patient's consent, a physician has a fiduciary duty to disclose all information material to the patient's decision. [Cc]

These principles lead to the following conclusions: (1) a physician must disclose personal interests unrelated to the patient's health, whether research or economic, that may affect the physician's professional judgment; and (2) a physician's failure to disclose such

interests may give rise to a cause of action for performing medical procedures without informed consent or breach of fiduciary duty.

To be sure, questions about the validity of a patient's consent to a procedure typically arise when the patient alleges that the physician failed to disclose medical risks, as in malpractice cases, and not when the patient alleges that the physician had a personal interest, as in this case. The concept of informed consent, however, is broad enough to encompass the latter. "The scope of the physician's communication to the patient ***must be measured by the patient's need, and that need is whatever information is material to the decision." [C]

Indeed, the law already recognizes that a reasonable patient would want to know whether a physician has an economic interest that might affect the physician's professional judgment. As the Court of Appeal has said, "[c]ertainly a sick patient deserves to be free of any reasonable suspicion that his doctor's judgment is influenced by a profit motive."***

It is important to note that no law prohibits a physician from conducting research in the same area in which he practices. Progress in medicine often depends upon physicians, such as those practicing at the university hospital where Moore received treatment, who conduct research while caring for their patients.

Yet a physician who treats a patient in whom he also has a research interest has potentially conflicting loyalties. This is because medical treatment decisions are made on the basis of proportionality--weighing the benefits to the patient against the risks to the patient. As another court has said, "the determination as to whether the burdens of treatment are worth enduring for any individual patient depends upon the facts unique in each case," and "the patient's

interests and desires are the key ingredients of the decision-making process." [C] A physician who adds his own research interests to this balance may be tempted to order a scientifically useful procedure or test that offers marginal, or no, benefits to the patient. The possibility that an interest extraneous to the patient's health has affected the physician's judgment is something that a reasonable patient would want to know in deciding whether to consent to a proposed course of treatment. It is material to the patient's decision and, thus, a prerequisite to informed consent. [C]

Golde argues that the scientific use of cells that have already been removed cannot possibly affect the patient's medical interests. The argument is correct in one instance but not in another. If a physician has no plans to conduct research on a patient's cells at the time he recommends the medical procedure by which they are taken, then the patient's medical interests have not been impaired. In that instance the argument is correct. On the other hand, a physician who does have a preexisting research interest might, consciously or unconsciously, take that into consideration in recommending the procedure. In that instance

the argument is incorrect: the physician's extraneous motivation may affect his judgment and is, thus, material to the patient's consent.

We acknowledge that there is a competing consideration. To require disclosure of research and economic interests may corrupt the patient's own judgment by distracting him from the requirements of his health. But California law does not grant physicians unlimited discretion to decide what to disclose. Instead, "it is the prerogative of

the patient, not the physician, to determine for himself the direction in which he believes his interests lie." [C] "Unlimited discretion in the physician is irreconcilable with the basic right of the patient to make the ultimate informed decision *** [C]

However, we made that statement in the context of a physician-patient relationship unaffected by possible conflicts of interest. Cobbs v. Grant, supra, permits a physician acting solely in the patient's best interests to consider whether excessive disclosure will harm the patient. Disclosure of possible conflicts of interest raises different considerations. To illustrate, a physician who orders a procedure partly to further a research interest unrelated to the patient's health should not be able to avoid disclosure with the argument that the patient might object to participation in research. In some cases, however, a physician's research interest might play such an insignificant role in the decision to recommend a medically indicated procedure that disclosure should not be required because the interest is not material. By analogy, we have not required disclosure of "remote" risks [c] that "are not central to the decision to administer or reject [a] procedure." [C]

Accordingly, we hold that a physician who is seeking a patient's consent for a medical procedure must, in order to satisfy his fiduciary duty and to obtain the patient's informed consent, disclose personal interests unrelated to the patient's health, whether research or economic, that may affect his medical judgment.

***

[The court then discussed the specific allegations of the complaint relating to each of the medical procedures. First, Moore did not state

a cause of action with respect to the original drawing of blood and tissue samples because Dr. Golde did not yet know of the rare nature of Moore's cells. Second, Moore stated a cause of action with respect to the surgical removal of the spleen even though the surgery had therapeutic value for Moore because Moore alleged that Dr. Golde planned to keep the removed spleen for scientific research but did not disclose that to Moore. Third, the postoperative takings of bodily tissues were done at a time when Dr. Golde had an undisclosed financial interest in them and even though they had no therapeutic purpose. Thus the complaint stated a cause of action against Dr. Golde for those procedures.

The court found that the remaining defendants could be liable to Moore for a failure of informed consent if they were vicariously liable for

224

Dr. Golde's actions and ruled that Moore could amend his complaint to attempt to state a lack of informed consent cause of action against them.

On the conversion issue, see note 7, page 97, the Court decided that the traditional common law doctrine of conversion did not cover Moore's cells and that the common law doctrine should not be expanded to cover this kind of case. Case remanded.

The concurring and dissenting opinions are omitted.]

NOTES AND QUESTIONS

1. Note that California uses the reasonable patient rather than the reasonable physician test for informed consent. Do you think the

court would have made the same ruling on the informed consent issue if California followed the reasonable physician test?

2. What will happen next in the case? If the jury finds for the plaintiff on the informed consent cause of action, what would the damages be? Will Moore share in the profits of the cell line started by his spleen?

3. Most risks that must be disclosed relate directly to the therapy or procedure, but some cases have required more than that. In addition to the principal case, see Shapira v. Christiana Care Health Svcs., 99 A.3d 217 (Del. 2014) (relationship between physician and manufacturer of catheter should have been disclosed to patient before consent was obtained to insert catheter) and Howard v. Replogle, 397 Mont. 379, 450 P.3d 866 (2019) (jury question whether surgeon had to disclose that he had invested in company that made the medical device he used on patient). What about the fact that the physician carries no professional malpractice insurance? Jarrell v. Kaul, 123 A.3d 198 (N.J. 2015) (no disclosure required).

What about risks relating to the physician or the physician's capacity to perform? See, e.g., Curran v. Buser, 271 Neb. 332, 711 N.W.2d 562 (2006) (alleged failure to disclose that surgeon's surgical privileges had been restricted for one year, ending just nine days before patient's surgery) and Faya v. Almaraz, 329 Md. 435, 620 A.2d 327 (1993) (HIV status of surgeon). Compare Hidding v. Williams, 578 So.2d 1192 (La.App.1991) (alcoholism) (must disclose) with Albany Urology Clinic v. Cleveland, 272 Ga. 296, 528 S.E.2d 777 (2000) (cocaine use) (no duty to disclose). Suppose the

doctor exaggerates his experience with the procedure. Is that enough by itself to vitiate consent? Compare Johnson v. Kokemoor, 199 Wis.2d 615, 545 N.W.2d 495 (1996) (comparative morbidity/mortality rates for the procedure between surgeons experienced in procedure and those inexperienced like himself must be disclosed); Howard v. University of Medicine and Dentistry of N.J., 172 N.J. 537, 800 A.2d 73 (2002) (misrepresented or exaggerated physician experience would have to significantly increase a risk of procedure in order to affect the decision of reasonably prudent patient and thus incur liability for informed consent); and Duttry v. Patterson, 565 Pa. 130, 771 A.2d 1255 (2001) (surgeon's personal characteristics and experience were irrelevant to informed consent claim).

225

4. Causation. Informed consent raises one problem that can be only mentioned at this early point in the course. Liability is being imposed even though there was no negligence in performing the operation or administering the treatment. If so, it must be on the basis that if the risk had been disclosed the patient would not have agreed to be subjected to the risk by undergoing the operation or the treatment. How do we know? Can we rely on the patient's testimony after the risk has manifested itself? Can we resort to the reasonable prudent person again? Is that true causation?

5. Other causation problems can arise with professional services. If an attorney negligently lets the statute of limitations run without filing suit, what is he liable for? Compensatory damages client would have

won minus contingent fee and expenses? See notes 4-6, pages 309-311. Punitive damages? See note 8, page 618.

6. Some of the professional-services cases involve another problem to be taken up later. Is the defendant liable to people who were not clients of the defendant? A lawyer draws up a will or trust that is invalid. Can the intended beneficiary of a legacy recover after the testator dies? Compare Fabian v. Lindsay, 410 S.C. 475, 765 S.E.2d 132 (2014) (aligning itself with majority of courts that permit beneficiaries of will to recover as third-party beneficiaries against attorney whose drafting error defeats or diminishes client's intent) and MacLeish v. Boardman & Clark LLP, 386 Wis.2d 50, 924 N.W.2d 799 (2019) (same) with Baker v. Wood, Ris & Hames, PC, 364 P.3d 872 (Colo. 2016) (adhering to strict privity rule) and Estate of Agnew v. Ross, 638 Pa. 20, 152 A.3d 247 (2017) (purported beneficiaries could not bring legal malpractice action). What if the client dies before executing the will? Riso v. Dwyer, 168 N.H. 652, 135 A.3d 557 (2017) (no duty to potential beneficiaries to have will executed promptly). Should a divorce client's fiancée be able to recover from the lawyer whose lack of diligence in obtaining the divorce meant that client died before he was able to marry fiancée? Scott v. Burgin, 97 A.3d 564 (D.C. App. 2014) (duty of care does not extend to fiancée). Cf. Prudential Ins. Co. v. Dewey, Ballantine, Bushby, Palmer & Wood, 80 N.Y.2d 377, 590 N.Y.S.2d 831, 605 N.E.2d 318 (1992) (law firm may be liable to nonclient who relied on opinion letter).

Does an architect owe a duty of care to future homeowners in the design of a residential building where the architect's client was the condo building's developer? Beacon Residential Community Assn. v.

Skidmore, Owings & Merrill LLP, 59 Cal.4th 568, 173 Cal.Rptr.3d 752, 327 P.3d 850 (2014) (yes, where architect is a principal architect on the project, not subordinate to other design professionals). But see Bily v. Arthur Young & Co., 3 Cal.4th 370, 11 Cal.Rptr.2d 51, 834 P.2d 745 (1992) (no liability to non-client of accounting firm).

Does a drug testing facility owe a duty to the individuals being tested under contract with the individuals' employer? Shaw v. Psychemedics Corp., 426 S.C. 194, 826 S.E.2d 281 (2019) (employee of car dealership fired for testing positive for cocaine alleged that he had never used illegal drugs) (joining the courts of last resort in New York, Pennsylvania, and Wyoming that have all determined that a drug testing facility owes a duty to the person subject to testing).

226

A physician negligently advises a patient exposed to hepatitis that if she remains symptom free for six weeks she has not contracted the disease and is not contagious. The advice should have been six months rather than six weeks. Patient refrains from sexual intercourse for eight weeks after the exposure and then resumes sexual intercourse with plaintiff. Both patient and plaintiff are diagnosed with hepatitis. Does plaintiff have a medical malpractice cause of action against the physician? See DiMarco v. Lynch Homes, 525 Pa. 558, 583 A.2d 422 (1990) (yes) and Doe v. Cochran, 332 Conn. 325, 210 A.3d 469 (2019) (girlfriend who contracted herpes from patient after physician's office told patient his test was negative). Physician administers oral polio vaccine to infant

and fails to inform parents that they might contract polio from infant. Does father have negligence case against physician? Tenuto v. Lederle Labs., 90 N.Y.2d 606, 687 N.E.2d 1300, 665 N.Y.S.2d 17 (1997) (yes). Physician treats patient for disease that is genetically transferable. Physician does not tell patient to warn her children that they too may develop the disease. Does patient's adult daughter have a medical malpractice cause of action against physician? Pate v. Threlkel, 661 So.2d 278 (Fla. 1995) (maybe, if standard of care can be shown to include warning patient). In attempting to determine the cause of child's developmental delays, pediatrician orders genetic testing. Through a mistake either by the lab or the pediatrician, one crucial test was omitted. The child's father and stepmother were told that the genetic tests were all normal. The father reported that to the mother. Years later, the mother remarried and bore another child who suffered from the same genetic abnormality. Does mother have a medical malpractice action against the pediatrician of child of whom father and stepmother have custody? Molloy v. Meier, 679 N.W.2d 711 (Minn. 2004) (yes, pediatrician had met at least once with biological mother and thus owed duty to her as well as to patient and patient's custodial parents).

Physician treats patient for epilepsy, which is controlled by medication for years. Patient then has a seizure while on medication. Physician fails to warn him not to drive. Patient has seizure while driving and kills the plaintiff's intestate. Does the family of the woman who was killed in the car accident caused by the seizure have a cause of action against physician? Compare Praesel v. Johnson, 967 S.W.2d 391 (Tex. 1998) (no); Jarmie v. Troncale, 306 Conn. 578,

50 A.3d 802 (2012) (no duty to non-patient motorist); and Cichos v. Dakota Eye Inst., 933 N.W.2d 452 (N.D. 2019) (optometrist owed no duty to passengers in car struck by his patient) with McKenzie v. Hawai'i Permanente Medical Group, Inc., 98 Haw. 296, 47 P.3d 1209 (2002); Burroughs v. Magee, 118 S.W.3d 323 (Tenn. 2003); and Davis v. South Nassau Cmty. Hosp., 26 N.Y.3d 563, 46 N.E.3d 614, 26 N.Y.S.3d 231 (2016) (physician owes duty to non-patient injured in automobile accident caused by adverse reaction to medication if physician negligently failed to warn patient that medication could impair driving ability).

Does a therapist owe a duty to the parents of a patient? Compare Ryder v. Mitchell, 54 P.3d 885 (Colo. 2002) (no duty to mother who claimed therapist was negligent in diagnosing children's symptoms and reporting to new therapist her opinion that mother was alienating children from father)

227

and Hungerford v. Jones, 143 N.H. 208, 722 A.2d 478 (1998) (answering certified question) (in case involving repressed memory recovery techniques, therapist owes duty to accused parent of patient undergoing treatment for suspected sexual abuse when public accusations are made) and Mower v. Baird, 422 P.3d 837 (Utah 2018) (accord). Health care providers allegedly provided negligent treatment to mentally ill patient who then killed his wife. Can her estate bring suit against health care providers? Tedrick v. Community Resource Center, Inc., 235 Ill.2d 155, 920 N.E.2d 220 (2009) (no cause of action absent physician-patient relationship).

7. What if the patient is injured during an examination conducted at the request of an employer, insurer, or other third person or pursuant to court order during litigation? Most courts have found that the physician owes a limited duty, sounding in medical malpractice, to examine the patient without harming her but not to provide diagnosis or treatment. See, for example, Harris v. Kreutzer, 271 Va. 188, 624 S.E.2d 24 (2006) (automobile accident victim alleged that she was injured by clinical psychologist who examined her pursuant to court order to determine the nature and extent of the brain injury she was alleging in her automobile accident case) (collecting cases from other jurisdictions). What if the treating physician consults with another physician about the case before making his treatment decision but the physician who provided the informal consultation did not agree to treat the patient, did not review the patient's records, and never met the patient? See, for example, Jennings v. Badgett, 2010 OK 7, 230 P.3d 861 (2010) (no physician-patient relationship established under those circumstances) (collecting cases from other jurisdictions) and Warren v. Dinter, 926 N. W.2d 370, 377 (Minn. 2019) (no express physician patient relationship required because "for 100 years in Minnesota, a physician has had a legal duty of care based on the foreseeability of harm. Although ours is the minority rule, it is by no means unique.").

8. Not all actions taken by professionals are malpractice. Some would be ordinary negligence. Why does it matter whether the allegedly unreasonable conduct is classified as professional malpractice or ordinary negligence? In many states, there are prerequisites to filing medical malpractice claims, including presenting the claim first to an expert panel. Patient's family alleged

that a hospital was negligent in failing to provide adequate backup power for life support systems and patient died in the aftermath of Hurricane Katrina when the power failed. Medical malpractice or ordinary negligence? Lacoste v. Pendleton Methodist Hospital, 966 So.2d 519 (La. 2007) (finding the claim sounded in ordinary negligence and thus did not have to be submitted to the medical review panel before suit was filed); Ross v. St. Luke's Hospital, 462 S.W.3d 496 (Tex. 2015) (slip-and-fall claim by hospital visitor is not a health care claim); and Davis v. Frostburg Facility Operations, LLC, 457 Md. 275, 177 A.3d 709 (2018) (fall from bed is ordinary negligence but nurse's dropping of patient while getting her back into bed was medical malpractice). The statute of limitations may be different for ordinary negligence and medical malpractice. J.B. v. Sacred Heart Hosp., 635 So.2d 945 (Fla. 1994) (plaintiff contracted AIDS because hospital failed to tell him his brother had AIDS and how to care for his

brother without exposing himself while plaintiff was transporting brother to another medical facility; court found failure was ordinary negligence rather than medical malpractice).

The "Medical Malpractice Crisis" and Statutory Change in the Common Law

Three times during the last 50 years (the latter part of the 1970s, the mid-1980s, and the early 21st Century) an increase in the number of medical malpractice suits produced sharp increases in the premiums for, and, in some instances, unavailability of malpractice liability

insurance. This in turn produced alarm within the profession and demands that the state legislatures find ways of alleviating the "crisis" caused by the burden of the malpractice insurance premiums and the unavailability of insurance. Although some have pointed to the economics of the insurance industry as the source of most of the increase, much of the blame was placed by the lobbyists on the law of negligence, and various modifications of the substantive law of torts were passed by concerned state legislatures. See Logue, Toward a Tax Based Explanation of the Liability Insurance Crisis, 82 Va. L. Rev. 895 (1996). Almost every state passed legislation of some sort. The state statutes have varied considerably and there is no particular pattern to them. See Sanders & Joyce, "Off to the Races": The 1980s Tort Crisis and the Law Reform Process, 27 Hous. L. Rev. 207 (1990).

Changes were made in the standard of care, the doctrine of informed consent (see page 215), the doctrine of res ipsa loquitur (see page 268), the collateral source rule (see page 604), the statute of limitations (see page 692), imposing limits on the amount that could be received for pain and suffering or on the total amount recovered in a malpractice action, and prohibiting the setting forth in a complaint of the amount of the relief requested. Many states required a certificate of merit upon filing or very early in the case, others capped damages, and some required submission to an expert board for screening or to arbitration before filing suit. The impact of the reform initiatives are difficult to discern. Viscusi and Born, Medical Malpractice in the Wake of Liability Reform, 24 J.Legal Stud. 463 (1995); Thorpe, The Medical Malpractice "Crisis": Recent Trends and the Impact of State Tort Reforms, Health Affairs 20 (2004); Sharkey,

Unintended Consequences of Medical Malpractice Damages Caps, 80 NYU L. Rev. 391 (2005) (empirical analysis of impact of damages caps); and Wenner, "State's Malpractice Data Offer Ammo for Both Sides," The Patriot-News (March 9, 2010) (reporting on ten-year study of Pennsylvania medical malpractice lawsuits, including years before and after changes by legislature to medical malpractice claims) available at 2010 WLNR 5027772.

State supreme courts have held a number of the statutory provisions listed above to be unconstitutional for various reasons. See, for example, Smith v. Schulte, 671 So.2d 1334 (Ala. 1995) (cap on damages in medical malpractice cases violates state constitutional guarantees of equal protection and right to jury trial); John v. St. Francis Hosp., 405 P.3d 681 (Okla. 2017) (affidavit of merit requirement violates access to courts provision of the Oklahoma constitution); and Vega v. Jordan Valley Medical Ctr., 2019 UT 35, 449 P.3d 31 (2019) (requirement that executive branch agency review

and certify medical malpractice claim is unconstitutional violation of separation of powers section of Utah constitution).

Most of the states, however, still have some of the statutory modifications in effect. See, for example, Hink v. Helfrich, 545 S.W.3d 335 (Mo. 2018) (affidavit of merit requirement does not violate open courts, right to jury trial, or separation of powers provisions of Missouri constitution).

A study published in the New England Journal of Medicine of malpractice data from 1991-2005 showed 7.4% of all physicians had

a malpractice claim, with 1.6% having a claim leading to a payment. The proportion of physicians facing a claim each year ranged from 19.1% in neurosurgery, 18.9% in thoracic-cardiovascular surgery, and 15.3% in general surgery to 5.2% in family medicine, 3.1% in pediatrics, and 2.6% in psychiatry. The study authors estimated that by the age of 65, 75% of physicians in low-risk specialties face a malpractice claim, as compared with 99% of physicians in high-risk specialties. Jena, Seabury, Lakdawalla, and Chandra, "Malpractice Risk According to Physician Specialty," 365 New Eng. J. Med. 629 (Aug. 18, 2011).

(C) Aggravated Negligence

1. "Degrees" of Care. It is obvious, and elementary, that the care required by the standard of the reasonable person will vary according to the risk. As the danger increases, the actor is required to exercise caution commensurate with it, and so to be more careful. Those who deal with things that are known to be dangerous, such as explosives or electricity, must exercise more care than one who is merely walking down the street. Likewise, those who have accepted a special responsibility toward others, as in the case of a common carrier responsible for the safety of passengers, must exercise more care in accordance with the duty undertaken. On many occasions, this has been expressed in instructions to the jury, approved on appeal, that the carrier, or the person dealing with special danger, must exercise "the highest degree of care," or "the utmost caution characteristic of very careful prudent persons." See, for example, Bayer v. Crested Butte Mountain Resort, Inc., 960 P.2d 70 (Colo. 1998) (ski lift operator must exercise highest degree of care

commensurate with the lift's practical operation); Peck v. Fanion, 124 Conn. 549, 1 A.2d 143, 144 (1938) (jury instruction on negligence against common carrier--taxicab--should have been "highest degree of care and skill which reasonably may be expected of intelligent and prudent persons engaged in such a business"); Pennsylvania Co. v. Roy, 102 U.S. 451, 455 (1880) (railroad owes greatest possible care and diligence when conveying persons by the "powerful and dangerous agency of steam"). On "reasonable care" vs. "extraordinary care" regarding the use of firearms, see the opinions in Everette v. New Kensington, 262 Pa.Super. 28, 396 A.2d 467 (1978).

There are many other decisions in which this type of instruction has been held to be error, on the ground that there are no "degrees" of care

230

recognized by the law, but merely amounts of care, greater or less; that the care required of the actor is always the same under the traditional formula, that of a reasonable person under like circumstances; and that the greater danger, or the greater responsibility, are merely circumstances that require a greater amount of care. See Flowers v. Torrance Memorial Hospital Med. Ctr., 8 Cal.4th 992, 884 P.2d 142, 35 Cal.Rptr.2d 685 (1994) ("There are no 'degrees' of care as a matter of law; there are only different amounts of care, as a matter of fact"); Bethel v. N.Y.C. Transit Authority, 92 N.Y.2d 348, 355, 681 N.Y.S.2d 201, 703 N.E.2d 1214, Union Traction 1218 (1998) ("we conclude that the rule of a common carrier's duty of extraordinary care is no longer viable. Rather, a

common carrier is subject to the same duty of care as any other potential tortfeasor--reasonable care under all of the circumstances of the particular case."); and Nunez v. Prof. Transit Mgt. of Tucson, 229 Ariz. 117, 271 P.3d 1104 (2012) (moving from heightened duty to exercise the highest degree of care practicable to ordinary negligence standard and applying decision retroactively).

2. "Degrees" of Negligence. A different attempt, carried to considerable lengths in the last century, has been to distinguish "degrees" of negligence, breaking it down into different kinds of conduct, with different legal consequences. This idea was lifted from the Roman law by Chief Justice Holt in a bailment case, Coggs v. Bernard, 2 Ld.Raym. 909, 92 Eng.Rep. 107 (1704) (defendant volunteered--without compensation--to move barrels of brandy from one cellar to another and one of the barrels broke). As it developed, the distinction was made between "slight" negligence, defined as a failure to use great care; ordinary negligence, or failure to use reasonable care; and "gross" negligence, which is failure to exercise even slight care. See Green, High Care and Gross Negligence, 23 III. L. Rev. 4 (1928); Elliott, Degrees of Negligence, 6 So. Cal. L. Rev. 91 (1932).

These distinctions were subjected to a good deal of criticism almost from the start. In Wilson v. Brett, 11 M. & W. 113, 152 Eng.Rep. 737 (1843), Baron Rolfe made a much quoted statement that gross negligence is merely the same thing as ordinary negligence, "with the addition of a vituperative epithet." In some of the very early cases, this was true. "Gross negligence" was an expression used to mean nothing more than negligence. See, for example, Vaughan v. Menlove, page 169. But when it is intended to mean more, "gross"

negligence is readily understood by the ordinary person as involving an extreme departure from ordinary standards of conduct.

Perhaps Judge Magruder's students at the Harvard Law School knew what he meant when he explained "Chief Justice Rugg's famous distinctions among negligence, gross negligence and recklessness as being the distinctions among a fool, a damned fool, and a God-damned fool." Harvard Law Record, April 16, 1959. In practice, however, it proved extraordinarily difficult to set any lines of demarcation; and these

distinctions filled the courts with vexatious appeals in which they were asked to rule upon particular conduct as a matter of law. During the latter half of the 19th Century, the courts of Illinois and Kansas were deluged with appeals, as a result of their adoption of a rule that contributory negligence was not a defense when the negligence of the defendant was found to be "gross," and that of the plaintiff "slight" in comparison. Both courts finally threw up their hands and threw out the distinctions, declaring that henceforth only one kind of negligence, measured by the standard of the reasonable person, was to be recognized. The story is told in Malone, The Formative Era of Contributory Negligence, 41 III. L. Rev. 151 (1946).

Since then, "gross" and "slight" negligence have been under a cloud, and discredited with the courts. They have largely lost their significance in the common law, both in England and in most states. Some vestiges still remain in the law of bailments, where some courts still hold that a gratuitous bailee owes his bailor only the duty of slight care, and so is liable only for gross negligence in looking

after the goods. See, for example, Altman v. Aronson, 231 Mass. 588, 121 N.E. 505 (1919) (prospective purchaser of silk found that sample was not of the quality he sought so he sent it back to seller but it was lost in transit). The words "gross negligence" occasionally appear as words of art in automobile guest statutes. In that context, the phrase has been construed to mean "the absence of slight care." See, for example, Hennon v. Hardin, 78 Ga.App. 81, 50 S.E.2d 236 (1948) (allegation that defendant drove car 70 m.p.h. around a 45 degree curve, and then attempted to pass another car on the curve). On occasion they have been treated as synonyms for "recklessness." See Jackson v. Edwards, 144 Fla. 187, 197 So. 833 (1940) (allegation that defendant drove a truck at night at 60 m.p.h. down the center of the highway, colliding with truck traveling in opposite direction). The term is, perhaps, more popular with legislatures than with the courts. See, for example, the Clean Air Act, 33 U.S.C. § 1321(b)(7)(D) and In re Oil Spill by Oil Rig Deepwater Horizon in Gulf of Mexico, on April 20, 2010, 21 F.Supp.3d 657, 732 (E.D. La. 2014) (finding that defendant acted with "gross negligence" under the Clean Water Act).

3. Willful, Wanton, and Reckless Conduct. Another distinction is made by some courts based on defendant's state of mind. The effect is to establish an intermediate class of conduct, between negligence (including gross negligence) and intentional torts, which in some respects takes on the character of each. This type of conduct usually is defined as consisting of a deliberate and conscious disregard for a known high degree of probability of harm to another. See Restatement (Second) of Torts § 500 (1965) and Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 2 (2010).

This level of conduct is the threshold for punitive damages in many jurisdictions (see Chapter 10, Damages) and for particular causes of action in others. See, for example, Hickingbotham

v. Burke, 140 N.H. 28, 662 A.2d 297 (1995) (recognizing cause of action for social host liability if service of alcohol was reckless) and Crawn v. Campo, 136 N.J. 494, 643 A.2d 600 (1994) (noting that majority of jurisdictions require plaintiff injured in recreational sports activity to prove that defendant's conduct was reckless, not merely negligent, in order to recover).

Automobile Guest Statutes

The use of the expressions "recklessness," "gross negligence" and "willful and wanton conduct" evolved for the most part in connection with statutes providing that the driver of an automobile is liable only for some form of aggravated misconduct to one who is riding as a guest in a car.

The principle of limiting the duty that a driver owes to an automobile guest originated in the Massachusetts case of Massaletti v. Fitzroy, 228 Mass. 487, 118 N.E. 168 (1917). The court derived the principle from what it regarded as an analogous situation--the relationship between a gratuitous bailee and his bailor. While the Massaletti decision had only a minor impact on the case law of other states, it had an enormous impact on state legislatures. Over half the states adopted guest statutes, with quite a bit of variation in their categories and exceptions.

The many legislatures that embraced the principle of Massaletti were persuaded by a persistent lobby on the part of some automobile liability insurance companies. Rationales included the possibility of collusion between host and injured guest in manufacturing a claim against the host's insurer, a fair allocation of a limited insurance fund to pedestrians and persons in other cars in preference to "guests," and savings in fuel by encouraging car pools.

The statutes filled the courts with cases, in which a good many knotty little problems of interpretation arose; and the efforts of many courts to get around the statute in cases of manifest hardship led to some rather peculiar law. First of all, who was a "guest"? What was the effect of sharing expenses, of the host's business interest in offering the ride, of an employer's order prohibiting the driver from taking free riders, of stowaways, of a passenger's demand to be let out of the car? Once each state had settled those questions, there was the further problem of whether the driver's conduct in the particular case fit into the state's definition of "gross negligence," "recklessness," or "willful and wanton." A major component was whether or not plaintiff needed to prove that the defendant had actual knowledge of the risk involved. See, for example, Bailey v. Brown, 34 Ohio St.2d 62, 63 Ohio Op.2d 92, 295 N.E.2d 672 (1973) (turning left at intersection in front of oncoming vehicle without first coming to complete stop while unaware of oncoming vehicle could not be characterized as willful or wanton misconduct) and Williamson v. McKenna, 223 Or. 366, 354 P.2d 56 (1960) (turning left at intersection in front of oncoming vehicle without signaling is negligence but, without more, could not be regarded as facing a manifest danger with indifference as to the plaintiff's safety).

In Brown v. Merlo, 8 Cal.3d 855, 506 P.2d 212, 106 Cal.Rptr. 388 (1973), the Supreme Court of California held that the California guest statute denied "equal protection of the laws" to nonpaying automobile guests. See also Ramey v. Ramey, 273 S.C. 680, 258 S.E.2d 883 (1979) (South Carolina guest statute unconstitutional). Other state supreme courts found their guest statutes unconstitutional under state or federal constitutional provisions, and most state legislatures have repealed their guest statutes, recognizing their incompatibility with modern notions of risk distribution. In 2010, Nebraska became the most recent state to repeal its guest statute. See Woods, Goodbye and Good Riddance, 16 Cumb. L. Rev. 263 (1986) for a history of automobile guest statutes. A guest statute remains in effect only in Alabama, where it continues to occupy the courts with issues of interpretation. Coffey v. Moore, 948 So.2d 544 (Ala. 2006) (deciding that the bailee of a rental car who was injured when a companion was driving is not a guest under the Alabama guest statute § 32-1-2) and Hurst v. Sneed, 229 So.3d 215 (Ala. 2017) (interpreting guest statute to exclude rider who had come along to store with driver to assist driver rather than for the rider's benefit).

The legacy of the guest statutes is each state's definition of aggravated negligence, which today most often arises when juries decide whether to award punitive damages. See Chapter 10, Damages.

5. Rules of Law

Pokora v. Wabash Ry. Co.

Supreme Court of the United States, 1934.

292 U.S. 98. 54 S.Ct. 580. 78 L.Ed. 1149.

[Plaintiff, driving a truck, approached a level railroad crossing at which defendant had four tracks. Because of boxcars standing on the first track, five or ten feet to the north of the crossing, he could not see the tracks to the north. He stopped, looked as well as he could, and listened, but heard no bell or whistle. He then drove slowly ahead, and when he reached the main track was struck by a passenger train from the north, coming at a speed of about thirty miles an hour. The trial court in the Southern District of Illinois directed a verdict for defendant, on the ground that plaintiffs conduct was contributory negligence as a matter of law, and this was affirmed by the Seventh Circuit Court of Appeals based on the case of B. & O.R. Co. v. Goodman, 275 U.S. 66 (1927), which had held that drivers were required to stop and get out of their vehicles if they could not otherwise see whether a train was coming. Certiorari was granted by the Supreme Court.]

Mr. JUSTICE Cardozo delivered the opinion of the Court.

Standards of prudent conduct are declared at times by courts [as the court did in the Goodman case], but they are taken over from the facts of life. To get out of a vehicle and reconnoitre is an uncommon precaution,

234

as everyday experience informs us. Besides being uncommon, it is very likely to be futile, and sometimes even dangerous. If the driver

leaves his vehicle when he nears a cut or curve, he will learn nothing by getting out about the perils that lurk beyond. By the time he regains his seat and sets his car in motion, the hidden train may be upon him. ***Often the added safeguard will be dubious though the track happens to be straight, as it seems that this one was, at all events as far as the station, about five blocks to the north. A train traveling at a speed of thirty miles an hour will cover a quarter of a mile in the space of thirty seconds. It may thus emerge out of obscurity as the driver turns his back to regain the waiting car, and may then descend upon him suddenly when his car is on the track. Instead of helping himself by getting out, he might do better to press forward with all his faculties alert. So a train at a neighboring station, apparently at rest and harmless, may be transformed in a few seconds into an instrument of destruction. At times the course of safety may be different. One can figure to oneself a roadbed so level and unbroken that getting out will be a gain. Even then the balance of advantage depends on many circumstances and can be easily disturbed.

Where was Pokora to leave his truck after getting out to reconnoitre? If he was to leave it on the switch, there was the possibility that the box cars would be shunted down upon him before he could regain his seat. The defendant did not show whether there was a locomotive at the forward end, or whether the cars were so few that a locomotive could be seen. If he was to leave his vehicle near the curb, there was even stronger reason to believe that the space to be covered in going back and forth would make his observations worthless. One must remember that while the traveler turns his eyes

in one direction, a train or a loose engine may be approaching from the other.

Illustrations such as these bear witness to the need for caution in framing standards of behavior that amount to rules of law. The need is the more urgent when there is no background of experience out of which the standards have emerged. They are then, not the natural flowerings of behavior in its customary forms, but rules artificially developed, and imposed from without. Extraordinary situations may not wisely or fairly be subjected to tests or regulations that are fitting for the commonplace or normal. In default of the guide of customary conduct, what is suitable for the traveler caught in a mesh where the ordinary safeguards fail him is for the judgment of a jury. ***The opinion in Goodman's Case has been a source of confusion in the federal courts to the extent that it imposes a standard for application by the judge, and has had only wavering support in the courts of the states. We limit it accordingly.

The judgment should be reversed, and the cause remanded for further proceedings in accordance with this opinion.

It is so ordered.

235

NOTES AND QUESTIONS

1. In the precedent alluded to in the principal case, Baltimore & Ohio R. Co. v. Goodman, 275 U.S. 66 (1927), Justice Holmes concluded his opinion with: "It is true ***that the question of due care very generally is left to the jury. But we are dealing with a standard of conduct, and when the standard is clear it should be laid down once

and for all by the Courts." Do you think that Justice Holmes really intended to declare a rule to which there could be no possible exceptions? How would he handle exceptional circumstances?

2. Notwithstanding some criticism, the general rule of law has held up. In nearly all jurisdictions, it is usually still negligence as a matter of law not to look and listen when approaching a known railroad crossing, and not to slow down or even stop when obstructed vision or something else in the situation calls for it. See, for example, Chicago, R.I. & P.R. Co. v. McFarlin, 336 F.2d 1 (10th Cir.1964) (applying New Mexico law). Railroad crossing accidents have been declining but are still quite common. Compare National Transportation Safety Board, Safety Study at Passive Grade Crossings (1998) (more than 4,000 accidents per year in 1996) with GAO Report on Grade-Crossing Safety, 44 (2018) (2,115 accidents in 2017).

3. But over the years many cases arose in which special circumstances made it unreasonable to apply the rule. Thus crossing gates were left open, as in Wabash R. Co. v. Glass, 32 F.2d 697 (6th Cir.1929). Or the driver relied on the absence of a customary flagman or flasher signal, as in Wabash R. Co. v. Walczak, 49 F.2d 763 (6th Cir.1931). Or it was clear that the conduct specified would have added nothing to the driver's safety, as in Torgeson v. Missouri-Kansas-Texas R. Co., 124 Kan. 798, 262 P. 564 (1928); RGR LLC v. Settle, 764 S.E.2d 8 (Va. 2014); and the principal case.

4. A similar fate--the recognition of some exceptions--has overtaken many "rules of law." For example, in nearly all jurisdictions, the "range of vision" rule of law applies. That is, it is negligent to drive an

automobile at such a speed that it is impossible to stop within the range of vision. See, for example, Tapp v. Blackmore Ranch, Inc., 254 Neb. 40, 575 N.W.2d 341 (1998) (driver rear-ended disabled vehicle on highway) and Nickell v. Russell, 247 Neb. 112, 525 N.W.2d 203 (1995) (driver's pickup truck struck body lying on gravel road in the middle of the night). Usually this is true. But the "rule" has given way to exceptions in unusual circumstances, such as when the driver is suddenly blinded by the lights of an approaching car, as in Emerson v. Bailey, 102 N.H. 360, 156 A.2d 762 (1959). Or a car ahead with a visible tail-light turns out to be backing up. Cerny v. Domer, 13 Ohio St.2d 117, 235 N.E.2d 132 (1968). Or a driver passing a snowplow on a divided highway cannot see a slow-moving vehicle driving next to the snow plow due to the fog of snow created by the snowplow. Nicolay v. Stukel, 900 N.W.2d 71 (S.D. 2017) (applying North Dakota law). Or there is a dense fog, and a sudden obstacle of an entirely unusual and unexpected kind turns up, such as the house being moved in the middle of the street in Morehouse v. Everett, 141 Wash. 399, 252 P. 157 (1926).

5. Compare the "rule" that a pedestrian crossing the street must continue to look all the way across. McKinney v. Yelavich, 352 Mich. 687, 90

N. W.2d 883 (1958) contains an excellent discussion of reducing negligence to fixed rules in this situation. See also Scott v. City of Lynchburg, 241 Va. 64, 399 S.E.2d 809 (1991) (when plaintiff knows of existence of condition but forgets about it and falls in, off, or over it, he is contributorily negligent as a matter of law).

6. Violation of Statute

Osborne v. McMasters

Supreme Court of Minnesota, 1889.

40 Minn. 103, 41 N.W. 543.

Action for damages by M. Osborne, administrator, against S.R. McMasters, for the death of plaintiff's intestate, resulting from the use of poison sold without a label by defendant's clerk in the course of his employment. Judgment for plaintiff, and defendant appeals.

MITCHELL, J. Upon the record in this case it must be taken as the facts that defendant's clerk in his drug-store, in the course of his employment as such, sold to plaintiff's intestate a deadly poison without labeling it "Poison," as required by statute; that she, in ignorance of its deadly qualities, partook of the poison which caused her death. ***It is now well settled, certainly in this state, that where a statute or municipal ordinance imposes upon any person a specific duty for the protection or benefit of others, if he neglects to perform that duty he is liable to those for whose protection or benefit it was imposed for any injuries of the character which the statute or ordinance was designed to prevent, and which were proximately produced by such neglect. ***Defendant contends that this is only true where a right of action for the alleged negligent act existed at common law; that no liability existed at common law for selling poison without labeling it, and therefore none exists under this statute, no right of civil action being given by it. Without stopping to consider the correctness of the assumption that selling poison without labeling it might not be actionable negligence at common

law, it is sufficient to say that, in our opinion, defendant's contention proceeds upon an entire misapprehension of the nature and gist of a cause of action of this kind. The common law gives a right of action to every one sustaining injuries caused proximately by the negligence of another. The present is a common-law action, the gist of which is defendant's negligence, resulting in the death of plaintiff's intestate. Negligence is the breach of legal duty. It is immaterial whether the duty is one imposed by the rule of common law requiring the exercise of ordinary care not to injure another, or is imposed by a statute designed for the protection of others. In either case the failure to perform the duty constitutes negligence, and renders the party liable for injuries resulting from it. The only difference is that in the one case the measure of legal duty is to be determined upon common-law principles, while in the other the statute fixes it, so that the violation of the statute constitutes conclusive evidence

237

of negligence, or, in other words, negligence per se. The action in the latter case is not a statutory one, nor does the statute give the right of action in any other sense, except that it makes an act negligent which otherwise might not be such, or at least only evidence of negligence. All that the statute does is to establish a fixed standard by which the fact of negligence may be determined. The gist of the action is still negligence, or the non-performance of a legal duty to the person injured. ***

Judgment affirmed.

GILFILLAN, C. J., because of affinity to one of the parties, took no part in this case.

NOTES AND QUESTIONS

1. Consider the remarks of Traynor, J. in Clinkscales v. Carver, 22 Cal.2d 72, 136 P.2d 777 (1943): "A statute that provides for a criminal proceeding only does not create a civil liability; if there is no provision for a remedy by civil action to persons injured by a breach of the statute it is because the Legislature did not contemplate one. A suit for damages is based on the theory that the conduct inflicting the injuries is a common-law tort, in this case the failure to exercise the care of a reasonable man at a boulevard stop. The significance of the statute in a civil suit for negligence lies in its formulation of a standard of conduct that the court adopts in the determination of such liability. (See Holmes, The Common Law, 120-129 (1881); Morris, The Relation of Criminal Statutes to Tort Liability, 46 Harv. L. Rev. 453 (1932).) The decision as to what the civil standard should be still rests with the court, and the standard formulated by a legislative body in a police regulation or criminal statute becomes the standard to determine civil liability only because the court accepts it. In the absence of such a standard the case goes to the jury, which must determine whether the defendant has acted as a reasonably prudent man would act in similar circumstances. The jury then has the burden of deciding not only what the facts are but what the unformulated standard is of reasonable conduct. When a legislative body has generalized a standard from the experience of the community and prohibits conduct that is likely to cause harm, the court accepts the formulated standards and applies them."

2. Why give any effect at all in a civil action for negligence to a statute that merely specifies a crime and provides for a criminal or administrative penalty? What about the following arguments?

A. The reasonable person will always obey the criminal law. Is this true? Should it be a question for the jury? What about a statute such as the legendary one providing that when two railroad trains approach a crossing each shall stop and neither shall move forward until the other has passed by?

B. The legislature intended, or is presumed to have intended, a civil remedy for the violation. What is the probability as to the state of mind of the legislature: (1) it did intend to provide a civil remedy, but did not say so;

(2) it intended not to provide one and therefore omitted it; (3) it never thought about the matter at all?

C. The statute gives rise to a right. A right without a remedy is useless and the court supplies an appropriate remedy. Ubi ius ibi remedium.

D. The court adopts the standard of conduct from the criminal statute and lays it down as a rule of law in the civil action. See the preceding section. See Chapter 23, Torts in the Age of Statutes, on the effect of statutes on torts other than negligence.

E. Allowing a jury to find that behavior is reasonable when the legislature has condemned the behavior as unlawful creates a dissonance and denies "institutional comity" between judiciary and legislature. Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 14 comment c (2010) (discussing rationale for negligence per se).

3. What if a criminal statute is invalid for criminal prosecutions? For example, an ordinance establishing a stop sign at a particular intersection was never properly published, as required for the adoption of such ordinances. Does this prevent the court, in a negligence action, from adopting the stop as a required standard of conduct? A number of cases say no. See Lewis v. Miami, 127 Fla. 426, 173 So. 150 (1937); Ponca City v. Reed, 115 Okla. 166, 242 P. 164 (1925); Clinkscales v. Carver, 22 Cal.2d 72, 136 P.2d 777 (1943). What if the statute is that of a neighboring jurisdiction where the violation took place? Cf. Gaines-Tabb v. ICI Explosives, USA, Inc., 160 F.3d 613 (10th Cir.1998) (applying Oklahoma law) (victims of bombing of Oklahoma City federal building filed negligence per se claim based on violation of Kansas fertilizer labeling statute against manufacturer of ammonium nitrate, which was used to construct the bomb).

4. Is the court required to accept a statute's definition of reasonable conduct as controlling? If the statute is applicable, what remains of the jury's role? See the next cases.

(A) Applicability of Statute

Stachniewicz v. Mar-Cam Corp.

Supreme Court of Oregon, 1971.

259 Or. 583, 488 P.2d 436.

HOLMAN, Justice. The patron of a drinking establishment seeks to recover against the operator for personal injuries allegedly inflicted by other customers during a barroom brawl. The jury returned a verdict for defendant. Plaintiff appealed.

From the evidence introduced, the jury could find as follows:

A fight erupted in a bar between a group of persons of American Indian ancestry, who were sitting in a booth, and other customers who were at an adjacent table with plaintiff. One of plaintiffs friends had refused to allow a patron from the booth to dance with the friend's wife because the stranger was intoxicated. Thereafter, such threats as, "Hey,

239

Whitey, how big are you?" were shouted from the booth at plaintiff and his companions. One of the persons at the table, after complaining to the bartender, was warned by him, "Don't start trouble with those guys." Soon thereafter, those individuals who had been sitting in the booth approached the table and one of them knocked down a person who was talking to a member of plaintiff's party. With that, the brawl commenced.

After a short melee, someone shouted "Fuzz!" and those persons who had been sitting in the booth ran out a door and into the parking lot, with one of plaintiffs friends in hot pursuit. Upon reaching the door, the friend discovered plaintiff lying just outside with his feet wedging the door open.

Plaintiff suffered retrograde amnesia and could remember nothing of the events of the evening. No one could testify to plaintiff's whereabouts at the time the band in the booth went on the warpath or to the cause of the vicious head injuries which plaintiff displayed when the brawl was ended.

The customers in the booth had been drinking in defendant's place of business for approximately two and one-half hours before the affray commenced.

The principal issue is whether, as plaintiff contends, violations of ORS 471.410(3) and of Oregon Liquor Control Regulation No. 10-065(2) constitute negligence as a matter of law. The portion of the statute relied on by plaintiff reads as follows:

"(3) No person shall give or otherwise make available any alcoholic liquor to a person visibly intoxicated ***."

The portion of the regulation to which plaintiff points provides:

"(2) No licensee shall permit or suffer any loud, noisy, disorderly or boisterous conduct, or any profane or abusive language, in or upon his licensed premises, or permit any visibly intoxicated person to enter or remain upon his licensed premises."

The trial court held that a violation of either the statute or the regulation did not constitute negligence per se. It refused requested instructions and withdrew allegations of negligence which were based on their violation.

A violation of a statute or regulation constitutes negligence as a matter of law when the violation results in injury to a member of the class of persons intended to be protected by the legislation and when the harm is of the kind which the statute or regulation was enacted to prevent. [Cc] The reason behind the rule is that when a legislative body has generalized a standard from the experience of the community and prohibits conduct that is likely to cause harm the court accepts the formulation. [C]

However, in addition, it is proper for the court to examine preliminarily the appropriateness of the standard as a measure of care for civil litigation under the circumstances presented. [C] Restatement

240

(Second) of Torts § 286, comment d (1965). The statute in question prevents making available alcohol to a person who is already visibly intoxicated. This makes the standard particularly inappropriate for the awarding of civil damages because of the extreme difficulty, if not impossibility, of determining whether a third party's injuries would have been caused, in any event, by the already inebriated person. Unless we are prepared to say that an alcoholic drink given after visible intoxication is the cause of a third party's injuries as a matter of law, a concept not advanced by anyone, the standard would be one almost impossible of application by a factfinder in most circumstances. ***

The regulation promulgated by the commission is an altogether different matter. ***

ORS 471.030, entitled "Purpose of Liquor Control Act," provides, in part, as follows:

"(1) The Liquor Control Act shall be liberally construed so as:

"(a) To prevent the recurrence of abuses associated with saloons or resorts for the consumption of alcoholic beverages." ***

An examination of the regulation discloses that it concerns matters having a direct relation to the creation of physical disturbances in bars which would, in turn, create a likelihood of injury to customers.

A common feature of our western past, now preserved in story and reproduced on the screen hundreds of times, was the carnage of the barroom brawl. No citation of authority is needed to establish that the "abuses associated with saloons," which the Liquor Control Act seeks to prevent, included permitting on the premises profane, abusive conduct and drunken clientele (now prohibited by the regulation) which results in serious personal injuries to customers in breach of the bar owner's duty to protect his patrons from harm. We find it reasonable to assume that the commission, in promulgating the regulation, intended to prevent these abuses, and that they had in mind the safety of patrons of bars as well as the general peace and quietude of the community. In view of the quoted purpose of the Act and of the history of injury to innocent patrons of saloons, we cannot assume otherwise.

In addition, we see no reason why the standard is not an appropriate one for use in the awarding of civil damages. Because plaintiff was within the class of persons intended to be protected by the regulation and the harm caused to him was the kind the statute was intended to prevent, we hold that the trial court erred in not treating the alleged violations of the regulation as negligence as a matter of law. ***

We believe it would be fair for the jury to infer, in the circumstances set forth in the statement of the facts, that plaintiff was injured by one of the persons in the booth who had created the disturbance and that the injuries would not have occurred except for defendant's violation of the commission's regulation, as alleged.

The judgment of the trial court is reversed and the case is remanded for a new trial.

NOTES AND QUESTIONS

1. What will happen at the new trial? How will the jury instructions differ from those of the first trial? What will the jury need to decide?

2. What is the basis upon which a court seeks to select or reject a criminal statute as a standard of care in a particular tort suit? The court must determine each of the following.

A. The party seeking to charge the other with violation of the statute is a member of the class the legislature intended to protect. See Thomas v. Baltimore & O.R. Co., 19 Md.App. 217, 310 A.2d 186 (1973) (plaintiff who knew of location of railway crossing not in class to be protected by regulation requiring warning); Erickson v. Kongsli, 40 Wash.2d 79, 240 P.2d 1209 (1952) (landowner's property damaged by collision that resulted when defendant made a left turn in front of an oncoming vehicle--not in class to be protected); Distad v. Cubin, 633 P.2d 167 (Wyo.1981) (violation of regulations on emergency treatment not negligence per se when plaintiff did not appear to need emergency care--not in class to be protected); Long v. Daly, 156 P.3d 994 (Wyo. 2007) (driver injured by collision with cattle that had escaped railroad's fence not within class of persons to be protected by statute requiring railroad to maintain fence along railroad right of way because statute was aimed at protecting livestock owners from loss of cattle); Lockhart v. Loosen, 943 P.2d 1074 (Okla. 1997) (plaintiff, who had contracted herpes from her husband after his extramarital affair with defendant, could not use negligence per se to prove her case because she was not in the

class of persons the legislature intended to protect in passing legislation that prohibited those with venereal disease from marrying or engaging in sexual intercourse while infectious); and Horvath v. Ish, 134 Ohio St.3d 48, 979 N.E.2d 1246 (2012) (statutory responsibilities of ski-area operators and ski-area visitors designed by the legislature to be reciprocal and thus statute does not establish a duty of care that applies between skiers).

What result in the principal case if a waiter had been injured in the melee?

B. The hazard that caused injury was one the legislature intended to protect against. The leading case on the "different hazard" is Gorris v. Scott, L.R. 9 Ex. 125 (1874), where a contagious diseases act required that animals shipped by boat be kept in pens, to avoid the spread of disease. Plaintiffs sheep were washed overboard from defendant's boat during a storm, because they were not in pens. It was held that the violation of the statute did not make the defendant liable for the loss of the sheep.

What result in the principal case if plaintiff had been injured when another patron had stumbled and fallen upon him?

C. Whether it is appropriate to impose tort liability for violations of the statute. See Stevens v. Luther, 105 Neb. 184, 180 N.W. 87 (1920) (six mile an hour speed limit); Stafford v. Chippewa Valley Electric R. Co., 110

Wis. 331, 85 N.W. 1036 (1901) (requirement that a street car bell be rung continuously); Ridge v. Cessna Aircraft Co., 117 F.3d 126 (4th

Cir. 1997) (applying Virginia law) (FAA regulations for guidelines and standards of conduct for pilots too general to warrant application as negligence standard).

3. Because state legislative history may be scanty and also difficult to obtain, there may be wide latitude for a court to decide who is in the "class" or what the "hazard" was that the legislature had in mind. On occasion the court may rely on the title or the preamble of the statute. Compare Kelly v. Henry Muhs Co., 71 N.J.L. 358, 59 A. 23 (1904) (firefighter not permitted to use statute requiring elevator shafts to be guarded because title and body of statute referred to safety of employees) with Drake v. Fenton, 237 Pa. 8, 85 A. 14(1912) (firefighter permitted to use similar statute because its title was regulation of building safety and was not limited to employee safety). Or the legislature may decide the statute had more than one purpose. For example, what is the purpose of a statute that prohibits a motor vehicle operator from leaving his car running with the keys in it on a public street? To prevent theft of the car, with resulting loss to the owner and his insurance company and an increased burden on the police? Cf. Anderson v. Theisen, 231 Minn. 369, 43 N.W.2d 272 (1950). To prevent the car from being started up by children or other irresponsible people? Cf. Bouldin v. Sategna, 71 N.M. 329, 378 P.2d 370 (1963). To prevent joy-riding teenagers from "taking it out for a spree"? Cf. Kozicki v. Dragon, 255 Neb. 248, 583 N.W.2d 336 (1998) (statute is for protection of users of public streets; teenage thief testified that four or five of the cars she had previously stolen had ended up wrecked). To prevent it from being stolen by a tense thief, endangering people in the vicinity while trying to make his getaway? Ney v. Yellow Cab Co., 2 Ill.2d 74, 117 N.E.2d 74 (1954).

4. Who decides whether that statute applies to the conduct? Roberts v. Randall, 51 P.3d 204 (Wyo.2002) (trial court judge correctly determined that statutes governing "rules of the road" for "motor vehicles" applied to drivers of snowmobiles in case where plaintiff alleged that defendant was on wrong side of a road that had been closed during winter to regular traffic and approved as a snowmobile trail).

5. A county ordinance provides that a "Pit Bull Terrier" must be "secured by an unbreakable or unseverable leash and maintained under the control of an adult" whenever it is out of its kennel. Owner's 15-year-old son had a pit bull terrier on the front steps in unfenced yard without a leash when 12-year-old plaintiff and two of her friends walked by on the sidewalk. One of the girls got into an argument with the boys who threatened to "sic" the dog on the girls. Owner's son said something to dog and dog ran toward the girls. Plaintiff turned to flee the dog and ran into the path of a car. Is plaintiff within the protected class? Is her injury, suffered when fleeing the approaching pit bull, the kind of injury the statute was designed to prevent? Is the standard of conduct of the statute otherwise appropriate for use? Moore v. Myers, 161 Md.App. 349, 868 A.2d 954 (2005) (yes).

6. Federal Statutes and Regulations. There is no "doctrine" of negligence per se in federal law. Because there is no general federal common law of negligence as a result of Erie R. Co. v. Tompkins, 304 U.S. 64 (1938),

the federal courts are in no position to adopt a criminal statutory rule of conduct as a civil rule of conduct replacing the general standard of care. They may "imply" a civil action from the criminal statute, thus placing the responsibility for the action on the Congress. See Chapter 23, Torts in the Age of Statutes.

Should violation of a federal statute be a basis for finding negligence per se under state common law? Surprisingly, there is very little explicit consideration of this issue, with most courts appearing to assume that federal statutes can be used to set the standard of care in a state common law negligence action. See Steagall v. Dot Mfg. Corp., 223 Tenn. 428, 446 S.W.2d 515 (1969), where the court assumed that violation of the Federal Hazardous Substances Act might be negligence per se but found no proximate cause. In a case of first impression in Idaho, a state court found that violation of Occupational Safety and Health Administration regulations constituted negligence per se as a matter of state law. Sanchez v. Galey, 112 Idaho 609, 733 P.2d 1234 (1986).

In diversity cases where they are applying state law, most federal courts have assumed that the state court would apply negligence per se to a federal statute or regulation. See Orthopedic Equip. Co. v. Eutsler, 276 F.2d 455 (4th Cir.1960) (Federal Food, Drug & Cosmetic Act--Virginia law); Gober v. Revlon, Inc., 317 F.2d 47 (4th Cir.1963) (same--California law); Ridge v. Cessna Aircraft Co., 117 F.3d 126 (4th Cir.1997) (FAA regulations--Virginia law; inapplicable for other reasons). Howard v. Zimmer, 299 P.3d 463 (Okla. 2014) (answering certified question from federal court and specifically finding that an Oklahoma negligence per se action can be based on violation of the federal Medical Device Amendments Act). See also Restatement

(Third) of Torts: Liability for Physical and Emotional Harm § 14, comment a (2010) (recognizing that most states will use federal statutes for negligence per se). But see St. Luke Hospital, Inc. v. Straub, 354 S.W.3d 529 (Ky. 2011) (negligence per se is codified in Kentucky and it does not extend to federal statutes and regulations).

7. Ordinances. Although a few states give a lesser effect to ordinances than they do to statutes, most states treat ordinances in the same manner as statutes. Winger v. CM Holdings, LLC, 881 N.W.2d 433, 449 (Iowa 2016) (municipal building code re balcony railing height) ("We see no good reason to limit application of the negligence per se doctrine to laws of statewide application. The negligence per se doctrine also applies to local ordinances.")

8. Administrative Regulations. Unlike Oregon in the principal case, some states give regulations promulgated under the authority of administrative agencies lesser effect than statutes. See, e.g., Chambers v. St. Mary's School, 82 Ohio St.3d 563, 697 N.E.2d 198 (1998) (violation of administrative rule does not constitute negligence per se, but may be admissible as evidence of negligence); Elliott v. S.D. Warren Co., 134 F.3d 1 (1st Cir.1998) (applying Maine law) (OSHA regulation, at best, is on par with statute and thus evidence of negligence under Maine law); Morris, The Role of Administrative Safety Measures in Negligence Actions, 28 Tex. L. Rev. 143 (1949). Is an OSHA regulation that applies to employers admissible against the manufacturer of an allegedly defective machine used in the workplace?

Hansen v. Abrasive Engineering and Mfg., Inc., 317 Or. 378, 856 P.2d 625 (1993) (admitted and given same weight as industry custom). Against the employee to prove contributory negligence per se? Leaf v. Goodyear Tire & Rubber Co., 590 N.W.2d 525 (Iowa 1999) (not admitted because purpose is protection of employee, not of manufacturer).

9. Advisory Codes, Voluntary Industry Standards. Advisory safety codes promulgated by governmental authority, industry, or voluntary associations may be admissible, though not binding, on the issue of negligence if properly identified and shown through expert testimony to have general acceptance in the industrial community. See Lemery v. O'Shea Dennis, Inc., 112 N.H. 199, 291 A.2d 616 (1972); Philo, Use of Safety Standards, Codes and Practices in Tort Litigation, 41 N.D.Law. 1 (1965).

10. Ethical Standards, Codes of Professional Conduct. No state provides that a lawyer's violation of the Code of Professional Conduct is legal malpractice per se. At least one state allows such a violation to create a rebuttable presumption of legal malpractice. Most jurisdictions, however, permit proof of an ethical violation to be introduced as evidence of legal malpractice. Some jurisdiction do not even permit the jury to hear evidence of the violation of an ethical rule because those rules are intended as guidelines for an ethical standard of conduct and thus are not appropriate as a basis for civil liability. Stender v. Blessum, 897 N.W.2d 491 (Iowa 2017) (collecting cases from other jurisdictions on each possible treatment).

11. Why does the opinion identify the "ancestry" of the bar patrons sitting in the booth?

Perry v. S.N. and S.N.

Texas Supreme Court, 1998.

973 S.W.2d 301.

Phillips, Chief Justice. ***This is a suit for injuries arising out of the abuse of children at a day care center. Plaintiffs filed suit individually and as next friends of their two children, alleging that defendants witnessed the abuse and failed to report it to the police or child welfare officials. The sole issue before us is whether plaintiffs may maintain a cause of action for negligence per se based on the Family Code, which requires any person having cause to believe a child is being abused to report the abuse to state authorities and makes the knowing failure to do so a misdemeanor. See TEX Fam. CODE §§ 261.101(a), 261.109 (formerly TEX. FAM. CODE §§ 34.01, 34.07). The trial court granted summary judgment for defendants, but the court of appeals reversed and remanded plaintiffs' negligence per se ***claims for trial. [C] We reverse the judgment of the court of appeals and render judgment that plaintiffs take nothing. Because plaintiffs did not preserve their common law negligence claims, we do not decide whether there should be a common law duty to report child abuse in some circumstances.

B.N. and K.N. attended a day care center operated by Francis Keller and her husband Daniel Keller from March 25, 1991, to August 28, 1991.

245

Their parents, S.N. and S.N., allege that during that period, Daniel Keller regularly abused B.N. and K.N. and other children at the

center both physically and sexually. Mr. and Mrs. N. brought suit against the Kellers and three of the Kellers' friends, Douglas Perry, Janise White, and Raul Quintero. Plaintiffs claim that Francis Keller confided in White at an unspecified time that Daniel Keller had "abusive habits toward children." They further allege that on one occasion in August 1991, while visiting the Kellers, defendants Perry, White, and Quintero all saw Daniel Keller bring a number of children out of the day care center into the Kellers' adjoining home and sexually abuse them. The record does not indicate whether B.N. and K.N. were among these children. According to plaintiffs, Perry, White, and Quintero did not attempt to stop Daniel Keller from abusing the children or report his crimes to the police or child welfare authorities. ***

Mr. and Mrs. N. alleged only that Perry, White, and Quintero were negligent per se because they violated a statute requiring any person who "has cause to believe that a child's physical or mental health or welfare has been or may be adversely affected by abuse" to file a report with the police or the Department of Protective and Regulatory Services. [C] Plaintiffs also asserted ***common law negligence claims. They claimed that Perry, White, and Quintero's failure to report the abuse proximately caused them harm by permitting the day care center to remain open, thus enabling Daniel Keller to continue abusing the children at the center. They sought damages for pain, mental anguish, and medical expenses, as well as loss of income when they could not work outside the home because of B.N. and K.N.'s injuries.

Perry, White, and Quintero moved for summary judgment on the sole ground that plaintiffs failed to state a cause of action. ***

The trial court granted Perry, White, and Quintero's motions for summary judgment and severed plaintiffs' claims against those three defendants from their suit against the Kellers, which is not before us. ***When the ground for the trial court's decision is that plaintiffs failed to state a cause of action, we must take the allegations in the pleadings as true in determining whether a cause of action exists. [C]

The court of appeals affirmed the summary judgment on plaintiffs' common law negligence claims but reversed and remanded for trial on the issues of negligence per se***, holding that a violation of the Family Code's child abuse reporting requirement is negligence per se. [C] Mr. and Mrs. N. have not appealed the court of appeals' judgment affirming the summary judgment against them on common law negligence. Therefore, the question of whether Texas should impose a new common law duty to report child abuse on the facts of this case is not before us. ***

The court of appeals found a duty in the [mandatory child abuse reporting statute.] ***

246

All persons have a duty to obey the criminal law in the sense that they may be prosecuted for not doing so, but this is not equivalent to a duty in tort. See, e.g., Smith v. Merritt, 940 S.W.2d 602, 607-08 (Tex. 1997) (statute making it a crime to furnish alcohol to persons under age 21 did not impose a tort duty on social hosts). "It is well-established that the mere fact that the Legislature adopts a criminal statute does not mean that this court must accept it as a standard for civil liability." [C] "The considerations which warrant imposing tort liability are not identical with those which warrant criminal

conviction," [c], and we will not apply the doctrine of negligence per se if the criminal statute does not provide an appropriate basis for civil liability. ***

Before we begin our analysis of whether section 261.109 of the Family Code is an appropriate basis for tort liability, we emphasize that we must look beyond the facts of this particular case to consider the full reach of the statute. We do not decide today whether a statute criminalizing only the type of egregious behavior with which these defendants are charged--the failure of eyewitnesses to report the sexual molestation of preschool children--would be an appropriate basis for a tort action. That is not the statute the Legislature passed. Rather, the issue before us is whether it is appropriate to impose tort liability on any and every person who "has cause to believe that a child's physical or mental health or welfare has been or may be adversely affected by abuse or neglect and knowingly fails to report." [C] Cf. Leonard, The Application of Criminal Legislation to Negligence Cases: A Reexamination, 23 SANTA CLARA L. REV. 427, 457--66 (1983) (contrasting the rigidity of statutory standards with the flexibility of case-by-case common law determinations of duty and breach).

The threshold questions in every negligence per se case are whether the plaintiff belongs to the class that the statute was intended to protect and whether the plaintiffs injury is of a type that the statute was designed to prevent. ***

B.N. and K.N. are within the class of persons whom the child abuse reporting statute was meant to protect, and they suffered the kind of injury that the Legislature intended the statute to prevent. [Footnote

omitted.] But this does not end our inquiry. [C] The Court must still determine whether it is appropriate to impose tort liability for violations of the statute. [C] This determination is informed by a number of factors, some discussed by the court of appeals in this case and others derived from past negligence per se decisions of Texas courts and from scholarly analysis. These factors are not necessarily exclusive, nor is the issue properly resolved by merely counting how many factors lean each way. Rather, we set out these considerations as guides to assist a court in answering the ultimate question of whether imposing tort liability for violations of a criminal statute is fair, workable, and wise.

We first consider the fact that, absent a change in the common law, a negligence per se cause of action against these defendants would derive

247

the element of duty solely from the Family Code. At common law there is generally no duty to protect another from the criminal acts of a third party or to come to the aid of another in distress. [Cc] Although there are exceptions to this no-duty rule, see, e.g., Lefmark Management Co. v. Old, 946 S.W.2d 52, 53 (Tex. 1997) (noting that under some circumstances, person in control of premises has duty to protect invitees from crime), this case does not fall within any of the established exceptions, and Mr. and Mrs. N. have not asked this Court to impose on persons who are aware of child abuse a new common law duty to report it or take other protective action.

In contrast, the defendant in most negligence per se cases already owes the plaintiff a pre-existing common law duty to act as a

reasonably prudent person, so that the statute's role is merely to define more precisely what conduct breaches that duty. [Cc] For example, the overwhelming majority of this Court's negligence per se cases have involved violations of traffic statutes by drivers and train operators--actors who already owed a common law duty to exercise reasonable care toward others on the road or track. [Cc]

When a statute criminalizes conduct that is also governed by a common law duty, as in the case of a traffic regulation, applying negligence per se causes no great change in the law because violating the statutory standard of conduct would usually also be negligence under a common law reasonableness standard. [Cc] But recognizing a new, purely statutory duty "can have an extreme effect upon the common law of negligence" when it allows a cause of action where the common law would not. In such a situation, applying negligence per se "brings into existence a new type of tort liability." Burnette v. Wahl, 284 Ore. 705, 588 P.2d 1105, 1109 (Or.1978) [casebook page 1290], The change tends to be especially great when, as here, the statute criminalizes inaction rather than action.

Some commentators contend that the term "negligence per se" does not even apply when the statute on which civil liability is based corresponds to no common law duty. See Keeton et al., Prosser & Keeton on the Law of Torts § 36, at 221 n.9; Forell, The Statutory Duty Action in Tort: A Statutory/Common Law Hybrid, 23 IND. L. REV. 781, 782 (1990). While our definition has never been so restrictive, this Court in fact has created a new duty by applying negligence per se on only one occasion. ***Thus, based on both this Court's past practice and the observations of noted scholars, we

conclude that the absence of a relevant common law duty should be considered in deciding whether to apply negligence per se to the Family Code's reporting provision.

The court of appeals in this case listed several factors to consider in deciding whether to apply negligence per se. [Cc] According to the court of appeals, the principal factors favoring negligence per se are that the Legislature has determined that compliance with criminal statutes is practicable and desirable and that criminal statutes give citizens notice

248

of what conduct is required of them. [C] As considerations against negligence per se, the court of appeals cautioned that some penal statutes may be too obscure to put the public on notice, may impose liability without fault, or may lead to ruinous monetary liability for relatively minor offenses. [C] The first of these factors is not helpful because it points the same way in every case: the very existence of a criminal statute implies a legislative judgment that its requirements are practicable and desirable. The court of appeals' remaining factors, however, are pertinent to our analysis.

On the question of notice, this Court has held that one consideration bearing on whether to apply negligence per se is whether the statute clearly defines the prohibited or required conduct. [Cc] The Family Code's reporting requirement is triggered when a person "has cause to believe that a child's physical or mental health or welfare has been or may be adversely affected by abuse or neglect." [C] In this case, defendants allegedly were eyewitnesses to sexual abuse. Under these facts, there is no question that they had cause to believe

abuse was occurring, and thus that the statute required them to make a report. In many other cases, however, a person may become aware of a possible case of child abuse only through second-hand reports or ambiguous physical symptoms, and it is unclear whether these circumstances are "cause to believe" that such conduct "may be" taking place. [6] [C] A statute that conditions the requirement to report on these difficult judgment calls does not clearly define what conduct is required in many conceivable situations.

* * *

[6] Determining whether abuse is or may be occurring in a particular case is likely to be especially difficult for untrained laypersons. Texas is one of a minority of states that require any person who suspects child abuse to report it. See O'Brien & Flannery, The Pending Gauntlet to Free Exercise: Mandating that Clergy Report Child Abuse, 25 LOY. L.A. L. REV. 1, 24-25 & n.127 (1991) (collecting statutes). Most states place such a requirement only on professionals who may be expected to know more than the average person about recognizing child abuse and who have a professional relationship with and responsibility for children. ***

The next factor the court of appeals considered was whether applying negligence per se to the reporting statute would create liability without fault. [C] We agree with the court of appeals that it would not, because the statute criminalizes only the "knowing" failure to report. ***This characteristic of the statute weighs in favor of imposing civil liability.

Our next consideration is whether negligence per se would impose ruinous liability disproportionate to the seriousness of the

defendant's conduct. In analyzing this factor, the court of appeals treated child abuse as the relevant conduct. [C] ("The abuse of children has become notorious."). The conduct criminalized by section 261.109, however, is not child abuse but the failure to report child abuse. Through its penal laws, the Legislature has expressed a judgment that abuse and non-reporting deserve very different legal consequences. ***[The Court contrasted the severe penalty for the offense committed by the abuser, five to ninety- nine years in prison and a fine of up to $10,000, with the penalty provided

for failure to report, no more than six months in jail and a $2,000 fine.] This evidence of legislative intent to penalize non-reporters far less severely than abusers weighs against holding a person who fails to report suspected abuse civilly liable for the enormous damages that the abuser subsequently inflicts. The specter of disproportionate liability is particularly troubling when, as in the case of the reporting statute, it is combined with the likelihood of "broad and wide-ranging liability" by collateral wrongdoers. ***

Finally, in addition to the factors discussed by the court of appeals, we have also looked to whether the injury resulted directly or indirectly from the violation of the statute. ***[T]he indirect relationship between violation of such a statute and the plaintiff's ultimate injury is a factor against imposing tort liability. ***

We conclude by noting that for a variety of reasons, including many of those we have discussed, most other states with mandatory reporting statutes similar to Texas's have concluded that the failure to report child abuse is not negligence per se. [Cc]

***Because a decision to impose negligence per se could not be limited to cases charging serious misconduct like the one at bar, but rather would impose immense potential liability under an ill-defined standard on a broad class of individuals whose relationship to the abuse was extremely indirect, we hold that it is not appropriate to adopt Family Code section 261.109(a) as establishing a duty and standard of conduct in tort. Therefore, Mr. and Mrs. N. and their children may not maintain a claim for negligence per se ***based on defendants' violation of the child abuse reporting statute. Because plaintiffs did not appeal the court of appeals' adverse decision on their common law negligence claims, we do not consider whether Texas should impose a common law duty to report or prevent child abuse.

For the foregoing reasons, we reverse the judgment of the court of appeals and render judgment that plaintiffs take nothing.

NOTES AND QUESTIONS

1. The principal case (at footnote 6) indicates that the Texas statute imposes a reporting obligation on everyone while most such statutes impose it only on professionals like doctors, nurses, teachers, and social workers who may be expected to know more about identifying child abuse than a layperson. Would that distinction make a difference in the use of the statute to establish negligence per se? Compare Landeros v. Flood, 17 Cal.3d 399, 551 P.2d 389, 131 Cal.Rptr. 69 (1976) (doctor's failure to recognize and report proper basis for negligence per se) with Arbaugh v. Board of Education, 214 W.Va. 677, 591 S.E.2d 235 (2003) (teacher's failure to report not proper basis for negligence per se).

2. Generally, if the plaintiff is not permitted to use the statute to prove the standard of conduct, the plaintiff's case defaults to the reasonable person standard and may still succeed if the plaintiff can prove that the

defendant failed to act as the reasonable person would act. Why did the plaintiffs in this case not have the chance to argue to the jury that the defendants failed to act as a reasonable person would act under the circumstances? Even if preserved, that argument was likely to be met with a finding of no duty. See, for example, Bell v. Grow With Me Childcare, 299 Neb. 136, 907 N.W.2d 705, 721 (2018) (After their nanny abused their child, parents sued the childcare centers where she had worked previously arguing that they knew or should have known that she had abused children there. "As a matter of law, the childcare centers cannot be liable in tort for [baby's] death, because their conduct did not create a risk of physical harm to [baby] and because they did not have a special relationship with either [baby, parents, or former employee] that would give rise to an affirmative duty to protect [baby] from the risks posed by [former employee]").

3. Who makes the decision whether the provision of the Family Code can be used as the basis for negligence per se--judge or jury?

4. Licensing Statutes. What if the day care center in the principal case had been operating without a license required by statute? Could that serve as the basis for a negligence per se jury instruction? Most courts have refused to use licensing statutes to establish the standard of care. Brown v. Shyne, 242 N.Y. 176, 151 N.E. 197 (N.Y. 1926) (chiropractor not licensed to practice medicine);

Hertz Driv-Ur-Self System v. Hendrickson, 109 Colo. 1, 121 P.2d 483 (1942) (violation of statute prohibiting renting of car to someone who did not have operator's permit); Fuller v. Sirois, 97 N.H. 100, 82 A.2d 82 (1951) (driving motor vehicle after operator's license was suspended for reckless driving); Cullip v. Domann, 266 Kan. 550, 972 P.2d 776 (1999) (hunting without license not basis for negligence per se in case where fellow hunter was injured by accidental discharge of firearm); and Michaels v. Avitech, Inc., 202 F.3d 746 (5th Cir. 2000) (applying Texas law) (pilot did not have current license). See Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 14 comment h (2010) (citing cases and noting that the reason for the person's lack of license may not be related to a safety purpose). Plaintiff is injured by fireworks that had been brought into the state in violation of a state statute. May defendant use the violation of the statute to show the plaintiffs contributory negligence? Horstmeyer v. Golden Eagle Fireworks, 534 N.W.2d 835 (N.D.1995) (violation of statute does not establish negligent conduct because, by analogy to licensing cases, the violation did not cause the harm).

5. Could a crime victim be liable for failing to report a crime as required by state and federal statutes? An accountant discovered that his bookkeeper had embezzled money from one of his client's accounts. He fired her and then negotiated the return of the money in exchange for not reporting her to the police. In the meantime, bookkeeper got a job at a law firm and embezzled money from it. Law firm then sued accountant and client alleging, inter alia, negligence per se based on federal and state statutes that require crimes to be reported. The Texas Appeals Court found that the

statutes were for the protection of the state's interest in apprehending felons and that even if they could be construed as for the protection of the general public, like the law firm, use of the statutes to impose liability on those who

251

failed to report criminal behavior would not be an appropriate use of the statutes. San Benito Bank & Trust v. Landair Travels, 31 S.W.3d 312 (Tex. App. 2000).

6. The fact that a statute is inapplicable, because it is not intended for the protection of the class of persons in which the plaintiff is included, or because it was not intended for protection against the hazards, or because it is otherwise inappropriate for such use, does not necessarily rule it out entirely as evidence bearing on the issue of negligence. Thus in Hansen v. Kemmish, 201 Iowa 1008, 208 N.W. 277 (1926), a statute, intended only to prevent the misbreeding of animals, provided that hogs should be confined by fences of specified strength. Defendant fenced his hogs with a fence of less strength. One of them broke through the fence, escaped into the highway, and wrecked plaintiff's car. It was held that, while the statute did not define a standard of conduct to be adopted as a matter of law, the jury could consider it as bearing on the kind of fence necessary for the effective confinement of hogs.

7. A trial court's finding that the statute is not applicable requires a new trial only if the party who had sought to use it persuades the appellate court both that the negligence per se instruction should have been given and that the failure to give it affected the outcome of the case. Appealing party would not be able to show that if the jury

had found the other party's conduct to be negligent in the absence of the negligence per se instruction. Grove v. Port Authority of Allegheny County, 218 A.3d 877 (Pa. 2019).

8. The effect of the violation of criminal (and other) statutes and regulations on the law of torts is not confined by any means to the tort of negligence and the doctrine of negligence per se. It has been generally recognized that in furtherance of the purpose of particular legislation and to insure its effectiveness, a court may, despite the absence of a provision to this effect, supply a civil action for damages according relief to a person for whose benefit conduct of another was either proscribed or required by the legislation. Restatement (Second) of Torts § 874A. The usual explanation is that the right is "implied" from the legislation. See Chapter 23, Torts in the Age of Statutes.

9. In 1992, the Kellers (the couple who ran the daycare center) were convicted of sex abuse and torturing children as part of satanic rituals. The young children who were witnesses told lurid stories of their experiences and a doctor testified that there were physical indications the children had been subjected to abuse. Later, however, the physician recanted his testimony and the Texas Court of Criminal Appeals reversed the Kellers' convictions and ordered a new trial. In 2017, the prosecutor announced that she was not planning to retry the Kellers because she believed they were actually innocent. The State of Texas awarded them $3.4 million dollars in compensation--approximately $80,000 for every year spent in prison. Selk, "Falsely Accused of Satanic Horrors, a Couple Spent 21 Years in Prison. Now They're Owed Millions" THE WASHINGTON POST (August 25, 2017).

(B) Effect of Statute

Martin v. Herzog

Court of Appeals of New York, 1920.

228 N.Y. 164, 126 N.E. 814.

CARDOZO, J. The action is one to recover damages for injuries resulting in death.

Plaintiff and her husband, while driving toward Tarrytown in a buggy on the night of August 21, 1915, were struck by the defendant's automobile coming in the opposite direction. They were thrown to the ground, and the man was killed. At the point of the collision the highway makes a curve. The car was rounding the curve when suddenly it came upon the buggy, emerging, the defendant tells us, from the gloom. Negligence is charged against the defendant, the driver of the car, in that he did not keep to the right of the center of the highway [c]. Negligence is charged against the plaintiff's intestate, the driver of the wagon, in that he was traveling without lights [c]. There is no evidence that the defendant was moving at an excessive speed. There is none of any defect in the equipment of his car. The beam of light from his lamps pointed to the right as the wheels of his car turned along the curve toward the left; and looking in the direction of the plaintiff's approach, he was peering into the shadow. The case against him must stand, therefore, if at all, upon the divergence of his course from the center of the highway. The jury found him delinquent and his victim blameless. The Appellate

Division reversed, and ordered a new trial. [Plaintiff now appeals to the Court of Appeals.]

***We think the unexcused omission of the statutory signals is more than some evidence of negligence. It is negligence in itself. Lights are intended for the guidance and protection of other travelers on the highway. Highway Law, § 329a. By the very terms of the hypothesis, to omit, willfully or heedlessly, the safeguards prescribed by law for the benefit of another that he may be preserved in life or limb, is to fall short of the standard of diligence to which those who live in organized society are under a duty to conform. That, we think, is now the established rule in this state. [Cc]

In the case at hand, we have an instance of the admitted violation of a statute intended for the protection of travelers on the highway, of whom the defendant at the time was one. Yet the jurors were instructed in effect that they were at liberty in their discretion to treat the omission of lights either as innocent or as culpable. They were allowed to "consider the default as lightly or gravely" as they would (Thomas, J., in the court below). ***Jurors have no dispensing power, by which they may relax the duty that one traveler on the highways owes under the statute to another. It is error to tell them that they have. The omission of these lights was a wrong, and, being wholly unexcused, was also a negligent wrong.

253

No license should have been conceded to the triers of the facts to find it anything else.

We must be on our guard, however, against confusing the question of negligence with that of the causal connection between the

negligence and the injury. A defendant who travels without lights is not to pay damages for his fault, unless the absence of lights is the cause of the disaster. A plaintiff who travels without them is not to forfeit the right to damages, unless the absence of lights is at least a contributing cause of the disaster. To say that conduct is negligence is not to say that it is always contributory negligence. "Proof of negligence in the air, so to speak, will not do." Pollock Torts (10th Ed.) p. 472.

We think, however, that evidence of a collision occurring more than an hour after sundown between a car and an unseen buggy, proceeding without lights, is evidence from which a causal connection may be inferred between the collision and the lack of signals. [Cc] If nothing else is shown to break the connection, we have a case, prima facie sufficient, of negligence contributing to the result.

We are persuaded that the tendency of the charge, and of all the rulings, following it, was to minimize unduly, in the minds of the triers of the facts, the gravity of the decedent's fault. Errors may not be ignored as unsubstantial, when they tend to such an outcome. A statute designed for the protection of human life is not to be brushed aside as a form of words, its commands reduced to the level of cautions, and the duty to obey attenuated into an option to conform.

The order of the Appellate Division should be affirmed, and judgment absolute directed on the stipulation in favor of the defendant, with costs in all courts.

[The dissenting opinion of HOGAN, J., is omitted.]

NOTES AND QUESTIONS

1. Who used violation of a statute to establish the standard of care in this case?

2. The majority of the courts take the position stated by Cardozo in this case: when the judge determines that a statute applies to the facts, an unexcused violation is "negligence per se," which must be declared by the court and not left to the jury. See, for example, Schlimmer v. Poverty Hunt Club, 597 S.E.2d 43 (Va. 2004).

3. A few states treat violation of a statute as giving rise to a "presumption" of negligence, which becomes negligence as a matter of law unless the presumption is rebutted. Since usually it can be rebutted only by showing an excuse for the violation, this appears to come out at much the same place as the "negligence per se" rule. See, for example, Bacon v. Lascelles, 165 Vt. 214, 678 A.2d 902 (1996) and the next principal case.

254

4. A minority of states hold that the violation is only evidence of negligence, which the jury may accept or reject as it sees fit. See, for example, Paramount Development Corp. v. Hunter, 249 Md. 188, 238 A.2d 869 (1968).

5. Washington, by statute, has a mix of negligence per se and evidence of negligence categories:

5.40.050. Breach of duty--Evidence of negligence--Negligence per se

A breach of a duty imposed by statute, ordinance, or administrative rule shall not be considered negligence per se, but may be considered by the trier of fact as evidence of negligence; however,

any breach of duty as provided by statute, ordinance, or administrative rule relating to: (1) Electrical fire safety, (2) the use of smoke alarms, (3) sterilization of needles and instruments used by persons engaged in the practice of body art, body piercing, tattooing, or electrology, or other precaution against the spread of disease, as required under RCW 70.54.350, or (4) driving while under the influence of intoxicating liquor or any drug, shall be considered negligence per se.

Zeni v. Anderson

Supreme Court of Michigan, 1976.

397 Mich. 117, 243 N.W.2d 270.

WILLIAMS, Justice. ***The accident which precipitated this action occurred one snowy morning, March 7, 1969, when the temperature was 11° F, the sky was clear and the average snow depth was 21 inches. Plaintiff Eleanor Zeni, then a 56-year-old registered nurse, was walking to her work at the Northern Michigan University Health Center in Marquette. Instead of using the snow-covered sidewalk, which in any event would have required her to walk across the street twice to get to her job, she traveled along a well-used pedestrian snowpath, with her back to oncoming traffic.

Defendant Karen Anderson, a college student, was driving within the speed limit in a steady stream of traffic on the same street. Ms. Anderson testified that she had turned on the defroster in the car and her passenger said she had scraped the windshield. An eyewitness whose deposition was read at trial, however, testified that defendant's windshield was clouded and he doubted that the

occupants could see out. He also testified that the car was traveling too close to the curb and that he could tell plaintiff was going to be hit.

Defendant's car struck the plaintiff on the driver's right side. Ms. Anderson testified she first saw the plaintiff between a car parked on the right-hand side of the road and defendant's car, and that she did not hear nor feel her car strike Ms. Zeni. The eyewitness reported seeing plaintiff flip over the fender and hood. He said when he went over to help her his knees were on or inside the white line delineating a parking space.

255

A security officer observed blood stains on the pavement approximately 13 feet from the curb.

Ms. Zeni's injuries were serious and included an intra-cerebral subdural hematoma which required neurosurgery. She has retrograde amnesia and therefore, because she does not remember anything from the time she began walking that morning until sometime after the impact, there is no way to determine whether she knew defendant was behind her. Following an extended period of convalescence, plaintiff, still suffering permanent disability, could return to work on only a part-time basis.

Testimony at trial indicated that it was common for nurses to use the roadway to reach the Health Center, and a security officer testified that in the wintertime it was safer to walk there than on the one sidewalk. Apparently, several days before the accident, Ms. Zeni had indeed fallen on the sidewalk. Although she was not hurt when she

fell, the Director of University Security was hospitalized when he fell on the walk.

Defendant, however, maintained that plaintiff's failure to use that sidewalk constituted contributory negligence because, she said, it violated M.C.L.A. § 257.655; M.S.A. § 9.2355, which requires:

"Where sidewalks are provided, it shall be unlawful for pedestrians to walk upon the main traveled portion of the highway. Where sidewalks are not provided, pedestrians shall, when practicable, walk on the left side of the highway facing traffic which passes nearest." ***

[There was a jury verdict for plaintiff in the trial court. The court of appeals reversed because of instructions on the subject of last clear chance. Discussion of last clear chance is omitted.]

A. Violation of Statute as Rebuttable Presumption. In a growing number of states, the rule concerning the proper role of a penal statute in a civil action for damages is that violation of the statute which has been found to apply to a particular set of facts establishes only a prima facie case of negligence, a presumption which may be rebutted by a showing on the part of the party violating the statute of an adequate excuse under the facts and circumstances of the case. The excuses may not necessarily be applicable in a criminal action, since, in the absence of legislatively-mandated civil penalties, acceptance of the criminal statute itself as a standard of care in a civil action is purely discretionary. See Comment and Illustrations, 2 Restatement (Second) of Torts § 288A, pp. 33-37. ***

This is the approach we follow today. ***

[An] attraction of this approach is that it is fair. "If there is sufficient excuse or justification, there is ordinarily no violation of a statute and the statutory standard is inapplicable."[C] It would be unreasonable to adhere to an automatic rule of negligence "where observance would

256

subject a person to danger which might be avoided by disregard of the general rule." [C]

The approach is logical. Liability without fault is not truly negligence, and in the absence of a clear legislative mandate to so extend liability, the courts should be hesitant to do so on their own. Because these are, after all, criminal statutes, a court is limited in how far it may go in plucking a statute from its criminal milieu and inserting it into the civil arena. The rule of rebuttable presumption has arisen in part in response to this concern, and in part because of the reluctance to go to the other extreme and in effect, discard or disregard the legislative standard. ***

B. Violation of Statute as Negligence Per Se. While some Michigan cases seem to speak of negligence per se as a kind of strict liability, [c], an examination indicates that there are a number of conditions that attempt to create a more reasonable approach than would result from an automatic application of a per se rule.

[Reference is made here to the court's construing the statute, determining its purpose, and applying principles of proximate cause so that negligence per se may not apply at all.]

Despite such limitations, the judge-made rule of negligence per se has still proved to be too inflexible and mechanical to satisfy thoughtful commentators and judges. It is forcefully argued that no matter how a court may attempt to confine the negligence per se doctrine, if defendant is liable despite the exercise of due care and the availability of a reasonable excuse, this is really strict liability, and not negligence. Prosser, The Law of Torts (4th ed.), § 36, p. 197. Since it is always possible that the Legislature's failure to deal specifically with the question of private rights was not accidental, and that there might have been no legislative intent to change the law of torts, such treatment of the statute may well be a gross perversion of the legislative will. It is troublesome, too, that "potentially ruinous civil liability" may follow from a "minor infraction of petty criminal regulations", [c] or may, in a jurisdiction burdened by contributory negligence, serve to deprive an otherwise deserving plaintiff of a much-needed recovery. ***

C. Violation of Statute as Evidence of Negligence. Just as the rebuttable presumption approach to statutory violations in a negligence context apparently arose, at least in part, from dissatisfaction with the result of a mechanical application of the per se rule, a parallel development in our state with respect to infractions of ordinances and of administrative regulations, has been that violations of these amount to only evidence of negligence. [Cc]

We have not, however, chosen to join that small minority which has decreed that violation of a statute is only evidence of negligence. In view of the fairness and ease with which the rebuttable presumption standard

has been and can be administered, we believe the litigants are thereby well served and the Legislature is given appropriate respect.

D. Application of Statutory Standard to This Case. We have seen, therefore, that while some of our Michigan cases seem to present negligence per se as an unqualified rule, the fact of the matter is that there are a number of qualifications which make application of this rule not really a per se approach at all. Not only must the statutory purpose doctrine and the requirement of proximate cause be satisfied, but the alleged wrongdoer has an opportunity to come forward with evidence rebutting the presumption of negligence.

An accurate statement of our law is that when a court adopts a penal statute as the standard of care in an action for negligence, violation of that statute establishes a prima facie case of negligence, with the determination to be made by the finder of fact whether the party accused of violating the statute has established a legally sufficient excuse. If the finder of fact determines such an excuse exists, the appropriate standard of care then becomes that established by the common law. Such excuses shall include, but shall not be limited to, those suggested by the Restatement (Second) of Torts § 288A, and shall be determined by the circumstances of each case.

In the case at bar, moreover, the statute itself provides a guideline for the jury, for a violation will not occur when it is impracticable to use the sidewalk or to walk on the left side of a highway. This is ordinarily a question for the finder of fact, [c] and thus the statute itself provides not only a legislative standard of care which may be

accepted by the court, but a legislatively mandated excuse as well. ***

***[W]e find the jury was adequately instructed as to the effect of the violation of this particular statute on plaintiff's case. ***

The Court of Appeals is reversed and the trial court is affirmed. Costs to plaintiff.

NOTES AND QUESTIONS

1. Section 288A of the Second Restatement, referred to in the principal case, reads as follows:

(1) An excused violation of a legislative enactment or an administrative regulation is not negligence.

(2) Unless the enactment or regulation is construed not to permit such excuse, its violation is excused when

(a) the violation is reasonable because of the actor's incapacity;

(b) he neither knows nor should know of the occasion for compliance;

(c) he is unable after reasonable diligence or care to comply;

(d) he is confronted by an emergency not due to his own misconduct;

(e) compliance would involve a greater risk of harm to the actor or to others.

See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 15 (2010) (similar list of excused violations).

2. The principal case classifies the approaches to the question of what effect to give to the violation of a statute into three groups: (1) negligence per se, (2) prima facie (rebuttable presumption) negligence, and (3) some evidence of negligence. Most commentators would agree with this classification, but there may be disagreement on which states fall into which of the first two groups. The Restatement (Second) espouses the negligence per se approach, but permits excuses as indicated in § 288A. The excuses are ones commonly permitted by the courts. Thus, an unexcused violation is negligence per se. The second classification (prima facie negligence or rebuttable presumption) applies to jurisdictions in which the issue goes to the jury even when there is no credible evidence of a recognized excuse, but merely testimony that the defendant acted with due care. See, for example, Gillingham v. Stephenson, 209 W.Va. 741, 551 S.E.2d 663 (2001) (in case where driver of van that rear-ended pickup violated statutes that prohibited following too closely, driving in excess of speed reasonable for conditions, and failing to maintain control of vehicle, issue of negligence is one for jury because driver testified he hit black ice and jury could have concluded that he acted reasonably under the circumstances). The third category is for jurisdictions that provide the violation is some evidence of negligence, but not conclusive.

3. Should these situations be treated as excuses?

A. A statute provides that no vehicle shall be driven on the highway at night without a tail light. Without any fault or knowledge of defendant, his tail light goes out while he is driving at night, and as a result plaintiff is injured in a collision with him. Brotherton v. Day & Night Fuel Co., 192 Wash. 362, 73 P.2d 788 (1937). What if

defendant discovered that the light was out, but continued to drive carefully to a near-by filling station? Taber v. Smith, 26 S.W.2d 722 (Tex.Civ.App.1930).

B. A statute prohibits automobile drivers from passing at an intersection. Defendant approaches an intersection concealed from view and not marked by any warning sign, of whose existence he is ignorant, and as he reaches it attempts to pass. Hollander v. McIntyre, 78 S.D. 453, 104 N.W.2d 40 (1960).

C. A child, too young to know or appreciate the statute, crosses a street in the middle of the block. Most jurisdictions apply the minor's standard--child of like age, intelligence, and experience--in negligence per se cases. Suppose an adult does not know of the jaywalking statute? Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 15, comment a (2010) (not an excuse that adult was unaware of the statutory requirement).

D. Defendant truck driver drives on the left side of the road in order to pass under a bridge that is not high enough for his truck on the right side

and runs head on into motorcycle. Brown v. Roadway Express, Inc., 169 Vt. 633, 740 A.2d 352 (1999) (no excuse; finding of negligence as a matter of law upheld). Defendant drives on the left side of the road to avoid hitting a child who has darted out from the right. Burlie v. Stephens, 113 Wash. 182, 193 P. 684 (1920) (excuse). Would it be negligence not to violate the statute? Perhaps. But see Monreal v. Tobin, 61 Cal.App.4th 1337, 72 Cal.Rptr.2d 168 (1998) (driver who was traveling at posted speed limit did not owe a duty to speed up or

move to a slower lane when approached from rear by vehicle traveling 25 m.p.h. in excess of posted speed limit even though there was testimony that "normal" speed on that stretch of interstate was at least 10 m.p.h. in excess of speed limit). See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 16(b) (2010).

4. Certain types of statutes are commonly interpreted to make the defendant liable without regard to any excuse for the violation. When liability without fault is imposed because no excuse is permitted, it often is held that the legislative purpose cannot be given full effect unless the defenses of contributory negligence and assumption of risk are made unavailable against the plaintiff. Some examples of these statutes are

A. Child labor acts, providing under criminal penalty that no minor under a minimum age shall be employed in certain occupations, as in Krutlies v. Bulls Head Coal Co., 249 Pa. 162, 94 A. 459 (1915); Blanton v. Kellioka Coal Co., 192 Ky. 220, 232 S.W. 614 (1921).

B. Pure Food Acts that prohibit the commercial sale of adulterated food. Doherty v. S.S. Kresge Co., 227 Wis. 661, 278 N.W. 437 (1938); Bolitho v. Safeway Stores, 109 Mont. 213, 95 P.2d 443 (1939).

C. The Federal Safety Appliance Act, requiring that railway cars used in interstate commerce be equipped with automatic couplers and other safety devices, in good operating condition. O'Donnell v. Elgin, J. & E. R. Co., 338 U.S. 384 (1949). Accord, St. Louis S.W. R. Co. v. Williams, 397 F.2d 147 (5th Cir.1968) (Boiler Inspection Act).

D. "Safe place" statutes, requiring lights and other protection in tenement houses, or premises open to the public. Monsour v. Excelsior Tobacco Co., 115 S.W.2d 219 (Mo.App.1938); Smulczeski v. City Center of Music and Drama, 3 N.Y.2d 498, 169 N.Y.S.2d 1, 146 N.E.2d 769 (1957).

E. Statutes prohibiting the sale of firearms and other dangerous objects to minors.

5. Reasonable Care Per Se? Suppose defendant shows that he complied with all applicable statutes and administrative regulations. Should his conduct be deemed "reasonable care per se"? See Soproni v. Polygon Apartment Partners, 137 Wash.2d 319, 971 P.2d 500 (1999) (compliance with legislative or administrative regulatory standards is merely relevant evidence that may be considered by the trier of fact--building code) and Wilson v. Piper Aircraft Corp., 282 Or. 61, 577 P.2d 1322 (1978) (accord--FAA safety standards). Thus, at common law, compliance with a statute is never determinative of negligence, it is only evidence of due care. Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 16(a) (2010).

6. Some states have modified the common law in particular types of cases by statute. Indiana, for example, in products liability cases provides that compliance with "applicable codes, standards, regulations, or specifications established, adopted, promulgated, or approved by the United States or by Indiana, or by an agency of the United States or Indiana" establishes a rebuttable presumption that the manufacturer or seller was not negligent. Indiana Code § 34-20-5--1 is discussed in Schultz v. Ford Motor Co., 857 N.E.2d 977 (Ind.

2006) (finding it proper to inform jury of statutory presumption). Wisconsin provides a rebuttable presumption that the product is not defective if it complied in material respects with relevant standards, conditions, or specifications adopted or approved by a federal or state law or agency. Wise. Stat. Ann. § 895.047(3)(b). Michigan has limited the liability of drug manufacturers and sellers if the drug was approved for safety and efficacy by the FDA and labeled in compliance with FDA standards. Mich. Comp. Laws § 600.2946(5). New Jersey provides that warnings approved by the FDA enjoy a rebuttable presumption of adequacy. N.J. Stat. Ann. 2A:58C--4. In re Accutane Litigation, 235 N.J. 229, 194 A.3d 503 (2018) (applying New Jersey statutory presumption to 532 claims from 45 jurisdictions because New Jersey had most significant relationship to the occurrence and the parties and its law therefore applied).

7. Note that most of these are products liability claims and some apply only to products regulated by the FDA. Should the policy depend on how completely the product or activity is regulated by government? See preemption discussion, Chapter 15, Products Liability, and Chapter 23, Torts in the Age of Statutes. For an example of a negligence claim that was preempted by federal law, see plaintiff's complaint that incorrect delivery of package containing marijuana to her address caused her emotional distress. Defendant argued that the federal Airline Deregulation Act (ADA) preempted a recipient's common-law intentional infliction of emotional distress, negligent infliction of emotional distress, and general negligence claims against package delivery companies. The recipient's claims all depended on the company's mislabeling and misdelivery of the package, which were necessary appurtenances of the company's

contract of carriage with an air carrier, and a judgment against the company would supplant market forces and create a patchwork of state-based regulations, contrary to Congressional intent. Tobin v. Federal Express Corp., 775 F.3d 448 (1st Cir. 2014).

7. Proof of Negligence

(A) Court and Jury: Circumstantial Evidence

Goddard v. Boston & Maine R.R. Co.

Supreme Judicial Court of Massachusetts, 1901.

179 Mass. 52, 60 N.E. 486.

Action by Wilfred H. Goddard against the Boston & Maine Railroad Company for personal injuries received by falling upon a banana skin

261

lying upon the platform at defendant's station at Boston. The evidence showed that [plaintiff] was a passenger who had just arrived, and was about the length of the car from where he alighted when he slipped and fell. There was evidence that there were many passengers on the platform. Verdict directed for defendant, and plaintiff excepts.

HOLMES, C.J. The banana skin upon which the plaintiff stepped and which caused him to slip may have been dropped within a minute by one of the persons who was leaving the train. It is unnecessary to go further to decide the case.

Exceptions overruled.

Anjou v. Boston Elevated Railway Co.

Supreme Judicial Court of Massachusetts, 1911.

208 Mass. 273, 94 N.E. 386.

Action by Helen G. Anjou against the Boston Elevated Railway Company. Verdict was directed for defendant, and the case reported.

RUGG, J. The plaintiff arrived on one of defendant's cars on the upper level of the Dudley Street terminal; other passengers arrived on the same car, but it does not appear how many. She waited until the crowd had left the platform, when she inquired of one of defendant's uniformed employés the direction to another car. He walked along a narrow platform, and she, following a few feet behind him toward the stairway he had indicated, was injured by slipping upon a banana peel. It was described by several who examined it in these terms: It "felt dry, gritty, as if there were dirt upon it," as if "trampled over a good deal," as "flattened down, and black in color," "every bit of it was black, there wasn't a particle of yellow," and as "black, flattened out and gritty." It was one of the duties of employés of the defendant, of whom there was one at this station all the time, to observe and remove whatever was upon the platform to interfere with the safety of travelers. These might have been found to be the facts.

The inference might have been drawn from the appearance and condition of the banana peel that it had been upon the platform a considerable period of time, in such position that it would have been seen and removed by the employés of the defendant if they had

been reasonably careful in performing their duty. Therefore there is something on which to base a conclusion that it was not dropped a moment before by a passenger, and Goddard v. Boston & Maine R.R., 179 Mass. 52, 60 N.E. 486 is plainly distinguishable. The obligation rested upon the defendant to keep its station reasonably safe for its passengers. It might have been found that the platform was suffered to remain in such condition as to be a menace to those rightfully walking upon it. Hence there was evidence of negligence on the part of the defendant, which should have been submitted to the jury. [Cc]

In accordance with the terms of the report, let the entry be:

262

Judgment for the plaintiff for $1,250 with costs.

[Ordinarily, this case would have been reversed for a new trial. For some reason (perhaps to avoid expense of a new trial), defense counsel apparently agreed to an entry of judgment against his client if he lost on appeal.]

Joye v. Great Atlantic and Pacific Tea Co.

United States Court of Appeals, Fourth Circuit, 1968.

405 F.2d 464.

CRAVEN, Circuit JUDGE: Willard Joye slipped and fell on a banana in defendant's A & P supermarket. In his diversity suit in the district court the jury returned a verdict for him in the amount of $10,000 and defendant appeals. We reverse because we are unable to find in the

record sufficient evidence to present a jury issue as to constructive notice to defendant of a dangerous condition. Without such notice, in the context of the case, and under South Carolina law which we must apply, the district court should have granted defendant's Rule 50(b) motion for judgment n.o.v. ***

There was no evidence that the A & P (1) put the banana on the floor or (2) had actual notice of its presence. Thus plaintiffs case turns on the sufficiency of the evidence to establish constructive notice. [C]

Plaintiff offered no direct evidence below as to how long the banana had been on the floor before the accident. The circumstantial evidence taken most favorably to the plaintiff shows that the floor may not have been swept for as long as 35 minutes. No one saw the banana until after Joye fell on it. It was then described as dark brown in color, having dirt and sand on it. There was dirt on the floor near the banana, and the banana was sticky around the edges. From this evidence we think the jury could not tell whether the banana had been on defendant's floor for 30 seconds or 3 days. ***

Because it cannot be determined from the evidence how long (even the broadest range of approximation) the banana may have been on the floor, we reverse the judgment of the district court and remand to that court with instructions to enter judgment in favor of the defendant, The Great Atlantic & Pacific Tea Company.

Reversed.

Ortega v. Kmart Corp.

Supreme Court of California, 2001.

114 Cal.Rptr.2d 470, 26 Cal.4th 1200, 36 P.3d 11.

Chin, J. ***

Richard M. Ortega (plaintiff) was shopping at the Torrance Kmart store (Kmart) when he slipped on a puddle of milk on the floor adjacent

263

to the refrigerator and suffered significant injuries to his knee, including ligament tears. Less than a year later, plaintiff sued Kmart for personal injuries. At trial, plaintiff testified he did not notice whether the puddled milk was fresh or odorous, warm or cold. He could not present evidence showing how long the milk had been on the floor. Nonetheless, plaintiff claimed that because the evidence showed Kmart had not inspected the premises in a reasonable period of time prior to the accident, a jury could infer the puddle was on the floor long enough for Kmart employees to have discovered and remedied it. ***

Kmart's former store manager testified that although the store keeps no written inspection records, all Kmart employees are trained to look for and clean up any spills or other hazards. He also stated that several employees work in the pantry aisles next to the milk refrigerator, and that every 15 to 30 minutes an employee usually walked the aisle where plaintiff slipped. When asked whether the milk could have been on the floor for five minutes or two hours, the manager testified that in light of the staffing, it would be "hard for something [to] be on the floor for more than 15 or 30 minutes." He did admit, however, that the milk could have been on the floor for as long as two hours. On the day of the accident, the manager testified that management would not have had any idea if the aisle where the

accident occurred was inspected at any time during that day. Kmart claimed that plaintiff failed to carry his burden of showing the milk puddle existed for a sufficient time to establish constructive notice to the store. [C]

The jury returned a verdict in plaintiff's favor, and awarded him $47,200 in damages. [The trial court judge denied Kmart's motion for a new trial or a j.n.o.v. and entered judgment on the verdict.] Kmart appealed [and the Court of Appeals affirmed the judgment against Kmart. The California Supreme Court granted review.] ***

It is well established in California that although a store owner is not an insurer of the safety of its patrons, the owner does owe them a duty to exercise reasonable care in keeping the premises reasonably safe. ***

A store owner exercises ordinary care by making reasonable inspections of the portions of the premises open to customers, and the care required is commensurate with the risks involved. [C] If the owner operates a self-service grocery store, where customers are invited to inspect, remove, and replace goods on shelves, "the exercise of ordinary care may require the owner to take greater precautions and make more frequent inspections than would otherwise be needed to safeguard against the possibility that such a customer may create a dangerous condition by disarranging the merchandise" and creating potentially hazardous conditions. ***

Courts have also held that where the plaintiff relies on the failure to correct a dangerous condition to prove the owner's negligence, the plaintiff has the burden of showing that the owner had notice of the

defect in sufficient time to correct it. [C] The courts' reasoning is that if the

264

burden of proving lack of notice were placed on the owner in a slip-and- fall case, where the source of the dangerous condition or the length of time it existed cannot be shown, failure to meet the burden would require a finding of liability, effectively rendering the owner an insurer of the safety of those who enter the premises. [C] Several courts believe that shifting the burden to the defendant would, contrary to existing negligence law, permit an inference of negligence to be drawn against the owner based solely on the fact that the fall or accident occurred. [Cc]

The plaintiff need not show actual knowledge where evidence suggests that the dangerous condition was present for a sufficient period of time to charge the owner with constructive knowledge of its existence. Knowledge may be shown by circumstantial evidence "which is nothing more than one or more inferences which may be said to arise reasonably from a series of proven facts." [C] Whether a dangerous condition has existed long enough for a reasonably prudent person to have discovered it is a question of fact for the jury, and the cases do not impose exact time limitations. Each accident must be viewed in light of its own unique circumstances. [C] The owner must inspect the premises or take other proper action to ascertain their condition, and if, by the exercise of reasonable care, the owner would have discovered the condition, he is liable for failing to correct it. [C] In this case, we consider how a plaintiff may establish a defendant's constructive knowledge. ***

We conclude that plaintiffs still have the burden of producing evidence that the dangerous condition existed for at least a sufficient time to support a finding that the defendant had constructive notice of the hazardous condition. [C] We also conclude, however, that plaintiffs may demonstrate the storekeeper had constructive notice of the dangerous condition if they can show that the site had not been inspected within a reasonable period of time so that a person exercising due care would have discovered and corrected the hazard. [C] In other words, if the plaintiffs can show an inspection was not made within a particular period of time prior to an accident, they may raise an inference the condition did exist long enough for the owner to have discovered it. [C] It remains a question of fact for the jury whether, under all the circumstances, the defective condition existed long enough so that it would have been discovered and remedied by an owner in the exercise of reasonable care.

For the above reasons, we affirm the Court of Appeal's judgment. [Justice Kennard's concurring opinion is omitted.]

Jasko v. F.W. Woolworth Co.

Supreme Court of Colorado, 1972.

177 Colo. 418, 494 P.2d 839.

[Plaintiff was injured when she slipped on a piece of pizza that was on the terrazzo floor near the "pizza-hoagie counter" in defendant's store.

265

Trial court judge directed a verdict for defendant and intermediate appeals court affirmed.]

GROVES, Justice. ***We address ourselves solely to the necessity of notice of the specific condition, which under the facts of this case is of first impression in this court. ***

In her attempt to meet the requirement of notice, plaintiff did not claim or show that the alleged pizza was placed or dropped on the floor directly by the defendant or its employees, or that defendant knew of its presence. [0] Rather, it was her contention that defendant's method of selling pizza was one which leads inescapably to such mishaps as her own, and that in such a situation conventional notice requirements need not be met. We agree.

The dangerous condition was created by the store's method of sale. The steps taken to constantly clean the floor show that the store owner recognized the danger.

The practice of extensive selling of slices of pizza on waxed paper to customers who consume it while standing creates the reasonable probability that food will drop to the floor. Food on a terrazzo floor will create a dangerous condition. In such a situation, notice to the proprietor of the specific item on the floor need not be shown.

The basic notice requirement springs from the thought that a dangerous condition, when it occurs, is somewhat out of the ordinary. ***In such a situation the storekeeper is allowed a reasonable time, under the circumstances, to discover and correct the condition, unless it is the direct result of his (or his employees') acts. However, when the operating methods of a proprietor are such that dangerous conditions are continuous or easily foreseeable, the logical basis for the notice requirement dissolves. Then, actual or constructive notice of the specific condition need not be proved. ***

The ruling of the Court of Appeals is reversed and the cause remanded to it for further remand to the trial court and new trial.

H.E. Butt Groc. Co. v. Resendez

Supreme Court of Texas, 1999.

988 S.W.2d 218.

Per Curiam.

Can mere display of produce for customer sampling constitute an unreasonable risk of harm to customers? The court of appeals said yes. [Footnotes omitted throughout.] We say no. We reverse the court of appeals' judgment and render judgment that plaintiff take nothing.

While shopping at an H.E. Butt Grocery Company store, Maria Resendez slipped and fell near two grape displays. She sued HEB for negligence, alleging that the customer sampling display posed an unreasonable risk of harm that caused her injuries. The trial court

266

rendered judgment on a jury verdict for Resendez. The court of appeals affirmed.

From the undisputed evidence, we know that HEB had two grape displays in its produce section. One display table contained grapes bagged in cellophane and sitting in boxes. The other display table contained a bowl of loose grapes for customer sampling. The customer sampling bowl was level, sitting on ice and recessed about five inches below the table's surface. Each display table had a three-inch railing around its edges. The floor of the entire produce section

was a non-skid surface and floor mats were in place around the display tables. There were also warning cones near the grape displays.

The court of appeals concluded that HEB's grape display, allowing for customer sampling, was some evidence of an unreasonable risk of harm to store customers. As a matter of law, though, the mere fact that a store has a customer sampling display cannot, without more, be evidence of a condition on the premises that poses an unreasonable risk of harm.

For Resendez to recover from HEB, she had the burden to prove that (1) HEB had actual or constructive knowledge of a condition on the premises, (2) the condition posed an unreasonable risk of harm, (3) HEB did not exercise reasonable care to reduce or to eliminate the risk, and (4) HEB's failure to use such care proximately caused her injuries.

Resendez, like the plaintiff in Corbin [v. Safeway Stores, Inc., 648 S.W.2d 292 (Tex. 1983)], claims that HEB's customer sampling display resulted in an unreasonable risk of harm. However, Resendez presented no evidence that the display created an unreasonable risk of customers falling on grapes. In Corbin, there was more evidence than the mere existence of a display. It was the manner in which Safeway displayed the grapes--in a slanted bin over a linoleum tile floor with no protective floor mat--that created an unreasonable risk of customer falls from grapes falling on the floor. Here, there is no evidence that the manner of display created an unreasonable risk.

Accordingly, we grant HEB's petition for review, and without hearing oral argument, reverse the court of appeals' judgment and render judgment that Resendez take nothing.

NOTES AND QUESTIONS

1. Can these cases be reconciled?

2. Why not require the defendant to prove that it was not negligent--that is, that it was not responsible for the substance plaintiff slipped on? Plaintiff has no information as to what defendant's employees have or have not done; defendant knows, or can perhaps find out. Some courts have done so. Compare Lanier v. Wal-Mart Stores, Inc., 99 S.W.3d 431 (Ky. 2003) (if plaintiff shows that there was foreign substance on floor and that substance caused fall, burden shifts to defendant to show that employees neither

caused substance to be on floor nor had sufficient time to have discovered and removed it) with Wintersteen v. Food Lion, Inc., 344 S.C. 32, 542 S.E.2d 728 (2001) and Rallis v. Demoulas Super Markets, Inc., 159 N.H. 95, 977 A.2d 527 (N.H. 2009) (both declining to depart from the traditional burden of proof allocation). Who should make the decision about the burden of proof allocation--the court or the legislature? See Owens v. Publix Supermarkets, Inc., 802 So.2d 315 (Fla. 2001) (more black bananas) (shifting burden of proof to defendant) and Fla. Stat. 768.0755 (modifying burden of proof allocation of Owens).

3. To what extent is plaintiffs disadvantage remedied by modern discovery procedure that provides both parties access to relevant

information, including that within the possession of the other party?

4. Plaintiff has three separate burdens of proof on the issue of negligence--the burden of pleading, the burden of coming forward with enough evidence to avoid summary judgment or a directed verdict against him and, if he hurdles that, the burden of persuading the trier of fact to find in his favor. In most situations, plaintiff discharges the first burden by alleging sufficient facts in his complaint and the second by convincing the judge that reasonable jurors could find on a more-probable-than-not basis that plaintiffs contention is correct. Plaintiff must then persuade the jury that the preponderance of the evidence is in his favor. Generally speaking, determination of reasonable care, either the defendant's or the plaintiffs, is not susceptible to summary adjudication and must be resolved by the jury. Only rarely is it appropriate for the judge to grant summary judgment or direct a verdict in favor of one party or the other on the issue of negligence. See, e.g., Bell v. Leatherwood, 206 Ga.App. 550, 425 S.E.2d 679 (1992) (reasonable care should be question for jury except in plain, palpable, and indisputable cases where reasonable minds could not disagree).

5. Think about how you would prove negligence in some of the other cases you have read. Suppose an employee leaves a company-sponsored banquet at which alcohol was served and then rear ends another car at a stoplight. Plaintiff files suit against the employee and the employer, alleging that the employer served the employee when she was obviously intoxicated. Against the employee you could probably use eyewitness testimony to establish the fact that she had rear ended the plaintiff's car and a rule of law or negligence per se or the reasonable person standard to establish that such conduct was

negligent. What about the case against the employer? Perhaps you could find an eyewitness to say employee was obviously intoxicated at the banquet. What if the police officer called to the scene of the accident would testify that she was obviously intoxicated when he arrived at the accident site? Is that enough? Of. Fairbanks v. J.B. McLoughlin Co., Inc., 131 Wash.2d 96, 929 P.2d 433 (1997) (" [Employer] relies on the [testimony] from those attending the banquet which uniformly state that [employee] did not appear intoxicated. Nonetheless, [employee] appeared obviously intoxicated to both [plaintiff] Fairbanks and to Officer Asheim. Officer Asheim in particular noted that she smelled of alcohol, slurred her speech, stumbled as she got out of the car, and staggered when she walked. A police officer's subjective observation that the employee was obviously intoxicated shortly

after leaving the banquet may raise an inference that she was obviously intoxicated when the employer served her, provided that the employee did not consume any alcohol after leaving the banquet and provided that no time remains unaccounted for between the banquet and the subsequent observation. [C] Because a reasonable jury could find based on [employee]'s own testimony that she left the banquet at 10:30 p.m. and was involved in the accident just 20 minutes later, Fairbanks' and Officer Asheim's observations were sufficient to raise a factual issue as to whether she was obviously intoxicated at the banquet.")

6. What if the product that plaintiff claims was negligently designed or manufactured disappears after the accident? How does plaintiff

prove that it was made by defendant? Plaintiff was injured by a multipiece truck rim that was reassembled after the accident and then either used on another truck or placed against the wall with others. No one could identify it by the time the suit was filed and at least six different companies manufacture three-piece rims. Healey v. Firestone Tire & Rubber Co., 640 N.Y.S.2d 860, 87 N.Y.2d 596, 663 N.E.2d 901 (1996) (identity of manufacturer may be established by circumstantial evidence if product itself is destroyed after use, but there was insufficient circumstantial evidence available in this case to do so).

7. What if there is enough circumstantial evidence to identify the part and its manufacturer, but the part itself has disappeared and the manufacturer argues that it cannot defend itself without being able to examine the part to ascertain whether it failed, why it failed, or if its failure caused the plaintiffs injuries? Bachmeier v. Wallwork Truck Ctrs., 544 N.W.2d 122 (N.D.1996) (summary judgment for manufacturer upheld where plaintiff had failed to preserve truck hub that allegedly failed due to a faulty design where manufacturer argued that failure might have been due to negligent maintenance). What if one of the parties actually destroys the evidence? Vodusek v. Bayliner Marine Corp., 71 F.3d 148 (4th Cir.1995) (expert retained by plaintiff destroyed boat while conducting his accident investigation; trial court judge acted within his discretion to instruct jury that it could draw negative inference from loss of evidence for which party--through its agent--was responsible). See also note 2, page 1167, Spoliation of Evidence.

8. Problems involved in proving facts in tort cases, as any trial lawyer will affirm, are often more challenging than developing the relevant

rules of law. Courses in evidence, trial practice, and clinics will further develop these skills.

(B) Res Ipsa Loquitur

Byrne v. Boadle

Court of Exchequer, 1863.

2 H. & C. 722, 159 Eng.Rep. 299.

[Action for negligence. The plaintiffs evidence was that he was walking in a public street past the defendant's shop, and that a barrel of

269

flour fell upon him from a window above the shop, knocked him down, and seriously injured him. There was no other evidence. The Assessor was of the opinion that there was no evidence of negligence for the jury, and nonsuited the plaintiff, reserving leave to him to move the Court of Exchequer to enter the verdict for him for £50 damages. Plaintiff obtained a rule nisi.]

Charles Russell [attorney for defendant] now shewed cause. First, there was no evidence to connect the defendant or his servants with the occurrence. ***It is consistent with the evidence that the purchaser of the flour was superintending the lowering of it by his servant, or it may be that a stranger was engaged to do it without the knowledge or authority of the defendant. [Pollock, C.B. The presumption is that the defendant's servants were engaged in removing the defendant's flour; if they were not it was competent to the defendant to prove it.]

Secondly, assuming the facts to be brought home to the defendant or his servants, these facts do not disclose any evidence for the jury of negligence. The plaintiff was bound to give affirmative proof of negligence. But there was not a scintilla of evidence, unless the occurrence is of itself evidence of negligence. There was not even evidence that the barrel was being lowered by a jigger-hoist as alleged in the declaration. [Pollock, C.B. There are certain cases of which it may be said res ipsa loquitur, and this seems one of them. In some cases the Courts have held that the mere fact of the accident having occurred is evidence of negligence, as, for instance, in the case of railway collisions.] POLLOCK, C.B. We are all of opinion that the rule must be absolute to enter the verdict for the plaintiff. The learned counsel was quite right in saying that there are many accidents from which no presumption of negligence can arise, but I think it would be wrong to lay down as a rule that in no case can a presumption of negligence arise from the fact of an accident. Suppose in this case the barrel had rolled out of the warehouse and fallen on the plaintiff, how could he possibly ascertain from what cause it occurred? It is the duty of persons who keep barrels in a warehouse to take care that they do not roll out, and I think that such a case would, beyond all doubt, afford prima facie evidence of negligence. A barrel could not roll out of a warehouse without some negligence, and to say that a plaintiff who is injured by it must call witnesses from the warehouse to prove negligence seems to me preposterous. ***The present case upon the evidence comes to this, a man is passing in front of the premises of a dealer in flour, and there falls down upon him a barrel of flour. I think it apparent that the barrel was in the custody of the defendant who occupied the

premises, and who is responsible for the acts of his servants who had the control of it; and in my opinion the fact of its falling is prima facie evidence of negligence, and the plaintiff who was injured by it is not bound to show that it could not fall without negligence, but if there are any facts inconsistent with negligence it is for the defendant to prove them.

270

[The concurring opinions of BRAMWELL, B., CHANNELL, B., and PIGOTT, B., are omitted.]

NOTES AND QUESTIONS

1. What kind of evidence of defendant's negligence has plaintiff offered? How persuasive is it? What about the possibility that some trespasser entered the premises and rolled the barrel out of the window? Suppose the defendant in the principal case was merely a deliverer of flour and not the owner of the shop? Cf. Hake v. George Wiedemann Brewing Co., 23 Ohio St.2d 65, 52 Ohio Op.2d 366, 262 N.E.2d 703 (1970).

2. Res Ipsa Loquitur. "The thing speaks for itself." This is an old phrase, found in Cicero and other ancient writers; and it has been used from time to time in other connections in the law. Chief Baron Pollock was an English gentleman, with a classical education, as was counsel to whom he spoke. Just what did he mean by it? This question has been put in Latin: Res ipsa loquitur, sed quid in infernos dicet?

3. There has been considerable denunciation of the use of the phrase in negligence cases. See, for example, Bond, C.J., dissenting

in Potomac Edison Co. v. Johnson, 160 Md. 33, 152 A. 633 (1930): "It adds nothing to the law, has no meaning which is not more clearly expressed for us in English, and brings confusion to our legal discussions. It does not represent a doctrine, is not a legal maxim, and is not a rule." Also Lord Shaw, in Ballard v. North British R. Co., [1923] Sess.Cas.H.L. 43, 56: "If that phrase had not been in Latin, nobody would have called it a principle." South Carolina does not recognize the doctrine, although most other jurisdictions do. Watson v. Ford Motor Co., 389 S.C. 434, 699 S.E.2d 169 (2010).

4. The first attempt to state the rule of Byrne v. Boadle was that of Chief Justice Erle in Scott v. London & St. Katherine Docks Co., 3 H. & C. 596, 159 Eng.Rep. 665 (1865): "There must be reasonable evidence of negligence; but where the thing is shown to be under the management of the defendant or his servants, and the accident is such as in the ordinary course of things does not happen if those who have the management use proper care, it affords reasonable evidence, in the absence of explanation by the defendants, that the accident arose from want of care." These remain the two core requirements of the doctrine, although you will sometimes see a third requirement listed in opinions.

5. Some jurisdictions added a requirement that the event not have been brought about by the actions of the plaintiff. Usually, however, the conduct of the plaintiff is considered when evaluating causation and comparative negligence, which will be discussed later in Chapter 5, Causation, and Chapter 12, Defenses. See, for example, Giles v. New Haven, 228 Conn. 441, 455, 636 A.2d 1335, 1341 (1994) (res ipsa loquitur applies even if plaintiffs conduct may also have contributed to her injuries; jury to apply comparative negligence

principles to account for plaintiff's conduct) and McGuire v. Davidson Manufacturing Corp., 398 F.3d 1005 (8th Cir. 2005) (applying Iowa law) (finding that Iowa would join the majority of states that have eliminated the requirement that plaintiff show his own conduct

271

did not contribute to accident and instead consider plaintiffs conduct as part of comparative negligence). This principle applies unless the plaintiff's conduct is an alternative (as opposed to contributing) cause of the accident. Plaintiff hotel guest is seriously injured by extremely hot water from the bathtub faucet. Court agreed that did not ordinarily happen in the absence of negligence, but found hotel was not in exclusive control because guest controlled the mix of hot and cold water. Carroll v. Faust, 311 III.App. 3d 679, 725 N.E.2d 764 (2000).

6. Defendant's Superior Knowledge. It has sometimes been said that the basis of res ipsa loquitur is the defendant's superior knowledge, or ability to obtain evidence, as to just what has occurred; or in other words, that the purpose of the rule is to "smoke out" evidence that the defendant has or can get, and the plaintiff cannot. This policy underpinning is stated as a third requirement in some jurisdictions. See Reese v. Memorial Hospital, 955 P.2d 425, 427 (Wyo.1998) ("If the circumstances do not show or suggest that defendant should have superior knowledge, or if the plaintiff himself possesses equal or superior means of explaining the occurrence, the rule may not properly be invoked."); Sides v. St. Anthony's Medical Ctr., 258 S.W.3d 811 (Mo. 2008) (reiterating that the third requirement of res ipsa loquitur is "the defendant possesses superior knowledge or

means of information as to the cause of the occurrence"); and DeBusscher v. Sam's East, Inc., 505 F.3d 475, 481 (6th Cir. 2007) (applying Michigan law) (reciting requirement under Michigan law that "evidence of true explanation of event must be more readily accessible to the defendant than to the plaintiff' and applying to facts of case where portable basketball goal fell on shopper).

Most jurisdictions hold that res ipsa loquitur applies even though the defendant's knowledge is not superior to that of the plaintiff. See, for example, Johnson v. Foster, 202 So.2d 520 (Miss. 1967) (car unaccountably leaves highway and overturns; both parties dead); Nicol v. Geitler, 188 Minn. 69, 247 N.W. 8 (1933) (similar; guest passenger dead, driver disappeared); Burkett v. Johnston, 39 Tenn.App. 276, 282 S.W.2d 647 (1955) (similar; both dead); Haasman v. Pacific Alaska Air Express, 100 F.Supp. 1 (D.Alaska 1951), aff'd, 198 F.2d 550 (9th Cir.1952) (lost plane); and Judson v. Giant Powder Co., 107 Cal. 549, 40 P. 1020 (1895) (nitroglycerin factory blew up; the "witnesses who saw and knew, like all things else around, save the earth itself, were scattered to the four winds").

RESTATEMENT (SECOND) OF TORTS (1965)

§ 328D. Res Ipsa Loquitur (comments c and d):

c. Type of event. The first requirement for the application of the rule stated in this Section is a basis of past experience which reasonably permits the conclusion that such events do not ordinarily occur unless someone has been negligent. There are many types of accidents which commonly occur without the fault of anyone. The

fact that a tire blows out, or that a man falls down stairs is not, in the absence of anything more, enough to permit the conclusion that

272

there was negligence in inspecting the tire, or in the construction of the stairs, because it is common human experience that such events all too frequently occur without such negligence. On the other hand there are many events, such as those of objects falling from the defendant's premises, the fall of an elevator, the escape of gas or water from mains or of electricity from wires or appliances, the derailment of trains or the explosion of boilers, where the conclusion is at least permissible that such things do not usually happen unless someone has been negligent. To such events res ipsa loquitur may apply-

d. Basis of conclusion. In the usual case the basis of past experience from which this conclusion may be drawn is common to the community, and is a matter of general knowledge, which the court recognizes on much the same basis as when it takes judicial notice of facts which everyone knows. It may, however, be supplied by the evidence of the parties; and expert testimony that such an event usually does not occur without negligence may afford a sufficient basis for the inference. Such testimony may be essential to the plaintiff's case where, as for example in some actions for medical malpractice, there is no fund of common knowledge which may permit laymen reasonably to draw the conclusion. On the other hand there are other kinds of medical malpractice, as where a sponge is left in the plaintiffs abdomen after an operation, where no expert is

needed to tell the jury that such events do not usually occur in the absence of negligence.

NOTES AND QUESTIONS

1. How persuasive is the inference of negligence in the following cases? Should the plaintiff be permitted to use res ipsa loquitur to get to the jury?

A. When automatic doors close on a person, the owner is at fault. Compare the majority and dissenting opinions in Kmart Corp. v. Bassett, 769 So.2d 282 (Ala. 2000) (no res ipsa loquitur instruction because no evidence that such a malfunction does not ordinarily happen in the absence of negligence; claiming that majority of jurisdictions would allow a res ipsa instruction when automatic door malfunctions). See also McDaid v. Aztec West Condominium Assn., 234 N.J. 130, 189 A.3d 321 (2018) (recognizing passenger's entitlement to use res ipsa loquitur to avoid summary judgment where elevator doors closed on her as analogous to previous cases allowing res ipsa loquitur in cases involving automatic doors closing on customers).

B. When a human body falls upon a work of art, the person who fell was negligent. See Krebs v. Corrigan, 321 A.2d 558 (D.C.App.1974) (yes).

C. When a heavy tool or piece of equipment falls off a shelf at a store and injures a shopper, a store employee was negligent. Hagler v. Coastal Farm Holdings, Inc., 354 Or. 132, 309 P.3d 1073 (2013) (no) and Steilen v. Cabela's Wholesale, 906 N.W.2d 913, 916 (S.D. 2018) (no). When a customer

slips and falls, the owner of the premises was negligent. Jackson HMA, LLC v. Harris, 242 So.3d 1 (Miss. 2018) ("well settled rule" that the doctrine of res ipsa loquitur is inapplicable to slip-and-fall cases).

D. When a spare tire from truck on road in front of plaintiff comes flying through plaintiff's windshield, the driver of the truck was at fault. McDougald v. Perry, 716 So.2d 783 (Fla. 1998) (yes) (opinion notes that "wayward wheel cases" are common applications of res ipsa loquitur).

E. When a fertilizer plant explodes, the person in control of the plant was negligent. Collins v. N-Ren Corp., 604 F.2d 659 (10th Cir.1979) (applying Oklahoma law) (yes).

F. When an escalator comes to a sudden stop, the company responsible for its manufacture and maintenance is at fault. Compare the majority and dissenting opinions in Barretta v. Otis Elevator Co., 242 Conn. 169, 698 A.2d 810 (1997) (no res ipsa loquitur instruction because no evidence such a malfunction ordinarily does not happen in the absence of negligence; such evidence not necessary because ordinary, common experience is enough to suggest it).

G. When cattle escape onto the highway, the rancher is at fault. Roberts v. Weber & Sons, 248 Neb. 243, 533 N.W.2d 664 (1995) (agreeing with courts that have found res ipsa loquitur instruction appropriate, but noting an even split among jurisdictions that have faced the issue).

H. When an experienced skier falls on his first run down the mountain, the equipment was negligently maintained. Mrotek v. Coal River Canoe Livery, Ltd., 214 W.Va. 490, 590 S.E.2d 683 (2003) (res ipsa loquitur has no application to "falling while skiing--which is an extremely frequent incident that can occur without any negligence.")

I. When a plane, flying through smooth air, suddenly and without any warning strikes a "bump," and a passenger is thrown from his seat? Cudney v. Midcontinent Airlines, 363 Mo. 922, 254 S.W.2d 662 (1953); Ness v. West Coast Airlines, Inc., 90 Idaho 111, 410 P.2d 965 (1965). Or hot tea is spilled into her lap from a tray? Lazarus v. Eastern Air Lines, 292 F.2d 748 (D.C.Cir.1961). (None permitted application of res ipsa loquitur because such events also can occur in the absence of negligence.)

2. Use of Expert Witness Testimony to Show Does Not Ordinarily Occur Without Negligence. What if the plaintiff needs expert witness testimony to support plaintiff's argument that the accident would not normally have occurred in the absence of negligence because it is not within common knowledge that the event would not ordinarily occur in the absence of negligence? Most of those cases are in the area of professional malpractice. In which of the following cases could the trial court judge find without the help of an expert that what happened does not ordinarily happen in the absence of negligence?

A. Patient continues to experience complications three months after surgery, so a second operation is performed and a laparotomy sponge, left in her during the first surgery, is found and removed. Coleman v. Rice, 706 So.2d 696 (Miss. 1997).

B. Plaintiff is returned to her hospital room after surgery, and left in an unconscious condition for an hour. When she regains consciousness, she has a second-degree burn on her stomach in the exact shape of a hot water bottle. Cf. Timbrell v. Suburban Hosp., 4 Cal.2d 68, 47 P.2d 737 (1935).

C. Dentist operates on wrong side of patient's mouth during surgery to remove impacted wisdom teeth, apparently because x-ray was mislabeled. Pacheco v. Ames, 149 Wash.2d 431, 69 P.3d 324 (2003).

D. After surgery for a tumor of the spinal cord, plaintiff begins to hemorrhage. Defendant surgeon, having failed in other efforts to stop the bleeding, reopens the incision and packs the wound with a cellulosic material and sews it up. Plaintiff wakes up paralyzed below the incision. Brannon v. Wood, 251 Or. 349, 444 P.2d 558 (1968).

E. A few days after abdominal surgery to enhance her chances to become pregnant, plaintiff loses function in her left leg. Connors v. University Assocs., 4 F.3d 123 (2d Cir.1993) (applying Vermont law).

F. Shortly after undergoing a bilateral mastectomy, plaintiff experiences numbness in her right arm, which was subsequently diagnosed as ulnar neuropathy, degenerative nerve damage affecting her right hand. Mireles v. Broderick, 117 N.M. 445, 872 P.2d 863 (1994).

G. Plaintiff has permanent paralysis of her vocal cord after surgery to remove her thyroid. Hightower-Warren v. Silk, 548 Pa. 459, 698 A.2d 52 (1997).

3. The courts found only the first three of the above to be within common experience. Suppose that in all the other cases, the plaintiff has an expert who will testify that the injury is one that does not ordinarily occur in the absence of negligence. Should that expert be permitted to testify? Wouldn't the use of expert witness testimony in a res ipsa loquitur case be contradictory? After all, the "thing" is hardly speaking for itself if an expert is involved. Most, but not all, courts permit the plaintiff to use expert witness testimony to establish that the event does not ordinarily happen in the absence of negligence. See, for example, Mireles v. Broderick, 117 N.M. 445, 448, 872 P.2d 863, 866 (1994) ("the central issue is not whether common knowledge alone is sufficient to establish an inference of negligence. Rather, the issue is whether there is a factual predicate sufficient to support an inference that the injury was caused by the failure of the party in control to exercise due care. The requisite probability of negligence may exist independently of the common knowledge of the jurors. The common-knowledge exception to the expert testimony rule may inform but does not delimit the application of res ipsa loquitur."); States v. Lourdes Hospital, 100 N.Y.2d 208, 792 N.E.2d 151, 762 N.Y.S.2d 1 (2003) (aligning New York with majority of jurisdictions that permit expert witness testimony to supplement jury's understanding of whether an injury ordinarily would occur in absence of negligence, but noting that some jurisdictions permit res ipsa loquitur to be used only when the matter lies within the ken of a layperson); Sides v. St. Anthony's Medical Ctr., 258 S.W.3d 811 (Mo. 2008) (collecting cases from other jurisdictions and noting that "a vast majority" permit expert testimony

to establish requirements for res ipsa loquitur in medical malpractice cases).

275

The requirement of expert witness testimony on the subject whether the accident would have happened in the absence of negligence is common in, but not limited to, malpractice cases. See Fricke, The Use of Expert Evidence in Res Ipsa Loquitur Cases, 5 Vill. L. Rev. 59 (1959). Cf. Newell v. Westinghouse Electric Corp., 36 F.3d 576 (7th Cir.1994) (applying Indiana law) (plaintiff permitted to present expert witness testimony that particular elevator failure would not ordinarily happen in the absence of negligent maintenance).

4. As part of medical malpractice reform legislation (see page 228), a number of states have codified the res ipsa loquitur doctrine, limiting its application to specific types of medical mishaps. See, for example, 18 Del. Code Ann. § 6853(e) (providing for a rebuttable presumption of negligence without expert medical testimony if injury is caused by foreign bodies unintentionally left in the body following surgery, an explosion or fire originating in a substance used for treatment, or a surgical procedure on the wrong patient or the wrong part of the body) and Nev. Rev. Stat. 41A.100 (providing for a rebuttable presumption without expert medical testimony if injury was caused by a foreign substance other than medication or prosthetic device unintentionally left in body after surgery, an explosion or fire originating in a substance used for treatment, an unintended burn caused by heat, radiation or chemicals, injury to a part of the body not directly involved in treatment, or a procedure performed on wrong patient or wrong body part).

Larson v. St. Francis Hotel

District Court of Appeal of California, 1948.

83 Cal.App.2d 210, 188 P.2d 513.

BRAY, Justice. The accident out of which this action arose was apparently the result of the effervescence and ebullition of San Franciscans in their exuberance of joy on V-J day, August 14, 1945. Plaintiff (who is not included in the above description), while walking on the sidewalk on Post Street adjoining the St. Francis Hotel, just after stepping out from under the marquee, was struck on the head by a heavy, over-stuffed arm chair, knocked unconscious, and received injuries for which she is asking damages from the owners of the hotel. Although there were a number of persons in the immediate vicinity, no one appears to have seen from whence the chair came nor to have seen it before it was within a few feet of plaintiff's head, nor was there any identification of the chair as belonging to the hotel. However, it is a reasonable inference that the chair came from some portion of the hotel. For the purposes of this opinion, we will so assume, in view of the rule on nonsuit cases that every favorable inference fairly deducible from the evidence must be drawn in favor of plaintiff, and that all the evidence must be construed most strongly against the defendants. [C]

At the trial, plaintiff, after proving the foregoing facts and the extent of her injuries, rested, relying upon the doctrine of res ipsa loquitur.

276

On motion of defendant the court granted a nonsuit. The main question to be determined is whether under the circumstances

shown, the doctrine applies. The trial court correctly held that it did not.

In [c], [case] cited by plaintiff, the court sets forth the test for the applicability of the doctrine. " ***for a plaintiff to make out a case entitling him to the benefit of the doctrine, he must prove (1) that there was an accident; (2) that the thing or instrumentality which caused the accident was at the time of and prior thereto under the exclusive control and management of the defendant; (3) that the accident was such that in the ordinary course of events, the defendant using ordinary care, the accident would not have happened. ***The doctrine of res ipsa loquitur applies only where the cause of the injury is shown to be under the exclusive control and management of the defendant and can have no application ***to a case having a divided responsibility where an unexplained accident may have been attributable to one of several causes, for some of which the defendant is not responsible, and when it appears that the injury was caused by one of two causes for one of which defendant is responsible but not for the other, plaintiff must fail, if the evidence does not show that the injury was the result of the former cause, or leaves it as probable that it was caused by one or the other." [Emphasis added by Larson court.]

Applying the rule to the facts of this case, it is obvious that the doctrine does not apply. While, as pointed out by plaintiff, the rule of exclusive control "is not limited to the actual physical control but applies to the right of control of the instrumentality which causes the injury" it is not clear to us how this helps plaintiffs case. A hotel does not have exclusive control, either actual or potential, of its furniture. Guests have, at least, partial control. Moreover, it cannot be said that

with the hotel using ordinary care "the accident was such that in the ordinary course of events ***it would not have happened." On the contrary, the mishap would quite as likely be due to the fault of a guest or other person as to that of defendants. The most logical inference from the circumstances shown is that the chair was thrown by some such person from a window. It thus appears that this occurrence is not such as ordinarily does not happen without the negligence of the party charged, but, rather, one in which the accident ordinarily might happen despite the fact that the defendants used reasonable care and were totally free from negligence. To keep guests and visitors from throwing furniture out windows would require a guard to be placed in every room in the hotel, and no one would contend that there is any rule of law requiring a hotel to do that. ***

The judgment appealed from is affirmed.

NOTES AND QUESTIONS

1. A one-pound tape measure attached to the belt of a construction worker on a 50-story tower slipped off the belt and struck a delivery man who had just stepped out of his van on the street below. Would res ipsa

loquitur apply to a suit brought by the delivery man against the construction company? See Mark Santora, "Falling Tape Measure Kills Man at Jersey City Construction Site," N.Y. Times, Nov. 4, 2014.

2. Some of the older cases required that defendant have "exclusive control" over the instrumentality of harm. Thus, in Kilgore v. Shepard

Co., 52 R.I. 151, 158 A. 720 (1932), plaintiff sat down on a chair in defendant's store, and it collapsed and injured him. Recovery was denied because plaintiff, and not defendant, was in "control" of the chair at the time. Modern cases tend to focus more on the Restatement (Second) § 328(D)(1)(b) language "other responsible causes, including the conduct of the plaintiff and third persons, are sufficiently eliminated by the evidence" rather than strictly on the traditional "exclusive control" language. See the next principal case and Blasius v. Angel Automotive, Inc., 839 F.3d 639, 653 (7th Cir. 2016) (applying Indiana law) (owner drove little more than 200 miles before his newly overhauled truck engine burst into flames, there were no road hazards or inclement weather, and "it cannot reasonably be said that such an event constitutes an ordinary occurrence of automotive self-combustion").

Cruz v. DaimlerChrysler Motors Corp.

Supreme Court of Rhode Island, 2013.

66 A.3d 446.

[Minivan owner was cleaning the inside of his minivan when both front airbags suddenly deployed and injured him. He and his wife filed suit against the minivan's manufacturer and the dealer who had sold the used minivan to him three years before the accident. After manufacturer sought bankruptcy protection, plaintiffs voluntarily dismissed the claims against it and proceeded against the dealer based on negligence and negligent misrepresentation. Plaintiffs then received permission to file an amended complaint adding a count seeking recovery based on the doctrine of res ipsa loquitur, which the court noted is not an independent cause of action, but rather a

doctrine under which a plaintiff may establish a prima facie case of negligence.]

INDEGLIA, J. for the Court.

Airbags are a relatively modern safety feature in passenger vehicles; they are designed to deploy in the event of a collision. When the airbags in a stationary vehicle unexpectedly deploy, as they did in this case, something has gone wrong. The question presented in this appeal is whether the hearing justice correctly concluded that the seller of that vehicle could not be held legally responsible for the resulting harm. ***

Ricky Smith [the car dealership] moved for summary judgment on all counts on October 28, 2010. Regarding plaintiffs' claim for negligence, it argued that plaintiffs "ha[d] produced no evidence to show that the [airbag] incident took place as a result of a defect which [it] knew or should have known of or that even existed in the vehicle when it was sold." It highlighted the lack of expert testimony about why the airbags had deployed--a matter beyond the common knowledge of a layperson.

278

The plaintiffs could not make out a claim for negligence using the doctrine of res ipsa loquitur, it argued, because [defendant] Ricky Smith had no control over the vehicle and plaintiffs had not eliminated other potential causes for the incident. ***

[P]laintiffs argued that the facts presented "a classic case for the application of the doctrine of res ipsa loquitur, which was intended to

eliminate the very evidentiary strictures applicable to proving proximate cause cited by Ricky Smith." ***

The matter came before a justice of the Superior Court on February 1, 2011. On the negligence claim, she found that plaintiffs "ha[d] failed to produce evidence that [Ricky Smith] caused harm to [them]." She noted that plaintiffs had produced no evidence, such as an inspection report or expert testimony, to demonstrate that Ricky Smith was negligent. She also found that plaintiffs could not make out a claim for negligence using the doctrine of res ipsa loquitur [nor had they produced sufficient evidence on the negligent misrepresentation claim], ***Accordingly, the trial justice granted Ricky Smith's motion for summary judgment on all counts. ***

The four elements of negligence are "a legally cognizable duty owed by a defendant to a plaintiff, a breach of that duty, proximate causation between the conduct and the resulting injury, and the actual loss or damage." [C] Because plaintiffs lack direct proof of Ricky Smith's negligence, they have attempted to make out a prima facie negligence claim through the doctrine of res ipsa loquitur. This doctrine "establishes inferential evidence of a defendant's negligence ***and casts upon a defendant the burden of rebutting the same to the satisfaction of the jury." [C] Before addressing whether the hearing justice erred in finding that plaintiffs could not maintain a negligence claim against Ricky Smith based on res ipsa loquitur, we first provide an overview of this doctrine.

In Parrillo v. Giroux Co., 426 A.2d 1313, 1320 (R.I.1981), this Court adopted § 328D of the Restatement (Second) Torts. This approach permits an inference of negligence on a defendant's part when:

"(a) the event is of a kind which ordinarily does not occur in the absence of negligence; (b) other responsible causes, including the conduct of the plaintiff and third persons, are sufficiently eliminated by the evidence; and (c) the indicated negligence is within the scope of the defendant's duty to the plaintiff." Restatement (Second) Torts § 328D(1) at 156 (1965). In adopting this approach, Parrillo expressly disavowed a previous requirement that res ipsa loquitur applied only where the defendant had exclusive control of the instrumentality which harmed the plaintiff. ***

We take this opportunity to reaffirm Parrillo's adoption of § 328D of the Restatement (Second) Torts. ***To the extent that our prior decisions are inconsistent with Parrillo, they are no longer to be followed.

279

After reviewing our precedent on the doctrine of res ipsa loquitur and carefully examining the facts of this case, we conclude that plaintiffs cannot avail themselves of this doctrine to make out a claim for negligence against Ricky Smith. Roughly three years passed between the purchase of the vehicle in December 1998 and the airbag malfunction in December 2001. The plaintiffs assert that Ricky Smith had a duty to discover whatever defect made the vehicle's airbags spontaneously deploy. This assertion assumes that the vehicle was defective when it was sold. Had the airbags deployed shortly after plaintiffs purchased the vehicle, res ipsa loquitur might have permitted that inference, but it is not supported by these facts.

We agree with plaintiffs' assertion that "[t]he spontaneous deployment of air bags [sic] while a passenger is cleaning out a

vehicle is an event which ordinarily does not occur in the absence of negligence." However, "[i]t is ***insufficient to show that the accident is of the kind that does not ordinarily occur without negligence; the negligence must point to the defendant." [C] In this case, "other responsible causes" have not been "sufficiently eliminated by the evidence." [C] Accordingly, we hold that the hearing justice properly granted summary judgment in Ricky Smith's favor on plaintiffs' negligence claim. ***

[The court also affirmed the trial court's granting of summary judgment on the negligent misrepresentation count.]

Notes and Questions

1. A television catches fire in plaintiff's home. How does he persuade a court to invoke res ipsa loquitur against the manufacturer when the television left the factory several months before the incident in question? See Gast v. Sears Roebuck & Co., 39 Ohio St.2d 29, 68 Ohio Op.2d 17, 313 N.E.2d 831 (1974). Generally, what should the plaintiff do to eliminate his own conduct as a cause of the accident? Is it enough that he testifies that he did nothing unusual, and only made use of the thing furnished him by defendant for the purpose for which it was furnished? See also Metropolitan Property and Cas. Ins. Co. v. Deere and Co., 302 Conn. 123, 25 A.3d 571 (2011) (discussing product liability "malfunction theory" and noting its origins in res ipsa loquitur principles) and note 3, page 871.

2. Must the possibility that the event has been caused by the conduct of a third person, for which defendant is not responsible, be entirely eliminated? Defendant parks on the side of a hill. Shortly afterward, without explanation, the automobile runs away down the

hill and injures plaintiff. What are the possibilities? Can plaintiff get to the jury? Glaser v. Schroeder, 269 Mass. 337, 168 N.E. 809 (1929) (yes); Borg & Powers Furniture Co. v. Clark, 194 Minn. 305, 260 N.W. 316 (1935) (yes); and Hill v. Thompson, 484 P.2d 513 (Okla.1971) (yes, even though there was a four-hour lapse of time after defendant parked her car). An escalator comes to a sudden halt, injuring plaintiff who sues the department store owner. Holzhauer v. Saks & Co., 346 Md. 328, 697 A.2d 89 (1997) (res ipsa loquitur not applicable

because evidence showed emergency stop buttons were accessible to patrons and thus escalator was not in exclusive control of defendant).

3. Single Car Leaving Highway. There is general agreement that the fact that an automobile leaves the traveled portion of the highway and overturns, or crashes into a stationary object, is enough, in the absence of explanation, to make out a res ipsa loquitur case against the driver. Badela v. Karpowich, 152 Conn. 360, 206 A.2d 838 (1965); Bavis v. Fonte, 241 Md. 123, 215 A.2d 739 (1966); Tanski v. Jackson, 269 Minn. 304, 130 N.W.2d 492 (1964); and Bagby v. Commonwealth, 424 S.W.2d 119 (Ky.1968).

4. Collisions Between Vehicles. There also is general agreement that when plaintiff's car collides with defendant's, neither driver has a res ipsa loquitur case against the other. Why? When the collision injures a third person, such as a passenger or a bystander on the sidewalk, most of the decisions have held that the passenger or bystander does not have a res ipsa loquitur case against either driver.

5. Medical Malpractice and Res Ipsa Loquitur. The interaction between the general requirement that the standard of care in a medical malpractice case be proved by expert testimony and the use of res ipsa loquitur is illustrated by the next principal case.

James v. Wormuth

Court of Appeals of New York, 2013.

21 N.Y.3d 540, 997 N.E.2d 133, 974 N.Y.S.2d 308.

RIVERA, J. ***[During surgery, when Dr. Wormuth discovered that the guide wire placed to assist him in locating the area of patient's lung to be biopsied had dislodged, he conducted a 20-minute manual search for the wire, but was unable to find it. At that point, Dr. Wormuth determined that it was better for the patient to end the surgical procedure and leave the wire. Defendant informed plaintiff after the surgery that he had done so and why. Several weeks later, patient returned, complaining of pain that she attributed to the wire and Dr. Wormuth performed a second operation to remove it. Patient then filed this malpractice action.]

Plaintiffs evidence at trial consisted of her testimony about, among other things, her discussion with Dr. Wormuth after the procedure, the postoperative pain and its impact on her ability to work, as well as the testimony of two of her clients as to the apparent disruption to her work caused by the pain, and Dr. Wormuth's testimony describing the procedure and his decision to leave the wire inside the plaintiff. Plaintiff also introduced several medical records relating to both procedures, including Dr. Wormuth's file, operation reports, a

surgical pathology report, and an X-ray report produced during the period between the two procedures.

At the close of plaintiff's case, defendants moved to dismiss for failure to establish a prima facie case of medical malpractice. Defendants argued that plaintiff failed to show a deviation from accepted standards

281

of medical practice, and also that such deviation was the proximate cause of the plaintiff's injury. Defendants pointed specifically to plaintiff's failure to present any expert proof on the standard of practice. Anticipating plaintiff's response, defendants argued that res ipsa loquitur was inapplicable because there was no evidence of any error by Dr. Wormuth that caused the wire to become dislodged.

Plaintiff objected to the motion and argued that expert testimony was unnecessary because Dr. Wormuth admitted that he intentionally left the wire inside the plaintiff. Therefore, a jury could infer negligence given that there was no medical reason to leave the wire lodged in plaintiff, and defendant could have obtained a C-arm [special X-ray machine that was used in the second surgery] to locate and remove it. Plaintiff asserted that res ipsa loquitur necessarily applied because the wire was a foreign object that could only have been left in the plaintiff as a result of the doctor's negligence. ***

[The trial court judge granted a directed verdict to defendant at the close of plaintiff's case and that ruling was affirmed by the appellate division. This appeal followed.]

Ordinarily, a plaintiff asserting a medical malpractice claim must demonstrate that the doctor deviated from acceptable medical practice, and that such deviation was a proximate cause of the plaintiff's injury [cc]. The theory of res ipsa loquitur is applied to occurrences "[w]here the actual or specific cause of an accident is unknown" [c]. Under such circumstances, "a jury may... infer negligence merely from the happening of an event and the defendant's relation to it" [cc]. To establish a prima facie case of negligence in support of a res ipsa loquitur charge, plaintiff must establish three elements:

[1.] the event must be of a kind that ordinarily does not occur in the absence of someone's negligence;

[2.] it must be caused by an agency or instrumentality within the exclusive control of the defendant; and

[3.] it must not have been due to any voluntary action or contribution on the part of the plaintiff [cc].

Further, in the context of a medical malpractice case based upon a foreign object, "[r]es ipsa loquitur is applicable where... [the object] is unintentionally left in a patient following an operative procedure." [Cc]

***Plaintiff, having chosen to pursue a theory of the case which focused on defendant's intentional choice to leave the wire in the plaintiff, rather than the initial dislodgement of the wire, was required to establish that the doctor's judgment deviated from accepted community standards of practice, and that such deviation was a proximate cause of the plaintiff's injury. ***

It is clear from the record that the doctor explained his decision to leave the wire in terms of his medical assessment of what was best for

282

the patient under the circumstances. Defendant's testimony that it was his professional judgment to leave the wire [because it would be riskier to extend the period under which the plaintiff was anaesthetized and to make a larger incision in order to find and remove the wire] could not be assessed by the jury based on the "common knowledge of lay persons." [Cc] Therefore, evidence clearly was needed, in the form of expert opinion to assist a jury's understanding of whether this occurrence would have "take[n] place in the absence of negligence." [C] Plaintiff, however, wholly failed to present any such evidence of the standards of practice, and therefore her complaint was properly dismissed.

To the extent counsel argued that res ipsa loquitur applies because the wire could only have dislodged due to the doctor's negligence, plaintiff failed to establish the elements of res ipsa, specifically that Dr. Wormuth had exclusive control [cc]. Dr. Wormuth testified that there were other medical personnel involved in the process of inserting the wire and transporting the plaintiff prior to the doctor's discovery that the wire had dislodged. Plaintiff did not produce any evidence to the contrary. Instead, plaintiff's counsel appears to have believed that the control element was satisfied because the doctor had control over the operation. Whether the doctor was in control of the operation does not address the question of whether he was in exclusive control of the instrumentality, because several other

individuals participated to an extent in the medical procedure. Given that plaintiff failed to produce any evidence that the doctor had exclusive control of the wire, or sufficient proof that "eliminate[s] within reason all explanations for the injury other than the defendant's negligence," the control element clearly has not been satisfied [c], Although the control requirement does not mean that "the possibility of other causes must be altogether eliminated,... [the] likelihood must be so reduced that the greater probability lies at defendant's door" [c].

Plaintiffs argument that the wire should be treated as a foreign object in support of her res ipsa claim [notes 2A on page 273 and 4 on page 275] is unpersuasive because her theory of the case was the doctor negligently chose to leave the wire. Thus, this case is distinguishable from those involving objects left unintentionally, where, as plaintiff argues, no decision to leave the object has been made which must be measured against a standard of care. ***"As advantageous as the res ipsa loquitur inference is for a plaintiff unable to adduce direct evidence of negligence, application of the [evidentiary] doctrine does not relieve a plaintiff of the burden of proof." [C]

Accordingly, the Appellate Division order should be affirmed, with costs.

NOTES AND QUESTIONS

1. In the health care setting, a few courts have shifted the burden of proof to the defendants to prove they were not negligent in the case of a

patient unconscious during a medical procedure and unable to identify who among the various health care providers had caused an injury that ordinarily would not have happened in the absence of someone's negligence. See, for example, Ybarra v. Spangard, 25 Cal.2d 486, 154 P.2d 587 (1944) (patient suffered paralysis of right shoulder during appendectomy; burden shifted to doctors, nurses, and anesthesiologist to prove he or she did not cause the injury). The Ybarra decision was approved and followed, upon similar facts, in Frost v. Des Moines Still College of Osteopathy, 248 Iowa 294, 79 N.W.2d 306 (1956) and Beaudoin v. Watertown Memorial Hosp., 32 Wis.2d 132, 145 N.W.2d 166 (1966), but rejected in Rhodes v. De Haan, 184 Kan. 473, 337 P.2d 1043 (1959) and Talbot v. Dr. W.H. Groves' Latter-Day Saints Hosp., Inc., 21 Utah 2d 73, 440 P.2d 872 (1968).

2. What if the patient sues the hospital that is responsible for the conduct of the nurses, but does not include the surgeon and the anesthesiologist as defendants? Darrah v. Bryan Memorial Hospital, 253 Neb. 710, 571 N.W.2d 783 (1998) (summary judgment for hospital because plaintiff did not eliminate surgeon and anesthesiologist as possible sources of injury).

3. Assuming that the judge finds the prerequisites for the use of res ipsa loquitur have been shown, what is the effect on the lawsuit? See the next principal case.

Sullivan v. Crabtree

Court of Appeals of Tennessee, 1953. 36 Tenn.App. 469, 258 S.W.2d 782.

FELTS, Judge. Plaintiffs sued for damages for the death of their adult son, Robert Sullivan, who was killed while a guest in a motor truck which swerved off the highway and overturned down a steep embankment. Suit was brought against both the owner and the driver of the truck, but a nonsuit was taken as to the owner, and the case went to trial against the driver alone. There was a verdict and judgment in his favor, and plaintiffs appealed in error.

The truck was a large trailer-tractor truck ***. Its driver Crabtree ***permitted Sullivan to ride with him as a guest in the cab of the truck.

The road on which he was driving was a paved first-class Federal-state highway (U.S. 41, Tenn. 2), but coming down the mountain from Monteagle to Pelham it had a number of moderate grades and pretty sharp curves. It was midafternoon, and the weather was dry and clear. As Crabtree was approaching a curve another truck overtook and passed him, and just after it did so, Crabtree's truck suddenly swerved from his right side over to his left, ran off the left shoulder, overturned down a steep embankment, and crushed Sullivan to death.

Defendant testified that there was some loose gravel on the road, which had perhaps been spilled there by trucks hauling gravel, and the

pavement was broken a little on the right-hand side; and that when he "hit the edge of the curve on the right-hand side" he "lost control of the truck," and it turned from his right side across to the left, and

ran off the shoulder of the highway. On cross-examination he further said:

"Q. Can you tell the Jury now what caused you to lose control of the truck and permit it to run off the road down the embankment? A. No. The brakes could have gave way, or the brakes could have grabbed or it could have been a particular wheel grabbed, because on a tractor, if the brakes happen to grab on it, the load is so much heavier than the tractor, it whips either way and takes control of the tractor and you have nothing to do with it.

"Q. Did that happen in this case? A. It is possible. ***

"Q. You can't tell us just what did cause the accident or cause you to lose control of the truck? A. Probably hitting the edge of the pavement or it could have been several different things. Like one going off the mountain, if it is pulled out with the wrecker, you don't know whether a hose got connected up in there and when you turned the curve break a hose, cut it or break it loose. The brakes are cut on and off with a catch there like that, and it is easy for a hose to get loose."

Such being the undisputed facts, plaintiffs contend that defendant was guilty, as a matter of law, of negligence causing the death sued for, and that there was no evidence to support a verdict for defendant. They show a duty of care owing by defendant to the deceased under our rule that a driver must use ordinary care for the safety of his guest [c] and to make out a breach of that duty, or proximate negligence, they invoke the rule of res ipsa loquitur.

They insist that the facts of this case brought it within the rule of res ipsa loquitur requiring a finding of negligence, in the absence of an

explanation disproving negligence; that since there was no such explanation, since defendant did not know why he lost control of the truck or what caused the accident, the jury were bound to find that it was caused by his negligence and could not reasonably render a verdict in his favor. ***

The maxim res ipsa loquitur means that the facts of the occurrence evidence negligence; the circumstances unexplained justify an inference of negligence. In the principle of proof employed, a case of res ipsa loquitur does not differ from an ordinary case of circumstantial evidence. Res ipsa loquitur is not an arbitrary rule but rather "a common sense appraisal of the probative value of circumstantial evidence." [C]

This maxim does not generally apply to motor vehicle accidents but it may apply to such an accident where the circumstances causing it were within the driver's control and the accident was such as does not usually occur without negligence. So where a motor vehicle, without apparent cause, runs off the road and causes harm, the normal inference is that

285

the driver was negligent, and res ipsa loquitur is usually held to apply. ***

So we agree with learned counsel for plaintiffs that the facts of this case brought it within the maxim res ipsa loquitur. The accident was such as does not usually occur without negligence, and the cause of it was in control of the driver, or rather it resulted from his loss of control of the truck, which he could not explain.

While we agree that these facts made a case of res ipsa loquitur, we do not agree that they, though unexplained, required an inference or finding of negligence, or that the jury could not reasonably refuse to find negligence and return a verdict for defendant, or that there was no evidence to support their verdict for him.

It is true there has been confusion in the cases as to the procedural effect of res ipsa loquitur, some cases giving it one and some another of these three different effects:

(1) It warrants an inference of negligence which the jury may draw or not, as their judgment dictates. [Cc]

(2) It raises a presumption of negligence which requires the jury to find negligence if defendant does not produce evidence sufficient to rebut the presumption. [Cc]

(3) It not only raises such a presumption but also shifts the ultimate burden of proof to defendant and requires him to prove by a preponderance of all the evidence that the injury was not caused by his negligence. [Cc]

The effect of a case of res ipsa loquitur, like that of any other case of circumstantial evidence varies from case to case, depending on the particular facts of each case; and therefore such effect can no more be fitted into a fixed formula or reduced to a rigid rule than can the effect of other cases of circumstantial evidence. The only generalization that can be safely made is that, in the words of the definition of res ipsa loquitur, it affords "reasonable evidence," in the absence of an explanation by defendant, that the accident arose from this negligence.

The weight or strength of such "reasonable evidence" will necessarily depend on the particular facts of each case, and the cogency of the inference of negligence from such facts may of course vary in degree all the way from practical certainty in one case to reasonable probability in another.

In exceptional cases the inference may be so strong as to require a directed verdict for plaintiff, as in cases of objects falling from defendant's premises on persons in the highway, such as Byrne v. Boadle (1863), 2 H. & C. 722, 159 Eng.Reprint 299 (a barrel of flour fell from a window of defendant's warehouse); McHarge v. M.M. Newcomer & Co., 117 Tenn. 595, 100 S.W. 700, 9 L.R.A.N.S. 298, N.S., 298 (an awning roller fell from

286

defendant's building); and Turnpike Co. v. Yates, supra (a toll gate or pole fell on a traveler); [c].

In the ordinary case, however, res ipsa loquitur merely makes a case for the jury--merely permits the jury to choose the inference of defendant's negligence in preference to other permissible or reasonable inferences. [Cc]

We think this is true in the case before us. The cause of the death sued for was defendant's loss of control of the truck. This may have been due to his own negligence, or it may have been due to no fault of his--an unavoidable accident resulting from the brakes giving way or the breaking of some part of the control mechanism of the truck. Since such conflicting inferences might be reasonably drawn from the evidence, it was for the jury to choose the inference they thought

most probable; and we cannot say that there was no evidence to support their verdict for defendant. ***

All the assignments of error are overruled and the judgment of the Circuit Court is affirmed.

NOTES AND QUESTIONS

1. Most cases are in accord with the principal case as to the procedural effect of res ipsa loquitur: it warrants (permits) the inference of negligence that the jury may draw or not, as its judgment dictates. See George Foltis, Inc. v. New York, 287 N.Y. 108, 38 N.E.2d 455 (1941) and Hubbard v. Mellion, 48 Kan.App.2d 1005, 302 P.3d 1084 (2013) (whether the inference of negligence arising from res ipsa loquitur will be convincing to a jury is a question to be answered by that jury). Others hold that res ipsa loquitur creates a rebuttable presumption and some that it shifts the burden of proof to the defendant. See Chapman v. Harner, 339 P.3d 519 (Colo. 2014) (discussing difference between rebuttable presumption and shifting burden of proof and choosing rebuttable presumption for Colorado).

2. Suppose plaintiff, the guardian of her sister who was confined to a nursing home, proved at trial that her sister had gone into a coma because she received an overdose of a drug used to treat diabetes. The patient did not have diabetes and her chart did not indicate the administration of any medication other than sterile water as a placebo when she complained of pain. Is this enough evidence to warrant a res ipsa loquitur jury instruction? Now suppose that defendant nursing home proves that it did not have that drug in its pharmacy because no patient in its care used it, that patient

frequently was visited by her family and had visited her sister's home two weeks before the overdose, that her sister was diabetic and had the drug in her home for her own treatment, and that patient had become addicted to prescription drugs and was a "known drug seeker." Think about this case in the context of each possible effect of res ipsa loquitur. Could the jury draw an inference of negligence on the part of the nursing home? Did defendant nursing home rebut a presumption of negligence on the part of the nursing home? Did defendant nursing home prove that its staff was not a cause

patient's overdose? See Harder v. F.C. Clinton, Inc., 948 P.2d 298 (Okla. 1997).

3. As the principal case notes, there may be exceptional cases where the inference of negligence will be so compelling that the jury cannot be permitted to reject it, and a verdict must be directed for the plaintiff in the absence of evidence to explain it away. One such case is the head-on collision of two trains on the same track in Moore v. Atchison, T. & S.F.R. Co., 28 Ill.App. 2d 340, 171 N.E.2d 393 (1960). "The time will probably never come when a collision resulting from an attempt to have two trains going at full speed, in opposite directions, pass each other, on the same track, will not be held to be negligence in law." Rouse v. Hornsby, 67 Fed. 219, 221 (8th Cir.1895) (both trains belonged to and were being operated by employees of the defendant).

4. Some courts have given res ipsa loquitur a greater procedural effect when the action is brought by an injured passenger against a common carrier. See, for example, Greyhound Corp. v. Brown, 269

Ala. 520, 113 So.2d 916 (1959) and Transcontinental Bus System v. Simons, 367 P.2d 160 (Okla. 1961), shifting the burden of proof to the defendant. This is apparently a carry-over from the original common law rule that, because of the special responsibility undertaken by the carrier, it had the burden of proof.

5. Effect of Pleading Specific Acts of Negligence. At least four positions have been taken by the courts, as to whether the plaintiff, by his specific pleading of negligence, is precluded from relying upon res ipsa loquitur: (a) that he cannot rely on it at all; (b) that he may take advantage of res ipsa loquitur to the extent that the inference of negligence to be drawn supports the specific allegations; (c) that he may rely on res ipsa loquitur only if the specific pleading is accompanied by a general allegation of negligence; and (d) that it is available without regard to the form of the pleading. Which is the best rule? Do you see how each of the positions might impact on the plaintiff in a particular case? See discussion in Vogreg v. Shepard Ambulance Co., 47 Wash.2d 659, 289 P.2d 350 (1955) and Steilen v. Cabela's Wholesale, 906 N.W.2d 913, 916 (S.D. 2018) ("plaintiff does not waive instructions on res ipsa loquitur by trying to establish specific acts of negligence through introduction of some evidence which does not clearly and definitely establish the exact cause of injury") (emphasis in original).

6. Similar positions have been taken as to the effect of the introduction at trial of specific evidence of negligent conduct. What if the plaintiffs specific evidence tells the complete story of how the accident happened and just what the defendant did? Is there any room for the application of res ipsa loquitur? Stahlecker v. Ford Motor Co., 266 Neb. 601, 667 N.W.2d 244 (2003) ("Because the

[plaintiffs] have alleged specific acts of negligence on the part of both Ford and Firestone, the doctrine of res ipsa loquitur is inapplicable to this case.") Augspurger v. Western Auto Supply Co., 257 Iowa 777, 134 N.W.2d 913 (1965) (res ipsa loquitur not applicable because plaintiff, injured by a metallic particle that flew off while auto mechanic was using hammer and chisel to remove a ball bearing, testified in detail about the accident and its cause--there were no unknown factors); Dover Elevator Co. v. Swann, 334

288

Md. 231, 638 A.2d 762 (1994) (expert's opinion as to the specific cause of the elevator misleveling precluded reliance on res ipsa loquitur).

Consider the following: "When the plaintiff shows that the railway car in which he was a passenger was derailed, there is an inference that the defendant railroad has somehow been negligent. When the plaintiff goes further and shows that the derailment was caused by an open switch, the plaintiff destroys any inference of other causes; but the inference that the defendant has not used proper care in looking after its switches is not destroyed, but considerably strengthened. If the plaintiff goes further still and shows that the switch was left open by a drunken switchman on duty, there is nothing left to infer; and if the plaintiff shows that the switch was thrown by an escaped convict with a grudge against the railroad, the plaintiff has proven himself out of court." W. Prosser and W. Keeton, Torts, 260 (5th ed. 1984). See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 17, comment g (2010)

(discussing the issue of cases that combine res ipsa loquitur with specific negligence claims).

289

CHAPTER 5 CAUSATION IN FACT

1. Sine Qua Non

Perkins v. Texas and New Orleans R. Co.

Supreme Court of Louisiana, 1962.

243 La. 829, 147 So.2d 646.

SANDERS, Justice. This is a tort action. Plaintiff, the 67-year-old widow of Tanner Perkins, seeks damages for the death of her husband in the collision of an automobile, in which he was riding, with a train of the defendant railroad. [After a bench trial, t]he district court awarded damages. The Court of Appeal affirmed. We granted certiorari to review the judgment of the Court of Appeal.

The tragic accident which gave rise to this litigation occurred at the intersection of Eddy Street and The Texas and New Orleans Railroad Company track in the town of Vinton, Louisiana, at approximately 6:02 a.m., after daylight, on September 28, 1959. At this crossing Eddy Street runs north and south, and the railroad track, east and west. Involved was a 113-car freight train pulled by four diesel engines traveling east and a Dodge automobile driven by Joe Foreman in a southerly direction on Eddy Street. Tanner Perkins, a guest passenger, was riding in the front seat of the automobile with the driver.

Located in the northwest quadrant of the intersection of the railroad track and Eddy Street was a warehouse five hundred feet long. A "house track" paralleled the main track on the north to serve the warehouse. This warehouse obstructed the view to the west of an automobile driver approaching the railroad crossing from the north on Eddy Street. It likewise obstructed the view to the north of trainmen approaching the crossing from the west. Having previously served on this route, the engineer and brakeman were aware of this obstruction.

To warn the public of the approach of trains, the defendant railroad had installed at the crossing an automatic signal device consisting of a swinging red light and a bell. At the time of the accident, this signal was operating. A standard Louisiana railroad stop sign and an intersection stop sign were also located at the crossing.

Proceeding east, the train approached the intersection with its headlight burning, its bell ringing, and its whistle blowing.

The engineer, brakeman, and fireman were stationed in the forward engine of the train. The engineer was seated on the right or south side, where he was unable to observe an automobile approaching from the left of the engine. The brakeman and fireman, who were seated on the left or

north side of the engine, were looking forward as the train approached the intersection. These two crewmen saw the automobile emerge from behind the warehouse. At that time the front wheels of the automobile were on or across the north rail of the house track. The fireman estimated that the train was approximately

60 feet from the crossing when the automobile emerged from behind the warehouse. The brakeman, however, estimated that the train was 30 to 40 feet from the crossing at the time the automobile came into view. Both crewmen immediately shouted a warning to the engineer, who applied the emergency brakes. The train struck the right side of the automobile and carried it approximately 1250 feet. The two occupants were inside the automobile when it came to rest. Both were killed.

The speed of the automobile in which Tanner Perkins was riding was variously estimated from 3-4 miles per hour to 20-25 miles per hour.

The plaintiff and defendant railroad concede in their pleadings that Joe Foreman, the driver of the automobile, was negligent in driving upon the track in front of the train and that his negligence was a proximate cause of the death of Tanner Perkins.

It is conceded that the railroad's safety regulations imposed a speed limit of 25 miles per hour on trains in the town of Vinton. The plaintiff has conceded in this Court that this self-imposed speed limit was a safe speed at the crossing. The train was in fact traveling at a speed of 37 miles per hour.

Applicable here is the rule that the violation by trainmen of the railroad's own speed regulations adopted in the interest of safety is evidence of negligence. ***

We find, as did the Court of Appeal, that the trainmen were negligent in operating the train 12 miles per hour in excess of the speed limit.

***[T]he prime issue in this case is whether the excessive speed of the train was a cause in fact of the fatal collision.

It is fundamental that negligence is not actionable unless it is a cause in fact of the harm for which recovery is sought. It need not, of course, be the sole cause. Negligence is a cause in fact of the harm to another if it was a substantial factor in bringing about that harm. Under the circumstances of the instant case, the excessive speed was undoubtedly a substantial factor in bringing about the collision if the collision would not have occurred without it. On the other hand, if the collision would have occurred irrespective of such negligence, then it was not a substantial factor. [Cc]

In the instant case the train engineer testified that at a speed of 25 miles per hour he would have been unable to stop the train in time to avoid the accident. Other facts of record support his testimony in this regard. With efficient brakes, the mile-long train required 1250 feet to stop at a speed of 37 miles per hour. It is clear, then, that even at the

concededly safe speed of 25 miles per hour, the momentum of the train would have, under the circumstances, carried it well beyond the crossing. This finding, of course, does not fully determine whether the collision would have been averted at the slower speed. The automobile was also in motion during the crucial period. This necessitates the further inquiry of whether the automobile would have cleared the track and evaded the impact had the train been moving at a proper speed at the time the trainmen observed the automobile emerge from behind the warehouse. Basic to this inquiry are the speed of the automobile and the driving distance between it and a position of safety. [C]

The testimony of the witnesses is in hopeless conflict as to the speed of the automobile at the time of the collision.

***Despite these deficiencies in the evidence, the plaintiff argues that had the train been traveling at a proper speed the driver of the automobile would "conceivably" have had some additional time to take measures to avert disaster and the deceased would have had some additional time to extricate himself from danger. Hence, the plaintiff reasons, the collision and loss of life "might not" have occurred.

On the facts of this case, we must reject the escape theory advanced in this argument. Because of the deficiencies in the evidence which we have already noted, it is devoid of evidentiary support. The record contains no probative facts from which the Court can draw a reasonable inference of causation under this theory. In essence, the argument is pure conjecture.

Based upon the evidence of record, it appears almost certain that the fatal accident would have occurred irrespective of the excessive speed of the train. It follows that this speed was not a substantial factor in bringing about the accident.

We conclude that the plaintiff has failed to discharge the burden of proving that the negligence of the defendant was a cause in fact of the tragic death. The judgment in favor of plaintiff is manifestly erroneous.

For the reasons assigned, the judgment of the Court of Appeal is reversed, and the plaintiffs suit is dismissed at her cost.

NOTES AND QUESTIONS

1. In the principal case, if the collision was a cause of the plaintiffs' deaths, why did the defendant avoid liability?

2. Driver is driving 30 m.p.h. in a 25 m.p.h. zone in a thunderstorm. Her speed causes her car to be passing under a tree just as it is struck by lightning and falls onto the car, injuring passenger. Does passenger have a negligence cause of action against driver? Note that if she had been driving even faster they would have been past that point before the tree fell. Therefore, the risks associated with speeding were not a cause of the harm. The Third Restatement treats this as a scope of liability question. Restatement (Third) of Torts § 30, illustration 1 (2010).

292

3. Defendant truck driver negligently failed to signal for a left turn. Plaintiff crashed into the truck. Can defendant win the case by establishing that plaintiff was not looking and would not have seen the signal if it had been given? Rouleau v. Blotner, 84 N.H. 539, 152 A. 916 (1931) ("if he were a deaf man, the failure to sound whistle, bell or horn would be immaterial").

4. Defendant excavates a hole in the sidewalk, and leaves it unguarded and unlighted. Plaintiff, a traveler on the sidewalk, accidentally falls into it in the dark. Is defendant's negligence a cause of his injury? Probably. What if a third person negligently bumps into plaintiff, and knocks him into the hole? Village of Carterville v. Cook, 129 III. 152, 22 N.E. 14 (1889) (yes). Suppose the third person intentionally shoves him into it? Milostan v. Chicago, 148 III.App. 540 (1909) (no).

5. The mate of defendant's steam trawler falls overboard, and disappears immediately. Defendant's lifeboat is lashed to the deck instead of being suspended from davits, and is equipped with only one oar. Is this negligence a cause of his death? Ford v. Trident Fisheries Co., 232 Mass. 400, 122 N.E. 389 (1919) (no).

6. Defendant, cutting ice on a lake, was negligent in failing to fence the opening as required by statute, in failing to give warning of its location, and in not having ropes or other appliances at hand to rescue anyone who fell in. Plaintiffs horses ran away, plunged into the opening, and were drowned. The evidence was that the horses were uncontrollable and could not have been stopped or directed, and that they went under the ice and could not have been rescued. Is defendant's negligence a cause of their loss? Stacy v. Knickerbocker Ice Co., 84 Wis. 614, 54 N.W. 1091 (1893) (no).

7. When the North Tower of the World Trade Center collapsed on 9/11, flaming debris landed on a building known as 7 World Trade Center ("7WTC"), which had been built over an underground ConEd electrical substation. Firefighters assessing the scene found there were multiple fires in the building and evidence of structural damage from the flying debris. Because the building already had been evacuated and searched for survivors, there was no water to use due to the breaking of the Vesey Street water main when the Towers collapsed, and 400 firefighters already had been lost in the collapse of the Towers, the firefighters drew a perimeter around the building and let it burn. It collapsed several hours later, destroying the ConEd substation underneath it. ConEd's insurance company sought to recover from the owners of the building, arguing that an unfought fire would not have caused it to collapse if the building had been

properly designed and constructed. The appellate court upheld the trial court judge's grant of summary judgment to the defendants, finding that plaintiff failed to prove that the design alternatives argued by its experts to the design and construction of 7WTC more than a decade earlier would have prevented its collapse under the conditions present on 9/11. Aegis Ins. Services, Inc. v. 7 World Trade Co., LLP, 737 F.3d 166 (2d Cir. 2013) (applying New York law).

8. Defendant failed to include a warning on a can of refrigerant. Plaintiff started using it without reading the instructions. Was defendant's failure to warn a cause of plaintiff's injury? Technical Chemical Co. v. Jacobs,

293

480 S.W.2d 602 (Tex. 1972) (no). See also Motus v. Pfizer Inc., 358 F.3d 659 (9th Cir. 2004) (applying California law) (since doctor failed to read manufacturer's published warnings before prescribing drug, plaintiff could not show that a stronger warning would have averted injury to her husband); Harvey v. Washington, 95 S.W.3d 93 (Mo. 2003) (since kidney specialist had independent information re patient's condition, failure of neurologist to advocate dialysis was not cause of patient's death); Kovach v. Caligor Midwest, 913 N.E.2d 193 (Ind. 2009) (since patient was given a full cup of red liquid in a clear cup instead of the prescribed half cup, there was no causal link between the medicine cup manufacturer's failure to warn that the cup was not suited as a precision measuring device and the overdose that caused the injury); and Peart v. Dorel Juvenile Group, Inc., 456 Fed.Appx. 446 (5th Cir. 2012) (applying Louisiana law) (even if warning on step stool that collapsed was inadequate, plaintiff

failed to prove causation because she admitted that she had not read the warning stickers attached to the step stool before she used it).

9. Defendant railroad violated a statute in failing to display a warning sign at a railroad crossing. Plaintiff, who was injured at the crossing, knew from prior experience of the danger. Was defendant's negligence a cause in fact of plaintiff's injuries? Thomas v. Baltimore & Ohio R. Co., 19 Md.App. 217, 310 A.2d 186 (1973) (no--plaintiff had crossed over tracks only 15 minutes earlier on his way to quarry).

10. Texas uses the term "producing cause" for causation and had been defining it for the jury as "an efficient, exciting, or contributing cause that, in a natural sequence, produces the incident in question. There may be more than one producing cause." Texas Pattern Jury Charge 71.3. Recently, the Texas Supreme Court moved away from its traditional jury instruction and to defining "producing cause" as being a "substantial factor in bringing about an injury, and without which the injury would not have occurred." Ford Motor Co. v. Ledesma, 242 S.W.3d 32, 46 (Tex. 2007). See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 26 (2010) on "but for" causation; Abraham, Self-Proving Causation, 99 Va. L. Rev. 1811 (2013); and Hart and Honoré, Causation in the Law (2d ed. 1985).

2. Proof of Causation

Reynolds v. Texas & Pac. Ry. Co.

Court of Appeals of Louisiana, 1885.

37 La.Ann. 694.

[Plaintiff and his wife sought damages against defendant company for injuries she suffered when she fell down a stairway.]

FENNER, J. ***The train was behind time. Several witnesses testify that passengers were warned to "hurry up." Mrs. Reynolds, a corpulent woman, weighing two hundred and fifty pounds, emerging from the bright light of the sitting-room, which naturally exaggerated the outside darkness, and hastening down these unlighted steps, made a misstep in

294

some way and was precipitated beyond the narrow platform in front and down the slope beyond, incurring the serious injuries complained of. [The trial court, without a jury, gave judgment to the plaintiffs for $2,000 in damages. Defendant appealed.]

[Defendant railroad] contends that, even conceding the negligence of the company in [failing to light the stairway or provide a handrail], it does not follow that the accident to plaintiff was necessarily caused thereby, but that she might well have made the misstep and fallen even had it been broad daylight. We concede that this is possible, and recognize the distinction between post hoc and propter hoc. But where the negligence of the defendant greatly multiplies the chances of accident to the plaintiff, and is of a character naturally leading to its occurrence, the mere possibility that it might have happened without the negligence is not sufficient to break the chain of cause and effect between the negligence and the injury. Courts, in such matters, consider the natural and ordinary course of events, and do

not indulge in fanciful suppositions. The whole tendency of the evidence connects the accident with the negligence. ***

Judgment affirmed.

NOTES AND QUESTIONS

1. If a life preserver had been thrown to a drowning man, would he have caught it and been saved? Kirincich v. Standard Dredging Co., 112 F.2d 163 (3d Cir.1940). Would an adequate number of campus police have prevented trespassing boys from shooting a student in the eye with an air rifle? Stockwell v. Board of Trustees of Leland Stanford Junior University, 64 Cal.App.2d 197, 148 P.2d 405 (1944). How are these questions to be decided? Who should decide them?

2. The owners of Tower Two of the World Trade Center sued American Airlines for the destruction of the tower on September 11th, arguing that a twenty-one minute delay between when a flight attendant reported the hijacking to American and when American reported it to the FAA was a cause of their loss. The FAA, learning of the hijacking from the Control Tower at Boston Center six minutes after American learned of it from its flight attendant, caused two military jets to scramble, and sent them to air space near Long Island where they were waiting for military personnel to establish the precise location of the plane. Time ran out and the American flight crashed into Tower One. Seventeen minutes later, the United flight crashed into Tower Two. Was the alleged delay in reporting the hijacking of the American plane a cause of the damage to Tower Two? In re September 11 Litigation, 594 F.Supp.2d 374 (S.D.N.Y. 2009) (granting summary judgment to American, finding that plaintiffs had not proved that the six- minute gap between when

American was told of the hijacking and when the FAA learned of it from the Boston Control Tower was enough time to have stopped the destruction of Tower Two).

295

3. Customer was standing in line at the bakery counter at the grocery store when a motorized cart being driven by another customer struck her cart, causing her to fall and suffer personal injury. The motorized cart was provided by the grocery store for the use of its customers. The injured customer argued that grocery store had a duty to provide training to users of the motorized carts. Assuming that is true (it was contested in the case), how would plaintiff prove that the lack of training is what caused the incident? Rieger v. Giant Eagle, Inc., 2019 Ohio 3745, 138 N.E.3d 1121 (2019) (no evidence of but-for link between a failure to provide training and incident).

Gentry v. Douglas Hereford Ranch, Inc.

Supreme Court of Montana, 1998.

290 Mont. 126, 962 P.2d 1205.

[Defendant Bacon was planning to hunt deer on his wife's grandmother's ranch while his wife and a friend of theirs, Barbara Gentry, painted the interior of the grandmother's new house. After starting a fire in the fireplace, Bacon left to go get his rifle from where he had parked his car. He then returned to the new house to get the ranch pickup, holding his rifle on his shoulder with his right hand. As he was approaching a wooden deck adjacent to the house and accessed by two wooden steps, Barbara Gentry came out of the

house to get a radio from the pickup. Bacon stumbled and his rifle discharged, the bullet struck Barbara Gentry in the head, and she died several weeks later from the head injury. Her husband brought wrongful death and survival actions against Bacon, the ranch company owned by the grandmother, and a cattle company that leased part of the ranch. The complaint alleged that Bacon had been negligent in his handling of the rifle, that the other defendants were liable for Bacon's negligence because he was their agent, that the other defendants had been negligent in maintaining the deck stairs in a dangerous condition, and that the combined negligence of Bacon and the other defendants had caused the injury. After Bacon sought bankruptcy protection, he was voluntarily dismissed from the case. The trial court judge entered summary judgment in favor of the ranch company defendants and plaintiff appealed on several grounds.] TRIEWEILER, J. ***

Did the District Court err when it concluded as a matter of law that the [ranch company] defendants were not negligent? ***

A negligence action requires proof of four elements: (1) existence of a duty; (2) breach of the duty; (3) causation; and (4) damages. If the plaintiff fails to offer proof of one of these elements, the action in negligence fails and summary judgment in favor of the defendant is proper. [C] The causation element requires proof of both cause in fact and proximate cause. ***

In Busta v. Columbus Hospital Corp. (1996), 276 Mont. 342, 916 P.2d 122, 139, we held that:

In those cases which do not involve issues of intervening cause, proof of causation is satisfied by proof that a party's conduct was a cause-in-fact of the damage alleged. As stated in Prosser and Keeton on Torts § 41, at 266 (5th ed. 1984), a party's conduct is a cause-in-fact of an event if "the event would not have occurred but for that conduct; conversely, the defendant's conduct is not a cause of the event, if the event would have occurred without it."

***We limit our discussion, however, to our conclusion that Gentry failed to prove cause in fact.

Gentry alleged that the ranch company [defendants]... were negligent by failing to maintain the stairs to the deck adjoining the "new house" in a reasonably safe condition. He contended that the bottom stair was unstable and that the area leading to it was cluttered by debris, including a drain pipe, electric wires, and rocks. However, the defendants' motions for summary judgment were based on Bacon's testimony that he was unable to attribute his fall to any of those conditions. When he was deposed on May 2, 1997, he gave the following testimony in response to the following questions:

Q: Do you remember stumbling as you started up the steps?

A: I don't remember hardly anything.

Q: And you don't remember exactly where you were when you began to stumble; is that right?

A: That's correct.

Q: And you don't know whether it was--whether there was even some object that caused you to slip or stumble; is that right?

A: I don't remember anything.

Q: You don't remember where you were?

A: No.

Q: And from the time after the rifle discharged, you don't know exactly where you were when you fell or what caused you to fall; is that right?

A: Correct.

Q: And you don't recall if you had even reached the steps at the time that you fell; is that right?

A. That's correct.

Q: Did you want to add something?

297

A: Yes. I've stated umpteen numerous times that I don't remember if I tripped or if I was just clumsy or if I missed the step or hit it or whatever. I've stated that and stated that, and I don't recall.

Bacon also testified that while he had stumbled climbing those same steps prior to the incident in question, he had done so as the result of his own clumsiness, and not because of the condition of the steps.

In response to Bacon's deposition testimony, which was cited to the District Court in support of the defendants' motions for summary judgment, Gentry cited the District Court, and now cites this Court, to the following statement made by Bacon during an interview with investigators on November 16, 1995.

TW: Okay. So, you remember stumbling, and you don't remember on what?

BB: No, I don't remember if I went to step up on the step or if... there's a rock there also underneath the step to keep it level. I don't think it was that, I think it was the step.

Gentry contends that based on this isolated statement a reasonable finder of fact could infer that it was the step which caused Bacon's fall. However, earlier in the same interview, he was asked the following question and gave the following answer:

TW: Do you remember what you stumbled on?

BB: No I don't.

Furthermore, when asked in his deposition whether, at the time of his November 16 statement, he had remembered what caused him to fall, he testified that he had not. That testimony was consistent with his statement on the date of the incident in which he stated that he did not know how he fell.

Finally, even the isolated statement relied on by Gentry does not support the contention that it was the condition of the step or the area surrounding the step which caused Bacon to stumble and fall. The most that could be inferred was that he was about to ascend the stairs when he did stumble and fall. Why he stumbled and fell would still require speculation. In the context of summary judgment proceedings, we have previously held that neither a suspicion nor speculation is sufficient to defeat a motion for summary judgment. In Benson v. Diehl (1987), 228 Mont. 199, 203, 745 P.2d 315, 317, we held that:

A suspicion, regardless of how particularized it may be, is not sufficient to sustain an action or to defeat a motion for summary

judgment. Unsupported conclusory or speculative statements do not raise a genuine issue of material fact. The trial court has no duty to anticipate possible proof. [C]

The facts presented in this case are similar to those presented in [an earlier Montana case]. In that case, the plaintiff sought damages for injuries she sustained while walking on property owned by the defendant.

298

She was injured when she stumbled over some object on the property. However, she was unable to identify what it was that caused her to stumble. We affirmed summary judgment for the defendant for the following reasons:

More importantly, the fact is undisputed that the appellant cannot describe what caused her injury. She does not know if it was merely a mound of dirt or an old corral pole.

In an action for negligence, a plaintiff must produce evidence from which it can be reasonably inferred that negligent conduct on the part of the defendant or its agents was the proximate cause of the plaintiff's injuries. [C] Here, the appellant simply does not know exactly what caused her injury. As noted above, the respondents cannot be the insurers of the appellant and held liable for her injury merely because an accident happened on their land. [C]

Likewise, Gentry has offered no substantial evidence that any condition on the property [of defendants] caused Bacon to stumble and fall immediately before his rifle discharged and struck the decedent, Barbara Gentry. Therefore, we conclude that cause in fact

cannot be proven as a matter of law, and the District Court did not err when it held that the [ranch company] defendants... were not negligent in a manner that contributed to the injuries and death of Barbara Gentry. ***

[The court then ruled that the ranch company defendants were not vicariously responsible for Bacon's negligent handling of the rifle since he was not an employee or agent of the companies.]

We affirm the judgment of the District Court.

NOTES AND QUESTIONS

1. In the principal case, if the steps were negligently maintained, why did the court affirm the trial court's entry of judgment in favor of the ranch company defendants? In light of Reynolds v. Texas & Pac. Ry. Co., what change in the facts would have been enough to get the principal case to the jury?

2. With this set of facts, contrast those in Mehlert v. Baseball of Seattle, Inc., 1 Wash.App.2d 115, 404 P.3d 97 (2017). Plaintiff fell while exiting a store that had a ramp in the middle of a set of steps. She testified that she did not remember what caused her to fall or whether she was on the ramp or the stairs, she just remembered beginning to fall and reaching out for a handrail. The defendant sought summary judgment but the appellate court found that her testimony was enough to allow reasonable jurors to infer causation without speculating because she submitted proof that the placement of the ramp without handrails was a but-for cause of her injuries notwithstanding her inability to recall how or why she fell. The opinion has an embedded photograph of the stairs and ramp.

3. A woman on board a cruise ship stepped into the bathtub in her cabin to take a shower. She slipped and injured herself. The bathtub had four anti-skid strips running parallel to each other from the middle to the back of the tub. After the accident, she noticed that there was sufficient space between the strips so that her foot could just fit between them. She does not know where her feet were when she slipped. Assuming that she could prove that the placement of the anti-skid strips was negligent, is the cruise ship liable for her injures? Fedorczyk v. Caribbean Cruise Lines, Ltd., 82 F.3d 69, 75 (3d Cir.1996) ("Even though we must draw all legitimate inferences in Fedorczyk's favor, the inference that she was standing between the strips at the time of the accident, because her feet could fit between the strips, is not an appropriate inference to be drawn. The possibility of the existence of an event does not tend to prove its probability.")

4. What happened to Bacon? Why doesn't he have to compensate plaintiff? Wasn't his negligent handling of the rifle a cause in fact of the injury to plaintiff's wife?

5. Notice the court's allusion to cause in fact and proximate cause as two separate analyses. Proximate cause (scope of liability) will be discussed in Chapter 6.

Kramer Service, Inc. v. Wilkins

Supreme Court of Mississippi, 1939.

184 Miss. 483, 186 So. 625.

[The plaintiff, a guest in the defendant's hotel, received a cut on his forehead from a piece of glass that fell from a broken transom when the plaintiff opened the door. There was evidence that the condition of disrepair had existed long enough to charge defendant with notice of it. The wound did not heal, and two years after the injury plaintiff went to a specialist in skin diseases, who found that at the point of the injury a skin cancer had developed, which was not fully cured at the time of the trial, some three years after the original injury. The defendant appeals a jury verdict for the plaintiff.]

GRIFFITH, Justice. ***Appellant requested an instruction to the effect that the cancer or any prolongation of the trouble on account thereof should not be taken into consideration by the jury, but this instruction was refused.

Two physicians or medical experts, and only two, were introduced as witnesses, and both were specialists in skin diseases and dermal traumatisms. One testified that it was possible that a trauma such as appellee suffered upon his temple, could or would cause a skin cancer at the point of injury, but that the chances that such a result would ensue from such a cause would be only one out of one hundred cases. The other testified that there is no causal connection whatever between trauma and cancer, and went on to illustrate that if there were such a connection nearly every person of mature age would be suffering from cancer. ***

300

There is one heresy in the judicial forum which appears to be Hydraheaded, and although cut off again and again, has the characteristic of an endless renewal. That heresy is that proof that a

past event possibly happened, or that a certain result was possibly caused by a past event, is sufficient, in probative force to take the question to a jury. Such was never the law in this state, and we are in accord with almost all of the other common-law states. ***It is not enough that negligence of one person and injury to another coexisted, but the injury must have been caused by the negligence. Post hoc ergo propter hoc is not sound as evidence or argument. Nor is it sufficient for a plaintiff, seeking recovery for alleged negligence by another toward the plaintiff, to show a possibility that the injury complained of was caused by negligence. Possibilities will not sustain a verdict. It must have a better foundation. ***

Taking the medical testimony in this case in the strongest light in which it could be reasonably interpreted in behalf of the plaintiff, this testimony is that as a possibility a skin cancer could be caused by an injury such as here happened, but as a probability the physicians were in agreement that there was or is no such a probability.

And the medical testimony is conclusive on both judge and jury in this case. That testimony is undisputed that after long and anxious years of research the exact cause of cancer remains unknown--there is no dependably known origin to which it can be definitely traced or ascribed. If, then, the cause be unknown to all those who have devoted their lives to a study of the subject, it is wholly beyond the range of the common experience and observation of judges and jurors, and in such a case medical testimony when undisputed, as here, must be accepted and acted upon in the same manner as is other undisputed evidence; otherwise the jury would be allowed to resort to and act upon nothing else than the proposition post hoc

ergo propter hoc, which, as already mentioned, this Court has long ago rejected as unsound, whether as evidence or as argument.

In all other than the exceptional cases now to be mentioned, the testimony of medical experts, or other experts, is advisory only; but we repeat that where the issue is one which lies wholly beyond the range of the experience or observation of laymen and of which they can have no appreciable knowledge, courts and juries must of necessity depend upon and accept the undisputed testimony of reputable specialists, else there would be no substantial foundation upon which to rest a conclusion. ***

Affirmed as to liability; reversed and remanded on the issue of the amount of the damages [in allowing recovery for the skin cancer in addition to the original cut on the forehead].

301

NOTES AND QUESTIONS

1. It is not enough that the plaintiff's expert testify that the medical malpractice increased the risk of harm. Looney v. Moore, 886 F.3d 1058(11th Cir. 2018) (applying Alabama law) (plaintiff must establish the breach of the appropriate standard of care probably caused the injury--a mere possibility is insufficient). Nor it is enough to show an association between exposure to a toxin and a harm. Without sufficient basis for a conclusion that the epidemiological correlation was causal, the conclusion is mere speculation and conjecture. Rochkind v. Stevenson, 454 Md. 277, 164 A.3d 254 (2017).

2. Why not decide this case on the basis of Reynolds v. Texas & Pacific Ry. Co.? How much is proved by the fact that, out of a good

many square inches of skin on the human body, the cancer developed at the exact point of the unhealed cut? Compare Emery v. Tilo Roofing Co., 89 N.H. 165, 195 A. 409 (1937), where a fire started at a place on a roof where workmen had been smoking cigarettes, shortly after they had left it. The court upheld the jury's verdict, finding that the most probable possibility was that the fire was caused by a cigarette stub. A woman develops a rare and fatal lung disease after taking an overdose of a drug that had been negligently prescribed by her doctor. The lung disease had not been linked to exposure to the drug in any other patient; very few women had ever received such a high dose. Her expert testified that the onset and progression of her symptoms matched those of others who had developed the lung disease when exposed to other drugs (mainly chemotherapy) known to induce pulmonary disease. She had been exposed to no other known causes of the lung disease. Is this enough to prove causation? Zuchowicz v. United States, 140 F.3d 381, 390 (2d Cir. 1998) (applying Connecticut law in a Federal Tort Claims Act case) (upholding trial court judge's finding of causation based on expert's testimony).

3. In a medical malpractice case, the plaintiff's expert is prepared to testify that the cause of plaintiff's injury was the mobilization of her esophagus during surgery. Defendant's experts would testify that there are several possible causes for the injury, the least likely of which is the mobilization. Should the judge permit the defendants' experts to testify since they are expressing their opinions in terms of "possibility" rather than "probability"? Wilder v. Eberhart, 977 F.2d 673 (1st Cir. 1992) (applying New Hampshire law) (defendants' experts should have been permitted to testify because defendant

need not prove another cause, only persuade the trier of fact that the plaintiffs putative cause was not the probable cause). See also Stinson v. England, 69 Ohio St.3d 451, 633 N.E.2d 532 (1994) (even though cause espoused by defendant's expert had a likelihood of less than fifty percent, it had a greater likelihood than the theory proposed by plaintiff's expert); Williams v. 8th Judicial Dist. Crt. of Nevada, 262 P.3d 360 (Nev. 2011) (because defense expert is seeking to controvert a key element of the plaintiffs prima facie case, as long as the proffered alternative causation theory or theories are competent and supported by relevant evidence or research, they need not be stated as being more likely than not); and Martinez v. Johns Hopkins Hosp., 212 Md. App. 634, 70 A.3d 397 (2013) (defendant hospital entitled to offer proof of negligence and causation against nonparty midwife as part of its denial of liability).

302

4. What if plaintiffs proof shows three possible causes of a fireball shooting out of her oven, all of which can be traced to the manufacturer, but none of which is more likely than not? Under Kentucky law, a plaintiff must isolate the cause of the injury only where an alternative cause relieves the defendant of liability. Here, all three possible scenarios traced back to a defect in the stove's design or to a component part. Thus, plaintiff's proof of causation against the manufacturer was adequate. Siegel v. Dynamic Cooking Systems Inc., 501 Fed.Appx. 397 (6th Cir. 2012) (applying Kentucky law).

5. Cases dealing with informed consent, pages 215-228, can present a special problem in the area of cause in fact. Assume that patient

proves that doctor failed to inform him of a material risk, that the applicable standard of care (whether physician or patient based) was violated, and that the risk manifested itself. How does patient prove causation? Should plaintiff patient be able to hurdle the issue if he testifies that he would not have undergone the medical procedure if defendant physician had informed him of the risk? Sard v. Hardy, 281 Md. 432, 379 A.2d 1014, 1025 (1977), quoting Canterbury v. Spence, 150 U.S.App.D.C. 263, 464 F.2d 772, 791 (1972), ("Such a test puts the physician in 'jeopardy of the patient's hindsight and bitterness.'") Some courts have said that an objective test is preferable, i.e., what would a prudent person in the patient's position have decided if adequately informed of the peril? Aronson v. Harriman, 321 Ark. 359, 901 S.W.2d 832 (1995) (plaintiff's failure to testify that he would not have undergone the surgery if he had been informed of the risk of paralysis did not defeat his claim; test is what a reasonable person would have decided if adequately informed). Others have insisted that the test must be subjective in order to fully protect the underlying concept of bodily integrity. Flanagan v. Wesselhoeft, 712 A.2d 365, 370 (R.1.1998) ("The essential inquiry then is not which course of treatment the trial justice, expert medical professionals, or even a reasonable person might elect. Rather, 'the patient's right to make his decision in the light of his [or her] own individual value judgment is the very essence of his freedom of choice'"). See also Hartke v. McKelway, 707 F.2d 1544 (D.C.Cir. 1983) (discussing proof problems that could arise under either objective or subjective tests).

6. Should a broadcasting company be held liable for airing scenes of violent acts on television, when those scenes may incite others to

perform similar acts? See Olivia N. v. National Broadcasting Co., Inc., 74 Cal.App.3d 383, 141 Cal.Rptr. 511 (1977), cert, denied, 435 U.S. 1000 (1978) (nine-year- old girl "artificially raped" with a bottle by her attackers, also minors, who had watched a similar incident depicted in a television drama) and McCollum v. CBS, Inc., 202 Cal.App.3d 989, 249 Cal.Rptr. 187 (1988) (no liability for suicide of teenager listening to rock music that parents claimed incited suicide) (collecting cases attempting to impose liability on media defendants for inciting various illegal and violent acts). Putting aside for the moment the First Amendment issues surrounding the imposition of tort liability on media defendants, what problems in proving causation would a plaintiff encounter?

303

Smith v. Providence Health & Services

Supreme Court of Oregon, 2017.

361 Or. 456, 393 P.3d 1106.

NAKAMOTO, J. After suffering permanent brain damage from a stroke, plaintiff Joseph Smith brought this medical negligence action, alleging that, because doctors had not taken proper steps to follow up on his complaints of stroke symptoms, he lost a chance for treatment that, in one-third of cases, provides a patient with no or reduced complications following the stroke. Reviewing the complaint on its face, the trial court agreed with defendants that plaintiff had failed to state a claim under Oregon law. The court entered a judgment dismissing the complaint with prejudice, which the Court of Appeals affirmed. [C] On review, the question presented is whether

Oregon law permits a plaintiff who has suffered an adverse medical outcome resulting in physical harm to state a common-law medical negligence claim by alleging that the defendant negligently caused a loss of his or her chance at recovery. ***

In a professional negligence claim, a plaintiff must allege and prove the following: "(1) a duty that runs from the defendant to the plaintiff; (2) a breach of that duty; (3) a resulting harm to the plaintiff measurable in damages; and (4) causation, i.e., a causal link between the breach of duty and the harm." [C] Ultimately, the plaintiff must prove causation by a "reasonable probability." [C] *** [Defendants argued that plaintiff had failed to allege that it was more likely than not that the delay in treatment, rather than the underlying condition itself, caused his permanent disability. Plaintiff argues that loss of chance is not an aspect of causation, but rather is a distinct type of injury or harm, and one that numerous jurisdictions have recognized in common-law negligence cases involving medical malpractice.]

The present case concerns whether the loss-of-chance theory of injury should be cognizable in the context of common-law negligence claims of medical malpractice in Oregon. The loss-of-chance theory is responsive to cases like this one, in which defendants undertook care of plaintiff when he presented with symptoms of stroke, they breached the duty to plaintiff by performing below the standard of care, plaintiff suffered brain damage, and defendants caused him to lose a 33 percent chance at recovering from the stroke, i.e., plaintiff does not allege (and cannot prove) that defendants caused his brain damage given that his chance of recovery with proper treatment was not greater than 50 percent.

Loss of chance as a theory of recovery for negligence, and in particular for medical malpractice, has gained traction in the last half-century. At this point, courts in most states have reached the issue, and more than half of the jurisdictions in the United States that have considered the issue have embraced the theory, at least to some extent. [C] ***[The court then discussed cases from other jurisdictions deciding

304

whether or not to alter the traditional causation requirement and adopt the loss-of-chance theory in medical malpractice actions.]

An early iteration of the basis for the loss-of-chance theory, and one that is widely cited, is found in Hicks v. United States, 368 F.2d 626 (4th Cir. 1966). That case, which involved a negligent failure to diagnose a condition that led to the death of the patient, applied Virginia law. ***Although Hicks, unlike classic loss-of-chance cases discussed below, did not actually involve proof of less than a 51 percent chance that the correct diagnosis would have led to a better medical outcome, [c], it nonetheless has come to be cited for the proposition that traditional notions of "more likely than not" causation pose a problematic barrier to recovery by patients who have experienced poor medical outcomes due to a doctor's failure to diagnose and that other theories of recovery may be viable in that context.

One of the earliest cases that explicitly recognized loss of chance as a distinct theory of recovery in medical malpractice was Hamil v. Bashline, 481 Pa. 256, 392 A.2d 1280 (1978). In that case, the plaintiff put on expert testimony that the decedent had a 75 percent

chance of surviving his heart attack with proper treatment, which the defendant countered with evidence that the decedent's death was imminent, regardless of treatment. The trial court directed a verdict in the defendant's favor after concluding that the plaintiff had failed to establish that the defendant's proven negligence was the proximate cause of the death. [C]

On appeal, the Pennsylvania Supreme Court analyzed the question in terms of the quantum of proof necessary to establish causation, like some other courts addressing loss of chance, particularly earlier in the development of the doctrine. ***[The Pennsylvania Court described the loss-of-chance theory as allowing "the issue to go to the jury upon a less than normal threshold of proof' as long as there was evidence that the "increased risk" was a "substantial factor in bringing about the resulting harm."]

A small number of courts in other jurisdictions--[cc]--have similarly characterized loss-of chance theories of recovery in the medical malpractice context as involving a relaxation of the causation standard. Those jurisdictions use a test for the causal connection between the patient's ultimate physical harm and the doctor's negligence that substitutes "substantial factor" or "substantial probability" for "preponderance of the evidence," that is, more-likely-than-not or greater - than-50-percent causation.***The "relaxed causation" approach to loss of chance, however, is in the minority, and plaintiff does not rely on it.

The injury-based analytical approach--the one urged by plaintiff in this case--is favored by commentators and the majority of courts in other jurisdictions that have approved of the loss-of-chance doctrine.

That approach has as its foundation the recognition of the lost chance as an injury in itself.

305

For example, the author of an influential 1981 law journal article posited that loss of chance need not be viewed in terms of causation, but, rather, should be analyzed in terms of how to value the lost chance itself. Joseph H. King, Jr., Causation, Valuation, and Chance in Personal Injury Torts Involving Preexisting Conditions and Future Consequences, 90 Yale LJ 1353 (1981). Professor King maintained that the loss of chance of achieving a favorable outcome "should be compensable and should be valued appropriately, rather than treated as an all-or-nothing proposition" dependent on proof of a greater-than-50-percent chance of a better outcome absent the alleged malpractice. [C] He argued that, in a medical malpractice situation in which a patient presents with symptoms of a condition and a physician negligently fails to diagnose and treat that condition, the preexisting medical condition (which clearly was not caused by the negligence) is merely something that is taken into account when valuing the harm that actually was caused by the negligent failure to diagnose: "The defendant should be subject to liability only to the extent that he tortiously contributed to the harm by allowing a preexisting condition to progress[.]" [C] The author provided the following example:

"[C]onsider the case in which a doctor negligently fails to diagnose a patient's cancerous condition until it has become inoperable. Assume further that even with a timely diagnosis the patient would have had only a 30% chance of recovering from the disease and

surviving over the long term. ***[A loss- of-chance approach] would allow recovery for the loss of the chance of cure even though the chance was not better than even. The probability of long-term survival would be reflected in the amount of damages awarded for the loss of the chance. While the plaintiff here could not prove by a preponderance of the evidence that he was denied a cure by the defendant's negligence, he could show by a preponderance that he was deprived of a 30% chance of a cure." [C]***

Over twenty state courts have agreed with the argument that King makes in his articles and have permitted plaintiffs to assert a lost chance as a cognizable injury in a medical malpractice claim. [Cc]. For example, in Matsuyama v. Birnbaum, 452 Mass. 1, 890 N.E.2d 819 (2008), the Massachusetts Supreme Judicial Court engaged in a comprehensive analysis of the loss-of-chance theory. Ultimately, it concluded that such claims should be cognizable, relying in part on Professor King's articles described above, as well as the rationale explicated by the court in Hicks and the growing body of case law from many jurisdictions recognizing the doctrine. The court adopted the loss-of-chance theory of injury, limited to the medical malpractice context, and explained that it did not, in fact, relieve a plaintiff of the burden to prove causation:

"[Massachusetts common law] requires that plaintiffs establish causation by a preponderance of the evidence. In order

to prove loss of chance, a plaintiff must prove by a preponderance of the evidence that the physician's negligence caused the plaintiffs likelihood of achieving a more favorable outcome to be diminished.

That is, the plaintiff must prove by a preponderance of the evidence that the physician's negligence caused the plaintiffs injury, where the injury consists of the diminished likelihood of achieving a more favorable medical outcome." ***

A significant number of states, however, have rejected the loss-of-chance theory of recovery in medical malpractice actions and instead adhere to a traditional "all-or-nothing approach." That approach requires the plaintiff to establish that the patient would have had a better than 50 percent chance of survival or a favorable outcome, which then triggers a right to recover all damages resulting from the defendant's malpractice. [Q] ***

The loss-of-chance theory also functions in the context of medical malpractice actions because, at least in some instances of alleged negligence, ample reliable scientific evidence about the statistical probability of various medical outcomes is available. [C] That is, the plaintiff can demonstrate, through the use of expert testimony, the statistical likelihood of a better medical outcome but for the negligent conduct.***

[The court then discussed several Oregon cases and concluded that they did not preclude the adoption of the loss-of-chance theory.]

In light of all those considerations, we conclude that a limited loss-of-chance theory of recovery should be recognized in common-law negligence cases involving medical malpractice in Oregon. Because this case was dismissed at the pleading stage, it presents only a limited opportunity to discuss the various aspects of such a claim and the considerations in litigating a medical malpractice claim in which the plaintiff alleges the loss of a chance at a recovery or better

medical outcome. However, we address some practical concerns that defendants and amici raise and provide some contours of that theory of recovery to provide guidance on remand.

First, as defendants and [amici] note, some jurisdictions that accept loss of chance as an injury require the plaintiff to establish that he or she lost a "substantial chance" of a better medical outcome due to the defendant's medical negligence. In this case, plaintiff alleges that he lost a 33 percent chance at no or limited complications from his stroke because of defendants' negligence. Although there are numerous reasons why the courts in those other jurisdictions have required the loss of a "substantial chance," we need not decide that issue in this case, because we conclude as a matter of law that, whether required or not, plaintiff has alleged the loss of a substantial chance by alleging a 33 percent chance of total or close to total recovery from his stroke had defendants provided him with non-negligent care.

307

Second, as defendants argue, fairness to defendants requires that plaintiff plead with specificity the lost chance of a better medical outcome. In practical terms, a plaintiff must plead the percentage and quality of his or her loss of chance, which in turn must be based on the plaintiff's experts and relevant scientific evidence that meets the standard of reasonable medical probability. ***

Third, as his complaint reflects, plaintiff has suffered the physical harm that he might well have avoided had he received proper medical care. That present adverse medical outcome is an essential element of a common-law medical malpractice claim and provides

the foundation for a calculation of plaintiffs damages. Most jurisdictions that have recognized loss of chance as a theory of injury in medical malpractice cases have an approach akin to that suggested by Professor King in the 1981 law review article cited above. That is, to paraphrase it, a plaintiff who demonstrates that a physician's negligence reduced his chance of a favorable medical outcome from 33 percent to zero percent could recover damages based on the unfavorable medical consequences suffered, but only to the possible extent of 33 percent of the damages resulting from the adverse medical outcome. ***

Although this court has not previously recognized loss of chance as a theory of recovery in a negligence case, we conclude that a loss of a substantial chance of a better medical outcome can be a cognizable injury in a common-law claim of medical malpractice in Oregon. Accordingly, we conclude that the trial court erred in dismissing plaintiffs claim.

The decision of the Court of Appeals is reversed. The judgment of the circuit court is reversed, and the case is remanded to the circuit court for further proceedings.

NOTES AND QUESTIONS

1. The principal case describes three ways that the states have responded to the situation where a defendant's medical malpractice has reduced patient's chance of recovery or of a better outcome, but not by enough so that the patient could prove that the medical malpractice, as opposed to the underlying disease or injury, caused death, disability, or other injury.

A few jurisdictions relax the traditional requirement and permit the patient to recover as long as the lost chance was a substantial factor in producing the harm. See, e.g., Hamil v. Bashline, 481 Pa. 256, 392 A.2d 1280 (1978) (discussed in the principal case); McKellips v. St. Francis Hosp., Inc., 741 P.2d 467, 471 (Okla. 1987) ("An evolving trend has developed to relax the standard for sufficiency of proof of causation ordinarily required of a plaintiff to provide a basis upon which the jury may consider causation in the 'lost chance of survival' cases"); and Pipe v. Hamilton, 274 Kan. 905, 56 P.3d 823 (2002) (holding that a 10% chance of survival satisfies the "substantial probability of survival" requirement). In such a case, how should the jury assess damages? If the jury finds that the malpractice was a substantial factor in bringing about the patient's death, does the physician pay the full

amount of the wrongful death damages? That is the approach taken by those jurisdictions. See DeBurkarte v. Louvar, 393 N.W.2d 131 (Iowa 1986) (criticizing those jurisdictions that permit the plaintiff to collect the full amount of the damages).

Like Oregon in the principal case, about half the states have followed Professor King's suggested approach of viewing the patient's injury as the loss of the opportunity for a better outcome, rather than as the death or worse outcome. In those jurisdictions, the patient is permitted to recover damages, but only a proportion of the full amount. See, e.g., McMackin v. Johnson Cty. Healthcare Ctr., 88 P.3d 491 (Wyo. 2004) (loss of chance to avoid fatal stroke attributed to defendants' negligence); Lord v. Lovett, 146 N.H. 232, 770 A.2d

1103 (2001) (loss of opportunity for substantially better outcome because defendants misdiagnosed spinal cord injury); Matsuyama v. Birnbaum, 452 Mass. 1, 890 N.E.2d 819 (2008) (recognizing loss of chance as injury and setting out steps by which jury should calculate portion of damages to be awarded as compensation); Mohr v. Grantham, 172 Wash.2d 844, 262 P.3d 490 (2011) (the injury is the lost chance); and Dickhoff v. Green, 836 N.W.2d 321 (Minn. 2013) (adopting "proportional recovery approach" in which jury is asked to determine the total amount of damages and the percentage by which the chance of a favorable outcome was reduced, with the damage award being a multiple of those numbers).

Many jurisdictions continue to require the traditional causation requirement. See, e.g., Kemper v. Gordon, 272 S.W.3d 146, 152 (Ky. 2009) (recognizing public policy arguments in favor of traditional causation rules and holding "there remains great wisdom in ensuring that our laws offer redress for those wronged by medical malpractice based on reasonable probabilities and substantial cause, not on chance and mere possibility"); Smith v. Parrott, 175 Vt. 375, 833 A.2d 843 (2003) (less than 50% chance of recovering from paralysis); Jones v. Owings, 318 S.C. 72, 456 S.E.2d 371 (1995) (less than 50% chance of surviving lung cancer reduced to 20% chance of survival); Fennell v. Southern Maryland Hosp. Center, 320 Md. 776, 580 A.2d 206 (1990) (40% chance of surviving acute bacterial meningitis lost due to failure to do lumbar puncture after CT Scan suggested inflammatory process); Marcantonio v. Moen, 406 Md. 395, 959 A.2d 764 (2008) (declining to revisit decision that loss of chance doctrine is not recognized in Maryland); Cohan v. Medical Imaging Consultants, 297 Neb. 568, 902 N.W.2d 98 (2017)

(declining to adopt doctrine); Hyde v. Martin, 264 So.3d 730 (Miss. 2019) (no recovery of damages for mere diminishment of the chance of recovery); Mich. Comp. Laws Ann. § 600.2912a(2) ("In an action alleging medical malpractice, the plaintiff has the burden of proving that he or she suffered an injury that more probably than not was proximately caused by the negligence of the defendant or defendants. In an action alleging medical malpractice, the plaintiff cannot recover for loss of an opportunity to survive or an opportunity to achieve a better result unless the opportunity was greater than 50%."); and S.D. Cod. L. § 20-9-1.1 (reversing judicial adoption of loss of chance doctrine and returning to traditional rule of causation).

2. For a general discussion of development of this area of law, see Restatement (Third) of Torts: Physical and Emotional Harm § 26, comment

n (2010); King, Causation, Valuation, and Chance in Personal Injury Torts Involving Preexisting Conditions and Future Consequences, 90 Yale L.J. 1353 (1981) (cited in the opinion of the principal case); King, "Reduction of Likelihood" Reformulation and Other Retrofitting of the Loss-of-a-Chance Doctrine, 28 U. Mem. L. Rev. 492 (1998) (author's proposed reformulation of doctrine after fifteen years of its development in the courts); and Noah, An Inventory of Mathematical Blunders in Applying the Loss-of-a-Chance Doctrine, 24 Review of Litigation 369 (2005).

3. Almost all of the loss of a chance cases involve medical malpractice. Should the doctrine extend beyond medical malpractice? Hardy v. Southwestern Bell Telephone Co., 910 P.2d

1024 (Okla. 1996) (declining to extend loss of chance doctrine to negligence action against telephone company for design flaw in 911 system that made it impossible for woman to reach 911 during her husband's heart attack due to volume of calls seeking purchase of Garth Brooks concert tickets); Lowmack v. Century Products Co., 139 F.3d 890 (4th Cir. 1998) (upholding trial court judge's prediction that Virginia would not extend loss of chance doctrine to negligent design claim against child car seat manufacturer); and Grant v. American National Red Cross, 745 A.2d 316 (D.C. App. 2000) (upholding summary judgment for defendant who had failed to use a screening test that plaintiff alleged had a 40% chance of identifying virus in blood transfusion because traditional "more likely than not" causation test rather than loss of a chance doctrine was applicable). It has been suggested that the estimates of likelihood based on scientific studies is not present in areas other than medical malpractice, making loss of a chance doctrine less appropriate in those areas.

4. Attorney Malpractice Cases. Establishing causation in fact can be a substantial burden in a suit against an attorney for professional negligence. An attorney fails to file a suit for his client before the statute of limitations runs. What must the client prove besides negligence? That the client would have won the original lawsuit? The amount of the damages the jury would have awarded in the original lawsuit? That the award in the original lawsuit was collectible? See Lehouillier & Associates, PC v. Gallegos, 434 P.3d 156 (Colo. 2019) (plaintiff must prove that judgment would have been collectible against radiologist by, for example, showing that he carried adequate malpractice insurance) and Schmidt v. Coogan, 181 Wash.2d 661,

335 P.3d 424 (2014) (noting that a majority of jurisdictions require plaintiff to prove that he would have won the case, how much the award would have been, and that the award was collectible, but agreeing with minority that defendant must plead and prove uncollectibility of judgment as affirmative defense); Paterek v. Petersen & Ibold, 118 Ohio St.3d 503, 890 N.E.2d 316 (2008) (accord, except that burden of proving award collectible is placed on plaintiffs); Akin, Gump, Strauss, Hauer & Feld, L.L.P. v. National Development and Research Corp., 299 S.W.3d 106 (Tex. 2009) (accord, and ruling that plaintiff must prove that judgment would have been collectible at time that it would have been entered). But see Vahila v. Hall, 77 Ohio St.3d 421, 674 N.E.2d 1164 (1997) (recognizing that proof of causation usually dictates that plaintiff prove merits of underlying litigation, but declining to adopt rule that plaintiff must show that she would have won and

recognizing that some plaintiffs may show that they suffered the damages of a less favorable result). See also Roumbos v. Samuel G. Vazanellis & Thiros and Stracci, PC, 95 N.E.3d 63 (Ind. 2018) (discussing burdens of proof for premises liability case within legal malpractice case).

5. Client company co-signed a ten-year lease on a building for one of its wholly owned subsidiaries and then later sold that subsidiary to another company. Client claims that it instructed the lawyers who represented it in the sale to negotiate to eliminate its contingent liability for rent on the building the subsidiary was using. Lawyers failed to do so, former subsidiary went bankrupt, and client was

forced to pay $2.6 million under the lease. How does the client prove that the lawyer's failure to try to negotiate the elimination of the contingent liability caused its loss? "Proof of causation is often difficult in legal malpractice cases involving representation in litigation--the vast majority of such cases--because it is so difficult, yet vital, to estimate what difference a lawyer's negligence made in the actual outcome of a trial or other adversary proceeding. ***Proof of causation is even more difficult in a negotiating situation, because while there is (at least we judges like to think there is) a correct outcome to most lawsuits, there is no 'correct' outcome to a negotiation. Not only does much depend on the relative bargaining skills of the negotiators, on the likely consequences to each party if the negotiations fall through, and on luck, so that the element of the intangible and the unpredictable looms large; but there is no single 'right' outcome in a bargaining situation even in principle. Every point within the range bounded by the lowest offer that one party will accept and the highest offer that the other party will make is a possible transaction or settlement point, and none of these points is 'correct' or 'incorrect.'" Nicolet Instrument Corp. v. Lindquist & Vennum, 34 F.3d 453, 455 (7th Cir.1994) (applying Wisconsin law). See also Viner v. Sweet, 30 Cal.4th 1232, 70 P.3d 1046,135 Cal.Rptr.2d 629 (2003) (discussing proof issues in transaction legal malpractice cases and noting that plaintiffs may use circumstantial evidence and are not limited to the testimony of their business adversaries to prove what other or additional terms the adversaries might have agreed to).

6. Suppose the attorney was negligent in failing to cite to the court relevant cases that might have avoided jail for his client. Should a

convicted criminal defendant who wants to recover for legal malpractice against his former lawyer have to prove that he is 1) actually innocent of the crime for which he was convicted or 2) that he was exonerated in post-conviction procedures or 3) neither? The jurisdictions are split. Compare Piris v. Kitching, 185 Wash.2d 856, 375 P.3d 627 (2016) (client must prove by preponderance of evidence that he was actually innocent of charge) and Humphries v. Detch, 227 W.Va. 627, 712 S.E.2d 795 (W.Va. 2011) (joining the majority of jurisdictions that require plaintiff show that he is actually innocent of the underlying criminal offense) with Trigg v. Farese, 266 So.3d 611 (Miss. 2019) (malpractice plaintiff must obtain judicial relief from her or his conviction before bringing legal malpractice action); Coscia v. McKenna & Cuneo, 25 Cal.4th 1194, 25 P.3d 670, 108 Cal.Rptr.2d 471 (2001) (client convicted of criminal offense must obtain reversal of conviction or other exoneration by post-conviction relief); and Paxman v. King, 448 P.3d 1199,

1201 (Utah 2019) ("Success in a post-conviction proceeding or evidence of actual innocence certainly may aid a client in proving causation or harm, as required to support a claim of legal malpractice arising out of the attorney's representation of the client in criminal proceedings, but neither will always be necessary."). See also Rantz v. Kaufman, 109 P.3d 132 (Colo. 2005) (client may pursue legal malpractice action against attorneys while pursuing post-conviction relief, but noting that a final determination on the ineffective assistance of counsel issue might have preclusive effect in malpractice action).

Daubert v. Merrell Dow Pharmaceuticals, Inc.

United States Court of Appeals, Ninth Circuit, 1995.

43 F.3d 1311.

KOZINSKI, J. On remand from the United States Supreme Court, we undertake "the task of ensuring that an expert's testimony both rests on a reliable foundation and is relevant to the task at hand." Daubert v. Merrell Dow Pharmaceuticals, Inc., 125 L. Ed. 2d 469, 113 S. Ct. 2786, 2799 (1993).

I

A. Background

Two minors brought suit against Merrell Dow Pharmaceuticals, claiming they suffered limb reduction birth defects because their mothers had taken Bendectin, a drug prescribed for morning sickness to about 17.5 million pregnant women in the United States between 1957 and 1982. [Cc] This appeal deals with an evidentiary question: whether certain expert scientific testimony is admissible to prove that Bendectin caused the plaintiffs' birth defects.

For the most part, we don't know how birth defects come about. We do know they occur in 2-3% of births, whether or not the expectant mother has taken Bendectin. [C] Limb defects are even rarer, occurring in fewer than one birth out of every 1000. [C] But scientists simply do not know how teratogens (chemicals known to cause limb reduction defects) do their damage: They cannot reconstruct the biological chain of events that leads from an expectant mother's

ingestion of a teratogenic substance to the stunted development of a baby's limbs. ***

Not knowing the mechanism whereby a particular agent causes a particular effect is not always fatal to a plaintiffs claim. Causation can be proved even when we don't know precisely how the damage occurred, if there is sufficiently compelling proof that the agent must have caused the damage somehow. One method of proving causation in these circumstances is to use statistical evidence. If 50 people who eat at a restaurant one evening come down with food poisoning during the night, we can infer that the restaurant's food probably contained something unwholesome, even if none of the dishes is available for analysis. This inference is based on the fact that, in our health-conscious society, it is

312

highly unlikely that 50 people who have nothing in common except that they ate at the same restaurant will get food poisoning from independent sources.

It is by such means that plaintiffs here seek to establish that Bendectin is responsible for their injuries. ***

The opinions proffered by plaintiffs' experts do not, to understate the point, reflect the consensus within the scientific community. The FDA--an agency not known for its promiscuity in approving drugs--continues to approve Bendectin for use by pregnant women because "available data do not demonstrate an association between birth defects and Bendectin." U.S. Department of Health and Human Services News, No. P80-45 (Oct. 7, 1980). Every published study here and abroad--and there have been many--concludes that

Bendectin is not a teratogen. In fact, apart from the small but determined group of scientists testifying on behalf of the Bendectin plaintiffs in this and many other cases, there doesn't appear to be a single scientist who has concluded that Bendectin causes limb reduction defects.

It is largely because the opinions proffered by plaintiffs' experts run counter to the substantial consensus in the scientific community that we affirmed the district court's grant of summary judgment the last time the case appeared before us. The standard for admissibility of expert testimony in this circuit at the time was the so-called Frye test: Scientific evidence was admissible if it was based on a scientific technique generally accepted as reliable within the scientific community. ***We found that the district court properly applied this standard, and affirmed. The Supreme Court reversed, holding that Frye was superseded by [the adoption of] Federal Rule of Evidence 702, 113 S. Ct. at 2794, and remanded for us to consider the admissibility of plaintiffs' expert testimony under this new standard.

B. Procedural Issues

***

[The Ninth Circuit decided the case did not need to be remanded to the trial court judge to make an initial determination of admissibility under the standard newly articulated by the Supreme Court and that the admissibility of one of the defendant's expert's affidavits, challenged by plaintiffs, was irrelevant.]

II

A. Brave New World

Federal judge's ruling on the admissibility of expert scientific testimony face a far more complex and daunting task in a post-Daubert world than before. The judge's task under Frye is relatively simple: to determine whether the method employed by the experts is generally accepted in the scientific community. [C] Under Daubert, we must engage in a difficult, two-part analysis. First, we must determine nothing less

313

than whether the experts' testimony reflects "scientific knowledge," whether their findings are "derived by the scientific method," and whether their work product amounts to "good science." [C] Second, we must ensure that the proposed expert testimony is "relevant to the task at hand," [c], i.e., that it logically advances a material aspect of the proposing party's case. The Supreme Court referred to this second prong of the analysis as the "fit" requirement. [C]

The first prong of Daubert puts federal judges in an uncomfortable position. The question of admissibility only arises if it is first established that the individuals whose testimony is being proffered are experts in a particular scientific field; here, for example, the Supreme Court waxed eloquent on the impressive qualifications of plaintiffs' experts. [C] Yet something doesn't become "scientific knowledge" just because it's uttered by a scientist; nor can an expert's self-serving assertion that his conclusions were "derived by the scientific method" be deemed conclusive [.] ***

The task before us is more daunting still when the dispute concerns matters at the very cutting edge of scientific research, where fact meets theory and certainty dissolves into probability. As the record in

this case illustrates, scientists often have vigorous and sincere disagreements as to what research methodology is proper, what should be accepted as sufficient proof for the existence of a "fact," and whether information derived by a particular method can tell us anything useful about the subject under study.

Our responsibility, then, unless we badly misread the Supreme Court's opinion, is to resolve disputes among respected, well-credentialed scientists about matters squarely within their expertise, in areas where there is no scientific consensus as to what is and what is not "good science," and occasionally to reject such expert testimony because it was not "derived by the scientific method." Mindful of our position in the hierarchy of the federal judiciary, we take a deep breath and proceed with this heady task.

B. Deus ex Machina

***

How do we figure out whether scientists have derived their findings through the scientific method or whether their testimony is based on scientifically valid principles? Each expert proffered by the plaintiffs assures us that he has "utilized the type of data that is generally and reasonably relied upon by scientists" in the relevant field, [c], and that he has "utilized the methods and methodology that would generally and reasonably be accepted" by people who deal in these matters, [c]. The [Supreme] Court held, however, that federal judges perform a "gatekeeping role," Daubert, 113 S. Ct. at 2798; to do so they must satisfy themselves that scientific evidence meets a certain standard of reliability before it is admitted. This means that the expert's bald assurance of

validity is not enough. Rather, the party presenting the expert must show that the expert's findings are based on sound science, and this will require some objective, independent validation of the expert's methodology.

While declining to set forth a "definitive checklist or test," [c], the [Supreme] Court did list several factors federal judges can consider in determining whether to admit expert scientific testimony under Fed. R. Evid. 702: whether the theory or technique employed by the expert is generally accepted in the scientific community; whether it's been subjected to peer review and publication; whether it can be and has been tested; and whether the known or potential rate of error is acceptable, [c] We read these factors as illustrative rather than exhaustive; similarly, we do not deem each of them to be equally applicable (or applicable at all) in every case. Rather, we read the Supreme Court as instructing us to determine whether the analysis undergirding the experts' testimony falls within the range of accepted standards governing how scientists conduct their research and reach their conclusions.

One very significant fact to be considered is whether the experts are proposing to testify about matters growing naturally and directly out of research they have conducted independent of the litigation, or whether they have developed their opinions expressly for purposes of testifying. That an expert testifies for money does not necessarily cast doubt on the reliability of his testimony, as few experts appear in court merely as an eleemosynary gesture. But in determining whether proposed expert testimony amounts to good science, we

may not ignore the fact that a scientist's normal workplace is the lab or the field, not the courtroom or the lawyer's office. ***

We have examined carefully the affidavits proffered by plaintiffs' experts, as well as the testimony from prior trials that plaintiffs have introduced in support of that testimony, and find that none of the experts based his testimony on preexisting or independent research. While plaintiffs' scientists are all experts in their respective fields, none claims to have studied the effect of Bendectin on limb reduction defects before being hired to testify in this or related cases.

If the proffered expert testimony is not based on independent research, the party proffering it must come forward with other objective, verifiable evidence that the testimony is based on "scientifically valid principles." One means of showing this is by proof that the research and analysis supporting the proffered conclusions have been subjected to normal scientific scrutiny through peer review and publication. ***

Peer review and publication do not, of course, guarantee that the conclusions reached are correct; much published scientific research is greeted with intense skepticism and is not borne out by further research. But the test under Daubert is not the correctness of the expert's conclusions but the soundness of his methodology. ***That the research is accepted for publication in a reputable scientific journal after being

subjected to the usual rigors of peer review is a significant indication that it is taken seriously by other scientists, i.e., that it meets at least the minimal criteria of good science. Daubert, 113 S. Ct. at 2797

("scrutiny of the scientific community is a component of 'good science'"). If nothing else, peer review and publication "increase the likelihood that substantive flaws in methodology will be detected." [7]

* * *

[7] For instance, peer review might well have brought to light the more glaring arithmetical errors in the testimony presented by plaintiffs' experts in other Bendectin cases. See DeLuca v. Merrell Dow Pharmaceuticals, Inc., 791 F. Supp. 1042, 1048 (D.N.J. 1992), aff'd, 6 F.3d 778 (3d Cir.1993).

Bendectin litigation has been pending in the courts for over a decade, yet the only review the plaintiffs' experts' work has received has been by judges and juries, and the only place their theories and studies have been published is in the pages of federal and state reporters. (Footnote omitted.) None of plaintiffs' experts has published his work on Bendectin in a scientific journal or solicited formal review by his colleagues. Despite the many years the controversy has been brewing, no one in the scientific community--except defendant's experts--has deemed these studies worthy of verification, refutation or even comment. It's as if there were a tacit understanding within the scientific community that what's going on here is not science at all, but litigation. [9]

* * *

[9] There may well be good reasons why a scientific study has not been published. For example, it may be too recent or of insufficiently broad interest. [C] These reasons do not apply here. Except with respect to the views expressed in this litigation, plaintiffs' experts have been well-published, see, e.g., Crescitelli Aff. at 3 (authored

125 formal papers, 80-100 short notes or abstracts, a half-dozen reviews, and articles concerning antihistamines and related compounds), and the opinions they proffer, if supported by sound methodology, would doubtless be greedily devoured by the machinery of peer review. A conclusion that Bendectin causes birth defects would be of significant public interest both in this country (where millions of women have taken Bendectin and the FDA continues to approve its use) and abroad (where Bendectin is still widely used). That plaintiffs' experts have been unable or unwilling to publish their work undermines plaintiffs' claim that the findings these experts proffer are "grounded in the methods and procedures of science" and "derived by the scientific method." [C]

Establishing that an expert's proffered testimony grows out of pre-litigation research or that the expert's research has been subjected to peer review are the two principal ways the proponent of expert testimony can show that the evidence satisfies the first prong of Rule 702. Where such evidence is unavailable, the proponent of expert scientific testimony may attempt to satisfy its burden through the testimony of its own experts. For such a showing to be sufficient, the experts must explain precisely how they went about reaching their conclusions and point to some objective source--a learned treatise, the policy statement of a professional association, a published article in a reputable scientific journal or the like--to show that they have followed the scientific method, as it is practiced by (at least) a recognized minority of scientists in their field. [C]

Plaintiffs have made no such showing. ***We've been presented with only the experts' qualifications, their conclusions and their assurances of reliability. Under Daubert, that's not enough. ***

Were this the only question before us, we would be inclined to remand to give plaintiffs an opportunity to submit additional proof that the scientific testimony they proffer was "derived by the scientific method." Daubert, however, establishes two prongs to the Rule 702 admissibility inquiry. [C] We therefore consider whether the testimony satisfies the second prong of Rule 702: Would plaintiffs' proffered scientific evidence "assist the trier of fact to... determine a fact in issue"? Fed. R. Evid. 702.

C. No Visible Means of Support

In elucidating the second requirement of Rule 702, Daubert stressed the importance of the "fit" between the testimony and an issue in the case: "Rule 702's 'helpfulness' standard requires a valid scientific connection to the pertinent inquiry as a precondition to admissibility." 113 S. Ct. at 2796. Here, the pertinent inquiry is causation. In assessing whether the proffered expert testimony "will assist the trier of fact" in resolving this issue, we must look to the governing substantive standard, which in this case is supplied by California tort law.

Plaintiffs do not attempt to show causation directly; instead, they rely on experts who present circumstantial proof of causation. Plaintiffs' experts testify that Bendectin is a teratogen because it causes birth defects when it is tested on animals, because it is similar in chemical structure to other suspected teratogens, and because statistical studies show that Bendectin use increases the risk of birth defects. Modern tort law permits such proof, but plaintiffs must nevertheless carry their traditional burden; they must prove that their injuries were

the result of the accused cause and not some independent factor. In the case of birth defects, carrying this burden is made more difficult because we know that some defects--including limb reduction defects--occur even when expectant mothers do not take Bendectin, and that most birth defects occur for no known reason.

California tort law requires plaintiffs to show not merely that Bendectin increased the likelihood of injury, but that it more likely than not caused their injuries. [C] In terms of statistical proof, this means that plaintiffs must establish not just that their mothers' ingestion of Bendectin increased somewhat the likelihood of birth defects, but that it more than doubled it--only then can it be said that Bendectin is more likely than not the source of their injury. Because the background rate of limb reduction defects is one per thousand births, plaintiffs must show that among children of mothers who took Bendectin the incidence of such defects was more than two per thousand. [13]

* * *

[13] No doubt, there will be unjust results under this substantive standard. If a drug increases the likelihood of birth defects, but doesn't more than double it, some plaintiffs whose injuries are attributable to the drug will be unable to recover. There is a converse unfairness under a regime that allows recovery to everyone that may have been affected by the drug. Under this regime, all potential plaintiffs are entitled to recover, even though most will not have suffered an injury that can be attributed to the drug. One can conclude from this that unfairness is inevitable when our tools for detecting causation are imperfect and we must rely on probabilities

rather than more direct proof. In any event, this is a matter to be sorted out by the states, whose substantive legal standards we are bound to apply. [C]

317

None of plaintiffs' epidemiological experts claims that ingestion of Bendectin during pregnancy more than doubles the risk of birth defects. ***While plaintiffs' epidemiologists make vague assertions that there is a statistically significant relationship between Bendectin and birth defects, none states that the relative risk is greater than two. These studies thus would not be helpful, and indeed would only serve to confuse the jury, if offered to prove rather than refute causation. A relative risk of less than two may suggest teratogenicity, but it actually tends to disprove legal causation as it shows that Bendectin does not double the likelihood of birth defects. ***

[W]hat plaintiffs must prove is not that Bendectin causes some birth defects, but that it caused their birth defects. To show this, plaintiffs' experts would have had to testify either that Bendectin actually caused plaintiffs' injuries (which they could not say) or that Bendectin more than doubled the likelihood of limb reduction birth defects (which they did not say).

As the district court properly found below, "the strongest inference to be drawn for plaintiffs based on the epidemiological evidence is that Bendectin could possibly have caused plaintiffs' injuries." ***Plaintiffs do not quantify this possibility, or otherwise indicate how their conclusions about causation should be weighted, even though the substantive legal standard has always required proof of causation by a preponderance of the evidence. Unlike these experts' explanation

of their methodology, this is not a shortcoming that could be corrected on remand; plaintiffs' experts could augment their affidavits with independent proof that their methods were sound, but to augment the substantive testimony as to causation would require the experts to change their conclusions altogether. Any such tailoring of the experts' conclusions would, at this stage of the proceedings, fatally undermine any attempt to show that these findings were "derived by the scientific method." Plaintiffs' experts must, therefore, stand by the conclusions they originally proffered, rendering their testimony inadmissible under the second prong of Fed. R. Evid. 702.

Conclusion

The district court's grant of summary judgment is AFFIRMED.

NOTES AND QUESTIONS

1. Before you tackle the substantive issues in this case, make sure you understand its procedural posture. What is the question before the Ninth Circuit? What route did the case take to get to this point? What happens next in the case?

2. Daubert was one of the most closely watched cases on the issue of the admissibility of scientific causation evidence that has arisen in the last

few decades. What courts (besides federal courts in the Ninth Circuit) are bound by the Supreme Court's decision in the case? Would Daubert apply in a case filed in state court? Many, but not all, states have adopted a Daubert- like approach for their own courts. See, most recently, In re Accutane Litigation, 234 N.J. 340, 191 A.3d

560 (2018) and In re Amendments to the Florida Evidence Code, 278 So.3d 551 (Fla. 2019).

3. Judge Kozinski notes that judges, not trained in science, must evaluate scientific evidence. In a case that turned on the question whether the claimant's Parkinson's disease was caused by exposure to manganese, Judge Sutton explained why judges are charged with this responsibility:

"The sort of hypothesis Dr. Carlini presented can play a valuable role both in medicine, where, if the costs of action are low, doctors may want to act on hypotheses without further support, and in science generally, where all discoveries start as untested hypotheses. From this perspective, criticizing Dr. Carlini's hypothesis for being speculative would be like criticizing a sapling for being short. Some hypotheses become scientific theories and others do not.

But that is not the issue. The issue is the reliability of his opinion from a legal perspective. And what science treats as a useful but untested hypothesis the law should generally treat as inadmissible speculation. As the Supreme Court has explained, "[t]he scientific project is advanced by broad and wide-ranging considerations of a multitude of hypotheses, for those that are incorrect will eventually be shown to be so.... Conjectures... are of little use, however, in the project of reaching a quick, final, and binding legal judgment--often of great consequence--about a particular set of events in the past." Daubert, 509 U.S. at 597, 113 S.Ct. 2786....

This is an imperfect system, to be sure. Both sides agree that Mr. Tamraz is a good man who suffers from a terrible disease; we now force him to take the chance of prevailing at trial a second time, with

less evidence than before [because Dr. Carlini's testimony is excluded]. If he does not, yet it turns out ten years from now that manganese causes his disease, that result will seem unfair. But the alternative route--allowing the law to get ahead of science--would be just as unfair. Such an approach would destroy jobs and stifle innovation unnecessarily.... [S]ee also, e.g., Gina Kolata, Panel Confirms No Major Illness Tied to Implants, N.Y. Times, June 21, 1999, at Al (describing how scientists concluded, after years of litigation, billions in settlements and the bankruptcy of a major manufacturer, that no evidence tied breast implants to health problems). Rule 702 at all events has drawn the line for us, and we must enforce it."

Tamraz v. Lincoln Elec. Co., 620 F.3d 665, 677--678 (6th Cir. 2010).

4. Does the court's gatekeeper function apply only to novel scientific theories? In Kumho Tire Co. v. Carmichael, 526 U.S. 137 (1999), the

Supreme Court resolved a split among the circuits and ruled that the gatekeeper function applied to all expert testimony, not just scientific testimony. Thus, in that case, the trial court judge had to decide whether the opinion of a tire failure analyst was based on reliable methodology. See also Barabin v. AstenJohnson, Inc., 740 F.3d 457, 464 (9th Cir. 2014) ("Just as the district court cannot abdicate its role as gatekeeper, so too must it avoid delegating that role to the jury.")

5. Why does the opinion talk about California tort law?

6. Notice the parallel between the proposed testimony of some of plaintiffs' experts in this case and the plaintiff's expert in Kramer

Service, Inc. v. Wilkins, page 299: Bendectin or a cut could cause the harm, not it did cause the harm.

7. Some courts refer to the causation analysis in toxic substance exposure cases as having two steps, proof of general causation (toxin is capable of causing the medical condition or ailment) and proof of specific causation (exposure to toxin caused this plaintiffs condition). See, for example, Terry v. Caputo, 115 Ohio St.3d 351, 875 N.E.2d 72 (2007) (adopting analysis for Ohio and collecting cases from other jurisdictions in case involving exposure to mold) and Richards v. Copes-Vulcan, Inc., 213 A.3d 1196 (Del. 2019) (applying Ohio law in an asbestos case). Thus, in the absence of direct proof of causation, establishing causation in fact against a defendant requires scientifically reliable proof that the plaintiff's exposure to the defendant's product more than doubled his risk of contracting the disease through epidemiological studies or similarly reliable scientific testimony. Plaintiff then must show that his own exposure was comparable to that of the subjects of the studies. See, for example, Bostic v. Georgia- Pacific Corp., 439 S.W.3d 332 (Tex. 2014) (asbestos exposure) and Sugarman v. Liles, 460 Md. 396, 190 A.3d 344 (2018) (lead paint exposure).

8. In the principal case, footnote 13 of the opinion alludes to an issue with which the courts have been struggling. In cases involving exposure to other drugs or chemicals, unlike in the principal case, there may be clear evidence that a particular substance increases the risk of harm. That is, the experts generally agree that exposure to the substance increases the incidence of a particular disease. Application of the traditional preponderance rule to such cases may result in unfairness to both plaintiffs and defendants. Do you see

why? Suppose expert testimony established that the incidence of a particular birth defect in the general population was 4 births per 1000 and that it was 6 births per 1000 in the population of those exposed to a toxic substance. Assume that the testimony would show that this is a statistically significant difference. A plaintiff with a birth defect would have difficulty proving to the court that his particular birth defect was caused by the toxic substance and was not one of the four naturally occurring. (As Judge Kozinski noted, plaintiff would be unable to do that in California.) On the other hand, if the tort system requires the defendant to compensate each person born with a birth defect, the defendant is paying for three times the risk created by producing the toxic substance. See Rubanick v. Witco Chemical Corp., 125 N.J. 421, 593 A.2d 733 (1991) (adopting a broadened standard for determining the reliability and admissibility of scientific

theories of causation in toxic tort cases). See also, Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 28, comment c and Reporters' Note thereto discussing various approaches to proving causation in toxic exposure cases. Finally, although California and other jurisdictions require plaintiff to show that the risk was doubled by the defendant's conduct, this use of the statistic to establish a threshold might not meet the approval of the epidemiologists. See, for example, McIvor, The "Doubles the Risk" Test for Causation and Other Related Judicial Misconceptions about Epidemiology," in Tort Law: Challenging Orthodoxy (Hart 2013) and Restatement (Third) of Torts § 28(a), comment c (4) (2010).

9. Generally, a plaintiff in a tort case must establish causation by a preponderance of the evidence. In claims made in no-fault systems like worker compensation or in proceedings setting governmental safety standards, however, the burden of establishing causation may be lower than preponderance of the evidence. See, e.g., McAllister v. Workmen's Compensation Appeals Bd., 69 Cal.2d 408, 445 P.2d 313, 71 Cal.Rptr. 697 (1968) ("reasonable probability" enough to show that firefighter's lung cancer was caused by repeated inhalation of smoke during career); CSX Transp., Inc. v. McBride, 131 S.Ct. 2360 (U.S. 2011) (to establish liability under FELA, a railroad worker need not satisfy the common-law proximate cause standard but, instead, need only demonstrate that the railroad's negligence played a part, no matter how small, in bringing about the injury); Philadelphia v. Workers' Compensation Appeal Board, 195 A.3d 197 (Pa. 2018) (firefighter claiming workers' compensation benefits must produce evidence that it is possible that the carcinogen caused the type of cancer with which the firefighter is afflicted, not that it actually caused it); and Industrial Union Dept., AFL-CIO v. American Petroleum Inst., 448 U.S. 607, 655--656 (1980) (OSHA "has no duty to calculate the exact probability of harm" or "to support its finding that a significant risk exists with anything approaching scientific certainty" in setting standards for workplace exposure to toxic substances).

3. Concurrent Causes

Hill v. Edmonds

Supreme Court of New York, Appellate Division, 1966.

26 A.D.2d 554, 270 N.Y.S.2d 1020.

MEMORANDUM BY the Court. In a negligence action to recover damages for personal injury, plaintiff appeals from a judgment of the Supreme Court, Queens County, entered June 21, 1965, which dismissed the complaint as against defendant Bragoli upon the court's decision at the close of plaintiff's case upon a jury trial. ***

At the close of plaintiff's case the court dismissed the complaint against the owner of a tractor truck who on a stormy night left it parked without lights in the middle of a road where the car in which plaintiff was a passenger collided with it from the rear. From the testimony of the driver of the car the court concluded that she was guilty of negligence

321

and was solely responsible for the collision. That testimony was that she saw the truck when it was four car lengths ahead of her and that she saw it in enough time to turn. At other points, however, she indicated that she did not know just what happened, that she swerved to avoid the truck, "and the next thing I knew I woke up. I was unconscious." Assuming, arguendo, that she was negligent, the accident could not have happened had not the truck owner allowed his unlighted vehicle to stand in the middle of the highway. Where separate acts of negligence combine to produce directly a single injury each tortfeasor is responsible for the entire result, even though his act alone might not have caused it. [Cc] Accordingly, the complaint against the truck owner must be reinstated and a new trial had.

NOTES AND QUESTIONS

1. As a horse-drawn street car stopped for a railroad crossing, the railroad's employee negligently raised the crossing gates, even though a train was approaching. The street car driver negligently proceeded onto the crossing without looking, whereupon the railroad employee lowered the gates, shutting in the street car on the railroad track. Passengers on the street car, seeing the train coming, stampeded in panic, and plaintiff, one of the passengers, was pushed off of the car and injured. Who is liable? Washington & Georgetown R. Co. v. Hickey, 166 U.S. 521 (1897) (upholding jury verdict against both defendants).

2. Plaintiffs horse fell into an excavation made by a traction company building a street car line and left unguarded at night. It scrambled out, and promptly fell into a second and nearby excavation, left in the street by the town authorities. After it climbed out again, and in consequence of both falls, the horse took fright and ran away. The horse was injured and the wagon was broken. The traction company and the town were acting independently. Carstesen v. Stratford, 67 Conn. 428, 35 A. 276 (1896) (each could be liable for the entire damage).

3. Law firm failed to provide documentation to a Tahitian court (part of the French judicial system) of the consideration its client paid for an assignment and the court erroneously ruled that the assigned subrogation claim was not enforceable under French law without a demonstration that it would not result in "double compensation." Client then filed a legal malpractice case against law firm. Law firm argued that court's incorrect ruling rather than its own failure to act was the proximate cause of the client's loss. Kiribati Seafood Co., LLC v. Dechert LLP, 478 Mass. lll, 83 N.E.3d 798 (Mass. 2017) (a

reasonable finder of fact could conclude that there were two concurrent causes of client's loss: law firm's negligence in failing to furnish the court with proof of the consideration paid for the assignment and the court's error of law in finding the subrogation claim unenforceable without it).

322

Anderson v. Minneapolis, St. P. & S. St. M. Ry. Co.

Supreme Court of Minnesota. 1920.

146 Minn. 430, 179 N.W. 45.

LEES, C. This is a fire case brought against the defendant railway company. ***Plaintiff had a verdict. The appeal is from an order denying a motion in the alternative for judgment notwithstanding the verdict or for a new trial. ***

[A forest fire, which originated in a bog and was found by the jury to have been caused by the negligence of the defendant, swept over a large area. It merged with another fire of independent and uncertain origin, and the combined fires burned over plaintiff's property. The defendant contends that the following instruction to the jury was in error:]

"If the plaintiff was burned out by some fire other than the bog fire, which other fire was not set by one of the defendant's engines, then, of course, defendant is not liable. ***If plaintiff was burned out by fire set by one of the defendant's engines in combination with some other fire not set by any of its engines, then it is liable.

"If you find that other fire or fires not set by one of defendant's engines mingled with one that was set by one of the defendant's engines, there may be difficulty in determining whether you should find that the fire set by the engine was a material or substantial element in causing plaintiffs damage. If it was, the defendant is liable, otherwise it is not. * * w

"If you find that the bog fire was set by the defendant's engine and that some greater fire swept over it before it reached the plaintiffs land, then it will be for you to determine whether that bog fire ***was a material or substantial factor in causing plaintiffs damage. If it was ***the defendant is liable. If it was not, the defendant is not liable."

The following proposition is stated in defendant's brief and relied on for reversal:

"If plaintiff's property was damaged by a number of fires combining, one ***being the fire pleaded ***the others being of no responsible origin, but of such sufficient or superior force that they would have produced the damage to plaintiff's property regardless of the fire pleaded, then defendant was not liable."

This proposition is based on Cook v. Minneapolis, St. P. & S.S.M. Ry. Co., 98 Wis. 624, 74 N.W. 561. ***If the Cook case merely declares that one who negligently sets a fire is not liable if another's property is damaged, unless it is made to appear that the fire was a material element in the destruction of the property, there can be no question about the soundness of the decision. But if it decides that if such fire combines with another of no responsible origin, and after the union of the two fires they destroy the property, and either fire independently of the other would

have destroyed it, then irrespective of whether the first fire was or was not a material factor in the destruction of the property, there is no liability, we are not prepared to adopt the doctrine as the law of this state. If a fire set by the engine of one railroad company unites with a fire set by the engine of another company, there is joint and several liability, even though either fire would have destroyed plaintiff's property. But if the doctrine of the Cook case is applied and one of the fires is of unknown origin, there is no liability. ***[T]here [should] be liability in such a case. We, therefore hold that the trial court did not err in refusing to instruct the jury in accordance with the rule laid down in the Cook case. ***

We find no error requiring a reversal, and hence the order appealed from is affirmed.

NOTES AND QUESTIONS

1. As plaintiff was driving his horse and wagon down a narrow road, two motorcycles, independently operated by two defendants, roared past him, one on each side. The horse took fright and ran away, and plaintiff was injured. Either motorcycle alone would have been sufficient to frighten the horse. Who is liable? Corey v. Havener, 182 Mass. 250, 65 N.E. 69 (1902).

2. A stabs B with a knife. C fractures B's skull with a rock. Either injury would be fatal. B dies. Who is liable for his death? See these criminal law cases on the issue of concurrent causation. Wilson v. State, 24 S.W. 409 (Tex.Cr.App. 1893); People v. Lewis, 124 Cal. 551, 57 P. 470 (1899). Should the answer be the same in criminal and tort law? See also Restatement (Third) of Torts: Liability for

Physical and Emotional Harm § 27 Multiple Sufficient Causes (2010).

3. While plaintiff is suffering from terminal cancer, he is negligently hit by defendant's automobile and killed. How does this case differ from the principal case and those cited in note 2? See Follett v. Jones, 252 Ark. 950, 481 S.W.2d 713 (1972). Plaintiff is standing in the path of an avalanche when defendant negligently shoots and kills him. Or plaintiff is about to embark for Europe on a ship, when defendant negligently shoots and kills him; a week later the ship runs into an iceberg and sinks with everyone on board. Is the result the same? Teenager is sitting on the top of a bridge when he leans over, loses his balance, and falls. As he fell, he reached out instinctively and grabbed a wire that brought electricity for the lights on the bridge at night. Due to defendant's negligence, he was electrocuted when he touched the wire. Evidence showed that he would have been killed or seriously injured in the fall if he had not been electrocuted. What damages did the defendant cause? Dillon v. Twin State Gas & Elec. Co., 85 N.H. 449, 163 A. lll (1932) (jury must decide his probable future but for the touching of the live wire). See Peaslee, Multiple Causation and Damage, 47 Harv. L. Rev. 1127 (1934); King, Causation, Valuation and Chance in Personal Injury Torts Involving Preexisting Conditions and Future Consequences, 90 Yale L.J. 1353 (1981); Stapleton, Choosing What We Mean by "Causation" in the Law, 73 Mo. L. Rev. 433 (2008).

4. The "substantial factor" test would retain "but for" causation as an essential precondition except in situations, such as the principal

case, in which two or more actively operating forces, for only one of which the defendant was responsible, combine to bring about the harm, while each alone would have been sufficient to bring about the harm. See Restatement (Second) of Torts §§ 431--433 (1965) and Restatement (Third) of Torts: Liability for Physical and Emotional Harm §§ 27 and 36 (2010). "Substantial factor" was taken by the trial judge in the Anderson case from an article by Jeremiah Smith, Legal Cause in Actions of Tort, 25 Harv. L. Rev. 103, 223, 229 (1911). It obviously has the advantage of eliminating cases in which the defendant has made a proved, but insignificant, contribution to the result--as where he throws a lighted match into a forest fire. See generally Fischer, Causation in Fact in Omission Cases, 1992 Utah L. Rev. 1335 (discussing difficult proof problems in cases involving a party's failure to act to prevent harm).

5. California has clarified the use of the "but for" test and "substantial factor" test in its jury instructions, noting that the "but for" test remains operable for all negligence cases except those involving concurrent independent causes, where the "substantial factor" test should be used. Viner v. Sweet, 30 Cal.4th 1232, 70 P.3d 1046, 135 Cal.Rptr.2d 629 (2003). Virginia has disapproved, in a mesothelioma case, the use of the term "substantial contributing factor," noting that jurors might hear it either to require something just more than de minimus or to require a higher than the ordinary standard of proof. Ford Motor Co. v. Boomer, 285 Va. 141, 736 S.E.2d 724, 732 (2013) ("The exposure must have been 'a' sufficient cause: if more than one party caused a sufficient exposure, each is responsible. Other sufficient causes, whether innocent or arising from negligence, do not provide a defense.")

6. Over his forty-year career as a pipe fitter at a shipyard in Baltimore, worker was exposed to many different types of products containing asbestos manufactured by many different defendants. What evidence does he have to produce against each defendant so that a reasonable jury could conclude exposure to that defendant's product was a substantial factor in bringing about his asbestosis? See Lohrmann v. Pittsburgh Corning Corp., 782 F.2d 1156, 1162 (4th Cir. 1986) (applying Maryland law) ("To support a reasonable inference of substantial causation from circumstantial evidence, there must be evidence of exposure to a specific product on a regular basis over some extended period of time in proximity to where the plaintiff actually worked.") Many jurisdictions use this frequency, regularity, proximity test in toxic exposure cases involving multiple possible defendants and substances for evaluating whether the plaintiff can survive a motion for summary judgment or for a directed verdict and get his case before the jury. See, for example, Holcomb v. Georgia Pacific, LLC, 289 P.3d 188 (Nev. 2012) (asbestos and mesothelioma); Smith v. Union Carbide Corp., 130 So.3d 66 (Miss. 2013) (asbestos and lung cancer) (to be applied at summary judgment or directed verdict stage--not a question of fact for jury); and Rost v. Ford Motor Co., 637 Pa. 625, 151 A.3d 1032 (2016) (asbestos and mesothelioma). Worker's job is to clean and recondition fifty-five gallon drums that had been

used to transport petroleum products and other chemicals. Neither his employer nor the owners of the drums warned him of the risks associated with inhaling fumes from the drums. He developed stomach and liver cancer. His expert witness will testify that several

of the chemicals to which he was exposed are carcinogens, each of which could have caused his cancer. Should the frequency, regularity, proximity test be extended to this situation? James v. Bessemer Processing Co., Inc., 155 N.J. 279, 714 A.2d 898 (1998) (yes). What if there is only one of the defendants before the court? Should that defendant be able to introduce evidence that plaintiff was exposed to the asbestos products of others who are not present? Nolan v. Weil-McLain, 233 III.2d 416, 331 III.Dec. 140, 910 N.E.2d 549 (2009) (sending back for a new trial because trial court had excluded evidence of exposure caused by non- parties that defendant sought to introduce to show that it was not a substantial factor in causing plaintiffs mesothelioma).

4. Problems in Determining Which Party Caused the Harm

Summers v. Tice

Supreme Court of California, 1948.

33 Cal.2d 80, 199P.2dl.

Actions by Charles A. Summers against Harold W. Tice and against Ernest Simonson for negligently shooting plaintiff while hunting. From judgments for plaintiff, defendants appeal, and the appeals were consolidated pursuant to stipulation.

[Plaintiff and the two defendants were members of a hunting party. Both defendants negligently fired, at the same time, at a quail and in the plaintiff's direction. Plaintiff was struck in the eye by a shot from one gun. There was no other satisfactory evidence.]

CARTER, J. ***The problem presented in this case is whether the judgment against both defendants may stand. It is argued by defendants that they are not joint tort feasors, and thus jointly and severally liable, as they were not acting in concert, and that there is not sufficient evidence to show which defendant was guilty of the negligence which caused the injuries--the shooting by Tice or that by Simonson. ***The one shot that entered plaintiffs eye was the major factor in assessing damages and that shot could not have come from the gun of both defendants. It was from one or the other only.

It has been held that where a group of persons are on a hunting party, or otherwise engaged in the use of firearms, and two of them are negligent in firing in the direction of a third person who is injured thereby, both of those so firing are liable for the injury suffered by the third person, although the negligence of only one of them could have caused the injury. ***

326

These cases speak of the action of defendants as being in concert as the ground of decision, yet it would seem they are straining that concept and the more reasonable basis appears in Oliver v. Miles, 144 Miss. 852, 110 So. 666. There two persons were hunting together. Both shot at some partridges and in so doing shot across the highway injuring plaintiff who was traveling on it. The court stated they were acting in concert and thus both were liable. The court then stated: "We think that ***each is liable for the resulting injury to the boy, although no one can say definitely who actually shot him. To hold otherwise would be to exonerate both from liability, although

each was negligent, and the injury resulted from such negligence." [Emphasis added.] ***

When we consider the relative position of the parties and the results that would flow if plaintiff was required to pin the injury on one of the defendants only, a requirement that the burden of proof on that subject be shifted to defendants becomes manifest. They are both wrongdoers--both negligent toward plaintiff. They brought about a situation where the negligence of one of them injured the plaintiff, hence it should rest with them each to absolve himself if he can. The injured party has been placed by defendants in the unfair position of pointing to which defendant caused the harm. If one can escape the other may also and plaintiff is remediless. Ordinarily defendants are in a far better position to offer evidence to determine which one caused the injury. This reasoning has recently found favor in this Court. ***

[T]he same reasons of policy and justice shift the burden to each of defendants to absolve himself if he can--relieving the wronged person of the duty of apportioning the injury to a particular defendant, apply here where we are concerned with whether plaintiff is required to supply evidence for the apportionment of damages. If defendants are independent tort feasors and thus each liable for the damage caused by him alone, and, at least, where the matter of apportionment is incapable of proof, the innocent wronged party should not be deprived of his right to redress. The wrongdoers should be left to work out between themselves any apportionment. ***

The judgment is affirmed.

NOTES AND QUESTIONS

1. In accord, on similar facts, Cook v. Lewis, [1952] 1 Dom.L.Rep. 1, [1951] S.C.Rep. 830. The Restatement (Second) of Torts § 433B and Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 28(b) have approved the rule. But see Leuer v. Johnson, 450 N.W.2d 363 (Minn. 1990) (on similar facts, granting summary judgment to defendants because plaintiff could not prove that it was more likely than not that either had been the one whose shot hit him).

2. As plaintiff got out of her car to purchase some tomatoes, she was approached by two dogs, both of which barked and snapped at her. Trying to get away and return to her car, she turned her back and was bitten by one of them.

327

The incident took place on the common driveway between the homes of next door neighbors who allowed their two dogs, which were of similar size and appearance, to run freely between their two properties. Plaintiff filed suit against both dog owners, but is unable to identify which dog bit her. Should the trial court judge enter summary judgment for the owners? Hood v. Hagler, 606 P.2d 548 (Okla. 1979) (court relied upon principal case to shift burden of proof to defendant owners to prove that his dog was not the one.) Suppose the defendants produce evidence that the neighbor across the street has two dogs of a similar breed that they have had to chase away from their property on numerous occasions? Which parties should have to prove what?

3. In the middle of the night, three teenagers entered an abandoned mill, wandered around the structure drinking alcohol and smoking cigarettes, and discarded their cigarettes by tossing them onto the wooden floor of the mill without extinguishing them. Within half an hour of their departure, the mill was engulfed in flames. Plaintiff sued all three teenagers but cannot prove which teenager's cigarette caused the fire. Conn. Interlock Risk Mgt. Agency v. Jackson, 333 Conn. 206, 214 A.3d 841 (2019) (court relied upon principal case and Restatements Second and Third to adopt alternative liability doctrine and shift burden to each defendant to prove he did not cause the fire). Suppose the teenagers testify that they saw signs that someone had been sleeping rough in the abandoned mill. Which parties would have to prove what?

4. Two automobiles, negligently driven by A and B, collide. Immediately, a car negligently driven by C piles into the wreck. Somewhere in the process plaintiff, a passenger in A's car, is killed. There is no other evidence. What result? Cummings v. Kendall, 41 Cal.App.2d 549, 107 P.2d 282 (1940); Murphy v. Taxicabs of Louisville, Inc., 330 S.W.2d 395 (Ky.1959). See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 28 comment k, illustration 10. (Jury should be instructed that if it finds the injury was the result of both collisions, all defendants would be liable for the entirety of the harm. If it finds that injury was the result of one collision, burden shifts to each defendant to prove his negligence was not the cause. If no defendant can meet his burden of proof, the defendants are all liable.)

5. Should it make any difference in the principal case if plaintiff sues only one defendant, without joining the other? What if there had

been ten hunters in the principal case and plaintiff only joined two?

Sindell v. Abbott Laboratories

Supreme Court of California. 1980.

26 Cal.3d 588, 607 P.2d 924, 163 Cal.Rptr. 132, cert, denied, 449 U.S. 912, 101 S.Ct. 285, 66 L.Ed.2d 140 (1980).

MOSK, JUSTICE. This case involves a complex problem both timely and significant: may a plaintiff, injured as the result of a drug administered to her mother during pregnancy, who knows the type of drug involved but cannot identify the manufacturer of the precise product, hold liable for her injuries a maker of a drug produced from an identical formula?

328

[Plaintiff alleged that her mother ingested a drug, diethylstilbestrol (DES), which was marketed by the defendants, five drug companies. The drug also was marketed by approximately 195 other companies, not joined as defendants. The drug, a synthetic estrogen, was given to plaintiff's mother while she was pregnant with plaintiff to prevent miscarriage. Plaintiff, now an adult, alleged that she developed cancer as a result of her exposure to the drug. She also indicated that she could not identify the manufacturer of the drug. The trial court dismissed the action.

This court held that (1) Summers v. Tice did not apply because not all the defendants were before the court, and (2) there was no "concert of action" among the defendants. See page 325.]

A third theory upon which plaintiff relies is the concept of industry-wide liability, or according to the terminology of the parties, "enterprise liability." This theory was suggested in Hall v. E.I. Du Pont De Nemours & Co., Inc. (E.D.N.Y.1972) 345 F.Supp. 353. In that case, plaintiffs were 13 children injured by the explosion of blasting caps in 12 separate incidents which occurred in 10 different states between 1955 and 1959. The defendants were six blasting cap manufacturers, comprising virtually the entire blasting cap industry in the United States, and their trade association. There were, however, a number of Canadian blasting cap manufacturers which could have supplied the caps. The gravamen of the complaint was that the practice of the industry of omitting a warning on individual blasting caps and of failing to take other safety measures created an unreasonable risk of harm, resulting in the plaintiffs' injuries. The complaint did not identify a particular manufacturer of a cap which caused a particular injury.

The court reasoned as follows: there was evidence that defendants, acting independently, had adhered to an industry-wide standard with regard to the safety features of blasting caps, that they had in effect delegated some functions of safety investigation and design, such as labelling, to their trade association, and that there was industry-wide cooperation in the manufacture and design of blasting caps. In these circumstances, the evidence supported a conclusion that all the defendants jointly controlled the risk. Thus, if plaintiffs could establish by a preponderance of the evidence that the caps were manufactured by one of the defendants, the burden of proof as to causation would shift to all the defendants. The court noted that this theory of liability applied to industries composed of a small number

of units, and that what would be fair and reasonable with regard to an industry of five or ten producers might be manifestly unreasonable if applied to a decentralized industry composed of countless small producers. ***

We decline to apply this theory in the present case. At least 200 manufacturers produced DES; Hall, which involved 6 manufacturers representing the entire blasting cap industry in the United States,

329

cautioned against application of the doctrine espoused therein to a large number of producers. (345 F.Supp. at p. 378.)

Moreover in Hall, the conclusion that the defendants jointly controlled the risk was based upon allegations that they had delegated some functions relating to safety to a trade association. There are no such allegations here, and we have concluded above that plaintiff has failed to allege liability on a concert of action theory. ***

If we were confined to the theories of Summers and Hall, we would be constrained to hold that the judgment must be sustained. Should we require that plaintiff identify the manufacturer which supplied the DES used by her mother or that all DES manufacturers be joined in the action, she would effectively be precluded from any recovery. As defendants candidly admit, there is little likelihood that all the manufacturers who made DES at the time in question are still in business or that they are subject to the jurisdiction of the California courts. There are, however, forceful arguments in favor of holding that plaintiff has a cause of action.

In our contemporary complex industrialized society, advances in science and technology create fungible goods which may harm consumers and which cannot be traced to any specific producer. The response of the courts can be either to adhere rigidly to prior doctrine, denying recovery to those injured by such products, or to fashion remedies to meet these changing needs. ***

The most persuasive reason for finding plaintiff states a cause of action is that advanced in Summers: as between an innocent plaintiff and negligent defendants, the latter should bear the cost of the injury. Here, as in Summers, plaintiff is not at fault in failing to provide evidence of causation, and although the absence of such evidence is not attributable to the defendants either, their conduct in marketing a drug the effects of which are delayed for many years played a significant role in creating the unavailability of proof.

From a broader policy standpoint, defendants are better able to bear the cost of injury resulting from the manufacture of a defective product. As was said by Justice Traynor in Escola [v. Coca Cola Bottling Co.], "[t]he cost of an injury and the loss of time or health may be an overwhelming misfortune to the person injured, and a needless one, for the risk of injury can be insured by the manufacturer and distributed among the public as a cost of doing business." (24 Cal.2d 462, 150 P.2d 441; see also Rest.2d Torts, § 402A, comment c, 349-350.) The manufacturer is in the best position to discover and guard against defects in its products and to warn of harmful effects; thus, holding it liable for defects and failure to warn of harmful effects will provide an incentive to product safety. [Cc] These considerations are particularly significant where medication is involved, for the consumer is virtually helpless to protect himself from

serious, sometimes permanent, sometimes fatal, injuries caused by deleterious drugs.

330

Where, as here, all defendants produced a drug from an identical formula and the manufacturer of the DES which caused plaintiffs injuries cannot be identified through no fault of plaintiff, a modification of the rule of Summers is warranted. As we have seen, an undiluted Summers rationale is inappropriate to shift the burden of proof of causation to defendants because if we measure the chance that any particular manufacturer supplied the injury-causing product by the number of producers of DES, there is a possibility that none of the five defendants in this case produced the offending substance and that the responsible manufacturer, not named in the action, will escape liability.

But we approach the issue of causation from a different perspective: we hold it to be reasonable in the present context to measure the likelihood that any of the defendants supplied the product which allegedly injured plaintiff by the percentage which the DES sold by each of them for the purpose of preventing miscarriage bears to the entire production of the drug sold by all for that purpose. Plaintiff asserts in her briefs that Eli Lilly and Company and 5 or 6 other companies produced 90 percent of the DES marketed. If at trial this is established to be the fact, then there is a corresponding likelihood that this comparative handful of producers manufactured the DES which caused plaintiffs injuries, and only a 10 percent likelihood that the offending producer would escape liability.

If plaintiff joins in the action the manufacturers of a substantial share of the DES which her mother might have taken, the injustice of shifting the burden of proof to defendants to demonstrate that they could not have made the substance which injured plaintiff is significantly diminished. ***

The presence in the action of a substantial share of the appropriate market also provides a ready means to apportion damages among the defendants. Each defendant will be held liable for the proportion of the judgment represented by its share of that market unless it demonstrates that it could not have made the product which caused plaintiffs injuries. ***

Under this approach, each manufacturer's liability would approximate its responsibility for the injuries caused by its own products. Some minor discrepancy in the correlation between market share and liability is inevitable; therefore, a defendant may be held liable for a somewhat different percentage of the damage than its share of the appropriate market would justify. It is probably impossible, with the passage of time, to determine market share with mathematical exactitude. ***As we said in Summers with regard to the liability of independent tortfeasors, where a correct division of liability cannot be made "the trier of fact may make it the best it can." (33 Cal.2d at 88, 199 P.2d at 5.)

We are not unmindful of the practical problems involved in defining the market and determining market share, but these are largely matters

of proof which properly cannot be determined at the pleading stage of these proceedings. Defendants urge that it would be both unfair and contrary to public policy to hold them liable for plaintiff's injuries in the absence of proof that one of them supplied the drug responsible for the damage. Most of their arguments, however, are based upon the assumption that one manufacturer would be held responsible for the products of another or for those of all other manufacturers if plaintiff ultimately prevails. But under the rule we adopt, each manufacturer's liability for an injury would be approximately equivalent to the damages caused by the DES it manufactured.

The judgments are reversed.

Bird, C.J., and Newman and White, JJ., concur.

Richardson, Clark and Manual, JJ., dissent.

NOTES AND QUESTIONS

1. Five state supreme courts have chosen to retain in DES cases the traditional common law requirement that the plaintiff prove the identity of the tortfeasor in order to recover. Zafft v. Eli Lilly and Co., 676 S.W.2d 241, 247 (Mo. 1984); Mulcahy v. Eli Lilly and Co., 386 N.W.2d 67 (Iowa 1986); Smith v. Eli Lilly and Co., 137 III.2d 222, 560 N.E.2d 324, 148 III.Dec. 22 (1990); Gorman v. Abbott Lab., 599 A.2d 1364 (R.I.1991); and Sutowski v. Eli Lilly & Co., 82 Ohio St.3d 347, 696 N.E.2d 187 (1998). See also Reiter v. Pneumo Abex, LLC, 417 Md. 57, 8 A.3d 725 (2010) (in asbestos case, noting that Maryland does not recognize market share liability) and Gianvito v. Premo Pharma. Labs., Inc., 93 A.D.3d 546, 940 N.Y.S.2d 272 (N.Y. App.

2012) (applying New Jersey law) (in DES case, finding that New Jersey does not apply market share theory of liability).

2. California and the five state supreme courts that have followed its lead and fashioned some theory to allow a DES plaintiff to recover even if she cannot identify the manufacturer of the drug that injured her have done so in a variety of ways.

A. California requires the plaintiff to bring before the court defendants representing a "substantial share" of the market. A defendant is dismissed from the case if it can prove that it did not manufacture the drug taken by the plaintiff's mother. Assuming that the plaintiff can prove her case, each of the remaining defendants is severally liable for only that portion of the plaintiff's damages that corresponds to the percentage of its share of the market. Brown v. Superior Crt., 44 Cal.3d 1049, 751 P.2d 470, 245 Cal.Rptr. 412 (1988).

B. New York has not specified how many of the defendants need to be joined in order to use a market share theory of recovery. It does not allow a defendant to exculpate itself by proving that it did not manufacture the drug taken by the plaintiff's mother. As in California, each of the defendants is severally liable for only that portion of the plaintiff's damages that corresponds to the percentage of its share of the market. There is no joint

and several liability. Market is defined as the national market. Hymowitz v. Eli Lilly and Co., 73 N.Y.2d 487, 539 N.E.2d 1069, 541 N.Y.S.2d 941 (1989).

C. Washington and Florida require the plaintiff to file suit against only one defendant, with that defendant then impleading others, if it so chooses. A defendant is dismissed from the case if it can prove that it did not manufacture the drug taken by the plaintiff's mother. The remaining defendants are then presumed to have an equal share of the entire DES market and the burden of proof shifts to each defendant to prove its actual share of the market. If a defendant succeeds in proving that its actual share is less than its presumptive share, it is only liable for that portion of plaintiffs damages that corresponds to its actual market share. The remaining defendants (those unable to prove their actual market shares) have their presumptive shares adjusted upward to again reflect 100% of the market. If there are no defendants unable to prove their actual market share, and plaintiff has not joined all defendants, the plaintiff may be unable to collect the full amount of her damages. Martin v. Abbott Labs., 102 Wash.2d 581, 689 P.2d 368 (1984); Conley v. Boyle Drug Co., 570 So.2d 275 (Fla.1990).

D. Wisconsin adopted a "risk contribution theory," requiring the plaintiff to file suit against only one defendant, with that defendant impleading others. A defendant is dismissed from the case if it can prove that it did not manufacture the drug taken by the plaintiff's mother. The jury, using comparative negligence principles, assigns to the remaining defendants shares of liability based on the amount of "risk" they contributed rather than their market share. Market share is one of several factors considered by the jury in its assessment of risk. Others include how much the defendant was involved in testing the drug, in seeking its approval from the FDA, and whether it took

steps to reduce the risk of injury to the public. Collins v. Eli Lilly Co., 116 Wis.2d 166, 342 N.W.2d 37 (1984).

E. Michigan recognized alternative liability (like Summers v. Tice). If plaintiff joined all possible manufacturers as defendants, the burden of proof shifted to each defendant to prove that it did not make the DES that injured the plaintiff. Any defendants unable to exculpate themselves were then jointly and severally liable, apparently on a per capita rather than a market share basis. Abel v. Eli Lilly and Co., 418 Mich. 311, 343 N.W.2d 164 (1984). Does this ruling survive the Michigan legislature's action restricting joint and several liability? See Napier v. Osmose, Inc., 399 F.Supp.2d 811 (W.D. Mich. 2005) (finding that legislature's action precludes the use of alternative liability in a case against pesticide manufacturers).

3. Suppose the plaintiff has contact with more than one state. Her mother took DES in Louisiana where she was living at the time. When plaintiff was a toddler, the family moved to Washington where plaintiff grew up and as a teenager learned that she had been exposed to DES in utero. Plaintiff moved to California to attend college and met her husband there and has resided there since then. In California, she learned that she suffered DES-related injuries that preclude her from bearing children. She filed suit against DES manufacturers in federal court in the District of Columbia, urging the court to apply market share liability because her mother cannot

identify which DES manufacturer's drug she took. Which state's law applies? Netherland v. Eli Lilly and Co., 2006 WL 626922 (D.D.C.).

4. Most courts have declined to apply market share theories of liability outside the DES context. See, e.g., Sheffield v. Eli Lilly and Co., 144 Cal.App.3d 583, 192 Cal.Rptr. 870 (1983) (vaccine); Goldman v. Johns- Manville Sales Corp., 33 Ohio St.3d 40, 514 N.E.2d 691 (1987) (asbestos); Lee v. Baxter Healthcare Corp., 721 F.Supp. 89 (D.Md.1989), aff'd, 898 F.2d 146 (4th Cir.1990) (breast implants); Rogers v. AAA Wire Products, Inc., 182 Wis.2d 263, 513 N.W.2d 643 (1994) (wire bread cart in grocery store); Bly v. Tri-Continental Indust., Inc., 663 A.2d 1232 (D.C.App.1995) (benzene in gasoline); Skipworth v. Lead Indust. Assn, Inc., 547 Pa. 224, 690 A.2d 169 (1997) (lead paint); and St. Louis v. Benjamin Moore & Co., 226 S.W.3d 110 (Mo. 2007) (lead paint). But see Smith v. Cutter Biological, Inc., 72 Haw. 416, 823 P.2d 717 (1991) (blood clotting protein used in treatment of hemophilia); King v. Cutter Labs., 714 So.2d 351 (Fla.1998) (sending blood clotting protein case back for full evidentiary hearing to determine whether products manufactured by various defendants were sufficiently uniform in risk of infection to justify application of market share theory); State v. Exxon Mobil Corp., 168 N.H. 211, 126 A.3d 266 (2015) (approving trial court judge's use of market share to apportion liability for groundwater contamination caused by gasoline additive); and Thomas v. Mallett, 285 Wis.2d 236, 701 N.W.2d 523 (2005) (extending risk contribution apportionment to lead poisoning case against paint pigment manufacturers). After Thomas, the Wisconsin state legislature eliminated the application of risk contribution apportionment for claims arising from exposure to products other than DES "to return tort law to its historical, common law roots." Wise. Stat. Ann. § 895.046.

5. Those of you writing for a law review and wondering if anyone reads your efforts should know that the Sindell decision was based on a student law review contribution. See Comment, DES and a Proposed Theory of Enterprise Liability, 46 Fordham L. Rev. 963 (1978).

6. Courts that have adopted one of the alternative liability theories have had to decide how many of the defendants must be before the court (all? a substantial share? one?), what the plaintiff must prove about her efforts to identify the manufacturer of the DES that injured her (nothing? some effort? due diligence?), whether a defendant can avoid liability by proving that it did not manufacture the DES taken by the plaintiffs mother (plaintiffs mother remembers round blue tablets, defendant marketed red capsules), who will absorb the shares of defendants who are not present or who are judgment proof (plaintiff? all defendants who were sued by plaintiff? defendants impleaded by other defendants? defendants who are unable to prove they were not the manufacturer?), how the defendants will share the liability (per capita? risk contribution? market share?), what the relevant market is (plaintiffs state? region where plaintiffs mother took DES? suppliers of the pharmacy at which her mother filled her prescription? all DES manufacturers? only those that made round blue tablets?).

7. The complaint in Sindell contained allegations of strict liability, breach of warranty, and fraud, as well as negligence. Should the underlying theory of recovery make a difference as to whether the court relaxes the

traditional burden of proof for causation? See Brown v. Superior Court, 44 Cal.3d 1049, 751 P.2d 470, 245 Cal.Rptr. 412 (1988) (strict liability, breach of warranty, and fraud not available in DES market share case) and King v. Cutter Labs., 714 So.2d 351 (Fla.1998) (reiterating that market share applies only in negligence actions).

8. Compare the plaintiffs in the Bendectin litigation (Daubert) and in the DES litigation (Sindell). Both faced difficulty in proving causation under traditional negligence principles. In what ways were their proof difficulties different?

9. What if plaintiff admits that he did not use defendant's drug, instead taking a generic version, but claims the defendant's misrepresentations about the drug caused his injury because his prescribing physician relied upon them? In re Darvocet, Darvon, and Propoxyphene Prod. Liab. Litig., 756 F.3d 917 (6th Cir. 2014) (affirming the dismissal of misrepresentation claims because a claim for injury caused by a product must be supported by an allegation that the plaintiff was exposed to the product). See also Victor E. Schwartz et al., Warning: Shifting Liability to Manufacturers of Brand-Name Medicines When the Harm Was Allegedly Caused by Generic Drugs Has Severe Side Effects, 81 Fordham L. Rev. 1835, 1857-58 (2013) (noting that almost all courts have dismissed such claims) and pages 892 to 896.

CHAPTER 6 PROXIMATE OR LEGAL CAUSE: SCOPE OF LIABILITY

Atlantic Coast Line R. Co. v. Daniels

Court of Appeals of Georgia, 1911.

8 Ga.App. 775, 70 S.E. 203.

POWELL, J. ***Cause and effect find their beginning and end in the limitless and unknowable. Therefore courts, in their finitude, do not attempt to deal with cause and effect in any absolute degree, but only in such a limited way as is practical and as is within the scope of ordinary human understanding. Hence arbitrary limits have been set, and such qualifying words as "proximate" and "natural" have come into use as setting the limits beyond which the courts will not look in the attempt to trace the connection between a given cause and a given effect. A plaintiff comes into court alleging, as an effect, some injury that has been done to his person or to his property. He shows that antecedent to the injury a wrongful act of another person occurred, and that, if this wrongful act had not occurred, the injury complained of would not (as human probabilities go) have occurred. We then say, in common speech, that the wrong was a cause of the injury. But to make such a standard (that, if the cause had not existed, the effect would not have occurred) the basis of legal responsibility would soon prove very unsatisfactory; for a reductio ad absurdum may be promptly established by calling to mind that, if the injured person had never been born, the injury would not have

happened. So the courts ask another question: Was the wrongful act the proximate cause? ***

NOTES AND QUESTIONS

1. "Proximate cause is deep and muddy water into which many men, wise and otherwise, have ventured." White v. Southern Ry. Co., 151 Va. 302, 319, 144 S.E. 424, 429 (1928). For the not very illuminating term "proximate," we are indebted to Francis Bacon, Lord Chancellor, who in his time committed other sins. His maxim was In jure non remota causa, sed proximo, spectatur. [In law, not the remote cause but the nearest one is looked to.] How important is the matter of physical distance between defendant's conduct and plaintiff's injury?

2. What about nearness or remoteness as to time? In City of Brady, Texas v. Finklea, 400 F.2d 352, 357 (5th Cir.1968) (applying Texas law), an electrician was electrocuted by wires suspended from a transformer cross arm that had been negligently installed by the city over 28 years before. The court stated that "lapse of time is but one element to be considered along with all relevant facts in the case."

335

336

3. The Restatement (Second) of Torts § 431 advocated the term "legal cause" as a more descriptive term than proximate cause. Is its meaning clearer? Is it more helpful in understanding the nature of proximate cause? Thus far, most courts have been inclined to retain the terminology of "proximate cause." The Restatement (Third) of Torts (2010) has abandoned the term "legal" cause--in part because

it is not being used by the courts--and has entitled Chapter 6 "Scope of Liability (Proximate Cause)." Both terms are often used to include cause in fact, a necessary predicate to an inquiry about proximate cause. If cause in fact is not present, then there is no need to inquire whether there is proximate cause.

4. Articles, notes, and comments on "proximate cause" are legion. The topic has had a peculiar fascination for legal writers, and most of them have used it as a springboard to launch their own theories as to the proper basis of legal liability. At one extreme, there have been attempts to reduce it all to definite mechanical rules, as in Beale, The Proximate Consequences of an Act, 33 Harv.L.Rev. 633 (1920). At the other extreme, there has been a rejection of all rules, and the position that the court must decide each case according to its ideas of "justice," as in Edgerton, Legal Cause, 72 U.Pa.L.Rev. 211, 343 (1924). See also, Stapleton, Choosing What We Mean By "Causation" in the Law, 73 Mo. L.Rev. 433 (2008).

5. Here is an articulation of the difference between cause in fact and proximate cause from the Tennessee Supreme Court: "The distinction between cause in fact and proximate, or legal, cause is not merely an exercise in semantics. The terms are not interchangeable. Although both cause in fact and proximate, or legal, cause are elements of negligence that the plaintiff must prove, they are very different concepts. Cause in fact refers to the cause and effect relationship between the defendant's tortious conduct and the plaintiff's injury or loss. Thus, cause in fact deals with the 'but for' consequences of an act. The defendant's conduct is a cause of the event if the event would not have occurred but for that conduct. In contrast, proximate cause, or legal cause, concerns a determination

of whether legal liability should be imposed where cause in fact has been established. Proximate or legal cause is a policy decision made by the legislature or the courts to deny liability for otherwise actionable conduct based on considerations of logic, common sense, policy, precedent and 'our more or less inadequately expressed ideas of what justice demands or of what is administratively possible and convenient.'" Snyder v. LTG Lufttechnische GmbH, 955 S.W.2d 252 (Tenn. 1997) (citations omitted).

6. As you read the cases in this chapter, remember that proximate cause is a concept that cuts off liability even though there is cause in fact. "An actor's liability is limited to those harms that result from the risks that made the actor's conduct tortious." Restatement (Third) of Torts § 29 Limitations on Liability for Tortious Conduct (2010).

337

1. Unforeseeable Consequences

Ryan v. New York Central R.R. Co.

Court of Appeals of New York, 1866.

35 N.Y. 210, 91 Am.Dec. 49.

HUNT, J. On the 15th day of July, 1854, in the city of Syracuse, the defendant, by the careless management, or through the insufficient condition of one of its engines, set fire to its [own] woodshed, and a large quantity of wood therein. The plaintiff's house, situated at a distance of one hundred and thirty feet from the shed, soon took fire from the heat and sparks, and was entirely consumed, notwithstanding diligent efforts were made to save it. A number of

other houses were also burned by the spreading of the fire. The plaintiff brings this action to recover from the railroad company the value of his building thus destroyed. The judge at the Circuit nonsuited the plaintiff, and the General Term of the fifth district affirmed the judgment.

The question may be thus stated: A house in a populous city takes fire, through the negligence of the owner or his servant; the flames extend to and destroy an adjacent building: Is the owner of the first building liable to the second owner for the damage sustained by such burning?

It is a general principle that every person is liable for the consequences of his own acts. He is thus liable in damages for the proximate results of his own acts, but not for remote damages. It is not easy at all times to determine what are proximate and what are remote damages. ***

If an engineer upon a steamboat or locomotive in passing the house of A., so carelessly manages its machinery that the coals and sparks from its fires fall upon and consume the house of A., the railroad company or the steamboat proprietors are liable to pay the value of the property thus destroyed. [C] Thus far the law is settled and the principle is apparent. If, however, the fire communicates from the house of A. to that of B., and that is destroyed, is the negligent party liable for his loss? And if it spreads thence to the house of C., and thence to the house of D., and thence consecutively through the other houses until it reaches and consumes the house of Z., is the party liable to pay the damages sustained by these twenty-four sufferers? The counsel for the plaintiff does not distinctly claim this,

and I think it would not be seriously insisted that the sufferers could recover in such case. Where then is the principle upon which A. recovers and Z. fails? ***

I prefer to place my opinion upon the ground that in the one case, to-wit, the destruction of the building upon which the sparks were thrown by the negligent act of the party sought to be charged, the result was to have been anticipated the moment the fire was communicated to the building; that its destruction was the ordinary and natural result of its being fired. In the second, third or twenty-fourth case, as supposed, the

destruction of the building was not a natural and expected result of the first firing. That a building upon which sparks and cinders fall should be destroyed or seriously injured must be expected, but that the fire should spread and other buildings be consumed is not a necessary or an usual result. That it is possible, and that it is not infrequent, cannot be denied. The result however depends, not upon any necessity of a further communication of the fire, but upon a concurrence of accidental circumstances, such as the degree of the heat, the state of the atmosphere, the condition and materials of the adjoining structures and the direction of the wind. These are accidental and varying circumstances. The party has no control over them, and is not responsible for their effects.

My opinion therefore is, that this action cannot be sustained, for the reason that the damages incurred are not the immediate but the remote result of the negligence of the defendants. The immediate

result was the destruction of their own wood and sheds; beyond that, it was remote. ***

To sustain such a claim as the present, and to follow the same to its legitimate consequences, would subject to a liability against which no prudence could guard, and to meet which no private fortune would be adequate. ***A man may insure his own house or his own furniture, but he cannot insure his neighbor's building or furniture, for the reason that he has no interest in them. To hold that the owner must not only meet his own loss by fire, but that he must guarantee the security of his neighbors on both sides, and to an unlimited extent, would be to create a liability which would be the destruction of all civilized society. No community could long exist under the operation of such a principle. In a commercial country each man, to some extent, runs the hazard of his neighbor's conduct, and each, by insurance against such hazards, is enabled to obtain a reasonable security against loss. To neglect such precaution, and to call upon his neighbor on whose premises a fire originated, to indemnify him instead, would be to award a punishment quite beyond the offense committed. It is to be considered also that if the negligent party is liable to the owner of a remote building thus consumed, he would also be liable to the insurance companies who should pay losses to such remote owners. The principle of subrogation would entitle the companies to the benefit of every claim held by the party to whom a loss should be paid. ***

The remoteness of the damage, in my judgment, forms the true rule on which the question should be decided, and which prohibits a recovery by the plaintiff in this case.

Judgment should be affirmed.

NOTES AND QUESTIONS

1. Shortly after the principal case was decided, New York modified the rule to allow recovery for the first adjoining landowner, as distinct from

339

the first building. Webb v. Rome, W. & O.R. Co., 49 N.Y. 420, 10 Am.Rep. 389 (1872). And then to the first property to which the fire jumps, although it is not adjoining. Homac Corp. v. Sun Oil Co., 258 N.Y. 462, 180 N.E. 172 (1932). Other courts have rejected the "first building" test. Decisions in other jurisdictions on fires spreading for a substantial distance have held the defendant liable. See, for example, Smith v. London & S.W.R. Co., [1870] L.R. 6 C.P. 14; Hoyt v. Jeffers, 30 Mich. 181 (1874); E.T. & H.K. Ide v. Boston & Maine R. Co., 83 Vt. 66, 74 A. 401 (1909).

2. At the opposite extreme from the principal case is Atchison, T. & S.F.R. Co. v. Stanford, 12 Kan. 354, 15 Am.Rep. 362 (1874), where a railroad that negligently set a fire next to its tracks was held liable to the owner of a farm nearly four miles away, to whose property the fire spread. Kansas had, at the time of the decision, many miles of uninsured grain, and its community attitude toward railroads was not necessarily the same as that of New York. Do these factors account for the difference in opinions? Is there any reason why the two states should have the same rule? What if the same railroad operates in both states?

3. Policy considerations weighed heavily in the principal case. How important was insurance? Could the defendant railroad have purchased liability insurance to cover this situation? Probably not. See Fischer & Jerry, Teaching Torts Without Insurance: A Second-Best Solution, 45 St. Louis L.J. 857, 860 (2001) (identifying 1886 as the date of the first liability insurance policy in the United States and noting that it only covered claims by employees, not claims by the general public). Should the fact that the plaintiff could have purchased accident or fire insurance be utilized to restrict the liability of a negligent defendant to consequences that are less than reasonably foreseeable? Why?

4. Like the courts of the 19th Century facing the question how far liability for negligently starting a fire should extend, courts in the 21st Century are facing the question of how far the liability of those who negligently exposed workers to asbestos should extend. To the workers exposed at the workplace? To their spouses who were exposed at home while laundering their clothes? To their family members who breathed in the fibers that were carried home on their clothes? To roommates? To their carpool? To fellow commuters on the bus? Schwartz v. Accuratus Corp., 225 N.J. 517, 139 A.3d 84 (2016) ("Although chance contact with a worker transporting home a toxic substance from another's premises should not suffice to create a duty of care..., we cannot create an abstract bright-line rule at this time as to "who's in and who's out" on a negligence-based take-home toxic-tort cause of action.... The contours of the issue defy definition in such manner."). See also Partlett, Asbestos Wars: In Three Parts, 71 Wash. & Lee L. Rev. 759 (2014).

Bartolone v. Jeckovich

Supreme Court of New York, Appellate Division, 1984.

103 A.D.2d 632, 481 N.Y.S.2d 545.

DENMAN, Justice. On October 4, 1976 plaintiff was involved in a four- car chain reaction collision in Niagara Falls for which defendants were found liable. Plaintiff sustained relatively minor injuries consisting of whiplash and cervical and lower back strain for which he was treated with muscle relaxants and physical therapy but was not hospitalized. Subsequently, however, he suffered an acute psychotic breakdown from which he has not recovered. The theory on which plaintiff's case was tried was that the accident aggravated a pre-existing paranoid schizophrenic condition which has totally and permanently disabled him. ***

At the time of the accident, plaintiff was a 48 year old man who lived alone in one room and worked out of a union hall as a carpenter. He was very proud of his physique and his strength, spending on the average of four hours daily at the local YMCA engaged in body building. On weekends, in order to conserve his strength, he pursued nonphysical interests such as painting and sculpture, singing and playing the guitar and trombone. Since the accident, plaintiff has been in a degenerative psychotic condition in which he is withdrawn, hostile, delusional, hears voices and sees shadows, refuses to cut his hair, shave or bathe and no longer participates in any of his former interests. In the words of his treating psychiatrist, he is "a life lost."

Three psychiatrists and one neurosurgeon testified on behalf of plaintiff. From their testimony a strange and sad profile emerged: Plaintiffs mother had died of cancer when he was a very young boy. His sister had also died of cancer. Probably as a consequence, plaintiff had developed a fear and dislike of doctors and engaged in body building in order to avoid doctors and ward off illness. His bodily fitness was extremely important to him because it provided him with a sense of control over his life so that he was able to function in a relatively normal way. ***Because he had such an intense emotional investment in his body, his perception of this impairment made him incapable of his former physical feats and he was thus deprived of the mechanism by which he coped with his emotional problems. As a consequence, he deteriorated psychologically and socially as well. ***

Defendants' expert, who had never seen the plaintiff, even at trial, agreed that plaintiff suffered from schizophrenia but stated that, in his opinion, it had not been exacerbated by the accident and that [he] was merely attempting to make money. The jury, who had an opportunity to see the plaintiff and hear his testimony, returned a verdict of $500,000. The court set that verdict aside stating that there was no basis on which the jury could conclude that plaintiff's total mental breakdown could be attributed to a minor accident.

341

We find, to the contrary, that there was ample proof in the record to support the jury's verdict. There is precedent for such determination. In Bonner v. United States, 339 F.Supp. 640, plaintiff was a passenger in a car which was rear-ended. She received a whiplash

injury resulting in cervical spasms and lumbar-sacral strain for which she was treated with muscle relaxants and physiotherapy. She later developed numbness, headaches, hearing difficulties, inability to keep her eyes open, deteriorated personal hygiene, degeneration in appearance, facial tics and jerking and twitching of her head, all of which were determined to be of a psychological rather than neurological origin. The psychiatric testimony established that she had a pre-existing underlying psychotic illness with which she was able to cope until the accident but that the accident had precipitated a chronic psychosis which was totally disabling.

In Steinhäuser v. Hertz Corp., 421 F.2d 1169 (2d Cir.), plaintiff, a 14-year-old girl, was riding as a passenger in a car with her parents when it was struck by another vehicle. The occupants did not suffer any bodily injuries. Within minutes after the accident, plaintiff began to behave in a bizarre manner. After a series of hospitalizations, she was diagnosed as suffering from a "schizophrenic reaction--acute--undifferentiated." The other evidence at trial was similar to the evidence in the case before us. Prior to the accident she had a " 'prepsychotic' personality" and displayed a predisposition to abnormal behavior. ***Nevertheless, there was testimony that, had it not been for the accident, she might have been able to lead a normal life and that the accident was the precipitating cause of her psychosis. The trial court did not allow plaintiff's counsel to elicit testimony as to whether the accident could have been an aggravating cause of her condition. In reversing a verdict of no cause for action, the United States Court of Appeals for the Second Circuit stated that the evidence made clear that plaintiff had some degree of pathology which was activated into schizophrenia by the

emotional trauma connected with the accident and that she was entitled to have that issue fairly weighed by a jury.

The circumstances of those cases as well as those of the case before us illustrate the truth of the old axiom that a defendant must take a plaintiff as he finds him and hence may be held liable in damages for aggravation of a pre-existing illness [c]. Nor may defendants avail themselves of the argument that plaintiff should be denied recovery because his condition might have occurred even without the accident. [Cc]

The record presents ample evidence that plaintiff, although apparently suffering from a quiescent psychotic illness, was able to function in a relatively normal manner but that this minor accident aggravated his schizophrenic condition leaving him totally and permanently disabled.

Accordingly, the order should be reversed and the jury's verdict reinstated.

342

Order unanimously reversed with costs, motion denied and verdict reinstated.

NOTES AND QUESTIONS

1. One of the illustrations of this principle running through the English cases, originating in Dulieu v. White, [1901] 2 K.B. 669, 679, is that of the man with the thin skull, who suffers death when an ordinary man would have had only a bump on the head. It is thus often referred to as the "eggshell skull" doctrine.

2. All states are agreed upon the rule stated in this case when unforeseeable consequences follow from a physical injury to the person of the plaintiff. Keegan v. Minneapolis & St. L.R. Co., 76 Minn. 90, 78 N.W. 965 (1899) (death from inflammation of the heart resulting from a sprained ankle); Ominsky v. Charles Weinhagen & Co., 113 Minn. 422, 129 N.W. 845 (1911) (loss of hair from fright); Thompson v. Lupone, 135 Conn. 236, 62 A.2d 861 (1948) (obesity delayed recovery from normal period of two weeks to eight months: "The defendants took her as they found her [cc]."); and Fuller v. Merten, 173 Or.App. 592, 22 P.3d 1221 (2001) (plaintiffs neck fractured in collision because osteoporosis had rendered her bones brittle and more susceptible to injury). See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 31 (2010): When an actor's tortious conduct causes harm to a person that, because of a preexisting physical or mental condition or other characteristics of the person, is of a greater magnitude or different type than might reasonably be expected, the actor is nevertheless subject to liability for all such harm to the person.

3. A few courts have limited the doctrine to pre-existing physical conditions. Munn v. Algee, 924 F.2d 568, 576 (5th Cir.1991) (stating that Mississippi has applied the "eggshell skull" rule only to pre-existing physical conditions and declining to extend its scope to cover the plaintiffs religious beliefs, which had prevented her from undergoing a blood transfusion); Ragin v. Harry Macklowe Real Estate Co., 6 F.3d 898 (2d Cir.1993) (in housing discrimination case, upholding the trial court judge's decision not to consider as part of emotional damages the effect of the discrimination in light of plaintiffs' past traumatic experiences with race discrimination). Most

courts, however, include the fragile psyche as well as the fragile skull. In addition to the principal case, see Steinhauser v. Hertz Corp., 421 F.2d 1169 (2d Cir.1970) (applying New York law) (schizophrenia triggered by car accident) and Malcolm v. Broadhurst, [1970] 3 All E.R. 508, 511 (Q.B.D.) ("there is no difference in principle between an eggshell skull and an eggshell personality").

4. Note that the doctrine applies only to the proximate cause issue, not to the determination of reasonable care (negligence) or defect (strict liability). Those determinations are made in light of the ordinary person. See Vaughn v. Nissan Motor Corp., 77 F.3d 736, 738 (4th Cir.1996) (applying South Carolina law) ("The tortfeasor's duty of care is measured by the ordinary person, but the plaintiff's injuries may not be. In short, if Nissan breached its objective duty of care, it must take its victim as it finds her.")

343

In re Arbitration Between Polemis and Furness, Withy & Co., Ltd.

Court of Appeal, 1921.

[1921] 3 K.B. 560.

BANKES, L.J. By a time charterparty dated February 21, 1917, the respondents chartered their vessel to the appellants. ***The vessel was employed by the charterers to carry a cargo to Casablanca in Morocco. The cargo included a quantity of benzine or petrol in cases. While discharging at Casablanca a heavy plank fell into the hold in which the petrol was stowed, and caused an explosion, which set fire to the vessel and completely destroyed her. The owners

claimed the value of the vessel from the charterers, alleging that the loss of the vessel was due to the negligence of the charterers' servants. The charterers contended ***that the damages claimed were too remote. The claim was referred to arbitration and the arbitrators stated a special case for the opinion of the Court. Their findings of fact are as follows: The arbitrators found that the ship was lost by fire; that the fire arose from a spark igniting the petrol vapor in the hold; that the spark was caused by the falling board coming into contact with some substance in the hold; and that the causing of the spark could not reasonably have been anticipated from the falling of the board, though some damage to the ship might reasonably have been anticipated, and stated the damages at £196,165 Is. lid. ***

In the present case the arbitrators have found as a fact that the falling of the plank was due to the negligence of the defendants' servants. The fire appears to me to have been directly caused by the falling of the plank. Under these circumstances I consider that it is immaterial that the causing of the spark by the falling of the plank could not have been reasonably anticipated. The appellants' junior counsel sought to draw a distinction between the anticipation of the extent of damage resulting from a negligent act and the anticipation of the type of damage resulting from such an act. He admitted that it could not lie in the mouth of a person whose negligent act had caused damage to say that he could not reasonably have foreseen the extent of the damage, but he contended that the negligent person was entitled to rely upon the fact that he could not reasonably have anticipated the type of damage which resulted from his negligent act. I do not think that the distinction can be admitted. Given the breach of duty which constitutes the negligence, and given

the damage as a direct result of that negligence, the anticipations of the person whose negligent act has produced the damage appear to me to be irrelevant. I consider that the damages claimed are not too remote. ***

SCRUTTON, L.J. ***The second defense is that the damage is too remote from the negligence, as it could not be reasonably foreseen as a consequence. ***[I]f the act would or might probably cause damage, the fact that the damage it in fact causes is not the exact kind of damage one would expect is immaterial, so long as the damage is in fact directly traceable to the negligent act, and not due to the operation of

344

independent causes having no connection with the negligent act, except that they could not avoid its results. Once the act is negligent, the fact that its exact operation was not foreseen is immaterial. ***In the present case it was negligent in discharging cargo to knock down the planks of the temporary staging, for they might easily cause some damage either to workmen, or cargo, or the ship. The fact that they did directly produce an unexpected result, a spark in an atmosphere of petrol vapor which caused a fire, does not relieve the person who was negligent from the damage which his negligent act directly caused.

For these reasons the experienced arbitrators and the judge appealed from came, in my opinion, to a correct decision, and the appeal must be dismissed with costs.

Appeal dismissed.

[The concurring opinion of WARRINGTON, L.J., is omitted.]

NOTES AND QUESTIONS

1. The "rule" of this case has had considerable support in the United States. See, e.g., Christianson v. Chicago, St. P., M. & O.R. Co., 67 Minn. 94, 69 N.W. 640 (1896) ("consequences which follow in unbroken sequence, without an intervening efficient cause, from the original negligent act are natural and proximate"); Ramsey v. Carolina-Tennessee Power Co., 195 N.C. 788, 143 S.E. 861 (1928) (power company's negligently installed power line was damaged by railroad's negligent shunting of its cars on spur that caused them to derail and strike some transformers; plaintiffs intestate was a worker at a laundry who was killed by shock when he touched a laundry machine powered by that line). What is the reason underlying the rule? Is the rule similar in nature to the early common law distinction between trespass and case? See page 3.

2. Was the petrol vapor in the hold an independent cause? Was the entire chain of events foreseeable? Was it negligence to start to unload with petrol vapor permeating the hold?

3. Distinguish between unforeseeability of the result that has occurred and unforeseeability of the manner in which it is brought about. It is quite generally agreed that the latter will not relieve the defendant of responsibility. A memorable illustration is Bunting v. Hogsett, 139 Pa. 363, 21 A. 31 (1891), where negligent operation of defendant's "dinky" engine caused a collision with a train on a crossing. Just before the collision the engineer of the dinky reversed the engine, shut off the steam, and jumped. The collision jarred loose the throttle, and the engine backed up, gathering momentum,

and traveled around a loop in the track the dinky was on to a second crossing, where there was a second collision with the train. Plaintiff, a passenger on the train, was injured in the second collision. Defendant was held liable. See also Colonial Inn Motor Lodge, Inc. v. Gay, 288 Ill.App. 3d 32, 223 Ill.Dec. 674, 680 N.E.2d 407 (1997) (driver who negligently backed into building, severing natural gas line of air conditioning unit, was responsible for explosion that destroyed building even though he might not have foreseen

345

the exact manner in which damage from his negligent driving would occur). But see Humphrey v. Westchester Ltd. Partnership, 2019 WL 2185972 (W.Va. 2019) (minor who was served alcohol by bar gave her keys to a friend who negligently injured someone while driving her home--bar not liable). Do you hear the echo of Polemis in the dissent? "Nonetheless, the majority focuses on the very specific litany of facts which gave rise to this accident to justify summary judgment, despite the fact this Court has held that it is foreseeable that an intoxicated minor will injure himself or others. The very specific potential means by which an intoxicated minor may perpetrate that injury are myriad; there is simply no requirement that the precise mechanism of injury must be foreseeable to a negligent tortfeasor to allow the issue to reach the jury."

4. Families of some of the victims of September 11th terrorist attacks filed tort claims against airlines, airport security companies, and airport operators for negligently failing to prevent the attacks. The defendants argued that the terrorist acts were not reasonably foreseeable. The trial court judge denied the defendants' motion to

dismiss, finding that "the crash of the airplanes was within the class of foreseeable hazards resulting from negligently performed security screening. While it may be true that terrorists had not before deliberately flown airplanes into buildings, the airlines reasonably could foresee that crashes causing death and destruction on the ground was a hazard that would arise should hijackers take control of a plane." In re September 11 Litigation, 280 F.Supp.2d 279, 296 (S.D.N.Y. 2003).

5. Intentional Torts. In Derosier v. New England Tel. & Tel. Co., 81 N.H. 451, 130 A. 145(1925), the court made the following statement of policy, which has been much quoted: "In determining how far the law will trace causation and afford a remedy, the facts as to the defendant's intent, his imputable knowledge, or his justifiable ignorance are often taken into account. The moral element is here the factor that has turned close cases one way or the other. For an intended injury the law is astute to discover even very remote causation. For one which the defendant merely ought to have anticipated it has often stopped at an earlier stage of the investigation of causal connection. And as to those where there was neither knowledge nor duty to foresee, it has usually limited accountability to direct and immediate results."

This is undoubtedly true, although it has represented a general and often unexpressed tendency rather than any clear and definite lines of demarcation. There have, however, been decisions in which liability for intended injury has been carried farther than for the same injury negligently inflicted. Compare, for example, as to suicide resulting from intentional misconduct, the cases cited on page 25 in note 4D with those on pages 381--385 for suicide resulting from

negligent conduct. See also Restatement (Third) of Torts § 33 (2010) (actor who intentionally or recklessly causes harm is subject to liability for a broader range of harms than the harms for which that actor would be liable if only acting negligently).

346

Overseas Tankship (U.K.) Ltd. v. Morts Dock & Engineering Co., Ltd. "Wagon Mound No. 1"

Privy Council, 1961.

[1961] A.C. 388.

[Plaintiff Morts Dock operated a wharf for shipbuilding and repair in the Port of Sydney, Australia. The freighter Wagon Mound, owned by the defendants, was moored about 600 feet away. While she was taking on a load of furnace oil from a barge, Wagon Mound's crew left a valve open on one of the tanks and furnace oil flowed from it into the harbor. As the oil spread across the surface of the water, it came in contact with the slipways of plaintiff's wharf, and interfered with their use, thus causing minor damage, which was so slight that plaintiff made no claim for it. A few days later, the oil was ignited when cotton waste floating on its surface was set on fire by molten metal dropped from the wharf by plaintiff's workmen. The fire seriously damaged the wharf and two ships docked alongside of it. The trial court specifically found that defendants "did not know and could not reasonably be expected to have known" that the oil (which was stated by counsel to have a flash point of about 170° F.) was capable of being set afire when spread on water. Judgment was

given for the plaintiff, which was affirmed by the Supreme Court of New South Wales. Defendants appealed to the Privy Council, where the decision was reversed. After reviewing In re Polemis, page 343, and a number of subsequent English decisions, the Privy Council continued:]

[Caption: Morts Dock after the fire.]

VISCOUNT Simonds: ***[I]t does not seem consonant with current ideas of justice or morality that for an act of negligence, however slight or venial, which [could have resulted] in some trivial foreseeable damage the actor should be liable for all consequences however unforeseeable and

347

however grave, so long as they can be said to be "direct." It is a principle of civil liability, subject only to qualifications which have no present relevance, that a man must be considered to be responsible for the probable consequences of his act. To demand more of him is too harsh a rule, to demand less is to ignore that civilized order requires the observance of a minimum standard of behaviour. ***

[I]f it is asked why a man should be responsible for the natural or necessary or probable consequences of his act (or any other similar description of them) the answer is that it is not because they are natural or necessary or probable, but because, since they have this quality, it is judged by the standard of the reasonable man, that he ought to have foreseen them. Thus it is that over and over again it has happened that in different judgments in the same case and sometimes in a single judgment liability for a consequence has been imposed on the ground that it was reasonably foreseeable or

alternatively on the ground that it was natural or necessary or probable. The two grounds have been treated as coterminous, and so they largely are. ***

[Caption: Morts Dock was never rebuilt.]

It is not the act but the consequences on which tortious liability is founded. Just as (as it has been said) there is no such thing as negligence in the air, so there is no such thing as liability in the air. Suppose an action brought by A for damage caused by the carelessness (a neutral word) of B, for example a fire caused by the careless spillage of oil. It may of course become relevant to know what duty B owed to A, but the only liability that is in question is the liability for damage by fire. It is vain to isolate the liability from its content and to say that B is or is not liable and then to ask for what damage he is liable. For his liability is in respect of that damage and no other. If, as admittedly it is, B's liability (culpability)

depends on the reasonable foreseeability of the consequent damage, how is that to be determined except by the foreseeability of the damage which in fact happened--the damage in suit? And, if that damage is unforeseeable so as to displace liability at large, how can the liability be restored so as to make compensation payable?

But, it is said, a different position arises if B's careless act has been shown to be negligent and has caused some foreseeable damage to A. Their Lordships have already observed that to hold B liable for consequences however unforeseeable of a careless act, if, but only if, he is at the same time liable for some other damage however trivial, appears to be neither logical nor just. This becomes more

clear if it is supposed that similar unforeseeable damage is suffered by A and C but other foreseeable damage, for which B is liable, by A only. A system of law which would hold B liable to A but not to C for the similar damage suffered by each of them could not easily be defended. Fortunately, the attempt is not necessary. For the same fallacy is at the root of the proposition. It is irrelevant to the question whether B is liable for unforeseeable damage that he is liable for foreseeable damage, as irrelevant as would the fact that he had trespassed on Whiteacre be to the question whether he had trespassed on Blackacre. Again suppose a claim by A for damage by fire by the careless act of B. Of what relevance is it to that claim that he has another claim arising out of the same careless act? It would surely not prejudice his claim if that other claim failed; it cannot assist it if it succeeds. Each of them rests on its own bottom and will fail if it can be established that the damage could not reasonably be foreseen. ***As Lord Denning said in King v. Phillips, [1953] 1 Q.B. 429 at p. 441, there can be no doubt since Bourhill v. Young that the test of liability for shock is foreseeability of injury by shock. Their Lordships substitute the word "fire" for "shock" and endorse this statement of the law. ***

[The action for damages caused by negligence was dismissed. The case was remanded to the Full Court of New South Wales for disposition of an alternative claim for liability on the basis of nuisance, since their Lordships thought that it would not be proper for them to come to any conclusion on that issue upon the material before them. The plaintiff decided not to proceed further with its claim based on nuisance, and the litigation ended with this decision of the Privy Council.]

NOTES AND QUESTIONS

1. Note that the owners of Morts Dock would have been able to recover for the damage to the property done by the oil itself if a claim had been made for that. The rule of this case has been the underlying premise of many decisions in the United States. See, e.g., Mauney v. Gulf Refining Co., 193 Miss. 421, 9 So.2d 780 (1942) ("The area within which liability is imposed is that which is within the circle of reasonable foreseeability").

349

2. The Restatement (Third) of Torts § 29 (2010) articulates scope of liability in these terms: "An actor's liability is limited to those harms that result from the risks that made the actor's conduct tortious." Consider each of these cases and think about how you would argue whether (or not) plaintiff's harm was within the foreseeable risk of defendant's conduct.

A. When defendant served "foul smelling" shrimp, he risked causing patron to become ill, but not causing someone else to slip on her vomit. Crankshaw v. Piedmont Driving Club, 115 Ga.App. 820, 156 S.E.2d 208 (1967).

B. When defendant bus driver drove at an unreasonable speed in a snowstorm, he risked a collision with another vehicle, but not creating a snow-swirl that would blind another driver who followed in his wake. Metts v. Griglak, 438 Pa. 392, 264 A.2d 684 (1970).

C. When defendant manufacturer supplied a defective metal ring on a dog collar, it risked causing the owner to lose his dog, but not causing the plaintiff to be bitten by the dog. Oehler v. Davis, 223

Pa.Super. 333, 298 A.2d 895 (1972) (products liability case applying proximate cause principles of negligence law).

D. When defendant gas station employee permitted customer to pump gas while engine was still running, he risked fire or explosion but not that car would roll backward and injure plaintiff who was pumping gas at adjacent pump. Di Ponzio v. Riordan, 89 N.Y.2d 578, 657 N.Y.S.2d 377, 679 N.E.2d 616 (1997) (car was left with its engine running unattended at pump while customer went inside to pay).

E. When defendant contractor improperly welded an angle iron in place when installing ceiling in new wrestling room in high school, it risked injury to foreseeable occupants of room when angle iron dropped from ceiling, but not injury to high school maintenance worker who fell from ladder while trying to reinstall the angle iron. Virden v. Betts and Beer Construction Co., 656 N.W.2d 805 (Iowa 2003) (maintenance worker's fall was not a reasonably foreseeable or probable consequence of contractor's negligence).

F. When the manager of Hardwick Hall, a historic property, failed to post a warning against swimming in a pond because it could be a source of Weil's disease, it risked a swimmer contracting that disease but not that the swimmer would drown. Darby v. The National Trust, [2001] EWCA Civ 189, [2001] PIQR 27.

G. When defendant day care center's negligence allowed a child to find and consume rat poison, it risked the child becoming ill, but not that the relatives with whom the child was residing would lose custody of the child because the child's subsequent minor bruises would become accentuated by the effects of the poison and be

mistaken for the results of child abuse. Lewis v. Kehoe Academy, 346 So.2d 289 (La.App.1977).

3. Professor (later Judge) Robert E. Keeton suggested a general rule that helps to explain Wagon Mound No. 1 and other cases that espouse its approach to proximate cause. One of his three formulations of the rule is "A negligent actor is legally responsible for that harm, and only that harm, of which the negligent aspect of his conduct is a cause in fact." R. Keeton, Legal

Cause in the Law of Torts, 9 (1963). How helpful is this formulation? Compare it to the rule as to violation of statutes intended to protect plaintiffs against a particular risk. See note 2B, page 241. Should the same rule apply when there is no statute, and the defendant's conduct creates only a particular risk? Or do the written law and the policy of strict statutory construction afford a reason to make a distinction?

4. The Privy Council was the highest appellate court for the Commonwealth but its decisions were only binding in the country where the case arose, so there was initially some doubt whether the principal case would be accepted by the English courts. This was finally set to rest in Doughty v. Turner Mfg. Co., [1964] 1 Q.B. 518, where an asbestos cement cover was knocked into a vat filled with an extremely hot solution of sodium cyanide, which might have been expected to splash some of the molten substance upon anyone standing nearby. Although no such injuries were sustained when the cover was initially knocked into the vat, a short time later the molten liquid erupted from the vat and caused injury to the plaintiff. His

recovery in the trial court was reversed, because there was no reason for anyone to expect the eruption, which was determined to have been caused by a chemical reaction between the liquid and the lid.

Overseas Tankship (U.K.) Ltd. v. Miller Steamship Co. "Wagon Mound No. 2"

Privy Council, 1966.

[1967] 1 A.C. 617.

[The accident facts are the same as in the preceding case, but this action was brought, on the grounds of nuisance and negligence, by the owners of the two ships docked at the wharf that were damaged by the fire. The trial court, Walsh, J., made findings on the issue of foreseeability, as follows:

"(1) Reasonable people in the position of the officers of the Wagon Mound would regard the furnace oil as very difficult to ignite upon water. (2) Their personal experience would probably have been that this had very rarely happened. (3) If they had given attention to the risk of fire from the spillage, they would have regarded it as a possibility, but one which could become an actuality only in very exceptional circumstances. (4) They would have considered the chances of the required exceptional circumstances happening whilst the oil remained spread on the harbour waters as being remote. (5) I find that the occurrence of damage to the plaintiff's property as a result of the spillage not reasonably foreseeable by those for whose acts the defendant would be responsible. ***(8) Having regard to

those findings, and because of finding (5), I hold that the claim of each of the plaintiffs, framed in negligence, fails."

Judgment for the defendants was affirmed by the Supreme Court of New South Wales, and plaintiffs appealed, as was permissible at the time, to the Privy Council.]

351

LORD Reid [After holding that the count in nuisance added nothing, since it too requires proof of foreseeability, the Court turned to the negligence count.] It is now necessary to turn to the respondents' submission that the trial judge was wrong in holding that damage from fire was not reasonably foreseeable. ***

In The Wagon Mound (No. 1) the Board were not concerned with degrees of foreseeability because the finding was that the fire was not foreseeable at all. So Lord Simonds had no cause to amplify the statement that the "essential factor in determining liability is whether the damage is of such a kind as the reasonable man should have foreseen." But here the findings show that some risk of fire would have been present to the mind of a reasonable man in the shoes of the ship's chief engineer. So the first question must be what is the precise meaning to be attached in this context to the words "foreseeable" and "reasonably foreseeable."

[The court here referred to Bolton v. Stone, [1951] A.C. 850, where the risk that a cricket ball would be driven out of the grounds and strike a plaintiff on an unfrequented public road was held to be "so small that in the circumstances a reasonable man would have been justified in disregarding it and taking no steps to eliminate it."]

But it does not follow that, no matter what the circumstances may be, it is justifiable to neglect a risk of such a small magnitude. A reasonable man would only neglect such a risk if he had some valid reason for doing so, e.g., that it would involve considerable expense to eliminate the risk. He would weigh the risk against the difficulty of eliminating it. ***

In the present case there was no justification whatever for discharging the oil into Sydney Harbour. Not only was it an offence to do so, but it involved considerable loss financially. If the ship's engineer had thought about the matter, there could have been no question of balancing the advantages and disadvantages. From every point of view it was both his duty and his interest to stop the discharge immediately.

It follows that in their Lordships' view the only question is whether a reasonable man having the knowledge and experience to be expected of the chief engineer of the Wagon Mound would have known that there was a real risk of the oil on the water catching fire in some way; if it did, serious damage to ships or other property was not only foreseeable but very likely. ***

The findings show that he ought to have known that it is possible to ignite this kind of oil on water, and that the ship's engineer probably ought to have known that this had in fact happened before. The most that can be said to justify inaction is that he would have known that this could only happen in very exceptional circumstances. But this does not mean that a reasonable man would dismiss such a risk from his mind and do nothing when it was so easy to prevent it. If it is clear that the reasonable

man would have realized or foreseen and prevented the risk, then it must follow that the appellant is liable in damages. ***

Appeal (of the ship owners) allowed.

NOTES AND QUESTIONS

1. What is the difference between Wagon Mound No. 1 and No. 2? Is the law that was applied different or is there a difference in the facts before the court? Do you suppose the attorneys representing the ship plaintiffs benefitted from the experience of the attorneys representing Morts Dock? How might the presentation of the case have been affected by the fact that the plaintiffs are different? What role does the defense of contributory negligence play in the presentation of the evidence?

2. Has Polemis come in again by the back door, in the guise of foreseeability of the remotely possible? Are there many events that the reasonable person would not recognize as possible, with at least a slight degree of risk?

3. Compare the formula of Learned Hand in United States v. Carroll Towing Co., page 164. How does it relate to this case?

4. Suppose homeowners disassemble a trampoline and leave its parts in their yard about 38 feet from a gravel road at the edge of their property. A few weeks later, during the night, a thunderstorm blows the top of the trampoline onto the road. Several hours later, plaintiff, driving by, swerves to avoid the obstruction in the road. He lost control of his car and was severely injured. Should the courts consider foreseeability as part of a duty analysis or part of a

proximate cause analysis? In Thompson v. Kaczinski, 774 N.W.2d 829, 839 (Iowa 2009), the Iowa Supreme Court relied upon the (then) draft of Restatement (Third) § 29 to decide that foreseeability should be part of the scope of liability analysis. That is, "when scope of liability arises in a negligence case, the risks that make an actor negligent are limited to foreseeable ones, and the factfinder must determine whether the type of harm that occurred is among those reasonably foreseeable potential harms that made the actor's conduct negligent." The court then applied that reasoning and found that whether serious injury to a motorist was within the range of harms risked by property owners' actions in leaving disassembled trampoline in yard was for the jury to determine.

Palsgraf v. Long Island R.R. Co.

Court of Appeals of New York, 1928.

248 N.Y. 339, 162 N.E. 99.

CARDOZO, C.J. Plaintiff was standing on a platform of defendant's railroad after buying a ticket to go to Rockaway Beach. A train stopped at the station, bound for another place. Two men ran forward to catch it. One of the men reached the platform of the car without mishap, though the train was already moving. The other man, carrying a package, jumped aboard the car, but seemed unsteady as if about to fall. A guard on the car, who had held the door open, reached forward to help him in,

353

and another guard on the platform pushed him from behind. In this act, the package was dislodged, and fell upon the rails. It was a

package of small size, about fifteen inches long, and was covered by a newspaper. In fact it contained fireworks, but there was nothing in its appearance to give notice of its contents. The fireworks when they fell exploded. The shock of the explosion threw down some scales at the other end of the platform many feet away. The scales struck the plaintiff, causing injuries for which she sues.

The conduct of the defendant's guard, if a wrong in its relation to the holder of the package, was not a wrong in its relation to the plaintiff, standing far away. Relatively to her it was not negligence at all. Nothing in the situation gave notice that the falling package had in it the potency of peril to persons thus removed. Negligence is not actionable unless it involves the invasion of a legally protected interest, the violation of a right. "Proof of negligence in the air, so to speak, will not do." Pollock, Tort (11th Ed.) p. 455 ***.

The plaintiff, as she stood upon the platform of the station, might claim to be protected against intentional invasion of her bodily security. Such invasion is not charged. She might claim to be protected against unintentional invasion by conduct involving in the thought of reasonable men an unreasonable hazard that such invasion would ensue. These, from the point of view of the law, were the bounds of her immunity, with perhaps some rare exceptions, survival for the most part of ancient forms of liability, where conduct is held to be at the peril of the actor. [C] If no hazard was apparent to the eye of ordinary vigilance, an act innocent and harmless, at least to outward seeming, with reference to her, did not take to itself the quality of a tort because it happened to be a wrong, though apparently not one involving the risk of bodily insecurity, with reference to some one else. "In every instance, before negligence

can be predicated of a given act, back of the act must be sought and found a duty to the individual complaining, the observance of which would have averted or avoided the injury." McSherry, C.J., in West Virginia Central & P.R. Co. v. State, 96 Md. 652, 666, 54 A. 669, 671. [Cc]

"The ideas of negligence and duty are strictly correlative." Bowen, L.J., in Thomas v. Quartermaine, 18 Q.B.D. 685, 694. The plaintiff sues in her own right for a wrong personal to her, and not as the vicarious beneficiary of a breach of duty to another.

A different conclusion will involve us, and swiftly too, in a maze of contradictions. A guard stumbles over a package which has been left upon a platform. It seems to be a bundle of newspapers. It turns out to be a can of dynamite. To the eye of ordinary vigilance, the bundle is abandoned waste, which may be kicked or trod on with impunity. Is a passenger at the other end of the platform protected by the law against the unsuspected hazard concealed beneath the waste? If not, is the result to be any different, so far as the distant passenger is concerned, when the guard stumbles over a valise which a truckman or a porter has left upon

the walk? The passenger far away, if the victim of a wrong at all, has a cause of action, not derivative, but original and primary. His claim to be protected against invasion of his bodily security is neither greater nor less because the act resulting in the invasion is a wrong to another far removed. In this case, the rights that are said to have been violated, the interests said to have been invaded, are not even of the same order. The man was not injured in his person or even put

in danger. The purpose of the act, as well as its effect, was to make his person safe. If there was a wrong to him at all, which may very well be doubted, it was a wrong to a property interest only, the safety of his package. Out of this wrong to property, which threatened injury to nothing else, there has passed, we are told, to the plaintiff by derivation or succession a right of action for the invasion of an interest of another order, the right to bodily security. The diversity of interests emphasizes the futility of the effort to build the plaintiffs right upon the basis of a wrong to some one else. Even then, the orbit of the danger as disclosed to the eye of reasonable vigilance would be the orbit of the duty. ***

The argument for the plaintiff is built upon the shifting meanings of such words as "wrong" and "wrongful," and shares their instability. What the plaintiff must show is "a wrong" to herself; i.e., a violation of her own right, and not merely a wrong to some one else, nor conduct, "wrongful" because unsocial, but not "a wrong" to any one. ***The risk reasonably to be perceived defines the duty to be obeyed and risk imports relation; it is risk to another or to others within the range of apprehension. [C] This does not mean, of course, that one who launches a destructive force is always relieved of liability, if the force, though known to be destructive, pursues an unexpected path. "It was not necessary that the defendant should have had notice of the particular method in which an accident would occur, if the possibility of an accident was clear to the ordinarily prudent eye." Munsey v. Webb, 231 U.S. 150, 156. [Cc] Some acts, such as shooting, are so imminently dangerous to any one who may come within reach of the missile however unexpectedly, as to impose a duty of prevision not far from that of an insurer. Even today, and

much oftener in earlier stages of the law, one acts some times at one's peril. [Cc] Under this head, it may be, fall certain cases of what is known as transferred intent, an act willfully dangerous to A resulting by misadventure in injury to B. [Cc] These cases aside, wrong is defined in terms of the natural or probable, at least when unintentional. [Cc] The range of reasonable apprehension is at times a question for the court, and at times, if varying inferences are possible, a question for the jury. Here, by concession, there was nothing in the situation to suggest to the most cautious mind that the parcel wrapped in newspaper would spread wreckage through the station. If the guard had thrown it down knowingly and willfully, he would not have threatened the plaintiff's safety, so far as appearances could warn him. His conduct would not have involved, even then, an unreasonable probability of invasion of her bodily security. Liability can be no greater where the act is inadvertent.

355

[Caption: Scene of Palsgraf accident, taken a few years later but with no change in features.]

Negligence, like risk, is thus a term of relation. Negligence in the abstract, apart from things related, is surely not a tort, if indeed it is understandable at all. ***

The law of causation, remote or proximate, is thus foreign to the case before us. The question of liability is always anterior to the question of the measure of the consequences that go with liability. If there is no tort to be redressed, there is no occasion to consider what damage might be recovered if there were a finding of a tort. We may assume, without deciding, that negligence, not at large or in the

abstract, but in relation to the plaintiff, would entail liability for any and all consequences, however novel or extraordinary. [Cc]

There is room for argument that a distinction is to be drawn according to the diversity of interests invaded by the act, as where conduct negligent in that it threatens an insignificant invasion of an interest in property results in an unforeseeable invasion of an interest of another order, as, e.g., one of bodily security. Perhaps other distinctions may be necessary. We do not go into the question now. The consequences to be followed must first be rooted in a wrong.

The judgment of the Appellate Division and that of the Trial Term should be reversed, and the complaint dismissed, with costs in all courts. ANDREWS, J. (dissenting). Assisting a passenger to board a train, the defendant's servant negligently knocked a package from his arms. It fell between the platform and the cars. Of its contents the servant knew and could know nothing. A violent explosion followed. The concussion broke

356

some scales standing a considerable distance away. In falling, they injured the plaintiff, an intending passenger.

Upon these facts, may she recover the damages she has suffered in an action brought against the master? The result we shall reach depends upon our theory as to the nature of negligence. Is it a relative concept--the breach of some duty owing to a particular person or to particular persons? Or, where there is an act which unreasonably threatens the safety of others, is the doer liable for all its proximate consequences, even where they result in injury to one

who would generally be thought to be outside the radius of danger? This is not a mere dispute as to words. We might not believe that to the average mind the dropping of the bundle would seem to involve the probability of harm to the plaintiff standing many feet away whatever might be the case as to the owner or to one so near as to be likely to be struck by its fall. If, however, we adopt the second hypothesis, we have to inquire only as to the relation between cause and effect. We deal in terms of proximate cause, not of negligence. ***

But we are told that "there is no negligence unless there is in the particular case a legal duty to take care, and this duty must be one which is owed to the plaintiff himself and not merely to others." Salmond Torts (6th Ed.) 24. This I think too narrow a conception. Where there is the unreasonable act, and some right that may be affected there is negligence whether damage does or does not result. That is immaterial. Should we drive down Broadway at a reckless speed, we are negligent whether we strike an approaching car or miss it by an inch. The act itself is wrongful. It is a wrong not only to those who happen to be within the radius of danger, but to all who might have been there--a wrong to the public at large. Such is the language of the street. Such the language of the courts when speaking of contributory negligence. ***

Due care is a duty imposed on each one of us to protect society from unnecessary danger, not to protect A, B, or C alone.

It may well be that there is no such thing as negligence in the abstract. "Proof of negligence in the air, so to speak, will not do." In an empty world negligence would not exist. It does involve a

relationship between man and his fellows, but not merely a relationship between man and those whom he might reasonably expect his act would injure; rather, a relationship between him and those whom he does in fact injure. If his act has a tendency to harm some one, it harms him a mile away as surely as it does those on the scene. ***

The proposition is this: Every one owes to the world at large the duty of refraining from those acts that may unreasonably threaten the safety of others. Such an act occurs. Not only is he wronged to whom harm might reasonably be expected to result, but he also who is in fact injured, even if he be outside what would generally be thought the danger zone. There needs be duty due the one complaining, but this is not a duty to a particular individual because as to him harm might be expected. Harm

357

to some one being the natural result of the act, not only that one alone, but all those in fact injured may complain. We have never, I think, held otherwise. ***Unreasonable risk being taken, its consequences are not confined to those who might probably be hurt. ***An overturned lantern may burn all Chicago. We may follow the fire from the shed to the last building. We rightly say the fire started by the lantern caused its destruction.

A cause, but not the proximate cause. What we do mean by the word "proximate" is that, because of convenience, of public policy, of a rough sense of justice, the law arbitrarily declines to trace a series of events beyond a certain point. This is not logic. It is practical politics. Take our rule as to fires. Sparks from my burning haystack

set on fire my house and my neighbor's. I may recover from a negligent railroad. He may not. Yet the wrongful act as directly harmed the one as the other. We may regret that the line was drawn just where it was, but drawn somewhere it had to be. We said the act of the railroad was not the proximate cause of our neighbor's fire. Cause it surely was. The words we used were simply indicative of our notions of public policy. Other courts think differently. ***

Take the illustration given in an unpublished manuscript by a distinguished and helpful writer on the law of torts. A chauffeur negligently collides with another car which is filled with dynamite, although he could not know it. An explosion follows. A, walking on the sidewalk nearby, is killed. B, sitting in a window of a building opposite, is cut by flying glass. C, likewise sitting in a window a block away, is similarly injured. And a further illustration: A nursemaid, ten blocks away, startled by the noise, involuntarily drops a baby from her arms to the walk. We are told that C may not recover while A may. As to B it is a question for court or jury. We will agree that the baby might not. Because, we are again told, the chauffeur had no reason to believe his conduct involved any risk of injuring either C or the baby. As to them he was not negligent.

But the chauffeur being negligent in risking the collision, his belief that the scope of the harm he might do would be limited is immaterial. His act unreasonably jeopardized the safety of any one who might be affected by it. C's injury and that of the baby were directly traceable to the collision. Without that, the injury would not have happened. C had the right to sit in his office, secure from such dangers. The baby was entitled to use the sidewalk with reasonable safety.

The true theory is, it seems to me, that the injury to C, if in truth he is to be denied recovery, and the injury to the baby, is that their several injuries were not the proximate result of the negligence. And here not what the chauffeur had reason to believe would be the result of his conduct, but what the prudent would foresee, may have a bearing--may have some bearing, for the problem of proximate cause is not to be solved by any one consideration. It is all a question of expediency. There are no

358

fixed rules to govern our judgment. There are simply matters of which we may take account. ***There is in truth little to guide us other than common sense.

There are some hints that may help us. The proximate cause, involved as it may be with many other causes, must be, at the least, something without which the event would not happen. The court must ask itself whether there was a natural and continuous sequence between cause and effect. Was the one a substantial factor in producing the other? Was there a direct connection between them, without too many intervening causes? Is the effect of cause on result not too attenuated? Is the cause likely, in the usual judgment of mankind, to produce the result? Or, by the exercise of prudent foresight, could the result be foreseen? Is the result too remote from the cause, and here we consider remoteness in time and space. [C] Clearly we must so consider, for the greater the distance either in time or space, the more surely do other causes intervene to affect the result. When a lantern is overturned, the firing of a shed is a fairly direct consequence. Many things contribute to

the spread of the conflagration--the force of the wind, the direction and width of streets, the character of intervening structures, other factors. We draw an uncertain and wavering line, but draw it we must as best we can.

***Once again, it is all a question of fair judgment, always keeping in mind the fact that we endeavor to make a rule in each case that will be practical and in keeping with the general understanding of mankind.

Here another question must be answered. In the case supposed, it is said, and said correctly, that the chauffeur is liable for the direct effect of the explosion, although he had no reason to suppose it would follow a collision. "The fact that the injury occurred in a different manner than that which might have been expected does not prevent the chauffeur's negligence from being in law the cause of the injury." But the natural results of a negligent act--the results which a prudent man would or should foresee--do have a bearing upon the decision as to proximate cause. We have said so repeatedly. What should be foreseen? No human foresight would suggest that a collision itself might injure one a block away. On the contrary, given an explosion, such a possibility might be reasonably expected. I think the direct connection, the foresight of which the courts speak, assumes prevision of the explosion, for the immediate results of which, at least, the chauffeur is responsible.

It may be said this is unjust. Why? In fairness he should make good every injury flowing from his negligence. Not because of tenderness toward him we say he need not answer for all that follows his wrong. We look back to the catastrophe, the fire kindled by the spark, or the

explosion. We trace the consequences, not indefinitely, but to a certain point. And to aid us in fixing that point we ask what might ordinarily be expected to follow the fire or the explosion.

359

This last suggestion is the factor which must determine the case before us. The act upon which defendant's liability rests is knocking an apparently harmless package onto the platform. The act was negligent. For its proximate consequences the defendant is liable. If its contents were broken, to the owner; if it fell upon and crushed a passenger's foot, then to him; if it exploded and injured one in the immediate vicinity, to him also as to A in the illustration. Mrs. Palsgraf was standing some distance away. How far cannot be told from the record--apparently 25 or 30 feet, perhaps less. Except for the explosion, she would not have been injured. We are told by the appellant in his brief, "It cannot be denied that the explosion was the direct cause of the plaintiff's injuries." So it was a substantial factor in producing the result--there was here a natural and continuous sequence--direct connection. The only intervening cause was that, instead of blowing her to the ground, the concussion smashed the weighing machine which in turn fell upon her. There was no remoteness in time, little in space. And surely, given such an explosion as here, it needed no great foresight to predict that the natural result would be to injure one on the platform at no greater distance from its scene than was the plaintiff. Just how no one might be able to predict. Whether by flying fragments, by broken glass, by wreckage of machines or structures no one could say. But injury in some form was most probable.

Under these circumstances I cannot say as a matter of law that the plaintiff's injuries were not the proximate result of the negligence. That is all we have before us. The court refused to so charge. No request was made to submit the matter to the jury as a question of fact, even would that have been proper upon the record before us.

The judgment appealed from should be affirmed, with costs.

Pound, Lehman and Kellogg, JJ., concur with Cardozo, C.J. ANDREWS, J., dissents in opinion in which CRANE and O'BRIEN, JJ., concur.

Judgment reversed, etc.

NOTES AND QUESTIONS

1. Plaintiff on a motion for reargument pointed out that Mrs. Palsgraf stood much closer to the scene of the explosion than the majority opinion would suggest. Would this fact be likely to alter Judge Cardozo's decision in the case? See Palsgraf v. Long Island R. Co., 249 N.Y. 511, 164 N.E. 564 (1928).

2. A study of the record in this case indicates that the testimony at trial was different from the "ball of fire" facts in the opinion. No one testified to seeing the scale fall over. An appreciable interval elapsed after the first noise and smoke, during which Mrs. Palsgraf said to her daughter, "Elizabeth, turn your back." Then, "the scale blew and hit me in the side." Plaintiffs original complaint, before amendment, alleged that the scale was

knocked over by a stampede of frightened passengers. If that is what happened, would Judge Cardozo allow Mrs. Palsgraf to recover for

her injuries? Would Judge Andrews?

The news story in the New York Times for August 25, 1924, p. 1, col. 4, differs in numerous details. It lists 13 persons injured, including Helen Polsgraf [sic], whose injury was "shock." It describes the events as happening at 11:25 a.m. at the East New York station, under the Atlantic Avenue stations, and a transfer point. There was a large crowd of excursionists, "jostling and pushing" to board a Jamaica express train. Three men, each carrying a large package, sought to board the train and a package fell to the tracks below. [The witnesses had testified that the package fell between the car and the tracks and was dragged along as the car moved.] A large explosion rocked the car and tore away part of the platform and "overthrew a penny weighing machine more than ten feet away," smashing the glass and wrecking its mechanism. The police surmised that the three men, who disappeared, were Italians "bound for an Italian celebration somewhere on Long Island, where fireworks and bombs were to play an important role." The police decided that the event was an accident, with the man dropping the exploding package being jostled by the crowd. One of the other men dropped his parcel in the station as he fled, and it was found to contain fireworks of various kinds.

Further discussion of the facts is to be found in Prosser, Palsgraf Revisited, 52 Mich.L.Rev. 1 (1953); J. Noonan, Persons and Masks of the Law, Chapter 4 (1976); Palsgraf Kin Tell Human Side of Famed Case, 66 Harv.L.Record [No. 8] 1 (Apr. 14, 1978); and Wm. H. Manz, Palsgraf: Cardozo's Urban Legend?, 107 Dickinson L. Rev. 785 (2003). On the relationship of the case to the Restatement (Second) of Torts, see Prosser and Noonan, supra, and R. Keeton, A

Palsgraf Anecdote, 56 Tex.L.Rev. 513 (1978). See also Cardi, Purging Foreseeability: The New Vision of Duty and Judicial Power in the Proposed Restatement (Third) of Torts, 58 Vanderbilt L.Rev. 739 (2005).

3. Accepting the facts as stated, Mrs. Palsgraf was a passenger. She had bought her ticket, and started her trip by going upon the platform. Did the defendant owe her no duty? Was there no relation between them? This is ignored by both opinions. See Goldberg and Zipursky, The Moral of MacPherson, 146 U. Pa. L. Rev. 1733 (1998) (critiquing Prosser's influence on tort law through his treatment of the duty concept in proximate cause cases like Palsgraf).

4. How does the decision square with In re Polemis, page 343? The Restatement of Torts approved both cases, in § 281, and in § 433, comment e. Are they consistent?

5. Both opinions in Palsgraf have been cited hundreds of times; almost every practicing lawyer knows the case by name and it has served as a stimulus for legal writers to work out their own ideas, and endeavor to line up "duty" and "proximate cause."

6. How important is all this as a practical matter? How often will a case involve direct causation and an unforeseeable plaintiff? In one recurring

situation, a vehicle negligently strikes someone whose body then strikes plaintiff who had been in a position of apparent safety. Is plaintiff "unforeseeable"? A number of courts have allowed recovery. See Kommerstad v. Great N.R. Co., 120 Minn. 376, 139 N.W. 713

(1913); Alabama Great S.R. Co. v. Chapman, 80 Ala. 615, 2 So. 738 (1887); Wolfe v. Checker Taxi Co., 299 Mass. 225, 12 N.E.2d 849 (1938). On the other hand, the Supreme Court of Pennsylvania has twice declared that this fact pattern presents an "unforeseeable" plaintiff. See Wood v. Pennsylvania R. Co., 177 Pa. 306, 35 A. 699 (1896) (train); Dahlstrom v. Shrum, 368 Pa. 423, 84 A.2d 289 (1951) (bus). What if a train strikes a commuter who had dashed across the tracks in front of it due to the commuter's negligence--not the railroad's--and the commuter's body strikes plaintiff who is standing a hundred feet away awaiting her own train? Foreseeable plaintiff? Cf. Zokhrabov v. Jeung-Hee Park, 357 Ill. Dec. 637, 963 N.E.2d 1035 (Ill. App. 2011) (reversing trial court's grant of summary judgment for defendant commuter's estate based on defendant's "no duty" argument and remanding for jury to consider breach and proximate cause).

7. Families of some of the victims of September 11th terrorist attacks filed claims against airlines, airport security companies, and airport operators for negligently failing to prevent the attacks. The defendants admitted that they owed a duty to their passengers, but argued that they did not owe a duty to protect those on the ground. Were those present in the Twin Towers foreseeable plaintiffs? Note that New York, the home of the Palsgraf decision, is also the source of controlling law for this diversity case. In re September 11 Litigation, 280 F.Supp.2d 279, 293 (S.D.N.Y. 2003) ("We live in the vicinity of busy airports, and we work in tall office towers, depending on others to protect us from the willful desire of terrorists to do us harm.... [Defendants] perform their screening duties, not only for those boarding airplanes, but also for society generally. It is both

their expectation, and ours, that the duty of screening was performed for the benefit of passengers and those on the ground, including those present in the Twin Towers on the morning of September 11, 2001.")

8. What about a bank that issued letters of credit that helped finance terrorist activities by paying for supplies that were converted into chemical weapons? In Stutts v. De Dietrich Group, 2006 WL 1867060 (E.D.N.Y.), plaintiffs who had been injured by exposure to sarin nerve gas, mustard gas, and other chemical weapons stored in facilities in Iraq sought relief from the banks that had supplied the letters of credit and the suppliers of the raw materials for the chemical weapons. In dismissing their complaint, the court relied upon Palsgraf'.

In Palsgraf v. Long Island R.R., 248 N.Y. 339, 344 (1928), Judge Cardozo, although in a decidedly different context and yet with peculiar relevance to what we decide here, penned the following familiar phrase: "The risk reasonably to be perceived defines the duty to be obeyed." What the plaintiffs essentially ask the Court to accept is that by providing letters of credit to the manufacturers of chemicals, the Bank Defendants should have perceived the risk that those chemicals would be sold to Iraq; that Saddam Hussein

would use those chemicals to manufacture lethal weapons; that those weapons would be stockpiled in a location that would one day be bombed by coalition forces; that the bombs would hit and detonate those weapons; that the detonation would cause the toxic emissions to be released; that those emissions would permeate the

atmosphere; that the plaintiffs would be present in that atmosphere, inhale those emissions and sustain the injuries alleged. Given that procession of events, this Court is driven to conclude that there was nothing to suggest to the most cautious mind that a letter of credit would cause the harm the plaintiffs allege. To attribute such foresight to the Banks is to attribute a prescience that is beyond human ken.

9. For some cases following the majority opinion in Palsgraf, see Busta v. Columbus Hospital Corp., 276 Mont. 342, 916 P.2d 122, 133 (1996) ("Any discussion of foreseeability as it relates to liability law begins with the oft-cited decision of the Court of Appeals of New York in Palsgraf v. Long Island Railroad Co."); Edwards v. Honeywell, Inc., 50 F.3d 484 (7th Cir. 1995) (Indiana, which follows Palsgraf's exclusion of the unforeseeable victim, would not permit firefighter's widow to recover in case against alarm company whose negligence caused a delay in the notification of the fire department); Tucker v. Collar, 79 Ariz. 141, 285 P.2d 178 (1955) (defective machinery supplied by defendant to a tenant started a fire that burned the landlord's building); Radigan v. W.J. Halloran Co., 97 R.I. 122, 196 A.2d 160 (1963) (defendant negligently brought a crane into contact with an uninsulated high tension power line, and electricity passed through the crane, through an electrical conduit in the ground, and burned a hole in a gas main, which ultimately resulted in explosion of gas on the third floor of a fire station).

The Palsgraf dissenting opinion has been followed in other jurisdictions. See Stephenson v. Universal Metrics, Inc., 251 Wis.2d 171, 641 N.W.2d 158 (2002) (noting that Wisconsin follows the approach of the dissent in the "well- known Palsgraf decision"); Jackson v. B. Lowenstein & Bros., 175 Tenn. 535, 136 S.W.2d 495

(1940) (customer in department store fell on a defective mat at the top of the stairway, and then her potential rescuer jostled another customer who fell and injured plaintiff who was around the corner of the stairs).

Yun v. Ford Motor Co.

Superior Court of New Jersey, Appellate Division, 1994.

276 N.J.Super. 142, 647 A.2d 841.

Villanueva, J. ***

I.

On November 27, 1988, between 11:10 p.m. and 11:40 p.m., Chang was a passenger in a 1987 Ford van owned and driven by his daughter, Yun Cho Shim (Yun), northbound in the local lanes of the Garden State Parkway (Parkway). While driving on the Parkway returning from

363

Atlantic City, Yun heard a "rattling type" noise coming from the rear of the van. ***[T]he plastic cover and spare tire and part of the support bracket which was screwed to the rear of the van landed directly behind Yun's van and then rolled across both lanes of traffic or were pushed there by another vehicle, ultimately coming to a rest against the wooden guard rail separating the Parkway lanes.

Yun safely drove the van onto the right berm of the highway and stopped. Chang, a rear seat passenger who was sixty-five years old at the time, exited the vehicle, then ran across two lanes of the dark, rain- slicked Parkway and retrieved the spare tire and some of the

other parts. During the course of returning back to the Ford van across the Parkway, Chang was struck by the vehicle operated by defendant Precious Linderman. ***

[Yun, as representative of her father's estate, sued the Lindermans, the driver and owner of the car; Ford, the manufacturer of the van; Miller, the manufacturer of the spare tire assembly; Universal, which converted the chassis and installed the spare tire assembly; Castle, the dealer; and Kim's Mobile Service Center, which had changed the oil about a month before the accident and pointed out to Ms. Yun that the spare tire assembly was bent. She instructed Kim not to fix it because it had been damaged in an accident and she was waiting for the other driver's insurance company to handle having it repaired.]

II.

With a broad brush, plaintiffs seek to reverse the summary judgment granted to all defendants except Lindermans [who had settled]. Plaintiffs in their appellate argument do not even mention any of the defendants by name or capacity, rather they assert that the issue of proximate cause is a question for the jury.

Plaintiffs abandoned their claim against Ford apparently because the evidence showed that the spare tire assembly was not part of the vehicle when it left Ford's factory. At the motion for summary judgment the plaintiffs' attorney specifically told the court that he did "not oppose the motion made by Ford Motor Company." Having so stated, plaintiffs have no standing to appeal against Ford. [Cc]

III.

Kim, in its motion for summary judgment, relied upon the lack of proximate cause argument made by the other defendants but also asserted that there was no legal basis for plaintiffs' claim against Kim. Furthermore, plaintiffs' expert did not impute any negligence against Kim. Rather, he opined that the defect was weld failure with which Kim had nothing to do.

Kim alerted Chang and Yun to the problem but Chang and Yun told Kim that they did not want Kim to repair it. Kim had no duty to repair and therefore did not breach any duty. [C] An order or judgment will be affirmed on appeal if it is correct, even though the judge gave the wrong

364

reasons for it. [Cc] This is true even if the judge erroneously declined to reach the merits of the issue. [C]

IV.

Because the initial complaint was filed on May 17, 1990, it falls within the scope of the Products Liability Act ***The Act does not affect the requirement of causation, which is an essential element of an action based in either strict liability or negligence. [Cc]

Accordingly, plaintiffs must prove that the alleged defect in the spare tire bracket assembly proximately caused the injuries sustained by Chang. [C] Proximate cause is "any cause which in the natural and continuous sequence, unbroken by an efficient intervening cause, produces the result complained of and without which the result would not have occurred." [Cc]

Proximate cause has been described as a standard for limiting liability for the consequences of an act based "upon mixed considerations of logic, common sense, justice, policy and precedent." [Cc] Proximate cause "must be limited to those causes which are so closely connected with the result and of such significance that the law is justified in imposing liability." [C] Under the most liberal interpretation, conduct constituting proximate cause "need only be a cause which sets off a foreseeable sequence of consequences, unbroken by any superseding cause, and which is a substantial factor in producing the particular injury." [C] Thus, our focus must be on whether Chang's conduct was reasonably foreseeable versus "highly extraordinary," thereby breaking the chain of causation. [C]

The present case presents extraordinary circumstances. After Ford manufactured a van, spare tire assembly was attached to the van by Universal. Assuming plaintiffs' allegations are true, an alleged defect in the spare tire assembly caused the spare tire and other parts to fall off the van and roll across the Parkway. Because the van in which Chang was traveling came safely to rest at the side of the Parkway, his actions were "highly extraordinary." Chang's attempt to retrieve the parts involved crossing the Parkway in both directions--an activity which cannot be described as anything short of extraordinarily dangerous, if not suicidal, as the action proved. In the process of returning from the middle of the Parkway, Chang was struck by Mrs. Linderman and fatally injured. Although cited in the context of the foreseeability of a person's emotional reaction to a given event, the New Jersey Supreme Court aptly noted in Caputzal [v. The Lindsay Co., 48 N.J. 69, 222 A.2d 513 (1966)], supra:

"Generally a defendant's standard of conduct is measured by the reaction to be expected of normal persons...." [C]

Logic and fairness dictate that liability should not extend to injuries received as a result of Chang's senseless decision to cross the Parkway under such dangerous conditions. Common sense should have persuaded Chang, who was only a passenger, to wait for assistance or abandon the

365

bald tire and damaged assembly. The van could have been driven safely home. ***

[T]he alleged defect in the spare tire assembly did not injure Chang. The driver of the van was able to pull the vehicle to the side of the road safely and without incident. Chang's injury occurred after he decided to leave the vehicle and cross the Parkway and return where he was struck. At most, the presence of the spare tire created a "condition upon which the subsequent intervening force acted" and in such case there is no proximate cause relationship between the defective product and the injury. [Cc]

A tortfeasor will be held responsible for his negligent conduct if it is a "substantial factor" in bringing about plaintiffs injuries. [C] Where, however, concurrent forces are involved, the manufacturer of a defective product may negate strict liability upon a showing of an intervening, superseding cause or the existence of another "sole proximate cause" of the resulting injury. [Cc] Assuming, arguendo, that the spare tire assembly was a substantial factor in causing Chang's injuries, Chang's highly extraordinary and dangerous actions in crossing the Parkway twice with complete disregard for his

own personal safety clearly constitute a superseding and intervening cause of his own injuries. ***The danger involved in crossing a busy highway at night should be apparent to an adolescent, let alone an adult sixty-five years of age.

The allegedly defective product (the spare tire carrier) did not cause Chang's injuries. Chang's and Yun's joint decision, thirty days before this accident, not to repair the allegedly defective assembly and Chang's flagrant disregard for his personal safety by crossing the Parkway late at night and the injuries he received when struck by Linderman's vehicle constitute intervening superseding causes. Logic, common sense, justice and fairness dictate that the alleged product defect was not a proximate cause of Chang's injury.

Usually, the issue of proximate cause is reserved for the jury's determination. [Cc] In certain cases, however, the issue of proximate cause has been held so intertwined with issues of policy as to be treated as a matter of law for the court to determine. [C] This is especially true where the manner or type of harm caused to the plaintiff is unexpected. As the Supreme Court stated in Caputzal: "the idea of non-liability for the highly extraordinary consequence as a question of law for the court has already been recognized in this state." [C] This position is consistent with that of the Restatement (Second) Torts § 435(2) (1965): The actor's conduct may be held not to be a legal cause of harm to another where after the event and looking back from the harm to the actor's negligent conduct, it appears to the court highly extraordinary that it should have brought about the harm. ***

In Jensen v. Schooley's Mountain Inn, 216 N.J. Super. 79, 522 A.2d 1043 (App.Div.), certif. denied, 108 N.J. 181 (1987), the defendant bar served alcoholic beverages to Jensen while he allegedly was visibly intoxicated.

366

After leaving the bar, Jensen drove eight miles, where he "parked his car and, for some unknown reason, began climbing a tree." Id. at 80. The branches of the tree apparently could not support Jensen's weight and one broke, causing Jensen to fall twenty feet to the river bank. Jensen either fell or rolled into the river and drowned. Accepting as true plaintiffs' allegations that the defendant negligently and wrongfully served Jensen, we nonetheless affirmed the trial court's granting of summary judgment in favor of the defendant. We stressed: [L]egal responsibility for the consequences of an act cannot be imposed without limit. The events here transgress the judicial line beyond which liability should not be extended as a matter of fairness or policy. [Id. at 82, 522 A.2d 1043 (citations omitted).]

That principle is equally applicable herein. It was not reasonably foreseeable to defendants that if the spare wheel assembly was defective, and the driver-owner of the car and Chang refused to have it repaired and later while they were driving on the Parkway at night, it fell off but they safely brought the car to a stop on a berm, that Chang would then violate the law by twice crossing the Parkway to go to the median to retrieve the parts and be killed by a passing car. Furthermore, reasonable people could not differ that the continued driving for thirty days with knowledge of the defect and the senseless, and illegal crossing of the Parkway were intervening

superseding causes of the accident which broke the chain of causation.

Affirmed.

BAIME, J., concurring and dissenting: I agree that the judgment in favor of Ford Motor Company should be affirmed because plaintiffs offered no opposition to that defendant's motion for a dismissal of the complaint. [Cc] So too, my careful review of the record fails to disclose facts sufficient to support a negligence claim against Kim's Mobile Service Center. Consequently, the judgment in favor of that defendant should also be affirmed. [C] However, I part company with my colleagues in their affirmance of the Law Division's judgment as to the remaining defendants. I believe that plaintiffs submissions relating to proximate cause were sufficient to defeat the defendants' motion for summary judgment. ***

Ordinarily, questions of proximate cause are left to the jury for its factual determination. [Cc] Likewise, questions of intervening cause are generally within the jury's domain. [Cc] Prosser and Keeton have instructed that: if reasonable persons could differ, either because relevant facts are in dispute or because application of the legal concept of "proximate cause" to the case at hand is an evaluative determination as to which reasonable persons might differ, the issue of "proximate cause" is submitted to the jury with appropriate instructions on the law.

Thus, in any case where there might be reasonable difference of opinion as to the foreseeability of a particular risk, the reasonableness of the defendant's conduct with respect to it, or the normal character of an

intervening cause, the question is for the jury, subject of course to suitable instructions from the court as to the legal conclusion to be drawn as the issue is determined either way. By far the greater number of the cases which have arisen have been of this description; and to this extent it may properly be said that "proximate cause is ordinarily a question of fact for the jury, to be solved by the exercise of good common sense in the consideration of the evidence of each particular case." [Prosser and Keeton on Torts § 45 at 321 (5th ed. 1984).]

Applying these principles, I am convinced that reasonable persons might differ regarding whether the plaintiffs death was proximately caused by the defective spare tire assembly. A jury could find that it was reasonably foreseeable the tire would dislodge and fall onto the roadway while the van was in operation and that the operator or passenger might sustain injuries in his or her attempt to retrieve it. Indeed, some might think it odd if the operator or passenger were to abandon the tire and drive off, especially where, as shown by the record here, traffic is "very light," and "visibility [is] good." And if the operator or passenger were negligent in his or her attempt to retrieve the tire, this would be reflected within the calculus of comparative fault. In other words, the entire incident could reasonably be viewed within an "objective 'realm of foreseeability.'" [C] A jury could also reasonably find that the harm that resulted was not proximately caused by the defective assembly and that fairness and logic demand that defendants be absolved from responsibility. I am of the view that the issue is reasonably debatable and one that should be submitted to the jury for its determination.

I note one final point before leaving the subject. While I recognize the power and duty of a trial judge to bar the jury from considering the question of proximate cause where the consequences of a negligent act are so extraordinary that as a matter of law they cannot be considered "natural," that authority should be exercised sparingly. We judges are strange creatures. It is not that we are less brave than others, but rather by reason of our training, if not our nature, we tend to the conservative. For most of us, prudence and caution are the watchwords. We are rarely rewarded for taking risks. But the rest of the population does not always act the way we do. What may appear strange to judges might seem rather ordinary to others. It thus generally makes sense to have lay people, not judges, make decisions on the question of proximate cause, grounded as that concept is in considerations of foreseeability and fairness. And in that context, a jury might well find it rather ordinary for a person to venture on to the highway on a clear night when there is little traffic in order to retrieve a spare tire that has become dislodged from his vehicle. I would thus reverse as to all defendants except Ford Motor Company and Kim's Mobile Service Center.

[The New Jersey Supreme Court issued a per curiam opinion, reversing the appellate division for the reasons expressed in Judge

368

Baime's dissent. That decision too drew a dissenting opinion. Yun v. Ford Motor Co., 143 N.J. 162, 669 A.2d 1378 (1996).]

NOTES AND QUESTIONS

1. What happens to the case after the New Jersey Supreme Court opinion?

2. The trial court judge, a majority of the panel at the appellate division, and one of seven New Jersey Supreme Court judges found no proximate cause as a matter of law. One dissenting judge at the appellate division and six supreme court judges thought a reasonable jury could find in plaintiff's favor against some of the defendants. What do you think? Note Judge Baime's point about the difficulty inherent in a judge (as opposed to the jury) making decisions about what the reasonable person would do. Do you find that argument persuasive?

3. As in Palsgraf, there are differences in emphasis in the recitation of the facts in the two opinions. For example, the majority calls the Garden State Parkway "dark, rain-slicked," while the dissent notes that it was a "clear night" with "light traffic."

4. If you were representing one of the parties in this case, what would you say to your client about proximate cause and how it was likely to be viewed by the judge or jury? How would you advise your client on whether to settle the case or take it to trial? To appeal?

5. Dealer negligently failed to tighten lug bolts on the wheels of Hairston's newly purchased automobile. A wheel fell off and Hairston brought the car safely to a stop on a bridge. A van stopped behind Hairston's auto, and the driver offered to assist Hairston. Hairston got out and was standing behind his car when Alexander's flatbed truck rammed into the van stopped behind Hairston, propelling the van into Hairston, who was killed. The court held the dealer liable even though the conduct of the driver of the flatbed truck was "inexcusable," because his conduct was not "so highly improbable and extraordinary an occurrence in this series of events as to bear

no reasonable connection to the harm threatened" by the dealer's original negligence. Alexander's negligent driving was therefore within the "area of risk created by the negligence" of dealer not tightening the lug bolts. Hairston v. Alexander Tank and Equipment Co., 310 N.C. 227, 311 S.E.2d 559, 567 (1984).

6. Doctor negligently performed a sterilization procedure and patient became pregnant and gave birth to child with a serious birth defect. Doctor is liable for medical and other costs associated with patient's pregnancy. Is he also liable for the medical costs associated with baby's birth defect and parents' emotional distress due to baby's ill health? Simmerer v. Dabbas, 89 Ohio St.3d 586, 733 N.E.2d 1169 (2000) (even though a negligently performed sterilization may lead to conception and birth of unhealthy child, proximate cause is not established because it contemplates liability for a probable or likely result, not merely a possible one).

369

7. Foreseeability and thus liability usually is a question of fact for the jury. Thompson v. State Farm, 789 Fed. Appx. 90 (10th Cir. 2019) (applying Colorado law) (whether automobile accident proximately caused passenger's subsequent accidental pain medication overdose caused by passenger's use of medication left over from previous prescription is question of fact for jury). But may be ruled on as a matter of law by the judge if no reasonable jury could find in favor of plaintiff. See, for example, Thomas v. Board of Trustees of Nebraska State Colleges, 296 Neb. 726, 895 N.W.2d 692 (2017) (abduction, rape, and murder of student living in dorm room next door to another student who had engaged in some problematic

behavior leading to dormitory discipline not foreseeable as a matter of law).

8. In addition to unforeseeable consequences, the doctrine of proximate cause may be used to cut off liability even though there is cause in fact in cases involving other acts that intervene in the causal link between the defendant's act and the plaintiff's injury.

2. Intervening Causes

Derdiarian v. Felix Contracting Corp.

New York Court of Appeals, 1980.

51 N.Y.2d 308, 414 N.E.2d 666. 434 N.Y.S.2d 166.

[Defendant Felix Contracting Corporation, in performing a contract to install an underground gas main in Mount Vernon, N.Y., had excavated a worksite in the street. Plaintiff Derdiarian, employee of a subcontractor, was engaged in sealing the gas main.]

COOKE, Chief Judge. ***On the afternoon of November 21, 1973, defendant James Dickens suffered an epileptic seizure and lost consciousness, allowing his vehicle to careen into the work site and strike plaintiff with such force as to throw him into the air. When plaintiff landed, he was splattered over his face, head and body with 400 degree boiling hot liquid enamel from a kettle struck by the automobile. The enamel was used in connection with sealing the gas main. Although plaintiffs body ignited into a fire ball, he miraculously survived the incident.

At trial, plaintiff's theory was that defendant Felix had negligently failed to take adequate measures to insure the safety of workers on

the excavation site. ***

To support his claim of an unsafe work site, plaintiff called as a witness Lawrence Lawton, an expert in traffic safety. According to Lawton, the usual and accepted method of safeguarding the workers is to erect a barrier around the excavation. Such a barrier, consisting of a truck, a piece of heavy equipment or a pile of dirt, would keep a car out of the excavation and protect workers from oncoming traffic. The expert testified that the barrier should cover the entire width of the excavation. He also stated that there should have been two flagmen present, rather

than one, and that warning signs should have been posted advising motorists that there was only one lane of traffic and that there was a flagman ahead.

[The trial court judge entered a judgment on the jury verdict in favor of plaintiff. Defendant Felix appealed, arguing there was insufficient evidence for the jury to have found proximate cause between its conduct and plaintiff's injuries. The Appellate Division affirmed.]

***Defendant Felix now argues that plaintiff was injured in a freakish accident, brought about solely by defendant Dickens' negligence, and therefore there was no causal link, as a matter of law, between Felix' breach of duty and plaintiffs injuries.

The concept of proximate cause, or more appropriately legal cause, has proven to be an elusive one, incapable of being precisely defined to cover all situations ***.

Where the acts of a third person intervene between the defendant's conduct and the plaintiff's injury, the causal connection is not automatically severed. In such a case, liability turns upon whether the intervening act is a normal or foreseeable consequence of the situation created by the defendant's negligence. [Cc] If the intervening act is extraordinary under the circumstances, not foreseeable in the normal course of events, or independent of or far removed from the defendant's conduct, it may well be a superseding act which breaks the causal nexus. [Cc] Because questions concerning what is foreseeable and what is normal may be the subject of varying inferences, as is the question of negligence itself, these issues generally are for the fact finder to resolve.

There are certain instances, to be sure, where only one conclusion may be drawn from the established facts and where the question of legal cause may be decided as a matter of law. Those cases generally involve independent intervening acts which operate upon but do not flow from the original negligence. Thus, for instance, we have held that where an automobile lessor negligently supplies a car with a defective trunk lid, it is not liable to the lessee who, while stopped to repair the trunk, was injured by the negligent driving of a third party. [Lessee had pulled into a parking space at the curb and was shutting the trunk when another automobile, parked several car lengths behind, jumped ahead and severely injured him.] [C] Although the renter's negligence undoubtedly served to place the injured party at the site of the accident, the intervening act was divorced from and not the foreseeable risk associated with the original negligence. And the injuries were different in kind than those which would have normally been expected from a defective trunk. In

short, the negligence of the renter merely furnished the occasion for an unrelated act to cause injuries not ordinarily anticipated. [C]

By contrast, in the present case, we cannot say as a matter of law that defendant Dickens' negligence was a superseding cause which interrupted the link between Felix' negligence and plaintiffs injuries.

371

From the evidence in the record, the jury could have found that Felix negligently failed to safeguard the excavation site. A prime hazard associated with such dereliction is the possibility that a driver will negligently enter the work site and cause injury to a worker. That the driver was negligent, or even reckless, does not insulate Felix from liability. [Cc] Nor is it decisive that the driver lost control of the vehicle through a negligent failure to take medication, rather than a driving mistake. [C] The precise manner of the event need not be anticipated. The finder of fact could have concluded that the foreseeable, normal and natural result of the risk created by Felix was the injury of a worker by a car entering the improperly protected work area. An intervening act may not serve as a superseding cause, and relieve an actor of responsibility, where the risk of the intervening act occurring is the very same risk which renders the actor negligent.

In a similar vein, plaintiffs act of placing the kettle on the west side of the excavation does not, as a matter of law, absolve defendant Felix of responsibility. Serious injury, or even death, was a foreseeable consequence of a vehicle crashing through the work area. The injury could have occurred in numerous ways, ranging from a worker being directly struck by the car to the car hitting an object that injures the

worker. Placement of the kettle, or any object in the work area, could affect how the accident occurs and the extent of injuries. That defendant could not anticipate the precise manner of the accident or the exact extent of injuries, however, does not preclude liability as a matter of law where the general risk and character of injuries are foreseeable. ***

For the foregoing reasons, the order of the Appellate Division should be affirmed, with costs.

NOTES AND QUESTIONS

1. Why does the opinion focus on the contractor? What about the driver? Shouldn't he be liable?

2. Note that when courts have decided that the intervening act should cut off liability, it is labelled a "superseding" cause. This is the language used by most courts. But see Control Techniques, Inc. v. Johnson, 762 N.E.2d 104 (Ind. 2002) (Indiana uses the terms "superseding" and "intervening" interchangeably to refer to an act of another that cuts off the liability of the original actor if the ultimate injury was not reasonably foreseeable as the natural and probable consequence of the negligent act).

3. Foreseeability of Intervening Force. The test for determining whether an intervening force constitutes a superseding cause is often couched in terms of foreseeability. See Restatement (Second) of Torts § 447 (1965). A person is deemed to have foreseen the normal consequences of his conduct, but is not responsible for extraordinarily negligent intervening acts of third persons. On considerations important in determining whether an intervening force

is a superseding cause, see Restatement (Second) of Torts § 442 (1965) and Restatement (Third) of Torts: Liability for Physical and

Emotional Harm § 34 (2010). Consider whether the defendant should be liable in the cases that follow.

4. A wrecking company failed to secure a condemned house during salvage, prior to demolition. Trespassers using the house for shelter accidentally started a fire that spread to the building next door. Testimony established that the neighborhood was one frequented by "vagrants" and that it was the custom of the industry to lock and board up buildings during salvage to keep trespassers out. Aetna Ins. Co. v. 3 Oaks Wrecking and Lumber Co., 65 Ill.App. 3d 618, 382 N.E.2d 283, 21 Ill.Dec. 919 (1978) (jury verdict for plaintiff affirmed).

5. Defendant sets off an auto alarm at 4:00 a.m. while attempting to repossess a car. In the resulting confusion, a neighbor is shot. Is the negligent handling of a gun foreseeable under those circumstances or one that interrupts the causal link? Griffith v. Valley of Sun Recovery & Adjustment Bureau, Inc., 126 Ariz. 227, 613 P.2d 1283 (1980) (question of fact for jury).

6. Defendant truck driver causes an accident that is so serious the interstate is shut down and traffic is backed up for a mile. Plaintiffs were the last two cars in the mile long line of cars with their flashers on and had just been passed by a firetruck traveling on the shoulder with its siren and flashers on when another truck driver ran into them at full speed, killing the occupants of both cars. Is the first truck driver liable for the injuries caused by the second truck driver? Baumann v. Zhukov, 802 F.3d 950 (8th Cir. 2015) (applying

Nebraska law) (second truck driver's negligence was an efficient intervening cause that severed the causal connection between first truck driver's negligence and plaintiffs' injuries; no reasonable jury could conclude otherwise). Farmers negligently planted corn up to a ditch at the intersection of rural road, obstructing view of traffic at the uncontrolled intersection. Latzel v. Bartek, 288 Neb. 1, 846 N.W.2d 153 (2014) (affirming trial court's granting of summary judgment to farmers based on ruling that actions of drivers in failing to stop at obstructed view intersection constituted an efficient intervening cause of the collision, which severed the causal connection between the conduct of the farmers and the plaintiff's injury).

7. Around 9:30 p.m., a man, distraught because he recently had been fired from his job at the power company, climbed up a 34,000-volt power pole and threatened to electrocute himself. A crowd formed. About midnight, the police chief of the city ordered the power shut off, the power company complied, and portions of the city went dark. An hour later, two teenagers on their way home from a concert were driving through the city. Driver noticed about 100 yards before an intersection that streetlights and traffic lights were out. He drove through the intersection without stopping because he "wasn't quite up on the rules of the road." His car collided with another car in the intersection and his passenger sued both drivers, the city, the power company, and the man who had threatened suicide. Who should be liable? Quirke v. City of Harvey, 266 Ill.App. 3d 664, 203 Ill.Dec. 536, 639 N.E.2d 1355 (1994).

8. Defendant, under an obligation to furnish a safe place to work, set plaintiff, its employee, at cleaning a coin-operated vending machine with

gasoline in a small room in which there was a lighted gas heater with an open flame. While he was working, a rat escaped from the vending machine and ran to take refuge under the heater, where its fur, impregnated with gasoline fumes, caught fire from the flame. The rat "returned in haste and flames to its original hideout," and exploded the gasoline vapor inside the vending machine, injuring the plaintiff. Is defendant liable? United Novelty Co. v. Daniels, 42 So.2d 395 (Miss.1949).

9. On April Fool's Day, defendant encouraged his daughter to call a friend of his and pretend that she was home alone and frightened. The friend, concerned about the child, jumped into his pick-up truck to go to the child. In his haste, he ran a stop sign and collided with plaintiff's motorcycle. Plaintiff was seriously injured and sued both the driver and the instigator of the practical joke. Who should be liable? Kolar v. Bergo, 280 Mont. 262, 929 P.2d 867 (1996) (jury question).

10. Note that a plaintiffs own conduct can constitute an intervening cause that breaks the causal connection between defendant's negligence and the injury. However, in order to be a superseding cause, plaintiffs conduct must be more than contributory negligence that would be relevant in apportioning negligent conduct. For example, in Mesick v. State of New York, 118 A.D.2d 214, 504 N.Y.S.2d 279 (1986), plaintiffs conduct was not a superseding cause of his injuries when he swung himself from a rope tied to a tree branch out over a water hole and fell onto jagged rocks. There was evidence that the defendant, State of New York, was aware that the

rope had been tied to the tree and was used by people who swam at the water hole.

11. Some jurisdictions have backed away from giving a separate jury instruction on superseding cause, finding that the substance of the doctrine is covered by the proximate cause instruction. Barry v. Quality Steel Products, Inc., 263 Conn. 424, 440, 820 A.2d 258, 268 (2003) ("the term superseding cause merely describes more fully the concept of proximate cause when there is more than one alleged act of negligence, and is not functionally distinct from the determination of whether an act is a proximate cause of the injury suffered by the plaintiff').

12. Act of God. One standard type of "intervening force" is called an "act of God," "vis major" or "force of nature." In Kimble v. Mackintosh Hemphill Co., 359 Pa. 461, 59 A.2d 68, 71--72 (1948), defendant was not relieved of liability when a section of a negligently maintained roof crashed, falling onto and killing plaintiff's decedent. The defendant claimed that the roof collapsed as a result of extremely high winds. The court stated, "We cannot say that the intervening cause [of the high winds] was vis major. One who fails in his duty to remedy a defective or dangerous condition is liable for injuries resulting therefrom, although the immediate cause of the injury is the wind. [Cc] The causal connection is not broken, and the original wrongdoer is liable for the injury sustained." Note how the issue in Kimble differs from Blyth v. Birmingham Waterworks Co., page 155. Is it consistent in principle with the Anderson "twin fires" case, page 322? The Restatement (Second) § 450 defines force of nature, and § 451 outlines the consideration that will make the force

of nature a superseding cause. Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 34, comment d (2010)

374

provides that the actor is liable, even for the result of an extraordinary force of nature, if the risks of that force of nature were risks against which the actor should have taken adequate precautions. In which of the following situations does the intervening force of nature interrupt the causal link between defendant's act and plaintiff's injury?

A. Defendant did not inspect a telephone pole for 14 years and it is then felled during a 12-inch snowfall and injures plaintiff. Bowman v. Columbia Tel. Co., 406 Pa. 455, 179 A.2d 197 (1962) (jury verdict for plaintiff upheld).

B. In the dead of winter, defendant ships plaintiff's apples in an unheated car through the state of Maine. A cold spell sets in, and the apples are frozen. Fox v. Boston & Maine R. Co., 148 Mass. 220, 19 N.E. 222 (1889) (liability).

C. Defendant's negligence damages canvas coverings designed to protect plaintiff's pineapple plants from frost. Before they can be replaced, the plants are killed by a frost. Benedict Pineapple Co. v. Atlantic Coast Line R. Co., 55 Fla. 514, 46 So. 732 (1908) (liability).

D. Defendant charter plane company negligently fails to supply one of its planes with sufficient fuel. The pilot is forced to make an emergency landing on a small island in the Pacific. A volcano erupts and kills a passenger. Cf. Doss v. Big Stone Gap, 145 Va. 520, 134 S.E. 563 (1926) (car struck by crash landing airplane while car was

on road detour that took it near airstrip because defendant had negligently failed to maintain the road from which the car detoured; no liability).

With respect to the use of the term "act of God" as shorthand for this concept, see the criticism in Goldberg v. R. Grier Miller & Sons, Inc., 408 Pa. 1, 182 A.2d 759, 763 (1962). Note that the court is criticizing the term, not the concept.

Judges should have no difficulty in describing these incidents of cosmic convulsion or fierce agitation of the elements, without referring to them as 'acts of God.'

The English language is rich, not poor. In its vast wardrobe there are words with which to clothe every thought, concept and phenomenal thing so as to make that thing readily identifiable by the jury no matter how lacking in formal or higher education it might be. Thus, we have storms, tempests, tornadoes, cyclones, hurricanes, blizzards, monsoons, typhoons, twisters, siroccos, gales, southwesters, duststorms, snowstorms, sandstorms, whirlwinds, wind eddies, not to mention tidal waves, earthquakes, volcanic eruptions and all the other pyrotechnical spectacles of nature which at times turn the world into a stage of colossal drama, were it not that the resulting human suffering robs the blazing scenes of theatrical perspective.

Not only is there no need, but it is actually confusing, to tell the jury that they must determine whether a given mundane turbulence is an 'act of God.' The jury is not chosen to determine what should be rendered unto Caesar and what is to be rendered

unto God. The Trial Judge should instruct the jury that they are to decide whether the alleged blizzard (if a blizzard is blamed for the proved damage), or the cloudburst (if a cloudburst is accused of upsetting the normal state of affairs), or whatever phenomenon in the meteorological armory is accused of doing the damage,--the judge is to direct the jury to decide whether that phenomenon of weather was so unpredictable, so extensive, and so unprecedented in vehemence and destructive fury, that the defendant could not have made preparations to prevent or mitigate the catastrophic effects.

13. Remember that there may be more than one proximate cause of an injury and, therefore, more than one defendant may be held liable. Do you see why it would be prejudicial to the plaintiff to instruct the jury that the defendant's negligence must be "the" proximate cause of the injury?

Watson v. Kentucky & Indiana Bridge & R.R. Co.

Court of Appeals of Kentucky, 1910.

137 Ky. 619, 126 S.W. 146.

[Through the negligence of the defendant railroad, a tank car full of gasoline was derailed and its valve broken, so that the gasoline ran into the street. One Duerr struck a match, igniting the gasoline vapor, and an explosion followed, injuring plaintiff, a bystander. Duerr testified that he struck the match to light a cigar, and that when he dropped the match the explosion occurred before it reached the ground. Other witnesses testified that Duerr had said to a

companion, "Let's go set the damn thing on fire," that he struck the match against a fence and deliberately threw it into the gasoline vapor. The trial court directed a verdict for the defendant railroad, and plaintiff appealed.]

SETTLE, J. ***The lighting of the match by Duerr having resulted in the explosion, the question is, was that act merely a contributing cause, or the efficient and, therefore, proximate cause of appellant's injuries? The question of proximate cause is a question for the jury. In holding that Duerr in lighting or throwing the match acted maliciously or with intent to cause the explosion, the trial court invaded the province of the jury. There was, it is true, evidence tending to prove that the act was wanton or malicious, but also evidence conducing to prove that it was inadvertently or negligently done by Duerr. It was therefore for the jury and not the court to determine from all the evidence whether the lighting of the match was done by Duerr inadvertently or negligently, or whether it was a wanton and malicious act. ***

If the presence on Madison street in the city of Louisville of the great volume of loose gas that arose from the escaping gasoline was caused by the negligence of the appellee Bridge & Railroad Company it seems to us that the probable consequence of its coming in contact with fire and causing an explosion was too plain a proposition to admit of doubt. Indeed, it was most probable that some one would strike a match to light

376

a cigar or for other purposes in the midst of the gas. In our opinion, therefore, the act of one lighting and throwing a match under such

circumstances cannot be said to be the efficient cause of the explosion. It did not of itself produce the explosion, nor could it have done so without the assistance and contribution resulting from the primary negligence, if there was such negligence, on the part of the appellee Bridge & Railroad Company in furnishing the presence of the gas in the street. This conclusion, however, rests upon the theory that Duerr inadvertently or negligently lighted and threw the match in the gas.

If, however, the act of Duerr in lighting the match and throwing it into the vapor or gas arising from the gasoline was malicious, and done for the purpose of causing the explosion, we do not think appellees would be responsible, for while the appellee Bridge & Railroad Company's negligence may have been the efficient cause of the presence of the gas in the street, and it should have understood enough of the consequences thereof to have foreseen that an explosion was likely to result from the inadvertent or negligent lighting of a match by some person who was ignorant of the presence of the gas or of the effect of lighting or throwing a match in it, it could not have foreseen or deemed it probable that one would maliciously or wantonly do such an act for the evil purpose of producing the explosion. Therefore, if the act of Duerr was malicious, we quite agree with the trial court that it was one which the appellees could not reasonably have anticipated or guarded against, and in such case the act of Duerr, and not the primary negligence of the appellee Bridge & Railroad Company, in any of the particulars charged, was the efficient or proximate cause of appellant's injuries. The mere fact that the concurrent cause or intervening act was unforeseen will not relieve the defendant guilty of the primary

negligence from liability, but if the intervening agency is something so unexpected or extraordinary as that he could not or ought not to have anticipated it, he will not be liable, and certainly he is not bound to anticipate the criminal acts of others by which damage is inflicted and hence is not liable therefor.

For the reasons indicated, the judgment is ***reversed as to the Bridge & Railroad Company, and the cause remanded for a new trial consistent with the opinion.

NOTES AND QUESTIONS

1. Intervening Criminal Acts. The principal case continues to be cited frequently, although the Kentucky Supreme Court has since noted that criminal conduct no longer automatically interrupts the causal link in Kentucky. Britton v. Wooten, 817 S.W.2d 443, 451 (1991) (whether the spark that ignited trash negligently allowed to accumulate next to building was ignited accidentally, negligently, intentionally, or even criminally, it may still have been foreseeable and thus would not cut off liability).

2. It is probably impossible to state any comprehensive rule as to when a negligent defendant will continue to be liable after an intervening

criminal act of a third person. See Restatement (Second) of Torts §§ 448-449 (1965) and Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 34, comment e (2010) (intervening acts that are unforeseeable, unusual, or highly culpable may be

outside the scope of the risk). Some of the more common situations in which liability has been found are the following:

A. Defendant, by contract or otherwise, is under a duty to protect plaintiff against criminal misconduct, and fails to do so. See, e.g., Silva v. Showcase Cinemas Concessions of Dedham, Inc., 736 F.2d 810, 813 (1st Cir.1984), cert, denied, 469 U.S. 883 (1984) (applying Massachusetts law), where the court held that a jury could reasonably find that a proximate cause of plaintiffs being stabbed to death was the theatre's failure to patrol adequately its premises.

Sixth grade class was taken from school to a nearby park for a drug awareness program. Student did not appear at the meeting place to return to school and teacher left without her. Walking home alone, she was accosted by students from a nearby junior high school and raped. Bell v. Board of Educ. of the City of New York, 90 N.Y.2d 944, 687 N.E.2d 1325, 665 N.Y.S.2d 42 (1997) (question of fact for jury whether intervening criminal act of another is itself the foreseeable harm that shaped the duty imposed and thus defendant who failed to guard against such conduct would not be relieved of liability).

B. Defendant's affirmative act destroys or defeats a protection that plaintiff has placed around his person or property to guard them against crime. Defendant, who has leased floor space in plaintiff's jewelry store, goes to the store on a holiday, and leaves the key in the front door. Garceau v. Engel, 169 Minn. 62, 210 N.W. 608 (1926). Cf. Southwestern Bell Tel. Co. v. Adams, 199 Ark. 254, 133 S.W.2d 867 (1939) (defendant left windows of plaintiffs warehouse open).

C. Defendant brings into association with plaintiff a person whom he knows or should know to be peculiarly likely to commit crime, under

circumstances creating a recognizable unreasonable risk that he will do so. The security agency for an apartment building hired a security guard with a violent record. The guard used his passkey to gain access to plaintiff's apartment, where he assaulted her. Easley v. Apollo Detective Agency, 69 Ill.App. 3d 920, 26 Ill.Dec. 313, 387 N.E.2d 1241 (1979). Compare Hines v. Garrett, 131 Va. 125, 108 S.E. 690 (1921), where a railroad negligently carried an 18-year-old past her station, and then put her off the train near a place known locally as "Hoboes' Hollow," which the court described as known to be frequented by hoboes, tramps, and questionable characters. On her walk back to town, she was raped by two different unidentified persons. Is the railroad company liable? (Carrier would be liable if it had reason to know of risk to passenger's safety.)

D. Defendant has taken custody of a person of dangerous criminal tendencies, and fails to restrain him. Matron held liable for policeman's death when he was stabbed by juveniles who escaped from a youth center. Christensen v. Epley, 36 Or.App. 535, 585 P.2d 416 (1978). Contra, and much

criticized, was Henderson v. Dade Coal Co., 100 Ga. 568, 28 S.E. 251 (1897), where a company using convict labor negligently guarded a brutal and vicious convict with a record of sexual offenses, and he escaped and raped the plaintiff. What if the convict were only a forger, with no record of violence, and he held up plaintiff with a gun in the course of his escape? Cf. Williams v. State, 308 N.Y. 548, 127 N.E.2d 545 (1955) (no liability because no reason to anticipate violence).

3. These cases are variations on the common situations. Should defendant be liable despite the intervening criminal acts?

A. The State of New York was negligent in having only one attendant in a maximum-security closed ward. This led to the escape of a known dangerous psychotic. Some four hours after this occurred the escapee chanced upon an automobile with the keys in it, drove away, and collided with plaintiff's automobile. Should the State be liable for this consequence? Dunn v. State, 29 N.Y.2d 313, 277 N.E.2d 647, 327 N.Y.S.2d 622 (1971) (no proximate cause).

B. Defendant insurance company issued a policy on the life of a child, payable to her aunt as beneficiary. Under state law sale of such a policy was prohibited because the aunt did not have an insurable interest in the life of the child. The aunt murdered the child in the hope of collecting the life insurance. Should the insurance company be liable to the child's parents in a wrongful death action? See Liberty Nat'l Life Ins. Co. v. Weldon, 267 Ala. 171, 100 So.2d 696 (1957) (yes, because type of harm statute designed to protect against and therefore foreseeable).

C. While driving a Ford Explorer in a remote area in the early morning hours, driver's Firestone Wilderness AT radial tire failed, rendering her vehicle inoperable. While she was stranded, a stranger raped and murdered her. Her parents sued Ford and Firestone, alleging that defendants should have foreseen that a defective tire could expose drivers to criminal behavior, such as might be encountered in dark parking lots or during breakdowns in remote areas. Should the manufacturers be held liable for driver's wrongful death? Stahlecker v. Ford Motor Co., 266 Neb. 601, 667 N.W.2d 244

(2003) (upholding trial court judge's ruling that general awareness that there are "bad people in society who do bad things" was insufficient to establish foreseeability). But see Walters v. UPMC Presbyterian Shadyside, 646 Pa. 746, 187 A.3d 214 (Pa. 2018) (Pennsylvania hospital that terminated worker for stealing opioids and reusing syringes to feed his opioid addiction liable to patients in Kansas who contracted hepatitis C from worker in his new job there because Pennsylvania hospital had not reported worker to law enforcement when it fired him).

D. Promoters of a gun show were negligent in providing security and several minors were able to gain admission and steal handguns and ammunition. Later that night, while deliberately skidding their car on snow- covered roads to slide into trash cans, they were confronted by plaintiffs. One of the teenagers shot both of the plaintiffs with a gun stolen from the gun show. Should the promoters be liable? Pavlides v. Niles Gun Show, Inc., 93

379

Ohio App.3d 46, 637 N.E.2d 404 (1994) (reasonable minds could differ whether such criminal conduct was foreseeable).

E. Driver was on her way home when a fifteen-year-old dropped a twenty-pound chunk of concrete from an overpass onto her car, killing her. Her family filed suit against the highway department, alleging that the negligence of its employees in inadequately fencing the overpass, allowing loose pieces of concrete to be left there, and failing to light it properly caused the death. Should the highway department be liable? State ex rel. Missouri Hwy. and Transp. Com. v. Dierker, 961 S.W.2d 58 (Mo. 1998) (no proximate cause).

F. Teenager purchased a one-pint container of a drain cleaner called Liquid Fire from Ace Hardware and took it with her to the home of a classmate, confronting classmate on her front porch about an incident involving teenager's boyfriend. They argued and teenager threw the Liquid Fire at her classmate. It missed the target and hit classmate's brother who was seriously burned. The brother sued Ace Hardware and Liquid Fire's manufacturer, claiming they should be held strictly liable for selling an inherently dangerous product. Briscoe v. Amazing Products, Inc., 23 S.W.3d 228 (Ky. App. 2000) (intentional criminal conduct of teenager is a factor of such extraordinary, unforeseeable nature as to relieve the original wrongdoers of liability). Plaintiff also had argued that defendants failed to provide adequate warnings of the severity of the injury the product would cause when brought into contact with skin. As a review of cause in fact, explain why that allegation would fail.

G. Defendant manufactured ammonium nitrate, a chemical used in both fertilizer and explosives, and sold it through several intermediaries to a terrorist who mixed it with fuel oil and used it to blow up the Murrah Federal Building in Oklahoma City. Plaintiffs, who were injured or whose family members were killed in the blast, allege that the chemical sold to the farm co-op was explosive grade rather than fertilizer grade. Should the manufacturer or the farm co-op that sold the chemical be liable? Gaines-Tabb v. ICI Explosives, USA, Inc., 160 F.3d 613, 620 (10th Cir.1998) (applying Oklahoma law) ("When the intervening act is intentionally tortious or criminal, it is more likely to be considered independent.") See also Port Authority of N.Y. and N.J. v. Arcadian Corp., 189 F.3d 305 (3d

Cir.1999) (applying New York and New Jersey law) (accord, similar allegations, World Trade Center bombing).

4. Keys Left in Car. One fairly common proximate-cause puzzle involves an intervening criminal act and subsequent negligence by the intervenor. This occurs when defendant leaves keys in the ignition of his unlocked automobile. A thief drives off with the vehicle and negligently injures plaintiff in a subsequent collision. See, for example, Kozicki v. Dragon, 255 Neb. 248, 583 N.W.2d 336 (1998) (teenage thief testified that four or five of the cars she had stolen had ended up wrecked and police officer submitted affidavit that stolen vehicles are more likely to be involved in accidents) and Snell v. Norwalk Yellow Cab, Inc., 332 Conn. 720, 212 A.3d 646 (2019) (joy riding teens rear-ended vehicle, drove up on curb to get away from accident, and injured pedestrian on sidewalk). For treatment when a

statute or ordinance is involved, see Ney v. Yellow Cab Co., page 244 and notes thereafter. When there is no statute or ordinance involved, some courts have declined to impose liability on the owner unless the vehicle has been left in an area where the crime is especially likely to happen. See Hergenrether v. East, 61 Cal.2d 440, 393 P.2d 164, 39 Cal.Rptr. 4 (1964). Other courts leave the decision of proximate cause to the jury. See Herrera v. Quality Pontiac, 134 N.M. 43, 73 P.3d 181 (2003) (case brought by victims of head-on collision with stolen vehicle against owner who had left unlocked car with keys in ignition at service station should have gone to jury for determination of proximate cause). Should the owner of the lot where an unlocked vehicle is left be liable? Cf. Kim v. Budget Rent A

Car, 143 Wash.2d 190, 15 P.3d 1283 (2001) (no liability for damage done by van stolen from parking lot of administrative office of rental car company). The fact that the vehicle is an extraordinarily dangerous one may also be a circumstance that suggests liability. See Richardson v. Ham, 44 Cal.2d 772, 285 P.2d 269 (1955) (26-ton bulldozer left unlocked and unguarded at construction site).

5. Intervening Intentional Misconduct. What if the conduct is not necessarily criminal, but at least intentional? Defendant service station attendant sold a small amount of gasoline to six-year-old Penny Jones. Penny falsely told the attendant that her mother had requested it. Later that day, Penny's four-year-old half-sister Candy threw a lighted match into the gasoline and the ensuing flames ignited her legs and dress. Is defendant service station liable? Can the principal case be distinguished? See Jones v. Robbins, 289 So.2d 104 (La.1974). See also, Kush v. City of Buffalo, 59 N.Y.2d 26, 449 N.E.2d 725, 462 N.Y.S.2d 831 (1983) (plaintiff was injured by chemicals negligently stored by defendant and then taken by two teenagers).

6. In Village of Carterville v. Cook, 129 III. 152, 22 N.E. 14 (1889), defendant excavated a hole in the sidewalk and a third person negligently jostled the plaintiff into it. Defendant was held liable. What if the third person had deliberately pushed plaintiff into the hole? Alexander v. New Castle, 115 Ind. 51, 17 N.E. 200 (1888); Milostan v. Chicago, 148 III.App. 540 (1909).

7. Defendant left the door of its elevator shaft unlocked and unguarded. A stranger, impersonating an elevator boy, politely ushered plaintiff through the door. She fell down the shaft and was

injured. Is defendant liable? Cole v. German Savings & Loan Society, 124 Fed. 113 (8th Cir.1903).

8. In Parness v. Tempe, 123 Ariz. 460, 600 P.2d 764 (App.1979), a young boy was pushed to the ground by two others at a neighborhood recreation center. The center did not provide adequate supervision. Should it be liable for the intentional conduct of others? In Stevens v. Des Moines Independent Community School Dist., 528 N.W.2d 117 (Iowa 1995), the school failed to adequately supervise the corridors at a middle school and plaintiff was beaten by another student. Is the student's intentional act a superseding cause?

9. Defendant engaged in an extramarital affair with plaintiff's husband. Plaintiff alleges that defendant knew or should have known that

she had a sexually transmitted disease and failed to warn plaintiffs husband that she was infectious. Plaintiff contracted the disease from her husband and filed suit against defendant for damages. Is the conduct of plaintiffs husband an intentional act that is a superseding cause that cuts off liability? Lockhart v. Loosen, 943 P.2d 1074 (Okla. 1997) (would be superseding cause if husband knew of disease because defendant's silence--which could have been a proximate cause of plaintiff's injury--would then be a mere condition).

Fuller v. Preis

New York Court of Appeals, 1974.

35 N.Y.2d 425, 322 N.E.2d 263, 363 N.Y.S.2d 568.

BREITEL, CHIEF Judge. Plaintiff executor, in a wrongful death action, recovered a jury verdict for $200,000. The Appellate Division set aside the verdict and judgment in favor of plaintiff executor and dismissed the complaint. In doing so, that court noted that even if it were not to dismiss the complaint, it would set the verdict aside as contrary to the weight of the credible evidence. Plaintiff executor appeals.

Decedent, Dr. Lewis, committed suicide some seven months after an automobile accident from which he had walked away believing he was uninjured. In fact he had suffered head injuries with consequences to be detailed later. The theory of the case was that defendants, owner and operator of the vehicle which struck decedent's automobile, were responsible in tort for the suicide as a matter of proximate cause and effect. The issue is whether plaintiffs evidence of cause of the suicide was sufficient to withstand dismissal of the complaint.

There should be a reversal of the order of the Appellate Division and a new trial ordered. ***

[An] act of suicide, as a matter of law, is not a superseding cause in negligence law precluding liability. An initial tort-feasor may be liable for the wrongful acts of a third party if foreseeable (see Restatement (Second) of Torts § 442A). ***

Thus, there is neither public policy nor precedent barring recovery for suicide of a tortiously injured person driven "insane" by the consequence of the tortious act. [Cc] ***

[T]his case was tried for all purposes in accordance with the prevailing law. Indeed, the jury was instructed, primarily, upon the

theory of liability for a suicide by an accident victim suffering from ensuing mental disease, who was unable to control the "irresistible impulse" to destroy himself. The theory of the trial, therefore, determines the rule to be applied on the appeal.

Dr. Lewis was physically and mentally healthy immediately prior to the automobile accident in which he struck his head against the interior of his own vehicle. After the accident he suffered several epileptic seizures, often with unconsciousness. Before the accident he had never

382

suffered a seizure. For seven months between the accident and his death, Dr. Lewis experienced no fewer than 38 separate seizures. ***

The only authentic issue is whether the suicide was an "irresistible impulse" caused by traumatic organic brain damage. ***

On the day of the suicide, only seven months after the accident, when Dr. Lewis had had three seizures, his daughter tried to speak with him but he did not respond. After the third seizure he seemed unable to recognize his wife, had a strange look, and locked himself in the bathroom. Twenty minutes later, his wife heard him mutter, "I must do it, I must do it", and then a gunshot rang out. Dr. Lewis had shot himself in the head and died the following day. ***

In tort law, as contrasted with criminal law, there is recognition that one may retain the power to intend, to know, and yet to have an irresistible impulse to act and therefore be incapable of voluntary conduct. ***

The issue in this case was, precisely, whether Dr. Lewis, who obviously knew what he was doing and intended to do what he did, nevertheless, was, because of mental derangement, incapable of resisting the impulse to destroy himself. Precedents and modern knowledge say that that could have been. The jury found that it was so. ***

Of course, there may be and undoubtedly have been cases where the causal nexus becomes too tenuous to permit a jury to "speculate" as to the proximate cause of the suicide. ***

A suicide is a strange act and no rationalistic approach can fit the act into neat categories of rationality or irrationality. When the suicide is preceded by a history of trauma, brain damage, epileptic seizures, aberrational conduct, depression and despair, it is at the very least a fair issue of fact whether the suicide was the rational act of a sound mind or the irrational act or irresistible impulse of a deranged mind evidenced by a physically damaged brain. It would be illogical to conclude otherwise. Consequently, although the Appellate Division in exercise of its supervisory power to review the facts could set the jury verdict aside, it was impermissible for it to dismiss the complaint.

Since the Appellate Division, in reversing, stated that in any event it would have set the verdict aside as contrary to the weight of the evidence, the verdict in favor of plaintiff may not be reinstated and a new trial is required.

Accordingly, the order of the Appellate Division should be reversed, with costs, and a new trial directed.

NOTES AND QUESTIONS

1. Courts generally view suicide as a deliberate, intentional act. See Cleveland v. Rotman, 297 F.3d 569 (7th Cir. 2002) (applying Illinois law) (upholding summary judgment for defendant where estate had not alleged

383

that decedent was mentally unstable and court assumed that decedent was a "competent adult who clearly understood what he was doing and intentionally took his own life") and Rollins v. Wachenhut Services, Inc., 703 F.3d 122 (D.C. Cir. 2012) (applying D.C. law) (recognizing that most jurisdictions, including D.C., view suicide as an intervening, intentional act that breaks the chain of causation and dismissing estate's complaint against decedent's employer for negligently providing him with a gun with which he committed suicide while on guard duty).

2. Early decisions steadfastly denied claims based on causing suicide if the decedent had even the slightest awareness of what he was doing. See Scheffer v. Railroad Co., 105 U.S. 249 (1881) (death by suicide eight months after injury in train accident); Daniels v. New York, N.H. & H.R. Co., 183 Mass. 393, 67 N.E. 424 (1903) ("An act of suicide resulting from a moderately intelligent power of choice, even though the choice is determined by a disordered mind, should be deemed a new and independent, efficient cause of the death that immediately ensues."). Even when defendant had engaged in conduct likely to cause severe emotional distress, courts found decedent's cognitive understanding of her act made it a superseding cause. Lancaster v. Montesi, 216 Tenn. 50, 390 S.W.2d 217 (1965) (after suffering physical and emotional abuse, "paramour" of

defendant wrote a suicide note, left apartment, traveled to bridge, and then jumped off).

Liability for suicide following a negligent act was broadened somewhat when some courts permitted recovery if the decedent's injury caused an irresistible impulse to commit suicide. In addition to the principal case, see Tate v. Canonica, 180 Cal.App.2d 898, 5 Cal.Rptr. 28, 40 (1960) ("where the negligent wrong only causes a mental condition in which the injured person is able to realize the nature of the act of suicide and has the power to control it if he so desires, the act then becomes an independent intervening force and the wrongdoer cannot be held liable for the death. On the other hand, if the negligent wrong causes mental illness which results in an uncontrollable impulse to commit suicide, then the wrongdoer may be held liable for the death."); Kivland v. Columbia Orthopaedic Group., LLP, 331 S.W.3d 299 (Mo. 2011) (jury question whether pain due to medical malpractice had robbed patient of his ability to act rationally and, therefore, his suicide was not voluntary); and Wickersham v. Ford Motor Co., S.E.2d, 2019 WL

3311057 (S.C. 2019) (answering certified question) (jury must consider whether defendant's tortious conduct caused a decedent to suffer from an involuntary and uncontrollable impulse to commit suicide). Most courts found an irresistible impulse only when decedent acted in a sudden frenzy or trance-like state; if decedent left a note or purchased poison or otherwise evidenced planning, the courts found decedent was in control and therefore denied recovery. In one decision, the court relied on the efficient manner in which the decedent had prepared for and cut his throat to deny recovery. Brown v. American Steel and Wire Co., 43 Ind.App. 560, 88 N.E. 80

(1909). See also Long v. Omaha & C.B. St. R. Co., 108 Neb. 342, 187 N.W. 930 (1922) (decedent purchased a shell for his shotgun, took it home, loaded gun, and shot himself) and City of Richmond v. Maia, 301 Ga. 257, 800 S.E.2d 573 (2017) (record indicates that decedent's final conversation with her mother

384

was calm and rational and thus did not fall within the "rage or frenzy" exception).

For cases applying the irresistible impulse exception and discussing the development of the doctrine, see Clift v. Narragansett Television, 688 A.2d 805 (R.I. 1996) and Corales v. Bennett, 567 F.3d 554 (9th Cir. 2009) (applying California law) (after being "sternly lectured" for leaving campus the day before without permission, eighth grader attended classes, spoke with friends about what had happened, went home, talked to his mother by telephone, wrote a detailed suicide note, and then shot himself--uncontrollable impulse not shown).

Contrast these with Long, Abolishing the Suicide Rule, 113 Nw. U. L. Rev 767 (2019) (arguing that suicide should not be treated as a superseding cause) and the approach taken by the House of Lords in Corr v. IBC Vehicles Ltd., [2008] 1 A.C. 884, [2008] 2 All E.R. 943, unanimously permitting recovery for the death of plaintiff by suicide about six years after the accident that caused him severe head injuries and three months after he had been admitted to the hospital after taking a drug overdose. The personal injury case had been filed three years after the accident and was still pending at the time plaintiff took his life by jumping from the top of a car park. His widow

was substituted as the party representing his estate on the personal injury claim and also sought recovery under the wrongful death act. Both sides agreed that he had the capacity to manage his own affairs, that his intellectual ability and appreciation of danger were not affected, and that he acted deliberately with the intention of killing himself. The court found that a severe depressive episode caused by the accident had impaired his capacity to make reasoned and informed judgments about his future and thus his suicide did not cut off liability between the defendant's negligence and the damages for his death sought by his widow.

3. Courts are more likely to permit a claim where the tort was intentional. See R.D. v. W.H., 875 P.2d 26 (Wyo.1994) (stepfather had sexually abused the decedent, provided her with a firearm with which she attempted suicide, and then later provided her with prescription narcotics with which she killed herself) and Cauverien v. De Metz, 20 Mise.2d 144, 188 N.Y.S.2d 627 (Sup.Ct. 1959) (defendants converted a diamond that decedent had on consignment, refusing to return it or pay for it, deliberately blackening decedent's reputation and ruining his livelihood, and causing him an irresistible impulse to end his life).

4. Some worker compensation cases have allowed a claim when a work-related accident was a substantial factor in the decedent's becoming incapable of normal judgment and then committing suicide. Would that be an appropriate rule for tort law? See Clift v. Narragansett Television, 688 A.2d 805 (R.I. 1996) (noting that the analysis of the worker compensation cases has not been adopted in the tort cases).

5. Suppose a criminal defense attorney was negligent in defending her client and he committed suicide in jail after being wrongfully convicted? Is the attorney liable for the client's death? McLaughlin v. Sullivan, 123 N.H. 335, 461 A.2d 123 (1983) (denying liability because connection between

negligence in the practice of law and decedent's suicide twelve hours after arriving in jail is too attenuated) and McPeake v. William T. Cannon, 381 Pa.Super. 227, 553 A.2d 439 (1989) (accord in case where client leapt from fifth floor window of courthouse upon being found guilty).

6. An affirmative duty to use care to prevent suicide is sometimes imposed by tort law upon certain classes of defendants. There, plaintiffs suicide would not be an intentional act that supersedes defendant's negligence. Jacoves v. United Merchandising Corp., 9 Cal.App.4th 88, 11 Cal.Rptr.2d 468 (1992) (suicide itself was the foreseeable risk and cannot, therefore, be a superseding cause) and Singing River Health Sys. v. Vermilyea, 242 So.3d 74 (Miss. 2018) (plaintiffs' decedent, who was coaxed off a bridge by police officers and taken to defendant hospital for treatment, was discharged just a few hours later and immediately returned to the bridge and jumped). But see Cotten v. Wilson, 576 S.W.3d 626 (Tenn. 2019) (although defendant was himself a psychiatrist, his relationship with plaintiff's decedent was romantic, not doctor-patient, so no affirmative duty to prevent suicide).

7. What if defendant negligently sells a gun, ammunition, or drugs to plaintiff who uses it to commit suicide? Scoggins v. Wal-Mart Stores,

Inc., 560 N.W.2d 564 (Iowa 1997) (ammunition sold to minor; plaintiffs act is superseding cause) (collecting cases); Runyon v. Reid, 510 P.2d 943 (Okla. 1973) (barbiturates sold without refill authorization; plaintiffs act is superseding cause). The cases suggest that the result might have been otherwise if defendants had had reason to suspect the intent of the purchaser. Compare the cases on liability of a seller of liquor, note 6, page 398.

McCoy v. American Suzuki Motor Corp.

Supreme Court of Washington, 1998.

136 Wash.2d 350, 961 P.2d 952.

SANDERS, J. ***At 5:00 p.m. on a cold November evening James McCoy drove eastbound on Interstate 90 outside Spokane as the car which preceded him, a Suzuki Samurai, swerved off the roadway and rolled. McCoy stopped to render assistance, finding the driver seriously injured. Shortly thereafter a Washington State Patrol trooper arrived on the scene and asked McCoy to place flares on the roadway to warn approaching vehicles. McCoy did so, but concerned the flares were insufficient, continued further and positioned himself a quarter-mile from the accident scene with a lit flare in each hand, manually directing traffic to the inside lane.

By 6:50 p.m., almost two hours after the accident, the injured driver and passenger of the Suzuki were removed and the scene was cleared, leaving only the trooper and McCoy on the roadway. McCoy walked back on the shoulder of the roadway to his car with a lit flare in his roadside hand. When McCoy was within three or four car-

lengths of the trooper, the trooper pulled away without comment. Moments later McCoy was

386

struck from behind while still walking on the roadway's shoulder by a hit-and-run vehicle.

McCoy and his wife filed a multicount complaint against the driver of the Suzuki for negligent driving; the passenger of the Suzuki for negligently grabbing the steering wheel when the car was fishtailing, further causing it to lose control; the State for the negligence of the trooper; and American Suzuki Motor Corporation and its parent corporation, Suzuki Motor Company, Ltd., for its allegedly defective Samurai which allegedly caused the wreck in the first place. We presently consider only McCoy's claim against Suzuki. ***

Suzuki moved for summary judgment asserting: (1) the rescue doctrine does not apply to product liability actions; and (2) even if it does, McCoy must still, but cannot, prove Suzuki proximately caused his injuries. The trial court found the rescue doctrine applies to product liability actions but concluded any alleged defect in the Suzuki was not the proximate cause of McCoy's injuries and, accordingly, granted summary judgment of dismissal. ***

[McCoy appealed the dismissal and the Court of Appeals reversed, finding the rescue doctrine applies in product liability actions just as it does in negligence actions, but that an injured rescuer need not prove the defendant proximately caused his injuries. Instead the court concluded the rescuer need only prove the defendant proximately caused the danger and that the rescuer was injured while rescuing.]

The Rescue Doctrine

The rescue doctrine is invoked in tort cases for a variety of purposes in a variety of scenarios. The doctrine, as here asserted, allows an injured rescuer to sue the party which caused the danger requiring the rescue in the first place. [C] As Justice Cardozo succinctly summarized, the heart of this doctrine is the notion that "danger invites rescue." Wagner v. International Ry. Co., 232 N.Y. 176, 133 N.E. 437, 437, 19 A.L.R.I (1921). This doctrine serves two functions. First, it informs a tort-feasor it is foreseeable a rescuer will come to the aid of the person imperiled by the tort-feasor's actions, and, therefore, the tort-feasor owes the rescuer a duty similar to the duty he owes the person he imperils. [Cc] Second, the rescue doctrine negates the presumption that the rescuer assumed the risk of injury when he knowingly undertook the dangerous rescue, so long as he does not act rashly or recklessly. [C]

To achieve rescuer status one must demonstrate: (1) the defendant was negligent to the person rescued and such negligence caused the peril or appearance of peril to the person rescued; (2) the peril or appearance of peril was imminent; (3) a reasonably prudent person would have concluded such peril or appearance of peril existed; and (4) the rescuer acted with reasonable care in effectuating the rescue. [C] The Court of Appeals found McCoy demonstrated sufficient facts of rescuer status to

387

put the issue of whether he met the four requirements ***to the jury. [C] Suzuki does not question this finding. Nor will we.

Does the Rescue Doctrine Apply in Product Liability Actions?

Suzuki argues the rescue doctrine may not be invoked in product liability actions. Suzuki contends the [Washington product liability statute] supplants all common law remedies and contends the rescue doctrine is nothing more than a common law remedy. We disagree. The rescue doctrine is not a common law remedy. Rather, it is shorthand for the idea that rescuers are to be anticipated and is a reflection of a societal value judgment that rescuers should not be barred from bringing suit for knowingly placing themselves in danger to undertake a rescue. We can conceive of no reason why this doctrine should not apply with equal force when a product manufacturer causes the danger. ***We adopt the Court of Appeals analysis on this point and conclude the rescue doctrine may be invoked in product liability actions just as it may in ordinary negligence actions.

Must Plaintiff Show Proximate Causation Under the Rescue Doctrine?

McCoy argues the rescue doctrine relieves the rescuer-plaintiff of proving the defendant's wrongdoing proximately caused his injuries. McCoy asserts a rescuer may prevail in a suit by showing the defendant proximately caused the danger and that, while serving as rescuer, the plaintiff was injured. The Court of Appeals agreed stating the rescue doctrine "varies the ordinary rules of negligence." McCoy, 86 Wash. App. at 110 (citing Solgaard v. Guy F. Atkinson Co., 6 Cal. 3d 361, 491 P.2d 821, 99 Cal. Rptr. 29 (1971)).

The Court of Appeals erred on this point. ***[The rescuer, like any other plaintiff, must still show the defendant proximately caused his injuries.]

In Maltman [v. Sauer, 84 Wash.2d 975, 530 P.2d 254 (1975)] a rescue helicopter was called to the scene of an auto accident to transport one of the injured to the hospital. However, the rescue helicopter crashed on the way to the scene killing the entire crew. A wrongful death suit was brought on behalf of the deceased crew members under the rescue doctrine against the party which allegedly caused the car accident in the first place. We ***concluded, as a matter of law, the car accident was not the proximate cause of the helicopter crash and, accordingly, dismissed. [C]

We adhere to Maltman noting its requirement that a rescuer show the defendant proximately caused his injuries is in keeping with general principles of liability.

Did Suzuki Proximately Cause McCoy's Injuries?

Concluding that the rescue doctrine may apply to a product liability action and that the rescuer must show the defendant proximately caused

388

his injuries, we question whether McCoy has demonstrated Suzuki proximately caused his injuries. ***

Here, Suzuki argues, it was totally unforeseeable that a rescuer such as McCoy would be injured by a third vehicle under these particular facts and, accordingly, Suzuki asks us to rule in its favor on this issue as a matter of law. We find the issue of foreseeability of the intervening cause is sufficiently close that it should be decided by a jury, not the court. A jury might consider the position of the rescuer,

the negligence of the oncoming motorist, if any, and many other factors.

McCoy cites In re Estate of Keck v. Blair, 71 Wash. App. 105, 108--09, 856 P.2d 740 (1993). In Keck a rescuer aided a driver who had been drinking and who caused an accident. As the rescuer escorted the driver across the highway to safety, a car approached and the rescuer had barely enough time to push the person he was rescuing to safety but was himself hit and instantly killed. The Court of Appeals allowed the decedent's estate to bring suit against the person he was rescuing under the rescue doctrine. The court held it could not say as a matter of law whether the original accident was the proximate cause of decedent's injuries and accordingly remanded the case for jury determination. The facts of the present case are not sufficiently different from those of Keck to take the issue from the jury.

In the present case, if the Suzuki Samurai is found to be defective the jury could find it foreseeable that the Suzuki Samurai would roll and that an approaching car would cause injury to either those in the Suzuki Samurai or to a rescuer, depending on the specific facts to be proved. We note sister jurisdictions have reached the same conclusion under similar facts. ***

As numerous cases illustrate, the court often exercises its gatekeeper function by dismissing an action without trial for lack of legal cause if the defendant's actions are too remote a cause of plaintiff's injuries. In Maltman we dismissed the action, reasoning the party causing the principal accident should not be liable for the subsequent crash of a rescue helicopter hundreds of miles away

because the helicopter crash was simply too remote a result of the principal accident. In Hartley [v. State, 103 Wash.2d 768, 698 P.2d 77 (1985)] the estate of a decedent killed by a drunk driver sued the State for failing to revoke the drunk driver's license. There we similarly dismissed reasoning the State should not be held liable for injuries caused by a driver simply because the State failed to revoke that driver's license. [C] Such fault on the State's behalf was again too remote a cause of the ensuing injury to impose liability.

Here, we do not find the alleged fault of Suzuki, if proved, to be so remote from these injuries that its liability should be cut off as a matter of law. Certainly the alleged fault of Suzuki is not as remote as the fault of the defendants in Malt man and Hartley and, thus, we must distinguish their results. Accordingly, we will not dismiss this case for lack of legal causation.

389

Instead we remand the case for trial consistent with this opinion. ***

NOTES AND QUESTIONS

1. What happens to the case after the Washington Supreme Court opinion? What must McCoy prove at trial in order to recover from Suzuki?

2. The opinion quotes Judge Cardozo's famous pronouncement in Wagner v. International Ry. Co., 232 N.Y. 176, 180, 133 N.E. 437, 437-38 (1921): "Danger invites rescue." In that opinion, he went on to say "[t]he cry of distress is the summons to relief. The law does not ignore these reactions of the mind in tracing conduct to its consequences. It recognizes them as normal. It places their effects

within the range of the natural and probable. The wrong that perils life is a wrong to the imperiled victim; it is a wrong also to his rescuer.... The risk of rescue, if only it be not wanton is born of the occasion. The emergency begets the man. The wrongdoer may not have foreseen the coming of a deliverer. He is accountable as if he had."

3. A few of the numerous legal problems raised by the "rescue doctrine" are noted here. By his efforts the rescuer may injure himself, as in McCoy and Wagner, or the rescuee, or a third person. Are the proximate cause issues the same? Should the defendant be liable for all of these injuries? See Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 32 (2010) (the scope of the actor's liability includes any harm to a person resulting from that person's efforts to aid or to protect the imperiled person or property, so long as the harm arises from a risk that inheres in the effort to provide aid).

4. Rescuer Sues Rescuee. House caught fire because water heater was negligently installed too close to insulation. Passerby saw smoke and stopped to assist family in escaping. Husband broke bedroom window and lowered child to passerby. Husband was then trying to clear away more glass to make a wider opening when wife pushed him aside and dove head first out window. Passerby was injured trying to break her fall. Passerby sued installer of water heater and wife. Rescue doctrine applies to installer. Does it also apply to rescuee wife? See Williams v. Foster, 281 Ill.App. 3d 203, 217 Ill.Dec. 9, 666 N.E.2d 678 (1996) (court raised but did not reach issue because it found wife was not negligent in jumping from burning building). See also In re Estate of Keck v. Blair, 71

Wash.App. 105, 856 P.2d 740 (1993) (cited in the principal case) (permitting case against rescuee); Sears v. Morrison, 90 Cal.Rptr.2d 528, 76 Cal.App.4th 577 (1999) (permitting case against rescuee); Lowrey v. Horvath, 689 S.W.2d 625 (Mo. 1985) (rescue doctrine extends to plaintiff's decedent killed while trying to rescue defendant from well). Suppose the rescuee was in the act of taking his own life and clearly did not want to be rescued? See Talbert v. Talbert, 22 Mise.2d 782, 199 N.Y.S.2d 212 (1960) (son's case against father allowed to proceed for recovery of injuries sustained while breaking garage door window to rescue father from attempted suicide).

5. What if the attempt at rescue is utterly foolish? A passenger about to alight from defendant's train hands her toddler to a man on the platform.

The train unexpectedly starts up and carries her away. A bystander heroically snatches up the child and runs after the train. He runs the length of the platform, losing ground steadily, and stumbles over a baggage truck at the far end. The child is injured. Liability? Atchison, T. & S.F.R. Co. v. Calhoun, 213 U.S. 1 (1909) (no liability because railroad was not bound to foresee and guard against such extraordinary conduct on the part of the bystander). Cf. Robinson v. Butler, 226 Minn. 491, 33 N.W.2d 821 (1948) (no liability where excited passenger seized steering wheel of automobile to help avoid collision with defendant driver of other car). Sanders v. Frank, 37 N.E.3d 1305 (Ohio App. 2015) (rescue doctrine did not apply to neighbor who was injured attempting to recapture defendant's loose horse because there was no impending danger of harm to another,

only a potential danger, mitigated by fact that police officers were on the scene). Suppose the rescuer was mistaken and the rescuee was not actually in danger? Cf. Ellmaker v. Goodyear Tire & Rubber Co., 372 S.W.2d 650 (Mo.App.1963) (liability; doctrine applies as long as mistake was a reasonable one).

6. An active-duty marine in town as a recruiter was having a drink at a bar with a blonde woman known only as "Dimples" when a grease fire flared up at the grill where hamburgers were being cooked just outside the bar. The fire was extinguished but the grill attendant could not turn off the gas because the valve was too hot. At that point, the marine took off his shirt, wrapped it around his hand, walked up to the grill, and turned the gas off just as the fire flared up and burned him. He sued the bar in negligence and the bar argued everything was under control, the fire department was on its way, and that no one was in danger until the marine placed himself there. Judge Cardozo's "normal" reaction of a rescuer or an utterly foolish one? Clinkscales v. Nelson Securities, Inc., 697 N.W.2d 836 (Iowa 2005) (should have been question for the jury).

7. Suppose the lawsuit is based on product liability rather than negligence? In addition to the principal case, see Dillard v. Pittway Corp., 719 So.2d 188 (Ala. 1998) (smoke detector manufacturer liable to neighbor who was injured trying to rescue elderly residents from boarding house fire) and Govich v. North American Systems, Inc., 112 N.M. 226, 814 P.2d 94 (1991) (manufacturer of coffee maker that started house fire may be liable to resident who entered home to rescue his guide dog).

8. What about the rescuer of a rescuer? Richards v. Kansas Electric Power Co., 126 Kan. 521, 268 P. 847 (1928) (father rushed to rescue of son who had been knocked down by live wire that son was trying to keep away from house during thunderstorm); Brown v. Ross, 345 Mich. 54, 75 N.W.2d 68 (1956) (dropping his teenage son off at work at gas station, father saw car accident that damaged pump and started fire; after pulling his own car away, he went back and took fire extinguisher from son and sent him to call fire department, just as explosion occurred); Richardson v. United States, 248 F.Supp. 99 (E.D.Oki.1965) (mother injured while rescuing son who was in a position of peril because he was attempting to rescue father who drowned due to negligence of defendant); and Govich v. North American Systems, Inc., 112 N.M. 226, 814 P.2d 94 (1991) (mother injured rescuing adult son from his burning home, which he had entered to rescue his guide dog).

391

9. Suppose the injured rescuer is a professional--a police officer, a firefighter, a lifeguard, a paramedic. Most states do not permit recovery by professionals, at least against the property owner or driver whose negligence occasioned the response, under the so-called "firefighter's rule" or the "professional rescuer's rule." The rationale for the rule is sometimes grounded in premises liability distinctions between licensees and invitees (see Chapter 9, Owners and Occupiers of Land), sometimes grounded in assumption of risk principles, and sometimes in public policy considerations including that those professionals already have been compensated for their potentially hazardous duty. See, e.g., Fordham v. Oldroyd, 2007 UT 74, 171 P.3d 411 (2007) (state trooper injured while getting flares

from his trunk sued driver whose car had crashed due to icy and snowy road conditions) and Nowicki v. Pigue, 430 S.W.3d 765 (Ark. 2013) (state roadside assistance worker injured after stopping to assist the driver of a tractor trailer who had run out of gas sued driver for running out of gas and not putting warning markers or reflectors behind the stalled truck). The rule operates to preclude recovery only if the risk created was the type of risk reasonably anticipated by the job. Compare Smith v. Tully, 665 A.2d 1333 (R.1.1995) (police officer injured in altercation with an intoxicated person armed with a knife in a bar after responding to call from bar employee barred by firefighter's rule) with Solgaard v. Guy F. Atkinson Co., 6 Cal.3d 361, 491 P.2d 821, 99 Cal.Rptr. 29 (1971) (doctor who had agreed to provide medical services at construction site not barred when he was injured in seeking to reach injured person trapped in landslide).

The firefighter's rule has been limited or abolished in some jurisdictions. See, e.g., Cole v. Hubanks, 272 Wis.2d 539, 681 N.W.2d 147 (2004) (does not apply to police officer attacked by stray dog while she was trying to capture it); Espinoza v. Schulenburg, 212 Ariz. 215, 129 P.3d 937 (2006) (does not apply to off-duty EMT who stopped to assist car accident victims); Tucker v. Shoemake, 354 Md. 413, 731 A.2d 884 (1999) (does not apply if alleged negligence was independent and not related to situation requiring police response); and Ruiz v. Mero, 189 N.J. 525, 917 A.2d 239 (2007) (recognizing that New Jersey legislature has abolished the "firefighter's rule," thus allowing police officer who responded to call for assistance at bar and was attacked by bar patrons to sue bar owner for inadequate security).

California has used assumption of the risk principles and public policy arguments to bar the lawsuit of an in-home caregiver who was attacked by the Alzheimer's patient she was being paid to care for. Gregory v. Cott, 59 Cal.4th 996, 331 P.3d 179, 176 Cal.Rptr.3d 1 (2014) (claims arising from inherent occupational hazards first developed as the "firefighter's rule," which precludes firefighters and police officers from suing members of the public for the conduct that makes their employment necessary). But see Sanders v. Alger, 242 Ariz. 246, 394 P.3d 1083 (2017) (patient could not use firefighters' defense against paid care giver in negligence action based on injury caregiver suffered when patient fell on her). See also Chapter 12's discussion of primary implied assumption of the risk at pages 686-691.

10. Attempt to Escape from Danger Created by Defendant. The cases generally agree that the defendant who caused the danger will be liable to

someone who is injured trying to escape from it. The classic decision is Tuttle v. Atlantic City R. Co., 66 N.J.L. 327, 49 A. 450 (1901), where a freight car jumped a track and lunged across the street. Plaintiff, on the sidewalk, ran from the car, fell and injured her knee. She was allowed to recover. See also Kroeger v. Safranek, 161 Neb. 182, 72 N.W.2d 831 (1955) (after collision that drove a truck into a cornfield on the side of the road, driver was electrocuted by wires from a utility pole knocked down by his truck as it left the road); Thornton v. Weaber, 380 Pa. 590, 112 A.2d 344 (1955) (teen driver lost control on curve and hit utility pole, downing wires that electrified

the metal guardrails and cable on shoulder of road so that driver and passenger were electrocuted when they tried to climb back onto road from meadow where truck had come to rest after accident).

11. Attempt to Alleviate Harm Caused by Defendant. The primary example of this is the case in which a physician treats the plaintiff's injuries and negligently aggravates them. Is the original defendant liable for the aggravation? The usual answer is in the affirmative. Fairchild v. S.C. Dept, of Transp., 398 S.C. 90, 727 S.E.2d 407 (2011) (defendant driver suggested that plaintiff's headaches were caused by overmedication; plaintiff entitled to jury instruction that driver also would be liable for damages from physician's negligence). In Banks v. Elks Club, 301 S.W.3d 214 (Tenn. 2010), the plaintiff's injuries from collapse of chair at Elks Club were made worse by medical malpractice of orthopedic surgeon and then also of nursing home where she contracted an infection during her recovery. The nursing home would be liable for the infection, the surgeon for the medical malpractice and the infection, the Elks Club for all of the injuries. In this context, the court notes that the surgeon is both a successive tortfeasor and an original tortfeasor.

Suppose the injured party is being taken by an ambulance to the hospital for treatment. An accident en route causes additional injuries. Should it make any difference whether the second collision was caused by (1) the speed of the ambulance because of the emergency, (2) the negligence of the ambulance driver though no emergency was involved, or (3) the negligence of a third party in running into the ambulance? Atherton v. Devine, 602 P.2d 634 (Okla. 1979); Anaya v. Superior Court, 78 Cal.App.4th 971, 93 Cal.Rptr.2d 228 (2000) (driver liable for plaintiff's death in helicopter crash en

route to hospital after automobile accident). The intervening negligence may be so unusual that the court holds it to be superseding, as in Purchase v. Seelye, 231 Mass. 434, 121 N.E. 413 (1918), where the hospital made a mistake and operated on the wrong patient. See Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 35 (2010) (original tortfeasor liable for enhanced harm unless it arises from harm different from harm incident to normal efforts to render aid).

12. Second Injury Caused by Weakened Condition Resulting from First Injury. There are some recurrent patterns falling into this classification, in which the cases have indicated a more or less crystallized response, holding the first defendant liable for the second injury. The first involves the onset of a disease likely to attack one in a weakened condition--for example, pneumonia in Beauchamp v. Saginaw Mining Co., 50 Mich. 163, 15 N.W. 65

393

(1883), or streptococcus infection in Wallace v. Ludwig, 292 Mass. 251, 198 N.E. 159 (1935). An earlier distinction depending on the time when the germs invaded the body has been abandoned, but it will still make a difference whether the disease was of a type that would attack a healthy person and produce the same result. See, e.g., Case of Upham, 245 Mass. 31, 139 N.E. 433 (1923) (appendicitis).

Another type of case involves a second breaking of a limb that had not fully recovered its original strength. The plaintiff usually recovers for the second injury. Squires v. Reynolds, 125 Conn. 366, 5 A.2d 877 (1939); Mitchell v. Legarsky, 95 N.H. 214, 60 A.2d 136 (1948).

Factors that may affect the holding, however, include the length of time between the accidents, the location and nature of the second injury, the reasonableness of the plaintiff's conduct, and the character of the second accident. See Linder v. Payette, 64 Idaho 656, 135 P.2d 440 (1943) (no recovery where plaintiff drowned while fishing when boat capsized; defendant was responsible for plaintiff's arm being in a plaster cast weighing eight pounds).

3. Public Policy

Kelly v. Gwinnell

Supreme Court of New Jersey, 1984.

96 N.J. 538, 476 A.2d 1219.

[Defendant Gwinnell, after having driven coworker Zak home, spent an hour or two at Zak's home before leaving to return to his own home. During that time, Gwinnell consumed two or three drinks of scotch on the rocks with Zak and his wife. Zak accompanied Gwinnell outside to his car, chatted with him, and watched as Gwinnell drove off to go home. On the way home, Gwinnell was involved in a head-on collision with an automobile operated by plaintiff Marie Kelly, who was seriously injured. Kelly sued Gwinnell and Gwinnell's employer, and those defendants in turn sued the Zaks in a third party action. Thereafter, plaintiff amended her complaint to include the Zaks as direct defendants. The trial court granted the Zaks' motion for summary judgment holding that as a matter of law a host is not liable for the negligence of an adult social guest who has become intoxicated at the host's home. The appellate court affirmed, noting that New Jersey has no Dram Shop Act

imposing liability on the provider of alcoholic beverages and that New Jersey common law liability had been extended to a social host only when the guest was a minor.] WILENTZ, C.J. This case raises the issue of whether a social host who enables an adult guest at his home to become drunk is liable to the victim of an automobile accident caused by the drunken driving of the guest. Here the host served liquor to the guest beyond the point at which the guest was visibly intoxicated. We hold the host may be liable under [certain] circumstances. ***

"Negligence is tested by whether the reasonably prudent person at the time and place should recognize and foresee an unreasonable risk or

394

likelihood of harm or danger to others." [Cc] When negligent conduct creates such a risk, setting off foreseeable consequences that lead to plaintiff's injury, the conduct is deemed the proximate cause of the injury. "[A] tortfeasor is generally held answerable for the injuries which result in the ordinary course of events from his negligence and it is generally sufficient if his negligent conduct was a substantial factor in bringing about the injuries." [Cc]

Under the facts here defendant provided his guest with liquor, knowing that thereafter the guest would have to drive in order to get home. Viewing the facts most favorably to plaintiff (as we must, since the complaint was dismissed on a motion for summary judgment), one could reasonably conclude that the Zaks must have known that their provision of liquor was causing Gwinnell to become drunk, yet they continued to serve him even after he was visibly intoxicated. By

the time he left, Gwinnell was in fact severely intoxicated. A reasonable person in Zak's position could foresee quite clearly that this continued provision of alcohol to Gwinnell was making it more and more likely that Gwinnell would not be able to operate his car carefully. Zak could foresee that unless he stopped providing drinks to Gwinnell, Gwinnell was likely to injure someone as a result of the negligent operation of his car. ***

[T]he only question remaining is whether a duty exists to prevent such risk or, realistically, whether this Court should impose such a duty.***

When [a] court determines that a duty exists and liability will be extended, it draws judicial lines based on fairness and policy. In a society where thousands of deaths are caused each year by drunken drivers, where the damage caused by such deaths is regarded increasingly as intolerable, where liquor licensees are prohibited from serving intoxicated adults, and where long-standing criminal sanctions against drunken driving have recently been significantly strengthened to the point where the Governor notes that they are regarded as the toughest in the nation, see Governor's Annual Message to the N.J. State Legislature, Jan. 10, 1984, the imposition of such a duty by the judiciary seems both fair and fully in accord with the State's policy. ***

We therefore [expand our prior decisions that limited liability to licensees who served liquor for profit or social hosts who served liquor to a minor and] hold that a host who serves liquor to an adult social guest, knowing both that the guest is intoxicated and [that he] will thereafter be operating a motor vehicle, is liable for injuries

inflicted on a third party as a result of the negligent operation of a motor vehicle by the adult guest when such negligence is caused by the intoxication. We impose this duty on the host to the third party because we believe that the policy considerations served by its imposition far outweigh those asserted in opposition. While we recognize the concern that our ruling will interfere with accepted standards of social behavior; will intrude on and somewhat diminish the enjoyment, relaxation, and camaraderie that accompany

395

social gatherings at which alcohol is served; and that such gatherings and social relationships are not simply tangential benefits of a civilized society but are regarded by many as important, we believe that the added assurance of just compensation to the victims of drunken driving as well as the added deterrent effect of the rule on such driving outweigh the importance of those other values. ***We therefore reverse the [summary] judgment in favor of the defendants Zak and remand the case. ***

GARIBALDI (dissenting). ***The majority need not parade the horrors that have been caused by drunk drivers to convince me that there is always room for stricter measures against intoxicated drivers. I too am concerned for the injured victim of a drunken driver. However, the almost limitless implications of the majority's decision lead me to conclude that the Legislature is better equipped to effectuate the goals of reducing injuries from drunken driving and protecting the interests of the injured party, without placing such a grave burden on the average citizen of this state. ***

My reluctance to join the majority is not based on any exaggerated notion of judicial deference to the Legislature. Rather, it is based on my belief that before this Court plunges into this broad area of liability and imposes high duties of care on social hosts, it should carefully consider the ramifications of its actions. ***

[T]his Court has, in the past, imposed civil liability on commercial licensees who serve alcoholic beverages to intoxicated patrons. Commercial licensees are subject to regulation by both the Alcoholic Beverage Commission (ABC) and the Legislature. It is reasonable to impose tort liability on licensees based on their violation of explicit statutes and regulations.

I have no quarrel with the imposition of such liability because of the peculiar position occupied by the licensee. A social host, however, is in a different position. ***

A significant difference between an average citizen and a commercial licensee is the average citizen's lack of knowledge and expertise in determining levels and degrees of intoxication. Licensed commercial providers, unlike the average citizen, deal with the alcohol-consuming public every day. This experience gives them some expertise with respect to intoxication that social hosts lack. A social host will find it more difficult to determine levels and degrees of intoxication. ***

The nature of home entertaining compounds the social host's difficulty in determining whether a guest is obviously intoxicated before serving the next drink. In a commercial establishment, there is greater control over the liquor; a bartender or waitress must serve the patron a drink. Not so in a home when entertaining a guest. At a

social gathering, for example, guests frequently serve themselves or guests may serve other guests. Normally, the host is so busy entertaining he does not have

396

time to analyze the state of intoxication of the guests. ***Furthermore, the commercial bartender usually does not drink on the job. The social host often drinks with the guest, as the Zaks did here. ***

Further, it is not clear from the Court's opinion to what lengths a social host must go to avoid liability. Is the host obligated to use physical force to restrain an intoxicated guest from drinking and then from driving? Or is the host limited to delay and subterfuge tactics short of physical force? What is the result when the host tries to restrain the guest but fails? Is the host still liable? The majority opinion is silent on the extent to which we must police our guests.

The most significant difference between a social host and a commercial licensee, however, is the social host's inability to spread the cost of liability. The commercial establishment spreads the cost of insurance against liability among its customers. The social host must bear the entire cost alone. ***

[The social host] may not have sufficient insurance to cover the limitless liability that the Court seeks to impose. These people may lose everything they own if they are found liable as negligent social hosts under the Court's scheme. The individual economic cost to every New Jersey citizen should be weighed before today's result is reached. ***

NOTES AND QUESTIONS

1. The New Jersey legislature later modified the decision by statute to limit liability in several ways. Under the statute, liability of the social host extends only to third parties (i.e., not the intoxicated person); there is an irrebuttable presumption that anyone whose blood alcohol level tested at less than 0.10% was not visibly intoxicated and a rebuttable presumption that anyone whose blood alcohol level is between 0.10% and 0.15% was not visibly intoxicated; and the social host is not jointly and severally liable, which means the social host would pay only a portion of the judgment, even if the driver is insolvent.

2. The traditional common law view was that the drinker's voluntary consumption and subsequent negligence was the sole "proximate" cause of the third party's injury, or that the person who sold or gave liquor owed no duty to an intoxicated adult drinker or to those injured by the drinker. A seminal decision is Cruse v. Aden, 127 Ill. 231, 20 N.E. 73 (1889) where a wife filed suit against her husband's friend for giving her husband two drinks while he was a guest at the friend's house. While returning home on horseback, the husband was thrown from the horse and died. The Illinois Supreme Court refused to impose liability, finding no cause of action for giving "a glass of intoxicating liquor to a friend as a mere act of courtesy and politeness." Illinois has reaffirmed this decision, holding that for "over one century, this court has spoken with a single voice to the effect that no social host liability exists in Illinois." Charles v. Seigfried, 165 Ill.2d 482, 209 Ill.Dec. 226, 651 N.E.2d 154 (1995). But in Illinois, fraternity may be liable for alcohol-related hazing event. Bogenberger v. Pi Kappa Alpha Corp., 104

N.E.3d 1110 (Ill. 2018). Almost all state supreme court's ruling on this issue have declined to impose liability on a social host when the recipient of the alcohol is an adult. See, e.g., Klein v. Raysinger, 504 Pa. 141, 470 A.2d 507, 510 (1983) ("Thus, the great weight of authority supports the view that in the case of an ordinary able-bodied man it is the consumption of the alcohol, rather than the furnishing of the alcohol, which is the proximate cause of any subsequent occurrence").

3. Why no liability? Could the social hosts argue that the consequences of their serving alcohol were not foreseeable? "The paucity of cases in this country imposing social host liability cannot be explained solely on the ground that a social host does not, as a matter of law, create a reasonably foreseeable risk of harm to highway travelers in serving an alcoholic drink to a drunken guest. The risk created by serving liquor to an intoxicated person who is about to operate a motor vehicle is far too apparent to permit the conclusion that the social host's act could not have been the 'proximate' cause of a third person's injury. The reluctance of courts to impose liability in these circumstances has been founded, rightly or wrongly, on policy considerations, particularly consideration of the effect that a rule of social host liability would have on a multitude of personal relationships in a variety of social settings." McGuiggan v. New England Telephone & Telegraph Co., 398 Mass. 152, 496 N.E.2d 141, 145 (1986).

What about the argument that the legislature is a better forum for such a dramatic departure from the common law? "We conclude that

the General Assembly, not this Court, should decide whether to create a cause of action for dram shop liability or social host liability. The General Assembly heavily regulates the sale and use of alcohol and by so doing has clearly announced its intent to occupy exclusively the field of policy making in that subject area. Furthermore, the parties raise controversial and competing public policy questions which the General Assembly can more effectively debate, consider and resolve through the legislative process." Shea v. Matassa, 918 A.2d 1090 (Del. 2007) (declining to recognize social host liability). Willis v. Omar, 954 A.2d 126 (R.I. 2008) (accord).

4. New Hampshire imposes liability if the social host's service of alcohol was reckless. Hickingbotham v. Burke, 140 N.H. 28, 662 A.2d 297 (1995) (expressed as highly unreasonable conduct, involving an extreme departure from ordinary care, in a situation where a high degree of danger is apparent). In dicta, Massachusetts has hinted it would impose liability under the appropriate circumstances. McGuiggan v. New England Telephone & Telegraph Co., 398 Mass. 152, 496 N.E.2d 141 (1986) (no liability in this case because no evidence that guest was obviously intoxicated when served). New Mexico's Liquor Liability statute imposes liability on social hosts who provide alcoholic beverages "recklessly in disregard of the rights of others." N.M. Stat. Ann. § 41-11-1. Delfino v. Griffo, 150 N.M. 97, 257 P.3d 917 (2011) (drug company representatives purchased drinks for a doctor office's staff member at three different bars over an eight hour period beginning with lunch).

5. In contrast to almost universal rejection of social host liability for serving adult guests, many jurisdictions have imposed liability on

those who

398

serve alcohol to minors. See Wiener v. Gamma Phi Chapter of Alpha Tau Omega Fraternity, 258 Or. 632, 485 P.2d 18 (1971) (fraternity found negligent for serving beer to minor who subsequently injured third party in automobile accident); cf. Sutter v. Hutchings, 254 Ga. 194, 327 S.E.2d 716 (1985) (defendant mother who purchased keg of beer for consumption at party for high school friends of defendant daughter may be liable to estate of driver who was killed when minor party guest ran a red light leaving party); Hansen v. Friend, 118 Wash.2d 476, 824 P.2d 483 (1992) (two adult companions held liable to estate of minor who drowned while intoxicated after defendants had provided minor with alcohol on overnight fishing trip); and Kiriakos v. Phillips, 448 Md. 440, 139 A.3d 1006 (2016) ("The harm that alcohol poses to youths is pernicious, pervasive, and deadly especially when motor vehicles are involved.") (footnote omitted).

What if the driver is not a minor (is 18 or older) but is under the legal drinking age? Marcum v. Bowden, 372 S.C. 452, 643 S.E.2d 85 (2007) (holding social host liable for underage drinker's negligence but doing so only prospectively). Colorado imposes liability only if the social host had "actual knowledge" that the guest is underage. Przekurat v. Torres, 428 P.3d 512 (Colo. 2018). But see Smith v. Merritt, 940 S.W.2d 602 (Tex.1997) and Charles v. Seigfried, 165 Ill.2d 482, 209 Ill.Dec. 226, 651 N.E.2d 154 (1995) (both declining to impose liability even where guest is minor). Why are courts more willing to impose liability when a minor is involved? What if the social

host is also a minor? Kapres v. Heller, 536 Pa. 551, 640 A.2d 888 (1994) (declining to impose liability on social host who is a minor).

6. Commercial Dispensers of Liquor. The common law imposed liability on neither social hosts nor commercially licensed vendors. Warr v. JMGM Group, LLC, 433 Md. 170, 70 A.3d 347 (2013) (deferring to legislature and declining to change law to recognize duty). Many state legislatures have changed this for commercial vendors through Dram Shop Acts. These acts generally provided a civil cause of action (as well as criminal sanctions) against commercial furnishers of alcohol for damages resulting from a consumer's intoxicated state. In addition, many states that are without a Dram Shop Act have enacted alcohol-beverage control laws, the violation of which may constitute negligence per se, as plaintiff argued in the case of Stachniewicz v. Mar-Cam Corp., 259 Or. 583, 488 P.2d 436 (1971), page 238. See also Boyle v. ASAP Energy, Inc., 408 P.3d 183 (Okla. 2017) (negligence per se for violation of statute prohibiting sale of alcohol for consumption off premises to someone noticeably intoxicated). Licensed vendors' supplying of liquor to patrons has become widely recognized as a proximate cause of injuries attributable to intoxicated persons. But see Ling v. Jan's Liquors, 237 Kan. 629, 703 P.2d 731 (1985) (listing jurisdictions that do not recognize such liability) and Shea v. Matassa, 918 A.2d 1090 (Del. 2007) (declining to recognize common law dram shop liability). Most courts have been unwilling to extend liability on these grounds to a social host. What are the policy considerations and tort law principles differentiating a licensee and a social host? See dissenting opinion in Kelly v. Gwinnell.

7. Employers. Some courts also have imposed liability on employers where employees became intoxicated at work or at a work-related social

event and then injured someone while driving intoxicated. See, e.g., Dickinson v. Edwards, 105 Wash.2d 457, 716 P.2d 814 (1986) (alcohol served at employer-sponsored "banquet"); Otis Engineering Corp. v. Clark, 668 S.W.2d 307 (Tex. 1983) (employee sent home because discovered by supervisor to be intoxicated at work); Slade v. Smith's Management Corp., 119 Idaho 482, 808 P.2d 401 (1991) (employee struck and killed pedestrian on way home from company party). But see, Overbaugh v. McCutcheon, 183 W.Va. 386, 396 S.E.2d 153 (1990) (no liability for employer of driver who struck another car on way home from office Christmas party) and Johnston v. KFC National Management Co., 71 Haw. 229, 788 P.2d 159, 162 (1990) (employee injured someone after office Christmas party, "we find no clear judicial trend toward modifying the traditional common law, nor any statutory enactment or policy which leads this court to conclude that a change in the common law is appropriate at this time.")

8. Designated Driver. At a company awards dinner at a country club, the bartender refused further service to one of the guests because she thought the guest had had too much to drink. Based on an assurance from a colleague that the colleague would drive him home, the bartender resumed serving the guest. The colleague later changed his mind and left the country club without the guest. Driving himself home, the guest crossed the center line and struck another

vehicle head on, killing its driver. Should the colleague be liable to the estate of the driver who was killed? Stephenson v. Universal Metrics, Inc., 251 Wis.2d 171, 641 N.W.2d 158 (2002) (finding that public policy considerations precluded the imposition of liability on the designated driver).

9. Entrustment. A car owner lends his vehicle to a person who is obviously intoxicated. The driver negligently runs into plaintiff. Should the owner be liable? See Deck v. Sherlock, 162 Neb. 86, 75 N.W.2d 99 (1956) (owner denied that driver was intoxicated, but court found jury question based on circumstances that included owner drinking with driver earlier on day of accident and owner knowing that driver's license had been revoked for driving while intoxicated). Suppose the owner does not know bailee is intoxicated at the time but does know he is an alcoholic. See Powell v. Langford, 58 Ariz. 281, 119 P.2d 230 (1941) (wife's knowledge that husband was alcoholic who had previously been involved in accidents while driving intoxicated was enough even though she had no knowledge of intoxication on the day of the accident). Should it make any difference that the automobile is given outright rather than loaned? Compare Estes v. Gibson, 257 S.W.2d 604 (Ky.1953) (no liability where title was in son's name and mother was merely a donor) with Kahlenberg v. Goldstein, 290 Md. 477, 431 A.2d 76 (1981) (liability where father purchased car for son whom he knew to be an incompetent driver). What if the defendant loaned money to her grandson to buy a car knowing that he had a drinking problem? What if the car dealer from whom the grandson purchased the car was also aware of the problem? Cf. Vince v. Wilson, 151 Vt. 425, 561 A.2d 103 (1989) (both the relative who financed purchase and

the dealer could be liable where both knew that driver had no license because he had repeatedly failed test). Many courts have recognized the analogy between negligent sale of alcohol and the tort of

400

negligent entrustment. See Buchanan v. Merger Enterprises, Inc., 463 So.2d 121, 126 (Ala.1984). Walmart sells aerosol dust remover to plaintiff's decedent on nine occasions over the course of twenty-seven hours. She inhales it to get high and dies in her car in Walmart's parking lot. Should Walmart be liable? Allen v. Walmart Stores, 907 F.3d 170 (5th Cir. 2018) (applying Texas law) (negligent entrustment does not extend to the sale to adults of abusable volatile chemicals).

Enright v. Eli Lilly & Co.

Court of Appeals of New York. 1991.

77 N.Y.2d 377, 570 N.E.2d 198, 568 N.Y.S.2d 550.

[Plaintiff Karen Enright's grandmother ingested DES as a miscarriage preventive during a pregnancy that resulted in the birth of plaintiff Patricia Enright in 1960. Plaintiff Patricia Enright alleges that she developed abnormalities of her reproductive system due to her in utero exposure to DES and that these abnormalities resulted in several miscarriages and the premature birth of plaintiff Karen Enright. Karen suffers from cerebral palsy and other disabilities that plaintiffs attribute to her premature birth and thus to her grandmother's ingestion of DES. Karen Enright's claims were dismissed by the trial court and she appealed. The appellate division

affirmed the dismissal of the causes of action based on negligence, breach of warranty and fraud, but reinstated the strict liability count, holding that the strong public policy in favor of providing a remedy for DES victims justified recognizing a strict products liability cause of action. Patricia Enright's claim for her own injuries and her husband's derivative claim for loss of consortium were not affected by the trial court's ruling and were still pending.]

Wachtler, Chief Judge. ***

The tragic DES tale is well documented in this Court's decisions and need not be recounted here [c]. It is sufficient to note that between 1947 and 1971, the drug, a synthetic estrogen-like substance produced by approximately 300 manufacturers, was prescribed for use and ingested by millions of pregnant women to prevent miscarriages. In 1971, the Food and Drug Administration banned the drug's use for the treatment of problems of pregnancy after studies established a link between in utero exposure to DES and the occurrence in teen-age women of a rare form of vaginal and cervical cancer. Plaintiffs allege that in utero exposure to DES has since been linked to other genital tract aberrations in DES daughters, including malformations or immaturity of the uterus, cervical abnormalities, misshapen Fallopian tubes and abnormal cell and tissue growth, all of which has caused in this population a marked increase in the incidence of infertility, miscarriages, premature births and ectopic pregnancies.

The Legislature and this Court have both expressed concern for the victims of this tragedy by removing legal barriers to their tort

recovery- barriers which may have had their place in other contexts, but which in

401

DES litigation worked a peculiar injustice because of the ways in which DES was developed, marketed and sold and because of the insidious nature of its harm. ***

More recently, this Court responded to the fact that--for a variety of reasons unique to the DES litigation context--a DES plaintiff generally finds it impossible to identify the manufacturer of the drug that caused her injuries. We held that liability could be imposed upon DES manufacturers in accordance with their share of the national DES market, notwithstanding the plaintiff's inability to identify the manufacturer particularly at fault for her injuries [c].

In the present case, we are asked to do something significantly different. We are asked, not to remove some barrier to recovery that presents unique problems in DES cases, but to recognize a cause of action not available in other contexts simply (or at least largely) because this is a DES case.

In Albala v. City of New York, 54 N.Y.2d 269, 271, 445 N.Y.S.2d 108, 429 N.E.2d 786, supra, we were presented with the question "whether a cause of action lies in favor of a child for injuries suffered as a result of a preconception tort committed against the mother." There, the mother suffered a perforated uterus during the course of an abortion. Four years later, she gave birth to a brain-damaged child, whose injuries were allegedly attributable to the defendants' negligence in perforating the mother's uterus. We declined, as a matter of policy, to recognize a cause of action on behalf of the child,

believing that to do so would "require the extension of traditional tort concepts beyond manageable bounds" [c]. Among other things, we were concerned with "the staggering implications of any proposition which would honor claims assuming the breach of an identifiable duty for less than a perfect birth" and the difficulty, if such a cause of action were recognized, of confining liability by other than artificial and arbitrary boundaries [c].

The case now before us differs from Albala only in that the mother's injuries in this case were caused by exposure to DES instead of by medical malpractice. A different rule is justified, therefore, only if that distinction alters the policy balance we struck in Albala.

The primary thrust of plaintiffs' argument and the Appellate Division's decision is that DES itself alters that balance. From the Legislature's actions in modifying the applicable Statute of Limitations and reviving time-barred DES cases and from our adoption of a market-share liability theory in Hymowitz, plaintiffs perceive a public policy favoring a remedy for DES-caused injuries sufficient to overcome the countervailing policy considerations we identified in Albala. The implication, of course, is that the public interest in providing a remedy for those injured by DES is stronger than the public interest in providing a remedy for those injured by other means--medical malpractice, for example. We do not believe that such a preference has been established. ***

402

In the present case, however, neither plaintiffs, the Appellate Division, nor the dissent has identified any unique feature of DES litigation that justifies the novel proposition they advance--recognition

of a multigenerational cause of action that we have refused to recognize in any other context. The fact that this is a DES case does not by itself justify a departure from the Albala rule.

Closer to the mark, though still falling short, is plaintiffs' second argument. They note that Albala was a negligence case and that we left open the question whether a different result might obtain under a strict products liability theory, because of the potentially different policy considerations in such a case [c]. Having now examined the question in the context of this particular strict products liability claim, we find no basis for reaching a different conclusion than we did in Albala. ***

Despite these considerations, the countervailing ones remain strong enough to preclude us from recognizing a cause of action here. To begin, the concerns we identified in Albala are present in equal measure here. The nature of the plaintiffs' injuries in both cases--birth defects--and their cause--harm to the mothers' reproductive systems before the children were conceived--are indistinguishable for these purposes. They raise the same vexing questions with the same "staggering implications" [c], As in Albala, the cause of action plaintiffs ask us to recognize here could not be confined without the drawing of artificial and arbitrary boundaries. For all we know, the rippling effects of DES exposure may extend for generations. It is our duty to confine liability within manageable limits (see, [c]; Prosser, Palsgraf Revisited, 52 Mich.L.Rev. 1, 27). Limiting liability to those who ingested the drug or were exposed to it in utero serves this purpose.

At the same time, limiting liability in this fashion does not unduly impair the deterrent purposes of tort liability. The manufacturers remain amenable to suit by all those injured by exposure to their product, a class whose size is commensurate with the risk created. In addition, we note that the tort system is not the only means of encouraging prescription drug safety; the Federal Food and Drug Administration has primary responsibility for that task [c]. We do not suggest, as some have (see, id.), that for this reason the judicial system should abandon its traditional role. But in light of the FDA's responsibility in this area, the need for the tort system to promote prescription drug safety is at least diminished.

That the product involved here is a prescription drug raises other considerations as well. First, as in most prescription drug cases [c], liability here is predicated on a failure to warn of dangers of which the manufacturers knew or with adequate testing should have known. Such a claim, though it may be couched in terms of strict liability, is indistinguishable from a negligence claim [c]. Concepts of reasonable care and foreseeability are not divorced from this theory of liability, as they may be under other strict products liability predicates. Thus, the effort to distinguish this case from Albala is strained.

403

More important, however, is recognition that public policy favors the availability of prescription drugs even though most carry some risks [cc]. That is not to say that drug manufacturers should enjoy immunity from liability stemming from their failure to conduct adequate research and testing prior to the marketing of their

products. They do not enjoy such immunity, as evidenced by our recognition of liability in favor of those who have been injured by ingestion or in utero exposure to DES. But we are aware of the dangers of overdeterrence--the possibility that research will be discouraged or beneficial drugs withheld from the market. These dangers are magnified in this context, where we are asked to recognize a legal duty toward generations not yet conceived.

The dissent would have us believe that this case involves nothing but application of straightforward strict products liability doctrine. But this case is fundamentally different in the same way that Albala was fundamentally different from other negligence cases. In neither this case nor Albala was the infant plaintiff exposed to the defendants' dangerous product or negligent conduct; rather, both were injured as a consequence of injuries to the reproductive systems of their mothers. ***

In sum, the distinctions between this case and Albala provide no basis for a departure from the rule that an injury to a mother which results in injuries to a later-conceived child does not establish a cause of action in favor of the child against the original tort-feasor. For this reason, we decline to recognize a cause of action on behalf of plaintiff Karen Enright.

***

[Dissenting opinion of JUSTICE HANCOCK omitted.]

NOTES AND QUESTIONS

1. In a comparable case, Ohio also found no liability because of the remoteness in time and causation. Grover v. Eli Lilly & Co., 63 Ohio

St.3d 756, 591 N.E.2d 696 (1992).

2. Is an emergency room doctor liable to the friend who brought the patient for treatment for not telling the friend to be tested for meningitis? "The Court is once again at a familiar place: defining legal duty in a negligence case, in particular determining where to fix the limit of a doctor's malpractice liability for professional advice allegedly given to someone not his patient. This sort of line-drawing--a policy-laden determination reflecting a balance of competing concerns--is invariably difficult not only because it looks in part to an unknowable future but also because it is in a sense arbitrary, hard to explain to the person just on the other side of the line, especially when grievous injury is alleged. Human compassion and rigorous logic resist the exercise. If this person can recover, why not the next? Yet line-drawing is necessary because, in determining responsibility for negligent acts, common law courts also must look beyond the immediate facts and take into account the larger principles at stake, including the need 'to limit the legal consequences of wrongs to a controllable degree.'" McNulty v.

404

City of New York, 100 N.Y.2d 227, 234, 792 N.E.2d 162, 167, 762 N.Y.S.2d 12, 17 (2003) (Kaye, C.J., concurring). Would the doctor be liable if the friend fainted while observing emergency room treatment of patient? Murillo v. Seymour Ambulance Assn., Inc., 264 Conn. 474, 823 A.2d 1202 (2003) (repeated attempts to insert IV in preparation for emergency surgery) (no duty to bystander).

3. Employer or land owner or manufacturer acts negligently in exposing worker to a toxin. Should defendant be liable to family

members of the worker who themselves become ill through exposure to the toxin at home? Compare Holdampf v. A.C. & S., Inc., 5 N.Y.3d 486, 840 N.E.2d 115, 806 N.Y.S.2d 146 (2005) (second-hand exposure to asbestos fibers while laundering husband's clothes--no liability): In re Certified Question from the Fourteenth Dist. Ct. App. of Tex., 479 Mich. 498, 740 N.W.2d 206 (2007) (second-hand exposure to asbestos fibers while laundering clothes of stepfather who had worked on defendant's premises--no liability); Certainteed Corp. v. Fletcher, 300 Ga. 327, 794 S.E.2d 641 (2016) (no duty to warn daughter who laundered father's work clothing); Quiroz v. ALCOA Inc., 416 P.3d 824 (Ariz. 2018) (finding no duty to family members); and Doe v. Pharmacia & Upjohn Co., 388 Md. 407, 879 A.2d 1088 (2005) (exposure to HIV-2 through unprotected intercourse with husband who became infected while working as lab technician at defendant's viral production facility--no liability) with Olivo v. Owens-Illinois, Inc., 186 N.J. 394, 895 A.2d 1143 (2006) (second-hand exposure to asbestos fibers while laundering clothes of husband who had worked on defendant's premises--liability); Satterfield v. Breeding Insulation Co., 266 S.W.3d 347 (Tenn. 2008) (daughter's secondhand exposure to asbestos fibers through living in same household as worker--liability); Quisenberry v. Huntington Ingalls Inc., 296 Va. 233, 818 S.E.2d 805 (2018) (answering certified question) (daughter's second-hand exposure to asbestos fibers through living in same household as worker--liability); and Ramsey v. Ga. S. U. Adv. Dev. Ctr., 189 A.3d 1255 (Del. 2018) (reversing earlier precedent to find liability to household member).

In jurisdictions that permit claims by household family members, what about someone who commuted each day with worker in a car

pool? Sat next to him on the bus? Would they too have claims? Kesner v. Superior Court, 1 Cal.5th 1132, 384 P.3d 283, 210 Cal.Rptr.3d 283 (2016) (liability limited to members of a worker's household--persons who live with the worker and are thus foreseeably in close and sustained contact with the worker over a significant period of time).

4. What are the public policy considerations in each of the following situations? Where should the line be drawn?

A. The day after he performed surgery on a twelve-year-old girl, doctor learned that the blood with which she was transfused included HIV antibodies and thus that she probably had been exposed to HIV. He did not tell her or her parents until she was seventeen and was diagnosed with AIDS. In the meantime, she had infected her boyfriend. He sued physician for failing to inform the patient or her parents of the exposure, the risk that she might develop AIDS, and the risk to her sexual partners. Should the boyfriend be able to recover? See Reisner v. UCLA, 31 Cal.App.4th 1195, 37

Cal.Rptr.2d 518 (1995) (appellate court reversed judgment on the pleadings, allowing boyfriend's case to proceed). What if boyfriend infected someone else before he found out? Could she recover? What if the woman he infected had a baby who developed AIDS from exposure to her mother? Could the baby recover from the doctor?

B. After a procedure to enhance his fertility, the patient's sperm count actually was lower, allegedly as a result of the urologist's malpractice. Patient and his wife both filed suit for malpractice. She

sought recovery for her pain, suffering, and mental anguish due to the failed IVF procedures that she later underwent in attempting to conceive a child and for her inability to bear her husband's genetic children. Does her complaint state a cause of action against her husband's doctor? Cohen v. Cabrini Medical Ctr., 94 N.Y.2d 639, 730 N.E.2d 949, 709 N.Y.S.2d 151 (2000) (dismissing claim because imposition of duty does not turn merely on foreseeability of the harm but also public policy considerations). After a vasectomy, patient claimed that doctor provided negligent post-operative advice and care that resulted in patient's wife becoming pregnant. Does patient's wife have a cause of action against doctor? Dehn v. Edgecombe, 384 Md. 606, 865 A.2d 603 (2005) (court declined to permit wife's claim to proceed because it would expand traditional tort concepts beyond manageable bounds since the rationale would cover all potential sexual partners of the patient).

C. A drug company failed to warn physicians of possible risks associated with prescribing a drug for children under particular circumstances. Child suffered permanent damage after taking drug. Parents sued pediatrician and drug company. Can pediatrician recover for his pain and suffering caused by knowing the child was injured through the drug he prescribed and by the litigation itself? Cf. Washington State Physicians Ins. Exch. & Assn., 122 Wash.2d 299, 858 P.2d 1054 (1993) (drug company argued that physician's damages were too remote; case decided on narrower grounds).

D. Should an attorney be liable to the intended beneficiaries of a will? Or to the fiancée of a divorce client? Scott v. Burgin, 97 A.3d 564 (D.C. App. 2014) (client died before divorce and thus pension went to wife instead of fiancée). Some jurisdictions permit such an

action, but others limit legal malpractice actions to clients. See Chapter 8, Duty of Care, pages 466--469.

E. Should a pharmacy that filled a prescription for hydrocodone be liable for the injuries caused by its customer while she was driving under the influence of the drug? Sanchez v. Wal-Mart Stores, Inc., 221 P.3d 1276 (Nev. 2009) (finding no duty to protect general public from customer driving under the influence of controlled substance). What if the pharmacy gave customer the medication for another patient, causing customer to drive erratically and cause multiple car accidents? Liability to the occupants of the other cars? Martinez v. Walgreen Co., 935 F.3d 396 (applying Texas law) (no liability because no duty owed to third parties).

F. Should an optometrist be liable to the passengers of a car that collided with a horse-drawn hay wagon if had negligently told motorist his sight was adequate for driving? Cichos v. Dakota Eye Inst., 933 N.W.2d 452

(N.D. 2019) (no duty to third parties arising from the physician's failure to warn patient about driving risks).

G. Should a private boarding school be liable to a minor who contracted a serious insect-borne disease when attending a trip abroad that the school had organized? Munn v. Hotchkiss School, 326 Conn. 540, 165 A.3d 1167 (2017) (answering certified question from Second Circuit) ("we conclude that the public policy of Connecticut does not preclude imposing a duty on a school to warn about or to protect against [such a risk].") What if minor had returned

to campus from a school-organized trip abroad and infected her roommate with the coronavirus?

5. The following cases all involve causes of action against various media defendants. What public policy issues are implicated in the courts' decisions regarding proximate cause?

A. Plaintiff is wounded by gunmen who also killed his father. He learned the gunmen had been hired by a business associate of his father's through a "Gun for Hire" ad in a magazine for mercenaries. Plaintiff seeks compensation for his gunshot wounds and, along with his brother, for the wrongful death of his father from the publisher of the magazine, claiming that the publisher should have foreseen that the ad would result in violent criminal activity. How might plaintiffs prove that the result was foreseeable to the publisher? What other factors should the court consider? Compare Eimann v. Soldier of Fortune Magazine, 880 F.2d 830 (5th Cir.1989), cert, denied, 493 U.S. 1024 (1990) (applying Texas law) (denying liability) with Braun v. Soldier of Fortune Magazine, Inc., 968 F.2d 1110 (11th Cir.1992), cert, denied, 506 U.S. 1071 (1993) (applying Georgia law) (upholding liability). Soldier of Fortune magazine stopped accepting personal ads and narrowly avoided bankruptcy in the wake of the Braun case. How far should the courts go to protect the First Amendment rights of the publisher? What about new media? Should a website be liable for facilitating the illegal sale of a firearm that was used to murder plaintiff's decedent? Cf. Vesely v. Armslist LLC, 762 F.3d 661 (7th Cir. 2014) (applying Illinois law) (dismissing complaint because no duty on part of website to protect plaintiff's decedent from criminal conduct of defendant).

B. James Perry murdered an eight-year-old quadriplegic boy, the boy's mother, and the boy's private duty nurse. Perry had been hired by the boy's father who was after the $2 million that his son had received in settlement for the injuries that had left him paralyzed. In negotiating with the father, planning the murders, and executing them, Perry had followed the detailed instructions and advice of the book Hit Man: A Technical Manual for Independent Contractors, published by Paladin Enterprises. Is Paladin a proximate cause of the deaths? Should the First Amendment preclude liability? Rice v. Paladin Enterprises, Inc., 128 F.3d 233 (4th Cir. 1997) (applying Maryland law).

C. Defendants went on a shooting spree, during which they killed someone and seriously injured plaintiff, a clerk in a convenience store. Plaintiffs complaint alleged that the killers were trying to emulate characters in the movie Natural Born Killers, which the killers had watched

repeatedly, sometimes under the influence of mind-altering drugs. Warner Brothers and Producer Oliver Stone are among the defendants named. Plaintiff claims they used violent imagery that was intended to cause its viewers to imitate it. If plaintiff can prove her allegations, should Warner Brothers and Oliver Stone be liable? Byers v. Edmondson, 712 So.2d 681 (La.App.1998).

D. Student walked into the lobby of his high school in Paducah, Kentucky, and shot several of his fellow students. The parents of the victims sued companies that had produced movies, video games, and Internet sites that they alleged had "desensitized the shooter to

violence" and "caused" him to kill the other students. Do the defendants owe a duty to protect third parties from how watchers or players of their products process the ideas and images presented? Was it foreseeable that someone would react in this way? Was the violent, criminal action a superseding cause? James v. Meow Media, Inc., 300 F.3d 683, 701 (6th Cir. 2002) (applying Kentucky law) (no liability because no duty).

E. Man who was "ambushed" at a taping of the Jenny Jones Show by revelation that fellow guest had crush on him shot fellow guest several days later back in their hometown. Do the producers of the show have a duty to protect one guest from the criminal acts of another? Graves v. Warner Bros., 253 Mich.App. 486, 656 N.W.2d 195 (2002) (majority holds no duty, but dissent would hold that "as a matter of public policy, if defendants, for their own benefit, wish to produce 'ambush' shows that can conceivably create a volatile situation, they should bear the risk, if a guest is psychologically unstable or criminally dangerous by being charged with that knowledge in the context of any foreseeability analysis.")

6. For an interesting analysis of the tort issues arising out of the cases against media defendants, see Anderson, "Incitement and Tort Law," 37 Wake Forest L. Rev. 957 (2002).

BY WAY OF SYNTHESIS

The problem involved in the cases in this chapter is whether defendant's liability to plaintiff should be cut off even though the defendant's conduct was both negligent and a factual cause of the plaintiff's injury. Is there a system by which this problem can be handled and a test by which to make the determination?

1. It may first be suggested that the problem can be raised and treated by the court in connection with any one of the four elements of a negligence case--duty, breach of duty, causation or damage. The duty approach, for example, is espoused in the majority opinion in Palsgraf and is rather frequently used in cases of the unforeseeable plaintiff. Certain types of damage may be held not to be the basis of recovery. Negligence may be held not to be directed to the plaintiff. But most courts have treated the question in the causation element.

408

The problem is a difficult one, but the length of the treatment in this casebook and the amount of time allotted it in most courses may perhaps give an exaggerated impression of its importance. In the great majority of cases, the problem does not arise at all; it comes up only in the fraction of actions that involve unusual fact situations. How is it to be handled when it does arise?

There are many legal tests that have been devised by the courts and legal scholars--some rather precise and almost mechanical and some very broad and general. The more precise ones give an illusion of certainty. As a matter of fact, almost every jurisdiction has two distinct and apparently unrelated lines of authority--one with a broad scope of liability and the other with a narrow scope. They do not help the court especially to reach a decision on a case before it, but they do help substantially in explaining the decision after it has been reached.

This is not a situation, however, in which precision and certainty are essential. Neither party to the action engaged in his conduct in

reliance upon a "rule" of proximate cause. The principal task of the court is to do justice as between these parties in their present situation. For this purpose, a weighing, evaluative process is required, rather than a clear- cut rule of law. This suggests the use of a standard similar to the one for determining whether a person was negligent (what a reasonable, prudent person would do under the same or similar circumstances). A standard allows the taking into consideration of competing factors or policy elements. Often these policy elements are not articulated or brought out into the open.

2. There are two general approaches to the problem of proximate cause--the hindsight, or direct-causation, approach and the foreseeability approach. Practically every jurisdiction has used both, at one time or another. In many instances they would be likely to produce the same result, but not always. In theory the foresight approach would produce a smaller ambit of liability.

But foreseeability is an accordion concept, depending upon the detail and precision with which foresight is required. Many torts teachers have found it helpful to express foreseeability in terms of the risk idea. "This position has been justified as more rational, since the factors which define negligence should also limit liability for negligence; as easier to administer, since it fixes the nearest thing to a definite boundary of liability which is possible; and more just, since negligence may consist of only a slight deviation from the community standard of conduct, and even be free from all moral blame, while its consequences may be catastrophic, and out of all proportion to the fault." Prosser and Keeton, Torts 282 (5th ed. 1984), citing Pollock, Liability for Consequences, 38 Law Q.Rev. 165 (1922).

There is much force in these arguments, but they suggest far more in the way of certainty and precision than the test warrants. Consider a

409

single illustration, adapted from Judge Magruder's opinion in Marshall v. Nugent, 222 F.2d 604 (1st Cir.1955) (applying New Hampshire law).

Suppose that a truck is driven at excessive speed. It is relatively easy to say that the total risk, made up of the aggregate of all of the possibilities of harm, whether they are very probable or fantastic, is so great that the reasonable man of ordinary prudence would not do this, and therefore the driver is negligent. How easy is it, by a process of fragmentation of the risk, to separate out particular consequences and intervening factors, and to say that they are, or are not, significant parts of the original total foreseeable risk? Is it "foreseeable," in any sense that the reasonable driver could have the possibility in mind, and so take precautions against it, that

(a) The driver will hit another car and kill someone?

(b) The car with which he collides will be thrown out of control, and hit a third car, or even a fourth? Springer v. Pacific Fruit Exchange, 92 Cal.App. 732, 268 P. 951 (1928).

(c) He will endanger a child in the street, and a person who tries to rescue her will sustain a broken arm? Wagner v. International R. Co., note 2, page 389.

(d) The truck will narrowly miss a pregnant woman, who will be frightened into a miscarriage? Cf. Mitnick v. Whalen Bros., 115 Conn.

650, 163 A. 414 (1932).

(e) He will hit a pedestrian, who will be left helpless in the street, and be run over by another car? Bunda v. Hardwick, 376 Mich. 640, 138 N.W.2d 305 (1965).

(f) He will cause a collision, which will leave wrecked cars blocking the highway, and another driver will run into the wreckage? Holmberg v. Villaume, 158 Minn. 442, 197 N.W. 849 (1924).

(g) He will hit a pedestrian, and while the pedestrian is unconscious, his watch will be stolen? Cf. Brauer v. New York Central R. Co., 91 N.J.L. 190, 103 A. 166 (1918).

(h) The person he injures will contract pneumonia or another infection because of his weakened condition, and die of it? See page 392, note 12.

(i) The injured person may suffer a second accident six months later while he is walking on crutches? Squires v. Reynolds, page 392, note 12.

(j) The person he injures will receive negligent medical treatment, and die or be further injured because of it? Jess Edwards, Inc. v. Goergen, page 392, note 11.

(k) The truck will knock a car up against a stone wall. The wall is weakened and, as a result, a stone falls off the top a day later and injures

a pedestrian. Cf. In re Guardian Casualty Co., 253 App.Div. 360, 2 N.Y.S.2d 232 (1938).

All of these things have happened and there have been holdings that each was "proximate." Is it perhaps overloading the risk concept to make it the basis for determining each of these situations?

Like the purpose-of-the-statute test (see note 2B, page 241), from which it is derived, the risk test often approaches a begging of the question. One decides how broadly or narrowly to express the purpose of the statute or the scope of the risk of an act of common law negligence with an awareness of what the result of that decision will be and with the decision perhaps influenced by it.

And yet, despite all of these difficulties, the risk approach, viewed entirely as an approach rather than as a definitive test, can be very helpful. It poses the problem in a way that can help to direct the line of thought of the decision-maker. If the idea is expressed in terms of a reasonably close relation between the harm threatened (or the risk created) and the injury incurred, then it is put in the form of a standard instead of a rule, and the need to exercise discretion in its application is made apparent. See Prosser, Selected Topics on the Law of Torts, 191, 233, 242 (1954).

3. From the consideration of the cases in this chapter, you should have obtained a "feel" for the problem, so that it is possible to tell promptly whether the answer is clear or so difficult that litigation may be warranted. You are not expected to be sure of the answer for all cases, but you should identify fact patterns in which application of the principles of proximate cause have become fairly well crystallized--for example, the thin-skull and rescue situations, social host liability, suicides, and third-generation DES plaintiffs.

You should have become acquainted with the various legal approaches and their ramifications and be able (1) to use or respond to them in argument, (2) to present a lucid and logical legal argument for a particular result, and (3) to utilize or respond to such modifying adjectives for the word "cause" as active, efficient, natural and probable, foreseeable or unforeseeable, proximate, nearest and superseding and such terms as risk, unbroken sequence, just or expedient result, or dependent or independent intervening cause.

You ought to know how to argue the facts as well as the law. An illustration may be helpful in this regard. In Hines v. Morrow, 236 S.W. 183 (Tex.Civ.App.1921), defendant negligently left a mudhole in a highway. A's car drove into it and got stuck. B, a man with a wooden leg, attempted to pull A's car out of the mud with a tow rope. His wooden leg got stuck in the mud, and in order to extricate himself B took hold of the tail gate of the tow truck. As the truck moved, a loop in the tow rope lassoed his good leg and broke it. Clarence Morris, in Proximate Cause in Minnesota, 34 Minn.L.Rev. 185 (1950), attributes the "peg leg"

decision in the Hines case to the summary of the facts in plaintiff's brief, as follows: "The case stated in briefest form, is simply this: Appellee was on the highway, using it in a lawful manner, and slipped into this hole, created by appellant's negligence, and was injured in attempting to extricate himself."

If the plaintiff had used the same approach in stating the issue in Koehler v. Waukesha Milk Co., 190 Wis. 52, 208 N.W. 901 (1926), he would have said that the defendant left a glass milk bottle on the

plaintiff's doorstep with a slight chip near the top, and the decedent perished as a result--with the consequence that he would probably have lost the case. Instead, he explained that the decedent had picked the bottle up and scratched a finger. The scratch had become infected, the infection had gone into blood poisoning (before the advent of penicillin), and the decedent died.

4. If a trial court decides "as a matter of law" that the defendant's conduct was not a proximate cause of the plaintiff's injury, it dismisses the complaint, grants summary judgment, or directs a verdict for the defendant. This has happened in many of the cases in this chapter. If there is an issue of proximate cause in the case and the trial court decides to let it go to the jury, it must instruct the jury as to the nature of the problem that it is to decide. What does the court say? There is no consensus. Model instructions from three different states illustrate the variety.

Arkansas. Model Jury Instructions AMI 501. "The law frequently uses the expression 'proximate cause,' with which you may not be familiar. When I use the expression 'proximate cause,' I mean a cause which, in a natural and continuous sequence, produces damage and without which the damage would not have occurred. [This does not mean that the law recognizes only one proximate cause of damage. To the contrary, if two or more causes work together to produce damage, then you may find that each of them was a proximate cause.]"

AMI 503. "(Defendant) contends and has the burden of proving that following any act or omission on [his][her][its] part an event intervened that in itself caused any damage completely independent

of his [his][her][its] conduct. If you so find, then (defendant's) act or omission was not a proximate cause of any damage resulting from the intervening event. [The fact that other cause(s) intervened between any act or omission on the part of (defendant), and the damage for which claim is made, would not relieve (defendant) of liability if the damage is reasonably foreseeable as a natural and probable result of any act or omission on the part of (defendant).]"

Illinois. III. Pattern Jury Instr.-Civ. 15.01. "When I use the expression 'proximate cause,' I mean a cause that, in the natural or ordinary course of events, produced the plaintiff's injury. [It need not be the only cause, nor the last or nearest cause. It is sufficient if it combines with another cause resulting in the injury.]"

412

Florida. 401.12 a. "Negligence is a legal cause of [loss] [injury] [or] [damage] if it directly and in natural and continuous sequence produces or contributes substantially to producing such [loss] [injury] [or] [damage], so that it can reasonably be said that, but for the negligence, the [loss] [injury] [or] [damage] would not have occurred."

Are these instructions meaningful to the average jury? Is that necessary? Would they do as the test for the court to apply? Would they produce the same result in such cases as Palsgraf, Derdiarian v. Felix Contracting Co. and Fuller v. Preis? Is it better for them to be complex and accurate, or simple and understandable? Do they suggest that the court should be more ready to decide the case itself or turn it over to the jury? See Mikell, Jury Instructions and Proximate Cause: An Uncertain Trumpet in Georgia, 27 Ga. St.B.J.

60 (1990), for a discussion of several empirical studies concerning the jury's understanding of the instruction on proximate cause.

Taxicab driver left keys in an unlocked and unattended cab. Cab was stolen by teens who went on a joyride that included rear-ending another car and then driving over the curb and up onto the sidewalk to get away from the accident scene. While up on the sidewalk, the cab struck a fire hydrant and then the plaintiff, seriously injuring her. The teen thieves abandoned the cab while it was still moving and fled the scene on foot. (Sound familiar?) The injured pedestrian sued the cab driver and his employer. Defendants argued that the actions of the teens were the superseding cause of pedestrian's injuries. Jury returned a verdict that said both that the cab driver was the proximate cause of pedestrian's injuries and that the teens' actions were a superseding cause. Noting that those two findings are inconsistent (do you see why?), the court reversed for a new trial based on an inconsistent verdict. Snell v. Norwalk Yellow Cab, Inc., 332 Conn. 720, 212 A.3d 646 (2019).

4. Shifting Responsibility

Usually, when the defendant has negligently created a risk of harm to the plaintiff, the failure of a third person to intervene and take some action to prevent the risk from being realized, that is, to prevent the harm, will not affect the liability of the defendant when the harm in fact occurs. If, for example, the defendant negligently sets a grass fire that is burning toward the plaintiff's building, the failure of someone else to put out the fire does not relieve the defendant of liability. Wiley v. West Jersey R. Co., 44 N.J.L. 247 (1882). The fact that the third person was under a duty to the plaintiff

to extinguish the fire, and would be liable to the plaintiff for his failure to do so, does not affect the defendant's liability.

Thus in Diehl v. Fidelity Philadelphia Trust Co., 159 Pa.Super. 513, 49 A.2d 190 (1946), the defendant Metropolitan negligently discharged steam onto the sidewalk in front of a building owned by Fidelity.

413

The steam condensed and froze, forming a coating of invisible ice on the pavement. With notice of the situation, Fidelity failed to clean off the ice although it was under a duty to do so. Plaintiff, a pedestrian, slipped on the ice, fell, and was injured. It was held that the failure of Fidelity to perform its duty did not relieve Metropolitan of liability, and that the two were both liable.

This is the usual conclusion in situations of this nature. There are, however, a few cases in which the conduct of the third person, whether action or inaction, has been held to relieve the defendant of liability because the responsibility has been shifted from his shoulders. For example, suppose defendant construction company left dynamite caps lying about and they were found by children whose parent confiscated them. If the parent then left them where child found them and was injured, the responsibility is said to have shifted to the parent, relieving the originally negligent defendant construction company. See Peterson v. Martin, 138 Minn. 195, 164 N.W. 813 (1917); Pittsburg Reduction Co. v. Horton, 87 Ark. 576, 113 S.W. 647 (1908); Calkins v. Albi, 163 Colo. 370, 431 P.2d 17 (1967).

Although it may be said in these cases that the risk created by the defendant has terminated, the risk is still there, and very much alive.

What has happened is that another person has taken control of it. When should that fact shield the original wrongdoer? Consider these situations. Corn mash is a byproduct of ethanol production that is fed to cattle. It has the consistency of tapioca pudding and is sometimes referred to as "wet cake" or "wet distiller's grain." Truck driver negligently spilled some in the road and state trooper closed that section of road and called for assistance for cleanup. Local fire department responded and moved the corn mash from the traveled portion of the road to the unpaved shoulder and ditch. Driver of truck was not asked to assist with the cleanup and did not. After the cleanup was completed, the trooper issued a citation to the driver, sent him on his way, and reopened the road. The next day, plaintiff lost control of her car on the same stretch of road due to corn mash on the road. Court found that the truck driver was not liable because the control of the risk had shifted to the fire department that did the cleanup and the trooper who reopened the road to traffic. Kimminau v. City of Hastings, 291 Neb. 133, 864 N.W.2d 399 (2015) (citing Restatement (Third) of Torts: Liability for Physical and Emotional Harm, § 7 (2010)).

Plaintiff alleged that her daughter's physician negligently misdiagnosed her as having chronic tonsillitis and referred her to an ENT specialist. Specialist, after performing tonsillectomy, prescribed too high a dose of a pain killer and child suffered brain damage. Is the physician who referred the patient to the specialist liable for the specialist's negligence? In Spicer v. Osunkoya, 32 A.3d 347 (Del. 2011), the court noted that other jurisdictions consistently have held that the original physician is not liable for the negligence of the specialist unless the

414

referring physician had reason to know the specialist was incompetent. Plaintiff attempted to avoid this result by arguing that the referring physician was himself negligent in diagnosing the patient's condition and that his medical malpractice was a proximate cause of the injury. The court rejected the argument, applying the principles of Restatement (Second) of Torts § 452, comment f, and finding that the full responsibility for "control of the situation and prevention of the threatened harm" had passed to the specialist and specialist's alleged malpractice was a superseding cause as a matter of law.

415

CHAPTER 7 JOINT TORTFEASORS

1. Liability and Joinder of Defendants

Bierczynski v. Rogers

Supreme Court of Delaware, 1968.

239 A.2d 218.

HERRMANN, Justice. This appeal involves an automobile accident in which the plaintiffs claim that the defendant motorists were racing on the public highway, as the result of which the accident occurred.

The plaintiffs Cecil B. Rogers and Susan D. Rogers brought this action against Robert C. Race and Ronald Bierczynski, ages 18 and 17 respectively, alleging concurrent negligences in that they violated various speed statutes and various other statutory rules of the road, and in that they failed to keep a proper lookout and failed to keep their vehicles under proper control. The jury, by answer to interrogatories in its special verdict, expressly found that Race and Bierczynski were each negligent and that the negligence of each was a proximate cause of the accident. Substantial verdicts were entered in favor of the plaintiffs against both defendants jointly. The defendant Bierczynski appeals therefrom. The defendant Race does not appeal; rather, he joins with the plaintiffs in upholding the judgment below.

[The evidence justified a finding that Bierczynski and Race were engaged in a speed contest, as they came down a hill side-by-side

at twice the legal speed. Ahead of them was the car of the plaintiffs, in the westbound lane. As they approached it, Race tried to get his car back into the eastbound lane. He lost control of it, and careened sideways, at about 70 miles per hour, into the front of plaintiffs' car. Bierczynski remained in the proper lane at all times, and brought his car to a stop in it, about 35 feet from the area of collision. It did not come in contact with the plaintiffs' vehicle.]

In many States, automobile racing on a public highway is prohibited by statute, the violation of which is negligence per se. [Cc] Delaware has no such statute. Nevertheless, speed competition in automobiles on the public highway is negligence in this State, for the reason that a reasonably prudent person would not engage in such conduct. This conclusion is in accord with the general rule, prevailing in other jurisdictions which lack statutes on the subject, that racing motor vehicles on a public highway is negligence. [Cc]

It is also generally held that all who engage in a race on the highway do so at their peril, and are liable for injury or damage sustained by a third person as a result thereof, regardless of which of the racing cars

directly inflicted the injury or damage. The authorities reflect generally accepted rules of causation that all parties engaged in a motor vehicle race on the highway are wrongdoers acting in concert, and that each participant is liable for harm to a third person arising from the tortious conduct of the other, because he has induced and encouraged the tort. [Cc]

We subscribe to those rules; and hold that, as a general rule, participation in a motor vehicle race on a public highway is an act of concurrent negligence imposing liability on each participant for any injury to a non-participant resulting from the race. If, therefore, Race and Bierczynski were engaged in a speed competition, each was liable for the damages and injuries to the plaintiffs herein, even though Bierczynski was not directly involved in the collision itself. Bierczynski apparently concedes liability if a race had, in fact, [still] been in progress [at the time of the accident]. Clearly there was ample evidence to carry to the jury the issue of a race--and with it, implicit therein, the issue of proximate cause as to Bierczynski. ***

We find no error as asserted by the appellant. The judgments below are affirmed.

NOTES AND QUESTIONS

1. Defendant Bierczynski is held liable to the plaintiffs even though his car did not come into contact with them because he acted in concert with defendant Race to cause injury to plaintiffs. Observe that there is also a civil procedure issue lurking beneath the holding of this case. The civil procedure rules of joinder govern whether the causes of action that the plaintiffs have against each of the two defendants can be joined together in a single lawsuit.

2. Joinder. Originally, English law permitted joinder in the same lawsuit of multiple defendants only if those defendants had acted in concert, as in the principal case. Thus, under the old common law rules of joinder, Race and Bierczynski could have been joined as defendants, but defendants who had not acted in concert could not have been joined in the same action. See Sadler v. Great Western

Ry. Co., [1896] A.C. 450 (delivery carts and vans belonging to two different companies, acting independently, blocked either end of a street, preventing access to plaintiff's land--separate actions required). Modern procedural codes or rules of civil procedure are based on principles of convenience and provide that joinder is permitted when the plaintiff's claims arise from "the same transaction, occurrence, or series of transactions or occurrences;" and "any question of law or fact common to all defendants will arise in the action." See Fed.R.Civ.P. 20(a)(2) and its state law counterparts. Joinder, therefore, is now permitted when the defendants acted in concert, when the defendants acted independently to cause the same harm, and even when the defendants acted independently to cause different harms.

3. Most jurisdictions, while permitting the plaintiff to join multiple defendants in the same action, do not require that the plaintiff do so.

417

The plaintiff has the right to sue one tortfeasor alone, without joining others who also may be liable. The defendant cannot, over the plaintiff's objection, compel the joinder of the others. See Sox v. Hertz Corp., 262 F.Supp. 531 (D.S.C.1967) and Magnuson v. Kelsey-Hayes Co., 844 S.W.2d 448 (Mo.App.1992) (defendant cannot prevent the voluntary dismissal of codefendant by plaintiff if defendant had not filed a cross-claim against codefendant). Although the defendant cannot affect the cause of action between the plaintiff and other potential defendants, the defendant can enforce whatever right to contribution or indemnity the defendant may have against another potential defendant by impleading, bringing a third-party

complaint against, that other party or by later bringing a separate lawsuit for contribution or indemnity against the other party. See Knell v. Feltman, page 441.

4. Liability. "Joint and several liability" means that each of several tortfeasors can be sued jointly with the others for the amount of the plaintiff's loss, and that each is also individually liable for the full amount of plaintiffs damages. The plaintiff can collect from any one of them or any group of them up to the full amount of plaintiff's damages as determined by the trier of fact.

5. There are three types of factual situations in which joint and several liability usually is imposed. The principal case illustrates the first--that in which the tortfeasors acted in concert. The classic discussion is Prosser, Joint Torts and Several Liability, 25 Calif. L. Rev. 413 (1937).

A. Three defendants, acting in concert, set upon the plaintiff. One held him, which was false imprisonment; another battered him; the third stole his silver buttons. All three were held liable for the entire damages. Smithson v. Garth, 3 Lev. 324, 83 Eng.Rep. 711 (1691).

B. Suppose that assailant attacks the plaintiff. Assailant's brother takes no part in the attack, but encourages him to do it and prevents plaintiff's wife from trying to help him. Is brother liable? Thompson v. Johnson, 180 F.2d 431 (5th Cir. 1950) (applying Mississippi law) (brother liable because engaged in common enterprise and prevented plaintiff's wife from helping him). What if he merely stands by and approves, but does nothing active? The mere presence at the commission of a tort does not render an observer liable as if he were a participant. Hilmes v. Stroebel, 59 Wis. 74, 17 N.W. 539 (1883) (all

who encouraged or incited assailant would be liable, but not those merely present).

C. Did the principal case involve an express or implied agreement to intentionally injure plaintiff? If not, why are defendants deemed joint tortfeasors? Did they participate in the joint creation of a negligent risk? See Lemons v. Kelly, 239 Or. 354, 360-61, 397 P.2d 784, 787 (1964).

D. Passenger, familiar with the fact that there are speed bumps on a street in a residential area with a speed limit of 25 m.p.h., urges driver to go faster so that the car would become airborne. Driver goes faster (data recorder on the car shows its speed was over 70 m.p.h.), hits speed bump, becomes airborne, loses control of car, and kills pedestrian who is on the sidewalk putting his toddler into a car seat. Is passenger liable? Navarrete v. Meyer, 237 Cal.App.4th 1276 (2015) (although some jurisdictions

recognize joint and several liability based on concert of action only for intentional torts, California allows it for any express or tacit agreement to commit a tort, including negligence).

6. Four friends (Cole, Woods, Hill, and Carrera) decided to travel to a farm belonging to Cole's grandfather to go shooting. On the way, Woods fell asleep. Cole hatched a plan to frighten Woods. He persuaded Hill and Carrera to load their guns to fire only one shell or bullet. Upon arrival at the farm, the pickup truck was driven into a barn, Woods was left asleep in the truck, and the guns were prepared. Following the plan, all three of them fired their guns into the ground near the truck, awakening plaintiff. They then pointed

their guns at Woods, saying "it's time to die," and pulled the triggers. Cole's and Carrera's guns produced a click as Cole had planned, but Hill's gun discharged, killing Woods. The representative of Woods' estate filed suit against Cole, alleging that he had acted in concert with Hill to negligently injure Woods. Would Cole be liable under traditional common law rules of joint and several liability? What if the jurisdiction has amended its common law rule to provide for apportionment of liability and otherwise limiting joint and several liability? Woods v. Cole, 181 Ill.2d 512, 230 Ill.Dec. 204, 693 N.E.2d 333 (1998) (no indication that legislature intended to abolish well-established principle of common law that those who act in concert are jointly and severally liable when it limited joint and several liability for indivisible harm). See also Restatement (Third) of Torts: Apportionment of Liability § 15 (2000) (Reporters' Note listing statutes that retain joint and several liability for concerted action even though abolishing it for indivisible injury cases).

7. The second situation in which joint and several liability may be imposed is that in which defendants fail to perform a common duty to the plaintiff. Included in this category are cases involving the liability of two parties based on their relationship to each other, e.g., the liability of a master for acts of the servant, the liability of an employer for the acts of the employee, the liability of the seller for a defect in a product manufactured by someone else. Marcon v. Kmart Corp., 573 N.W.2d 728 (Minn.App. 1998) (under Minnesota statute governing joint and several liability, seller Kmart liable for entire $8 million award based on jury's finding that sled was defective because bankrupt manufacturer had failed to warn of risks of kneeling on

sled). See Chapters 13 and 15 for discussions of vicarious liability and liability of seller of product for defects in product.

8. The third category of cases imposing joint and several liability, and the last in time of the three to be recognized by the common law, is that involving defendants who acted independently to cause an indivisible harm. As you read the cases that follow, keep in mind that the defendants might have acted either simultaneously or successively. Does this make a difference? Should it?

419

Coney v. J.L.G. Industries, Inc.

Supreme Court of Illinois, 1983. 97

Ill.2d 104, 454 N.E.2d 197, 73 Ill.Dec. 337.

[Wrongful death and survival claims were brought by Coney as administrator of the estate of Clifford M. Jasper. Jasper died while operating a hydraulic aerial work platform, manufactured by defendant, and the claims are based on strict products liability. Defendant argued that Jasper had committed contributory negligence and that his employer also had contributed to the plaintiff's injuries by failing to provide a "groundman," and by failing to "instruct and train Jasper on the operation of the platform." Three questions were certified to the Supreme Court on interlocutory appeal:

"Whether the doctrine of comparative negligence or fault is applicable to actions or claims seeking recovery under products liability or strict liability in tort theories?

Whether the doctrine of comparative negligence or fault eliminates joint and several liability?

Whether the retention of joint and several liability in a system of comparative negligence or fault denies defendants equal protection of the laws in violation of the Federal and state constitutions?"

The Illinois Supreme Court's answer to the first question was in the affirmative. This issue will be considered in more detail in the chapters on Defenses and Product Liability.]

THOMAS J. Moran, JUSTICE: ***The common law doctrine of joint and several liability holds joint tortfeasors responsible for the plaintiff's entire injury, allowing plaintiff to pursue all, some, or one of the tortfeasors responsible for his injury for the full amount of the damages. [Cc]

Defendant asserts joint and several liability is a corollary of the contributory negligence doctrine. Prior to Alvis [v. Ribar, 85 III.2d 1, 421 N.E.2d 886, 52 III.Dec. 23 (1981), judicially adopting pure comparative negligence in Illinois], a plaintiff who was guilty of even slight contributory negligence was barred from recovery. Defendant maintains that joint and several liability balanced this inequity by permitting a faultless plaintiff to collect his entire judgment from any defendant who was guilty of even slight negligence. With the adoption of comparative negligence where damages are apportioned according to each party's fault, defendant argues it is no longer rational to hold a defendant liable beyond his share of the total damages. ***

Generally, four reasons have been advanced [by plaintiff] for retaining joint and several liability:

(1) The feasibility of apportioning fault on a comparative basis does not render an indivisible injury "divisible" for

420

purposes of the joint and several liability rule. A concurrent tortfeasor is liable for the whole of an indivisible injury when his negligence is a proximate cause of that damage. In many instances, the negligence of a concurrent tortfeasor may be sufficient by itself to cause the entire loss. The mere fact that it may be possible to assign some percentage figure to the relative culpability of one negligent defendant as compared to another does not in any way suggest that each defendant's negligence is not a proximate cause of the entire indivisible injury.

(2) In those instances where the plaintiff is not guilty of negligence, he would be forced to bear a portion of the loss should one of the tortfeasors prove financially unable to satisfy his share of the damages.

(3) Even in cases where a plaintiff is partially at fault, his culpability is not equivalent to that of a defendant. The plaintiff's negligence relates only to a lack of due care for his own safety while the defendant's negligence relates to a lack of due care for the safety of others; the latter is tortious, but the former is not.

(4) Elimination of joint and several liability would work a serious and unwarranted deleterious effect on the ability of an injured plaintiff to obtain adequate compensation for his injuries. [Cc]

In adopting comparative negligence, this court eliminated the total bar to recovery which a plaintiff had faced under contributory

negligence. In return for allowing a negligent plaintiff to recover, this court said fairness requires that a plaintiff's damages be "reduced by the percentage of fault attributable to him." (Emphasis added.) [C] Were we to eliminate joint and several liability as the defendant advocates, the burden of the insolvent or immune defendant would fall on the plaintiff; in that circumstance, plaintiff's damages would be reduced beyond the percentage of fault attributable to him. We do not believe the doctrine of comparative negligence requires this further reduction. Nor do we believe this burden is the price plaintiffs must pay for being relieved of the contributory negligence bar. The quid pro quo is the reduction of plaintiffs damages. What was said in American Motorcycle Association v. Superior Court (1978), 20 Cal.3d 578, 590, 578 P.2d 899, 906, 146 Cal.Rptr. 182, 189, is applicable here: "[F]airness dictates that the 'wronged party should not be deprived of his right to redress,' ****[t]he wrongdoers should be left to work out between themselves any apportionment.'"***

Now, under Alvis, damages are allocated according to fault. As such, defendant argues, Alvis mandates that a tortfeasor should be liable only to the extent that his negligent acts or omissions produced the damages.

421

We find nothing in Alvis which mandates either a shift in who shall bear the risk of the insolvent defendant or the elimination of joint and several liability. Defendant has not cited nor have we found persuasive judicial authority for the proposition that comparative negligence compels the abolition of joint and several liability. On the contrary, most jurisdictions which have adopted comparative

negligence have retained the doctrine. Therefore, we hold that our adoption of comparative negligence in Alvis does not change the longstanding doctrine of joint and several liability. ***

Therefore, in response to the questions posed, we conclude that (1) comparative fault is applicable to strict products liability actions; (2) comparative fault does not eliminate joint and several liability; and (3) retention of joint and several liability does not deny defendants equal protection of the laws. ***

Affirmed and remanded, with directions.

Bartlett v. New Mexico Welding Supply, Inc.

Court of Appeals of New Mexico, 1982.

98 N.M. 152, 646 P.2d 579, cert, denied, 98 N.M. 336, 648 P.2d 794.

WOOD, Judge. ***The automobile accident involved three vehicles. The car in front of plaintiffs' car signaled a right hand turn. This lead car turned into and then pulled out of a service station in a very fast motion. Plaintiff Jane Bartlett slammed on her brakes to avoid hitting the lead car. Defendant's truck was behind plaintiffs' car. Defendant's driver applied his brakes; however, the truck skidded into the rear of plaintiffs' car.

The driver of the lead car is unknown. Plaintiffs sued defendant on a theory of negligence. Defendant contended that the negligence of the unknown driver "caused or contributed to cause" the accident and resulting damages. ***

The jury answered "special questions." It determined that plaintiffs' damages were $100,000.00, that plaintiffs were not negligent, that defendant was negligent, that defendant's negligence contributed to the accident and plaintiffs' damages to the extent of 30%, that the unknown driver was negligent and this negligence contributed to the accident and plaintiffs' damages to the extent of 70%.

Plaintiffs moved that judgment be entered in their favor in the amount of $100,000.00. This motion was not granted. Instead, the trial court ordered a new trial [based on the jury instructions concerning comparative negligence], ***

We granted defendant's application for an interlocutory appeal.

In this case, in using the term "joint and several liability," we mean that either of two persons whose concurrent negligence contributed to

422

cause plaintiffs' injury and damage may be held liable for the entire amount of the damage caused by them.

It is not disputed that this is a common law rule which existed in New Mexico prior to Scott v. Rizzo, 96 N.M. 682, 634 P.2d 1234 (1981), which adopted the opinion of the Court of Appeals in Claymore v. City of Albuquerque. In Claymore, this Court adopted pure comparative negligence. ***

The question is whether, in a comparative negligence case, a concurrent tortfeasor is liable for the entire damage caused by concurrent tortfeasors. ***The premise for the question to be answered is that, under the common law rule, either the defendant or

the unknown driver could be held liable for the damage caused by their combined negligence.

The question has been answered in several states; most of these decisions are not helpful because the answer depended upon the contents of a comparative negligence statute. [The court discusses rulings in a number of states.]

The foregoing discussion shows that joint and several liability, for concurrent tortfeasors, has been retained by judicial decision in [some other] pure comparative negligence states. We recognize that this retention accords with 2 Restatement (Second) of Torts § 433A (1965). See, comment h to § 433A. Retention also accords with the Uniform Comparative Fault Act, § 2.

The retention of joint and several liability ultimately rests on two grounds; neither ground is defensible.

The first ground is the concept that a plaintiffs injury is "indivisible." The California Supreme Court, in American Motorcycle Ass'n [v. Superior Court, 20 Cal.3d 578, 146 Cal.Rptr. 182, 578 P.2d 899 (1978)] supra, followed this ground when it stated: "[T]he simple feasibility of apportioning fault on a comparative negligence basis does not render an indivisible injury 'divisible' for purposes of the joint and several liability. ***In other words, the mere fact that it may be possible to assign some percentage figure to the relative culpability of one negligent defendant as compared to another does not in any way suggest that each defendant's negligence is not a proximate cause of the entire indivisible injury."

Thus, under the California Supreme Court decision, a concurrent tortfeasor, 1% at fault, is liable for 100% of the damage caused by

concurrent tortfeasors, on the basis that the tortfeasor, 1% at fault, caused the entire damage. A practical answer, in this case, is that the jury found that defendant was 30% at fault and caused 30% of the damage.

Prosser, Law of Torts, 4th Edition, § 41, p. 241, states: "The law of joint tortfeasors rests very largely upon recognition of the fact that each of two or more causes may be charged with a single result."

423

Prosser, "Joint Torts and Several Liability," 25 Cal. L. Rev. 413 (1936-37), states that the rule holding a concurrent tortfeasor for the entire loss "grew out of the common law concept of the unity of the cause of action; the jury could not be permitted to apportion the damages, since there was but one wrong." The "unity" concept, in turn was based on common law rules of pleading and joinder. ***

Joint and several liability is not to be retained in our pure comparative negligence system on a theory of one indivisible wrong. The concept of one indivisible wrong, based on common law technicalities, is obsolete, and is not to be applied in comparative negligence cases in New Mexico. [C]

The second ground is that joint and several liability must be retained in order to favor plaintiffs; a plaintiff should not bear the risk of being unable to collect his judgment. We fail to understand the argument. Between one plaintiff and one defendant, the plaintiff bears the risk of the defendant being insolvent; on what basis does the risk shift if there are two defendants, and one is insolvent? In our case, the risk factor arises because the concurrent tortfeasor, 70% at fault, is unknown. ***

Joint and several liability is not to be retained in our pure comparative negligence system on the basis that a plaintiff must be favored.

We hold that defendant is not liable for the entire damage caused by defendant and the unknown driver. Defendant, as a concurrent tortfeasor, is not liable on a theory of joint and several liability. ***

The trial court properly instructed the jury to consider the negligence and damage resulting from the negligence of the unknown driver.

The order granting a new trial is reversed. The cause is remanded with instructions to enter judgment in favor of plaintiffs, against defendant, for the 30% of plaintiffs' damages caused by defendant.

NOTES AND QUESTIONS

1. In these two cases, the negligent conduct of more than one actor combined to produce a particular injury to the plaintiff. The negligence of each of them is found to be a proximate cause of that injury. The injury has therefore been treated as indivisible and this has commonly been regarded as the third situation in which the principle of joint and several liability should be applied. But this doctrine of joint and several liability, as the opinions in the principal cases note, originally was based upon two other major tort principles that have been changing. One principle involves contributory negligence, which at common law barred plaintiffs recovery but has been changed in all but a few states so that it now has the effect of diminishing the amount of plaintiffs recovery (details in Chapter 12, Section 1). A second principle involves contribution among joint tortfeasors, which was not allowed at early common law but then was permitted, usually by

statute, in almost all states. A joint tortfeasor paying more than his share of the plaintiffs damages may recover from the other joint tortfeasors on either a per capita basis or a comparative-fault basis (this chapter, Section 3). The argument being posed to courts in states that have adopted comparative negligence is that the doctrine of joint and several liability, which was premised on these two principles, also should change. See, e.g., McIntyre v. Balentine, 833 S.W.2d 52, 58 (Tenn. 1992) (adopting comparative negligence and abolishing joint and several liability), page 666. See also Restatement (Third) of Torts: Apportionment of Liability § 20 (2000) for an extensive discussion of the various ways in which the states have resolved these questions.

2. Defendants in states that adopted comparative negligence urged that the concept of comparative negligence should be applied to compare the negligence of the defendants to each other as well as to compare the negligence of the defendants to the plaintiff and that each defendant be responsible for only that part of the injury that the percentage of fault apportioned to him bears to the total negligence of all tortfeasors. Otherwise, it is claimed, he will not be treated fairly. If each tortfeasor is identifiable (unlike the driver of the "lead" car in the Bartlett case), not protected by immunity (unlike the employer in the Coney case), subject to the jurisdiction of the court, and solvent, this form of liability will produce the same result as the traditional system of joint and several liability, aided by contribution among joint tortfeasors based on percentage fault, would produce. Contribution is unnecessary if there is no joint and several liability.

3. The principal difference between the two systems arises when the shares of one or more tortfeasors cannot be collected from them. Under joint and several liability, the plaintiff can collect from one (or more) of the tortfeasors and leave it up to that defendant either to obtain contribution from the others or to bear the loss alone. Under several liability, each tortfeasor pays no more than its apportioned share, and the injured party bears the loss of any uncollectible share. Which is the fairer method? Some courts have found that the public policy reasons for requiring tortfeasors rather than injured persons to bear the burden of uncollectible portions of the damages continue to control even with the adoption of comparative negligence. See, e.g., American Motorcycle Assn. v. Superior Crt., 20 Cal.3d 578, 578 P.2d 899, 146 Cal.Rptr. 182 (1978) (quoted in both principal cases); Kaeo v. Davis, 68 Haw. 447, 719 P.2d 387 (1986).

4. Some states, adopting a provision of the 1977 Uniform Comparative Fault Act also included in the 2002 Uniform Apportionment of Tort Responsibility Act, have attempted to ameliorate the effect of an insolvent defendant by providing for a reallocation of the share of the insolvent defendant among the other parties (including the plaintiff, if he is at fault) according to their respective percentages of fault. V. Schwartz, Comparative Negligence § 19.04 (5th ed. 2010) (listing states).

5. How should a nonparty actor be treated? Note that in the Bartlett case, the 70% tortfeasor was a "hit and run" driver, and therefore not a party to the action. Is it appropriate to determine the percentage attributable to a nonparty? See Krzykalski v. Tindall, 232 N.J. 525, 181 A.3d 981 (under New

Jersey statute, jury properly allocated 97% of fault to unidentified driver and 3% of fault to defendant) and V. Schwartz, Comparative Negligence § 15.05 (5th ed. 2010) (discussing ways states have treated absent tortfeasors).

Do you see why such a determination might affect the nonparty even though there is no judgment against it? One court has found that assigning a share of comparative responsibility to a nonparty violates the due process rights of the nonparty. Plumb v. Fourth Judicial District Court, 279 Mont. 363, 927 P.2d 1011 (1996) (in slip and fall case against shopping center, shopping center sought to reduce its liability by proving nonparty physician's malpractice in treating plaintiff--damage to physician's reputation) and another has found it unconstitutional because the State constitution grants to the judiciary rather than the legislature the power over the court's rules of pleadings, practice, and procedure. Johnson v. Rockwell Automation, Inc., 2009 Ark. 241, 308 S.W.3d 135 (2009) (answering certified question from federal court).

If the unidentified tortfeasor should later be found and sued, would the determination of fault in the prior case be binding? Would the plaintiff or any of the tortfeasors be able to use collateral estoppel to prevent relitigation of the allocation of fault?

6. What if the nonparty is identified but immune from suit by the plaintiff or judgment proof? Should that be treated differently from nonparties who were not joined for other reasons? Worker is injured when he reaches into a cotton baler to clear some loose cotton away from a protective switch. The opening through which he reached

should have been covered by a plate that had been bolted on by the manufacturer of the baler. Worker sues manufacturer. The manufacturer argues that the employer, who permitted the protective plate to be removed in violation of manufacturer's instructions, is at least partially at fault for the injury. Should the jury be permitted to allocate a percentage of fault to the employer, immune from a suit by the worker through the exclusive remedy provision of the state worker compensation law? Compare Snyder v. LTG Lufttechnische GmbH, 955 S.W.2d 252 (Tenn. 1997) (jury may consider actions of employer in deciding whether manufacturer is liable, but may not assess fault against the employer) with Mack Trucks, Inc. v. Tackett, 841 So.2d 1107 (Miss. 2003) (under comparative negligence statute, jury should allocate fault to employer even though employer immune from suit by plaintiff) and Zaldivar v. Prickett, 297 Ga. 589, 774 S.E.2d 688 (2015) (accord). Whether the immune tortfeasor is allocated a percentage of fault may depend on the type of immunity. Carroll v. Whitney, 29 S.W.3d 14 (Tenn. 2000) (resident physicians in medical malpractice case who were immune because they were employees of the state could have fault allocated to them even though an employer immune through worker compensation statute could not). Smelser v. Paul, 188 Wash.2d 648, 398 P.3d 1086 (2017) (because it is not a tort to be a bad parent, driver must pay full amount of damages even though driver argued that parent's inadequate supervision contributed to toddler's injuries that occurred when driver struck him as he played unsupervised in his father's driveway). Whether a bankrupt nonparty can be allocated a share of the liability varies by jurisdiction. Roverano v.

John Crane, Inc., A.3d, 2020 WL 808186 (Pa. 2020) (interpreting statute to require that verdict sheet include bankrupt nonparties who were joined by original defendants).

7. What if the nonparty is an intentional tortfeasor and the party was negligent in failing to protect the plaintiff? Should the intentional conduct be compared to the negligent conduct? Brandon v. County of Richardson, 261 Neb. 636, 624 N.W.2d 604 (2001) (in case where county sheriff's department negligently failed to protect rape victim, after rape was reported to them, from being killed by rapists, intentional conduct of killers could not be compared to negligent conduct of county); Hutcherson v. City of Phoenix, 192 Ariz. 51, 961 P.2d 449 (1998) (in case where 911 operator's negligence in categorizing call caused shooting death of two people being attacked by former boyfriend of one of them, jury found that City was 75% at fault and killer was 25% at fault); Welch v. Southland Corp., 134 Wash.2d 629, 952 P.2d 162 (1998) (in case brought by patron who was shot by thief at 7--11 convenience store, statute did not permit jury to compare negligent conduct of owner of 7-11 to intentional conduct of thief); Ozaki v. Association of Apartment Owners of Discovery Bay, 87 Haw. 273, 954 P.2d 652 (App.), rev'd on other grounds, 87 Haw. 265, 954 P.2d 644 (1998) (in case where woman was murdered in her apartment by her paramour, negligent conduct of condominium complex security could be compared to intentional conduct of murderer, but condominium association would be subject to joint and several liability for murderer's share). See also Restatement (Third) of Torts: Apportionment of Liability § 24 (2000) for an extensive discussion of the cluster of issues arising in cases involving negligent failure to protect against intentional conduct.

8. During the last two decades, the traditional common law doctrine of joint and several liability for all joint tortfeasors has been changed in some way in most jurisdictions (including the jurisdictions of the principal cases) by either legislative enactments as part of "tort reform" movements or by judicial decisions. About a dozen jurisdictions have abolished joint and several liability. See, e.g., Alaska, Florida, and Wyoming. Just under ten have retained traditional joint and several liability. See, e.g., Maryland, Massachusetts, and Rhode Island. Others have modified it in various ways so, for example, that it does not apply 1) to noneconomic damages like pain and suffering or emotional distress (see, e.g., California); or 2) to defendants whose percentage of fault is below a certain threshold (see e.g., Iowa and Texas); or 3) to certain types of defendants (see e.g., New Mexico for product sellers); or 4) to certain types of actions (see, e.g., Idaho, which still applies joint and several liability only to cases involving vicariously liable defendants and defendants who act in concert and Connecticut, which applies it to strict liability claims). There are many other variations and some of the jurisdictions combine more than one element of change.

Note that we begin with the common law because any statutory change is interpreted with it as the background law. See, for example, Biesele v. Mattena, 449 P.3d 1 (Utah 2019) (apportionment is mandatory under several liability statute only if requested by parties; if no such request made, trial judge's entry of judgments of joint and several liability was appropriate

under common law) and Roverano v. John Crane, Inc., A3d, 2020 WL

808186 (Pa. 2020) (statute limiting joint and several liability does not specifically preempt Pennsylvania common law favoring per capita apportionment and therefore it should be used rather than percentage apportionment in asbestos cases).

Restatement (Third) of Torts: Apportionment of Liability § 27 (2000) takes no position as to whether joint and several liability, several liability, or some combination thereof should govern the liability of tortfeasors whose independent acts cause an indivisible injury. Instead, it leaves that to be determined by local law and then proposes several alternative tracks for addressing related issues, depending on the resolution of the basic question.

Most jurisdictions that have in some way modified joint and several liability for those acting independently to cause an indivisible harm will still apply it to those acting in concert or who are vicariously liable for each other. See, for example, Minn. Stat. Ann. § 604.02(2) (persons who act in a common scheme or plan that results in injury); Reilly v. Anderson, 727 N.W.2d 102 (Iowa 2006) (finding that Iowa legislature did not intend to eliminate joint and several liability for those who acted in concert in action against driver and passenger where passenger was steering while driver took hit from a bong--concerted action does not have to be in context of an intentional tort to give rise to joint and several liability); and McCrosky v. Carson Tahoe Regional Medical Center, 133 Nev. 930, 408 P.3d 149 (2017) (statute abrogating joint and several liability did not preclude patient

from seeking to hold hospital vicariously liable for physician's alleged negligence).

9. Those who are vicariously liable (employer for employee, hospital for doctor, owner for driver, seller for manufacturer) are treated as one unit for purposes of allocation of fault. Bylsma v. R.C. Willey, 416 P.3d 595 (Utah 2017) (strictly liable defendants in chain of distribution who all breached the same duty--a duty not to sell the same dangerously defective product--should be treated as a single unit for purposes of fault allocation) and Virgin v. Fireworks of Tilton, LLC, 215 A.3d 892 (N.H. 2019) (distributor of fireworks cannot seek to have portion of damages allocated to upstream manufacturer for whose product it was responsible in strict liability as a seller in the chain of distribution).

10. Would it be desirable to have the judge explain to the jury the consequences of their decision in setting the percentage of fault? See Kaeo v. Davis, 68 Haw. 447, 719 P.2d 387 (1986). (city wanted jury told that it would have to pay the whole verdict even if only 1% of fault was allocated to it by jury because co-defendant driver who had run into utility pole, injuring plaintiff passenger, was insolvent).

11. See generally Restatement (Third) of Torts: Apportionment of Liability (2000).

2. Satisfaction and Release

Bundt v. Embro

Supreme Court of New York, Queens County, 1965.

48 Mise.2d 802, 265 N.Y.S.2d 872.

[Action by five plaintiffs, who were passengers in one or the other of two automobiles that collided. The actions were against the owners and drivers, as well as a contractor who was repairing the highway and who had negligently obstructed the view of a stop sign. Defendants moved to amend their answers to interpose the defense of discharge and satisfaction when plaintiffs recovered a judgment for the same injuries against the State of New York in the Court of Claims and this judgment had been satisfied.]

WILLIAM B. Groat, Justice. ***"[I]t is elementary law that one who has been injured by the joint wrong of several parties may recover his damages against either or all; but, although there may be several suits and recoveries, there can be but one satisfaction. [Cc] The reason of the rule is that while there may be many perpetrators of a wrongful act, each of whom is separately liable, yet the act and its consequences are indivisible, and the injured person is, therefore, limited to a single satisfaction." [C] ***

Nor does this court agree with plaintiffs' argument that the rule that the satisfaction of the judgment against one joint tort feasor discharges the others has no application to a Court of Claims judgment. Section 8 of the Court of Claims Act states:

"The state hereby waives its immunity from liability and action and hereby assumes liability and consents to have the same determined in accordance with the same rules of law as applied to actions in the supreme court against individuals or corporations, provided the claimant complies with the limitations of this article."

"By the adoption of such section the State places itself as to those making claims against the State, in the same position as a private individual or a corporation would be for his or its negligence." [C]

The Court of Claims determined that the state was negligent and the plaintiffs were awarded judgments for the injuries sustained. If defendants are joint tort feasors with the state, the fact that the judgment satisfied is a Court of Claims judgment should not prevent application of a rule which prevents double recovery for a single injury.

The state may also be a joint tortfeasor [c]. While the sovereign has always been immune from suit at common law, "'[w]hen, however, the state confers upon a court jurisdiction to hear and determine all claims against it, or all claims of a particular class, the situation in that court is the same as if the claim were against a private individual or corporation.'" [Cc]

429

Therefore, if the trial court shall determine that the defendants were in fact joint tort feasors with the state, the satisfaction of a judgment against the state would operate as a discharge of the defendants.

Accordingly, leave to amend is granted to the defendants.

NOTES AND QUESTIONS

1. The original English joinder rule, now altered by statute, was that the plaintiff could obtain but one judgment against one or more "joint tortfeasors." Only those who acted in concert or were vicariously liable for each other's actions were called "joint tortfeasors" at that time. Since the act of each was the act of all, it was considered that

there was only one cause of action against all of them, which was "merged" in the judgment, so that the judgment against one alone, even if unsatisfied, barred any later action against another. This procedural rule is now repudiated everywhere in the United States. The plaintiff may bring a series of separate actions against multiple tortfeasors liable for the same damage, and take each to judgment, as long as he only collects on one. Why would the plaintiff do that? Can you think of examples, other than the one in the principal case involving suit against a governmental entity in a designated court?

2. Suppose the plaintiff is unhappy with the amount of damages set by the first court and does not collect on that judgment? Cf. Nielson v. Spanaway General Med. Clinic, Inc., 135 Wash.2d 255, 956 P.2d 312 (1998) (plaintiff's dissatisfaction with the amount of damages may be the basis for an appeal, but it does not prevent the application of collateral estoppel in the second action, requested by the second set of defendants to estop the plaintiffs from relitigating the amount of the damages).

3. A quite distinct principle developed in England, and carried over to the United States, that the plaintiff was entitled to only one compensation, and that full satisfaction of his claim, by full payment, would prevent its further enforcement. This rule is equitable in its nature, and its purpose is to prevent unjust enrichment. It is this principle that is being applied in the principal case.

4. A necessary corollary to the rule that there be only one full satisfaction of a claim through satisfaction of the judgment was that any partial satisfaction of the claim must be credited to the other parties who are also liable. All states provide for some type of credit

against the judgment for partial satisfaction of the judgment by a joint tortfeasor. The judgment is either reduced dollar for dollar by the amount of any partial satisfaction, often referred to as a pro tanto reduction, or reduced on a percentage basis. See, e.g., Va. Code Ann. § 8.01-35.1 ("reduced by any amount stipulated by the covenant or the release, or in the amount of the consideration paid for it, whichever is the greater"); Jones v. Ahlberg, 489 N.W.2d 576 (N.D.1992) (non-settling defendant receives credit for percentage of fault that the settling defendant represents). Restatement (Third) of Torts: Apportionment of Liability § 26 (2000), recognizing that each possibility has its advantages and disadvantages, recommends a percentage credit based on comparative responsibility.

430

Think about how each scheme would influence the parties' settlement negotiations under different factual scenarios.

5. What if the settling defendant has not paid the settlement amount by the time of the entry of judgment against the nonsettling defendant? Garcia v. Duro Dyne Corp., 156 Cal.App.4th 92, 67 Cal.Rptr.3d 100 (2007) (no credit given for amount specified in release since it had not been paid due to settling defendant's pending bankruptcy; court noted that nonsettling defendant would be entitled to reimbursement from plaintiff if settling defendant ever paid).

6. What if the claim is reduced to a judgment against one tortfeasor (like the principal case), but the amount of the damages is agreed by the parties rather than adjudicated by the court (unlike the principal case)? Plaintiff, a teenage minor, was riding in the front seat of a

truck when the door flew open while the driver was turning a corner. Plaintiff fell out and was injured. His mother filed suit against the driver of the truck and obtained a consent judgment against him in the amount of the driver's (relatively low) automobile liability policy coverage limit and that judgment was paid. Later, plaintiff sued Chrysler, the manufacturer of the truck, alleging that the truck door flew open due to defective design or manufacture. Chrysler sought summary judgment, arguing that the previous (consent) judgment, which had been satisfied, operated to discharge Chrysler. Plaintiff argued that the prior judgment was not a full compensation for his injuries even if it was a full satisfaction of the consent judgment. Abandoning previous decisions that had treated all judgments the same, whether they were the result of consent or adjudication, Oklahoma concluded that satisfaction of a consent judgment should be treated like a settlement and release (partial satisfaction) and not like a judgment (full satisfaction). Kirkpatrick v. Chrysler Corp., 920 P.2d 122 (Okla.1996). If New York had made such a ruling, would it change the result in the principal case?

7. What if the jury's allocation of fault does not match the amount of the settlement? Kiss v. Jacob, 138 N.J. 278, 650 A.2d 336 (1994) (if plaintiff makes a particularly good bargain in settlement and the ultimate percentage of negligence attributed to the settling defendant is less than the amount of the settlement, plaintiff will benefit by the excess amount, just as plaintiff runs the risk of a low settlement). After automobile accident caused by teen driver, wrongful death and survival claims were brought against the teen driver (for negligently pulling out in front of plaintiff's decedent) and against manufacturer of the plaintiff's decedent's automobile (for negligent design of door-

latch system that came open during crash). After settlement with driver, plaintiff dropped to the survival claim and went to the jury against the manufacturer based solely on the wrongful death claim. Court rejected the manufacturer's attempt to reallocate the settlement proceeds to obtain an offset more to its advantage. Riley v. Ford Motor Co., 414 S.C. 185, 777 S.E.2d 824 (2015) (settlements are not designed to benefit nonsettling parties).

8. Suppose the trial occurs in a jurisdiction that reduces the amount of the plaintiffs recovery by the percentage of the plaintiffs comparative negligence.

431

(See Chapter 12, Defenses.) Does the trial court judge first subtract the amount of the settlement and then reduce it by the percentage of plaintiffs fault or vice versa? Whalen v. Kawasaki Motors Corp., 680 N.Y.S.2d 435, 92 N.Y.2d 288, 703 N.E.2d 246 (1998) (subtracting amount of settlement from judgment and then reducing it by percentage of fault attributed by jury to plaintiff, noting that New York's adoption of the settlement-first method is in accord with prevailing trend).

Suppose the trial occurs in a jurisdiction that places a cap on the amount of the damages. (See Chapter 10, Damages.) Does the trial court judge first reduce the jury verdict to the cap and then credit the amount of a settlement or vice versa? Compare Fairfax Hosp. Sys., Inc. v. Nevitt, 249 Va. 591, 457 S.E.2d 10 (1995) (reducing to amount of cap and then subtracting amount of settlement) with Teeter v. Missouri Hwy. and Transp. Com'n, 891 S.W.2d 817 (Mo. 1995) (subtracting amount of settlement first and then reducing to

amount of cap applicable to actions against state highway department).

9. Suppose the trial occurs in a jurisdiction that has eliminated joint and several liability. Would the nonsettling defendant still be entitled to a setoff? McReynolds v. Krebs, 290 Ga. 850, 725 S.E.2d 584 (2012) (setoff not applicable because settling and nonsettling defendants are no longer jointly and severally liable under 2005 statute eliminating joint and several liability) and Duncan v. Cessna Aircraft Co., 665 S.W.2d 414 (Tex. 1984) (settlement does not reflect the amount of harm caused by the remaining defendants and likewise should not affect their liability). Suppose the trial occurs in a jurisdiction that has limited joint and several liability to economic damages only. The nonsettling defendant would be entitled to a setoff for the economic damages. How would the settlement be allocated between economic and non-economic losses? Wells v. Tallahassee Memorial Regional Medical Ctr., Inc., 659 So.2d 249 (Fla. 1995) (nonsettling defendant entitled to setoff for economic damages only, with settlement proceeds to be divided between economic and noneconomic damages in the same proportion as the jury's award.)

What if the settling defendant is found by the jury not to be liable? Gouty v. Schnepel, 795 So.2d 959 (Fla. 2001) (no setoff because setoff statute presumes joint liability).

10. Payments made by the tortfeasor's liability insurance company are of course made on the tortfeasor's behalf and therefore credited against the judgment. At common law, payments that were not made by, or on behalf of, the tortfeasor are not credited to the benefit of the

tortfeasors, even though this means plaintiff may receive more in compensation than he suffered in losses. If, for example, a plaintiff's medical treatment is provided for free by plaintiff's spouse or paid for by some source collateral to the defendant, such as a relative, employer, or health insurance company, the defendant should not "be permitted to profit by any gratuity extended to his victim, and consequently, the reasonable value of said services should be recoverable." Burke v. Byrd, 188 F.Supp. 384 (N.D.Fla. 1960) (plaintiff entitled to reasonable value of medical treatment provided free to him as member of military). This--the so-called collateral-source rule--applies to insurance policies maintained by the injured party, to gratuities to him, to employment

benefits, and to benefits from social legislation. Approximately half of the states have modified the common law collateral source rule by statute, usually as part of "tort reform" statutes. See Chapter 10, Damages.

Cox v. Pearl Investment Co.

Supreme Court of Colorado, 1969.

168 Colo. 67. 450 P.2d 60.

HODGES, JUSTICE. This is a negligence case which terminated in the trial court with a summary judgment in favor of the defendant on a showing that a purported release had been executed by the plaintiffs in favor of a joint tort-feasor. The common law rule of law that the release of one tortfeasor releases all others who may have liability was applied by the trial court.

As plaintiffs in the trial court, Mr. and Mrs. Cox sought recovery of damages for injuries which Mrs. Cox sustained when she fell on property owned by the defendant Pearl Investment Company. ***When the summary judgment motion was considered by the trial court, it was shown that the tenant, Goodwill Industries, had previously paid the plaintiffs $2500 in consideration of the plaintiffs' execution of a document entitled "Covenant Not to Proceed with Suit." ***

[The plaintiffs' assignment of error brings into focus an important issue concerning the legal effect to be given to the "Covenant Not to Proceed with Suit" involved here.] The trial court denominated it a release and, without ascribing any dignity to the expressed words that the plaintiffs reserved "the right to sue any other person or persons against whom they may have or assert any claim on account of damages arising out of the above described accident," ruled that it therefore barred any action against the defendant as a joint tort-feasor.

Although Price v. Baker, 143 Colo. 264, 352 P.2d 90 supports the trial court, we no longer deem it advisable to further impose on our body of law the harshness and rigidity of the rule and rationale of Price. ***In our present analysis of this issue, we are drawn toward only one conclusion. We can no longer countenance the continuation of a rule of law which is not only harsh and illogical, but which gives refuge and absolution to wrongdoers by depriving a litigant under these circumstances of probable just and full compensation for his injuries caused by wrongdoers. It is not possible to visualize any reasonable or compelling justification for persisting in the application

of this harsh and unrealistic rule except on the basis of ancient formalisms, the reasons for which no longer prevail. ***

In Price, we declared "this state has long followed the universal rule that the release of one joint tort-feasor is a release of all." We hereby confirm this to be still the rule in Colorado. Also, we agree with the proposition that a joint tort-feasor is not ipso facto released by a covenant not to sue. We do, however, now state that the instrument involved in

433

Price v. Baker, which is substantially identical to the writing involved in the case at bar, was improvidently interpreted to be an absolute and full release of all joint tort-feasors.

The manifest intent of the parties to a contract should always be given effect unless it be in violation of law or public policy. This is fundamental in contract law. Where a contract has the effect of releasing one joint tort-feasor but expressly reserves the right to sue others who may be liable, it should not in law be treated otherwise. The expressed reservation in this instrument of the right to sue other joint tort-feasors evinces a clear-cut manifestation that the plaintiffs were not receiving full compensation; and if this is borne out, their right to bring an action against others who were the cause of their damages should not be foreclosed. The danger of over compensation or double compensation is no excuse for barring a claim against joint tort-feasors. Obviously, no court would permit the accomplishment of this possible contingency. And certainly, the non-settling joint tort-feasor is not prejudiced, but rather, he is benefited

for he would be entitled to have the amount of the judgment reduced by the amount paid by his co-tortfeasor. ***

In the supplemental brief of the defendant, it is urged that Price, supra, establishes the rule in Colorado that the document involved there which is essentially identical to the instrument here is an absolute release of all joint tort-feasors and therefore, should not now be repudiated under the doctrine of stare decisis. This doctrine is assiduously followed by this court. However, when, as here, a prior decision is adverse to the rules of fundamental law and initiates a harsh and unrealistic rule, we believe it becomes incumbent upon us at the first opportunity presented to make a necessary change.

Accordingly, the judgment is reversed and the cause remanded to the trial court for further proceedings not inconsistent with the views expressed herein.

NOTES AND QUESTIONS

1. Distinguish between judgment and satisfaction of the judgment. Plaintiffs may proceed to judgment against as many tortfeasors as they wish, although some issues may be affected by collateral estoppel. Satisfaction is receiving full compensation for the injury, based either on the plaintiffs valuation of the case (settlement) or the jury's (verdict). A plaintiff's claim is satisfied when the judgment is actually paid after the trial or when a settlement reflecting the full amount of plaintiffs claim is actually paid. A plaintiff may receive only one satisfaction for an injury.

2. Distinguish between satisfaction and release. Satisfaction is acceptance of full compensation for the injury. A release is a surrender of the plaintiffs claim, which may be for only partial

compensation or for no compensation at all. Releases in the early common law were under seal, which disposed of the question of consideration, and thus could be given for no compensation.

434

3. Distinguish between a release and a covenant not to sue. The theory of the covenant is that plaintiff does not surrender the cause of action, but promises not to sue on it. The right is retained, but there is agreement not to enforce it. The protection to the defendant is that if the plaintiff sues, defendant will have a counterclaim for breach of the covenant, in which the damages will equal any recovery by the plaintiff plus the expenses of defending the suit. It is generally recognized by the courts that the covenant is a mere procedural device, invented by the ingenuity of counsel to get around the traditional effect of a release at common law.

4. In early common law the only "joint tortfeasors" were those who acted in concert. Because the act of one was the act of all, a release to one of them was held to release the others, since there was but one cause of action, which was surrendered. Confusion as to the meaning of "joint tortfeasors" carried this rule over in the early American decisions to those who acted independently but could be joined in the same lawsuit because they were liable for the same damages. In addition, perhaps because of abolition of the seal, release sometimes was confused with satisfaction. See Abb v. Northern Pacific R. Co., 28 Wash. 428, 68 P. 954 (1902) (a release, even with express reservation of rights against other tortfeasors, is "conclusive evidence of satisfaction"). The result was, almost everywhere, an original American rule that a release of one

tortfeasor releases all who are liable for the same damages, regardless of compensation paid or reservation of rights.

5. That original rule to the effect that the release of one joint tortfeasor releases all has been extensively changed, by decision or by statute.

A. Some states distinguish between a release and a covenant not to sue, and hold that the release necessarily releases other tortfeasors, but the covenant does not unless full compensation has been paid.

B. Some states hold that a release with express reservation of rights against other tortfeasors is to be treated as a covenant not to sue, regardless of words of release.

C. Some states hold that even a release without such a reservation does not release other tortfeasors unless it shows an intention to do so or full compensation has been paid. Leung v. Verdugo Hills Hosp., 55 Cal.4th 291, 145 Cal.Rptr.3d 553, 282 P.3d 1250 (2012).

D. Statutes in some states have provided that a release with an express reservation of rights against other tortfeasors does not release them. For example, the Uniform Joint Obligations Act, § 4. Or that they are released only when the terms so provide. Uniform Contribution Among Tortfeasors Act, § 4(a). A release usually is a separate document, but does not need to be. Bank drafts (checks) from insurance companies frequently have a general release printed on them. See Cupidon v. Alexis, 335 Md. 230, 643 A.2d 385 (1994) (language on face of check constitutes release if plaintiff cashes check).

6. Vicariously Liable Tortfeasors. In some jurisdictions, a release of the negligent agent (like the driver in an automobile accident or the doctor in a medical malpractice action) also releases the principal who is vicariously

liable for the agent's conduct (like the employer of the driver or the doctor). Compare Booth v. Gades, 788 N.W.2d 701 (Minn. 2010) (release of firefighter also discharges City, his employer); Christiana Care Health Svcs. Inc. v. Carter, 223 A.3d 428 (Del. 2019) (release of claims against surgeon operated to extinguish patient's vicarious liability claim against hospital); and J&J Timber Co. v. Broome, 932 So.2d 1 (Miss. 2006) (release of driver also releases his employer, even though express reservation of rights against employer) with JFK Medical Ctr. v. Price, 647 So.2d 833 (Fla. 1994) (release of doctor does not release hospital employer); McCrosky v. Carson Tahoe Regional Med. Ctr., 133 Nev. 930, 408 P.3d 149 (2017) (settlement with doctor does not extinguish hospital's liability, which was based on apparent agency); and Woodrum v. Johnson, 210 W.Va. 762, 559 S.E.2d 908 (2001) (collecting cases and noting broad and diverse disagreement, finding no release).

7. Successive Tortfeasors. Driver negligently runs into the plaintiff and breaks his leg. Physician negligently treats the break, with the result that the leg is permanently shorter. Suppose that plaintiff accepts a payment from driver for the original injury and releases him, expecting to hold physician liable for the aggravation. When he sues physician, physician relies on the common law rule as to the effect of the release of a joint tortfeasor. Assuming that driver's

liability extends to the total injury (see page 418), some cases have held that physician was released by the release of driver. Thompson v. Fox, 326 Pa. 209, 192 A. 107 (1937); Gores v. Miller, 875 N.W.2d 34 (S.D. 2016) (release was plain and unambiguous); and Gallagher v. Mercy Med. Ctr., 463 Md. 615, 207 A.3d 634 (2019) (because plaintiff signed a release when she settled with driver who caused accident, the "one satisfaction rule" barred claim against medical center where medical malpractice occurred). Others, however, have declined to apply the rule to release successive tortfeasors. Lujan v. Healthsouth Rehabilitation Corp., 120 N.M. 422, 902 P.2d 1025 (1995); Fieser v. St. Francis Hosp. & School of Nursing, 212 Kan. 35, 510 P.2d 145 (1973).

8. Suppose there is only one tortfeasor. A release is signed on the basis of assumed injuries. It turns out that the injuries are actually much more extensive. What can the injured party do? Ordinarily he must seek to get the release set aside on the ground of fraud, mistake, duress, or undue influence. Most courts will not permit plaintiff to avoid the terms of the release if the mistake is about the extent of the injury or its consequences. Mack v. Albee Press, 263 A.D. 275, 32 N.Y.S.2d 231 (1942), aff'd without opinion, 288 N.Y. 623, 42 N.E.2d 617 (1942) (plaintiff settled claim for bruised toe, only later to develop gangrene and suffer the amputation of his leg). A few courts have set aside releases where the plaintiff believed she had no personal injury (having settled her property damage claim), when in fact her injuries were serious. Williams v. Glash, 789 S.W.2d 261 (Tex. 1990). This issue is discussed in more detail in other courses, such as Restitution or Remedies.

9. Some courts will still enforce a general release ("any and all other persons who are or may be liable for injuries arising out of said accident") even in favor of joint tortfeasors who did not participate in the settlement that generated the release. Enos v. Key Pharmaceuticals, Inc., 106 F.3d 838

436

(8th Cir. 1997) (applying South Dakota law) (general release executed as part of settlement with physicians in medical malpractice case by parents of minor who suffered brain damage while taking asthma medication operated to release drug manufacturers in later suit based on product liability and fraud). But see Russ v. General Motors Corp., lll Nev. 1431, 906 P.2d 718 (1995) (general release executed as part of settlement with driver in negligence case operates to release car manufacturer in later suit based on product liability against automobile manufacturer only if parties to release intended such a result) and Hess v. Ford Motor Co., 117 Cal.Rptr.2d 220, 27 Cal.4th 516, 41 P.3d 46 (2002) (similar facts, language of release ignored because based on "mutual mistake" supported by testimony of plaintiff, his attorney, and the claims adjustor who had negotiated the settlement for the other driver).

10. Should an attorney be liable (in professional malpractice) for failing to advise a client that a general release forecloses lawsuits against other tortfeasors? Collas v. Garnick, 425 Pa.Super. 8, 624 A.2d 117 (1993) (alleging client lost opportunity to sue tortfeasor because attorney failed to advise her of the effect of signing a general release as part of a settlement; malpractice action allowed).

Elbaor v. Smith

Supreme Court of Texas, 1992.

845 S.W.2d 240.

[As a result of an automobile accident, plaintiff Smith suffered serious injuries, including a compound fracture of her left ankle. Dr. Syrquin treated her in the emergency room of Dallas/Fort Worth Medical Center ("D/FW Medical Center") on the night of the accident and then eight days later she was transferred to Arlington Community Hospital ("ACH") where she was treated by Drs. Elbaor (an orthopedic surgeon), Stephens (a plastic surgeon), and Gatmaitan (an infectious disease specialist). Ms. Smith received treatment at other facilities from other specialists over the next few years and ultimately, her ankle joint was fused. She filed a medical malpractice action against Dr. Syrquin and D/FW Medical Center and against Drs. Elbaor, Stephens, and Gatmaitan and ACH. Prior to trial, Ms. Smith settled and dismissed her claims against D/FW Medical Center and non-suited her claim against Dr. Gatmaitan. She also entered into "Mary Carter" settlement agreements with Dr. Syrquin, Dr. Stephens, and ACH. Those agreements provided that those defendants would pay her a total of $425,010, remain as defendants, participate in the trial of the case, and be paid back all or part of the settlement money paid to Ms. Smith out of the recovery against the remaining defendant, Dr. Elbaor. Dr. Elbaor requested that the Mary Carter agreements be voided as against public policy or, alternatively, that the settling defendants be dismissed from the trial. The trial court denied this request, the case proceeded to trial, and the jury awarded Ms. Smith damages in the amount of

$2,253,237, allocating responsibility between Dr. Elbaor (88%) and Dr. Syrquin (12%). After

437

deducting the credits for the settlements, the trial court entered a judgment against Dr. Elbaor for $1,872,848. The court of appeals affirmed.]

Gonzalez, Judge. ***

Although the Mary Carter agreements were not entered into evidence, the trial judge was troubled by them and he took remedial measures to mitigate their harmful effects by reapportioning the peremptory challenges, changing the order of proceedings to favor Dr. Elbaor, allowing counsel to explain the agreements to the jury, and instructing the jury regarding the agreements.

During the trial, the settling defendants' attorneys, who sat at the table with Dr. Elbaor's attorneys, vigorously assisted Ms. Smith in pointing the finger of culpability at Dr. Elbaor. This created some odd conflicts of interest and some questionable representations of fact. For example, although Ms. Smith's own experts testified that [ER physician] Dr. Syrquin committed malpractice [by closing the wound too soon], her attorney stated during voir dire and in her opening statement that Dr. Syrquin's conduct was "heroic" and that [orthopedic surgeon] Dr. Elbaor's negligence caused Ms. Smith's damages. And during her closing argument, Ms. Smith's attorney urged the jury to find that Dr. Syrquin had not caused Ms. Smith's damages. This is hardly the kind of statement expected from a plaintiff's lawyer regarding a named defendant. ACH and Drs. Syrquin and Stephens had remained defendants of record, but their

attorneys asserted during voir dire that Ms. Smith's damages were "devastating," "astoundingly high," and "astronomical." Furthermore, on cross examination they elicited testimony from Ms. Smith favorable to her and requested recovery for pain and mental anguish. The settling defendants' attorneys also abandoned their pleadings on Ms. Smith's contributory negligence, argued that Ms. Smith should be awarded all of her alleged damages, and urged that Dr. Elbaor was 100 percent liable.

***

A Mary Carter agreement exists, under our definition, when the plaintiff enters into a settlement agreement with one defendant and goes to trial against the remaining defendant(s). The settling defendant, who remains a party, guarantees the plaintiff a minimum payment, which may be offset in whole or in part by an excess judgment recovered at trial. [Cc] This creates a tremendous incentive for the settling defendant to ensure that the plaintiff succeeds in obtaining a sizable recovery, and thus motivates the defendant to assist greatly in the plaintiffs presentation of the case (as occurred here). Indeed, Mary Carter agreements generally, but not always, contain a clause requiring the settling defendant to participate in the trial on the plaintiffs behalf.

***

438

Many jurisdictions have decided to tolerate the ill effects of Mary Carter agreements, presumably because they believe that the agreements promote settlement. Some have sought to mitigate the agreements' harmful skewing of the trial process by imposing

prophylactic protections. Indeed, Texas previously has taken such an approach [c] Smithwick, 724 S.W.2d at 8-12 (Spears, J., concurring). [19] These protective measures generally seek to remove the secrecy within which Mary Carter agreements traditionally have been shrouded. See Slusher v. Ospital, 777 P.2d 437, 440 (Utah 1989) (secrecy is the essence of a Mary Carter agreement).

* * *

[19] The guidelines provided in the Smithwick concurrence require that Mary Carter agreements: (1) are discoverable; (2) should be fully disclosed "to the trial court before trial or immediately after the agreement is formed;" (3) should be considered by the trial court in allowing jury strikes and ruling on witness examination; and (4) should be fully disclosed to the jury at the start of the trial. Smith wick, 724 S.W.2d at 8-11.

Justice Spears rightly noted in Smithwick the falsity of the premise upon which the prophylactic protection approach is founded, namely, the promotion of equitable settlements. [C] Mary Carter agreements instead: present to the jury a sham of adversity between the plaintiff and one codefendant, while these parties are actually allied for the purpose of securing a substantial judgment for the plaintiff and, in some cases, exoneration for the settling defendant. [Cc] The agreements pressure the "settling" defendant to alter the character of the suit by contributing discovery material, peremptory challenges, trial tactics, supportive witness examination, and jury influence to the plaintiffs cause. [C] These procedural advantages distort the case presented before a jury that came "to court expecting to see a contest between the plaintiff and the defendants [and] instead sees

one of the defendants cooperating with the plaintiff." Smithwick, 724 S.W.2d at 9 (Spears, J., concurring). Mary Carter agreements not only allow plaintiffs to buy support for their case, they also motivate more culpable defendants to "make a 'good deaf [and thus] end up paying little or nothing in damages." [Cc] Remedial measures cannot overcome nor sufficiently alleviate the malignant effects that Mary Carter agreements inflict upon our adversarial system. No persuasive public policy justifies them, and they are not legitimized simply because this practice may continue in the absence of these agreements. The Mary Carter agreement is simply an unwise and champertous device that has failed to achieve its intended purpose.

***

As a matter of public policy, this Court favors settlements, but we do not favor partial settlements that promote rather than discourage further litigation. And we do not favor settlement arrangements that skew the trial process, mislead the jury, promote unethical collusion among nominal adversaries, and create the likelihood that a less culpable defendant will be hit with the full judgment. The bottom line is that our

439

public policy favoring fair trials outweighs our public policy favoring partial settlements.

This case typifies the kind of procedural and substantive damage Mary Carter agreements can inflict upon our adversarial system. Thus, we declare them void as violative of sound public policy.

***

[Reversed and remanded for new trial.]

Dissenting opinion by Justice Doggett, joined by Justices Mauzy and Gammage.

***

In the instant case the trial court took great care to safeguard procedurally the adversarial nature and fairness of its proceedings. Nothing about the agreements now under attack was hidden from anyone. The court appropriately solicited and welcomed suggestions from Elbaor and the other parties as to what and when to tell the jury about the Mary Carter agreements. At voir dire, the court informed prospective jury members that ACH and Syrquin, by participating in the trial, could recover all or a portion of the amounts paid in settlement to Smith, depending on the size of the verdict. An additional warning was extended regarding the possibility of witness bias arising from the agreements. The implications of the agreements were also explored by various counsel during voir dire.

***

While Elbaor specifically complains of a lack of forcefulness in Smith's assertion of her claim against Syrquin, her counsel criticized Syrquin beginning in voir dire, though crediting his efforts to save Smith's life. Since in some multi-party suits co-defendants become aligned against one another, Elbaor might have found Syrquin and Stephens blaming him for Smith's injury even in the absence of the Mary Carter agreements. Despite Elbaor's concession that "the trial court [correctly] followed Texas law when it disclosed the Mary Carter agreements and implemented the other procedures to protect [him]," the majority rejects these procedures as "missing the point,"

thereby renewing its commitment to limit the role of the jury in the truth-seeking process. [C] Simply because jurors may initially expect the plaintiff to have interests adverse to all defendants does not mean that they are incapable of understanding that certain defendants have an incentive for the plaintiff to succeed. Indeed the same may occur in some multiparty litigation where no Mary Carter agreement is involved. The trial cannot be a "sham of adversity," when the jury, as here, is fully aware of this shift in alliances. Nor does the trial become less adversarial merely because some of the parties have switched sides--the names may have changed but the struggle is left intact. So long as at least two parties with

antagonistic interests remain, the likelihood that the truth will emerge is not diminished.

Accordingly, most jurisdictions allow Mary Carter agreements when trial courts implement similar procedural safeguards to those adopted here. [Cc] In rejecting the full disclosure approach, today's opinion embraces a decidedly minority view accepted in only "a couple of states" that have previously chosen to prohibit such agreements. [C]

***

The elitist view that ordinary people acting as jurors are incapable of determining the facts after full disclosure has once again prevailed. While protecting the litigation process from deleterious agreements, this court should avoid precipitous action with uncertain consequences for so many litigants, particularly when, as here, the

parties have exercised considerable care and the trial court has conscientiously monitored the proceedings.

NOTES AND QUESTIONS

1. As the majority opinion in the principal case suggests, Mary Carter agreements were named after an agreement discussed in the case of Booth v. Mary Carter Paint Co., 202 So.2d 8 (Fla.App. 1967), and in some areas are called Gallagher covenants, Loan Receipt Agreements, or High/Low agreements. Rains v. Stayton Builders Mart, Inc., 359 Or. 610, 375 P.3d 490 (2016) (noting Mary Carter agreements and high-low agreements have many characteristics in common and discussing their admissibility and disclosure to jury). As the dissent pointed out, most jurisdictions permit the agreements as long as they are disclosed to the court and the other parties. See, for example, Reynolds v. Amchem Products Inc., 8 N.Y.3d 717, 872 N.E.2d 232, 840 N.Y.S.2d 546 (2007) (new trial ordered because high-low agreement between plaintiff and one defendant disclosed to trial court but not to other defendant); Modular Bldg. Consultants of W. Va., Inc. v. Poerio, Inc., 235 W.Va. 474, 774 S.E.2d 555 (2015) (noting that Mary Carter agreements are not favored but are not prohibited); and Carter v. Tom's Truck Repair, Inc., 857 S.W.2d 172, 176 (Mo. 1993) ("There is a strong public policy against allowing secret agreements to work a fraud on either the nonsettling defendant(s), the jury, or the trial court. However, there are also strong public policy considerations in favor of allowing plaintiffs to control their own cases and settle with defendants as they choose. This court finds no reason that these policies cannot coexist, even in the presence of a Mary Carter Agreement, so long as the other defendant is not deceived. [C] Like the court of appeals, we are

convinced that the appropriate solution is to examine these troublesome agreements on a case-by-case basis rather than brand them all as outcasts.")

A few, like Texas in the principal case, have found them void as against public policy even when disclosed. Interestingly, Florida, the home of the case that gave the agreement its name, has followed the lead of the principal

441

case and no longer permits such agreements, even if they are disclosed. Dosdourian v. Carsten, 624 So.2d 241 (Fla. 1993).

2. The case is a good illustration of the ways in which strategy in a multiparty case can cause shifting alliances whether or not there is a Mary Carter agreement involved. See also Newman v. Ford Motor Co., 975 S.W.2d 147 (Mo. 1998) and Slocum v. Donahue, page 446.

3. Note that Justice Doggett's dissenting opinion chides the majority for "once again" allowing an "elitist view" of the jury system to prevail. What does that tell you about the process of decision making at the Texas Supreme Court?

3. Contribution and Indemnity

Knell v. Feltman

United States Court of Appeals, District of Columbia, 1949.

85 U.S.App.D.C. 22, 174 F.2d 662.

Wilbur K. Miller, Circuit Judge. On May 19, 1945 Evelyn Langland and her husband were guest passengers in an automobile owned

and operated by Kenneth E. Knell. At 12th Street and Pennsylvania Avenue, in the District of Columbia, the car in which they were riding collided with a taxicab owned by Ralph L. Feltman and operated by his employee, as a result of which Mrs. Langland was seriously injured. She and her husband sued Feltman to recover damages. After answering, Feltman filed a third-party complaint against Knell, asserting the collision was caused by the contributing or sole negligence of Knell.

[The jury found, in answer to special interrogatories, that both Feltman's employee and Knell were negligent, that the negligence of each contributed to the collision, and that plaintiffs' damages were $11,500. The court then awarded judgment in favor of plaintiffs against Feltman for $11,500 and judgment in favor of Feltman against Knell for $5,750, contingent upon Feltman's satisfaction of plaintiffs judgment against him. Knell argued that contribution should not be available because plaintiff passengers had not alleged that Knell was a joint tortfeasor with Feltman.]

Is Feltman to be denied contribution because the Langlands neither asked nor obtained judgment against Knell? The gist of Knell's argument on this question is that the right to contribution exists only between tortfeasors liable in common to the plaintiff; that his liability to the plaintiff was not established by a judgment against him in favor of the plaintiffs; that, therefore, his and Feltman's common liability to the Langlands was not established, and that consequently Feltman cannot have contribution from him. ***

In addition to being balked by Rule 14(a) [of the Federal Rules of Civil Procedure, which provides that a defendant may bring into the

action another person who may be liable to him for all or any part of the

442

damages, even though the plaintiff does not seek a judgment against the third party defendant], the appellant's theory that there can be no contribution unless the plaintiff has first obtained a judgment against both wrongdoers is untenable for still another reason. The right to seek contribution belongs to the tortfeasor who has been forced to pay, and the existence of the right cannot logically depend upon a selection of defendants made by the plaintiff. If it did so depend, the caprice or whim of the plaintiff, or his deliberate intention to fasten liability on one defendant alone, could preclude that defendant from having contribution to which he might otherwise be entitled. Moreover, such an application of the contribution doctrine would open the way to collusion between a plaintiff, and one against whom he has a cause of action to impose liability solely upon another against whom he has a cause of action for the same wrong.

For these reasons, we see no substance in the suggestion that contribution between concurrent tortfeasors can be enforced only if both are judgment debtors of the plaintiff.

***

We conclude that when a tort is committed by the concurrent negligence of two or more persons who are not intentional wrongdoers, contribution should be enforced; that a joint judgment against such tortfeasors is not a prerequisite to contribution between them, and it is immaterial whether they were, or any of them was, personally negligent. In other words, we adopt for the District of

Columbia, without exception or reservation, the rule stated by Chief Justice Groner in the George's Radio case "that when the parties are not intentional and wilful wrongdoers, but are made so by legal inference or intendment, contribution may be enforced." ***

Affirmed.

NOTES AND QUESTIONS

1. The English common law rule that there could be no contribution among joint tortfeasors had its origin in 1799 in the case of Merryweather v. Nixan, 8 T.R. 186, 101 Eng.Rep. 1337 [K.B.1799]. There is a very meager report of the case, but it seems clear that there had been a joint judgment against two defendants in an action for conversion and that they had acted in concert, since they were joined at a time when joinder was possible only on this basis. One defendant was denied contribution from the other, apparently on the ground that he had acted intentionally and his claim rested upon what was, in the eyes of the law, entirely his own wrong.

2. The early American cases denied contribution in cases of willful misconduct, although some allowed it when the tort committed by the claimant was a matter of negligence or mistake. Once the civil procedure door was thrown open to joinder in one action of those tortfeasors who had acted independently to cause the same harm, the origin of the "no contribution" rule and the reason for it were lost to sight, and contribution

was denied among all "joint tortfeasors." This was the majority common law rule in the United States early in the 20th Century. Most

of the early 20th Century commentators advocated a right to contribution, at least when the claimant was not an intentional wrongdoer, on the ground that it is unfair to saddle the entire burden of a loss, for which two are responsible, upon one alone, while the other goes scot free. See Bohlen, Contribution and Indemnity Between Tortfeasors, 21 Cornell L.Q. 522 (1936) and Leflar, Contribution and Indemnity Between Tortfeasors, 81 U.Pa. L. Rev. 130 (1932).

3. By the middle of the 20th Century, a substantial majority of the states permitted contribution, either by statute or judicial decision. See, e.g., Safeway Stores, Inc. v. Raytown, 633 S.W.2d 727 (Mo. 1982). Three successive uniform acts have provided for it. See Uniform Contribution Among Tortfeasors Act (1939), Uniform Contribution Among Tortfeasors Act (1955), and Uniform Comparative Fault Act (1979). The Restatement (Third) of Torts: Apportionment of Liability § 23 (2000) has adopted this position. But see Muncie Power Prods., Inc. v. United Technologies Automotive, Inc., 328 F.3d 870 (6th Cir. 2003) (applying Indiana law) (Indiana adheres to the traditional common law rule prohibiting contribution among joint tortfeasors).

4. As jurisdictions recognized contribution among joint tortfeasors, they applied a rule of allocation, by analogy to contribution among sureties, on an equal-division basis--half and half if there are two tortfeasors, by thirds if there are three, and so on. With the advent of comparative negligence, most jurisdictions have changed and make the division according to the relative fault of the parties. In accord, the Uniform Comparative Fault Act and Restatement (Third) of Torts: Apportionment of Liability § 23(b), comment e (2000).

5. The traditional common law rule that contribution is not permitted among intentional wrongdoers has persisted, and there seems little inclination to change it. It has been codified in many jurisdictions.

6. Keep in mind that contribution is neither necessary nor permitted in jurisdictions that have eliminated joint and several liability. After a single car accident, passenger sued driver and driver's employer. Before trial, passenger settled with both defendants. Settling defendants then filed a contribution claim against the State, arguing that its negligence in maintaining the road contributed to the accident. Washington had limited joint and several liability by statute and its scope did not include this situation. Thus, settling defendants were not entitled to contribution. Kottler v. State of Washington, 136 Wash.2d 437, 449, 963 P.2d 834, 841 (1998) (settling defendants "settled in the eyes of the law only for their proportionate shares of total liability. Absent joint and several liability[,] they simply have no claim for contribution under the statute.")

444

Yellow Cab Co. of D.C., Inc. v. Dreslin

United States Court of Appeals, District of Columbia Circuit, 1950.

86 U.S.App.D.C. 327, 181 F.2d 626.

PROCTOR, Circuit Judge. The question here concerns contribution between tortfeasors where the judgment creditor is the wife of the tortfeasor against whom contribution is sought.

A taxicab of appellant (hereafter called "Cab Co."), driven by its agent, and an automobile, driven by appellee (hereafter called "Dreslin"), collided. Dreslin's wife and others in his car were injured.

They sued the Cab Co. for damages. Dreslin joined with them, claiming for loss of consortium, medical expenses for Mrs. Dreslin and damages to his automobile. Among its defenses, the Cab Co. pleaded contributory negligence of Dreslin. It also cross-claimed against him for damages to the taxicab and for contribution for any sums recovered by the other plaintiffs against it. The jury's verdict established the collision to have been caused by concurrent negligent operation of the two cars. Accordingly judgments for varying amounts were entered in favor of all plaintiffs except Dreslin. In addition a declaratory judgment was entered allowing the Cab Co. contribution against Dreslin upon the several judgments except that of Mrs. Dreslin. This was disallowed because, as the Court held, "the right to contribution arises from a joint liability," and as Dreslin was not liable in tort to his wife, there was no joint liability between him and the Cab Co. as to her. This appeal is confined to that single question.

We agree with the conclusion of the trial court. Neither husband nor wife is liable for tortious acts by one against the other. That is the common law rule. It prevails today in the District of Columbia. ***

The rights of contribution arise out of a common liability. The rule "hinges on the doctrine that general principles of justice require that in the case of a common obligation, the discharge of it by one of the obligors without proportionate payment from the other, gives the latter an advantage to which he is not equitably entitled." [C] Contribution, then, depends upon joint liability. An injured party plaintiff in the suit from which a right of contribution develops must have had a cause of action against the party from whom contribution is sought. Here there was no liability by Dreslin to his wife,--no right

to action against him and the Cab Co., hence nothing to which a right of contribution could attach.

The argument that it would be inequitable to allow Mrs. Dreslin to be "enriched" at the sole expense of the Cab Co., permitting her husband, equally at fault, to escape any of the burden, overlooks the fact that preservation of domestic peace and felicity is the policy upon which the rule of immunity between husband and wife is based.
***

The judgment is affirmed.

445

NOTES AND QUESTIONS

1. Most states agree that non-immune tortfeasors may not seek contribution or indemnity from those who are immune. See Landis v. Hearthmark, LLC, 232 W.Va. 64, 750 S.E.2d 280 (W.Va. 2013) (product seller of fire starter gel could not seek contribution from parents of child injured while using it); Sears, Roebuck & Co. v. Huang, 652 A.2d 568 (Del. 1995) (owner and manufacturer of escalator could not seek contribution from parent whose failure to supervise child contributed to injury); Crotta v. Home Depot, Inc., 249 Conn. 634, 732 A.2d 767 (1999) (accord, collecting cases from other jurisdictions); Bond v. Pittsburgh, 368 Pa. 404, 84 A.2d 328 (1951) (charitable immunity). See Chapter 12, Section 3, Immunities.

2. A similar problem arises in connection with worker compensation statutes, which prevent the employee from suing the employer in tort. Almost all courts have construed their state's statute as cutting off all possible liability, but a few courts have disagreed. For a

stimulating discussion of this controversial issue, see 11 Larson's, Workers' Compensation Law § 121 (2019). Restatement (Third) of Torts: Apportionment of Liability § 23, comment j (2000) takes no position on this.

3. What if the plaintiff does not file against one of the tortfeasors before the statute of limitations has run? Can the tortfeasor against whom the plaintiff did file in time and who has paid a judgment collect contribution even though the other tortfeasor is protected by the statute of limitations against any action by the injured person? See Keleket X-Ray Corp. v. United States, 275 F.2d 167 (D.C.Cir.1960) and Cooper v. Philadelphia Dairy Products Co., 34 N.J.Super. 301, 112 A.2d 308 (1955) (both allowing contribution claim). Restatement (Third) of Torts: Apportionment of Liability § 23, comment k (2000) permits contribution under these circumstances. What if the party from whom contribution is sought is protected by a statute of repose? Estate of Ryan v. Heritage Trails Assocs., Inc., 745 N.W.2d 724 (Iowa 2008) (no contribution claim permitted because plaintiffs never had a claim against the manufacturer due to operation of statute of repose). See Chapter 12 regarding the distinction between statute of limitations and statute of repose.

4. In most jurisdictions, a party who is sued for negligence may file a cross-claim for contribution if plaintiff joined both tortfeasors, may join (implead) another person as a third-party defendant from whom he is seeking contribution, or may bring a separate action for contribution. Maryland permits the claim for contribution to be made as a motion for contribution even though no cross-claim had been filed. Lerman v. Heeman, 347 Md. 439, 701 A.2d 426 (1997). West Virginia requires that the contribution claim be brought as a

crossclaim or third-party claim in the action by the plaintiff. It cannot be brought as a separate claim. Charleston Area Medical Center, Inc. v. Parke-Davis, 217 W.Va. 15, 614 S.E.2d 15 (2005) (answering certified question from Fourth Circuit).

5. Contribution Sought by Settling Defendant. Most states permitting contribution do not require that a judgment be obtained against a tortfeasor before he pays and seeks contribution. He may settle out of court with the

injured party and then obtain contribution. Of course, in addition to proving that the other party is a joint tortfeasor, he has the burden of proving that the amount of the settlement was reasonable. This position is endorsed by Restatement (Third) of Torts: Apportionment of Liability § 23, comment h (2000).

6. Contribution Sought by Nonsettling Defendant. A is injured by the combined negligence of B and C. A accepts $100,000 from B and gives him a covenant not to sue (or release retaining rights). A proceeds to trial against C and obtains a finding that B and C were equally at fault and a verdict for $500,000. In a jurisdiction that gives C a percentage setoff against the judgment, C would pay only his share and no contribution would be necessary. In a jurisdiction that provides for a pro tanto (dollar for dollar) setoff against the judgment, C pays $400,000 ($500,000 minus the credit for the partial satisfaction of the claim, see note 4, page 429.) Can C obtain contribution from B? See the next case and the notes that follow it.

Slocum v. Donahue

Court of Appeals of Massachusetts, 1998.

44 Mass.App.Ct. 937, 693 N.E.2d 179.

After Robert Donahue pleaded guilty to motor vehicle homicide in the death of [the Slocums'] eighteen month old son, the Slocums filed a civil action against the Donahues alleging negligence and gross negligence. The Donahues then filed a third-party complaint against Ford Motor Company (Ford), denying negligence and [in the alternative seeking contribution and indemnity,] alleging that Ford was negligent and was in breach of warranties of merchantability and fitness for a particular use. The Donahues claim that, when Robert Donahue was in the car prior to the accident, he inadvertently pushed the floor mat on the driver's side, under the throttle. When he later started to back the car down his driveway, the engine began to race and, although he repeatedly stepped on the brakes, his car continued to accelerate. The car's rear wheels hit the curb across the street from his house, became airborne, turned, and then hit a fence. When he got out of the car, he saw Todd Slocum lying on the lawn. The Donahues' expert would testify at trial that the floor mat was defective, permitting it to interfere with the operation of the vacuum booster which caused the power brakes to fail to function. [4]

* * *

[4] Robert Donahue claims that he pleaded guilty in the criminal case because he feared receiving the maximum sentence if he proceeded to trial.

Prior to trial, the Slocums and Ford signed a settlement agreement providing that Ford would pay $150,000 to the Slocums in exchange for a release of any claim. Ford then moved for summary judgment

as to the Donahues' [contribution and indemnity] claims and on the grounds that the settlement was made in good faith and, pursuant to G.L. c. 231B, § 4, that all claims for contribution were thereby extinguished, and that there was no basis for the Donahues' claims for indemnity. ***The Donahues

447

appeal from the final judgment dismissing their third-party complaint against Ford. [5] We affirm.

* * *

[5] After the entry of judgment in the third-party action in the lower court, the case of the Slocums against Robert Donahue proceeded to trial. The jury returned a verdict against Donahue.

1. Right to contribution. Under G.L. c. 231B, § 4, as inserted by St.1962, c. 730, § 1, "When a release... is given in good faith to one of two or more persons liable in tort for the same injury:... (b) It shall discharge the tortfeasor to whom it is given from all liability for contribution to any other tortfeasor." The Donahues argue on appeal that the settlement between Ford and the Slocums was not made in good faith and was collusive both because the amount of the settlement was for less than the value of the case and because Ford allegedly told the Slocums that Ford would allow them to use its experts so that the Donahues' attempt to attribute liability to Ford at trial would be unsuccessful.

The seminal Massachusetts case construing this statute in this context, Noyes v. Raymond, 28 Mass.App.Ct. 186, 548 N.E.2d 196 (1990), controls the instant case in material respects. ***

As in Noyes, there were facts before the judge showing that the settlement between Ford and the Slocums was fair and reasonable. It was reasonably predictable that damages would be high and that a jury would find liability on the part of Robert Donahue, in view of the fact that he pleaded guilty in the criminal case and on the basis of his admission in his deposition that, prior to the accident, he was drinking from a bottle of vodka that he kept under the driver's seat in a brown bag. Given these facts, it was not unreasonable to think that a jury might not find any liability on the part of Ford.

According to the Donahues' attorney, in February of 1995, counsel for Ford notified the Donahues' attorney that Ford was proposing a settlement offer totaling $300,000 with $150,000 to be contributed by Ford, $125,000 by Liberty Mutual Insurance Company (the policy limits of the Donahues' insurance carrier), and $25,000 by the Donahues personally. [6] The Donahues' attorney responded that she would discuss the matter with her clients, but that $25,000 was not an amount that her clients would be financially able to contribute to the settlement. Apparently the subsequent negotiations between the Slocums and Ford occurred without the Donahues' participation. In May, 1995, the Slocums settled with Ford for $150,000. Noyes instructs that the purpose of the contribution statute is to promote settlement, that a low settlement figure alone is not evidence of "bad faith," and that settlements should be routinely approved without extended hearings if the purpose of the statute is to be served. Further, the court in Noyes observed that lack of good faith was evidenced by "collusion, fraud, dishonesty, and other wrongful conduct." [C]

* * *

[6] Counsel for the Slocums had earlier indicated to Ford's counsel that they would consider settling this matter with all parties for a total settlement package of $400,000.

448

In these circumstances Ford's settlement with the Slocums for an amount contemplated as its contribution to a total settlement package does not indicate bad faith or collusion.

As to the Donahues' contention that the Slocums' use of experts originally retained by Ford is evidence of collusion, we disagree. [Footnote omitted.] In Commercial Union Ins. Co. v. Ford Motor Co., 640 F.2d 210 (9th Cir.), cert, denied, 454 U.S. 858 (1981), cited by the Donahues, the court found that the settlement was collusive because, to some extent, it was "dictated by the tactical advantage of removing a deep-pocket defendant because of the experts it could produce" and, therefore, "[was] not made in 'good faith' consideration of the relevant liability of all parties." Id. at 214. [Footnote omitted.] The Donahues' argument suggests that there was bad faith here because the Slocums were not interested in the deep pocket of Ford, but settled with Ford because they believed that Ford was not responsible for the death of their son. Such a speculation does not trigger the necessity for a more extensive hearing on the issue of good faith. See McDermott, Inc. v. AmClyde, 511 U.S. 202, 213 n. 16, 216-217 (1994) (while recognizing "the cursory nature of most good-faith hearings," also noted "the large potential for unfairness" in "the pro tanto rule untamed by good-faith hearings"). The motion for summary judgment was properly allowed.

2. Right to indemnity. "Under G.L. c. 231B, contribution is allowed between joint tortfeasors who cause another, by reason of their wrongdoing, to incur injury or damage. In addition,... the statute permits a plaintiff to settle with one joint tortfeasor and still have recourse against remaining tortfeasors (subject to the limitations stated in the statute). The right to contribution, unlike the right to indemnity, is based on the shared fault of the joint tortfeasors. Indemnity, on the other hand, allows someone who is without fault, compelled by operation of law to defend himself against the wrongful act of another, to recover from the wrongdoer the entire amount of his loss, including reasonable attorney's fees." [C] "[I]ndemnity is permitted only when the would-be indemnitee does not join in the negligent act." [Cc] "This right to indemnity is limited to those cases in which the would-be indemnitee is held derivatively or vicariously liable for the wrongful act of another." [C]

If the claim against Ford had gone to trial and Ford had been found liable to the Donahues, [9] it would have been as a result of its negligence or breach of warranty. [Footnote omitted.] "Such liability will not be derivative or vicarious in nature, nor will it be constructive rather than actual. Accordingly, the third-party plaintiffs are not entitled to indemnification...." [C]

* * *

The Slocums never made a direct claim against Ford.

Once Ford settled with the Slocums, the sole question for the fact finder was whether Todd Slocum's death was caused by defendant Robert Donahue's negligence. [Footnote omitted.] Robert Donahue

was free to claim that he was not negligent and that Todd Slocum's death was caused

449

by Ford's negligence in selling a defective product. Under no set of circumstances could the jury properly have held the Donahues liable to the Slocums for the conduct of Ford. Further, in holding Robert Donahue negligent (as they did; see note 5, supra) the jury concluded that he was solely negligent (or was a joint tortfeasor with Ford). His liability is not vicarious and he is not entitled to indemnification from Ford. If Ford had remained in the case, any liability on its part would have been as a joint tortfeasor, and contribution would have been required. Indemnity would not have been appropriate. [12] "Contribution and indemnity are mutually exclusive remedies." [C] Summary judgment on the issue of indemnification was appropriate. ***

* * *

[12] If, as the Donahues claimed, any damages sustained by the Slocums were caused not by the negligence or gross negligence of the Donahues (but, rather, solely as a result of Ford's breach of warranty) this would have constituted an absolute defense to the Slocum's action but would not provide the basis for an indemnity claim. [C]

Judgment affirmed.

NOTES AND QUESTIONS

1. Contribution. The Massachusetts statute providing for no contribution from settling defendants is based on the 1955 Uniform

Act, § 4. It is also endorsed by Restatement (Third) of Torts: Apportionment of Liability § 23, comment i (2000).

2. Not all jurisdictions protect a settling defendant from contribution; some permit the nonsettling defendant to seek contribution from the settling defendant. This is the position of the 1939 Uniform Act, § 4. Do you see why this approach might discourage settlement? Lavoie v. Celotex Corp., 505 A.2d 481, 483 (Me.1986) (Although encouraging settlement to help reduce the burden upon the judicial system is an important principle, it should not be followed to the detriment of nonsettling defendants.)

3. Note that in Massachusetts, and other jurisdictions following the position of the 1955 Uniform Act, a settlement with the plaintiff protects the settling defendant from a contribution claim brought by a nonsettling defendant, as long as the settlement is in good faith. How is good faith to be determined? See Kornhauser and Revesz, Settlements Under Joint and Several Liability, 68 N.Y.U.L. Rev. 427 (1993) (collecting cases and noting that courts are divided on whether a "good faith" determination should involve only an inquiry concerning the absence of collusion or also should include a determination of the adequacy of the settlement).

4. Indemnity. The opinion in the principal case also explains the difference between contribution and indemnity. Although the terms are frequently linked in a phrase and both may be pleaded in a complaint, as in the principal case, they are actually distinct concepts. Traditionally, while contribution allowed a tortfeasor to be partially reimbursed for money paid in judgment or settlement, indemnity was available to shift the entire cost of the judgment or

settlement from a tortfeasor whose liability to the plaintiff was not based on its own wrongful conduct, but imposed on it by law because of its relationship with the tortfeasor whose wrongful conduct caused the injury.

450

For example, the employer's liability for its employee's conduct, the automobile owner's liability for a driver's conduct, the retailer's liability for the manufacturer's product would give rise to a cause of action for indemnity, or full reimbursement for the liability to the injured party. (See Chapters 13 and 15). As is illustrated in the principal case, indemnity is not available to a defendant the jury found to be negligent. A child was injured when a diaper changing table collapsed in a Safeway restroom. Jury found Safeway 40% responsible and the installer 60% responsible. Safeway, Inc. v. Rooter 2000 Plumbing and Drain, 368 P.3d 389 (N.M. 2016) (Safeway cannot get indemnity from installer). In addition, the right to indemnity can arise through agreement, sometimes referred to as a "hold harmless" clause in a contract. See also Restatement (Third) of Torts: Apportionment of Liability § 22 (2000) (indemnity limited to cases premised on vicarious or derivative liability).

5. In some states, a doctrine of "equitable indemnity" developed, usually to avoid restrictive contribution statutes that provided for pro rata contribution even though one of the tortfeasors was substantially more culpable than the other. In those jurisdictions, indemnity was sometimes permitted if the indemnitor was "actively" negligent while the indemnitee was "passively" negligent or if the indemnitor was "primarily" liable while the indemnitee was "secondarily" liable. With

the development of comparative responsibility principles, this form of indemnity has largely disappeared. Tolbert v. Gerber Indus., Inc., 255 N.W.2d 362 (Minn. 1977) (in light of Minnesota's adoption of comparative negligence, contribution rather than equitable indemnity is appropriate vehicle for allocating loss between negligent manufacturer and negligent installer); Owens v. Truckstops of America, 915 S.W.2d 420 (Tenn. 1996) (claim for indemnity can no longer be based on active-passive negligence because that distinction subsumed into newly adopted doctrine of comparative fault).

4. Apportionment of Damages

Bruckman v. Pena

Colorado Court of Appeals, 1971. 29 Colo.App. 357, 487 P.2d 566.

DWYER, Judge. ***Plaintiff was injured on July 21, 1964, when the car in which he was riding collided with a truck driven by the defendant Bruckman and owned by the defendant Armored Motors Service. On June 11, 1965, plaintiff was injured in a second collision and certain injuries he had sustained in the first collision were aggravated. This action was commenced on June 25, 1965, and the only defendants named in the action are the owner and driver of the truck involved in the first collision.

[The jury returned a verdict in favor of plaintiff William Pena in the sum of $50,000.]

In seeking reversal, defendants assert that the court was in error in one of its instructions to the jury. ***

The instruction complained of concerns the amount of damages recoverable from the defendants. The first part of the instruction, which is a proper statement of the law applicable to the case, is as follows:

"If you find that after the collision complained of Plaintiff, William Pena, had an injury which aggravated the ailment or disability received in the collision complained of, the Plaintiff is entitled to recover for the injury or pain received in the collision complained of; but he is not entitled to recover for any physical ailment or disability which he may have incurred subsequent to the collision.

"Where a subsequent injury occurs which aggravated the condition caused by the collision, it is your duty, if possible, to apportion the amount of disability and pain between that caused by the subsequent injury and that caused by the collision."

In addition to this correct statement of the law, the court further instructed the jury: "But if you find that the evidence does not permit such an apportionment, then the Defendants are liable for the entire disability." Defendants argue that this last statement in the instruction is in error. ***

It is the general rule that one injured by the negligence of another is entitled to recover the damages proximately caused by the act of the tortfeasor, and the burden of proof is upon the plaintiff to establish that the damages he seeks were proximately caused by the negligence of the defendant. In accordance with this general rule, we hold that the instruction is in error because it permits the plaintiffs to

recover damages against the defendants for injuries which the plaintiff received subsequent to any act of negligence on the part of the defendants and from causes for which the defendants were in no way responsible. The instruction erroneously places upon the defendants the burden of proving that plaintiff's disability can be apportioned between that caused by the collision here involved and that caused by the subsequent injury in order to limit their liability to the damages proximately caused by their negligence. Counsel for plaintiffs argues that the rules concerning apportionment of disability announced by our Supreme Court in Newbury v. Vogel, 151 Colo. 520, 379 P.2d 811, should also apply here. In Newbury, the Court stated:

"We find the law to be that where a pre-existing diseased condition exists, and where after trauma aggravating the condition disability and pain result, and no apportionment of the disability between that caused by the pre-existing condition and that caused by the trauma can be made, in such case, even though a portion of the present and future disability is directly

452

attributable to the pre-existing condition, the defendant, whose act of negligence was the cause of the trauma, is responsible for the entire damage."

The pre-existing condition in the Newbury case was of non-traumatic origin, but the rules there announced also apply where the pre-existing condition was caused by trauma. [C] The reasons for the adoption of the Newbury rules are not present here. It is one thing to hold a tort-feasor who injures one suffering from a pre-existing

condition liable for the entire damage when no apportionment between the pre-existing condition and the damage caused by the defendant can be made, but it is quite another thing to say that a tort-feasor is liable, not only for the damage which he caused, but also for injuries subsequently suffered by the injured person. We hold that the defendants here cannot be held liable for the plaintiffs subsequent injury and this is so whether or not such damage can be apportioned between the two injuries.

The plaintiffs also rely on the case of Maddux v. Donaldson, 362 Mich. 425, 108 N.W.2d 33, 100 A.L.R.2d 1. This case involved a chain-type collision, and plaintiffs injuries resulted from successive impacts which to all intents and purposes were concurrent. The court there held that where independent concurring negligent acts have proximately caused injury and damage which cannot be apportioned between the tort-feasors, each tort-feasor is jointly and severally liable for all of the injury and damage. This rule is not applicable where, as here, the second injury or aggravation of the first injury is attributable to a distinct intervening cause without which the second injury or aggravation would not have occurred. ***

Judgments reversed and cause remanded for a new trial on the issues of damages alone.

NOTES AND QUESTIONS

1. Concurrent Tortfeasors. A and B, driving separate cars, negligently collide. One car bounces over on the sidewalk, hits C and injures him. C's injury is indivisible and therefore not apportionable. A and B are each liable for the full injury. Seattle-First Nat'l Bank v. Shoreline Concrete Co., 91 Wash.2d 230, 588 P.2d 1308 (1978). If A

and B separately hit the plaintiff and the combined effect of the two accidents is that C dies, the death is treated as an indivisible result for which each is liable. Glick v. Ballentine Produce Inc., 396 S.W.2d 609 (Mo. 1965). See also Maddux v. Donaldson, 362 Mich. 425, 108 N.W.2d 33 (1961) (chain reaction collision in which successive impacts were practically speaking concurrent) (discussed in principal case).

2. Successive Tortfeasors (Unrelated Incidents). What if, unlike in the principal case, it had been the second tortfeasor who was the defendant? Plaintiff suffered injury to his right elbow in March and was under a physician's care because of continued pain and swelling when, about a month later, he was in an automobile accident in which his elbow again was injured. In an action based on the automobile accident, the trial court judge found no

basis for apportioning damages to the elbow between the March and April accidents. Lovely v. Allstate Ins. Co., 658 A.2d 1091 (Me. 1995) (second tortfeasor liable for whole injury where damages could not be apportioned). See also Montalvo v. Lapez, 77 Haw. 282, 884 P.2d 345 (1994) (noting that whether plaintiff recovered could depend upon which unrelated tortfeasor is before the court).

3. Successive Tortfeasors (Related Incidents). In the principal case, the court found that plaintiff had the burden of proving what damages plaintiff had suffered in the first accident, for which defendants were responsible, and that defendants could not be held responsible for the second, independent accident. What if the second incident was not independent? Driver negligently strikes pedestrian, breaking his

leg. While pedestrian is lying helpless in street, bicyclist negligently runs over his arm. At the hospital, pedestrian is treated negligently by physician, aggravating his leg injury. Driver would be responsible for all injuries. Bicyclist would be responsible for only the arm injury. Physician would be responsible for aggravation of leg injury. See note 11, page 392. See also Harsh v. Petroll, 584 Pa. 606, 887 A.2d 209 (2005) (employer of trucker who rear-ended car would be liable for injuries caused in initial collision and for death of occupants who died when car burst into flame due to defect in car's fuel system for which manufacturer also was liable based on crashworthiness defect); Payne v. Hall, 139 N.M. 659, 137 P.3d 599 (N.M. 2006) (clinic where late term abortion was begun would be liable for injuries caused by malpractice at hospital to which patient was sent for completion of abortion if jury found that clinic had committed malpractice); and Cramer v. Starr, 240 Ariz. 4, 375 P.3d 69 (2016) (plaintiff must prove that driver's negligence created reasonably foreseeable risk that spinal fusion surgery might be necessary and that surgery might be performed negligently). This is often referred to as the "original tortfeasor doctrine" because the original tortfeasor is liable, along with the later acting tortfeasor, for the plaintiffs enhanced injuries. Banks v. Elks Club Pride of Tenn., 301 S.W.3d 214 (Tenn. 2010) (club where plaintiff was injured when chair collapsed liable for injuries along with doctors who committed malpractice when treating her for back injury caused by chair collapse).

Consider this scenario. Would you characterize it as a "related" incident? After suffering personal injury in a car accident, plaintiff scheduled a consultation with a lawyer to discuss representation. At

the lawyer's office, plaintiff was sitting in the firm's conference room when his chair collapsed, causing him to hit his head and land on the floor. Would the driver of the car be liable for the injury in the lawyer's office? Cf. Friedrich v. Fetterman and Assocs., P.A., 137 So.3d 362 (Fla. 2013).

4. Proof Issues. A comment on the principal case in 49 Den.L.J. 115 (1972), indicates that there was testimony in the trial below that plaintiff had suffered permanent brain damage in each of the accidents and that it was impossible to apportion the damage between them. How can the jury apportion? Compare McAllister v. Pennsylvania R. Co., 324 Pa. 65, 187 A. 415 (1936), where plaintiff suffered, six months apart, an injury to each leg, with some combined effect on the back. The doctor treating the first injury had died. The court held that there is a "reasonable basis of apportionment"

when there is "some evidence to sustain the apportionment made, even though, due to circumstances of the particular case, the proofs do not attain the degree of precision which would make possible an exact dividing line between the injuries." In Loui v. Oakley, 50 Haw. 260, 438 P.2d 393 (1968), involving four accidents, the court held that the jury should be told to make a "rough estimate" and if that were impossible, "to apportion the damages equally among the various accidents." For a particularly challenging factual scenario, see Montalvo v. Lapez, 77 Haw. 282, 884 P.2d 345 (1994) (apportionment of damages in case involving injury to plaintiffs back during rear-end chain reaction automobile accident in which plaintiff

had a congenital condition that made him more susceptible to back injuries, previously had been injured in another automobile accident, had been the victim of assaults that included blows to his spine and face, and had himself engaged in activities--boogey boarding and pushing a car with a flat tire--that exacerbated his back injuries). See also Restatement (Third) of Torts: Apportionment of Liability § 26 (2000).

5. Successive Tortfeasors (Related Incidents) (Allocation Between Actors). What if plaintiff only sues the second actor? Plaintiff was passenger in the car of an intoxicated driver that left the road and struck a tree, bursting into flames a few minutes later. Plaintiff sued only the manufacturer of the car for the injuries suffered in the fire, alleging that a defect in the car had led to the fire. Should manufacturer be able to put on evidence of the driver's intoxication and excessive speed that caused the initial crash and seek an apportionment of the damages between it and the driver? See D'Amario v. Ford Motor Co., 806 So.2d 434 (Fla. 2001) (adopting minority view--evidence not permitted because important to maintain distinction between fault in causing the accident and fault in causing additional or enhanced injuries) and Fla. Stat. Ann. § 768.81(3)(b) (legislature changed result--Florida now with majority in permitting jury to compare fault of original tortfeasor and product manufacturer responsible for enhanced injuries in allocating fault). Under the original tortfeasor doctrine, the driver would be responsible for all the injuries suffered in the collision, including the burn injuries. Why would a passenger choose only to sue the manufacturer and not include the driver in the suit? See Egbert v. Nissan Motor Co., Ltd., 228 P.3d 737 (Utah 2010) (noting that the elimination of joint and

several liability complicates the question whether majority or minority approach is chosen).

455

CHAPTER 8 DUTY OF CARE

In Heaven v. Pender, 11 Q.B.D. 503 (C.A.1883), Brett, M.R., declared, "[t]he proposition ***is that whenever one person is by circumstances placed in such a position with regard to another that every one of ordinary sense ***would at once recognize that if he did not use ordinary care and skill in his own conduct with regard to those circumstances, he would cause danger of injury to the person or property of the other, a duty arises to use ordinary care and skill to avoid such danger."

This passage was much quoted by courts and writers, notwithstanding the fact that ten years later, Brett, who had become Lord Esher, was forced to retreat from his own words. See Le Lievre v. Gould, [1893] 1 Q.B. 491 (C.A.) (holding that a surveyor did not owe a duty to the mortgagees to exercise care in issuing certificates, and therefore, mortgagees could not maintain an action against surveyor for negligence).

The Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 7 (2012), states the accepted and current principle for the role of the duty concept in negligence:

Duty

(a) An actor ordinarily has a duty to exercise reasonable care when the actor's conduct creates a risk of physical harm.

(b) In exceptional cases, when an articulated countervailing principle or policy warrants denying or limiting liability in a particular class of

cases, a court may decide that the defendant has no duty or that the ordinary duty of reasonable care requires modification.

Where a person creates through his or her negligence a risk of physical harm a duty is imposed. Drivers of automobiles owe a general duty of care to others whom they reasonably foresee will be injured through their driving.

This chapter explores the limits of liability and where courts have denied or curtailed liability. Recall the limits to liability articulated in Palsgraf, supra page 352. If the defendant's conduct creates a risk of physical injury to the plaintiff, the defendant will ordinarily owe the plaintiff a duty of care. However, the scope of the duty may be contested. The courts often provide reasons of social policy in delimiting liability as identified in paragraph (b) above.

The areas of the law in which duty is of vital concern lie beyond the core of wrongful acts causing physical harm. There are three areas, the

subject matter of this chapter, in which a duty of care is central in establishing liability.

(1) The, often wrongful, act of a third party or a natural event has caused physical harm to plaintiff that defendant has failed to take affirmative steps to prevent or ameliorate;

(2) The negligent act causes non-physical harm, i.e., emotional distress or pure economic loss; and

(3) The negligent act causes losses in birth or conception where the traditional categorizations of personhood are incapable of bestowing

a cause of action. This third area demonstrates that technological advances and social change may give rise to new interests that may be protected by negligence.

It is within the concept of duty that the frontier arenas of negligence are recognized and the courts are put to the test of how far to expand the domain of negligence liability.

1. Privity of Contract

Historically, the contract action developed considerably later than tort liability. The tort action remained, allowing the old tort action on the case to be maintained in any situation where it had already been recognized. The result was a distinction, generally recognized, between "nonfeasance," where the defendant had done no more than make a promise and break it, and "misfeasance," where he or she may have in attempting performance, done the wrong thing. The tort/contract boundary was the prime analytical division in the law of obligations. That division became demarcated by the description that the duty in contract arose out of the agreement of the parties, while in tort it arose by operation of law. The language of duty became entrenched in the law of negligence because the contract/tort distinction rested on the source of the obligation. See D. J. Ibbetson, A Historical Introduction to the Law of Obligations (1999) at 170-173.

Nonfeasance. In general, promise alone and its breach, will only sustain a breach of contract action; no tort action can be maintained. A good illustration is Louisville & Nashville R. Co. v. Spinks, 104 Ga. 692, 30 S.E. 968 (1898), where the defendant invited plaintiff to come to Cincinnati for employment and promised that if it did not employ him, it would furnish him with transportation back to Atlanta.

He came, fell ill, and was not employed. Defendant refused to give him a ticket to Atlanta, and he was forced to walk the whole way, suffering "much from pain, weariness and blistered feet." It was held that his only remedy was an action on the contract and no tort action would lie. See also Newton v. Brook, 134 Ala. 269, 32 So. 722 (1902), where defendants contracted to prepare a body for shipment by a certain train and then did nothing. Harm was suffered by plaintiffs. Again it was held that there was no tort remedy.

457

To this general rule there are a few recognized exceptions. One is that a public utility or common carrier that has undertaken the duty of serving the public becomes liable in tort when it fails to do so, whether or not it has made a contract. See, for example, Nevin v. Pullman Palace- Car Co., 106 III. 222, 46 Am.Rep. 688 (1883). Another is that a defendant who makes a contract without the intention to perform is regarded as committing a form of misrepresentation or fraud for which a tort action of deceit will lie. See Chapter 21. Promises or undertakings may form the foundation of a special relationship sufficient to impose a duty of care in negligence to take affirmative action to protect a person from harm. See Section 2 above.

Misfeasance. When the defendant misperforms the contract, the possibility of recovery in tort is greatly augmented. In some instances this is merely the survival of the older tort action, as when a carrier remains liable in tort, as well as for breach of contract, for negligent injury to a passenger, or for loss of his baggage. In the United States this has gradually been extended to virtually any type of contract.

One of the leading cases is Flint & Walling Mfg. Co. v. Beckett, 167 Ind. 491, 79 N.E. 503 (1906), where the defendant negligently installed a windmill on the plaintiffs barn, and it collapsed and wrecked the barn. In all these cases the question may arise whether the defendant has gone so far in his performance, as distinguished from mere preparation for it, as to have undertaken a tort duty.

Election and Gravamen. It follows that in many cases it is possible to maintain an action in either contract or tort. When this is true, a number of questions may arise as to different rules of law applicable to the two actions. For example, a particular court may have jurisdiction over one type of action but not the other, or certain remedies, such as summary judgment, attachment, or arrest of the defendant may be available in one action but not the other. Different statutes of limitations may apply. Different rules as to the damages may prevail, especially in regard to causation, to punitive damages or for emotional harm. Some defenses, such as infancy or the statute of frauds, or immunities may be pleaded in one action but not the other.

In these situations the courts have proceeded along two different lines. One is to permit the plaintiff to choose the theory of his action and dispose of the particular question accordingly. Thus in Doughty v. Maine Cent. Transp. Co., 141 Me. 124, 39 A.2d 758 (1944), an action for personal injuries received by a passenger through the negligence of the carrier would be barred by the statute of limitations if the action were in tort, but not if it were in contract. It was held that the plaintiff, having elected to treat his action as one for breach of contract, was not barred by the tort statute.

On the other hand, some courts will not give plaintiff such latitude. Rather, the court will determine the "gravamen" or "gist" of the action, which is to say the essential facts on which the plaintiffs claim rests.

458

Thus in Webber v. Herkimer & Mohawk St. R. Co., 109 N.Y. 311, 16 N.E. 358 (1888), another case of a passenger injured by a carrier's negligence, it was held that the action was essentially founded on the negligence and that it was governed by the tort rather than the contract statute of limitations.

The liability of professionals directly raises the issue because plaintiff and defendant are usually in a contractual relationship. Can a client sue his attorney for negligently caused losses in both tort and contract? In most instances the courts have not restricted the cause of action to breach of contract, Collins v. Reynard, 154 Ill.2d 48, 607 N.E.2d 1185, 180 Ill.Dec. 672 (1992) (reversing appellate court that found lawyer malpractice cognizable in contract but not in tort).

The cases are marked by inconsistency. Courts have, however, in an underlying consistency, tended to look to the policy underlying the particular rule of law or statute to be applied in order to make the characterization.

The famous discussion of this topic is Prosser, The Borderland of Tort and Contract, in W. Prosser, Selected Topics on the Law of Torts, 380, at 429-450 (1954).

Winterbottom v. Wright

Exchequer of Pleas, 1842.

10 M. & W. 109, 152 Eng.Rep. 402.

[Defendant Wright, a manufacturer and repairer of mail coaches, contracted with the Postmaster General, Mr. Atkinson, to keep the coaches in a safe and secure condition. Defendant failed to comply with his promise and plaintiff Winterbottom, a mail coach driver, was seriously injured when a vehicle broke down due to lack of repair.]

LORD ABINGER, C.B. I am clearly of opinion that the defendant is entitled to our judgment. We ought not to permit a doubt to rest upon this subject, for our doing so might be the means of letting in upon us an infinity of actions. ***There is no privity of contract between these parties; and if the plaintiff can sue, every passenger, or even any person passing along the road, who was injured by the upsetting of the coach, might bring a similar action. Unless we confine the operation of such contracts as this to the parties who entered into them, the most absurd and outrageous consequences, to which I can see no limit, would ensue. Where a party becomes responsible to the public, by undertaking a public duty, he is liable, though the injury may have arisen from the negligence of his servant or agent. So, in cases of public nuisances, whether the act was done by the party as a servant, or in any other capacity, you are liable to an action at the suit of any person who suffers. Those, however, are cases where the real ground of the liability is the public duty, or the commission of the public nuisance. There is also a class of cases in which the law permits a contract to be turned into a tort; but unless there has been

some public duty undertaken, or public nuisance committed, they are all cases in which an action might have been maintained upon the contract. Thus, a carrier may be sued either in assumpsit or case; but there is no instance in which a party, who was not privy to the contract entered into with him, can maintain any such action. The plaintiff in this case could not have brought an action on the contract; if he could have done so, what would have been his situation, supposing the Postmaster-General had released the defendant? That would, at all events, have defeated his claim altogether. By permitting this action, we should be working this injustice, that after the defendant had done everything to the satisfaction of his employer, and after all matters between them had been adjusted, and all accounts settled on the footing of their contract, we should subject them to be ripped open by this action of tort being brought against him.

ALDERSON, B. I am of the same opinion. The contract in this case was made with the Postmaster-General alone; and the case is just the same as if he had come to the defendant and ordered a carriage, and handed it at once over to Atkinson. If we were to hold that the plaintiff could sue in such a case, there is no point at which such actions would stop. The only safe rule is to confine the right to recover to those who enter into the contract: if we go one step beyond that, there is no reason why we should not go fifty. The only real argument in favour of the action is, that this is a case of hardship; but that might have been obviated, if the plaintiff had made himself a party to the contract. ***

[Caption: Lord Abinger.]

ROLFE, B. The breach of the defendant's duty stated in this declaration, is his omission to keep the carriage in a safe condition, and when we examine the mode in which that duty is alleged to have arisen, we find a statement that the defendant took upon himself, to wit, under and by virtue of the said contract, the sole and exclusive duty, charge, care, and burden of the repairs, state and condition of the said mail-coach, and, during all the time aforesaid, it had become and was the sole and exclusive duty of the defendant, to wit, under and by virtue of his said contract, to keep and maintain the said mail-coach in a fit, proper, safe, and secure state and condition. The duty, therefore, is shewn to have arisen solely from the contract; and the fallacy consists in the use of that word "duty." If a duty to the Postmaster-General be meant, that is true; but if a duty to the plaintiff be intended (and in that sense the word is evidently used), there was none. This is one of those unfortunate cases in which there certainly has been damnum, but it is damnum absque injuria; it is, no doubt, a hardship upon the plaintiff to be without a remedy, but by that consideration we ought not to be influenced. Hard cases, it has been frequently observed, are apt to introduce bad law.

Judgment for the defendant.

NOTES AND QUESTIONS

1. Although the principal case involved nonfeasance, it was universally interpreted as applying to any negligence of the defendant, including misfeasance; and this resulted in many decisions holding that the seller of a chattel was under no liability, in contract or in tort, to anyone other than his immediate buyer. The

first major service rendered by Professor Bohlen, who was selected by the ALI as the Reporter on the Restatement (First) of Torts (and was a preeminent American cricketer of his day), to the law was to point out this error in his article, The Basis of Affirmative Obligations in the Law of Tort, 44 Am.L.Reg., N.S., 209, 280- 285, 289-310 (1905). Indicating the slow absorption of the idea, this same point is made by Stapleton, Duty of Care and Economic Loss: A Wider Agenda, 107 L.Q.Rev. 249, 250 (1991).

MacPherson v. Buick Motor Co.

Court of Appeals of New York, 1916.

217 N.Y. 382, 111 N.E. 1050.

Action by Donald C. MacPherson against the Buick Motor Company. From a judgment of the Appellate Division (160 App. Div. 55, 145 N.Y. Supp. 462), affirming a judgment of the Supreme Court for plaintiff, defendant appeals.

CARDOZO, J. The defendant is a manufacturer of automobiles. It sold an automobile to a retail dealer. The retail dealer resold to the plaintiff. While the plaintiff was in the car it suddenly collapsed. He was thrown out and injured. One of the wheels was made of defective wood, and its spokes crumbled into fragments. The wheel was not made by the

461

defendant; it was bought from another manufacturer. There is evidence, however, that its defects could have been discovered by reasonable inspection, and that inspection was omitted. There is no claim that the defendant knew of the defect and willfully concealed it.

***The charge is one, not of fraud, but of negligence. The question to be determined is whether the defendant owed a duty of care and vigilance to any one but the immediate purchaser.

[The court discusses competing lines of precedents. One group of cases suggested that the manufacturer owed a duty of care to ultimate purchasers only when the product was "inherently dangerous." Some courts confined this classification to guns, poisons or other products whose normal function it was to injure or destroy. Other decisions suggested that a manufacturer would breach a duty of care to a foreseeable user of the product if the product was likely to cause injury if negligently made.]

[Caption: Judge Cardozo.]

462

We hold ***that ***[i]f the nature of a thing is such that it is reasonably certain to place life and limb in peril when negligently made, it is then a thing of danger. Its nature gives warning of the consequences to be expected. If to the element of danger there is added knowledge that the thing will be used by persons other than the purchaser, and used without new tests, then, irrespective of contract, the manufacturer of this thing of danger is under a duty to make it carefully. That is as far as we are required to go for the decision of this case. There must be knowledge of a danger, not merely possible, but probable. It is possible to use almost anything in a way that will make it dangerous if defective. That is not enough to charge the manufacturer with a duty independent of his contract. Whether a given thing is dangerous may be sometimes a question for the court and sometimes a question for the jury. There must also

be knowledge that in the usual course of events the danger will be shared by others than the buyer. Such knowledge may often be inferred from the nature of the transaction. But it is possible that even knowledge of the danger and of the use will not always be enough. The proximity or remoteness of the relation is a factor to be considered. We are dealing now with the liability of the manufacturer of the finished product, who puts it on the market to be used without inspection by his customers. If he is negligent, where danger is to be foreseen, a liability will follow. ***We have put aside the notion that the duty to safeguard life and limb, when the consequences of negligence may be foreseen, grows out of contract and nothing else. We have put the source of the obligation where it ought to be. We have put its source in the law.

There is nothing anomalous in a rule which imposes upon A., who has contracted with B., a duty to C. and D. and others according as he knows or does not know that the subject-matter of the contract is intended for their use. We may find an analogy in the law which measures the liability of landlords. If A. leases to B. a tumbledown house, he is not liable, in the absence of fraud, to B.'s guests who enter it and are injured. This is because B. is then under the duty to repair it, the lessor has the right to suppose that he will fulfill that duty, and, if he omits to do so, his guests must look to him. Bohlen, Affirmative Obligations in the Law of Torts, 44 Am. Law Reg., N.S., 341. But if A. leases a building to be used by the lessee at once as a place of public entertainment, the rule is different. There injury to persons other than the lessee is to be foreseen, and foresight of the consequences involves the creation of a duty. [C]

In this view of the defendant's liability there is nothing inconsistent with the theory of liability on which the case was tried. It is true that the court told the jury that "an automobile is not an inherently dangerous vehicle." The meaning, however, is that danger is not to be expected when the vehicle is well constructed. The court left it to the jury to say whether the defendant ought to have foreseen that the car, if negligently constructed, would become "imminently dangerous." Subtle distinctions

463

are drawn by the defendant between things inherently dangerous and things imminently dangerous, but the case does not turn upon these verbal niceties. If danger was to be expected as reasonably certain, there was a duty of vigilance, and this whether you call the danger inherent or imminent. In varying forms that thought was put before the jury. We do not say that the court would not have been justified in ruling as a matter of law that the car was a dangerous thing. If there was any error, it was none of which the defendant can complain.

We think the defendant was not absolved from a duty of inspection because it bought the wheels from a reputable manufacturer. It was not merely a dealer in automobiles. It was responsible for the finished product. It was not at liberty to put the finished product on the market without subjecting the component parts to ordinary and simple tests. [C] Under the charge of the trial judge nothing more was required of it. The obligation to inspect must vary with the nature of the thing to be inspected. The more probable the danger the greater the need of caution. ***

The judgment should be affirmed with costs.

[The dissenting opinion of WILLARD BARTLETT, C.J., is omitted.]

NOTES AND QUESTIONS

1. The privity limitation lasted longer with regard to those who perform services. It is clear today, however, that an individual who undertakes to make a repair owes a duty to use care to those who may be foreseeably injured in case the repair is negligently made. See Kalinowski v. Truck Equipment Company, 237 App. Div. 472, 261 N.Y.S. 657 (1933) (failure properly to repair broken axle on a truck, defendant repair company liable to those he should expect to be in the vicinity of the vehicle); Nagy v. McEachern, 28 Mich.App. 439, 184 N.W.2d 556 (1970) (failure adequately to repair safety catch on rifle).

2. Liability for physical injury arising out of a failure to repair turns on whether the contractor gave an undertaking. In Wroblewski v. Otis Elevator Co., 9 A.D.2d 294, 193 N.Y.S.2d 855 (3d Dept. 1959), a repairer inspected an elevator and assured plaintiff that it was in working order. If the repairer had done nothing at all, the case might have been deemed one of nonfeasance and the privity limitation might have applied. In Levine v. Sears Roebuck & Co., 200 F.Supp. 2d 180 (E.D.N.Y. 2002), plaintiff was injured when she tripped over a dishwasher door hanging open below its normal position. A maintenance agreement between plaintiff and defendant was insufficient to support liability in the absence of an assurance or misrepresentation by defendant.

When there is an assurance to an owner that a repair has been made even though nothing has in fact been done, many modern

courts have found misfeasance and thus a breach of duty even to third parties. See, for example, Moody v. Martin Motor Co., 76 Ga.App. 456, 46 S.E.2d 197 (1948) (finding that the defendant owed a duty of care to plaintiff employee, where

464

defendant falsely assured plaintiff's employer that it had repaired the vehicle whose unsafe condition allegedly caused plaintiffs injury).

3. If defendant commences performance and then omits to complete performance, he has committed misfeasance just as if he had performed negligently and will likely be liable. For example: Smith v. State, 921 P.2d 632 (Alaska 1996) (finding that defendant assumed a duty by attempting to repair fluoride problem in water supply and would be liable for plaintiffs injuries from fluoride poisoning if defendant either failed to address fluoride problem or was negligent in addressing fluoride problem). For other recent cases illustrating principle, of a duty based on an undertaking see Restatement (Third) of Torts: Liability for Physical and Emotional Harm, § 42 comment c, reporter's note.

4. A physician prescribes a drug to a patient without warning her of its soporific effect. The patient takes the drug, falls asleep at the wheel of her automobile, and thereby injures a third party. Is the physician liable to the third party? Joy v. Eastern Maine Medical Center, 529 A.2d 1364 (Me.1987) (duty of care); Kirk v. Michael Reese Hospital & Medical Center, 117 III.2d 507, 513 N.E.2d 387, 111 III.Dec. 944 (1987) (no duty of care); McKenzie v. Hawai'i Permanente Med. Group, Inc., 98 Hawaii 296, 47 P.3d 1209 (2002) (physician owes a duty to non-patient third parties to warn patient

about treatment's effect on driving ability, where the circumstances are such that the reasonable patient could not have been expected to be aware of the risk without the physician's warning); Wilschinsky v. Medina, 108 N.M. 511, 775 P.2d 713 (1989) (physicians owe a duty to persons injured by patients driving automobiles from a doctor's office when the patient has just been injected with drugs known to affect judgment and driving ability).

H.R. Moch Co. v. Rensselaer Water Co.

Court of Appeals of New York, 1928.

247 N.Y. 160, 159 N.E. 896.

CARDOZO, C.J. The defendant, a waterworks company under the laws of this state, made a contract with the city of Rensselaer for the supply of water during a term of years. Water was to be furnished to the city for sewer flushing and street sprinkling; for service to schools and public buildings; and for service at fire hydrants, the latter service at the rate of $42.50 a year for each hydrant. Water was to be furnished to private takers within the city at their homes and factories and other industries at reasonable rates, not exceeding a stated schedule. While this contract was in force a building caught fire. The flames, spreading to the plaintiffs warehouse near by, destroyed it and its contents. The defendant, according to the complaint, was promptly notified of the fire, "but omitted and neglected after such notice, to supply or furnish sufficient or adequate quantity of water, with adequate pressure to stay, suppress, or extinguish the fire before it reached the warehouse of

the plaintiff, although the pressure and supply which the defendant was equipped to supply and furnish, and had agreed by said contract to supply and furnish, was adequate and sufficient to prevent the spread of the fire to

465

and the destruction of the plaintiffs warehouse and its contents." By reason of the failure of the defendant "to fulfill the provisions of the contract between it and the city of Rensselaer," the plaintiff is said to have suffered damage, for which judgment is demanded. A motion, in the nature of a demurrer, to dismiss the complaint, was denied at Special Term. The Appellate Division reversed by a divided court. ***

We think the action is not maintainable as one for a common-law tort. ***

If conduct has gone forward to such a stage that inaction would commonly result, not negatively merely in withholding a benefit, but positively or actively in working an injury, there exists a relation out of which arises a duty to go forward. [C] So the surgeon who operates without pay is liable, though his negligence is the omission to sterilize his instruments ***; the engineer though his fault is in the failure to shut off steam ***; the maker of automobiles, at the suit of some one other than the buyer, though his negligence is merely in inadequate inspection [c]. The query always is whether the putative wrongdoer has advanced to such a point as to have launched a force or instrument of harm, or has stopped where inaction is at most a refusal to become an instrument for good. ***

The plaintiff would have us hold that the defendant, when once it entered upon the performance of its contract with the city, was

brought into such a relation with every one who might potentially be benefited through the supply of water at the hydrants as to give to negligent performance, without reasonable notice of a refusal to continue, the quality of a tort. ***We are satisfied that liability would be unduly and indeed indefinitely extended by this enlargement of the zone of duty. The dealer in coal who is to supply fuel for a shop must then answer to the customers if fuel is lacking. The manufacturer of goods, who enters upon the performance of his contract must answer, in that view, not only to the buyer, but to those who to his knowledge are looking to the buyer for their own sources of supply. Every one making a promise having the quality of a contract will be under a duty to the promisee by virtue of that promise, but under another duty, apart from contract, to an indefinite number of potential beneficiaries when performance has begun. The assumption of one relation would mean the involuntary assumption of a series of new relations, inescapably hooked together. Again we may say in the words of the Supreme Court of the United States, "The law does not spread its protection so far." Robins Dry Dock & Repair Co. v. Flint, 275 U.S. 303. * *

We think the action is not maintainable as one for the breach of a statutory duty. ***

The judgment should be affirmed, with costs.

466

NOTES AND QUESTIONS

1. What if the city's own property were destroyed by fire because of lack of sufficient water pressure? Town of Ukiah v. Ukiah Water &

Improvement Co., 142 Cal. 173, 75 P. 773 (1904); Inhabitants of Milford v. Bangor Ry. & Elec. Co., 106 Me. 316, 76 A. 696 (1909).

2. The rule from the principal case was applied in a case involving an accident caused by the New York City blackout of 1977 in which the court held that the power company owed no duty of care to the plaintiff, a tenant in a building who fell down a dark stairway during the power outage. Strauss v. Belle Realty Co., 65 N.Y.2d 399, 482 N.E.2d 34, 492 N.Y.S.2d 555 (1985); see also Goldstein v. Consolidated Edison Co. of New York, 115 A.D.2d 34, 499 N.Y.S.2d 47 (1st Dep't 1986) (same); but see Hall v. Consolidated Edison Corp., 104 Mise.2d 565, 428 N.Y.S.2d 837 (N.Y. Sup. Ct. 1980) (liability where plaintiff fell in the darkened hallway after defendant cut off power without notice).

3. The principal case represents the majority rule. However, some courts have allowed recovery. See Harlan Water Co. v. Carter, 220 Ky. 493, 295 S.W. 426 (1927) (reasoning that plaintiff was a third-party beneficiary of the contract with the city); Fisher v. Greensboro Water-Supply Co., 128 N.C. 375, 38, S.E. 912 (1901) (reasoning that the defendant breached a duty undertaken); Mugge v. Tampa Waterworks Co., 52 Fla. 371, 42 So. 81 (1906) (same); Doyle v. South Pittsburgh Water Co., 414 Pa. 199, 199 A.2d 875 (1964) (reasoning that defendant had entered on performance).

4. If defective water is in fact supplied under a contract with the city, the defendant may be liable to an individual for resulting injury, such as typhoid fever. Hayes v. Torrington Water Co., 88 Conn. 609, 92 A. 406 (1914) ("The duty which a water company owes to the public and to its customers is that of exercising reasonable care and

diligence in providing an adequate supply of wholesome water at all times"). See also Horton v. North Attleboro, 302 Mass. 137, 19 N.E.2d 15 (1939) (lead poisoning of water supply).

5. There is much the same difference of opinion on the failure of a telephone company to render service under a contract with a private individual, as a result of which a third party is injured. See, for example, Mentzer v. New England Tel. & Tel. Co., 276 Mass. 478, 177 N.E. 549 (1931) (no liability); Adams v. Carolina Tel. & Tel. Co., 59 N.C.App. 687, 297 S.E.2d 785 (1982) (liability). The same reasoning has been applied to fire alarm companies in denying liability to third parties injured by negligent operation of the system, Edwards v. Honeywell, 50 F.3d 484 (7th Cir. 1995) (applying Indiana law), fireman killed when dispatcher negligently delayed in sending fire department to the call.

Clagett v. Dacy

Court of Special Appeals of Maryland, 1980.

47 Md.App. 23, 420 A.2d 1285.

WILNER, JUDGE. Appellants were the high bidders at a foreclosure sale, but because the attorneys conducting the sale failed to follow the proper

procedures, the sale was set aside. This occurred twice. Ultimately, the debtor discharged the loan, thus "redeeming" his land, and appellants lost the opportunity to acquire the property and make a profit on its resale. They sued the attorneys in the Circuit Court for Prince George's County to recover their loss, alleging that the

attorneys in question owed them, as bidders, a duty to use care and diligence and to conduct the sale "properly and carefully." By sustaining the attorneys' demurrer without leave to amend, the court concluded that no such duty existed--at least not one from which an action for damages will arise; and, by affirming that order, we shall indicate our concurrence with the court's conclusion.

Although [Prescott v. Coppage, 266 Md. 562, 296 A.2d 150 (1972)] has a most unusual factual setting, it does seem to suggest a modest relaxation of the strict privity requirement to the extent of allowing a true third party beneficiary to sue an attorney as he could sue any other defaulting or tortious party to a contract made for his benefit. This extension is not unique to Maryland. [C]

It is, however, a limited one with a special utility. It is most often seen and applied in actions based on drafting errors in wills and other such documents or on erroneous title reports--errors that, by their very nature, will likely have a long or delayed effect and will most probably impact upon persons other than the attorney's immediate employer, [cc] although it has been applied in other contexts as well. See Donald v. Garry, 19 Cal.App.3d 769, 97 Cal.Rptr. 191 (1971) (creditor who assigned claim to collection agency for collection allowed to sue agency's attorney for negligence in prosecuting his claim).

The Coppage Court made clear that only those persons who qualify under the normal rules for determining third party beneficiaries will be afforded the privileged status vis a vis attorney defendants; i.e., creditor beneficiaries. [Cc] This would seem to limit the extension to actions based upon contract, to which the third party beneficiary

theory is peculiarly applicable, and would not supply a basis for permitting third parties to sue attorneys on a pure negligence theory--violation of some general duty arising in the absence of an underlying contractual attorney-client relationship.

In Donald v. Garry, supra, the California court utilized the concept expressed in Restatement (Second) of Torts § 324A (1979), to support a third party action, concluding that "[a]n attorney may be liable for damage caused by his negligence to a person intended to be benefited by his performance irrespective of any lack of privity of contract between the attorney and the party to be benefited." (Emphasis supplied.) The context of this, as noted above, was an action by the true creditor against the collection agency attorney, and the court was careful to mention that "the transaction in which the respondent's negligence occurred was intended primarily for the benefit of [the creditor]. Respondent was retained to collect an account due him."

468

It will, moreover, take more than general conclusory allegations to satisfy that requirement. Attorneys are not quite the free agents as some others are in the world of commerce. There are well-recognized limitations, judicially imposed and enforced, upon how they may conduct themselves, and who they may, and may not, represent in certain situations. Except in very limited circumstances, they may not represent or act for conflicting interests in a transaction; their manifest duty of loyalty to their employer/client forbids it. See, for example, Code of Professional Responsibility, Canon 5, EC5-14, 5-15, 5-16, 5-19, 5-22; DR5-105.

These limitations, predominant but not necessarily exclusive with attorneys, must, of necessity, be taken into account when dealing with actions founded upon an implied duty owed by an attorney to a person who is not his direct employer/client, or upon an employment relationship alleged to arise by implication rather than by express agreement. Thus, the duties or obligations inherent in an attorney-client relationship will not be presumed to flow to a third party and will not be presumed to arise by implication when the effect of such a presumption would be tantamount to a prohibited or improbable employment, absent the clearest exposition of facts from which such an employment may be fairly and rationally inferred.

When judged against these principles, it becomes clear that the Declaration at issue here has failed to state a cause of action. It does not sufficiently allege a proper standing on the part of appellants to sue the appellee attorneys; nor, from what is alleged, could it do so. Appellees were engaged to represent the mortgagee (deed of trust beneficiary), not the bidders, whose interest would likely be in conflict with that of the mortgagee. The mortgagee's economic interest, and legal obligation, is to secure the highest possible price for the property, whereas the bidders' goal is to pay as little as possible. It is evident, in that circumstance, that an attorney could not lawfully represent both the mortgagee and the bidder in the transaction; and it will not be lightly presumed or inferred that appellees did so.

Nor may the prohibited employment be inferred from an allegation that appellees' fees would ultimately be paid from the proceeds of sale. The mere fact that those fees, along with the other costs of the proceeding, may be taken from the purchase price paid by the

successful bidder does not mean that the purchaser is actually paying the fees. Quite the contrary. The debtor/mortgagor ultimately pays the fees and all other costs, for he gets only the net surplus (if any) available after all such fees and costs are discharged. The bidder pays only for the property, not the cost of selling it; and he is not, therefore, the client (express or implied) of the attorney engaged to sell the property.

Judgment affirmed; appellants to pay the costs.

469

NOTES AND QUESTIONS

1. One place in which the privity limitation is still significant is the area of professional relationships.

2. Attorneys. As the principal case reflects, the privity limitation on the scope of duty has also been utilized by attorneys when they have committed an act of professional negligence. In many jurisdictions the privity limitation is still strictly applied.

3. The first major inroad on the privity rule as applied to attorneys occurred in California in Biakanja v. Irving, 49 Cal.2d 647, 320 P.2d 16 (1958) (finding exception to the privity requirement along the lines of the principal case); cf. Brammer v. Taylor, 175 W.Va. 728, 338 S.E.2d 207 (1985). In Lucas v. Hamm, 56 Cal.2d 583, 364 P.2d 685, 15 Cal.Rptr. 821 (1961), cert, denied, 368 U.S. 987 (1962), the court indicated that the new rule would be applied to an actual attorney; however, the court found that the defendant was not negligent in drafting a will provision that ran afoul of the rule against perpetuities.

Connecticut followed this lead in Licata v. Spector, 26 Conn.Supp. 378, 225 A.2d 28 (1966). New York disagreed; see Victor v. Goldman, 74 Mise.2d 685, 344 N.Y.S.2d 672 (1973), aff'd, 43 A.D.2d 1021, 351 N.Y.S.2d 956 (1974).

4. Cases in which attorneys have been held liable to third parties generally have involved beneficiaries of wills. See Heyer v. Flaig, 70 Cal.2d 223, 449 P.2d 161, 74 Cal.Rptr. 225 (1969), where an attorney neglected to advise his client that her pending marriage would affect her intent to have all of her property flow to her daughters. But, whenever an attorney's work product is primarily for the benefit of a third party, potential liability can arise. See Donald v. Garry, 19 Cal.App.3d 769, 97 Cal.Rptr. 191 (1971) (attorney hired by collection agency liable to individual creditor). Vereins- Und Westbank v. Carter, 691 F.Supp. 704 (S.D.N.Y.1988) (attorney's opinion letter, written at client's request but with plaintiffs reliance in mind). Should it matter that a testator's attorney intentionally drafted a will in such a way that a testamentary beneficiary failed to receive what the testator intended to leave her? See Kirgan v. Parks, 60 Md.App. 1, 478 A.2d 713 (1984).

5. Although the "rule" is long established in California, the courts struggle with its application in specific cases. For example, should an attorney be liable to an apparently intended beneficiary charitable organization when his client gave him an incorrect name of the group and this voided that provision of the will? See Ventura County Humane Society v. Holloway, 40 Cal.App.3d 897, 115 Cal.Rptr. 464 (1974). See also Roberts v. Ball, Hunt, Hart, Brown and Baerwitz, 57 Cal.App.3d 104, 128 Cal.Rptr. 901 (1976); and Goodman v. Kennedy, 18 Cal.3d 335, 556 P.2d 737, 134 Cal.Rptr. 375 (1976),

both holding for the defendant. For discussion see Partlett, Professional Negligence (1985) pages 78-85. Liability in these cases generally does not depend upon the plaintiffs reasonable reliance. The issue is hotly debated elsewhere. See White v. Jones, [1995] 2 A.C. 207 (H.L.) and Cooper v. Hobart, [2001] 3 S.C.R. 537 (both finding a duty of care).

470

2. Failure to Act

Compare the following two cases. Both ask whether universities have a duty to protect their students, but in distinctly different contexts. How do the decisions comport with one another? Do you agree with the outcomes?

Commonwealth v. Peterson

Supreme Court of Virginia, 2013.

286 Va. 349, 749 S.E.2d 307.

OPINION BY Justice Cleo E. Powell.

This appeal arises out of wrongful death suits filed against the Commonwealth by the administrators (hereinafter "Administrators") of the estates of Erin Nicole Peterson and Julia Kathleen Pryde, two murder victims of the tragic 2007 mass shooting at Virginia Polytechnic Institute and State University (hereinafter "Virginia Tech"). [C] In this case, we hold that even if there was a special relationship between the Commonwealth and students of Virginia Tech, under the facts of this case, there was no duty for the Commonwealth to warn students about the potential for criminal acts

by third parties. Therefore, we will reverse the judgment of the circuit court.

I. FACTS AND PROCEEDINGS

On the morning of April 16, 2007, at approximately 7:30 a.m., the Virginia Tech Police Department received a call that an incident had occurred in the West Ambler Johnston Hall dormitory but the specifics of what had happened were unknown. When officers arrived they found two gunshot victims: a female and a male clad in only his boxer shorts. Although officers from the Virginia Tech Police Department were the first on the scene, the Blacksburg Police Department led the investigation. At least one member of the Virginia State Police also joined the investigation. During the investigation, police came to believe that they were investigating a domestic homicide because there were no signs of forced entry or a robbery. They believed that a "targeted shooting" had occurred because the shooting was in a "less conspicuous area... kind of hidden in the back" [2] making it "easier for the suspect to get in and get out without being noticed." Police believed that this was an isolated incident that posed no danger to others and that the shooter had fled the area. They did not believe that a campus lockdown was necessary.

* * *

[2] The officers described the area as being one that you would not even know was there if you did not live there.

At the crime scene, police observed a bloody footprint and were determined to locate the source of the print. Police also learned that the female's boyfriend was a gun enthusiast.

Once the female's boyfriend was identified as a person of interest, a "Be On The Lookout" ("BOLO") went out for him. The police located the

471

boyfriend at approximately 9:45 a.m. Officers described him as appearing "[s]hocked" and "[s]cared." The boyfriend told the police that he was en route to Virginia Tech from Radford University where he attended school because, while he was in his 9 a.m. class, he heard from a friend who attended Virginia Tech who told him what had happened. He explained that he had dropped his girlfriend off that morning around 7 a.m. and then headed to Radford University for his 8 a.m. class. The boyfriend consented to a search of his vehicle and shoes. He also allowed the police to conduct a gunshot residue test. As police spoke with the boyfriend, they received word that there were "active shots" in Norris Hall. Officers quickly took the boyfriend's contact information, told him that they would be in touch, and left for the Virginia Tech campus.

Police subsequently executed a search warrant of the home of the boyfriend of the female victim found in West Ambler Johnston Hall. They found nothing.

Charles W. Steger, the President of Virginia Tech, testified that he learned of "a shooting" at approximately 8 a.m. and he called a meeting of a group of administrators tasked with campus safety, called the University Policy Group (hereinafter "Policy Group"), to assess the situation and handle the release of information pertaining thereto. Shortly after 8 a.m., President Steger spoke with Wendell Flinchum, the Chief of the Virginia Tech Police Department, and

learned that a female and a male student had been shot, at least one of whom was dead, that the shootings appeared targeted, likely domestic in nature, and that the shooter had likely left the campus. The Policy Group convened around 8:30 a.m. During this meeting, Steger learned that the police were on the lookout for the female victim's boyfriend as a person of interest. ***[A notice to the Governor's office stated a "gunman was on the loose"]. Steger instructed a Policy Group member to compose a campus notice, and following revisions and a technical difficulty with the computer system, it was sent out by campus-wide "blast e-mail" at 9:26 a.m. The notice stated that "[a] shooting incident occurred at West Ambler Johnston [Hall] earlier this morning. Police are on the scene and investigating" and advised students to be alert for anything suspicious. ***

At approximately 9:45 a.m. the mass shooting at Norris Hall began. At 9:50 a.m. a second campus-wide "blast e-mail" was sent stating that "[a] gunman is loose on campus. Stay in buildings until further notice. Stay away from all windows." Erin Peterson, 18, and Julia Pryde, 23, were among the victims murdered in Norris Hall. Police later identified Seung-Hui Cho as the shooter.

***The day after the shootings, police learned that the gun used to murder the two people in West Ambler Johnston Hall matched the one Cho used in Norris Hall. Police later found bloody clothing belonging to Cho that had the DNA from one of the victims of the West Ambler Johnston Hall shooting on it.

The Administrators filed wrongful death claims in Montgomery County Circuit Court against Cho's estate, the Commonwealth and eighteen other individuals, including Steger. ***[The cases were consolidated and several motions resulted in the Commonwealth being named as the only defendant]. The Administrators claimed that the Commonwealth was liable for the actions of the Commonwealth's employees at the university pursuant to the Virginia Tort Claims Act ("VTCA") [C], They alleged that a special relationship existed between the Commonwealth's employees at Virginia Tech and Peterson and Pryde that gave rise to the Commonwealth's duty to warn Peterson and Pryde of third party criminal acts and that the Commonwealth's failure to warn them was the proximate cause of their deaths and the Administrators' losses. The Commonwealth argued that there was no foreseeable harm to the students and that the evidence failed to establish that any alleged breach of a duty of care was the proximate cause of the deaths. ***The jury returned a verdict in favor of the Administrators awarding $4 million to each family. Upon the Commonwealth's motion, the court reduced each verdict to $100,000 in accordance with the VTCA, [C] ***This appeal follows.

II. ANALYSIS

On appeal, the Commonwealth argues that

1. The circuit court erred in finding that the Commonwealth, Virginia Tech, and/or their employees had a special relationship with Peterson and Pryde that imposed a duty, and therefore, erred in instructing the jury that there was such a duty, in submitting the case to the jury and in entering judgment on the jury's verdict.

2. Even assuming that the Commonwealth, Virginia Tech or their employees had a relevant special relationship under Virginia law, the evidence adduced did not give rise to a duty to warn of third party criminal acts, and therefore, the circuit court erred in submitting the case to the jury and in entering judgment on the jury's verdict.

***

We hold that the facts in this case do not give rise to a duty for the Commonwealth to warn students of the potential for third party criminal acts. ***

As a general rule, a person does not have a duty to warn or protect another from the criminal acts of a third person. [C] "This is particularly so when the third person commits acts of assaultive criminal behavior because such acts cannot reasonably be foreseen." [C] However, the general rule does not apply in all situations. " 'There are narrow exceptions to this rule,' but the application of those exceptions 'is always fact specific and, thus, not amenable to a bright-line rule for resolution.'" Taboada v. Daly Seven, Inc., 271 Va. 313, 322-23, 626 S.E.2d 428, 432 (2006) [C]. Before an exception comes into play, the facts must establish the existence of a special relationship.

473

" '[W]hether a legal duty in tort exists is a pure question of law'" to be reviewed de novo. [Cc], To prevail, the plaintiff must establish that there is a special relationship, either between the plaintiff and the defendant or between the third party criminal actor and the defendant. The necessary special relationship may be one that has been recognized as a matter of law... or it may arise from the factual

circumstances of a particular case. [C] For the purposes of this opinion, we will assume without deciding that the threshold requirement that such a special relationship exists is satisfied on these facts.

Having assumed without deciding that a special relationship exists, the question becomes whether, as a matter of law, under the facts and circumstances of this case, the Commonwealth had a duty to warn students about the potential for third party criminal acts. "The law determines the duty, and the jury, upon the evidence, determines whether the duty has been performed." [C]

A review of our prior cases indicates that in order for a duty to be imposed upon a defendant, the degree of the foreseeability of harm that the plaintiff must establish depends on the nature of the special relationship. We have recognized two levels of foreseeable harm: known or reasonably foreseeable harm, Taboada, 271 Va. at 325-26, and "imminent probability of harm," the heightened degree of foreseeability that arises where the defendant "knows that criminal assaults against persons are occurring, or are about to occur, on the premises," based upon "notice of a specific danger just prior to the assault." [C]. Certain special relationships such as that of a common carrier/passenger, innkeeper/guest, and employer/employee impose a duty to warn when the danger of third party criminal acts is known or reasonably foreseeable. [Cc]

In instances, however, where the special relationship was that of business owner/invitee or landlord/tenant, we have imposed a duty to warn of third party criminal acts only where there was "an imminent probability of injury" from a third party criminal act. [C],

Thus, the duty to warn of danger from third party criminal acts has remained an exception to the general rule. [C]

Where the standard was that the duty to warn or protect was present when there was "an imminent probability of injury" from a third party criminal act, this Court has held that the duty to warn existed, as a matter of law, in the unusual situation where an on-duty police officer failed to intervene when he responded to the scene of a motor vehicle accident and observed one driver attack a bystander who had stopped to render assistance. [C]

More frequently, however, this Court has concluded that facts relied upon in particular cases fail to establish a duty, as a matter of law, to protect against third party criminal acts. [Cc],

474

In cases where it was alleged that a special relationship gave rise to the duty to warn because the danger of harm from third party criminal acts was known or reasonably foreseeable, this Court has similarly, frequently concluded that the duty to warn was not present as a matter of law. See A.H., 255 Va. at 221-22, 495 S.E.2d at 486 (stating that an employer has no duty to protect an employee from third party criminal acts unless the danger is "known or reasonably foreseeable" as a matter of law and concluding that knowledge of similar assaults in the preceding five years was not sufficient); Connell, 93 Va. at 58, 24 S.E. at 469 (common carrier "cannot be deemed to have anticipated nor be expected to guard and protect [a passenger] against a crime so horrid, and happily so rare, as that of murder.").

In only rare circumstances has this Court determined that the duty to protect against harm from third party criminal acts exists. See Taboada, 271 Va. at 325-26 (concluding that, like a common carrier, an innkeeper has a "duty of utmost care and diligence" to protect guests from third party criminal acts where the danger is known or reasonably foreseeable, and holding that where--over a three year period immediately prior to the attack--hotel employees had called police 96 times to report criminal conduct including robberies, malicious woundings, shootings, and other criminally assaultive acts, the hotel knew of the danger and had received a warning from police that "guests were at a specific imminent risk of harm," these were sufficient averments to survive a demurrer and, if proven, to establish the duty as a matter of law).

Here, even if this Court were to apply the less stringent standard of "know or have reasonably foreseen," there simply are not sufficient facts from which this Court could conclude that the duty to protect students against third party criminal acts arose as a matter of law. In this case, the Commonwealth knew that there had been a shooting in a dormitory in which one student was critically wounded and one was murdered. The Commonwealth also knew that the shooter had not been apprehended. At that time, the Commonwealth did not know who the shooter was, as law enforcement was in the early stages of its investigation of the crime. However, based on representations from three different police departments, Virginia Tech officials believed that the shooting was a domestic incident and that the shooter may have been the boyfriend of one of the victims. Most importantly, based on the information available at that time, the defendants believed that the shooter had fled the area and posed no

danger to others. This is markedly different from the situation presented in Taboada, 271 Va. at 325-26, where police had specifically warned the innkeepers that guests were at risk prior to the time that the plaintiff in that case was shot by a trespasser. Based on the limited information available to the Commonwealth prior to the shootings in Norris Hall, it cannot be said that it was known or reasonably foreseeable that students in Norris Hall would fall victim to

475

criminal harm. Thus, as a matter of law, the Commonwealth did not have a duty to protect students against third party criminal acts.

III. CONCLUSION

Assuming without deciding that a special relationship existed between the Commonwealth and Virginia Tech students, based on the specific facts of this case, as a matter of law, no duty to warn students of harm by a third party criminal arose. Thus, we will reverse the trial court's judgment holding that a duty arose and enter final judgment in favor of the Commonwealth.

Reversed and final judgment.

Hegel v. Langsam

Court of Common Pleas of Ohio, 1971.

29 Ohio Mise. 147, 55 Ohio Ops.2d 476, 273 N.E.2d 351.

BETTMAN, Judge. This matter is before the Court on defendant's motion for judgment on the pleadings. The gravamen of plaintiffs position is that the defendants permitted the minor plaintiff, a

seventeen year old female student from Chicago, Illinois, enrolled at the University [of Cincinnati], to become associated with criminals, to be seduced, to become a drug user and further allowed her to be absent from her dormitory and failed to return her to her parents' custody on demand.

In our opinion plaintiffs completely misconstrue the duties and functions of a university. A university is an institution for the advancement of knowledge and learning. It is neither a nursery school, a boarding school nor a prison. No one is required to attend. Persons who meet the required qualifications and who abide by the university's rules and regulations are permitted to attend and must be presumed to have sufficient maturity to conduct their own personal affairs.

We know of no requirement of the law and none has been cited to us placing on a university or its employees any duty to regulate the private lives of their students, to control their comings and goings and to supervise their associations.

We do not believe that O.R.C. 3345.21 requiring a university to maintain "law and order" on campus, nor O.R.C. 2151.41, making it a crime to contribute to the delinquency of a child, have any bearing on the fact situation before us.

For these reasons we hold that plaintiffs have failed to state a cause of action and defendants' motion for judgment on the pleadings should be granted. ***

NOTES AND QUESTIONS

1. Other cases have cited Hegel in discussing a University's duty with regard to the private activities of its students. See Bradshaw v. Rawlings, 612 F.2d 135 (1979) (holding that duty of protection could not be imposed

476

simply based on college regulation prohibiting alcohol consumption at off- campus college-sponsored events. Not sufficient to place college in custodial relationship with its students); see also Univ, of Denver v. Whitlock, 744 P.2d 54 (1987) (holding that student-university relationship does not create a "special relationship" or a duty for the university to take reasonable measures to protect student from accidental trampoline-related injuries at fraternity houses, notwithstanding affiliations or housing agreements between the fraternity and the university).

2. Compare with Duarte v. State, 84 Cal.App.3d 729, 148 Cal.Rptr. 804 (1978), holding a university liable for rape and murder in a student dormitory. Reconcilable? Is a university liable for injuries sustained by a student athlete engaged in the sport? In Davidson v. Univ, of N. Carolina at Chapel Hill, 142 N.C.App. 544 (2001), the court held that the defendant university owed a duty of care to a cheerleader who sustained injuries during practice. It highlighted the mutually beneficial nature of the parties' relationship. It also discussed the high level of control the university had over its cheerleaders with regard to grades and alcohol consumption, which made reasonable the belief that the university would provide a higher level of protection from injury. How does this fit with the preceding cases?

3. The duty to rescue is much debated. Opinions divide on the common law's presumption against a duty of affirmative action on the basis of its dubious morality, and its adverse behavioral effects. It is unsurprising that with these shifting foundations exceptions to the no-duty rule make up the bulk of the law. These exceptions had grown into an unruly amalgam now helpfully tamed by the Restatement (Third) of Torts: Physical & Emotional Harm, Chapter 7 (2012). The base rule is articulated in § 37: An actor whose conduct has not created a risk of physical harm to another has no duty of care to the other unless a court determines that one of the affirmative duties provided in §§ 38--44 is applicable. Thus § 38 stipulates the role of a statutory obligation to protect another as one foundation for a duty of affirmative action. Under § 39 an actor's conduct may have created the risk conditions whereby an actor has a duty to exercise reasonable care to prevent or minimize harm. The actor's conduct must have increased the chances of the harm. A duty under § 40 is owed where the actor has a special relationship with the injured person. The last two principal cases address aspects of such duties. The duty may be founded on the special relationship between the victim and the defendant. § 41. The next three cases are examples of this principle. Under §§ 42 and 43 the duty can be generated by undertakings and reliance. Under § 44 an actor who acts to take charge of a vulnerable person may owe him a duty.

L.S. Ayres & Co. v. Hicks

Supreme Court of Indiana, 1942.

220 Ind. 86, 40 N.E.2d 334.

[Plaintiff, a boy six years old, accompanied his mother to defendant's department store while she was shopping. Plaintiff fell, and got his fingers caught in defendant's escalator. Defendant unreasonably delayed

477

stopping the escalator, as a result of which plaintiffs injuries were aggravated. Judgment for plaintiff, and a new trial denied. Defendant appeals.]

SHAKE, C.J. [after holding that there was no negligence in the construction of the escalator]. It may be observed, on the outset, that there is no general duty to go to the rescue of a person who is in peril. So, in Hurley v. Eddingfield (1901) [c] it was held that a physician was not liable for failing without any reason to go to the aid of one who was violently ill and who died from want of medical attention which was otherwise unavailable. The effect of this rule was aptly illustrated by Carpenter, C.J., in Buch v. Amory Mfg. Co., 1897, [c], as follows:

"With purely moral obligations the law does not deal. For example, the priest and Levite who passed by on the other side were not, it is supposed, liable at law for the continued suffering of the man who fell among thieves, which they might, and morally ought to have prevented or relieved."

There may be principles of social conduct so universally recognized as to be demanded that they be observed as a legal duty, and the relationship of the parties may impose obligations that would not otherwise exist. Thus, it has been said that, under some circumstances, moral and humanitarian considerations may require

one to render assistance to another who has been injured, even though the injury was not due to negligence on his part and may have been caused by the negligence of the injured person. Failure to render assistance in such a situation may constitute actionable negligence if the injury is aggravated through lack of due care. [C] The case of Depue v. Flatau [c] lends support to this rule. It was there held that one who invited into his house a cattle buyer who called to inspect cattle which were for sale owed him the duty, upon discovering that he had been taken severely ill, not to expose him to danger on a cold winter night by sending him away unattended while he was in a fainting and helpless condition.

After holding that a railroad company was liable for failing to provide medical and surgical assistance to an employee who was injured without its fault but who was rendered helpless, by reason of which the employee's injuries were aggravated, it was said with the subsequent approval of this court, in Tippecanoe Loan, etc., Co. v. Cleveland, etc., R. Co., 1915, [c]:

"In some jurisdictions the doctrine has been extended much further than we are required to do in deciding this case. It has been held to apply to cases where one party has been so injured as to render him helpless by an instrumentality under the control of another, even though no relation of master and servant, or carrier and passenger, existed at the time. It has been said that the mere happening of an accident of this kind creates a relation which gives rise to a legal duty to render such aid to the injured party as may be reasonably necessary to save his life, or to prevent a serious aggravation of his injuries, and that this subsequent

duty does not depend on the negligence of the one party, or the freedom of the other party from contributory negligence, but that it exists irrespective of any legal responsibility for the original injury."

From the above cases it may be deduced that there may be a legal obligation to take positive or affirmative steps to effect the rescue of a person who is helpless or in a situation of peril, when the one proceeded against is a master or invitor, or when the injury resulted from use of an instrumentality under the control of the defendant. Such an obligation may exist although the accident or original injury was caused by the negligence of the plaintiff or through that of a third person and without any fault on the part of the defendant. Other relationships may impose a like obligation, but it is not necessary to pursue that inquiry further at this time.

In the case at bar the appellee was an invitee and he received his initial injury in using an instrumentality provided by the appellant and under its control. Under the rule stated above and on the authority of the cases cited this was a sufficient relationship to impose a duty upon the appellant. Since the duty with which we are presently concerned arose after the appellee's initial injury occurred, the appellant cannot be charged with its anticipation or prevention but only with failure to exercise reasonable care to avoid aggravation. ***

Since the appellee was only entitled to recover for an aggravation of his injuries, the jury should have been limited and restricted in assessing the damages to the injuries that were the proximate result of the appellant's actionable negligence. ***

The judgment is reversed with directions to sustain the appellant's motion for a new trial.

NOTES AND QUESTIONS

1. The reasoning in these torts claims may be usefully compared to cases stemming from deprivation of constitutional rights. In DeShaney v. Winnebago County Department of Social Services, 489 U.S. 189 (1989), the mother of an abused child sued the state of Wisconsin. She alleged that the failure of state welfare officers to protect her child from repeated beatings (at the hands of his father) breached her child's constitutionally protected due process rights under the 14th Amendment. The court found, however, that due process conferred "no affirmative right to government aid ***[thus] the State cannot be held liable ***for injuries that could have been averted had it chosen to provide them." If, however, the state officers had acted to protect the child and had failed to do so, his due process rights would have been implicated. The distinction was put by Judge Posner as whether the state is the "doer of harm rather than merely an inept rescuer, just as the Roman state was a doer of harm when it threw Christians to lions." K.H. Through Murphy v. Morgan, 914 F.2d 846, 849 (7th Cir.1990). Thus, "once the state assumes custody of a person, it owes him a rudimentary duty of safekeeping no matter how perilous his circumstances when he was free."

479

The distinction tracks tort law--there is no duty to rescue but, having effected it, the "rescuer" is "not entitled to harm the person whom he has rescued." Restatement (Third) of Torts: Liability for Physical and

Emotional Harm, § 40(b)(7) (2012) includes in the special relationships generating a duty to protect a charge of a custodian where (a) the custodian is required by law to take custody or voluntarily takes custody of the other; and (b) the custodian has a superior ability to protect the other.

J.S. and M.S. v. R.T.H.

Supreme Court of New Jersey, 1998.

155 N.J. 330, 714 A.2d 924.

HANDLER, J., delivered the unanimous opinion of the Court.

In this case, two young girls, ages 12 and 15, spent substantial periods of recreational time with their neighbor at his horse barn, riding and caring for his horses. Betraying the trust this relationship established, the neighbor, an older man, sexually abused both girls for a period of more than a year. Following the man's conviction and imprisonment for these sexual offenses, the girls, along with their parents, brought this action against the man and his wife for damages, contending that the wife's negligence rendered her, as well as her husband, liable for their injuries. The man conceded liability for both the intentional and negligent injuries that he inflicted on the girls by his sexual abuse. His wife, however, denied that, under the circumstances, she could be found negligent for the girls' injuries.

This case presents the issue of whether a wife who suspects or should suspect her husband of actual or prospective sexual abuse of their neighbors' children has any duty of care to prevent such abuse.

And, if there is such a duty, does a breach of that duty constitute a proximate cause of the harm that results from sexual abuse.

Defendants R.T.H. and R.G.H., husband and wife (called "John" and "Mary" for purposes of this litigation), moved into a house in Vineland, New Jersey, and became next-door neighbors of plaintiffs, J.S. and M.S. and their two daughters, C.S. and M.S.

John, 64 years old, was charged with sexually assaulting the two sisters over a period of more than a year. He pled guilty to endangering the welfare of minors and was sentenced to eighteen months in state prison. Plaintiffs, as the natural parents and guardians ad litem of their two daughters, filed a complaint against John alleging intentional, reckless, and/or negligent acts of sexual assault against each of the two girls. In an amended complaint, plaintiffs added Mary as a defendant, alleging that she "was negligent in that she knew and/or should have known of her husband's proclivities/propensities" and that as a result of her negligence the two girls suffered physical and emotional injury. ***

Mary offered the defenses that she owed no duty to plaintiffs, that any alleged negligence on her part was not the proximate cause of any

injuries or damages sustained by plaintiffs, and that any damages sustained by plaintiffs were the result of actions by a third party over whom she exercised no control. Mary also filed a crossclaim for contribution and indemnification against John, alleging that even if plaintiffs' allegations were proven, John was the primary, active, and sole culpable cause of any injuries to the plaintiffs.

***

The trial court entered summary judgment on behalf of Mary. On appeal, the Appellate Division reversed the order and remanded for entry of an order granting plaintiffs extended discovery. [C]

This Court granted defendant's petition for certification. [C]

***

In determining whether a duty is to be imposed, courts must engage in a rather complex analysis that weighs and balances several, related factors, including the nature of the underlying risk of harm, that is, its foreseeability and severity, the opportunity and ability to exercise care to prevent the harm, the comparative interests of, and the relationships between or among, the parties, and, ultimately, based on considerations of public policy and fairness, the societal interest in the proposed solution.

Foreseeability of the risk of harm is the foundational element in the determination of whether a duty exists. [C] The "ability to foresee injury to a potential plaintiff' is "crucial" in determining whether a duty should be imposed. [C]

Foreseeability as a component of a duty to exercise due care is based on the defendant's knowledge of the risk of injury and is susceptible to objective analysis. [C] That knowledge may be an actual awareness of risk. [C] Such knowledge may also be constructive; the defendant may be charged with knowledge if she is "in a position" to "discover the risk of harm." [C] In some cases where the nature of the risk or the extent of harm is difficult to ascertain, foreseeability may require that the defendant have a

"special reason to know" that a "particular plaintiff' or "identifiable class of plaintiffs" would likely suffer a "particular type" of injury. Further, when the risk of harm is that posed by third persons, a plaintiff may be required to prove that defendant was in a position to "know or have reason to know, from past experience, that there [was] a likelihood of conduct on the part of [a] third person[ ]" that was "likely to endanger the safety" of another.

"The question whether there is a 'duty' merely begs the more fundamental question whether the plaintiffs interests are entitled to legal protection against the defendant's conduct." [C] The imposition of a duty thus requires an evaluation and a balancing of the conflicting interests of the respective parties. [C] That assessment necessarily includes an examination of the relationships between and among the parties.

481

Also implicated in this analysis is an assessment of the defendant's "responsibility for conditions creating the risk of harm" and an analysis of whether the defendant had sufficient control, opportunity, and ability to have avoided the risk of harm. [C]

Ultimately, the determination of the existence of a duty is a question of fairness and public policy. [C] In fixing the limits of liability as a matter of public policy, courts must draw on "notions of fairness, common sense, and morality." [C] Public policy must be determined in the context of contemporary circumstances and considerations. See, e.g., Kelly v. Gwinnell, [see below Chapter 6] (noting that in a society growing increasingly intolerant of drunken driving, the imposition of a duty on social hosts "seems both fair and fully in

accord with the State's policy"). Thus, " 'duty' is not a rigid formalism" that remains static through time, but rather is a malleable concept that "must of necessity adjust to the changing social relations and exigencies and man's relation to his fellows." [C]

The Court, in its determination whether to impose a duty, must also consider the scope or boundaries of that duty. [C] The scope of a duty is determined under "the totality of the circumstances," and must be "reasonable" under those circumstances. [C] Factors to be taken into consideration include the risk of harm involved and the practicality of preventing it. [C] When the defendant's actions are "relatively easily corrected" and the harm sought to be prevented is "serious," it is fair to impose a duty. [C] In the final analysis, the "reasonableness of action" that constitutes such a duty is "an essentially objective determination to be made on the basis of the material facts" of each case. [C]

Here, a man criminally sexually assaulted unrelated, adolescent children whom he had befriended. The defendant is the spouse of the wrongdoer. The abuse occurred on her own property over an extended period of time. The tortious, assaultive conduct is of a type that is extremely difficult to identify, anticipate, and predict. While these considerations bear on all of the factors that are relevant in determining whether a duty of care should be recognized and imposed on the spouse, they bear materially on the primary element of foreseeability.

Although conduct involving sexual abuse is often secretive, clandestine, and furtive, a number of factors are relevant when determining whether or not it is foreseeable to a wife that her

husband would sexually abuse a child. These include whether the husband had previously committed sexual offenses against children; the number, date, and nature of those prior offenses; the gender of prior victims; the age of prior victims; where the prior offenses occurred; whether the prior offense was against a stranger or a victim known to the husband; the husband's therapeutic history and regimen; the extent to which the wife encouraged or facilitated her husband's unsupervised contact with the current victim; the presence of physical evidence such as pornographic materials depicting children and the unexplained appearance of children's apparel

in the marital home; and the extent to which the victims made inappropriate sexual comments or engaged in age-inappropriate behavior in the husband and wife's presence. [C]

Moreover, there is some empirical support for the conclusion that sexual abuse of a child, while extremely difficult to detect or anticipate, is a risk that can be foreseen by a spouse. This evidence indicates that an extremely high percentage of child sexual molesters are men, many of whom are married. U.S. Dept, of Justice, Bureau of Justice Statistics, Child Victimizers: Violent Offenders and Their Victims 5 (March 1996). The vast majority of child victims are female and many child victims fall prey to an immediate relative or a family acquaintance; most of these sexual assaults are committed either in the offender's home or the victim's home. [C] Given those factors, the wife of a sexual abuser of children is in a unique position to observe firsthand telltale signs of

sexual abuse. A wife may well be the only person with the kind of knowledge or opportunity to know that a particular person or particular class of persons is being sexually abused or is likely to be abused by her husband. [C]

These considerations warrant a standard of foreseeability in this case that is based on "particular knowledge" or "special reason to know" that a "particular plaintiff' or "identifiable class of plaintiffs" would suffer a "particular type" of injury. [Cc] "Particularized foreseeability" in this kind of case will conform the standard of foreseeability to the empirical evidence and common experience that indicate a wife may often have actual knowledge or special reason to know that her husband is abusing or is likely to abuse an identifiable victim and will accommodate the concerns over the inherent difficulties in predicting such furtive behavior. That test of foreseeability will also ensure that the wife is not subject to a broad duty that may expose her to liability to every child whom her husband may threaten and harm. Foreseeability under that definitional standard is neither unrealistic nor unfair.

The nature of the parties' interests bears on the need to recognize a duty of care. "There can be no doubt about the strong policy of this State to protect children from sexual abuse and to require reporting of suspected child abuse." That policy is so obvious and so powerful that it can draw little argument. It is an interest that is massively documented.

The Legislature has dealt comprehensively with the subject of child abuse and has enacted a plethora of statutes designed to prevent the sexual abuse of children. For example, N.J.S.A. 9:6-8.10

requires any person having reasonable cause to believe that a child has been subject to abuse to report the abuse immediately to the Division of Youth and Family Services. The duty to report is not limited to professionals, such as doctors, psychologists, and teachers, but is required of every citizen. [C] Indeed, friends or neighbors are often in the best position to fulfill this statutory duty because they are the people "who frequently hear or observe acts of child abuse." [C]

483

***

"Megan's Law," N.J.S.A. 2C:7-1 to--11, provides yet more evidence of the State's intolerance of sexual abuse of children. In affirming the constitutionality of the community notification and registration requirements of Megan's Law for convicted sex offenders, this Court recognized the enormous public interest in protecting society from the threat of potential molestation, rape, or murder of women and children. [C]

While the interest in protecting children from sexual abuse is great, this Court must also take into consideration defendants' interests in a stable marital relationship and in marital privacy. [C] That interest traditionally found expression in the common-law doctrine of interspousal immunity wherein one spouse could not sue or be sued by another, [c] and the testimonial disqualification wherein one spouse was not permitted to testify for or against the other [c]. Both courts and scholars, however, increasingly questioned whether the doctrine of marital immunity actually succeeded in promoting the marital tranquility and privacy it was designed to serve. [C]

Moreover, the societal interest in enhancing marital relationships cannot outweigh the societal interest in protecting children from sexual abuse. The child-abuse reporting statute itself has mandated that balance--it applies to every citizen, including a spouse. [Cc]

Considerations of fairness and public policy also govern whether the imposition of a duty is warranted. [C] Public policy considerations based in large measure on the comparative interests of the parties support overwhelmingly the recognition of a duty of care in these circumstances. This Court has recognized that the sexual abuse of children not only traumatizes the victims, but also exacts a heavy toll on society: [The court details research demonstrating the adverse consequences of sexual abuse on victims and on society.]

Considerations of fairness implicate the scope as well as the existence of a duty. In defining the duty to be imposed, the court must weigh the ability and opportunity of the defendant to exercise reasonable care. Defendant contends that the imposition of a duty to prevent her husband from engaging in sexual abuse of another person would be unfair. She argues that sexual offenses are extremely difficult to combat and that she did not necessarily have the power, the ability, or the opportunity to control her husband and should not be expected or required to police his conduct continuously. However, fairness concerns in these circumstances can be accommodated by a flexible duty of care that requires a spouse, when there is particularized foreseeability of harm of sexual abuse to a child, to take reasonable steps to prevent or warn of the harm. [C]

Considerations of foreseeability, the comparative interests and relationships of the parties, and public policy and fairness support the

484

recognition of a duty of care. Based in large measure on the strong public policy of protecting children from sexual abuse, we conclude that there is a sound, indeed, compelling basis for the imposition of a duty on a wife whose husband poses the threat of sexually victimizing young children.

Closely-related to the recognition of a duty, however, is the issue of proximate causation, which must also be considered in determining whether any liability may be allowed for the breach of such a duty. Proximate causation is "that combination of logic, common sense, justice, policy and precedent' that fixes a point in the chain of events, some foreseeable and some unforeseeable, beyond which the law will bar recovery." [C]

It does not seem highly extraordinary that a wife's failure to prevent or warn of her husband's sexual abuse or his propensity for sexual abuse would result in the occurrence or the continuation of such abuse. The harm from the wife's breach of duty is both direct and predictable. There is little question, here, that the physical and emotional injuries allegedly suffered by the girls are hardly an extraordinary result of John's acts of molestation and that their victimization is not an extraordinary consequence of Mary's own negligence. Mary's negligence could be found to be a proximate cause of plaintiffs' injuries. [C]

Accordingly, we hold that when a spouse has actual knowledge or special reason to know of the likelihood of his or her spouse engaging in sexually abusive behavior against a particular person or persons, a spouse has a duty of care to take reasonable steps to prevent or warn of the harm. Further, we hold that a breach of such a duty constitutes a proximate cause of the resultant injury, the sexual abuse of the victim.

It may be found that the relationship between the next-door neighbors' in this case had been close. Mary knew that the neighbors' adolescent girls were visiting at her home nearly every day and that they spent considerable amounts of time there alone with her husband. Moreover, she never "confronted" her husband about the unsupervised time he was spending with the girls. At both the trial level and on appeal, Mary conceded for the purposes of argument that "at all relevant times" she "knew or should have known of her husband's proclivities/ propensities." Thus, it may be determined that it was particularly foreseeable that John was abusing the young girls. Further, the evidence at trial could support a finding of negligence on Mary's part. It is inferable, as explained by the Appellate Division, that Mary could have discharged her duty by confronting her husband and warning him, by insisting or seeing that the girls were not invited to ride or care for the horses, by keeping a watchful eye when she knew the girls to be visiting with her husband, by asking the girls' parents to ensure that the children not visit when she was not present, or by warning the girls or their parents of the risk she perceived. [C] Finally, the evidence may be found sufficient to support the determination that the harm suffered by the girls was not a highly extraordinary result of the breach of that duty.

We affirm the judgment of the Appellate Division.

NOTES AND QUESTIONS

1. In the principal case, it was conceded that Mary, the wife, was in a position of knowledge and control whereby she could have taken reasonable steps to protect the vulnerable plaintiffs. In other contexts the defendant is in a relationship where he or she is expected to take measures against the risks posed by another to a third party. A parent may have a duty to protect others against dangers posed by his or her dependent child. Nieuwendorp v. Am. Family Ins. C., 529 N.W.2d 594 (Wis. 1995). Other relationships include employer and employee, automobile owner and driver, and persons who have taken charge of dangerous lunatics, criminals and persons with contagious diseases. In Otis Engineering Corp. v. Clark, 668 S.W.2d 307 (Tex.1983), a drunken employee, after being told to go home, killed the plaintiffs husband in an automobile accident. The court grounded the duty on the defendant employer's ability to control the intoxicated employee.

An interesting case is Connolly v. Nicollet Hotel, 254 Minn. 373, 95 N.W.2d 657 (1959), where a convention in the defendant's hotel got out of hand and started menacing everybody and everything in the vicinity, and the management was held to be under a duty to make reasonable efforts to control it. Does a passenger in an automobile who is aware that the driver has been drinking heavily have an affirmative duty to warn other passengers who do not realize the driver's potentially impaired condition? See VanHaverbeke v. Bernhard, 654 F.Supp. 255 (S.D.Ohio 1986). Cf. Pulka v. Edelman,

40 N.Y.2d 781, 358 N.E.2d 1019, 390 N.Y.S.2d 393 (1976) (automobile garage and customers driving out over a sidewalk outside the exit).

2. In a case similar to the principal case, the plaintiff, a minor between the ages of 14 to 18, had been invited to stay at defendant's house for the period of time. During this period, plaintiff entered a sexual relationship with defendant's "live-in male friend." The latter was convicted of criminal sexual contact and plaintiff brought a suit asserting that defendant had failed to protect her from sexual abuse. The Supreme Court of Minnesota found that the defendant owed plaintiff a duty of care, stressing the vulnerability of minors in sexual abuse cases and the social need to protect them. Bjerke v. Johnson, 742 N.W.2d 660 (2007). But cf. Berry v. Watchtower Bible and Tract Society, 152 N.H. 407, 879 A.2d 1124 (2005) (finding that church congregations and elders owed no duty to protect child victims of sexual abuse after mother had frequently told the defendants that father was abusing the daughter; court affirmed the narrow duty).

3. In Schurk v. Christensen, 80 Wash.2d 652, 497 P.2d 937 (1972), defendants' son, while acting as a baby-sitter, sexually molested a neighbor's five-year-old daughter. The neighbors suffered severe emotional harm when they learned this fact from their daughter and they sued defendants. What should be the major legal and factual issues in the case? Distinguish this case from Haselhorst v. State, 240 Neb. 891, 485 N.W.2d 180 (1992), where the plaintiff parents suffered emotional distress when they discovered that

their children had been sexually assaulted by a foster child placed with them by the Nebraska Department of Social Services. In Randi W. v. Muroc Joint Unified School District, 14 Cal.4th 1066, 60 Cal.Rptr.2d 263, 929 P.2d 582 (1997), the California Supreme Court held that a former employer of a teacher had owed a duty to a molested student not to misrepresent the fitness of that teacher to a school district proposing to hire him. The defendant former employer knew of charges and complaints of sexual misconduct by the employee-teacher. After being hired, the teacher molested plaintiff.

Tarasoff v. Regents of University of California

Supreme Court of California, 1976.

17 Cal.3d 425, 551 P.2d 334, 131 Cal.Rptr. 14.

[Posenjit Poddar was an out-patient under the care of a psychologist, Dr. Lawrence Moore, at Cowell Memorial Hospital of the University of California. During the course of treatment, Dr. Moore learned from Poddar that he intended to kill Tatiana Tarasoff because she had spurned Poddar's romantic advances.

On the basis of this information, Dr. Moore had the campus police detain Poddar, apparently at the hospital. Poddar was released shortly afterward. Despite disagreement among the psychiatrists the final decision was that no further action should be taken to confine Poddar. This judgment proved to be mistaken; two months later Poddar shot and then repeatedly stabbed Tatiana. Plaintiffs, Tatiana's parents, brought a wrongful death claim against the four psychiatrists. Plaintiffs claimed that they should be liable because

they failed to confine Poddar. The court rejected this claim because California Government Code Section 856 cloaked the doctors with tort immunity with regard to this type of decision. Plaintiffs also claimed that defendants should be liable for Tatiana's death because they failed to warn her or them about Poddar's threat.]

TOBRINER, JUSTICE. ***The second cause of action can be amended to allege that Tatiana's death proximately resulted from defendants' negligent failure to warn Tatiana or others likely to apprise her of her danger. Plaintiffs contend that as amended, such allegations of negligence and proximate causation, with resulting damages, establish a cause of action. Defendants, however, contend that in the circumstances of the present case they owed no duty of care to Tatiana or her parents and that, in the absence of such duty, they were free to act in careless disregard of Tatiana's life and safety. ***

Although ***under the common law, as a general rule, one person owed no duty to control the conduct of another [cc], nor to warn those endangered by such conduct [cc], the courts have carved out an exception to this rule in cases in which the defendant stands in some special relationship to either the person whose conduct needs to be controlled or

in a relationship to the foreseeable victim of that conduct (see Restatement (Second) of Torts, supra, §§ 315-320). ***

Although plaintiffs' pleadings assert no special relation between Tatiana and defendant therapists, they establish as between Poddar and defendant therapists the special relation that arises between a

patient and his doctor or psychotherapist. Such a relationship may support affirmative duties for the benefit of third persons. Thus, for example, a hospital must exercise reasonable care to control the behavior of a patient which may endanger other persons. A doctor must also warn a patient if the patient's condition or medication renders certain conduct, such as driving a car, dangerous to others.

Although the California decisions that recognize this duty have involved cases in which the defendant stood in a special relationship both to the victim and to the person whose conduct created the danger, we do not think that the duty should logically be constricted to such situations. Decisions of other jurisdictions hold that the single relationship of a doctor to his patient is sufficient to support the duty to exercise reasonable care to protect others against dangers emanating from the patient's illness. The courts hold that a doctor is liable to persons infected by his patient if he negligently fails to diagnose a contagious disease [c] or, having diagnosed the illness, fails to warn members of the patient's family. ***

Defendants contend, however, that imposition of a duty to exercise reasonable care to protect third persons is unworkable because therapists cannot accurately predict whether or not a patient will resort to violence. In support of this argument amicus representing the American Psychiatric Association and other professional societies cites numerous articles which indicate that therapists, in the present state of the art, are unable reliably to predict violent acts; their forecasts, amicus claims, tend consistently to overpredict violence, and indeed are more often wrong than right. Since predictions of violence are often erroneous, amicus concludes, the

courts should not render rulings that predicate the liability of therapists upon the validity of such predictions. ***

We recognize the difficulty that a therapist encounters in attempting to forecast whether a patient presents a serious danger of violence. Obviously we do not require that the therapist, in making that determination, render a perfect performance; the therapist need only exercise "that reasonable degree of skill, knowledge, and care ordinarily possessed and exercised by members of [that professional specialty] under similar circumstances." ***

In the instant case, however, the pleadings do not raise any question as to failure of defendant therapists to predict that Poddar presented a serious danger of violence. On the contrary, the present complaints allege that defendant therapists did in fact predict that Poddar would kill, but were negligent in failing to warn.

488

Amicus contends, however, that even when a therapist does in fact predict that a patient poses a serious danger of violence to others, the therapist should be absolved of any responsibility for failing to act to protect the potential victim. In our view, however, once a therapist does in fact determine, or under applicable professional standards reasonably should have determined, that a patient poses a serious danger of violence to others, he bears a duty to exercise reasonable care to protect the foreseeable victim of that danger. ***

The risk that unnecessary warnings may be given is a reasonable price to pay for the lives of possible victims that may be saved. We would hesitate to hold that the therapist who is aware that his patient expects to attempt to assassinate the President of the United States

would not be obligated to warn the authorities because the therapist cannot predict with accuracy that his patient will commit the crime.

Defendants further argue that free and open communication is essential to psychotherapy [c]; that "unless a patient ***is assured that ***information [revealed by him] can and will be held in utmost confidence, he will be reluctant to make the full disclosure upon which diagnosis and treatment ***depends." (Sen.Com. on Judiciary, comment on Evid. Code, § 1014.) The giving of a warning, defendants contend, constitutes a breach of trust which entails the revelation of confidential communications.

We recognize the public interest in supporting effective treatment of mental illness and in protecting the rights of patients to privacy [c] and the consequent public importance of safeguarding the confidential character of psychotherapeutic communication. Against this interest, however, we must weigh the public interest in safety from violent assault. The Legislature has undertaken the difficult task of balancing the countervailing concerns. In Evidence Code section 1014, it established a broad rule of privilege to protect confidential communications between patient and psychotherapist. In Evidence Code section 1024, the Legislature created a specific and limited exception to the psychotherapist-patient privilege: "There is no privilege ***if the psychotherapist has reasonable cause to believe that the patient is in such mental or emotional condition as to be dangerous to himself or to the person or property of another and that disclosure of the communication is necessary to prevent the threatened danger." ***

Our current crowded and computerized society compels the interdependence of its members. In this risk-infested society we can hardly tolerate the further exposure to danger that would result from a concealed knowledge of the therapist that his patient was lethal. If the exercise of reasonable care to protect the threatened victim requires the therapist to warn the endangered party or those who can reasonably be expected to notify him, we see no sufficient societal interest that would protect and justify concealment. The containment of such risks lies in the public interest. For the foregoing reasons, we find that plaintiffs'

489

complaints can be amended to state a cause of action against defendants Moore, Powelson, Gold, and Yandell and against the Regents as their employer, for breach of a duty to exercise reasonable care to protect Tatiana. ***

[Wright, C.J., and Sullivan and Richardson, JJ., concurred and dissented in part; and CLARK and McComb, JJ., dissented.]

NOTES AND QUESTIONS

1. In his dissent Justice Clark agreed with the majority that when a psychiatrist, in terminating a patient, increases the risk of his violence toward a particular individual, a duty to warn should arise. However, he could find neither precedent nor reason to support a duty to warn solely based on the psychiatrist-patient relationship. Other courts have agreed that the relationship does not ground a duty to warn. The Virginia Supreme Court in Nasser v. Parker, 249 Va. 172, 455 S.E.2d 502 (1995), found that the principal case "is at odds with [its] interpretation of the Restatement's provisions relating

to one's duty to control the conduct of a third person." Id. at 177, 504. Plaintiff must show defendant had "taken charge" of third person within the meaning of Restatement (Second) of Torts § 319 (1979), id. at 178, 504. This was not the case in Tarasoff, nor in this case where defendants had released the victim's former boyfriend from the hospital without warning victim of the release. See Anne Dailey, Law and the Unconscious: A Psychoanalytic Perspective, Chapter 6, (2017).

The degree of control necessary to generate a duty of care was raised in Estates of Morgan v. Fairfield Family Counseling Ctr., 77 Ohio St.3d 284, 673 N.E.2d 1311 (1997). In this case, the victim's son had been in outpatient care of the defendants. Their negligent misdiagnosis and treatment of the patient's schizophrenia led to the patient shooting and killing his parents and wounding his sister. Defendant's control over the patient was attenuated. The court found that a want of close control, in itself, does not determine that a duty should not be imposed. Rather, the court insisted on a balancing of factors: "(1) the psychotherapist's ability to control the outpatient; (2) the public's interest in safety from violent assault; (3) the difficulty inherent in attempting to forecast whether a patient represents a substantial risk of physical harm to others; (4) the goal of placing the mental patient in the least restrictive environment and safeguarding importance of maintaining the confidential nature of psychotherapeutic communications." [c]

2. Describe the duty that should be imposed on a physician who finds that her patient is HIV positive. Should she warn the patient's sexual partners? See, In Estate of Behringer (M.D.) v. Medical Center at Princeton, 249 N.J.Super. 597, 592 A.2d 1251 (1991)

(dicta). It has been held that physicians owe a duty to unidentified third persons, but may fulfill duty by informing patient of risks of transmission of AIDS. See Reisner v. Regents of Univ, of Cal., 31 Cal.App.4th 1195, 37 Cal.Rptr.2d 518 (1995); A diagnosis of Rocky Mountain spotted fever in a patient may give rise to a duty in the

physician to warn the patient's family that they have been exposed to ticks carrying the disease, Bradshaw v. Daniel, 854 S.W.2d 865 (Tenn. 1993).

3. The duty to protect subsumes a duty to warn. Does it include a duty to commit or retain custody? Currie v. United States, 644 F. Supp. 1074 (M.D.N.C. 1986); Estates of Morgan v. Fairfield Family Counseling Ctr., 77 Ohio St.3d 284, 673 N.E.2d 1311 (1997) (stating that a fear of undue confinement caused by the imposition of a duty has no reliable statistical support). Other actions may be called for, e.g. in Lundgren v. Fultz, 354 N.W.2d 25 (Minn. 1984), blocking return of guns to paranoid schizophrenic patient obsessed with weapons. To varying degrees 17 states and the District of Columbia have enacted legislation allowing, with due process protections, firearms to be taken by police and others (Red Flag rules). Action on the federal level has been mooted. Would the presence of these Red Flag laws encourage finding a duty to act on the part of police, psychotherapists, and others, to deprive persons of weapons to protect persons threatened?

4. What of the liability of health professionals in Peterson, page 470? Much has been made of the gunman's mental health and Virginia Tech's knowledge of his condition. What if the plaintiffs focused their

case differently in light of these facts? Would the outcome differ? Should it? See Commonwealth of Va., Va. Tech Review Panel, Rep. on Mass Shootings at Virginia Tech 31-62 (2007).

5. In the principal case the duty was owed to an identified victim. When the threat is not pointed, but in general, the authorities are split. In Thompson v. County of Alameda, 27 Cal.3d 741, 614 P.2d 728, 167 Cal.Rptr. 70 (1980), a juvenile offender was released into his mother's custody despite his history of violence and known desire to kill a young child if he were set free. He accomplished this within twenty-four hours of his release when he killed the plaintiff's son. The court reasoned that no duty of care obtained because the generalized threat here, in juxtaposition to the direct threat in the principal case, would have been an ineffective guard against violence and might have adversely impacted the patient's rehabilitation. Accord: Brady v. Hopper, 570 F.Supp. 1333 (D.Colo.1983), aff'd, 751 F.2d 329 (10th Cir.1984) (suit against John Hinckley's psychiatrist by victims of the attempted assassination of President Reagan); Rousey v. United States, 115 F.3d 394 (6th Cir.1997) (applying Maine law, holding that duty to warn requires identification of victims).

6. In the principal case it was assumed, for the purposes of the appeal, that the defendant clinicians had predicted Poddar's dangerousness. This issue, however, is often live. Although it is rare for mental health clinicians to be liable, by reason of failure to reasonably predict violence, those professionals have remained anxious lest courts too readily conclude that violence can be accurately predicted. See Menendez v. Superior Court, 11 Cal. Rptr. 2d 92, 834 P.2d 786 (1992) (with regard to the "dangerous patient

exception," the "reasonableness" of the requisite "reasonable cause to believe" is determined in light of the standards of the psychotherapeutic community. The test is objective and must consider all relevant circumstances. It is based on prevailing norms among psychotherapists but allows broad discretion to the individual psychotherapist.). See also White v.

491

United States, 780 F.2d 97 (D.C.Cir.1986), and Tamsen v. Weber, 166 Ariz. 364, 802 P.2d 1063 (App.1990). In order to make the rules the more concrete, California and some other states limited, via statute, the duty to those instances where the patient poses "serious threat of physical violence against a reasonably identifiable victim." Anne Dailey, Law and the Unconscious (2017), 158-176 (discussing these rules and the issues of words and meanings in the psycho-therapeutic relationship). Although the Tarasoff rule is inconsistent with "psycho-analytic truths in the relationship", Dailey admits we remain "ambivalent" about letting it go. Does it reflect a "shared fantasy about the predictive powers of professionals in our lives'? Id. 175.

7. In Bellah v. Greenson, 81 Cal.App.3d 614, 146 Cal.Rptr. 535 (1978), the court found no duty to warn when a psychiatrist had failed to alert a patient's parents that the patient had suicidal propensities and was running risks by consorting with heroin addicts. Likewise, in Nally v. Grace Community Church of the Valley, 47 Cal.3d 278, 763 P.2d 948, 253 Cal.Rptr. 97 (1988), a religious counsellor was found to owe no duty to refer a suicidal young man to a mental health professional. In contrast, school counsellors owed a

duty to warn the parents of a thirteen-year-old girl of a suicidal statement made at school. The dangers were acute and the burdens of warning the parents light. Eisel v. Board of Education of Montgomery County, Md., 324 Md. 376, 597 A.2d 447 (1991).

8. You overhear a conversation while in line at the supermarket. In it a person reveals that he intends to rob a nearby jewelry store. Do you have a duty? If so, what is expected of you in discharging the duty?

3. Pure Economic Loss

The citadel of privity has now been vanquished. In most cases the fact that A was in a contractual relationship with B alone could not defeat a claim that A owed a duty to C to prevent causing C foreseeable physical injury. A last bastion survives, however. If the harm is pure economic loss, the courts take more seriously the claim that liability should be restricted. Pure economic loss arises when a person suffers pecuniary loss not consequent upon injury to his person or property. The cases fall into two categories:

(1) Negligent misrepresentation or misstatement causing economic loss; and

(2) Negligent acts causing economic loss.

The former category is treated in detail in Chapter 21. The paradigmatic cases relate to auditor or accountant liability. An auditor retained by a corporation completes a negligent audit which is then relied upon by a third person to his detriment. Does that third person have a cause of action against the negligent auditors? Does privity describe the limits of liability or does the auditor owe a duty to a

class of persons outside privity of contract? Benjamin Cardozo, the champion of the assault on the privity citadel, held back from imposing a duty of care in negligence. Ultramares Corporation v. Touche, infra page 1208.

492

The courts, nevertheless, have found duties of care to parties outside privity of contract, sometimes narrowly, sometimes broadly, in a way reminiscent of the hesitation that has surrounded the scope of the duty in negligence for emotional distress. See Daley v. La Croix infra page 504.

The latter category--negligent acts causing economic loss--held firmly against the proponents of wider tort liability. In the following case the California Supreme Court perceives the common issues of the limits of liability pertaining to both categories.

Southern California Gas Leak Cases

Supreme Court of California, 2019.

7 Cal.5th 391, 441 P.3d 881, 247 Cal.Rptr.3d 632.

CUELLAR, J. This case concerns a massive, months-long leak from a natural gas storage facility located just outside Los Angeles. According to the allegations before us, the accident severely harmed the economy of a nearby suburb. We must decide if local businesses--none of which allege they suffered personal injury or property damage--may recover in negligence for income lost because of the leak. Our decision turns on whether the entity that allegedly caused the leak had a tort duty to guard against what we and other courts have termed "purely economic losses."

The businesses argue that they deserve compensation for such losses, that the entity responsible must bear the full costs of its alleged negligence so tort law can play its essential role of forcing people and organizations to take sufficient account of the risks they generate, and that courts can sensibly apportion liability under these circumstances within meaningful limits. Tort law indeed lies in the heartland of our common law system. It serves society's interest in allocating risks and costs to those who can better prevent them, and it provides aggrieved parties with just compensation. But a proper assessment of competing considerations in light of our precedent suggests, and the extent of consensus across other jurisdictions confirms, that claims for purely economic losses suffered from mere proximity to an industrial accident create intractable line-drawing problems for courts. So the claims before us are best not treated as compensable in negligence.

We therefore affirm the judgment of the Court of Appeal.

I.

Because this case comes to us at the demurrer stage, we take as true all properly pleaded material facts--but not conclusions of fact or law. [c]

A.

Near the northwestern corner of Los Angeles lies Porter Ranch, a residential neighborhood home to some 30,000 people. Southern California Gas Company (SoCalGas) stores vast amounts of natural gas in an underground facility in the hills surrounding the community. Known today as the "Aliso Facility," that subterranean storage site

was once an oil reservoir. It was repurposed about 40 years ago for its present use.

493

SoCalGas supplies over 21 million people with natural gas from its four storage facilities, but the Aliso Facility is the company's largest. It holds up to 80 billion cubic feet of natural gas, which SoCalGas pumps underground at high pressure into more than 100 "injection wells." Because natural gas is odorless, SoCalGas adds a nausea-causing chemical to the gas so that people notice when a leak happens.

In October 2015, a leak happened--and people noticed. An uncontrolled flow of natural gas from the Aliso Facility coated nearby neighborhoods in an oily mist. At its peak, the leak released some 55 tons of natural gas every hour. Porter Ranch residents reported unpleasant odors, headaches, dizziness, and respiratory problems. In addition to those symptoms, students at local schools complained of nosebleeds and vomiting.

That November, the Los Angeles County health department directed SoCalGas to establish a relocation program available to Porter Ranch residents who lived within a five-mile radius of the leak site. The Department of Conservation's division of oil, gas, and geothermal resources required SoCalGas to provide real-time data about the leak, as well as a timeline for stopping it. A month later, with the flow of gas slowing but still significant, the Los Angeles County Board of Education decided to relocate students and staff from two Porter Ranch schools for the duration of the academic year. And a month after that, SoCalGas expanded its relocation program,

citing complaints of poor air quality from people living outside the initial five-mile boundary. About 15,000 people were relocated in total, scattering to locations dozens--and in some cases hundreds--of miles away.

SoCalGas finally got the leak under control in February 2016--four months after detecting it. All told, about 100,000 tons of natural gas escaped the Aliso Facility, releasing enough greenhouse gases into the atmosphere to erase several years' worth of efforts to combat climate change in California.

B.

Plaintiffs are Porter Ranch area businesses seeking to represent a class of "[a] 11 persons and entities conducting business within five miles of the [Aliso] Facility from October 23, 2015 to [the] present." They allege that SoCalGas's negligence caused the leak. The resulting relocation of many Porter Ranch residents devastated the local economy: By depriving local businesses of customers, the environmental disaster cost local businesses considerable earnings.

That harm, Plaintiffs maintain, is ongoing. Sales at businesses of all stripes declined sharply, and in many cases, stayed down. Enrollment at a local martial arts center, plaintiff King Taekwondo, nosedived during the leak and has not recovered. The same was true of a neighborhood day care, plaintiff Polonsky Family Day Care. Restaurants, gas stations, and pharmacies were affected, too. So were beauty salons, doctor's offices, party suppliers, and a photography store.

With the en masse relocation of Porter Ranch residents and the diminution in property values caused by the leak, home mortgage lenders and home improvement businesses suffered economically as well. Plaintiff First American Realty saw clients get cold feet, loans fall out of escrow, and sales tumble. A local contractor's business dropped by 25 percent, as customers moved away or decided against home improvements for the time being. "Since the onset of the gas leak," in other words, business operations throughout Porter Ranch "have either halted or slowed substantially"--and Plaintiffs "have not yet recovered from the blow to their bottom lines."

Yet no named plaintiff in this action alleges personal injury or property damage. Accordingly, Plaintiffs acknowledge they are suing SoCalGas to recover solely for the income they lost because of the leak.

C.

SoCalGas demurred, arguing that Plaintiffs' negligence claims failed as a matter of law because Plaintiffs were seeking to recover for purely economic losses. Overruling the demurrer, the trial court explained that companies "must face the full cost of accidents" they create, or else "they will underinvest in precautions." The trial court acknowledged that economic losses not flowing from conventional injury to person or property, such as physical damage, are ordinarily not recoverable in tort--and that the Court of Appeal had so held in Adams v. Southern Pac. Transportation Co. (1975) 50 Cal.App.3d 37 [123 Cal. Rptr. 216] (Adams) on facts with some similarities to those here. But the trial court questioned the wisdom of that rule and

reasoned that Adams was no longer good law after our later decision in J'Aire Corp. v. Gregory (1979) 24 Cal.3d 799 [157 Cal. Rptr. 407, 598 P.2d 60] (J'Aire).

***

II.

Recovery in a negligence action depends as a threshold matter on whether the defendant had " 'a duty to use due care toward an interest of [the plaintiffs] that enjoys legal protection against unintentional invasion.' [c] We review de novo whether this "'essential prerequisite'" to recovery is satisfied, [c]

The issue here is whether SoCalGas--separate from other legal and practical reasons it had to prevent injury of any kind to the public--had a tort duty to guard against negligently causing what we and others have called "purely economic loss[es]." [c] We use that term as a shorthand for "pecuniary or commercial loss that does not arise from actionable physical, emotional or reputational injury to persons or physical injury to property." [c] And although SoCalGas of course had a tort duty to guard against the latter kinds of injury, we conclude it had no tort duty to guard against purely economic losses.

A.

In California, the "general rule" is that people owe a duty of care to avoid causing harm to others and that they are thus usually liable for injuries their negligence inflicts, [c] Under Civil Code section 1714, subdivision (a), "[e]veryone is responsible... for an injury occasioned to another by his or her want of ordinary care or skill in the management of his or her property or person, except so far as the latter has, willfully or by want of ordinary care, brought the injury upon himself or herself." So at least in cases involving traditionally compensable forms of injury--like physical harm to person or property--we presume the defendant owed the plaintiff a duty of care and then ask whether the circumstances "justify a departure" from that usual presumption. In Rowland v. Christian (Rowland) [see below p. 561] we identified several factors that, among others, may bear on that question. ***At core, though, the inquiry hinges not on mere rote application of these separate so-called Rowland factors, but instead on a comprehensive look at the "the sum total" of the considerations at play in the context before us. [c]***A case in point is liability in negligence for purely economic losses, which is "the exception, not the rule," under our precedents.

***

The primary exception to the general rule of no recovery for negligently inflicted purely economic losses is where the plaintiff and the defendant have a "special relationship." (J'Aire, supra, 24 Cal.3d at p. 804.) What we mean by special relationship is that the plaintiff was an intended beneficiary of a particular transaction but was harmed by the defendant's negligence in carrying it out. Take, for

example, Biakanja v. Irving (1958) 49 Cal.2d 647 [320 P.2d 16] (Biakanja). There, we held that the intended beneficiary of a will could recover for assets she would have

496

received if the notary had not been negligent in preparing the document. A special relationship existed between the intended beneficiary and the notary in Biakanja, we emphasized, because "the 'end and aim' of the transaction" between the nonparty decedent and the notary was to ensure that the decedent's estate passed to the intended beneficiary. ***For similar reasons, in J'Aire we held that a special relationship existed between a restaurant operator and a contractor hired by a third party property owner to renovate the space rented by the restaurant operator, [c] So when the contractor negligently failed to complete the construction work on time, the restaurant operator could recover purely economic losses it suffered as a result.

Discerning whether there is a special relationship justifying liability of this sort can nonetheless be a subtle enterprise. In both Biakanja and J'Aire we emphasized that our duty determination rested not just on (i) "the extent to which the transaction was intended to affect the plaintiff," but also on a subset of the Rowland factors relevant to the circumstances before us in those cases: (ii) "the foreseeability of harm to the plaintiff," (iii) "the degree of certainty that the plaintiff suffered injury," (iv) "the closeness of the connection between the defendant's conduct and the injury suffered," (v) "the moral blame attached to the defendant's conduct," and (vi) "the policy of preventing future harm." [c]

Deciding whether to impose a duty of care turns on a careful consideration of the "the sum total" of the policy considerations at play, not a mere tallying of some finite, one-size-fits-all set of factors, [c] In Bily, investors in a failed company sued the company's auditor for financial losses they allegedly suffered due to the auditor's negligent preparation of a public report on the company's financial well-being. (See Bily v. Arthur Young, 834 P.2d 745 (1992). [See Chapter 21, note 2, 1206]. We rejected those claims. Despite acknowledging that financial losses to investors from negligently prepared audit reports are "certainly" foreseeable, we held that an auditor "owes no general duty of care regarding the conduct of an audit to persons other than the client." [c]

In requiring more than mere foreseeability for imposing a duty of care in Bily, we appreciated the need to safeguard the efficacy of tort law by setting meaningful limits on liability, [c] Citing decisions from our court limiting recovery for emotional harms based on similar concerns, we explained that although foreseeability "may set tolerable limits for most types of physical harm, it provides virtually no limit on liability for nonphysical harm." After all, on " 'clear judicial days'" courts " 'can foresee forever.'" [c] So although exposure to liability often provides an important incentive for parties to internalize the social costs of their actions, we were concerned that allowing the countless people who rely on public audit reports to recover "pure economic loss suffered" due to a shoddy audit would "raise[ ] the spectre of vast numbers of suits and limitless financial exposure." The resulting universe of potential claims would not only raise difficult line-drawing questions for courts, it might

deter socially beneficial behavior. That result was unacceptable. We therefore limited auditor liability to claims for negligent misrepresentation brought by plaintiffs who--like the plaintiffs in Biakanja and J'Aire--were "specifically intended beneficiaries" of the defendant's conduct.

To be sure, several additional considerations cut further in favor of strictly circumscribing recovery in Bily. [The court discusses the professional context of any duty of care arising in audits and relational considerations, see Chapter 21:3(B) above.] More fundamentally, purely economic losses flowing from a financial transaction gone awry--which were at issue in Biakanja, J'Aire, Bily, and our other negligence cases to date about purely economic losses--"are primarily the domain of contract and warranty law or the law of fraud, rather than of negligence." [c]

What we recognized in Bily fits with numerous decisions from other jurisdictions--as well as the Restatement of Torts. That consensus cuts sharply against imposing a duty of care to avoid causing purely economic losses in negligence cases like this one: where purely economic losses flow not from a financial transaction meant to benefit the plaintiff (and which is later botched by the defendant), but instead from an industrial accident caused by the defendant (and which happens to occur near the plaintiff).

1.

Concerned about line-drawing problems and potentially overwhelming liability, courts across the country have rejected recovery for purely economic losses stemming from manmade calamity. Take the New York Court of Appeals' decision in 532

Madison. There, part of a 39- story office tower collapsed, shutting down more than a dozen bustling blocks of midtown Manhattan for several weeks. (See 532 Madison, 750 N.E.2d at p. 1099.) Among the plaintiffs in 532 Madison were local businesses who alleged that would-be customers "were unable to gain access to their stores" due to the disaster, forcing the plaintiffs to shut down for an extended period of time. They sued on behalf of themselves and "all other business entities" operating within the affected city blocks, [c]

The plaintiffs in 532 Madison sought compensation for the income they lost from the tower collapse. The New York Court of Appeals responded by declining to hold "that a landowner owes a duty to protect an entire urban neighborhood against purely economic losses." [c] It instead "limit[ed] the scope of defendants' duty to those who ha[d], as a result of th[e] [collapse], suffered personal injury or property damage." [c] The court explained that this limitation provided "a principled basis for reasonably apportioning liability" that was necessary to prevent potentially crushing liability to "an indeterminate group in the affected areas" who could prove "financial losses directly traceable to the" collapse.

498

Adopting that rule, the court added, was what "historically courts ha[d] done" with similar negligence claims, [c]

[The court cited other cases supporting the no-duty rule]

Against all these decisions, only the New Jersey Supreme Court's opinion in People Express Airlines, Inc. v. Consolidated Rail Corp. (1985) 100 N.J. 246 [495 A.2d 107] cuts definitively the other way. In People Express, a railroad fire forced a nearby terminal at Newark

International Airport to shut down for 12 hours--a terminal housing the plaintiffs business. The plaintiff brought a negligence claim for income lost as a result--a claim the New Jersey Supreme Court permitted to proceed. The court imposed a tort duty to guard against purely economic losses where there is "an identifiable class with respect to whom [the] defendant knows or has reason to know are likely to suffer such damages from its conduct." [c] The court stressed "that an identifiable class of plaintiffs is not simply a foreseeable class of plaintiffs"--such as happenstance bystanders--but instead a class that is "particularly foreseeable in terms of the type of persons or entities comprising the class, the certainty or predictability of their presence, the approximate numbers of those in the class, as well as the type of economic expectations disrupted." [c]

Yet decades after the demise of the airline that gave the case its name, People Express remains "a lonely outpost." [c] Its relatively ad hoc standard, embodied in a fact-intensive " 'particular foreseeability'" test, has been avoided by other courts with--as one scholar put it--"a striking degree of unanimity." [c]

2.

Little wonder the Restatement of Torts takes the dominant view. Although acknowledging that "[d]uties to avoid the unintentional infliction of economic loss" exist in certain recognized circumstances, the latest Restatement provides that there is "no general duty to avoid the unintentional infliction of economic loss on another." (Rest.3d Torts, Liability for Economic Harm (Tent. Draft No. 1, Apr. 4,

2012) § 1 (Restatement Tent. Draft 1).) [Now Restatement (Third) of Torts: Liability for Economic Harm (2020), § 1]

In justifying that position, the Restatement echoes widespread judicial concern that purely economic losses "proliferate more easily than losses of other kinds" and are "not self-limiting" in the same way. [c] Those characteristics, the Restatement explains, threaten "liabilities that are indeterminate and out of proportion to [a defendant's] culpability," and with them "exaggerated pressure to avoid an activity altogether." (Restatement (Third) of Torts: Liability for Economic Harm, § 1, cmt. c) For centuries, in fact, similar concerns have justified strict limits on private recovery for a public nuisance. (See 4 Blackstone, Commentaries 167 [noting that a public nuisance is usually not privately actionable because "it would be unreasonable to multiply suits by giving every man a separate right of action"] [c]

499

Only when the foregoing considerations are "weak or absent"--such as in Biakanja and J'Aire, but not in Bily--does a duty to guard against purely economic losses exist under the Restatement approach to negligence claims, [c] (Restatement Third, supra § 7, comment a, p. 13 [using 532 Madison's facts and the court's holding as an illustration of the Restatement view].) But in this case, as in the mine run of manmade disaster cases, those rationales apply with full force.

C.

The allegations before us underscore the ineluctable difficulty associated with imposing a duty to guard against purely economic

losses in negligence cases like this one. It may be possible to quantify the profits any one business lost because of an industrial accident, but imposing such a duty would nevertheless create line-drawing problems across--quite literally--space and time. [8] So although our duty determination must ultimately "occur at a higher level of generality" than would a jury's analysis of fact-intensive issues like breach and causation [c], we examine some particulars of Plaintiffs' claims to illustrate those two sets of persistent line-drawing problems.

* * *

[8] We express no view on whether, or to what extent, these line-drawing problems persist (or dissipate) in cyberspace. (See, e.g., Dittman v. University of Pittsburg Medical Center (Pa. 2018) 196 A.3d 1036, 1038 [considering whether to impose a tort duty to guard against "purely pecuniary" losses stemming from a data breach].)

***

We lack clear spatial bounds within which to cabin claims like those asserted here.

This case does not involve a so-called special relationship under our precedents. Plaintiffs concede--as they must--that their only relevant ties to SoCalGas are having the misfortune of operating near the Aliso Facility. Accordingly, they propose to limit the class they seek to represent based on geographic proximity alone. Putative class members here are businesses operating "in the area within five miles" of the leak, a space which Plaintiffs characterize as "the precise area from which residents were evacuated."

What is far from clear is why the five-mile line means anything. ***

Most of the foregoing difficulties [of geographic line-drawing] emerge even when an evacuation zone is set in stone. But here the lines drawn were traced in sand. Plaintiffs' own complaint acknowledges that, a few weeks after the leak was detected, the evacuation zone was extended beyond the initial five-mile mark. Why businesses operating outside the original boundary but inside the new one should not get to recover their equally real and foreseeable financial losses we do not know.

Using the boundary of an evacuation zone as a liability line might not just lack predictability. In certain circumstances, it could also inject a dangerous incentive into disaster response efforts. Consider how a company taking after Justice Oliver Wendell Holmes's infamous "bad

man"--that is, a company that "cares nothing for an ethical rule" and thus cares "only for the material consequences" of its actions--might respond to an evacuation zone rule. (Holmes, The Path of the Law (1897) 10 Harv.L.Rev. 457, 459, 461; see also Exxon Shipping Co. v. Baker (2008) 554 U.S. 471, 501-502 [looking to "Justice Holmes's 'bad man'" in a tort case brought under federal maritime law].) [The court describes the perverse incentives in the face of a liability rule calling for recovery of pure economic loss.]

Such steps might include, most obviously, overt pressure on public officials to roll back or eliminate a proposed evacuation. But that is not the only possibility. Public officials must often rely on company information to know what scale of risk the community faces. Case in point: During the very disaster at issue here, authorities allegedly

demanded from SoCalGas real-time data about the leak--and a timeline for ending it. So public officials might simply be kept in the dark. That is bad enough when, as here, the public health concerns are things like nausea and nosebleeds. But it would be much worse when, on different facts, the stakes are life and death.

***

Without adopting a (not so) bright-line evacuation zone rule, the alternative is applying a fact-intensive, case-by-case standard a la People Express. But we have already experimented with an analogous approach regarding recovery for negligent infliction of emotional distress. It did not go well. In Thing, [see below] we lamented the "arbitrary results" and the "inconsistent and often conflicting" body of law that approach produced, [c] Which is why we retreated from an ad hoc standard and imposed instead a hard-and-fast rule, [c]

We have not forgotten that experience. Today, we are confronted with hundreds of claims brought by hundreds of businesses stemming from one industrial accident--and that's just the artificially limited class Plaintiffs seek to represent, not the full universe of potential claimants whose pocketbooks were adversely (and foreseeably) affected by the leak. We see no workable way to limit geographically who may recover purely economic losses. Without one, the dangers of indeterminate liability, overdeterrence, and endless litigation are at their apex.

Nor do we see a viable way to limit temporally what purely economic losses could be recovered here.

Plaintiffs allege that they "have been and continue to be heavily impacted by the gas leak." (Italics added.) That is possible because Plaintiffs complain not of being forced to shut down during the disaster--no named plaintiff squarely alleges that--but of losing customers due to the exodus of neighborhood residents. ***These are claims without end.

True: We could conceivably cabin recovery for purely economic losses to those suffered during the disaster alone. Or we could allow recovery only for such losses suffered during a business closure, not merely for

501

systemic hits to economic demand. Yet upon closer inspection, the alluring simplicity of both approaches quickly proves to be a mirage.

[The court describes problems posed by drawing the lines suggested by plaintiffs. They may create incentives to ignore reasonable steps for health and safety. They may expand rather than reduce the costs of such events. The rules may pose a moral hazard by encouraging business closures in order to claim compensation in tort.]

D.

None of this is to say that denying recovery for those who did not suffer injury to person or property is a perfect solution in negligence cases like this one. Far from it. It is only the least-worst rule out there.

Like other courts, we acknowledge that denying recovery for purely economic losses under circumstances like these has "the vice of creating results in cases at its edge that are... 'unjust' or 'unfair'"--or

even "seemingly perverse." (State of La. ex rel. Guste v. M/V Testbank, 752 F.2d 1019 (5th Cir. 1985)); see also 532 Madison, supra, 750 N.E.2d at p. 1103 [acknowledging that this rule is "to an extent arbitrary because... invariably it cuts off liability to persons who foreseeably might be plaintiffs"].) The courthouse doors are open for people who experience slight physical injury--yet closed to others who suffer devastating purely economic losses. That line may appear arbitrary in some sense. ***

At any rate, "drawing arbitrary lines is unavoidable if we are to limit liability and establish meaningful rules for application by litigants and lower courts." [Thing below p. 512] And as we have explained, the ripple effects of industrial catastrophe on this scale in an interconnected economy defy judicial creation of more finely tuned rules. Hence the admittedly imperfect legal regime that governs in most jurisdictions--and that we now confirm governs in ours.

The Legislature, however, may be able to improve that regime in ways that would be exceptionally difficult, if not impossible, for us.

***

With the economic consequences in this case allegedly so severe, and the number of people affected allegedly so large, the Legislature could be spurred yet again to act. To be sure, purely economic losses caused by a natural gas leak may present their own set of challenges. But so too, we can only presume, of those caused by an oil spill. And in that context the Legislature has already interceded. It enacted legislation permitting those "who derive[ ] at least 25 percent" of their income from activities that utilize "natural resources" to recover--without regard to fault--for "[l]oss of profits or impairment

of earning capacity due to the injury, destruction, or loss of... natural resources" from a spill. (Gov. Code, § 8670.56.5, subd. (h)(6).) Perhaps there is a basis for further industry-specific legislative or regulatory action. And through the democratic process, the Legislature can bring to bear a mix of expertise while

502

considering competing concerns to craft a solution in tune with public demands.

A partial solution leveraging the insurance market may also prove feasible, at least for some businesses. Although many business interruption insurance policies presently available might not cover the purely economic losses alleged here, private insurance companies could conceivably see a profit-making opportunity in today's decision. Now certain that a lawsuit seeking purely economic losses of this sort will not succeed, businesses operating near a natural gas storage facility--or a dam, shipping lane, oil well, and so forth--may be more inclined to buy insurance covering profits they stand to lose if disaster strikes. If so, private insurance companies might expand their policy offerings accordingly.

Finally, we recognize Plaintiffs' concern that SoCalGas's alleged negligent behavior will go insufficiently deterred if we deny recovery here. But SoCalGas is not getting off scot-free. At oral argument, the company represented that some 50,000 claimants have alleged in other litigation that they suffered property damage caused by the leak--several hundred of whom are local businesses. It further informed us, and we have no reason to doubt, that the company has spent some $450 million on remedial measures and agreed to pay

another $120 million as part of a settlement with local authorities. SoCalGas, operating in a heavily regulated domain, also remains under investigation--and may face further consequences in the future.

III.

Risks from industrial accidents raise grave concerns for society, and we have no doubt the accident precipitating this case caused significant hardships. To compensate those harmed and to deter those who do the harming, our society assigns tort law a pivotal role. But that does not mean society's interests are best served by extending its scope indefinitely. Meaningful limits on tort liability, along with the incentives they set, are crucial to the functioning of our economy and of our courts. Where such limits leave gaps in our social fabric, tort does not stand alone: insurance also compensates, regulation also deters. And where gaps persist, the Legislature can act.

***

That prevailing rule of no recovery is, like society itself, imperfect. Yet nearly everyone follows a rule that few (if any) entirely like. California does, too. So we affirm the Court of Appeal's judgment.

Cantil-Sakauye, C. J., Chin, J., Corrigan, J., Liu, J., Kruger, J., and GROBAN, J., concurred.

NOTES AND QUESTIONS

1. Large scale disasters often implicate extensive property and personal injuries. Take for example the ongoing litigation concerning the

destructive fires in California during the summer of 2019. As of the publication of this book, Pacific Gas and Electric (PG&E), the California utility is in bankruptcy proceedings having settled for $1.9 billion with the state and public utilities, $11 billion with insurance carriers which had already paid out to victims, and $13.5 billion for uninsured victims to be paid from a trust established for the purpose of paying the victims. This is to be paid after the finalization of bankruptcy proceedings. Liability is contested on one fire and uncertainties attend PG&E's capacity to emerge from bankruptcy. See "Governor Has a Plan B For PG&E: Take It Over", NYT Feb. 7, 2020 at Bl. Recall also the massive compensation over $20 billion paid by BP in the Gulf Oil spill (Deep Water Horizon) litigation. None of these amounts included pure economic losses.

2. The foundational authority in the Common Law world establishing no duty is Justice Holmes's opinion in Robins Dry Dock & Repair Co. v. Flint, supra. But see Goldberg, Recovery of Pure Economic Loss in Tort: Another Look at Robins Dry Dock v. Flint, 20 J. of Legal Stud. 249 (1991), noting that "[t]ort law is under constant pressure to extend the boundaries of what constitutes a compensable injury" and that Robins is inapposite in many contexts in which it has been employed to deny liability. He finds a requirement for "some intellectual apparatus for evaluating the myriad of claims for recovery of mere economic loss." Does the principal case provide such apparatus?

3. The rule in Robins was a backwater in American law until recently: Jane Stapleton, Comparative Economic Loss: Lessons from Case-

Law- Focused "Middle Theory," 50 UCLA L. Rev. 531, at 536 (2002). The American Law Institute has focused and refined discussion of recovery of pure economic loss, that is, economic loss not resulting from injury to person or property. See Chapter 1 of its Restatement of the Law (Third) of Torts: Liability for Economic Harm, (2020). As noted in the principal case, the courts and Congress have created some inroads to permit recovery for pure economic loss. Fishermen suffering disruption to their livelihood by defendant's negligent conduct have been permitted to recover for consequent economic losses: Union Oil Co. v. Oppen, 501 F.2d 588 (9th Cir. 1974). See cases collected Restatement (Third) of Torts: Liability for Economic Harm, § 7 comment e. Where state and federal law on the issue conflict, state law may prevail in allowing a foreseeability analysis to permit recovery for pure economic loss contrary to the Robins rule. See In re Complaint of Nautilus Motor Tanker Co., 900 F. Supp. 697 (D.N.J. 1995).

4. Although the rule in Robins has been adopted throughout Anglo American law, the roots are independent. Often applied in the admiralty context in the United States, in England the rule is traceable to traditional common law. See Cattle v. Stockton Waterworks Co. 10 Q.B. 453 (1875).

5. The High Court of Australia extended liability to a potato grower whose statutorily prohibited importation of non-certified seed caused economic harm to his neighboring non-GM potato growers under considerations of foreseeability, proximity, and policy. See Perre v. Apand Pty Ltd, 198 CLR 180; HCA 36 (1999) (Austl.). Would this harm fall within the exception to the no-liability rule in the principal case?

6. When the loss arises from the defectiveness of a good or structure, the proper action may be a products liability claim. See East River Steamship Corp. v. Transamerica Delaval, Inc., 476 U.S. 858 (U.S. 1986) (holding no duty for the manufacturer to compensate for economic loss when economic loss from repairs resulted from faulty construction of ship turbines and noting this "was most naturally understood as a warranty claim"). See discussion infra of the tort aspects of warranty, pages 823-834. How is the damage to be characterized in these cases?

A. the defective engine explodes causing the ship to sink; liability to the injured crew, and to the ship's owner for the loss of his ship?

B. design defect in a fishing vessel's hydraulic system causes her to catch fire and sink; the accident destroys, in addition to the vessel, equipment added after the initial sale, namely a skiff, a fishing net, and spare parts: Saratoga Fishing Co. v. J. M. Martinac & Co., 520 U.S. 875 (1997)?

C. the defective engine threatens to explode, necessitating drydocking and repairs and resulting in wasted hire charges and a loss of profits? Colleton Preparatory Academy v. Hoover Universal, 379 S.C. 181, 666 S.E.2d 247 (2008) (duty extends to economic loss where the breach threatens physical or bodily harm).

D. the defective engine does not work at all when the manufacturer knew the purpose to which the engine would be put?

7. The courts do not always restrict liability via the duty issue. In Petitions of Kinsman Transit Co., 388 F.2d 821 (2d Cir.1968), supra

Chapter 6, Kaufman J. employed a proximate cause analysis to deny recovery for economic losses suffered by wheat owners when Buffalo harbor was blocked due to the defendant's negligence.

8. Should government take steps to compensate the victims of large scale disasters, as discussed in the principal case? Recall Surocco v. Geary, Chapter 3:6. Also see discussion of compensation schemes in Chapter 24.

4. Emotional Distress

Daley v. LaCroix

Supreme Court of Michigan, 1970.

384 Mich. 4, 179 N.W.2d 390.

T.M. Kavanagh, Judge. ***On July 16, 1963, about 10:00 p.m., defendant was traveling west on 15 Mile Road near plaintiffs' farm in Macomb county. Defendant's vehicle left the highway, traveled 63 feet in the air and 209 feet beyond the edge of the road and, in the process, sheared off a utility pole. A number of high voltage lines snapped, striking the electrical lines leading into plaintiffs' house and caused a great electrical explosion resulting in considerable property damage.

Plaintiffs claimed, in addition to property damage, that Estelle Daley suffered traumatic neurosis, emotional disturbance and nervous

upset, and that Timothy Daley suffered emotional disturbance and nervousness as a result of the explosion and the attendant circumstances. ***

The Court of Appeals (13 Mich.App. 26, 163 N.W.2d 666) affirmed the trial court's grant of a directed verdict upon the ground that Michigan law denies recovery for negligently caused emotional disturbance absent a showing of physical impact. ***

Recovery for mental disturbance caused by defendant's negligence, but without accompanying physical injury or physical consequences or any independent basis for tort liability, has been generally denied with the notable exception of the sui generis cases involving telegraphic companies and negligent mishandling of corpses. ***

[However], compensation for a purely mental component of damages where defendant negligently inflicts an immediate physical injury has always been awarded as "parasitic damages." ***

The final bastion against allowing recovery [for negligent infliction of emotional harm] is the requirement of some impact upon the person of the plaintiff. It is this doctrine and its continued vitality in our State which we must now consider. ***

In the landmark decision of Victorian Railways Commissioners v. Coultas, 13 A.C. 222 (1888), recovery for a much disputed damage to plaintiffs nervous system caused by defendant's oncoming train was denied upon the ground that:

"Damages arising from mere sudden terror unaccompanied by any actual physical injury, but occasioning a nervous or mental shock, cannot under such circumstances, their Lordships think, be considered a consequence which, in the ordinary course of things, would flow from the negligence of the gate-keeper. If it were held that they can, it appears to their Lordships that it would be extending the liability for negligence much beyond what that liability has hitherto

been held to be. Not only in such a case as the present, but in every case where an accident caused by negligence had given a person a serious nervous shock, there might be a claim for damages on account of mental injury. The difficulty which now often exists in case of alleged physical injuries of determining whether they were caused by the negligent act would be greatly increased, and a wide field opened for imaginary claims."

As a further hedge against fraudulent or fancied claims and the feared flood of litigation, a large number of American courts in adopting the Victorian Railways Commissioners rule superimposed the additional requirement of a contemporaneous physical impact. ***

The leading American authority of Mitchell v. Rochester Ry. Co. (1896), 151 N.Y. 107, 45 N.E. 354, with "remorseless logic" stated the position as follows (pp. 109, 110, 45 N.E. p. 354):

506

"Assuming that fright cannot form the basis of an action, it is obvious that no recovery can be had for injuries resulting therefrom. That the result may be nervous disease, blindness, insanity, or even a miscarriage, in no way changes the principle. These results merely show the degree of fright, or the extent of the damages. ***Therefore the logical result of the respondent's concession would seem to be, not only that no recovery can be had for mere fright, but also that none can be had for injuries which are the direct consequences of it. ***These considerations lead to the conclusion that no recovery can be had for injuries sustained by fright occasioned by the negligence of another, where there is no immediate personal injury." ***

The life of the law, however, has not been logic but experience. Bowing to the onslaught of exceptions [9] and the growing irreconcilability between legal fact and decretal fiction, a rapidly increasing majority of courts have repudiated the "requirement of impact" and have regarded the physical consequences themselves or the circumstances of the accident as sufficient guarantee.

* * *

[9] The divergent approaches of the courts to find an exception to the Rochester Ry. Co. rule is excellently summarized by Prosser, Torts (3d Ed.), pages 350, 351:

"Apart from some quite untenable notions of causal connection, the theory seems to be that the 'impact' affords the desired guarantee that the mental disturbance is genuine. But the same courts have found 'impact' in minor contacts with the person which play no part in causing the real harm, and in themselves can have no importance whatever. 'Impact' has meant a slight blow, a trifling burn or electric shock, a trivial jolt or jar. a forcible seating on the floor, dust in the eye, or the inhalation of smoke. The requirement has even been satisfied by a fall brought about by a faint after a collision, or the plaintiffs own wrenching of her shoulder in reaction to the fright. 'The magic formula 'impact' is pronounced; the door opens to a full joy of a complete recovery.' A Georgia circus case has reduced the whole matter to a complete absurdity by finding 'impact' where the defendant's horse 'evacuated his bowels' into the plaintiffs lap."

Pertinently, the New York Court of Appeals in Battalia v. State (1961), 10 N.Y.2d 237, 219 N.Y.S.2d 34, 176 N.E.2d 729, expressly overruled its Mitchell v. Rochester Ry. Co., decision, supra[c]:

"Before passing to a resume of the evolution of the doctrine in this State, it is well to note that it has been thoroughly repudiated by the English courts which initiated it, rejected by a majority of American jurisdictions, abandoned by many which originally adopted it, and diluted, through numerous exceptions, in the minority which retained it. Moreover, it is the opinion of the scholars that the right to bring an action should be enforced."

Based upon close scrutiny of our precedential cases and the authority upon which they rested and cognizant of the changed circumstances relating to the factual and scientific information available, we conclude that the "impact" requirement of the common law should not have a continuing effect in Michigan and we therefore overrule the principle to the contrary contained in our previous cases.

We hold that where a definite and objective physical injury is produced as a result of emotional distress proximately caused by defendant's negligent conduct, the plaintiff in a properly pleaded and

507

proved action may recover in damages for such physical consequences to himself notwithstanding the absence of any physical impact upon plaintiff at the time of the mental shock.

The rule we adopt today is, of course, subject to familiar limitations.

Generally, defendant's standard of conduct is measured by reactions to be expected of normal persons. Absent specific knowledge of plaintiffs unusual sensitivity, there should be no recovery for

hypersensitive mental disturbance where a normal individual would not be affected under the circumstances. ***

Further, plaintiff has the burden of proof that the physical harm or illness is the natural result of the fright proximately caused by defendant's conduct. In other words, men of ordinary experience and judgment must be able to conclude, after sufficient testimony has been given to enable them to form an intelligent opinion, that the physical harm complained of is a natural consequence of the alleged emotional disturbance which in turn is proximately caused by defendant's conduct. ***

In view of the above holding it becomes necessary to discuss another issue raised by plaintiffs--whether, considering the evidence in the light most favorable to plaintiffs, sufficient evidence was presented to create a jury question. Denying plaintiffs' motion for a new trial which sought to set aside the directed verdict against plaintiffs Timothy and Estelle Daley, the trial court reasoned:

"There was no expert or medical testimony offered on behalf of the minor, Timothy. Extremely vague lay testimony was offered to the effect he was nervous. It was so vague and uncertain it did not, in the court's opinion, reach the dignity of possessing any evidentiary value whatever. It afforded the jury nothing into which the jury could put its 'damage-assessment teeth'." [c]

"On behalf of Estelle Daley, Dr. Goldin, a psychiatrist, testified. Direct and cross examination were extensive. He testified clearly that she had been neurotic since childhood and the incident complained of did not cause her neurosis. Dr. Goldin indicated the incident could

have broken down her 'balances' somewhat although she did not consult him until a year after the accident.

"The lay testimony was of the same type as was given in Timothy's claim. It was vague and uncertain and indefinite."

From an examination of the evidence presented on behalf of Timothy Daley, we believe that, even though the question is a close one, on favorable view, he presented facts from which under our new rule as announced in this case, a jury could reasonably find or infer a causal relation between defendant's alleged negligence and the injuries alleged. We conclude that Timothy Daley should be given an opportunity to prove his alleged cause of action, if he can do so, at a new trial.

508

Plaintiff Estelle Daley's claim that she suffered physical consequences naturally arising from the fright proximately caused by defendant's conduct is amply supported by the record. Her sudden loss of weight, her inability to perform ordinary household duties, her extreme nervousness and irritability, repeatedly testified to by plaintiffs, are facts from which a jury could find or infer a compensable physical injury.

The plaintiffs' testimony is also supported by the medical expert witness, who diagnosed plaintiff Estelle Daley as "a chronic psychoneurotic ***in partial remission," and who attributed this state or condition to the explosion directly caused by defendant's acts:

"Q. I want to ask one more question, from everything that you know about this case, Doctor, do you feel there is a causal relationship

between the explosion of July, 1963 and the symptoms that she has shown that you have reported?

"A. Yes, the trauma is the triggering point for her breaking the balance in her.

"Q. By trauma?

"A. Any trauma, may be emotional trauma or physical trauma, in this case having this explosive sound that she heard and the fears that were attendant with the explosive sounds."

We hold ***that this record presents sufficient facts from which a jury could reasonably find, or infer therefrom, a causal relationship between the fright occasioned by defendant's negligence and the injuries alleged in plaintiffs' complaint. The trial court erred in taking plaintiff Estelle Daley's case from the jury. [Cc] It follows that the trial court also erred in striking plaintiff Leonard H. Daley's claim for medical expenses.

The order of the trial court granting directed verdicts against plaintiffs Estelle Daley and Timothy Daley and the Court of Appeals' affirmance thereof are reversed and the causes remanded for new trials. ***

Costs shall abide the final result.

Dethmers, T.G. Kavanagh, Adams and Black, JJ., concurred with T.M. Kavanagh.

BRENNAN, Chief Justice (dissenting). If this were a case where a definite and objective physical injury was produced without impact by the negligent act of the defendant, it might be appropriate to adopt

the rule set forth in the Restatement (Second) of Torts § 436(2) (1979).

This is not such a case. Plaintiffs did not suffer definite and objective physical injury. Plaintiffs suffered, if anything, indefinite and subjective injury. Traumatic neurosis, emotional disturbance and nervous upset are the very type of complaints which ought to be eliminated by restricting "no impact" cases to those in which a definite and objective physical injury occurs.

509

I would affirm the trial court's grant of directed verdict.

KELLY, J., concurred with BRENNAN, C.J.

NOTES AND QUESTIONS

1. Most jurisdictions do not apply the "impact" rule, although some continue to champion it, e.g., R.J. v. Humana of Florida, 652 So.2d 360 (Fla. 1995); and Lee v. State Farm Mut. Ins. Co., 272 Ga. 583, 533 S.E.2d 82 (2000).

2. The policy reasons for and against allowing recovery despite the absence of an impact are vigorously and colorfully expounded in the dissenting opinions in two Pennsylvania cases. In Bosley v. Andrews, 393 Pa. 161, 169, 142 A.2d 263, 267 (1958), Musmanno, J., dissented against the continued application of the impact rule. In Niederman v. Brodsky, 436 Pa. 401, 413, 261 A.2d 84, 90 (1970), Bell, C.J., dissented against the overruling of the impact rule.

3. Where the plaintiff has narrowly escaped imminent and serious harm to his own physical well being, the courts have readily allowed recovery upon a demonstration of ensuing mental disturbance. See

Falzone v. Busch, 45 N.J. 559, 214 A.2d 12 (1965) (pedestrian almost struck by automobile).

4. When plaintiffs alleged emotional suffering stems from other causes, the cases are more difficult to decide. Thus:

A. Defendant sold plaintiff a water softener that caused a rusty discoloration of the water in plaintiffs home. Plaintiff noticed the discoloration after she drank a cup of coffee made from this water and claimed she suffered a heart attack as a result of her shock. The court denied her claim. See Caputzal v. Lindsay Co., 48 N.J. 69, 222 A.2d 513 (1966). Is the denial of a claim best placed on the ground of proximate cause or duty? In the most famous and foundational case of English and Commonwealth tort law, Donoghue v. Stevenson, [1932] A.C. 562, the House of Lords decided that the relationship of the manufacturer of ginger beer and eventual consumer gave rise to a duty of care. Mrs. Stevenson claimed she had suffered severe shock as a result of witnessing the decomposed remains of a snail emerge from a bottle of ginger beer made by Donoghue, some of which she had already drunk.

B. Mrs. Donoghue's American "cousin," Ms. Ellington, was more imaginative. She thought that the Coca-Cola she was drinking contained a worm. It was in fact a piece of Good-N-Plenty candy that did not touch her lips. Should she be able to recover for her emotional distress? See Ellington v. Coca-Cola Bottling Co., 717 P.2d 109 (Oki. 1986) (finding that plaintiff could recover for proven physical injury induced by mental anguish or mental anguish induced by physical injury). In another Coca-Cola case, plaintiffs, after drinking the contents, believed they saw a condom lurking in the

bottle. They undertook HIV tests and suffered emotional distress. The "condom" was actually mold. Coca-Cola Bottling Co. v. Hagan, 813 So.2d 167 (Fla. App. 2002) (recognizing that the impact rule did not bar recovery for mental anguish unaccompanied by physical injury against a defendant

responsible for providing a plaintiff with food or beverage containing a foreign substance, the plaintiffs failed to establish a reasonable fear of contracting AIDS to permit recovery). Is it appropriate to insist on a standard of normality? How would this comport with the thin skull cases?

5. Should fear of becoming ill or dying at a later date be compensable? The question often arises in litigation over toxic torts and latent diseases. What criteria should be applied? Is the impact rule really at issue here? For example:

A. Asbestos. A person incurs asbestosis (scarring of the lung) resulting from asbestos exposure. In addition to recovering for this injury, should he also be able to recover damages for fear of contracting lung cancer? See Jackson v. John-Manville Sales Corp. 781 F.2d 394 (5th Cir. 1986), cert, denied. 478 U.S. 1022 (1986). Suppose there has been asbestos exposure, but no illness has yet occurred? The Supreme Court, in Norfolk v. Ayers, 538 U.S. 135 (2003), required that the fear of contracting cancer must be genuine and severe.

B. HIV/AIDS. Courts have split regarding whether actual exposure is necessary to permit recovery for fear of contracting HIV/AIDS. See Majca v. Beekil, 183 I11.2d 407, 233 III.Dec. 810, 701 N.E.2d 1084

(1998) (denying damages for fear of contracting HIV from cut from scalpel left in waste basket and requiring actual exposure to HIV). But cf. Williamson v. Waldman, 150 N.J. 232, 696 A.2d 14 (1997), rejecting the actual exposure test for a reasonableness standard of the emotional distress measured by "a level of knowledge of the disease that is then-current, accurate, and generally available to the public." But compare, Hedgepeth v. Whitman Walker Clinic, 22 A.3d 789 (DC 2011), where District of Columbia Court of Appeals, sitting en banc, held that a plaintiff who was told he was HIV positive when he in fact was not, and suffered depression during the five years he dealt with the misdiagnosis, had a cause of action for the negligent infliction of emotional distress against the doctor and clinic. The court expanded the "zone of physical danger" concept generally applied to tort actions:... the zone of physical danger requirement imposes an unnecessary limitation upon, and is not to be applied indiscriminately in all cases to, claims of emotional distress brought against a defendant who has a relationship with the plaintiff, or has undertaken an obligation to the plaintiff, and whose negligence causes serious emotional distress to the plaintiff. A duty to avoid negligent infliction of serious emotional distress will be recognized where the defendant has an obligation to care for the plaintiffs emotional well-being or the plaintiffs emotional well-being is necessarily implicated by the nature of the defendant's undertaking to or relationship with the plaintiff, and serious emotional distress is especially likely to be caused by the defendant's negligence.

C. Cancer from Other Toxic Exposure. A seaman was soaked in toxic chemicals, causing physical injury. Should he be compensated for emotional distress for fear of developing cancer? See Hagerty v.

L&L Marine Services, Inc. 788 F.2d 315 (5th Cir. 1986) (finding that fear of contracting cancer later in life was a present state of mental anguish and recoverable). Toxic tort cases introduce a plethora of problems--numerosity, wide distribution of

claims, long latency periods, indeterminate proof of harm and multiple sources of responsibility. The majority of courts have denied recovery. But see discussion Restatement (Third) of Torts § 47, comment k (2012) (collecting cases).

6. How should a court determine what is or is not a "physical injury"? Should it be left to the jury to decide the question on the basis of conflicting expert testimony? Is there any viable alternative to the "physical injury threshold"? Consider the statement of Judge McEntee in Petition of the United States, 418 F.2d 264 (1st Cir.1969): "The term 'physical' is not used in its ordinary sense for purposes of applying the 'physical consequences' rule. Rather, the word is used to indicate that the condition or illness for which recovery is sought must be one susceptible of objective determination. Hence, a definite nervous disorder is a 'physical injury' sufficient to support an action for damages for negligence." In Johnson v. Ruark Obstetrics & Gynecology Assoc., 327 N.C. 283, 303-4, 395 S.E.2d 85, 97 (1990), the court held that recovery depended upon proof of "severe emotional distress" which meant "any emotional or mental disorder, such as, for example, neurosis, psychosis, chronic depression, phobia, or any other type of severe and disabling emotional or mental condition which may be generally recognized and diagnosed by professionals trained to do so."

7. Uncertainties of tracing causation from defendant's conduct to plaintiffs injuries have formed a basic rationale for adhering to the impact rule. The Supreme Court of Virginia has sponsored a procedural safeguard on this issue: plaintiff must prove causation in fact by "clear and convincing" evidence. Womack v. Eldridge, 215 Va. 338, 210 S.E.2d 145 (1974). Yet the courts have often pointed to medical scientific knowledge as a reason for extending liability, e.g.:

There is ***nothing unusual or peculiar in the recognition by the law that compensable injury may be caused just as much by a direct assault upon the mind or the nervous system as by direct physical contact with the body. This is no more than the natural and inevitable result of the growing appreciation by modern medical science of recognizable causal connections between shock to the nervous system and physical or psychiatric illness.

Alcock v. Chief Constable of the South Yorkshire Police, [1992] 1 A.C. 310, at 406-407 (House of Lords) per Lord Oliver. In Flax v. DaimlerChrysler Corp., 272 S.W.3d 521 (Tenn. 2008), the court insisted that to establish his claim, plaintiff was required to "present expert medical or scientific evidence that he had suffered a severe emotional injury," id., 528.

8. Most states retain the physical manifestation requirement, but two exceptions are well recognized. The death-telegram rule (recovery for emotional harm resulting from negligent transmission by a telegraph company of a message announcing death) is a minority rule but followed by a number of the states. See Johnson v. State, 37 N.Y.2d 378, 334 N.E.2d 590, 372 N.Y.S.2d 638 (1975); Mentzer v. Western Union Tel. Co., 93 Iowa 752, 62 N.W. 1 (1895); Western

Union Tel. Co. v. Redding, 100 Fla. 495, 129 So. 743 (1930); Camper v. Minor, 915 S.W.2d 437, 443 (Tenn. 1996) (recognizing

the exception); Oswald v. LeGrand, 453 N.W.2d 634, 639 (Iowa 1990) (recognizing the exception). The Federal rule allows recovery if physical harm results. Kaufman v. Western Union Tel. Co., 224 F.2d 723 (5th Cir. 1955), cert, denied, 350 U.S. 947 (1956).

The second exception involves negligent interference with dead bodies. Liability fulfills a gap-filling function in providing incentives for due care of human remains in light of the uncertain property rights loved ones possess in the corpse. A more direct route to such protection would be through a property concept that was developed as a result of the carnage in the Civil War: see Rogers, Unearthing the Origins of Quasi-Property Status, 71 Hastings L.J.... (forthcoming August 2020). For cases finding tort rights in emotional distress see, Lott v. State, 32 Mise.2d 296, 225 N.Y.S.2d 434 (1962); Christensen v. Superior Court, 230 Cal.App.3d 798, 271 Cal.Rptr. 360 (1990), superseded, 54 Cal.3d 868, 820 P.2d 181, 2 Cal.Rptr.2d 79 (1991) (defendant mortuaries and crematoriums mishandling of about 16,000 decedents); Dufour v. Westlawn Cemeteries, Inc., 639 So.2d 843 (La.Ct.App. 1994); Contreraz v. Michelotti-Sawyers, 271 Mont. 300, 896 P.2d 1118 (1995); but see Gonzalez v. Metropolitan Dade County Public Health Trust, 651 So.2d 673, 675 (Fla. 1995) (recognizing the difficulty of distinguishing between normal grief and emotional distress from mishandling of a dead body, court affirmed Florida law requiring plaintiff prove physical injury or wanton and willful conduct by the defendant to maintain an action for mental

anguish based upon mishandling of a dead body). Corso v. Crawford Dog and Cat Hosp., 97 Mise.2d 530, 415 N.Y.S.2d 182 (1979) (substitution in casket of cat for beloved pet dog).

Thing v. La Chusa

Supreme Court of California, In Bank, 1989.

48 Cal.3d 644, 771 P.2d 814, 257 Cal.Rptr. 865.

Eagleson, Justice.

The narrow issue presented by the parties in this case is whether the Court of Appeal correctly held that a mother who did not witness an accident in which an automobile struck and injured her child may recover damages from the negligent driver for the emotional distress she suffered when she arrived at the accident scene. The more important question this issue poses for the court, however, is whether the "guidelines" enunciated by this court in Dillon v. Legg (1968) 68 Cal.2d 728, 69 Cal.Rptr. 72, 441 P.2d 912, are adequate, or if they should be refined to create greater certainty in this area of the law.

[In Dillon, the court had enunciated a test based upon whether defendant should have reasonably foreseen the injury to plaintiff, the victim's mother, who had suffered emotional distress. This foreseeability test of duty demanded courts "take in account such factors as the following: (1) Whether plaintiff was located near the scene of the accident as contrasted with one who was a distance away from it. (2) Whether the shock resulted from a direct emotional impact upon plaintiff from the

sensory and contemporaneous observance of the accident, as contrasted with learning of the accident from others after its occurrence. (3) Whether plaintiff and the victim were closely related, as contrasted with an absence of any relationship or the presence of only a distant relationship."]

***

On December 8, 1980, John Thing, a minor, was injured when struck by an automobile operated by defendant James V. La Chusa. His mother, plaintiff Maria Thing, was nearby, but neither saw nor heard the accident. She became aware of the injury to her son when told by a daughter that John had been struck by a car. She rushed to the scene where she saw her bloody and unconscious child, whom she believed was dead, lying in the roadway. Maria sued defendants, alleging that she suffered great emotional disturbance, shock, and injury to her nervous system as a result of these events, and that the injury to John and emotional distress she suffered were proximately caused by defendants' negligence.

The trial court granted defendants' motion for summary judgment, ruling that, as a matter of law, Maria could not establish a claim for negligent infliction of emotional distress because she did not contemporaneously and sensorily perceive the accident.

***

[N]egligence cases permitting recovery of damages for emotional distress had developed in California at the time Siliznoff [supra Chapter II], [C], was decided. Initially, however, in negligence cases the right to recover for emotional distress had been limited to circumstances in which the victim was himself injured and emotional

distress was a "parasitic" item of damages, or if a plaintiff who had been in the "zone of danger" did not suffer injury from impact, but did suffer physical injury as a result of the emotional trauma. [C]

* *

***[I]n Amaya v. Home Ice, Fuel & Supply Co., supra, ***the court had declined the opportunity to broaden the right to recover for emotional distress.

***[A]fter confirming that the "impact rule" making a contemporaneous physical impact a prerequisite to recovery for negligently induced fright or shock was not applicable in California, [the court] held damages could not be recovered by persons outside the zone of danger created by the defendant's negligence even when that shock was reflected in physiological symptoms.

***

The Amaya view was short lived, however. Only five years later, the decision was overruled in Dillon v. Legg, supra.

514

In Dillon ***, the issue was limited. The mother and sister of a deceased infant each sought damages for "great emotional disturbance and shock and injury to her nervous system" which had caused them great mental pain and suffering. Allegedly these injuries were caused by witnessing the defendant's negligently operated vehicle collide with and roll over the infant as she lawfully crossed a street. The mother was not herself endangered by the defendant's conduct. The sister may have been. The trial court had therefore granted the defendant's motion for judgment on the

pleadings as to the mother, but had denied it with respect to the sister of the decedent. Faced with the incongruous result demanded by the "zone of danger" rule which denied recovery for emotional distress and consequent physical injury unless the plaintiff himself had been threatened with injury, the court overruled Amaya.

***

The difficulty in defining the limits on recovery ***was rejected as a basis for denying recovery, but the court did recognize that "to limit the otherwise potentially infinite liability which would follow every negligent act, the law of torts holds defendant amenable only for injuries to others which to defendant at the time were reasonably foreseeable." [C] ***Thus, while the court indicated that foreseeability of the injury was to be the primary consideration in finding duty, it simultaneously recognized that policy considerations mandated that infinite liability be avoided by restrictions that would somehow narrow the class of potential plaintiffs. But the test limiting liability was itself amorphous.

In adopting foreseeability of the injury as the basis of a negligent actor's duty, the Dillon court identified the risks that could give rise to that duty as both physical impact and emotional disturbance brought on by the conduct. Having done so, the Dillon court conceded: "We cannot now predetermine defendant's obligation in every situation by a fixed category; no immutable rule can establish the extent of that obligation for every circumstance of the future." [C] ***

***

The expectation of the Dillon majority that the parameters of the tort would be further defined in future cases has not been fulfilled.

Instead, subsequent decisions of the Courts of Appeal and this court, have created more uncertainty. And, just as the "zone of danger" limitation was abandoned in Dillon as an arbitrary restriction on recovery, the Dillon guidelines have been relaxed on grounds that they, too, created arbitrary limitations on recovery. Little consideration has been given in post-Dillon decisions to the importance of avoiding the limitless exposure to liability that the pure foreseeability test of "duty" would create and towards which these decisions have moved.

Both the physical harm and accident or sudden occurrence elements were eliminated, however, in Molien v. Kaiser Foundation Hospitals, 27 Cal.3d 916, 167 Cal.Rptr. 831, 616 P.2d 813, at least as to those plaintiffs

515

who could claim to be "direct victims" of the defendant's negligence. The court held in Molien that a defendant hospital and doctor owed a duty directly to the husband of a patient who had been diagnosed erroneously as having syphilis, and had been told to so advise the husband in order that he could receive testing and, if necessary, treatment.

In finding the existence of a duty to the husband of the patient, the court reasoned that the risk of harm to the husband was reasonably foreseeable, and that the tortious conduct was directed to him as well as the patient. [C] The status of the plaintiff mother in Dillon was distinguished as she suffered her injury solely as a "percipient witness" to the infliction of injury on another. She was therefore a "bystander" rather than a "direct victim." ***The limitations on

recovery for emotional distress that had been suggested in the Dillon "guidelines" were not applicable to "direct" victims of a defendant's negligence.

The subtleties in the distinction between the right to recover as a "bystander" and as a "direct victim" created what one Court of Appeal has described as an "amorphous nether realm" [Cc] ***

"The problem ***is: how are we to distinguish between 'direct victim' cases and 'bystander' cases? ***The inference suggested is that a 'direct victim' is a person whose emotional distress is a reasonably foreseeable consequence of the conduct of the defendant. This does not provide criteria which delimit what counts as reasonable foreseeability. It leads into the quagmire of novel claims which the Supreme Court foresaw as an unacceptable consequence of a 'pure' foreseeability analysis ***** [C]

"[F]oreseeability," the court noted later in Newton v. Kaiser Foundation Hospitals, 184 Cal.App.3d 386, 391, 228 Cal.Rptr. 890, "is endless because foreseeability, like light, travels indefinitely in a vacuum." Molien, supra, thus, left to future cases the "unenviable tasks of distinguishing bystander from direct victim cases and establishing limits for the latter ***with a 'foreseeable' diversity of results."

***In order to avoid limitless liability out of all proportion to the degree of a defendant's negligence, and against which it is impossible to insure without imposing unacceptable costs on those among whom the risk is spread, the right to recover for negligently caused emotional distress must be limited.

We acknowledged and addressed one aspect of this problem in Elden v. Sheldon (1988) 46 Cal.3d 267, 250 Cal.Rptr. 254, 758 P.2d 582, holding that cohabitation, without formal marriage, did not constitute the close relationship contemplated by the Dillon guidelines and that foreseeability of injury alone does not justify imposition of liability for negligently caused emotional distress. In so doing, we again recognized that policy considerations justify restrictions on recovery for emotional distress notwithstanding the sometimes arbitrary result, and that the court has an obligation to establish those restrictions. Elden confirmed

516

that those policy considerations include both the burden on the courts in applying vaguely defined criteria and the importance of limiting the scope of liability for negligence. If the consequences of a negligent act are not limited an intolerable burden is placed on society. A "bright line in this area of the law is essential." [C] ***

This case ***presents a broader question and thus affords the court a better opportunity to meet its obligation to create a clear rule under which liability may be determined. In so doing we balance the impact of arbitrary lines which deny recovery to some victims whose injury is very real against that of imposing liability out of proportion to culpability for negligent acts. We also weigh in the balance the importance to the administration of justice of clear guidelines under which litigants and trial courts may resolve disputes.

***

The impact of personally observing the injury-producing event in most, although concededly not all, cases distinguishes the plaintiffs

resultant emotional distress from the emotion felt when one learns of the injury or death of a loved one from another, or observes pain and suffering but not the traumatic cause of the injury. Greater certainty and a more reasonable limit on the exposure to liability for negligent conduct is possible by limiting the right to recover for negligently caused emotional distress to plaintiffs who personally and contemporaneously perceive the injury-producing event and its traumatic consequences.

Similar reasoning justifies limiting recovery to persons closely related by blood or marriage since, in common experience, it is more likely that they will suffer a greater degree of emotional distress than a disinterested witness to negligently caused pain and suffering or death. Such limitations are indisputably arbitrary since it is foreseeable that in some cases unrelated persons have a relationship to the victim or are so affected by the traumatic event that they suffer equivalent emotional distress. As we have observed, however, drawing arbitrary lines is unavoidable if we are to limit liability and establish meaningful rules for application by litigants and lower courts.

No policy supports extension of the right to recover ***to a larger class of plaintiffs. Emotional distress is an intangible condition experienced by most persons, even absent negligence, at some time during their lives. Close relatives suffer serious, even debilitating, emotional reactions to the injury, death, serious illness, and evident suffering of loved ones. These reactions occur regardless of the cause of the loved one's illness, injury, or death. That relatives will have severe emotional distress is an unavoidable aspect of the "human condition." The emotional distress for which monetary

damages may be recovered, however, ought not to be that form of acute emotional distress or the transient emotional reaction to the occasional gruesome or horrible incident to which every person may potentially be exposed in an

517

industrial and sometimes violent society. Regardless of the depth of feeling or the resultant physical or mental illness that results from witnessing violent events, persons unrelated to those injured or killed may not now recover for such emotional upheaval even if negligently caused. Close relatives who witness the accidental injury or death of a loved one and suffer emotional trauma may not recover when the loved one's conduct was the cause of that emotional trauma. The overwhelming majority of "emotional distress" which we endure, therefore, is not compensable.

Unlike an award of damages for intentionally caused emotional distress which is punitive, the award ***simply reflects society's belief that a negligent actor bears some responsibility for the effect of his conduct on persons other than those who suffer physical injury. In identifying those persons and the circumstances in which the defendant will be held to redress the injury, it is appropriate to restrict recovery to those persons who will suffer an emotional impact beyond the impact that can be anticipated whenever one learns that a relative is injured, or dies, or the emotion felt by a "disinterested" witness. The class of potential plaintiffs should be limited to those who because of their relationship suffer the greatest emotional distress. When the right to recover is limited in this manner, the

liability bears a reasonable relationship to the culpability of the negligent defendant.

The elements which justify and simultaneously limit an award of damages for emotional distress caused by awareness of the negligent infliction of injury to a close relative are ***the traumatic emotional effect on the plaintiff who contemporaneously observes both the event or conduct that causes serious injury to a close relative and the injury itself. Even if it is "foreseeable" that persons other than closely related percipient witnesses may suffer emotional distress, this fact does not justify the imposition of what threatens to become unlimited liability for emotional distress on a defendant whose conduct is simply negligent. Nor does such abstract "foreseeability" warrant continued reliance on the assumption that the limits of liability will become any clearer if lower courts are permitted to continue approaching the issue on a "case-to-case" basis some 20 years after Dillon.

We conclude, therefore, that a plaintiff may recover damages for emotional distress caused by observing the negligently inflicted injury of a third person if, but only if, said plaintiff: (1) is closely related to the injury victim; (2) is present at the scene of the injury-producing event at the time it occurs and is then aware that it is causing injury to the victim; and (3) as a result suffers serious emotional distress--a reaction beyond that which would be anticipated in a disinterested witness and which is not an abnormal response to the circumstances. ***Experience has shown that, contrary to the expectation of the Dillon majority, ***there are clear judicial days on which a court can foresee forever and thus determine liability but none on which that foresight alone provides a

socially and judicially acceptable limit on recovery of damages for that injury.

The undisputed facts establish that plaintiff was not present at the scene of the accident in which her son was injured. She did not observe defendant's conduct and was not aware that her son was being injured. She could not, therefore, establish a right to recover for the emotional distress she suffered when she subsequently learned of the accident and observed its consequences. The order granting summary judgment was proper.

The judgment of the Court of Appeal is reversed.

Each party shall bear its own costs on appeal.

Lucas, C.J., and Panelli and Arguelles, JJ., concur. Justice KAUFMAN concurred but disagreed with the reasoning of the majority and dissent, finding that Dillon ought to be overruled and liability be confined to those in the zone of danger put in fear of their own safety. JUSTICE Broussard dissented.

NOTES AND QUESTIONS

1. The principal case traces a distinction between direct and bystander victims. The distinction is treated more satisfactorily by Justice Mosk in his dissent. The "direct victim" cases are denoted by a "special relationship" between the plaintiff and defendant. In Molien, supra, defendant physician had plaintiff directly in mind when giving advice to his patient, plaintiffs wife. In Marlene F. v. Affiliated Psychiatric Medical Clinic, Inc., 48 Cal.3d 583, 588-592, 257 Cal.Rptr. 98, 770 P.2d 278, 281-293 (1989), the court held that minor

patients' mother had a good cause of action against defendant therapist who had allegedly molested the patients. The mother and children were in family therapy. In Carey v. Lovett, 132 N.J. 44, 622 A.2d 1279 (1993), the court found that the unique connection between mother and her baby allows mother a direct claim for emotional distress caused by false information that her baby was stillborn when it was born alive. The father's claim, however, was limited by the indirect bystander requirements. Similarly, in Burgess v. Superior Court, 2 Cal.4th 1064, 831 P.2d 1197, 9 Cal.Rptr.2d 615 (1992), mother suffered emotional distress because of defendant physician's negligent delivery of child. She was a patient of the defendant and thus regarded as a direct victim. See also Schwarz v. Regents of University of California, 226 Cal.App.3d 149, 276 Cal.Rptr. 470 (1990), rejecting a father's claim for emotional distress as a result of negligent psychiatric treatment of his child; the father was not involved in the treatment. The English House of Lords in W v. Essex County Council, [2002] 2 A.C. 592, allowed to stand a claim against the local social services department when officials placed a boy "G" in plaintiffs' house knowing that the boy had committed acts of sexual abuse in the past. G committed similar acts of sexual abuse against plaintiffs' four young children in consequence of which plaintiffs alleged they had suffered emotional distress. Such direct relationship cases are within § 47 (b) of the Restatement

(Third) of Torts: Liability for Physical and Emotional Harm (2012) that imposes liability where the negligent conduct "causes serious emotional harm to another occurring in the course of specified categories of activities, undertakings, or relationships in which

negligent conduct is especially likely to cause serious emotional harm."

2. A woman in therapy recovers memories of sexual abuse perpetrated upon her by her father when she was a child. The woman accuses her father who, protesting his innocence, suffers emotional distress. Father believes that the memories were induced by the therapy. Does the therapist owe a duty of care to the father? The growing body of case law is contradictory. See Flanders v. Cooper, 706 A.2d 589 (Me.1998) (finding no duty of care because the duty might restrict treatment choices of health care professionals and hence intrude on professional patient relationship); Doe v. McKay, 183 I11.2d 272, 233 III.Dec. 310, 700 N.E.2d 1018 (1998). But see Sawyer v. Midelfort, 227 Wis.2d 124, 595 N.W.2d 423 (1999) (finding a duty of care to those accused of abuse for emotional injuries caused).

3. As the principal case shows, the twists and turns in bystander liability have been manifold. Some courts have adopted the foreseeability test: Ramsey v. Beavers, 931 S.W.2d 527 (Tenn. 1996) (foreseeability requiring consideration of relevant factors, position of plaintiff, degree of injury, relationship to injured party, and proof of severe emotional injury); Clohessy v. Bachelor, 237 Conn. 31, 675 A.2d 852 (1996) (adopting a rule of "reasonable foreseeability if bystander satisfies the following conditions: (1) he or she is closely related to the injury victim, such as the parent or the sibling of the victim; (2) emotional injury of the bystander is caused by the contemporaneous sensory perception of the event or conduct that causes the injury or by arriving on the scene soon thereafter and before substantial change has occurred in the victim's condition or

location; (3) injury of the victim must be substantial, resulting in his or her death or serious physical injury; and (4) bystander's emotional injury must be serious, beyond that which would be anticipated in a disinterested witness and which is not the result of an abnormal response."); Gabaldon v. Jay-Bi Property Management, Inc., 122 N.M. 393, 925 P.2d 510 (1996) (adopting contemporaneous sensory perception as a requirement; mother called to scene of son's near drowning in wave pool arrived too late to fall within class of persons owed a duty of care); Bowen v. Lumbermens Mutual Casualty Co., 183 Wis.2d 627, 517 N.W.2d 432 (1994) (rejecting the zone of impact rule and adopting a framework that "should be free of artificial, vague and inconsistent rules," and hence articulating a rule that guards against false claims and overdue burdens on actors: factors employed are (1) victim's serious injury or death, (2) close familial relationship, (3) direct perception of accident or coming immediately upon its aftermath); and Philibert v. Kluser, 360 Or. 698, 385 P.3d 1038 (2016) (after discussion, and discarding, of various tests, the court adopts the rule articulated in § 48, Restatement (Third) of Torts: Liability for Physical and Emotional Harm).

Others have criticized the Dillon foreseeability test as too broad in imposing sweeping liability. Tobin v. Grossman, 24 N.Y.2d 609, 249 N.E.2d 419, 301 N.Y.S.2d 554 (1969). In New York the zone of damages test was

adopted in and Bovsun v. Sanperi, 61 N.Y.2d 219, 461 N.E.2d 843, 473 N.Y.S.2d 357 (1984). Eschewing the foreseeability test, Minnesota has opted for a zone of danger test, Stadler v. Cross, 295

N.W.2d 552 (Minn. 1980). Responding to Professor Jane Stapleton's severe critique of the state of the law in the area of emotional distress, In Restraint of Tort, in The Frontiers of Liability, Vol. 2 83 (Peter Birks, ed., Oxford: Oxford University Press, 1994), the Australian High Court in Tame v. New South Wales; Annetts v. Australian Stations Pty Ltd., (2002) 191 ALR 449; [2002] HCA 35 (Austl.) attempted a principled restatement of the law grounded in a balancing relational and foreseeability considerations.

4. The limits of Thing were tested in In re Air Crash Disaster Near Cerritos, 967 F.2d 1421 (9th Cir.1992), where the plaintiff, having left her house shortly before, returned to find her house ablaze with her husband and two children inside; part of an Aeromexico jetliner had crashed into it. See also Wilks v. Hom, 2 Cal.App.4th 1264, 3 Cal.Rptr.2d 803 (1992) in which the "sensory and contemporaneous observance of the accident" requirement was satisfied when an explosion severely injured the plaintiffs daughter and blew the plaintiff out of the house. She did not see her daughter being injured but was contemporaneously aware of that fact.

5. What of rescuers who tend to the wounded at the scene of an air crash disaster? In White v. Chief Constable of the South Yorkshire Police, [1999] 2 A.C. 455, the House of Lords disallowed claims by the police who were involved in the aftermath of the tragedy in attempting to resuscitate victims and carrying the dead and injured. Some courts draw within the fold of liability those relatives who come in the "aftermath" of the accident. Stressing contemporaneity, the observation must be "shortly thereafter," with the scene intact from the accident: Colbert v. Moomba Sports, Inc., 163 Wash.2d 43, 176

P.3d 497 (2008) (watching rescue attempts and body discovered were too remote in law).

5. Unborn Children

Endresz v. Friedberg

New York Court of Appeals, 1969.

24 N.Y.2d 478. 248 N.E.2d 901, 301 N.Y.S.2d 65.

FULD, CHIEF Judge. ***The plaintiff, Janice Endresz, seven months pregnant, was injured in an automobile accident in the winter of 1965 and two days later was delivered of stillborn twins, a male and a female. Four actions in negligence were brought against the persons assertedly responsible for the accident. In the first two actions--one for the wrongful death of each child--the plaintiff Steve Endresz, Janice's husband, suing as administrator, seeks damages of $100,000 by reason of the distributees' "loss of anticipated ***care, comfort and support during the minority and majority" of each infant and for "medical, hospital and funeral expenses incurred by reason of the death" of the children. ***

521

On motion of the defendants, the court at Special Term ***dismissed the first two suits for wrongful death. ***

This court has already decided that a wrongful death action may not be maintained for the death of an unborn child. [Cc] This view is held by a number of other jurisdictions and, although there is authority to the contrary, further study and thought confirm the justice and wisdom of our earlier decisions.

[Caption: Chief Justice Fuld.]

Section 5-4.1 of the EPTL (L.1966, ch. 952, eff. Sept. 1, 1967), ***declares, insofar as pertinent, that "The personal representative ***of a decedent who is survived by distributees may maintain an action to recover damages for a wrongful act, neglect or default which caused the decedent's death against a person who would have been liable to the decedent by reason of such wrongful conduct if death had not ensued." Before there may be a "decedent," there must, perforce, be birth, a person born alive, and, although the statute, enacted in 1847 (L.1847, ch. 450), is silent on the subject, it is fairly certain that the Legislature did not intend to include an "unborn" foetus within the term "decedent". Indeed, it was not until 1951, more than 100 years later, that this court--overruling a long-standing decision Woods v. Lancet, [c]--decided that "a child viable but in u tero, if injured by tort, should, when born, be allowed to sue." [c] If, before [that case] a child so injured had no right of action, still less was such an action intended to lie on behalf of one who, never seeing the light of day, was deprived of life while still in its mother's womb.

Our decision in the Woods case (supra) does not require us, as suggested, to reinterpret the wrongful death statute to provide compensation to the distributees of a stillborn foetus for "pecuniary injuries" resulting from its death apart from those sustained by the mother and father in their own right. The Woods decision, [c] simply brought the common law of this State into accord with the demand of natural justice which requires recognition of the legal right of every

human being to begin life unimpaired by physical or mental defects resulting from the negligence of another. The considerations of justice which mandate the recovery of damages by an infant, injured in his mother's womb and born deformed through the wrong of a third party, are absent where the foetus, deprived of life while yet unborn, is never faced with the prospect of impaired mental or physical health.

In the latter case, moreover, proof of pecuniary injury and causation is immeasurably more vague than in suits for prenatal injuries. ***

Beyond that, since the mother may sue for any injury which she sustained in her own person, including her suffering as a result of the stillbirth, and the father for loss of her services and consortium, an additional award to the "distributees" of the foetus would give its parents an unmerited bounty and would constitute not compensation to the injured but punishment to the wrongdoer. [Cc]

A leading law review article on the subject has clearly pointed up the differences in the two situations (Gordon, The Unborn Plaintiff, 63 Mich.L.Rev. 579, 594-595):

"The hardship of many of the decisions denying relief [in prenatal injury cases] lay in the fact that they required an infant to go through life ***bearing the seal of another's fault. There is no such justification in the wrongful death situation. ***

"A fundamental basis of tort law is the provision for compensation of an innocent plaintiff for the loss he has suffered. Tort law is not, as a general rule, premised upon punishing the wrongdoer. It is not submitted that the tortious destroyer of a child in utero should be able to escape completely by killing instead of merely maiming. But it

is submitted that to compensate the parents any further than they are entitled by well- settled principles of law and to give them a windfall through the estate of the fetus is blatant punishment."

***Even if, as science and theology teach, the child begins a separate "life" from the moment of conception, it is clear that, "except in so far as is necessary to protect the child's own rights" [c], the law has never considered the unborn foetus as having a separate "juridical existence" [c] or a legal personality or identity "until it sees the light of day." [c] ***

It is argued that it is arbitrary and illogical to draw the line at birth, with the result that the distributees of an injured foetus which survives birth by a few minutes may have a recovery while those of a stillborn foetus may not. However, such difficulties are always present where a line must be drawn. To make viability rather than birth the test would not remove the difficulty but merely relocate it and increase a hundredfold the problems of causation and damages. Thus, one commentator aptly observed that (Wenger, Developments in the Law of Prenatal Wrongful Death, 69 Dickinson L.Rev. 258, 268), "since any limitation will be arbitrary in nature, a tangible and concrete event

523

would be the most acceptable and workable boundary. Birth, being a definite, observable and significant event, meets this requirement."

In light of all these considerations, then, we do not feel that, on balance and as a matter of public policy, a cause of action for pecuniary loss should accrue to the distributees of a foetus stillborn by reason of the negligence of another; the damages recoverable by

the parents in their own right afford ample redress for the wrong done. Decidedly applicable here is the rule that " [liability for damages caused by wrong ceases at a point dictated by public policy or common sense." [C] ***

The order appealed from should be affirmed, without costs.

BURKE, Judge (dissenting in part). ***The illogicalness of the majority's position was aptly demonstrated by the Supreme Court of Wisconsin, in the analogous case of Kwaterski v. State Farm Mut. Auto. Ins. Co., 34 Wis.2d 14, 20, 148 N.W.2d 107, 110, in these terms: "If no right of action is allowed, there is a wrong inflicted for which there is no remedy. Denying a right of action for negligent acts which produce a stillbirth leads to very incongruous results. For example, a doctor or midwife whose negligent acts in delivering a baby produced the baby's death would be legally immune from a lawsuit. However, if they badly injured the child they would be exposed to liability. Such a rule would produce the absurd result that an unborn child who was badly injured by the tortious acts of another, but who was born alive, could recover while an unborn child, who was more severely injured and died as the result of the tortious acts of another, could recover nothing." ***

In summary, I am of the opinion that it is both illogical and unreasonable to distinguish between injuries wrongfully inflicted upon a viable foetus which result in death just prior to the infant's separation from the mother and those which cause either permanent injuries or death itself, but at some short interval after birth has occurred. I, therefore, dissent from that portion of the majority

opinion which affirms the dismissal of the wrongful death actions by the personal representatives of these stillborn foetus.

KEATING, J., concurred.

NOTES AND QUESTIONS

1. The question of whether any duty is owed to unborn children has undergone substantial change in the law and still is not free from controversy. At one time, the answer was a simple one: no claim was allowed. See, e.g., Dietrich v. Inhabitants of Northampton, 138 Mass. 14, 52 Am.Rep. 242 (1884).

2. The reasons for denial of recovery were threefold: First, it was assumed that the fetus had no separate existence from its mother. This hypothesis was later found to be inaccurate as a matter of medical science.

Second, it was thought that the problems of proving causation in fact would be overwhelming. Medical science was of assistance here also,

524

although highly speculative questions about causation still arise. For example, can physical trauma to a mother cause a child to be born with Down's Syndrome? Compare Sinkler v. Kneale, 401 Pa. 267, 164 A.2d 93 (1960) (allowing plaintiff to attempt to prove a case), with Puhi v. Milwaukee Auto. Ins. Co., 8 Wis.2d 343, 99 N.W.2d 163 (1959) (finding that plaintiff had not met her burden of proof after trial).

Third, damages were thought to be too speculative. How could the jury accurately estimate a newborn baby's loss of earning power? In

spite of the difficulties involved, is it clear that the child has suffered a loss and would often need medical treatment in the future? Is this a sufficient reason to allow a claim?

3. Beginning in 1946 with the case of Bonbrest v. Kotz, 65 F.Supp. 138 (D.D.C.1946), an overwhelming majority of jurisdictions has held that the reasons supporting the denial of a claim were no longer persuasive and has allowed a cause of action for prenatal injuries when they were inflicted on a viable fetus who was subsequently born alive. For a forceful argument for not drawing the line at birth and a collection of recent case law, see Fox, Birth Rights and Wrongs, How Medicine and Technology are Remaking Reproduction and the Law (2019), 63-64.

4. Suppose plaintiff alleges that defendant's wrongful conduct adversely affected the mother's ability to produce normal children prior to conception? Recovery has been allowed in several cases. See Bergstreser v. Mitchell, 577 F.2d 22 (8th Cir.1978) (negligent performance of caesarean- subsequent child had birth difficulties producing brain damage); Renslow v. Mennonite Hosp., 67 I11.2d 348, 10 III.Dec. 484, 367 N.E.2d 1250 (1977) (wrong Rh-type blood transfusion to a 13-year-old produced injury to her child years later); Lazevnick v. General Hosp., 499 F.Supp. 146 (M.D.Pa.1980) (similar); Walker v. Rinck, 604 N.E.2d 591 (Ind. 1992) (similar). The New York Court of Appeals was scathing in its condemnation of Renslow, Albala v. City of New York, 54 N.Y.2d 269, 429 N.E.2d 786, 445 N.Y.S.2d 108 (1981).

5. A majority of states uphold a civil claim for the wrongful death of an unborn child. See, e.g., Sprangler v. Bechtel, 958 N.E.2d 458

(Ind. 2011), where parents of a stillborn baby were able to bring a wrongful death action against the hospital and nurses; Volk v. Baldazo, 103 Idaho 570, 651 P.2d 11 (1982); Vaillancourt v. Medical Center Hosp., Inc., 139 Vt. 138, 425 A.2d 92 (1980); but the authorities are not consistently in favor of liability, e.g., Milton v. Cary Medical Center, 538 A.2d 252 (Me. 1988); Witty v. American General Capital Dist., Inc., 727 S.W.2d 503 (Tex.1987). In some jurisdictions courts have interpreted "death of a person" in the state wrongful death statute to include only individuals who were born alive. See Bayer v. Suttle, 23 Cal.App.3d 361, 100 Cal. Rptr. 212 (1st Dist. 1972); Stern v. Miller, 348 So.2d 303 (Fla. 1997); and Wartelle v. Women's and Children's Hospital, Inc., 704 So.2d 778 (La. 1997). As the principal case reflects, other courts have gone beyond the matter of legislative intent (was there any?) and weighed policy considerations that support the grant or denial of a claim. Suppose the child dies during the delivery process? Duncan v. Flynn, 342 So.2d 123

525

(Fla.App. 1977) and Shaw v. Jendzejec, 717 A.2d 367 (Me. 1998). Some states have explicitly clarified the issue. See e.g. Tex. Civ. Prac. & Rem. Code § 71.001(4) (providing that "individual," for the purposes of the wrongful death act, includes "an unborn child at every stage of gestation from fertilization until birth") and Tex. Civ. Prac. & Rem. Code § 71.003(c)(4) (providing that the wrongful death statute does not apply to claims "for the death of an individual who is an unborn child that is brought against... a physician or other health care provider licensed in this state, if the death directly or indirectly is caused by, associated with, arises out of, or relates to a lawful

medical or health care practice or procedure of the physician or health care provider").

6. As the principal case predicts, if a wrongful death action is available for the death of an unborn fetus, the issue then is posed of whether the action should extend beyond independent viability of the fetus. Thibert v. Milka, 419 Mass. 693, 646 N.E.2d 1025 (1995) (holding that a fetus with a gestational age of sixteen weeks was not viable and thus could not recover under a wrongful death action).

7. In upholding the principal case, the Court of Appeals of New York overruled prior authority in holding a physician owed a duty to an expectant mother where the physician's negligence caused a miscarriage or stillbirth; the mother was entitled to damages for emotional distress: Broadnax v. Gonzalez, 2 N.Y.3d 148, 777 N.Y.S.2d 416, 809 N.E.2d 645 (2004). But see Sheppard-Mobley v. King, 4 N.Y.3d 627, 797 N.Y.S.2d 403, 830 N.E.2d 301 (2005) (refusing to extend Brodnax's holding to the case of a mother whose infant was born alive albeit with birth defects, court held that the array of actions available were sufficient, not requiring a cause of action to fill a remedial gap).

8. Should a pregnant woman owe a duty of care to take reasonable precautions to protect her fetus from harm? Grodin v. Grodin, 102 Mich.App. 396, 301 N.W.2d 869 (1980) (liability of mother taking an antibiotic while pregnant that discolored the infant's teeth); but cf. Stallman v. Youngquist, 125 Ill.2d 267, 531 N.E.2d 355, 126 Ill.Dec. 60 (1988) (fetus subsequently born alive has no cause of action against mother for unintentional infliction of prenatal injuries (injuries sustained in auto accident)). The split in authority is reflected in

Chenault v. Huie, 989 S.W.2d 474 (Tex.App. 1999) (holding in an action arising from injuries to child allegedly caused by mother's drug and alcohol use during pregnancy; Texas law recognizes no general legal duty owed by a mother to her fetus). But cf. Bonte v. Bonte, 136 N.H. 286, 616 A.2d 464 (1992) ("recognizing a child born alive has a cause of action against his or her mother for negligent conduct that results in prenatal injury"). See Finley, A Breach in the Silence: Including Women's Issues in a Torts Course, 1 Yale J.L. & Feminism 41 (1989).

9. A, a broker for surrogate mother contracts, engages B to have a baby for C. B is artificially inseminated with Cs semen. Cs semen carries a disease that causes birth defects to (a) the offspring or (b) B's child by her husband. Does A owe a duty to reasonably protect C? B? And the offspring? See Stiver v. Parker, 975 F.2d 261 (6th Cir. 1992), finding an affirmative duty

to C and B by dint of the "special relationship" between the brokers and the parties to the arrangement (supra); the court emphasized the commercial aspects of the arrangement in finding the duty. The duty to the "offspring" was not discussed; should a duty to the surrogate offspring be imposed? For an informed and broad discussion of this and other legal and ethical issues, see Fox. Birth Rights and Wrongs: How Medicine and Technology are Remaking Reproduction and the Law (2019), 80-86.

Procanik by Procanik v. Cillo

Supreme Court of New Jersey, 1984.

97 N.J. 339, 478 A.2d 755.

POLLOCK, J. The primary issue on this appeal is the propriety of a grant of a partial summary judgment dismissing a "wrongful life" claim brought by an infant plaintiff through his mother and guardian ad litem. That judgment, which was granted on the pleadings, dismissed the claim because it failed to state a cause of action upon which relief may be granted. [C]

The infant plaintiff, Peter Procanik, alleges that the defendant doctors ***negligently failed to diagnose that his mother, Rosemary Procanik, had contracted German measles in the first trimester of her pregnancy. As a result, Peter was born with congenital rubella syndrome. Alleging that the doctors negligently deprived his parents of the choice of terminating the pregnancy, he seeks general damages for his pain and suffering and for "his parents' impaired capacity to cope with his problems." He also seeks special damages attributable to the extraordinary expenses he will incur for medical, nursing, and other health care. The Law Division granted defendants' motion to dismiss, and the Appellate Division affirmed. ***

[Caption: Justices Daniel J. OTIern, Alan B. Händler, Robert L. ClifTord, Robert Wilentz, Sidney M. Sehreiber, Stewart G. Pollock and Marie L. Garibaldi.]

527

We granted certification, [c] We now conclude that an infant plaintiff may recover as special damages the extraordinary medical

expenses attributable to his affliction, but that he may not recover general damages for emotional distress or for an impaired childhood. ***Accepting as true the plaintiffs allegations, [c] the complaint discloses the following facts. ***

On June 9, 1977, during the first trimester of her pregnancy with Peter, Mrs. Procanik consulted the defendant doctors and informed Dr. Cillo "that she had recently been diagnosed as having measles but did not know if it was German measles." Dr. Cillo examined Mrs. Procanik and ordered "tests for German Measles, known as Rubella Titer Test." The results "were 'indicative of past infection of Rubella.'" Instead of ordering further tests, Dr. Cillo negligently interpreted the results and told Mrs. Procanik that she "had nothing to worry about because she had become immune to German Measles as a child." In fact, the "past infection" disclosed by the tests was the German measles that had prompted Mrs. Procanik to consult the defendant doctors.

Ignorant of what an accurate diagnosis would have disclosed, Mrs. Procanik allowed her pregnancy to continue, and Peter was born on December 26, 1977. Shortly thereafter, on January 16, 1978, he was diagnosed as suffering from congenital rubella syndrome. As a result of the doctors' negligence, Mr. and Mrs. Procanik were deprived of the choice of terminating the pregnancy, and Peter was "born with multiple birth defects," including eye lesions, heart disease, and auditory defects. The infant plaintiff states further that "he has suffered because of his parents' impaired capacity to cope with his problems," and seeks damages for his pain and suffering and for his "impaired childhood."

In April 1983, while this matter was pending in the Appellate Division, Peter moved to amend the first count to assert a claim to recover, as special damages, the expenses he will incur as an adult for medical, nursing, and related health care services. In its opinion, the Appellate Division denied without prejudice leave to amend. ***

In this case we survey again the changing landscape of family torts. See Schroeder v. Perkel [c]. Originally that landscape presented a bleak prospect both to children born with birth defects and to their parents. If a doctor negligently diagnosed or treated a pregnant woman who was suffering from a condition that might cause her to give birth to a defective child, neither the parents nor the child could maintain a cause of action against the negligent doctor. Gleitman v. Cosgrove, [c],…

Like the present case, Gleitman involved a doctor who negligently treated a pregnant woman who had contracted German measles in the first trimester of her pregnancy. Reasoning from the premise that the doctor did not cause the infant plaintiffs birth defects, the Gleitman Court found it impossible to compare the infant's condition if the defendant doctor had not been negligent with the infant's impaired condition as a result of the negligence. Measurement of "the value of life

528

with impairments against the nonexistence of life itself' was, the Court declared, a logical impossibility. [C] Consequently, the Court rejected the infant's claim.

The Court denied the parents' claim for emotional distress and the costs of caring for the infant, because of the impossibility of weighing

the intangible benefits of parenthood against the emotional and monetary injuries sustained by them. Prevailing policy considerations, which included a reluctance to acknowledge the availability of abortions and the mother's right to choose to terminate her pregnancy, prevented the Court from awarding damages to a woman for not having an abortion. Another consideration was the Court's belief that "[i]t is basic to the human condition to seek life and hold on to it however heavily burdened." [C]

In the seventeen years that have elapsed since the Gleitman decision, both this Court and the United States Supreme Court have reappraised, albeit in different contexts, the rights of pregnant women and their children. The United States Supreme Court has recognized that women have a constitutional right to choose to terminate a pregnancy. Roe v. Wade, 410 U.S. 113 (1973). Recognition of that right by the high court subsequently influenced this Court in Berman v. Allan, [c].

In Berman, the parents sought to recover for their emotional distress and for the expenses of raising a child born with Down's Syndrome. Relying on Roe v. Wade, the Court found that public policy now supports the right of a woman to choose to terminate a pregnancy. [C] That finding eliminated one of the supports for the Gleitman decision--i.e., that public policy prohibited an award for depriving a woman of the right to choose whether to have an abortion. Finding that a trier of fact could place a dollar value on the parents' emotional suffering, the Berman Court concluded "that the monetary equivalent of this distress is an appropriate measure of the harm suffered by the parents." [C]

Nonetheless, the Court rejected the parents' claim for "medical and other expenses that will be incurred in order to properly raise, educate and supervise the child." [C] The Court reasoned that the parents wanted to retain "all the benefits inhering in the birth of the child--i.e., the love and joy they will experience as parents--while saddling defendants with enormous expenses attendant upon her rearing." Id. Such an award would be disproportionate to the negligence of the defendants and constitute a windfall to the parents. Id.

The Berman Court also declined to recognize a cause of action in an infant born with birth defects. Writing for the Court, Justice Pashman reasoned that even a life with serious defects is more valuable than nonexistence, the alternative for the infant plaintiff if his mother chose to have an abortion. [C]

More recently we advanced the parents' right to compensation by permitting recovery of the extraordinary expenses of raising a child born

529

with cystic fibrosis, including medical, hospital, and pharmaceutical expenses. Schroeder v. Perkel, 87 N.J. at 68-69, 432 A.2d 834. No claim on behalf of the infant was raised in that case, [c] and we elected to defer consideration of such a claim until another day. [C] That day is now upon us, and we must reconsider the right of an infant in a "wrongful life" claim to recover general damages for diminished childhood and pain and suffering, as well as special damages for medical care and the like.

The terms "wrongful birth" and "wrongful life" are but shorthand phrases that describe the causes of action of parents and children when negligent medical treatment deprives parents of the option to terminate a pregnancy to avoid the birth of a defective child, [c] In the present context, "wrongful life" refers to a cause of action brought by or on behalf of a defective child who claims that but for the defendant doctor's negligent advice to or treatment of its parents, the child would not have been born. "Wrongful birth" applies to the cause of action of parents who claim that the negligent advice or treatment deprived them of the choice of avoiding conception or, as here, of terminating the pregnancy. [Cc]

Both causes of action are distinguishable from the situation where negligent injury to a fetus causes an otherwise normal child to be born in an impaired condition. [Cc] In the present case, the plaintiffs do not allege that the negligence of the defendant doctors caused the congenital rubella syndrome from which the infant plaintiff suffers. Neither do plaintiffs claim that the infant ever had a chance to be a normal child. The essence of the infant's claim is that the defendant doctors wrongfully deprived his mother of information that would have prevented his birth.

Analysis of the infant's cause of action begins with the determination whether the defendant doctors owed a duty to him. The defendant doctors do not deny they owed a duty to the infant plaintiff, and we find such a duty exists. [Cc] In evaluating the infant's cause of action, we assume, furthermore, that the defendant doctors were negligent in treating the mother. Moreover, we assume that their negligence deprived the parents of the choice of terminating the pregnancy and of preventing the birth of the infant plaintiff.

Notwithstanding recognition of the existence of a duty and its breach, policy considerations have led this Court in the past to decline to recognize any cause of action in an infant for his wrongful life. The threshold problem has been the assertion by infant plaintiffs not that they should not have been born without defects, but that they should not have been born at all. [Gleitman] The essence of the infant's cause of action is that its very life is wrongful. [Berman] Resting on the belief that life, no matter how burdened, is preferable to non-existence, the Berman Court stated that the infant "has not suffered any damage cognizable at law by being brought into existence." [C] Although the premise for this part of the Berman decision was the absence of cognizable damages, the Court continued to be troubled, as it was in Gleitman, by the problem of ascertaining the measure of damages. [C]

530

The courts of other jurisdictions have also struggled with the issues of injury and damages when faced with suits for wrongful life. Although two intermediate appellate courts in New York and California recognized an infant's claim for general damages, those decisions were rejected by the courts of last resort in both jurisdictions. ***

Other courts have uniformly found that the problems posed by the damage issues in wrongful life claims are insurmountable and have refused to allow the action on behalf of the infant. [Cc]

Even when this Court declined to recognize a cause of action for wrongful life in Gleitman and Berman, dissenting members urged recognition of that claim. ***

Recently we recognized that extraordinary medical expenses incurred by parents on behalf of a birth-defective child were predictable, certain, and recoverable. [Schroeder] ***

When a child requires extraordinary medical care, the financial impact is felt not just by the parents, but also by the injured child. As a practical matter, the impact may extend beyond the injured child to his brothers or sisters. Money that is spent for the health care of one child is not available for the clothes, food, or college education of another child.

Recovery of the cost of extraordinary medical expenses by either the parents or the infant, but not both, is consistent with the principle that the doctor's negligence vitally affects the entire family. ***

Law is more than an exercise in logic, and logical analysis, although essential to a system of ordered justice, should not become a instrument of injustice. Whatever logic inheres in permitting parents to recover for the cost of extraordinary medical care incurred by a birth-defective child, but in denying the child's own right to recover those expenses, must yield to the injustice of that result. The right to recover the often crushing burden of extraordinary expenses visited by an act of medical malpractice should not depend on the "wholly fortuitous circumstance of whether the parents are available to sue." [Cc]

The present case proves the point. Here, the parents' claim is barred by the statute of limitations. Does this mean that Peter must forego medical treatment for his blindness, deafness, and retardation? We think not. His claim for the medical expenses attributable to his birth defects is reasonably certain, readily calculable, and of a kind daily

determined by judges and juries. We hold that a child or his parents may recover special damages for extraordinary medical expenses incurred during infancy, and that the infant may recover those expenses during his majority. ***

In restricting the infant's claim to one for special damages, we recognize that our colleagues, Justice Schreiber and Justice Handler, disagree with us and with each other. From the premise that "man does not know whether non-life would have been preferable to an impaired life," [c] Justice Schreiber concludes that a child does not have a cause of

531

action for wrongful life and, therefore, that "it is unfair and unjust to charge the doctors with the infant's medical expenses." [C] Justice Handler reaches a diametrically opposite conclusion. He would allow the infant to recover not only his medical expenses, but also general damages for his pain and suffering and for his impaired childhood.

We find, however, that the infant's claim for pain and suffering and for a diminished childhood presents insurmountable problems. The philosophical problem of finding that such a defective life is worth less than no life at all has perplexed not only Justice Schreiber, but such other distinguished members of this Court as Chief Justice Weintraub, [c] Justice Proctor, [c] and Justice Pashman, [c]. We need not become preoccupied, however, with these metaphysical considerations. Our decision to allow the recovery of extraordinary medical expenses is not premised on the concept that non-life is preferable to an impaired life, but is predicated on the needs of the

living. We seek only to respond to the call of the living for help in bearing the burden of their affliction.

Sound reasons exist not to recognize a claim for general damages. Our analysis begins with the unfortunate fact that the infant plaintiff never had a chance of being born as a normal, healthy child. Tragically, his only choice was a life burdened with his handicaps or no life at all. The congenital rubella syndrome that plagues him was not caused by the negligence of the defendant doctors; the only proximate result of their negligence was the child's birth.

The crux of the problem is that there is no rational way to measure non-existence or to compare non-existence with the pain and suffering of his impaired existence. Whatever theoretical appeal one might find in recognizing a claim for pain and suffering is outweighed by the essentially irrational and unpredictable nature of that claim. Although damages in a personal injury action need not be calculated with mathematical precision, they require at their base some modicum of rationality.

Underlying our conclusion is an evaluation of the capability of the judicial system, often proceeding in these cases through trial by jury, to appraise such a claim. Also at work is an appraisal of the role of tort law in compensating injured parties, involving as that role does, not only reason, but also fairness, predictability, and even deterrence of future wrongful acts. In brief, the ultimate decision is a policy choice summoning the most sensitive and careful judgment.

From that perspective it is simply too speculative to permit an infant plaintiff to recover for emotional distress attendant on birth defects when that plaintiff claims he would be better off if he had not been

born. Such a claim would stir the passions of jurors about the nature and value of life, the fear of non-existence, and about abortion. That mix is more than the judicial system can digest. We believe that the interests of fairness and justice are better served through more predictably measured damages--the cost of the extraordinary medical expenses necessitated by

532

the infant plaintiffs handicaps. Damages so measured are not subject to the same wild swings as a claim for pain and suffering and will carry a sufficient sting to deter future acts of medical malpractice.

As speculative and uncertain as is a comparison of the value of an impaired life with non-existence, even more problematic is the evaluation of a claim for diminished childhood. The essential proof in such a claim is that the doctor's negligence deprives the parents of the knowledge of the condition of the fetus. The deprivation of that information precludes the choice of terminating the pregnancy by abortion and leaves the parents unprepared for the birth of a defective child, a birth that causes them emotional harm. The argument proceeds that the parents are less able to love and care for the child, who thereby suffers an impaired childhood. [Cc]

Several considerations lead us to decline to recognize a cause of action for impaired childhood. At the outset, we note the flaw in such a claim in those instances in which the parents assert not that the information would have prepared them for the birth of the defective child, but that they would have used the information to prevent that birth. Furthermore, even its advocates recognize that a claim for "the kind of injury suffered by the child in this context may not be readily

divisible from that suffered by her wronged parents." Berman v. Allan, supra, 80 N.J. at 445, 404 A.2d 8 (Handler, J., concurring and dissenting). We believe the award of the cost of the extraordinary medical care to the child or the parents, when combined with the right of the parents to assert a claim for their own emotional distress, comes closer to filling the dual objectives of a tort system: the compensation of injured parties and the deterrence of future wrongful conduct. ***

The judgment of the Appellate Division is affirmed in part, reversed in part, and the matter is remanded to the Law Division. The infant plaintiff shall have leave to file an amended complaint asserting a claim for extraordinary medical, hospital, and other health care expenses.

[The gist of the separate partially dissenting opinions of HANDLER and SCHREIBER, JJ., is described in the majority opinion.]

NOTES AND QUESTIONS

1. In Smith v. Cote, 128 N.H. 231, 513 A.2d 341 (1986), the court dealt with a factually similar case: the defendants, obstetricians and gynecologists, had not tested their patient for rubella early in the pregnancy when she had an untrammeled right to an abortion under Roe v. Wade, as modified in Planned Parenthood v. Casey, 505 U.S. 833 (1992). The child was born with congenital rubella syndrome. In a thorough analysis, Justice Batchelder found that scientific advances in the detection of abnormalities in fetuses have increased the incidence of suits by parents and children. Taking the actions separately, he supported the wrongful birth action--the parents' action--as comporting with accepted tort doctrine. The difficulty of

measuring damages could not undermine the action. As to damages, the

533

court found, they should be limited to extraordinary costs even beyond the age of majority. This figure could include extraordinary maternal care, susceptible to valuation, made necessary by the child's condition. Also recoverable were the parent's pecuniary losses resulting from the emotional distress, in seeking medical help or counselling. However, general emotional distress was not compensable.

After an examination of the law supporting the wrongful life action, including the principal case, the court, in Smith, nevertheless, was not moved to allow the child a wrongful life action for the following reasons.

A. Distinguishing the right to die cases (see Cruzan by Cruzan v. Director, Missouri Dept, of Health, 497 U.S. 261 (1990)) the issue is "not protection of the impaired child's right to choose nonexistence over life but whether legal injury has occurred as a result of the defendant's conduct ***[The court] has no business in declaring that among the living are people who should never have been born." Id., 249.

B. Recognition of the claim would stigmatize the child's life as wrongful, cutting against policies of removing social disabilities.

C. The contingent nature of the loss valuation is beyond the capacity of the courts proceeding by way of predictable rules.

On the last point, the principal case fashioned a pragmatic compromise--special damages for extraordinary expenses. The New Hampshire Court referred to Justice Schreiber's opinion, dissenting in part from the majority's opinion in the principal case:

The position that a child may recover special damages despite the failure of his underlying theory of wrongful life violates the moral code underlying our system of justice from which the fundamental principles of tort law are derived.

Procanik v. Cillo, 97 N.J. 339, 370, 478 A.2d 755, 772 (1984).

2. An older but related line of cases concerns situations in which a woman has conceived or become pregnant due to the tortious action of the defendant. In these cases the child is not necessarily handicapped but the pregnancy was not wanted. Generally, the cause of action is in negligence for: (1) lack of informed consent or (2) negligent performance of a sterilization operation or abortion. Burke v. Rivo, 406 Mass. 764, 551 N.E.2d 1 (1990), is an example of the former (failure to advise plaintiff of the risks of recanalization in sterilization operation) and Marciniak v. Lundborg, 153 Wis.2d 59, 450 N.W.2d 243 (1990), an example of the latter (negligence in performance of "laparoscopy with bilateral fallopian tube cautery"). Both cases accepted the legitimacy of the cause of action and addressed the issue of the measure of damages. Damages flowing directly from the operation and pregnancy were readily recoverable: these include cost of the operation and corrective surgery, loss of earnings during pregnancy, medical expenses surrounding pregnancy and hospitalization, and husband's loss of consortium. Pain and suffering and emotional distress are usually recoverable.

The difficult issue was whether the costs of rearing the child should be recoverable. Against a strong dissent supported by weighty authority, the majority in Burke decided that "the cost of rearing a normal

534

healthy but (at least initially) unwanted child [were recoverable if the parents'] reason for seeking sterilization was founded on economic and financial considerations." The same arguments rejected by the majority in Burke were also dismissed in Marciniak: the awarding of damages for the costs of child rearing would not psychologically harm the child nor "debase the sanctity of human life." The argument that the plaintiffs had not mitigated their damages by putting the child out to adoption or by aborting met the same fate: it was not reasonable to force this choice on the plaintiffs. On the issue of offsetting the benefits of the child against the detriments the court turned to § 920 Restatement (Second) of Torts (1979), embodying the principle that damages resulting from an invasion of one interest are not diminished by showing another interest has been benefited. Thus emotional benefit could not be set off against financial detriments.

Are you concerned in drawing a distinction on the grounds of motivation for the operation?

3. Few jurisdictions allow actions for wrongful life. The most poignant cases result from a negligent failure to detect the genetic disease Tay-Sachs Syndrome, a devastating disease characterized by severe mental retardation and physical disability limiting life to a few painful years. In Schloss v. Miriam Hospital, No. C.A. 98-2076, 1999

WL 41875 (R.I.Super. 1999), the Rhode Island court allowed a wrongful birth action but rejected the wrongful life claim where the child was born with Tay-Sachs after negligent genetic testing. The court found the moral issues beggared their judicial ability, and unlike the few cases in California, Washington, and New Jersey that had recognized the claim, here the wrongful birth action accorded compensation for the injury. In the few that recognize wrongful life, the damages have been curtailed as to include only extraordinary expenses arising from the condition with which the child is afflicted. Harbeson v. Parke-Davis, Inc., 98 Wn.2d 460, 656 P.2d 483 (1983). No general damages for pain and suffering are awarded. Turpin v. Sortini, 31 Cal.3d 220, 643 P.2d 954, 182 Cal.Rptr. 337 (1982). The California Court of Appeal in Curlender v. Bio-Science Laboratories, 106 Cal.App.3d 811, 165 Cal.Rptr. 477 (1980), allowed pain and suffering damages, where the plaintiffs parents had obtained blood tests from the defendant lab in order to ascertain whether their offspring was likely to suffer from Tay-Sachs disease. The lab was negligent in performing the blood tests. In Sortini the court found that general damages were not awardable since no principles were available to discern whether an injury was suffered in being born rather than not, and that the balancing of incommensurable elements in general damages, the joy of life versus the pain of it, made the calculus too speculative. Extraordinary expenses, on the other hand, could have been estimated with some certainty and no setoff of highly subjective elements would be allowable under the § 920 Restatement (Second) of Torts (1979) principle. The majority's reasoning was savaged by Justice Mosk's dissent. Do you consider

that the plaintiff ought to be precluded from recovery of pain and suffering in cases of this kind?

4. The grounding of wrongful life and birth actions on the missed opportunity to abort the fetus has proven controversial. North Carolina and Missouri courts have refused to recognize actions thus premised, see Peters,

5. What actions may be available if the abortion is performed but was unnecessary or negligently advised? Parent's action, Martinez v. Long Island Jewish Hillside Medical Center, 70 N.Y.2d 697, 512 N.E.2d 538, 518 N.Y.S.2d 955 (1987) (recognition of action for mental anguish and depression resulting from the unnecessary abortion, derived not from what happened to fetus but from breach of

duty owed to mother) and Acuna v. Turkish, 192 N.J. 399, 930 A.2d 416 (2007). Fetus's action?

6. Should parents be liable in a wrongful life action? In Zepeda v. Zepeda, 41 Ill.App. 2d 240, 190 N.E.2d 849 (1963), a child sued his father for wrongfully begetting him as an illegitimate child by deceiving his mother that he would marry her when in fact he was already married. Recovery denied. What of an institution that fails to protect a vulnerable patient from being raped? Does the child have an action? The answer was "no" in Williams v. State of New York, 18 N.Y.2d 481, 223 N.E.2d 343, 276 N.Y.S.2d 885 (1966) and again "no," after a lower court "yes," in Cowe v. Forum Group, Inc., 541 N.E.2d 962, 964 (Ind.App.1989), aff'd in part and vacated in part, 575 N.E.2d 630 (Ind. 1991). In Curlender, supra note 3, the court suggested that parents may be liable for a conscious decision to conceive and allow to be born a seriously impaired infant. The California legislature quickly responded by relieving the parents of liability. § 43.6 Civil Code, 1981.

7. In Canesi ex rel. Canesi v. Wilson, 158 N.J. 490, 730 A.2d 805 (1999), the parents of a child born with bilateral limb reduction brought an action against two obstetricians involved with the mother's pregnancy. Plaintiffs alleged that the defendants were negligent in failing to warn them of the risks posed by the drug Provera and to take diagnostic measures to ascertain the presence of the defect. Two possible causes arose, the first in informed consent and the second in wrongful birth. The court held that for the former, plaintiffs must prove that the negligence caused the bilateral limb reduction. For the latter--the wrongful birth action--such proof was unnecessary. The appropriate inquiry was "whether the

defendant's negligence was the proximate cause of the parents' loss of the option to make an informed and meaningful decision either to terminate the pregnancy or to give birth to a potentially defective child." Id. at 818. In other words, medical causation is not essential in a wrongful birth action. The majority reasoning is criticized by Pollock, J. dissenting, who finds the "majority's result is unprecedented in any jurisdiction." Id. at 825.

CHAPTER 9 OWNERS AND OCCUPIERS OF LAND

1. Outside the Premises

Taylor v. Olsen

Supreme Court of Oregon, 1978.

282 Or. 343, 578 P.2d 779.

LINDE, Justice. Plaintiff sued for damages for injuries she sustained when her car, on a dark and windy January evening, struck a tree which shortly before had splintered and fallen across a ***road. The trial court directed verdicts for ***Marion Olsen, the adjoining landowner who was alleged to be in possession of the location. Plaintiff appeals from the judgment entered on the directed verdict for Olsen. ***

We think ***that, except for extreme situations, the question of the landowner's or possessor's attention to the condition of his roadside trees under a general standard of "reasonable care to prevent an unreasonable risk of harm" is to be decided as a question of fact upon the circumstances of the individual case. The extent of his responsibility either to inspect his trees or only to act on actual knowledge of potential danger cannot be defined simply by categorizing his land as "urban" or "rural." Surely it is not a matter of zoning or of city boundaries but of actual conditions. No doubt a factfinder will expect more attentiveness of the owner of an ornamental tree on a busy sidewalk [cc] than of the United States

Forest Service ***, but the great variety of intermediate patterns of land use, road use, traffic density, and preservation of natural stands of trees in urban and suburban settings prevents a simple "urban-rural" classification.

***[T]he onus on a homeowner of inspecting a few trees in his yard is modest, but the "practical difficulty of continuously examining each tree in the untold number of acres of forests" or in "sprawling tracts of woodland adjacent to or through which a road has been built [can be] so potentially onerous as to make property ownership an untenable burden. This would be particularly true for an absentee landowner." [C] It is less obviously true, however, for one who is engaged in logging or in actively developing the land. ***

In this case, the road in question was a two-lane blacktop highway serving a number of communities ***. There was testimony that it was used by an average 790 vehicles a day; in other words, a fallen tree might encounter a vehicle within an average of about two minutes, depending on the time of day. Defendant had purchased the land adjoining the road

538

in 1973 for logging purposes, and during the five or six weeks before the accident he had logged about half the timber on his land. This included the trees adjacent to the tree on the county's right-of-way that eventually fell onto the road. Under these circumstances we conclude ***that it would be a jury question whether defendant had taken reasonable care to inform himself of the condition of this tree, provided there was evidence that an inspection would have disclosed its hazardous condition.

The evidence is that after the tree broke and fell onto the road, the center of the tree at the point of the break proved to be decayed. However, the decay did not extend through the bark, or even to the surface below the bark except perhaps in a few places. Only by chopping or boring into the trunk of the tree would there have been a substantial chance of discovering the decay. Thus the question is not so much whether defendant had some responsibility to give his attention to the safety of this tree left behind by his logging operations as, rather, how far that responsibility extends.

There was no evidence to suggest that chopping or drilling into the trunk would have been a normal or expected way to examine a standing tree in the absence of external indications that it might not be structurally sound. ***

It requires some evidence either that the defendant should have been on notice of possible decay in this tree, or that cutting through the bark to the trunk is a common and ordinary method of examining trees generally. In the absence of such evidence, it was not error to direct a verdict for the defendant.

Affirmed.

NOTES AND QUESTIONS

1. With regard to most conditions on land that arise in the state of nature, most courts have held that there is no duty upon the landholder to protect persons outside the premises. See Roberts v. Harrison, 101 Ga. 773, 28 S.E. 995 (1897) (foul swamp); Brady v. Warren, [1900] 2 Ir.Rep. 632 (rabbits).

2. An exception has evolved with regard to trees, and there is agreement that the landowner is liable for negligence if he knows, or should have known, that the tree is defective and fails to take reasonable precautions. Turner v. Ridley, 144 A.2d 269 (Mun.App.D.C. 1958); Plesko v. Allied Inv. Co., 12 Wis.2d 168, 107 N.W.2d 201 (1961). Foreseeability alone is insufficient to show actual or constructive knowledge when the tree is healthy: Lewis v. Krussel, 101 Wash. App. 178, 2 P.3d 486 (2000).

3. The rule was clear at one time that the owner of land abutting on a rural highway is under no duty to inspect it to discover defects in trees. Chambers v. Whelen, 44 F.2d 340 (4th Cir.1930); O'Brien v. United States, 275 F.2d 696 (9th Cir.1960). The trend, however, is toward factor balancing. Miles v. Estate of Christensen, 724 N.E.2d 643, 646 (Ind. Ct. App. 2000)

539

(calling for "a more sophisticated analysis of the duty question, requiring a consideration of factors such as traffic patterns and land use in the relevant area" and concluding, in accord with the principal case, that "one who owns land, whether it be classified as 'urban' or 'rural,' may owe a duty of reasonable care as to natural land conditions that threaten outsiders.").

4. In Sprecher v. Adamson Cos., 30 Cal.3d 358, 636 P.2d 1121, 178 Cal.Rptr. 783 (1981), the landowner's general immunity for harm outside the premises caused by natural conditions was abolished, and an uphill landowner was found to owe a duty of care to a downhill landowner to control a landslide condition. This decision was followed in Moeller v. Fleming, 136 Cal.App.3d 241, 186

Cal.Rptr. 24 (1982), where a landowner could be sued by a pedestrian who slipped on an irregular break in the sidewalk that was caused by tree roots from the landowner's adjacent property. See also Leakey v. National Trust for Places of Historic Interest or Natural Beauty, [1980] 1 Q.B. 485 (CA) (repudiating the rule distinguishing natural and artificial hazards in finding the National Trust liable for the collapse of the Burrow Mump, a famous conical hill). Compare Restatement (First) of Torts § 363 (no liability for injuries resulting from natural conditions of the land other than trees growing near a highway), with Restatement (Second) of Torts § 840(2) (urban landowner liable for failure to exercise reasonable care to prevent an unreasonable risk of harm to persons using the highway; liability of rural landowner left open), and Restatement (Third) of Torts: Physical & Emotional Harm § 54(b) (2012) (rejecting the distinction between rural and urban land; duty only if the land is commercial, the landowner knows of the risk or the risk is obvious).

5. Some states recognize a "self-help" rule, under which a landowner can resort to self-help and cut off tree branches and roots intruding onto his property from adjoining property. See, e.g., Melnick v. C.S.X. Corp., 68 Md.App. 107, 510 A.2d 592 (1986), limiting remedy to "self-help" for incidents of healthy trees, as the most efficient and equitable way to resolve the problem. Should plaintiff be able to recover the cost of abatement from the land owner creating the nuisance? The principle is one of restitution. See Chapter 16.

Salevan v. Wilmington Park, Inc.

Superior Court of Delaware, 1950.

45 Del. (6 Terry) 290, 72 A.2d 239.

WOLCOTT, Judge. The plaintiff brings suit for personal injuries received when struck in the back by a baseball while walking on East Thirtieth Street in the City of Wilmington, past the ball park of the defendant.

The defendant is the owner of land ***on which is located the ball park in question. The business of the defendant is the maintenance and renting of the ball park and its facilities and has been carried on by the defendant for over eight years. ***

[I]t appears that in the course of an average ball game, 16 to 18 foul balls come from inside the park into Thirtieth Street and, of them, an

540

average of 2 or 3 foul balls come from within the park over the 10-foot fence and into the area along Thirtieth Street through which the plaintiff was passing at the time of the injury. The manager of the defendant testified that, on an average, 68 baseball games were played at Wilmington Park during the baseball season.

The plaintiff does not contend that the defendant is an insurer of persons lawfully using the highways and sidewalks adjacent to its ball park, but does contend that the defendant, as a landowner, has the duty to exercise reasonable care in the use of its land so as to prevent injury to travelers lawfully using the highways adjacent thereto. The plaintiff contends that the defendant had notice of the passage of baseballs outside of its park into East Thirtieth Street to the danger of persons using that public street, and that the failure of the defendant to take reasonable precautions to safeguard the public was negligence. ***

It is clear that the public has a right to the free and unmolested use of the public highways, and that abutting landowners may not so use their land as to interfere with the rights of persons lawfully using the highways. ***

The inherent nature of the game of baseball ***is such as to require the landowner to take reasonable precautions for the protection of the traveling public. What precautions are reasonable must depend upon the facts and circumstances of the particular case. Only those precautions are required which the inherent nature of the game and its past history in the particular location make necessary for the protection of a person lawfully using the highways. ***

While the defendant has shown that consideration was given by it to the protection of the public at the time the park was first built, the fact remains that despite the precautions taken, baseballs went out of its park into the public highway and that the defendant either knew that baseballs went out of its park or, under the circumstances, should have known. The evidence is not seriously contradicted that baseballs went out of the park into Thirtieth Street within the area through which the plaintiff was passing at the time of her injury two or three times in each game played in the defendant's park.

Under the circumstances, it seems clear to me that while the defendant took precautions to protect people passing along Thirtieth Street, those precautions were insufficient. It further seems clear that the defendant knew, or should have known, that the precautions taken initially were insufficient to protect the public engaged in its lawful right, that is, using the highways. This circumstance puts the case at bar squarely within the rule I have drawn from the reported

decisions, and if this were a jury trial, would be sufficient to submit the case to the jury and would compel, in my opinion, the jury to return a verdict for the plaintiff. Accordingly, my conclusion is that judgment should be entered for the plaintiff.

541

Judgment being entered for the plaintiff, it remains to determine in what amount that judgment should be. Under the circumstances, 1 believe the sum of $2500.00 will adequately compensate the plaintiff for the injuries received as a result of the negligence of the defendant.

NOTES AND QUESTIONS

1. Once a landowner alters a condition of his land, it becomes an "artificial" one for the purposes of tort law and the owner must exercise reasonable care for the protection of those outside of the premises. Thus Towaliga Falls Power Co. v. Sims, 6 Ga. App. 749, 65 S.E. 844 (1909) (damming a stream to form a malarial pond); Ettl v. Land & Loan Co., 122 N.J.L. 401, 5 A.2d 689 (1939) (piling sand where the wind may blow it). This obligation will also arise with regard to a condition that may appear, on the surface, to be a natural one. See, e.g., Coates v. Chinn, 51 Cal.2d 304, 332 P.2d 289 (1958) (cultivated trees). But see, Langer v. Goode, 21 N.D. 462, 131 N.W. 258 (1911) (no liability for growth and spread of weeds when cultivation was a contributing cause).

2. The landowner is not liable for the normal flow of surface water, which is regarded as a "natural" condition. Livezey v. Schmidt, 96 Ky. 441, 29 S.W. 25 (1895); Middlesex County v. McCue, 149 Mass. 103, 21 N.E. 230 (1889). On the same principle, it is generally held

that an abutting owner is under no duty to remove snow and ice that falls naturally upon the highway. See Albertie v. Louis & Alexander Corp., 646 A.2d 1001 (D.C. 1994). However, if the owner has altered the condition of the premises so that surface water or snow is discharged upon the highway, he may be directly held liable for negligence or nuisance. Compare Tremblay v. Harmony Mills, 171 N.Y. 597, 64 N.E. 501 (1902) (liability when downspout resulted in flow of water and ice to sidewalk), with Holschbach v. Wash. Park Manor, 280 Wis. 2d 264, 694 N.W.2d 492 (Ct. App. 2005) (no liability for artificial downspout pouring water on sidewalk because it operated as intended). The fine-spun distinction between hazards naturally arising and those caused by human agency is "not only inconvenient, but also lacks ***any logical foundation." Goldman v. Hargrave, [1967] 1 A.C. 645 (Privy Council) (liability for bush fire in the hot Australian summer made manifest in the 2019 and 2020). What should be the answer if, unlike Goldman, a court hewed to the distinction between natural hazards and those caused by human agency, where, it is argued, that fires are ignited by climate change?

3. Some courts, though, have extended an owner's responsibility for abutting sidewalks. Stewart v. 104 Wallace St., Inc., 87 N.J. 146, 432 A.2d 881 (1981) (commercial owner liable for failing to maintain abutting sidewalks in reasonably good condition), and Cogliati v. Ecco High Frequency Corp., 92 N.J. 402, 456 A.2d 524 (1983) (current owner and predecessor in title liable for poorly maintained public sidewalks).

4. Suppose the plaintiff is injured outside the premises by something subject to the control of the owner of the premises? Compare Blake v. Dunn Farms Inc., 274 Ind. 560, 413 N.E.2d 560 (1980) (horse

running out on highway when landowner was not animal's keeper), with Klobnak v.

542

Wildwood Hills, Inc., 688 N.W.2d 799 (Iowa 2004) (horses running out on highway when landowner owned and kept the horses). Compare Leary v. Lawrence Sales Corp., 442 Pa. 389 (1971) (no duty when food dropped on shopping-center mall two feet from defendant's premises), with Tolu v. Ayodeji, 945 A.2d 596 (D.C. 2008) (duty when construction employees deposited debris in neighbor's yard).

5. Courts have held that landowners have a duty to maintain natural and artificial conditions on private land such that they do not dangerously obscure highway visibility. Physicians Plus Ins. Corp. v. Midwest Mut. Ins. Co., 254 Wis. 2d 77, 646 N.W.2d 777 (2002) (tree on private land obscuring stop sign); Justice v. CSX Transp., Inc., 908 F.2d 119 (7th Cir. 1990) (driver's view obstructed by placement of railway cars on private land) (applying Indiana law).

6. A large body of case law has developed concerning the obligation of landowners to users of the highway who stray onto private land. Compare Hayes v. Malkan, 26 N.Y.2d 295, 258 N.E.2d 695, 310 N.Y.S.2d 281 (1970) (no duty when plaintiff crashed into a utility pole because the pole was on private property rather than public land), with Coates v. S. Md. Elec. Coop., Inc., 354 Md. 499, 731 A.2d 931 (1999) (declining to adopt the distinction between public or private land and noting that the trend is toward a "flexible approach" grounded in foreseeability).

7. Most courts agree that a landholder owes a duty to a traveler who accidentally falls into excavations on land immediately adjoining the highway. See Downes v. Silva, 57 R.I. 343, 190 A. 42 (1937), where the excavation was created or maintained by the landowner; Zens v. Chicago, Milwaukee, St. Paul & Pac. R.R. Co., 386 N.W.2d 475 (S.D.1986). Durst v. Wareham, 132 Kan. 785, 297 P. 675 (1931) (rickety shed collapsed on motorist who slid off the road); Ind. Limestone Co. v. Staggs, 672 N.E.2d 1377 (Ind. Ct. App. 1996) (plaintiffs car skidded into quarry 25 feet from sharp curve in the road).

8. The rule has even been extended, in several cases, to those who deviate intentionally from the highway for some casual purpose connected with travel. Gibson v. Johnson, 69 Ohio App. 19, 42 N.E.2d 689 (1941) (stepping out to allow others to pass); Lacanfora v. Goldapel, 37 A.D.2d 721, 323 N.Y.S.2d 990 (1971) (knobless door close to sidewalk opened when child leaned on it, precipitating him to 12-foot drop).

9. There is no liability as to dangers a considerable distance from the highway. Hardcastle v. South Yorkshire R. & R.D.R. Co., 4 H. & N. 67, 157 Eng. Rep. 761 (1859); Gaboury v. Ireland Rd. Grace Brethren, Inc., 446 N.E.2d 1310 (Ind. 1983) (cable in church parking lot). In Flint v. Bowman, 42 Tex.Civ.App. 354, 93 S.W. 479 (1906), plaintiff was driving along a highway obliterated by fifteen inches of snow. He missed a right turn and continued on across the defendant's land for nearly half a mile until he drove into an abandoned and unguarded well. Is the defendant liable to him?

10. When the land has a deceptive appearance of being a continuation of the public way, a duty may be imposed on the landholder to guard a trap or excavation even though the hazard is actually a considerable distance

543

within private property. See Louisville & Nashville R. Co. v. Anderson, 39 F.2d 403 (5th Cir. 1930); Holmes v. Drew, 151 Mass. 578, 25 N.E. 22 (1890). In such a case the entrant on the land may be deemed to be invited and not a trespasser. Is this inconsistent with the rule of Ranson v. Kitner, supra page 26?

2. On the Premises

(A) Trespassers

Sheehan v. St. Paul & Duluth Ry. Co.

United States Circuit Court of Appeals, Seventh Circuit, 1896.

76 Fed. 201.

[Action for damages for personal injury. While plaintiff was walking on defendant's railroad track, his foot slipped and became caught between the rail and a cattle guard. He was unable to extricate his shoe, or to get at it to untie it. Defendant's train approached, and ran over his foot. Defendant's train crew did not see him until the train was almost upon him, and it was too late to stop it. The trial court directed a verdict for defendant, on the ground that "upon the undisputed facts of the case, this injury did not occur through any wrongful action upon the part of the defendant." Plaintiff appeals.]

Seaman, District Judge. ***The plaintiff, at the time of his injury, was neither in the relation of passenger nor of one in a public crossing or place in which the public were licensed to travel, but, upon the undisputed facts, was a mere intruder on the tracks of the defendant,--technically, a trespasser; and this record excludes any of the elements of implied license or invitation to such use which have given rise to much discussion and diversity of views in the courts. Therefore the inquiry is here squarely presented: What is the duty which a railway company owes to a trespasser on its tracks, and how and when does the duty arise? The decisions upon this subject uniformly recognize that the trespasser cannot be treated as an outlaw; and, at the least, that, if wantonly injured in the operation of the railroad, the company is answerable in damages. Clearly, then, an obligation is placed upon the company to exercise some degree of care when the danger becomes apparent. Is it, however, bound to foresee or assume that rational beings will thus enter as trespassers in a place of danger, and to exercise in the running of its trains the constant vigilance in view of that probability which is imposed for public crossings? There are cases which would seem to hold this strict requirement [cc]; but by the great preponderance of authority, in this country, and in England, the more reasonable doctrine is pronounced, in effect, as follows: That the railroad company has the right to a free track in such places; that it is not bound to any act or service in anticipation of trespassers thereon; and that the trespasser who ventures to enter upon a track for any purpose of his own assumes all risks of the conditions

which may be found there, including the operation of engines and cars. ***

The well-established and just rule which holds the railroad company to the exercise of constant and strict care against injury through its means is applicable only to the relation on which it is founded, of an existing duty or obligation. This active or positive duty arises in favor of the public at a street crossing or other place at which it is presumable that persons or teams may be met. It is not material, so far as concerns this inquiry, whether the place is one for which a lawful right of passage exists, as it is the fact of notice to the company, arising out of its existence and the probability of its use, which imposes the positive duty to exercise care; the requirement of an extreme degree of care being superadded because of the hazards which attend the operations of the company. The case of a trespasser on the track, in a place not open to travel, is clearly distinguishable in the absence of this notice to the company. There is no constructive notice upon which to base the obligation of constant lookout for his presence there, and no actual notice up to the moment the trainmen have discovered the fact of his peril. As that peril comes wholly from his unauthorized act and temerity, the risk, and all positive duty of care for his safety, rests with the trespasser. The obligation of the company and its operatives is not, then, pre-existing, but arises at the moment of discovery, and is negative in its nature,--a duty, which is common to human conduct, to make all reasonable effort to avert injury to others from means which can be controlled. This is the issue presented here. It excludes all inquiry respecting the character of the roadbed, cattle guard, locomotive, brake appliances, or other means of operation, or of the speed or

manner of running the train up to the moment of notice, because no breach of positive duty is involved. It is confined to the evidence relating to the discovery by the engineer and fireman of the plaintiffs peril, and to the efforts then made to avert the injury, and, out of that, to ascertain whether, in any view which may justly be taken, it is shown that these men, or the engineer, in disregard of the duty which then confronted them, neglected to employ with reasonable promptness the means at hand for stopping the train. ***

The court was clearly justified in directing a verdict for the defendant, and the judgment is affirmed.

NOTES AND QUESTIONS

1. How valid are the following explanations, commonly given for the nonliability to the trespassers?

A. It is a burden on ownership to make premises safe for the anticipated arrival of unlawful entrants.

B. Their presence is not reasonably to be anticipated. Suppose a railroad company, as well as everyone else, knows that people do habitually trespass on its right of way.

C. Trespassers assume the risk. What if he does not know there is any risk or is a child too young to assume it? See Santora v. New York, N.H. & H.R. Co., 211 Mass. 464, 98 N.E. 90 (1912), where a child 27 months old got onto a railroad track and was run over.

D. Trespassers are contributorily negligent.

2. Although not clear from the principal case, the foundational rule was that a landowner could not be liable to a trespasser. From this rule, courts began to carve out exceptions as concerns other than the freedom of the landowner became paramount.

3. The rule stated in the principal case is commonly applied to a wide variety of dangerous conditions on the land, including dangerous machinery and defective construction.

4. The landowner's immunity toward trespassers extends to the members of his household. Sohn v. Katz, 112 N.J.L. 106, 169 A. 838 (1934). It does not extend to adjoining landowners. Fitzpatrick v. Penfield, 267 Pa. 564, 109 A. 653 (1920).

5. Throughout the passage of the 20th and early 21st Centuries the restrictive rule was disfavored and narrowed or eliminated.

A. The first exception is that of a trespasser whose presence has been discovered. Frederick v. Philadelphia Rapid Transit Co., 337 Pa. 136, 10 A.2d 576 (1940) (plaintiff fell from subway platform onto track, train automatically stopped by "tripper," crew drove on without making adequate inspection). The earliest cases finding liability to a trespasser were those of spring guns or traps deliberately set for him. From these cases the rule developed that the defendant was not allowed to injure the trespasser negligently by an act specifically directed at him, as in Palmer v. Gordon, 173 Mass. 410, 53 N.E. 909 (1899); Magar v. Hammond, 183 N.Y. 387, 76 N.E. 474 (1906); or recklessly by conduct in conscious disregard of the danger; Trico Coffee Co. v. Clemens, 168 Miss. 748, 151 So. 175 (1933).

From such decisions the rule developed that the defendant is liable for injury to a trespasser for conduct that is "willful or wanton." Thus

in Bremer v. Lake Erie & W.R. Co., 318 III. 11, 148 N.E. 862 (1925), the defendant was held liable when its engineer recklessly ran past a signal and injured a trespasser on the train who had not been discovered.

In a number of states it is still held that there is no liability even to a discovered trespasser unless the defendant's conduct is willful or wanton. Some of these jurisdictions have defined "willful and wanton," as in the principal case, to include a failure to use ordinary care after discovery of the trespasser's presence. See Sloniker v. Great N.R. Co., 76 Minn. 306, 79 N.W. 168 (1899); Cain v. Johnson, 755 A.2d 156 (R.I. 2000).

The great majority of the courts have now discarded "willful and wanton" as a limitation, and have held that when the presence of the trespasser is discovered there is a duty to use ordinary care to avoid injuring him by active operations. This duty includes the control of operating forces, such as machinery already in motion, or a warning against it. Maldonado v.

546

Jack M. Berry Grove Corp., 351 So.2d 967 (Fla.1977); Alexander v. Medical Associates Clinic, 646 N.W.2d 74 (Iowa 2002).

B. Cases involving passive conditions on the land, as distinguished from active operations, have been infrequent. It was once held that the defendant had no duty to warn a trespasser whom he saw walking into a concealed danger. This apparently has now given way to the rule that he must at least warn the trespasser. Martin v. Jones, 122 Utah 597, 609, 253 P.2d 359 (1953); Restatement (Second) of Torts § 337 (1965). Restatement (Third) of Torts: Liability for Physical

and Emotional Harm § 51 (2012), abolishes the distinctions between entrants. It still makes a distinction between "durable" and "nondurable" precautions. A warning may be less costly but requires reasonable notice of the presence of the entrant for the "nondurable" precaution of a warning; comment i.

C. The third exception is that of frequent trespassers on a very limited area of the land. The defendant is required to anticipate the trespassers and to exercise reasonable care in his activities for their protection. In Imre v. Riegel Paper Corp., 24 N.J. 438, 132 A.2d 505 (1957), the existence of a well- defined path across the land was held to be sufficient evidence of frequent trespass.

D. The fourth exception is that of tolerated intruders. This is sometimes explained or justified on the theory that the defendant's continued toleration of the trespasses amounts to permission to use the land, so that the plaintiff becomes a licensee. In most cases, however, the mere fact that a railway company or other defendant has failed to take steps to prevent trespassing, which would be burdensome, expensive, and perhaps futile, is not in itself any indication that it consents to the entry.

E. Other exceptions include dangerous conditions obvious to an owner, Restatement (Second) of Torts §§ 342-343 (1965) and trapped trespassers in peril. Pridgen v. Boston Hous. Auth., 364 Mass. 696, 308 N.E.2d 467(1974).

F. Restatement (Third) of Torts: Liability for Physical and Emotional Harm §§ 51--52 (2012) addresses the dilemma of the duty owed to trespassers by distinguishing between ordinary trespassers and "flagrant" trespassers. While landowners would owe an ordinary

trespasser a duty of reasonable care, they would only owe a flagrant trespasser a duty not to act in an intentional, willful, or wanton manner to cause physical harm. The rationale of the reduced standard arises from the privilege of possessor to exclude persons in the protection of property rights. § 51 comment h. The reasonable duty of care would still attach in the case of imperiled and helpless trespassers. See Restatement (Third) of Torts: Physical and Emotional Harm § 52 comments a and g. It should be noted that the bifurcation has been controversial and some states have retained and passed specific legislation preserving the no duty rule.

6. There is a division of authority over whether a defendant using the land by permission of the owner shares the immunity of the owner toward trespassers. See, e.g., Humphrey v. Twin State Gas & Electric Co., 100 Vt. 414, 139 A. 440 (1927). Thus gratuitous licensees, invitees and holders of

easements have been held liable in some cases and not in others. The Restatement (Second) of Torts §§ 383--386 (1965), has endeavored to resolve the conflict with the statement that persons on the premises who are doing work or creating artificial conditions on behalf of the possessor are subject to the same liability, and entitled to the same immunity, as the possessor; but that other persons on the land with his permission have no such immunity. This logical approach serves to explain the greater number of cases, though by no means all. See Dzenutis v. Dzenutis, 200 Conn. 290, 304, 512 A.2d 130, 137 (1986); Muckey v. Dittoe, 235 Neb. 250, 454 N.W.2d 682 (1990). The Restatement (Third) of Torts: Liability for Physical

and Emotional Harm § 52 comment h (2012) categorizes the duty of "third parties" on the land as owing a duty of "reasonable care," "just as those on the highway owe a duty of reasonable care to a bank robber driving to a planned bank heist."

7. Elsewhere in the Common Law world the law relating to trespassers has gone through similar contortions. The English House of Lords attempted, in conflicting voices, to state a rule in British Railways Board v. Herrington [1972] A.C. 877. Their Lordships held that, the duty owed to trespassers is less than that of reasonable care, and one of "common humanity." The rule was not a panacea and legislation was enacted, see infra note 3, page 566.

(B) Licensees

Barmore v. Elmore

Appellate Court of Illinois, Second District, 1980. 83 III.App. 3d 1056, 403 N.E.2d 1355, 38 III.Dec. 751.

LINDBERG, Justice. Plaintiff, Leon Barmore ("plaintiff'), appeals from an order of the Circuit Court of Winnebago County directing a verdict in favor of defendants, Thomas Elmore, Sr., and Esther Elmore ("defendants").

On August 8, 1977, at approximately 5:30 or 6:00 p.m., plaintiff came to the defendants' home. Both plaintiff and Thomas Elmore, Sr. ("Thomas, Sr.") were officers of a Masonic Lodge and plaintiffs purpose in making the visit was to discuss lodge business. During the course of plaintiffs visit, codefendant, Thomas Elmore, Jr., ("Thomas, Jr."), the defendants' 47-year old son, entered the living room with a steak knife. Thomas, Jr. said "You've been talking about

me," and advanced toward plaintiff. Thomas, Sr. tried to restrain his son while plaintiff left the house. However, Thomas, Jr. was able to get away from his father, and he followed plaintiff out of the house where he stabbed the plaintiff several times in the chest area. Thomas, Sr. followed his son out of the house and, when he saw that plaintiff had been injured, he summoned help.

***[P]laintiffs basic contention is that defendants, as landowners, were negligent in failing to protect him from a dangerous condition upon their premises--namely their son who had a history of mental illness.

548

The extent of defendants' duty in this regard is based in part on whether the plaintiff had the status of an invitee or of a licensee at the time he visited the premises of the defendants.

***In order for a person to be classified as an invitee it is sufficient that he go on the land in furtherance of the owner's business. It is not necessary that the invited person gain an advantage by his entry on the land. [C] A social guest is considered a licensee and has been defined as one who enters the premises of the owner by permission, but for the licensee's own purposes. Therefore, a social guest is a person who goes on another's property for companionship, diversion, or entertainment. [C]

The duty owed by the owner of premises towards an invitee is greater than that owed towards a licensee. [C] A social guest as a licensee, generally must take the premises of his host as he finds them. However, the owner of the premises has a duty to warn the licensee of any hidden dangers which are unknown to his guest, of

which he, the owner, has knowledge, and to refrain from injuring his guest willfully or wantonly. [Cc] Towards an invitee, the owner of the premises has a duty to exercise reasonable care in keeping the premises reasonably safe for use by the invitee. [C] There may be circumstances by which this duty is extended to include the responsibility to protect the invitee from criminal attacks by third parties. [C]

Plaintiff asserts that sufficient evidence was presented at trial to establish his status as an invitee at the time of the incident. Specifically, plaintiff argues that Illinois courts have recognized that the transaction of business of a fraternal organization carries with it such a status. ***

Here, although there is evidence that Thomas, Sr. permitted lodge members to come to his home to pay their dues, the primary benefit of this service ran not to the defendant himself, but rather to the fraternal organization of which both parties were members. In sum, we conclude that plaintiff is best categorized as a licensee--social guest and thus the only duty owed to the plaintiff by the defendants was to warn him of hidden dangers unknown to the plaintiff of which the defendants had knowledge.

There is no question that defendants failed to warn plaintiff of the danger that their son might attack a house guest before the attack was underway. Thus the issue becomes whether under the facts of this case defendants had a duty to do so. Plaintiff contends that he presented sufficient evidence by which a jury could have concluded that the defendants had knowledge of previous incidents which would charge them with a duty to anticipate the criminal acts of their

son toward the plaintiff. We disagree. [The Court summarizes the evidence.]

Verdicts should be directed and judgments n.o.v. entered "only in those cases in which all of the evidence, when viewed in its aspect most favorable to the opponent, so overwhelmingly favors movant that no contrary verdict based on that evidence could ever stand." [C] In our view,

549

the evidence so overwhelmingly established that the defendants did not know or have reason to know of the possibility that Thomas, Jr. would commit a criminal act toward plaintiff that no contrary verdict could ever stand. Although they did know that their son had a history of mental problems and had been hospitalized several times, and also that approximately ten years before the present incident their son had been involved in what could be characterized as two or three violent incidents, the length of time which had passed would not give them reason to know that their son would engage in violent behavior in August, 1977. This conclusion is buttressed by the fact that plaintiff had previous contact with Thomas, Jr. without incident.

Accordingly, the judgment ***is affirmed.

NOTES AND QUESTIONS

1. As in the case of trespassers, it was at first held that there was no duty to a licensee except to refrain from inflicting willful or wanton injury; and there are still courts which hold this. Carter v. Baltimore Gas & Electric Co., 25 Md.App. 717, 336 A.2d 790 (1975); Hill v. Baltimore & Ohio R. Co., 153 F.2d 91 (7th Cir.1946) (Illinois law).

See also, Illinois C. R. Co. v. White, 610 So.2d 308 (Miss. 1992) (affirming the rule that the duty owed to licensees, like trespassers, is to refrain from inflicting willful and wanton injury, but modifying the rule so that "the railroad's duty does not always depend upon the rigid common-law classifications of the injured."). Courts often define "wilful or wanton" to include a failure to exercise ordinary care after the presence of the licensee has been discovered, or should reasonably have been expected. Atlantic Coast Line R. Co. v. Heath, 57 Ga. App. 763, 196 S.E. 125 (1938); Jackson v. Pennsylvania R. Co., 176 Md. 1, 3 A.2d 719 (1939).

2. Most courts have now overruled older decisions and hold that the defendant, in conducting active operations, is under a duty of reasonable care toward licensees. This duty extends not only to licensees who are discovered, but to those whose presence might reasonably be anticipated. Babcock & Wilcox Co. v. Nolton, 58 Nev. 133, 71 P.2d 1051 (1937); Le Poidevin v. Wilson, 111 Wis.2d 116, 330 N.W.2d 555 (Wis. 1983).

3. If defendant landholder knows about a dangerous, latent condition on his premises that a visitor is likely to encounter, he is under a duty to warn the licensee about it. Laube v. Stevenson, 137 Conn. 469, 78 A.2d 693 (1951), involving a dangerous condition on a stairwell, illustrating difference in result between a defendant who knew and one who did not know about the hazard. In 2012, however, the majority opinion in Laube was superseded by a statute requiring the standard of care owed to a social invitee to be the same as that owed to a business invitee. Conn. Gen. Stat. Ann. § 52--577a (West). See also Barry v. Cantrell, 150 Ga.App. 439, 258 S.E.2d 61

(1979) (hammock tied to dead tree); Rushton v. Winters, 331 Pa. 78, 200 A. 60 (1938) (defective porch railing).

The Restatement (Second) of Torts § 342 (1965) subjects the landholder to liability if he had "reason to know" about the unsafe condition. Even in

this modern age when householder's liability insurance is common, this extension has not always been met with approval. Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 51, comment e. extending liability to warn of dangers about which landowner should reasonably have known.

4. In some jurisdictions the licensee category is broken down into two subgroups, the ordinary licensee and the "bare" licensee. The latter group includes salespersons, canvassers and social visitors who "drop in" without an express invitation. As might be expected, the duty owed to "bare" licensees is less than that owed to ordinary licensees. See Kight v. Bowman, 25 Md.App. 225, 333 A.2d 346, 350 (1975); Wilson v. Goodrich, 218 Iowa 462, 252 N.W. 142 (1934); cf. Scheibel v. Lipton, 156 Ohio St. 308, 102 N.E.2d 453 (1951). In other states, the word "bare" is simply an uncomplimentary epithet applied to all licensees.

5. Social Guests. Ever since Southcote v. Stanley, 1 H. & N. 247, 156 Eng.Rep. 1195 (1856), the decisions have been essentially uniform in holding that a social guest, although he is invited, and even urged to come, is not in law an invitee but is to be treated as merely a licensee. See, for example, Stevens v. Dovre, 248 Md. 15, 234 A.2d 596 (1967); cf. Conn. Gen. Stat. Ann. § 52-577a (West)

("The standard of care owed to a social invitee shall be the same as the standard of care owed to a business invitee."), supra note 3 at page 549.

6. An incidental service rendered to an occupier by a social guest does not clothe that social guest an invitee. Thompson v. Katzer, 86 Wash.App. 280, 936 P.2d 421 (Div. 2 1997).

7. Should the rule be changed? Does a social guest anticipate that the premises will be made reasonably safe for his benefit? What about the uninvited social guest, salesperson or canvasser? Does the host receive a "benefit" from a purely social guest? Is it enough to impose a duty of reasonable care? For an incisive analysis of the rule relating to social guests, see Burrell v. Meads, 569 N.E.2d 637 (Ind.1991) (holding that social guests are entitled to a standard of reasonable care from host landowners because social guests are invitees).

8. Should the host be liable for protecting third parties from acts of intoxicated guests? See Kelly v. Gwinnell, 96 N.J. 538, 476 A.2d 1219 (1984), supra page 393. Should parents be liable if they leave teenagers "home alone" and a drunken guest injures plaintiff in a motor vehicle accident after leaving a party at their house? See Morelia v. Machu, 235 N.J.Super. 604, 563 A.2d 881 (App.Div.1989).

(C) Invitees

Campbell v. Weathers

Supreme Court of Kansas, 1941.

153 Kan. 316, 111 P.2d 72.

[Defendant, as tenant of a part of a building in the city of Wichita, operated a lunch counter and cigar stand. Plaintiff entered defendant's place of business, loitered in the front part of the premises for fifteen or twenty minutes without making any purchase, and then went to the back part of the building to use the toilet. He stepped into an open trap door in a dark hallway, and was injured. In his action for negligence, the trial court sustained defendant's demurrer to the evidence and plaintiff appeals.]

WEDELL, J. ***The first issue to be determined is the relationship between plaintiff and the lessee. Was plaintiff a trespasser, a licensee or an invitee? The answer must be found in the evidence. A part of the answer is contained in the nature of the business the lessee conducted. It is conceded lessee operated a business which was open to the public. Lessee's business was that of selling cigars and lunches to the public. It was conceded in oral argument, although the abstract does not reflect it, that the lessee also operated a bar for the sale of beer, but that beer was not being sold on Sunday, the day of the accident. Plaintiff had been a customer of the lessee for a number of years. He resided in the city of Wichita. He was a switchman for one of the railroads. He stopped at the lessee's place of business whenever he was in town. He had used the hallway and toilet on numerous occasions, whenever he was in town, and had never been advised that the toilet was not intended for public use. ***

That the public had a general invitation to be or to become lessee's customers cannot be doubted. ***Can we say, as a matter of law, in

view of the record in this particular case, appellant had no implied invitation to use the toilet simply because he had not made an actual purchase before he was injured? ***

The evidence of lessee's own employees was that the toilet was not regarded as a private toilet. ***In a densely populated business district such a privilege may have constituted a distinct inducement to bring, not only old customers like appellant, but prospective customers into lessee's place of business. ***But we need not rest our conclusion that appellant was an invitee upon the fact that according to the unqualified evidence, not only customers but everybody was permitted to use the toilet.

The writer cannot subscribe to the theory that a regular customer of long standing is not an invitee to use toilet facilities required by law to be provided by the owner of a restaurant, simply because the customer had not actually made a purchase on the particular occasion of his injury, prior to his injury. ***Women do a great deal of shopping.

552

They sometimes shop all day in their favorite stores and fail to make a single purchase. Shall courts say, as a matter of law, they were not invitees of the business simply because on a particular occasion they had not yet made a purchase? No business concern would contend that they were not invitees unless perchance an injury had occurred. Men frequently, during spare moments, step into a place of business, which they patronize regularly, where drinks, cigars and lunches are sold. They may not have intended definitely to presently make a purchase. They may, nevertheless, become interested, for

example, in a new brand of cigars on display which they may purchase then or on some future occasion. Would the owner or operator of the business contend that they were not invitees? We do not think so. Then why should courts arbitrarily say so, as a matter of law? ***

Manifestly this does not imply that a trespasser or a mere licensee who enters the premises on a personal errand for the advancement of his own interest or benefit is entitled to the protection due to an invitee. In the case of Kinsman v. Barton & Co., 141 Wash. 311, 251 P. 563, that court had occasion to determine what constituted an invitee, and said:

"An invitee is one who is either expressly or impliedly invited onto the premises of another in connection with the business carried on by that other. ***If one goes into a store with a view of then, or at some other time, doing some business with the store, he is an invitee." ***

Of course, if it appears that a person had no intention of presently or in the future becoming a customer he could not be held to be an invitee, as there would be no basis for any thought of mutual benefit. ***

The order sustaining the demurrer of the lessee is reversed.

NOTES AND QUESTIONS

1. In Indermaur v. Dames, L.R. 1 C.P. 274 (1866), a journeyman gasfitter came to defendant's sugar refinery to test a patent gas regulator installed there by his employer. He fell down an open and unguarded shaft in the floor and was injured. It was held that the defendant owed him a duty of reasonable care to make the premises

safe for him, because he came "on business which concerns the occupier, and upon his invitation, express or implied."

From this case, those who enter premises "upon business which concerns the occupier" acquired the name of invitees. The early cases left it unclear whether "business" was used in a commercial sense, referring to profit motive, or whether it referred only to the defendant's affairs, as when we say the thing is my own business, and none of yours. Most of the early decisions did not mention any commercial motive behind the invitation, and were decided solely upon the ground that the defendant had thrown his premises open and "invited" the plaintiff to use them. See Corby v. Hill, 4 C.B. N.S. 556 (1858); Sweeny v. Old Colony & Newport R. Co., 10 Allen (92 Mass.) 368, 87 Am.Dec. 644 (1865); Gillis v. Pennsylvania R. Co., 59 Pa. 129, 98 Am. Dec. 317 (1868).

553

The Restatement (Second) of Torts, in § 332 (1965), discarded the term "invitees," and referred instead to "business visitors." The theory adopted was that the duty of affirmative care to make the premises safe is the price that the occupier must pay for the present or prospective economic benefit to be derived from the visitor's presence. Hopkins v. Fox & Lazo Realtors, 132 N.J. 426, 625 A.2d 1110 (1993) ("An owner or possessor of property owes a higher degree of care to the business invitee because that person has been invited on the premises for purposes of the owner that often are commercial or business related.") See Restatement (Third) of Torts: Liability for Physical and Emotional Harm §§ 40, 51 (2012) abolishing the distinctions.

2. Actual or potential pecuniary benefit is easily made out in the case of customers who intend to buy, or who are merely "just looking". How valid is the attempt to find it in the following situations?

A. Children accompany parents to stores or other places of business, where nothing is to be bought for the child. Anderson v. Cooper, 214 Ga. 164, 104 S.E.2d 90 (1958). Or adult friends accompany the customer. Goldsmith v. Cody, 351 Mich. 380, 88 N.W.2d 268 (1958).

B. Friends meet passengers at a railway station, or see them off. McCann v. Anchor Line, 79 F.2d 338 (2d Cir.1935). Or a potential passenger has not yet obtained a ticket on an airline. Suarez v. Trans World Airlines, Inc., 498 F.2d 612 (7th Cir.1974) (applying Illinois law).

C. Tourists are invited to go through factories. Gilliland v. Bondurant, 51 S.W.2d 559 (Mo.App.1932), aff'd, 332 Mo. 881, 59 S.W.2d 679 (1933).

3. In all of the following instances the plaintiff has been held to be an invitee:

A. Those attending free public meetings. Bunnell v. Waterbury Hosp., 103 Conn. 520, 131 A. 501 (1925) (Salvation Army); Howe v. Ohmart, 7 Ind.App. 32, 33 N.E. 466 (1893) (literary society); Geiger v. Simpson M.E. Church, 174 Minn. 389, 219 N.W. 463 (1928) (social meeting at church).

B. Spectators at public amusements, entering on a free pass. Recreation Centre Corp. v. Zimmerman, 172 Md. 309, 191 A. 233

(1937); Mesa v. Spokane World Exposition, 18 Wash.App. 609, 570 P.2d 157 (1977).

C. Entering a bank to get change for a $20 bill. First Nat'l Bank of Birmingham v. Lowery, 263 Ala. 36, 81 So.2d 284 (1955).

D. Coming to get things advertised to be given away. Roper v. Commercial Fibre Co., 105 N.J.L. 10, 143 A. 741 (1928) (ashes and boxes); Edwards v. Gulf Oil Corp., 69 Ga.App. 140, 24 S.E.2d 843 (1943) (comic books at filling station).

E. Use of state or municipal land open to the public. Caldwell v. Village of Island Park, 304 N.Y. 268, 107 N.E.2d 441 (1952) (park); Lowe v. Gastonia, 211 N.C. 564, 191 S.E. 7 (1937) (golf course); Ashworth v. City of Clarksburg, 118 W.Va. 476, 190 S.E. 763 (1937) (swimming pool).

F. Visitors in national parks. Adams v. United States, 239 F.Supp. 503 (E.D.Oki.1965); Smith v. United States, 117 F.Supp. 525 (N.D.Cal.1953) (camper).

554

4. Most courts have rejected the old rule that plaintiffs status on public land depends on whether he was entering the premises for the purpose for which they were open to the public (invitee) or whether he entered the premises for an unintended purpose (licensee). See Home Ins. Co. v. Spears, 267 Ark. 704, 590 S.W.2d 71 (1979). In other words, on public land, the state, city or county owes to all persons coming on the premises a duty to use reasonable care to keep the premises safe.

5. In Guilford v. Yale Univ., 128 Conn. 449, 23 A.2d 917 (1942), plaintiff attended a class reunion on the Yale campus. Late at night, seeking to urinate, he proceeded into a dark area, fell over a low retaining wall to a level ten feet below, and was injured. It was held that he was an invitee, without regard to any question of "mutual benefit." Is this one of the purposes for which Old Eli invites its alumni to return to the hallowed elms?

6. What if a customer, in an attempt to find the restroom, is injured on another part of the premises? Knapp v. Conn. Theatrical Corp., 122 Conn. 413, 190 A. 291 (1937).

Whelan v. Van Natta

Court of Appeals of Kentucky, 1964.

382 S.W.2d 205.

[Plaintiff came into defendant's grocery store, and purchased some cigarettes. He then asked about a box for his son. Defendant, who was busy behind the counter, replied, "Go back in the backroom. You will find some back there." Plaintiff went to the rear of the store, and opened the door of the storage room. The room was dark, and the light was not turned on. In hunting around for a box, plaintiff fell into an unseen stair well, and was injured. The defendant testified that he did not warn plaintiff of the existence of the stair well, that the light in the room had been on that morning, and that he did not know whether it was still on when the plaintiff fell.

On these facts, the court gave judgment for the defendant, and plaintiff appealed.]

MONTGOMERY, Judge. ***The trial court held that appellant was a licensee at the time of his fall, to whom appellee owed no duty to provide a safe place, save and except to have abstained from doing any intentional or willful act endangering his safety or knowingly letting appellant run upon a hidden peril. [C] Appellant contends that he entered the store on business with appellee and thus had the status of an invitee and that he still occupied this status when he fell and was injured. The question is: "Did the status of appellant change from invitee to licensee after he made his purchase and went into the storage room to obtain the box?" The status of appellant determines the degree of responsibility of appellee.

555

Pertinent discussion of the scope of the invitation is contained in Torts, Restatement of the Law, Second, Chapter 13, Section 332, page 67 as follows:

"The possessor of land is subject to liability to another as an invitee only for harm sustained while he is on the land within the scope of his invitation. Thus an invitee ceases to be an invitee after the expiration of a reasonable time within which to accomplish the purpose for which he is invited to enter, or to remain. Whether at the expiration of that time he becomes a trespasser or a licensee will depend upon whether the possessor does or does not consent to his remaining on the land.

"Likewise, the visitor has the status of an invitee only while he is on the part of the land to which his invitation extends--or in other words, the part of the land upon which the possessor gives him reason to believe that his presence is desired for the purpose for which he has

come. In determining the area included within the invitation, the purpose for which the land is held open, or the particular business purpose for which the invitation is extended is of great importance. ***

"If the invitee goes outside of the area of his invitation, he becomes a trespasser or a licensee, depending upon whether he goes there without the consent of the possessor, or with such consent. Thus one who goes into a shop which occupies part of the building, the rest of which is used as the possessor's residence, is a trespasser if he goes into the residential part of the premises without the shopkeeper's consent; but he is a licensee if the shopkeeper permits him to go to the bathroom, or invites him to pay a social call."

Judgment affirmed.

NOTES AND QUESTIONS

1. What if the visitor is invited to go to an unusual part of the premises, such as a stock room, to make his own selection of goods? Bullock v. Safeway Stores, 236 F.2d 29 (8th Cir. 1956) (applying Missouri law). See also Lavitch v. Smith, 224 Or. 498, 356 P.2d 531 (1960) (salesman invited into private office); Crown Cork & Seal Co. v. Kane, 213 Md. 152, 131 A.2d 470 (1957) (truck driver's helper forced to wait, going to smoking room).

2. What if the visitor is injured taking a shortcut to the parking lot? Nicoletti v. Westcor, Inc., 131 Ariz. 140, 639 P.2d 330 (1982).

3. The scope of the duty owed by an occupant to an invitee is one of reasonable care in all the circumstances. Even though the danger is known to the plaintiff, the defendant may be found to be negligent if it

is not too difficult to eliminate the danger and he should reasonably anticipate that the plaintiff might still be injured by it; Wilk v. Georges, 267 Or. 19, 514 P.2d 877 (duty not necessarily discharged by posting warning signs). On the issue of "reasonable care," see Preuss v. Sambo's of Arizona, Inc., 130 Ariz. 288, 635 P.2d 1210, 1211 (1981); see also Restatement (Second) of Torts §§ 343, 343A (1965).

556

4. When an obvious hazard is also a natural one such as snow, ice or rainwater, a number of jurisdictions hold that the invitor owes no duty to any invitee who slips or falls because of the hazard. See Sidle v. Humphrey, 13 Ohio St.2d 45, 233 N.E.2d 589 (1968). But cf. Richardson v. Corvallis Pub. Sch. Dist. No. 1, 286 Mont. 309, 950 P.2d 748 (Mont. 1997). In Richardson, the court did not focus on whether or not the condition was "natural," but rather whether it was open and obvious. The court adopted the following standard of care: "The possessor of the premises is not liable to persons foreseeably upon the premises for physical harm caused to them by any activity or condition on the premises whose danger is known or obvious to them, unless the possessor should anticipate the harm despite such knowledge or obviousness." Richardson retained the no duty rule but provided an exception based on foreseeable harm notwithstanding an obvious risk, in accord with The Restatement (Second) of Torts § 343A(1) (1965). Accord, Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 51 comment k (2012).

5. As elsewhere, the duty is not confined to injuries caused solely because of the condition of the premises. The Illinois Supreme Court in Marshall v. Burger King Corporation, 222 III.2d 422, 305 III.Dec.

897, 856 N.E.2d 1048 (2006) examined the degree of foreseeability necessary to impose a duty of care where the deceased customer of the fast food restaurant was fatally injured by a car that crashed through the wall of the restaurant and struck the customer. The majority found that the duty extended to protect customers from the negligent acts of third persons even though defendant restaurant had no notice of prior similar incidents. Precedents requiring a particularized notice of the type of damages were overruled in favor of a broad foreseeability test for the duty of care. Restatement (Second) of Torts, § 344, comment /(1965) was interpreted to require an inquiry of all surrounding circumstances of the accident as establishing foreseeability. Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 40(b)(3) (2012) brings the law up to date supporting the general duty of care.

6. There are two lines of cases concerning an invitor's duty to an invitee injured at the hands of third party criminal conduct. Injured parties assert either that (1) the invitor has failed to take reasonable measures to reduce the likelihood of dangerous criminal activity posing a danger to invitees or that (2) the invitor's actions (or those of her servant) in the face of the crime negligently endangered the invitee. Two other lines of cases concern an invitor's duty to an invitee injured at the hands of third-party criminal elements. Injured parties assert either that (1) the invitor has failed to take reasonable measures to reduce the likelihood of dangerous criminal activity posing a danger to invitees or that (2) the invitor's actions (or those of her servant) in face of the crime negligently endangered the invitee.

In the former category, the courts have sometimes found a duty to protect entrants as in Erickson v. Curtis Investment Co., 447 N.W.2d 165 (Minn. 1989), wherein a duty of care was imposed on the operator or owner of a parking ramp facility toward a customer who was raped in her parked car. The court stressed the particular focus and opportunity for criminals

557

and their criminal activities in structures of this kind. The duty was expressed in terms of reasonable care to deter, requiring the jury to weigh "the likelihood of the risk with the financial and practical feasibility of the means to meet that risk * * In contrast, the Michigan Supreme Court in Williams v. Cunningham Drug Stores, Inc., 429 Mich. 495, 418 N.W.2d 381 (1988), found that the proprietor of a drug store owed no duty to hire armed guards to deter robberies and associated violence in a high crime area. The defendant was found not to have sufficient control and any duty would be difficult to apply. The duty to use care may apply to discovery of the dangerous criminal, cf. Townsley v. Cincinnati Gardens, Inc., 39 Ohio App.2d 5, 68 Ohio Op.2d 72, 314 N.E.2d 409 (1974) (dictum); to becoming aware of his dangerous character, cf. Repka v. Rentalent Inc., 477 P.2d 470 (Colo.App. 1970); or to giving a warning of the danger, see Sinn v. Farmers' Deposit Sav. Bank, 300 Pa. 85, 150 A. 163 (1930).

In respect of the latter category--the invitor's actions in the face of a crime--the courts have shown a disinclination to second guess actions taken in the exigencies of an ongoing crime. In Boyd v. Racine Currency Exchange, Inc., 56 III.2d 95, 306 N.E.2d 39 (1973), the plaintiffs decedent was shot by a robber when a teller, behind a

bullet-proof shield, refused to comply with the robber's demand for money or access to a restricted area. The court found that to impose a duty of compliance would benefit criminals and endanger "future business invitees."

7. In another line of cases, courts have found that a landowner may be liable to injuries sustained by an invitee for the intentional acts of others falling short of criminal behavior. Reasonable precautions must be taken to prevent an intoxicated patron from harming another, McFarlin v. Hall, 127 Ariz. 220, 619 P.2d 729 (1980). Similarly, a duty extends to taking reasonable precautions to maintain order in a movie theater--such as preventing reasonably foreseeable violence to a patron in the parking lot following a movie. The movie patron had been killed by other attendees who had been disruptive. Silva v. Showcase Cinemas Concessions of Dedham, Inc., 736 F.2d 810 (1st Cir.1984), cert, denied, 469 U.S. 883 (1984). The duty may also extend to adjacent property, particularly entrances to the business premises if the business is aware of a dangerous condition and fails to warn invitees or take precautions. Banks v. Hyatt Corp., 722 F.2d 214 (5th Cir.1984) (applying Louisiana law).

(D) Persons Outside the Established Categories

(1) Children

Courts have been reluctant to apply to child trespassers or licensees the same limited-duty rules that would be applicable to adults. By various legal devices, most of them have imposed on landowners

the duty to exercise a higher standard of care toward children. A principal reason for this is society's interest in protecting children from serious injury. See Green, Landowners' Responsibility to Children, 27 Tex. L. Rev. 1 (1948).

558

The Attractive Nuisance Doctrine. The first major inroad serving to raise the duty owed to child trespassers and licensees developed over a hundred years ago--it was known as the "attractive nuisance" or "turntable" doctrine. See Sioux City & Pac. R. Co. v. Stout, 84 U.S. (17 Wall.) 657 (1873); Keffe v. Milwaukee & St. Paul R. Co., 21 Minn. 207, 18 Am.Rep. 393 (1875). These cases arose when a young child entered railroad property and was seriously injured while playing on an unlocked turntable. The courts decided that when a landholder sets before young children a temptation that he has reason to believe will lead them into danger, he must use ordinary care to protect them from harm. The courts relied on English precedents where defendants who set traps baited with strong smelling meat on their land were held liable when dogs were lured upon the land and killed in the traps.

On the basis of the turntable decisions, the doctrine acquired the misleading name "attractive nuisance." The word "nuisance" was used because of a supposed analogy to conditions dangerous to children outside the premises. The word "attractive" was applied because courts regarded it as essential that the child be lured or enticed onto the premises.

Justice Holmes, in United Zinc & Chemical Co. v. Britt, 258 U.S. 268 (1922), forestalled the doctrine's growth. In this case, two children

trespassed on defendant's land and then discovered a pool of water, apparently clear but actually poisoned with sulfuric acid. The children went into the water and were harmed. Justice Holmes held that the attractive-nuisance doctrine did not apply because the children were not attracted onto the land and induced to trespass in the first instance by the thing that injured them.

Restatement of Torts § 339 (1934). The question of what duty should be owed to child trespassers or licensees occupied considerable time and thought in the preparation of the First Restatement of Torts. The result of these efforts was § 339, which became one of the most influential provisions of the entire Restatement. The authors abandoned the fictitious language of "attractive nuisance" and substituted the title "Artificial Conditions Highly Dangerous to Trespassing Children." As readopted, with only a few modifications, in the Restatement (Second) of Torts, it reads:

A possessor of land is subject to liability for physical harm to children trespassing thereon caused by an artificial condition upon the land if

(a) the place where the condition exists is one upon which the possessor knows or has reason to know that children are likely to trespass, and

(b) the condition is one of which the possessor knows or has reason to know and which he realizes or should realize will

559

involve an unreasonable risk of death or serious bodily harm to such children, and

(c) the children because of their youth do not discover the condition or realize the risk involved in intermeddling with it or in coming within the area made dangerous by it, and

(d) the utility to the possessor of maintaining the condition and the burden of eliminating the danger are slight as compared with the risk to children involved, and

(e) the possessor fails to exercise reasonable care to eliminate the danger or otherwise to protect the children.

It is clear that the Restatement (Second) of Torts rejected the Britt case. It was not essential that the child be attracted or lured onto the premises by the thing that injured him. The Restatement (Second), § 339, however, has been superseded by § 51 of the Restatement (Third) of Torts: Liability for Physical and Emotional Harm (2012), which provides that a possessor of land owes a duty of reasonable care to entrants on the land with regard to natural and artificial conditions, among other things. Comment I addresses child trespassers and indicates that the principles behind § 339 of the Restatement (Second) remain relevant to determining whether a possessor of land exercised reasonable care under § 51 of the Restatement (Third).

(2) Persons Privileged to Enter Irrespective of Landowner's Consent

Public employees or officials do not fit very well into any of the categories that the law has established for the classification of visitors. They are not trespassers, since they are privileged to enter. This privilege is independent of any permission, consent or license of

the occupier; they would be privileged to enter and could insist upon doing so even if the landholder made an active objection. They normally do not come for any of the purposes for which the premises are held open to the public, and frequently they do not enter for any benefit of the occupier, or under circumstances which would justify any expectation that the place has been prepared to receive them.

Many courts have still struggled to place public officers and employees within the category of invitees. Some public officers enter for a purpose connected with defendant's business, and are essential to it, since without them it could not legally be carried on. This is true, for example, of sanitary and safety inspectors, who are commonly held to be invitees. Swift & Co. v. Schuster, 192 F.2d 615 (10th Cir.1951); Atchley v. Berlen, 87 Ill.App. 3d 61, 408 N.E.2d 1177, 42 Ill.Dec. 468 (1980). Economic advantage may also be made out in the case of a garbage collector, a city water-meter reader or a mail carrier. Finnegan v. Fall River Gas-Works Co., 159 Mass. 311, 34 N.E. 523 (1893); Paubel v. Hitz, 339 Mo. 274, 96 S.W.2d 369 (1936).

560

On the other hand, both fire and police officers have generally been held to enter under a bare license conferred by the law, and so to be no more than licensees. This means, however, that if defendant knows they are present, he must warn them of known dangers which they are unlikely to discover. James v. Cities Serv. Oil Co., 66 Ohio App. 87, 31 N.E.2d 872 (1939), aff'd, 140 Ohio St. 314, 23 Ohio Ops. 571, 43 N.E.2d 276 (1942); Rogers v. Cato Oil & Grease Co., 396 P.2d 1000 (Okl. 1964).

The general frustration with categorizing policemen and firemen into common law categories has prompted some courts to abandon the category system as applied to public officers and simply apply a general negligence, reasonable care standard. See Mounsey v. Ellard, 363 Mass. 693, 297 N.E.2d 43 (1973); Armstrong v. Mailand, 284 N.W.2d 343 (Minn. 1979). Oregon abolished the fireman's rule in Christensen v. Murphy, 296 Or. 610, 678 P.2d 1210 (1984).

The Restatement (Third) of Torts: Liability for Physical and Emotional Harm in § 51 deals with firefighters and other professional rescuers. Since that provision provides for a unified duty owed to entrants, it eliminates the need to classify separately the status of firefighters, police officers, and other professional rescuers. Most jurisdictions that limit the possessor's liability to rescuers do so on grounds other than the rescuer's status on the land. One approach is that, since professional rescuers, and their workers compensation payments are paid by the tax payers, it would be inappropriate to hold tax payers liable for injuries suffered by the rescuers, thereby charging the tax payer twice. See Roberts v. Vaughn, 459 Mich. 282, 587 N.W.2d 249 (1998). Other courts have grounded the limitation of liability on assumption of risk and public policy concerns. See Zanghi v. Niagara Frontier Transp. Comm'n, 85 N.Y.2d 423, 649 N.E.2d 1167 (1995); Syracuse Rural Fire Dist. v. Pletan, 254 Neb. 393, 577 N.W.2d 527 (1998); Aetna Cas. & Sur. Co. v. Vierra, 619 A.2d 436 (R.I. 1993). Yet, some jurisdictions continue to base liability to rescuers on land-possessor duties. See Levandoski v. Cone, 267 Conn. 651, 841 A.2d 208 (2004).

Private Persons. The same kinds of problems, with some additional complications, exist in regard to private individuals who come on the

premises for self-protection or to rescue or aid someone. They may be privileged as a matter of law to enter, regardless of the landowner's consent. Should the duty owed to them be derivative, depending upon the classification of the person being rescued? What would be the effect of that person's contributory negligence?

561

(E) Rejection or Merging of Categories Rowland v. Christian

Supreme Court of California, 1968.

69 Cal.2d 108, 443 P.2d 561. 70 Cal.Rptr. 97.

PETERS, Justice. Plaintiff appeals from a summary judgment for defendant Nancy Christian in this personal injury action.

[The evidence was that plaintiff was a social guest in defendant's apartment; that he asked to use the bathroom; and that while there he was injured when a cracked handle of the cold water faucet on the basin broke and severed tendons and nerves on his right hand. Also that defendant had known for two weeks that the handle was cracked and had complained to the manager of the building, but that she did not say anything to the plaintiff as to its condition.] ***

Section 1714 of the Civil Code provides: "Every one is responsible, not only for the result of his willful acts, but also for an injury occasioned to another by his want of ordinary care or skill in the management of his property or person, except so far as the latter has, willfully or by want of ordinary care, brought the injury upon himself...". [Cc] ***

Although it is true that some exceptions have been made to the general principle that a person is liable for injuries caused by his failure to exercise reasonable care in the circumstances, it is clear that in the absence of statutory provision declaring an exception to the fundamental principle enunciated by section 1714 of the Civil Code, no such exception should be made unless clearly supported by public policy. [Cc]

A departure from this fundamental principle involves the balancing of a number of considerations; the major ones are the foreseeability of harm to the plaintiff, the degree of certainty that the plaintiff suffered injury, the closeness of the connection between the defendant's conduct and the injury suffered, the moral blame attached to the defendant's conduct, the policy of preventing future harm, the extent of the burden to the defendant and consequences to the community of imposing a duty to exercise care with resulting liability for breach, and the availability, cost, and prevalence of insurance for the risk involved. [Cc]

One of the areas where this court and other courts have departed from the fundamental concept that a man is liable for injuries caused by his carelessness is with regard to the liability of a possessor of land for injuries to persons who have entered upon that land. It has been suggested that the special rules regarding liability of the possessor of land are due to historical considerations stemming from the high place which land has traditionally held in English and American thought, the dominance and prestige of the landowning class in England during the formative period of the rules governing the possessor's liability, and the heritage of feudalism. [C]

[The court reviewed the various confusing rules and exceptions that had been applied in California to licensees.]

The cases dealing with the active negligence and the trap exceptions are indicative of the subtleties and confusion which have resulted from application of the common law principles governing the liability of the possessor of land. Similar confusion and complexity exist as to the definitions of trespasser, licensee, and invitee. [C]

[Caption: California Supreme Court

Front row: McComb, Traynor, C.J., Peters

Back row: Burke, Tobriner, Mosk, Sullivan.]

In refusing to adopt the rules relating to the liability of a possessor of land for the law of admiralty, the United States Supreme Court stated: "The distinctions which the common law draws between licensee and invitee were inherited from a culture deeply rooted to the land, a culture which traced many of its standards to a heritage of feudalism. In an effort to do justice in an industrialized urban society, with its complex economic and individual relationships, modern common-law courts have found it necessary to formulate increasingly subtle verbal refinements, to create subclassifications among traditional common-law categories, and to delineate fine gradations in the standards of care which the landowner owes to each. Yet even within a single jurisdiction, the classifications and subclassifications bred by the common law have produced confusion and conflict. As new distinctions have been spawned, older ones have become obscured. Through this semantic morass the common

law has moved, unevenly and with hesitation, towards 'imposing on owners and occupiers a single duty of reasonable care in all circumstances.'" (Footnotes omitted.) (Kermarec v. Compagnie Generate, 358 U.S. 625, 630-631.) ***

563

There is another fundamental objection to the approach to the question of the possessor's liability on the basis of the common law distinctions based upon the status of the injured party as a trespasser, licensee, or invitee. Complexity can be borne and confusion remedied where the underlying principles governing liability are based upon proper considerations. Whatever may have been the historical justifications for the common law distinctions, it is clear that those distinctions are not justified in the light of our modern society and that the complexity and confusion which has arisen is not due to difficulty in applying the original common law rules--they are all too easy to apply in their original formulation--but is due to the attempts to apply just rules in our modern society within time-worn terminology.

Without attempting to labor all of the rules relating to the possessor's liability, it is apparent that the classifications of trespasser, licensee, and invitee, the immunities from liability predicated upon those classifications, and the exceptions to those immunities, often do not reflect the major factors which should determine whether immunity should be conferred upon the possessor of land. Some of those factors, including the closeness of the connection between the injury and the defendant's conduct, the moral blame attached to the defendant's conduct, the policy of preventing future harm, and the

prevalence and availability of insurance, bear little, if any, relationship to the classifications of trespasser, licensee and invitee and the existing rules conferring immunity.

Although in general there may be a relationship between the remaining factors and the classifications of trespasser, licensee, and invitee, there are many cases in which no such relationship may exist. Thus, although the foreseeability of harm to an invitee would ordinarily seem greater than the foreseeability of harm to a trespasser, in a particular case the opposite may be true. The same may be said of the issue of certainty of injury. The burden to the defendant and consequences to the community of imposing a duty to exercise care with resulting liability for breach may often be greater with respect to trespassers than with respect to invitees, but it by no means follows that this is true in every case. In many situations, the burden will be the same, i.e., the conduct necessary upon the defendant's part to meet the burden of exercising due care as to invitees will also meet his burden with respect to licensees and trespassers. The last of the major factors, the cost of insurance, will, of course, vary depending upon the rules of liability adopted, but there is no persuasive evidence that applying ordinary principles of negligence law to the land occupier's liability will materially reduce the prevalence of insurance due to increased cost or even substantially increase the cost.

Considerations such as these have led some courts in particular situations to reject the rigid common law classifications and to approach

the issue of the duty of the occupier on the basis of ordinary principles of negligence. [Cc] And the common law distinctions after thorough study have been repudiated by the jurisdiction of their birth. (Occupiers' Liability Act, 1957, 5 and 6 Eliz. 2, ch. 31.)

A man's life or limb does not become less worthy of protection by the law nor a loss less worthy of compensation under the law because he has come upon the land of another without permission or with permission but without a business purpose. Reasonable people do not ordinarily vary their conduct depending upon such matters, and to focus upon the status of the injured party as a trespasser, licensee, or invitee in order to determine the question whether the landowner has a duty of care, is contrary to our modern social mores and humanitarian values. The common law rules obscure rather than illuminate the proper considerations which should govern determination of the question of duty. ***

Once the ancient concepts as to the liability of the occupier of land are stripped away, the status of the plaintiff relegated to its proper place in determining such liability, and ordinary principles of negligence applied, the result in the instant case presents no substantial difficulties. As we have seen, when we view the matters presented on the motion for summary judgment as we must, we must assume defendant Miss Christian was aware that the faucet handle was defective and dangerous, that the defect was not obvious, and that plaintiff was about to come in contact with the defective condition, and under the undisputed facts she neither remedied the condition nor warned plaintiff of it. Where the occupier of land is aware of a concealed condition involving in the absence of precautions an unreasonable risk of harm to those coming in contact

with it and is aware that a person on the premises is about to come in contact with it, the trier of fact can reasonably conclude that a failure to warn or to repair the condition constitutes negligence. Whether or not a guest has a right to expect that his host will remedy dangerous conditions on his account, he should reasonably be entitled to rely upon a warning of the dangerous condition so that he, like the host, will be in a position to take special precautions when he comes in contact with it. ***

The judgment is reversed.

BURKE, J. I dissent. In determining the liability of the occupier or owner of land for injuries, the distinctions between trespassers, licensees and invitees have been developed and applied by the courts over a period of many years. They supply a reasonable and workable approach to the problems involved, and one which provides the degree of stability and predictability so highly prized in the law. The unfortunate alternative, it appears to me, is the route taken by the majority in their opinion in this case; that such issues are to be decided on a case by case basis under the application of the basic law of negligence, bereft of the guiding principles and precedent which the law has heretofore attached by virtue of the relationship of the parties to one another.

565

Liability for negligence turns upon whether a duty of care is owed, and if so, the extent thereof. Who can doubt that the corner grocery, the large department store, or the financial institution owes a greater duty of care to one whom it has invited to enter its premises as a prospective customer of its wares or services than it owes to a

trespasser seeking to enter after the close of business hours and for a nonbusiness or even an antagonistic purpose? I do not think it unreasonable or unfair that a social guest (classified by the law as a licensee, as was plaintiff here) should be obliged to take the premises in the same condition as his host finds them or permits them to be. Surely a homeowner should not be obliged to hover over his guests with warnings of possible dangers to be found in the condition of the home (e.g., waxed floors, slipping rugs, toys in unexpected places, etc., etc.). Yet today's decision appears to open the door to potentially unlimited liability despite the purpose and circumstances motivating the plaintiff in entering the premises of another, and despite the caveat of the majority that the status of the parties may "have some bearing on the question of liability ***," whatever the future may show that language to mean.

In my view, it is not a proper function of this court to overturn the learning, wisdom and experience of the past in this field. Sweeping modifications of tort liability law fall more suitably within the domain of the Legislature, before which all affected interests can be heard and which can enact statutes providing uniform standards and guidelines for the future.

I would affirm the judgment for defendant.

McComb, J., concurred.

NOTES AND QUESTIONS

1. Criticism of the categories as a vehicle for determining the duty a possessor of land owes to a visitor or intruder is not new. See Bohlen, The Duty of a Landholder Towards Those Entering His Premises of Their Own Right, 69 U.Pa.L.Rev. 142 (1921), also in F.

Bohlen, Studies in the Law of Torts, 136, 163 (1926); Lord Denning in Dunster v. Abbott, [1953] 2 All E.R. 1572, 1574 (C.A.).

The principal case has "shown sustained persuasive influence." Robert L. Rabin, Rowland v. Christian: Hallmark of an Expansionary Era, Torts Stories, Rabin and Sugarman (eds.) (2003) 73, at 91. The Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 51 (2012) proposes a general duty of reasonable care to all entrants on land for natural, artificial, and land possessor created risks except for flagrant trespassers. The Supreme Court of Nevada in Foster v. Costco Wholesale Corporation, 291 P.3d 150 (Nev. 2012) adopts the provision in discussing liability for open and obvious dangers on the premises.

2. California has declined to apply the rule from the principal case when the injured plaintiff is a trespassing criminal. Cal. Civ. Code § 847 (West).

566

3. In Hopkins v. Fox & Lazo Realtors, 132 N.J. 426, 625 A.2d 1110 (1993), the court held that a real estate broker owed a duty to a person inspecting the house during an open-house. The duty was one to take reasonable care in preventing foreseeable harm to its open-house customers. The duty was owed in addition to that of the owner to the entrant. The court applied the principal case, finding that approximately fourteen jurisdictions had completely abrogated the various categories of entrants, while "many others" had eliminated the distinction between licensees and business invitees. Other jurisdictions, however, have reaffirmed the retention of the categories. Whaley v. Lawing, 352 So.2d 1090 (Ala. 1977); Bailey v.

Pennington, 406 A.2d 44 (Del.1979); Huyck v. Hecla Mining Co., 101 Idaho 299, 612 P.2d 142 (1980); Murphy v. Baltimore Gas & Elec. Co., 290 Md. 186, 428 A.2d 459 (1981) (trespassers only); Buchanan v. Prickett & Son, Inc., 203 Neb. 684, 279 N.W.2d 855 (1979); Moore v. Denune & Pipic, Inc., 26 Ohio St.2d 125, 269 N.E.2d 599 (1971); Younce v. Ferguson, 106 Wash.2d 658, 724 P.2d 991 (1986); Pinnell v. Bates, 838 So.2d 198 (Miss. 2002) (cogent argument for maintaining the distinction); Woodty v. Weston's Lamplighter Motels, 171 Ariz. 265, 830 P.2d 477, 480 (1992); Sims v. Giles, 343 S.C. 708, 541 S.E.2d 857, 861 (2001); Musch v. H-D Elec. Co-op., Inc., 460 N.W.2d 149, 151 (S.D. 1990); Franconia Assocs. v. Clark, 250 Va. 444, 463 S.E.2d 670, 672-73 (1995); Buzzell v. Jones, 151 Vt. 4, 556 A.2d 106, 108 (1989); Carter v. Kinney 896 S.W.2d 926, 930 (Mo. 1995); Lohrenz v. Lane 787 P.2d 1274 (Okla. 1990).

4. While there is considerable agreement that the general negligence standard should be applied to all persons invited or permitted on the premises, there is less accord as to how the trespasser should be handled. Some cases deliberately applied it to a trespasser. In Mark v. Pacific Gas & Elec. Co., 7 Cal.3d 170, 496 P.2d 1276, 101 Cal.Rptr. 908 (1972), a college student was electrocuted when he attempted to unscrew a street lamp located outside his apartment bedroom window. The Supreme Court of California reaffirmed that the negligence standard would be applied to trespassers. Many of the cases adopting Rowland have not involved trespass, and in some that have raised the issue the courts have not extended the duty to the benefit of trespassers: Wood v. Camp, 284 So.2d 691 (Fla. 1973); Nelson v. Freeland, 349 N.C. 615, 507 S.E.2d 882

(1998); Peterson v. Balach, 294 Minn. 161, 199 N.W.2d 639 (1972), Mounsey v. Ellard, 363 Mass. 693, 297 N.E.2d 43 (1973); O'Leary v. Coenen, 251 N.W.2d 746 (N.D. 1977); Poulin v. Colby College, 402 A.2d 846 (Me. 1979); Baltimore Gas & Elec. Co. v. Flippo, 348 Md. 680, 705 A.2d 1144 (1998); Heins v. Webster County, 250 Neb. 750, 552 N.W.2d 51; Ford v. Board of County Comm'rs, 118 N.M. 134, 879 P.2d 766 (1994); Ragnone v. Portland Sch. Dist. No. 1J, 291 Ore. 617, 633 P.2d 1287 (1981); Tantimonico v. Allendale Mut. Ins. Co., 637 A.2d 1056 (R.I. 1994); Hudson v. Gaitan, 675 S.W.2d 699 (Tenn. 1984); Clarke v. Beckwith, 858 P.2d 293 (Wyo. 1993).

3. Lessor and Lessee

Borders v. Roseberry

Supreme Court of Kansas, 1975.

216 Kan. 486, 532 P.2d 1366.

PRAGER, Justice. ***The sole point raised on this appeal by the plaintiff, Gary D. Borders, is that the trial court committed reversible error in concluding as a matter of law that a landlord of a single-family house is under no obligation or duty to a social guest of his tenant to repair or remedy a known condition whereby water dripped from the roof onto the front steps of a house fronting north, froze and caused the social guest to slip and fall.

Traditionally the law in this country has placed upon the lessee as the person in possession of the land the burden of maintaining the premises in a reasonably safe condition to protect persons who

come upon the land. It is the tenant as possessor who, at least initially, has the burden of maintaining the premises in good repair. [Cc]

The relationship of landlord and tenant is not in itself sufficient to make the landlord liable for the tortious acts of the tenant. [Cc]

When land is leased to a tenant, the law of property regards the lease as equivalent to a sale of the premises for the term. The lessee acquires an estate in the land, and becomes for the time being the owner and occupier, subject to all of the responsibilities of one in possession, both to those who enter onto the land and to those outside of its boundaries. Professor William L. Prosser in his Law of Torts, 4th Ed. § 63, points out that in the absence of agreement to the contrary, the lessor surrenders both possession and control of the land to the lessee, retaining only a reversionary interest; and he has no right even to enter without the permission of the lessee. There is therefore, as a general rule, no liability upon the landlord, either to the tenant or to others entering the land, for defective conditions existing at the time of the lease.

The general rule of non-liability has been modified, however, by a number of exceptions which have been created as a matter of social policy. Modern case law on the subject today usually limits the liability of a landlord for injuries arising from a defective condition existing at the time of the lease to six recognized exceptions. These exceptions are as follows:

1. Undisclosed dangerous conditions known to lessor and unknown to the lessee.

This exception is stated in Restatement (Second) of Torts § 358 as follows:

"§ 358. Undisclosed Dangerous Conditions Known to Lessor

"(1) A lessor of land who conceals or fails to disclose to his lessee any condition, whether natural or artificial, which involves unreasonable risk

568

of physical harm to persons on the land, is subject to liability to the lessee and others upon the land with the consent of the lessee or his sublessee for physical harm caused by the condition after the lessee has taken possession, if

"(a) the lessee does not know or have reason to know of the condition or the risk involved, and

"(b) the lessor knows or has reason to know of the condition, and realizes or should realize the risk involved, and has reason to expect that the lessee will not discover the condition or realize the risk.

"(2) If the lessee [sic] actively conceals the condition, the liability stated Subsection (1) continues until the lessee discovers it and has reasonable opportunity to take effective precautions against it. Otherwise the liability continues only until the vendee has had reasonable opportunity to discover the condition and to take such precautions." ***

It should be pointed out that this exception applies [in Kansas] only to latent conditions and not to conditions which are patent or reasonably discernible to the tenant. [C]

2. Conditions dangerous to persons outside of the premises.

This exception is stated in Restatement (Second) of Torts § 379 as follows:

"§ 379. Dangerous Conditions Existing When Lessor Transfers Possession

"A lessor of land who transfers its possession in a condition which he realizes or should realize will involve unreasonable risk of physical harm to others outside of the land, is subject to the same liability for physical harm subsequently caused to them by the condition as though he had remained in possession."

The theory of liability under such circumstances is that where a nuisance dangerous to persons outside the leased premises (such as the traveling public or persons on adjoining property) exists on the premises at the time of the lease, the lessor should not be permitted to escape liability by leasing the premises to another. ***

3. Premises leased for admission of the public. [§ 359]

The third exception arises where land is leased for a purpose involving the admission of the public. The cases usually agree that in that situation the lessor is under an affirmative duty to exercise reasonable care to inspect and repair the premises before possession is transferred, to prevent any unreasonable risk or harm to the public who may enter. ***

4. Parts of land retained in lessor's control which lessee is entitled to use. [§§ 360, 361]

When different parts of a building, such as an office building or an apartment house, are leased to several tenants, the approaches and common passageways normally do not pass to the tenant, but remain in the possession and control of the landlord. Hence the lessor is under an affirmative obligation to exercise reasonable care to inspect and repair those parts of the premises for the protection of the lessee, members of his family, his employees, invitees, guests, and others on the land in the right of the tenant. ***

5. Where lessor contracts to repair. [§ 357]

At one time the law in most jurisdictions and in Kansas was that if a landlord breached his contract to keep the premises in good repair, the only remedy of the tenant was an action in contract in which damages were limited to the cost of repair or loss of rental value of the property. Neither the tenant nor members of his family nor his guests were permitted to recover for personal injuries suffered as a result of the breach of the agreement. [C] In most jurisdictions this rule has been modified and a cause of action given in tort to the injured person to enable him recovery for his personal injuries. ***

In Steele v. Latimer, 214 Kan. 329, 521 P.2d 304, we held that the provisions of a municipal housing code prescribing minimum housing standards are deemed by implication to become a part of a lease of urban residential property, giving rise to an implied warranty on the part of the lessor that the premises are habitable and safe for human occupancy in compliance with the pertinent code provisions and will remain so for the duration of the tenancy. Such an implied warranty creates a contractual obligation on the lessor to repair the premises

to keep them in compliance with the municipal housing standards as set forth in a municipal housing code.

6. Negligence by lessor in making repairs. [§ 362]

When the lessor does in fact attempt to make repairs, whether he is bound by a covenant to do so or not, and fails to exercise reasonable care, he is held liable for injuries to the tenant or others on the premises in his right, if the tenant neither knows nor should know that the repairs have been negligently made. ***[The court found the first five exceptions not applicable in this case.]

[Exception six] comes into play only when the lessee lacks knowledge that the purported repairs have not been made or have been negligently made. Here it is undisputed that the tenant had full knowledge of the icy condition on the steps created by the absence of guttering. It seems to us that the landlord could reasonably assume that the tenant would inform his guest about the icy condition on the front steps. We have concluded that the factual circumstances do not establish liability on the landlord on the basis of negligent repairs made by him.

In his brief counsel for the plaintiff vigorously argues that the law should be changed to make the landlord liable for injuries resulting from

570

a defective condition on the leased premises where the landlord has knowledge of that condition. He has not cited any authority in support of his position, nor does he state with particularity how the existing law pertaining to a landlord's liability should be modified. We

do not believe that the facts and circumstances of this case justify a departure from the established rules of law discussed above.

The judgment of the district court is affirmed.

NOTES AND QUESTIONS

1. Courts universally agree that the lessor must disclose all known concealed dangerous conditions existing at the time of the transfer of possession. The liability extends not only to the tenant, and the members of his family, but to his employees, his social guests and others on the premises in his right, and to a subtenant to whom he leases the premises. Most courts find it sufficient that the lessor has information that would lead a reasonable person to conclude that the danger may exist, and that if he does he must disclose such information to the tenant. See Cesar v. Karutz, 60 N.Y. 229, 19 Am.Rep. 164 (1875) ("reasonable notice"); Cutter v. Hamlen, 147 Mass. 471, 18 N.E. 397 (1888) ("should have known"); Rhoades v. Seidel, 139 Mich. 608, 102 N.W. 1025 (1905) (same).

2. Until about 1965, courts held that when a landlord's covenant or contract to repair is broken, the only remedy is a contract action for the breach. However, the modern majority approach derives a lessor's liability from failure to perform a contract to repair when on notice of the need for repair or where lessor undertakes repairs voluntarily. Lessors are thus liable for resulting injuries to the tenant, the members of his family and their guests. The Restatement (First) of Torts, § 357 (1934), adopted this position and that has been continued in the Restatement (Second) of Torts (1965) and Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 53 (2012).

Pagelsdorf v. Safeco Ins. Co. of America

Supreme Court of Wisconsin, 1979.

91 Wis.2d 734, 284 N.W.2d 55.

CALLOW, Justice. We dispose of this appeal by addressing the single issue of the scope of a landlord's duty toward his tenant's invitee who is injured as a result of defective premises. Abrogating the landlord's general cloak of immunity at common law, we hold that a landlord must exercise ordinary care toward his tenant and others on the premises with permission.

The defendant Richard J. Mahnke owned a two-story, two-family duplex. There were four balcony porches: one in front and one in back of each flat. Mahnke rented the upper unit to John and Mary Katherine Blattner. ***

571

[Plaintiff Pagelsdorf was assisting Mrs. Blattner move some furniture. He leaned against the railing for the second-floor front balcony, and it collapsed with him. The railing had a dryrot condition and should have been replaced. The trial court put the case to the jury in terms of plaintiff's being a licensee of Mahnke, the landlord, and the jury found by special verdict that he had no knowledge of the defective condition of the railing. Judgment was entered on the verdict, dismissing the complaint.]

The question on which the appeal turns is whether the trial court erred in failing to instruct the jury that Mahnke owed Pagelsdorf a

duty to exercise ordinary care in maintaining the premises.

Prior to December 10, 1975, the duty of an occupier of land toward visitors on the premises was determined in Wisconsin law on a sliding scale according to the status of the visitor. ***In Antoniewicz v. Reszcynski, 70 Wis.2d 836, 854-55, 236 N.W.2d 1, 10 (1975), we abolished, prospectively, the distinction between the different duties owed by an occupier to licensees and to invitees. ***

The classification of visitors identified the degree of duty of the possessor or occupier of the premises. [C] When the property is leased, the duty of the landlord was controlled by a different rule: That, with certain exceptions, a landlord is not liable for injuries to his tenants and their visitors resulting from defects in the premises. [C] The general rule of nonliability was based on the concept of a lease as a conveyance of property and the consequent transfer of possession and control of the premises to the tenant. [Cc]

There are exceptions to this general rule of nonliability. ***The rule of nonliability persists despite a decided trend away from application of the general rule and toward expansion of its exceptions. [Cc]

None of the exceptions to the general rule are applicable to the facts of this case. ***

Therefore, if we were to follow the traditional rule, Pagelsdorf was not entitled to an instruction that Mahnke owed him a duty of ordinary care. We believe, however, that the better public policy lies in the abandonment of the general rule of nonliability and the adoption of a rule that a landlord is under a duty to exercise ordinary care in the maintenance of the premises.

Such a rule was adopted by the New Hampshire court in Sargent v. Ross, 113 N.H. 388, 308 A.2d 528 (1973). The plaintiffs four-year-old child fell to her death from an outdoor stairway of a residential building owned by the defendant. In a wrongful death action against the landlord, the plaintiff claimed the stairs were too steep and the railing inadequate. The jury awarded the plaintiff damages, and the landlord appealed from a judgment entered on the verdict. After eliminating the established exceptions to the rule of nonliability, the court concluded that the rule had nothing to recommend itself in a contemporary, urban society and

572

ought to be abandoned. Instead, general principles of negligence should apply. The court stated that the " 'quasi-sovereignty of the landowner'" had its genesis in "agrarian England of the dark ages." [C] Whatever justification the rule might once have had, there no longer seemed to be any reason to except landlords from a general duty of exercising ordinary care to prevent foreseeable harm. The court reasoned that the modern trend away from special immunities in tort law and the recognition of an implied warranty of habitability in an apartment lease transaction argued in favor of abolishing the common law rule of nonliability. Accordingly, a landlord's conduct should be appraised according to negligence principles. Questions of control, hidden defects, and common use would be relevant only as bearing on the general determination of negligence, including foreseeability and unreasonableness of the risk of harm.

In Antoniewicz, [c] we cited Sargent as one of many cases whose reasoning supported the abolition of the common law distinctions

between licensees and invitees. The policies supporting our decision to abandon these distinctions concerning a land occupier's duty toward his visitors compel us, in the instant case, to abrogate the landlord's general cloak of immunity toward his tenants and their visitors. Having recognized that modern social conditions no longer support special exceptions for land occupiers, it is but a short step to hold that there is no remaining basis for a general rule of nonliability for landlords. Arguably, the landlord's relinquishment of possession, and consequently control of the premises, removes this case from the sweep of the policies embodied in Antoniewicz. We are not so persuaded. One of the basic principles of our tort law is that one is liable for injuries resulting from conduct foreseeably creating an unreasonable risk to others. [C] Public policy limitations on the application of this principle are shrinking. [Cc]

The modern-day apartment lease is regarded as a contract, not a conveyance. Pines v. Perssion, 14 Wis.2d 590, 111 N.W.2d 409 (1961). In Pines we determined that modern social conditions called for judicial recognition of a warranty of habitability implied in an apartment lease. ***

It would be anomalous indeed to require a landlord to keep his premises in good repair as an implied condition of the lease, yet immunize him from liability for injuries resulting from his failure to do so. We conclude that there is no remaining justification for the landlord's general cloak of common law immunity and hereby abolish the general common law principle of nonliability of landlords toward persons injured as a result of their defective premises. ***

At trial plaintiffs' counsel requested the jury be instructed that Mahnke owed Pagelsdorf, as his invitee, a duty of ordinary care. Pagelsdorf's proposed special verdict inquired whether Mahnke was "negligent in failing to keep the guardrail in question in a reasonably good state of repair." Thus Pagelsdorf preserved the assigned error for appeal.

573

We simply reach the result he seeks by a different means. [C] ***

Generally, a decision overruling or repudiating other cases is given retrospective operation. [C] The rule of landlords' nonliability was riddled with many exceptions; thus reliance on the rule could not have been great. [C] We find no reason to depart from the general rule of retrospective operation of the mandate herein.

In conclusion, a landlord owes his tenant or anyone on the premises with the tenant's consent a duty to exercise ordinary care. If a person lawfully on the premises is injured as a result of the landlord's negligence in maintaining the premises, he is entitled to recover from the landlord under general negligence principles. Issues of notice of the defect, its obviousness, control of the premises, and so forth are all relevant only insofar as they bear on the ultimate question: Did the landlord exercise ordinary care in the maintenance of the premises under all the circumstances?

Judgment reversed and cause remanded for proceedings consistent with this opinion.

NOTES AND QUESTIONS

1. The "implied warranty of habitability" creates a duty on the part of the lessor to deliver the premises in a habitable condition. As seen in the principal case, it has been utilized by a number of courts in recent years to hold lessors legally accountable. See Knight v. Hallsthammer, 29 Cal.3d 46, 623 P.2d 268, 171 Cal.Rptr. 707 (1981); Lemle v. Breeden, 51 Haw. 426, 462 P.2d 470 (1969); Marini v. Ireland, 56 N.J. 130, 265 A.2d 526 (1970). These decisions did not abolish the general limitation on a landlord's duty in tort, but rather provided tenants only with a defense to an eviction action or a right to withhold rent until repairs were made.

Efforts by lessors to immunize themselves against liability through exculpatory clauses in leases have been held to be void as against public policy, at least insofar as they seek to immunize lessors against damages cause by negligence in maintaining common areas. Cappaert v. Junker, 413 So.2d 378 (Miss 1982).

2. What damages should be available to lessees for lessor's negligence? In Simon v. Solomon, 385 Mass. 91, 431 N.E.2d 556 (1982), the court upheld damages to the tenant for emotional distress caused by the landlord's substandard maintenance of her apartment, after evidence showed that water and sewage from an adjoining area flooded her basement apartment approximately 30 times. In a similar vein, see 49 Prospect Street Tenants Ass'n v. Sheva Gardens, 227 N.J.Super. 449, 547 A.2d 1134 (App.Div. 1988), affirming jury award for emotional distress where the landlord of rent controlled premises failed to maintain utility services, rid the building of vermin, repair broken windows and evict squatters. Do you see an appropriate role for tort law in these circumstances?

3. In Becker v. IRM Corp., 38 Cal.3d 454, 213 Cal.Rptr. 213, 698 P.2d 116 (1985), the California Supreme Court imposed strict liability on landlords for injuries caused by latent structural defects in the premises. The decision attracted a fire-storm of criticism and was repudiated in Peterson v. Superior Court of Riverside County, 10 Cal.4th 1185, 43 Cal.Rptr.2d 836, 899 P.2d 905 (1995) (holding that a tenant could not reasonably expect a landlord to have eliminated defects of which the landlord was unaware and which would have not been disclosed by a reasonable inspection).

Kline v. 1500 Massachusetts Ave. Apartment Corp.

United States Court of Appeals, District of Columbia Circuit, 1970.

141 U.S.App.D.C. 370, 439 F.2d 477.

[Plaintiff Sarah B. Kline, a lessee of defendant, sustained serious injuries when she was criminally assaulted and robbed at approximately 10:15 P.M. while she was in the common hallway of a large (585-unit) combination office-apartment building. Although a doorman had been employed in the past, the entrances to the building were left unguarded at the time plaintiff was assaulted. This procedure was followed in spite of the fact that defendant lessor had notice of an increasing number of assaults, larcenies and robberies being perpetrated against the tenants in and from the common hallways of the building.]

WILKEY, Circuit Judge. The appellee apartment corporation states that there is "only one issue presented for review ***whether a duty

should be placed on a landlord to take steps to protect tenants from foreseeable criminal acts committed by third parties". The District Court as a matter of law held that there is no such duty. We find that there is, and that in the circumstances here the applicable standard of care was breached. We therefore reverse and remand to the District Court for the determination of damages for the appellant. ***

In this jurisdiction, certain duties have been assigned to the landlord because of his control of common hallways, lobbies, stairwells, etc., used by all tenants in multiple dwelling units. ***

While [prior cases have] dealt with a physical defect in the building leading to plaintiffs injury, the rationale as applied to predictable criminal acts by third parties is the same. The duty is the landlord's because by his control of the areas of common use and common danger he is the only party who has the power to make the necessary repairs or to provide the necessary protection.

As a general rule, a private person does not have a duty to protect another from a criminal attack by a third person. We recognize that this rule has sometimes in the past been applied in landlord-tenant law, even by this court. Among the reasons for the application of this rule to landlords are: judicial reluctance to tamper with the traditional common law concept of the landlord-tenant relationship; the notion that the act of a third person in committing an intentional tort or crime is a superseding

575

cause of the harm to another resulting therefrom; the oftentimes difficult problem of determining foreseeability of criminal acts; the vagueness of the standard which the landlord must meet; the

economic consequences of the imposition of the duty; and conflict with the public policy allocating the duty of protecting citizens from criminal acts to the government rather than the private sector.

But the rationale of this very broad general rule falters when it is applied to the conditions of modern day urban apartment living, particularly in the circumstances of this case. The rationale of the general rule exonerating a third party from any duty to protect another from a criminal attack has no applicability to the landlord-tenant relationship in multiple dwelling houses. The landlord is no insurer of his tenants' safety, but he certainly is no bystander. And where, as here, the landlord has notice of repeated criminal assaults and robberies, has notice that these crimes occurred in the portion of the premises exclusively within his control, has every reason to expect like crimes to happen again, and has the exclusive power to take preventive action, it does not seem unfair to place upon the landlord a duty to take those steps which are within his power to minimize the predictable risk to his tenants. ***

[I]nnkeepers have been held liable for assaults which have been committed upon their guests by third parties, if they have breached a duty which is imposed by reason of the innkeeper-guest relationship. By this duty, the innkeeper is generally bound to exercise reasonable care to protect the guest from abuse or molestation from third parties, be they innkeeper's employees, fellow guests, or intruders, if the attack could, or in the exercise of reasonable care, should have been anticipated.

Liability in the innkeeper-guest relationship is based as a matter of law either upon the innkeeper's supervision, care, or control of the

premises, or by reason of a contract which some courts have implied from the entrustment by the guest of his personal comfort and safety to the innkeeper. In the latter analysis, the contract is held to give the guest the right to expect a standard of treatment at the hands of the innkeeper which includes an obligation on the part of the latter to exercise reasonable care in protecting the guest.

Other relationships in which similar duties have been imposed include landowner-invitee, businessman-patron, employer-employee, school district-pupil, hospital-patient, and carrier-passenger. In all, the theory of liability is essentially the same: that since the ability of one of the parties to provide for his own protection has been limited in some way by his submission to the control of the other, a duty should be imposed upon the one possessing control (and thus the power to act) to take reasonable precautions to protect the other one from assaults by third parties which, at least, could reasonably have been anticipated. ***

As between tenant and landlord, the landlord is the only one in the position to take the necessary acts of protection required. He is not an

insurer, but he is obligated to minimize the risk to his tenants. Not only as between landlord and tenant is the landlord best equipped to guard against the predictable risk of intruders, but even as between landlord and the police power of government, the landlord is in the best position to take the necessary protective measures. ***

We ***hold in this case that the applicable standard of care in providing protection for the tenant is that standard which this landlord

himself was employing in October 1959 when the appellant became a resident on the premises at 1500 Massachusetts Avenue. ***[W]e hold that the same relative degree of security should have been maintained. ***

Having said this, it would be well to state what is not said by this decision. We do not hold that the landlord is by any means an insurer of the safety of his tenants. His duty is to take those measures of protection which are within his power and capacity to take, and which can reasonably be expected to mitigate the risk of intruders assaulting and robbing tenants. The landlord is not expected to provide protection commonly owed by a municipal police department; but as illustrated in this case, he is obligated to protect those parts of his premises which are not usually subject to periodic patrol and inspection by the municipal police. We do not say that every multiple unit apartment house in the District of Columbia should have those same measures of protection which 1500 Massachusetts Avenue enjoyed in 1959, nor do we say that 1500 Massachusetts Avenue should have precisely those same measures in effect at the present time. Alternative and more up-to-date methods may be equally or even more effective. ***

The landlord is entirely justified in passing on the cost of increased protective measures to his tenants, but the rationale of compelling the landlord to do it in the first place is that he is the only one who is in a position to take the necessary protective measures for overall protection of the premises, which he owns in whole and rents in part to individual tenants.

Reversed and remanded to the District Court for the determination of damages.

[MacKinnon, J., dissented.]

NOTES AND QUESTIONS

1. How important is the fact that the assault occurred in a common passageway? Suppose the attacker had waited outside Mrs. Kline's apartment, forced his way in and attacked her in the living room. Liability? Cf. Wassell v. Adams, 865 F.2d 849 (7th Cir.1989) (applying Illinois law) (plaintiff assaulted when she opened her motel door late at night). How does Kline differ from those holding a landlord liable when a tenant trips on a defective condition in a common hallway?

577

2. Prior to the 1970s, courts found no duty in the instant case. See Goldberg v. Housing Auth. of Newark, 38 N.J. 578, 186 A.2d 291 (1962); Bass v. New York, 38 A.D.2d 407, 330 N.Y.S.2d 569 (1972), aff'd, 32 N.Y.2d 894, 300 N.E.2d 154, 346 N.Y.S.2d 814 (1973) (municipally-owned dwelling treated as privately owned); Daniels v. Shell Oil Co., 485 S.W.2d 948 (Tex.Civ.App. 1972). Some courts adhere to the no duty rule, unless the landlord actively "assumes a duty": Feld v. Merriam, 506 Pa. 383, 485 A.2d 742 (1984). The main arguments against imposing that duty are stated in the principal case.

Also, it is said that a tenant makes a choice as to where to live and in effect "assumes the risk" of injury from criminal elements in a low security building. What about the contention that the Kline decision

places the costs of crime on those who can least afford it--the rent-paying tenants? Who is in the better position to take measures against these criminal activities? Even though the victim's conduct may not immunize the landlord from liability, defenses and apportionment of blame to her, under principles of contribution between tortfeasors, may shift to her, prime responsibility and the burden of the loss. See Ellen M. Bublick, Citizen No-Duty Rules: Rape Victims and Comparative Fault, 99 Colum. L. Rev. 1413 (1999) for an effective critique of rules that allow this result.

3. Under some caselaw, landlords are liable to tenants or their employees or agents for attacks upon them by third persons when the attacks were foreseeable and reasonable steps to increase security would have prevented attacks on tenants and employees. See Graham v. M & J Corp., 424 A.2d 103 (D.C.App. 1980); Holley v. Mt. Zion Terrace Apts., 382 So.2d 98 (Fla.App.1980); Jardel Co. v. Hughes, 523 A.2d 518 (Del.1987); and Lay v. Dworman, 732 P.2d 455 (Oki. 1986). A few courts have extended the warranty of habitability to include security. See Trentacost v. Brussel, 82 N.J. 214, 412 A.2d 436 (1980); Secretary of HUD v. Layfield, 88 Cal.App.3d Supp. 28, 152 Cal.Rptr. 342 (1978); Brownstein v. Edison, 103 Misc.2d 316, 425 N.Y.S.2d 773 (1980).

4. Courts struggle to determine whether third-party criminal acts were sufficiently foreseeable to impose liability. Some courts have focused exclusively on previous similar incidents, see, e.g., Madden v. C & K Barbecue Carryout, Inc., 758 S.W.2d 59 (Mo. 1988). Other courts have looked to the "totality of the circumstances" to determine foreseeability, see Isaacs v. Huntington Memorial Hospital, 38 Cal.3d 112, 695 P.2d 653, 211 Cal.Rptr. 356 (1985) (evidence of similar

incidents in establishing foreseeability relevant but not essential); Seibert v. Vic Regnier Builders, 253 Kan. 540, 856 P.2d 1332 (1993) (same). In the wake of decisions such as the principal case and Isaacs, District of Columbia and California courts have limited the potential for liability by requiring a "heightened showing of foreseeability" in cases involving third-party criminal acts. See Potts v. District of Columbia, 697 A.2d 1249 (D.C. 1997); Wiener v. Southcoast Childcare Centers, Inc., 32 Cal.4th 1138, 12 Cal.Rptr.3d 615, 88 P.3d 517 (2004).

Judge Posner had harsh words for the "heightened foreseeability" approach adopted by District of Columbia and California courts: "These cases... invoke the rather old-fashioned formula that a criminal act, being

578

deliberate, is an 'intervening' or 'supervening' cause that severs the 'causal chain' that would otherwise connect the negligence of the party who failed to prevent the criminal act to the injury to the victim. This is legal mumbo- jumbo. The practical question (and law should try to be practical) is whether the defendant knows or should know that the risk is great enough, in relation to the cost of averting it, to warrant the defendant's incurring the cost." Shadday v. Omni Hotels Mgmt. Corp., 477 F.3d 511 (7th Cir. 2007) (applying Indiana law). Should courts require a heightened showing of foreseeability to recover for injuries resulting from third party criminal acts? Should this requirement be imposed on hotel guests to the same degree that it is imposed on tenants who live in the area? Is there any basis for a principled distinction between these two types of plaintiffs?

5. Defining the extent of a landlord's duty to protect tenants is problematic. In Sherman v. Concourse Realty Corp., 47 A.D.2d 134, 365 N.Y.S.2d 239 (1975), the landlord of a 200-tenant multiple dwelling removed a lock cylinder from the building's security buzzer system which had been installed as a condition for a rent increase. Plaintiff-tenant was assaulted by an intruder. See also Tan v. Arnel Management Co., 170 Cal.App.4th 1087, 88 Cal.Rptr.3d 754 (2009), where a carjacker shot the plaintiff in an ungated common area in his apartment complex. The court found a duty to protect the plaintiff from the third party criminal act because the landlord failed to implement security measures that were neither "socially [nor] financially onerous." It took a sliding scale approach: "The higher [the] burden to be imposed on the landowner, the higher the degree of foreseeability is required." Id. at 1095.

6. Should the liability imposed on landlords be extended to condominium boards and their members? See Frances T. v. Village Green Owners Ass'n, 42 Cal.3d 490, 723 P.2d 573, 229 Cal.Rptr. 456 (1986) and Martinez v. Woodmar IV Condos. Homeowners Ass'n, 189 Ariz. 206, 941 P.2d 218 (1997).

CHAPTER 10 DAMAGES

Many law students take a separate course in Remedies that will cover the issues in this chapter in more detail and also will cover other damages issues not relevant to tort law. Because the valuation of the plaintiff's injuries is integral to the operation of the tort system, it is important to at least get an overview of some of the specific damages issues in tort litigation.

Proof of damages is an essential part of plaintiff's causes of action in negligence and strict liability, stemming historically from the actions on the case. In these actions, damage is the gist of the action. Recall that elsewhere, in actions based on trespass--most of the intentional torts--the cause of action is complete upon showing an invasion of the protected interest. Whether the plaintiff's skull was fractured by a deliberate blow, an act of negligence, or a product that was defectively designed, the amount of damages the defendant will have to pay to compensate the plaintiff for the skull fracture is the same.

The question of how much damage plaintiff suffered is often at the heart of the dispute between plaintiff and defendant. In the course of settlement negotiations, defendant may be willing to concede the issue of liability, but vigorously dispute the amount plaintiff is claiming for damages. Also, a good deal of trial time and effort is devoted to the topic of how much plaintiff should recover.

Some matters already considered in the chapter on duty (such as the question whether plaintiff can recover for negligent infliction of emotional harm where there has been no physical damage) and the

chapters on causation (whether the injury for which plaintiff seeks compensation was caused by the defendant) also can be viewed as damages questions. In this chapter, it is assumed that plaintiff has been injured, that defendant is liable for plaintiff's injury, and that the law would allow some monetary recovery. The question here is deceptively simple: how much?

As part of the "tort reform" movement during the last three decades, over half the states passed legislation affecting the common law of damages in some way. In order to understand and appreciate the effect of this legislation, you must first consider the traditional scheme of tort damages. Let us begin with some basic vocabulary and some underlying themes.

580

NOTES AND QUESTIONS

Although injunctive relief is sometimes available as a remedy through tort lawsuits, money damages are the most commonly sought form of relief. There are three basic kinds of money damages in tort law:

1. Nominal Damages. These consist of a small sum of money (usually six cents or a dollar) awarded to the plaintiff in order to vindicate rights, make the judgment available as a matter of record in order to prevent the defendant from acquiring prescriptive rights, and carry a part of the costs of the action. The amount of the award, so long as it is trivial, is unimportant.

2. Compensatory Damages. These are intended to represent the closest possible financial equivalent of the loss or harm suffered by

the plaintiff, to make the plaintiff whole again, to restore the plaintiff to the position the plaintiff was in before the tort occurred. Most of this chapter is concerned with these damages.

3. Punitive Damages. These are an additional sum, over and above the compensation of the plaintiff, awarded in order to punish the defendant, to make an example of defendant, and to deter defendant and others from engaging in similar tortious conduct.

4. Equitable Relief. Although much less common than money damages, equitable relief also may be available in a tort action. For example, see Banville v. Brennan, 84 A.3d 424 (R.I. 2014) (in trespass action, court ordered money damages to compensate for damage to property and ordered that defendant move the building that encroached on plaintiff's property). If a tort bestows an unjust enrichment on the perpetrator at the expense of the person wronged, that person may claim a disgorgement of the enrichment. Farnsworth, Restitution: Civil Liability for Unjust Enrichment pages 61-74 (2014).

5. Some Underlying Themes. First, the purpose of compensatory damages is to restore the plaintiff to pre-injury status as far as possible. Second, the only tool at the jury's disposal for "making the plaintiff whole again" is money. All losses, even non-economic ones, must somehow be translated into money damages. Third, all damages, whether past, present, or future, must be included in one lump sum award, on the particular day the verdict is returned, in that single lawsuit that the plaintiff is permitted to bring. Fourth, judicial review of jury verdict amounts is relatively limited. Most jurisdictions allow new trials only if the damages award is so high or low that it

"shocks the conscience." Finally, because the purpose of punitive damages is to punish and deter, they are based on behavior and characteristics of the defendant rather than the plaintiff.

6. As you read the next two principal cases, think about how the lawyers used the discovery process to develop the information on damages and how it was presented, through the testimony of lay and expert witnesses.

581

1. Personal Injuries

Anderson v. Sears, Roebuck & Co.

United States District Court, Eastern District of Louisiana, 1974.

377 F.Supp. 136.

CASSIBRY, District Judge. On April 23, 1970 the Britains' home was completely consumed by a fire which was ignited by a defective Sears' heater. Both Mildred [Anderson] Britain and her infant daughter, Helen Britain, were severely burned and Helen Britain suffered multiple permanent injuries. ***[The jury awarded $2,000,000 in compensatory damages for Helen's injuries and the defendants moved for a new trial or, in the alternative, remittitur.]

The legal standard on which to gauge a jury verdict for remittitur purposes is the "maximum recovery rule". [Cc] This rule directs the trial judge to determine whether the verdict of the jury exceeds the maximum amount which the jury could reasonably find and if it does, the trial judge may then reduce the verdict to the highest amount that the jury could properly have awarded. Functionally, the maximum

recovery rule both preserves the constitutionally protected role of the jury as finder of facts and prevents the predilections of the judge from infecting the jury's determination. Thus, the court's task is to ascertain, by scrutinizing all of the evidence as to each element of damages, what amount would be the maximum the jury could have reasonably awarded. In this case there are five cardinal elements of damages; past physical and mental pain; future physical and mental pain; future medical expenses; loss of earning capacity and permanent disability and disfigurement.

Past Physical and Mental Pain. The infant child Helen Britain, was almost burned to death in the tragic fire that swept her home. She was burned over forty per cent of her entire body; third degree burns cover eighty per cent of her scalp and second and third degree burns of the trunk and of her extremities account for the remainder. Helen Britain's immediate post-trauma treatment required hospitalization for twenty-eight days, during which time the child developed pneumonia, required numerous transfusions, suffered fever, vomiting, diarrhea, and infection, and underwent skin graft surgery, under general anesthesia, to her scalp, which was only partially successful. Keloid scarring caused webbing and ankylosis of the child's extremities and severely limited their motion. The child's fingers became adhered together; scarring bent the arm at the elbow in a burdensome, fixed position; and thick scarring on the thighs and on the side of and behind the knees impaired walking.

This child had to undergo subsequent hospitalizations for further major operations and treatment. The second major operation under general anesthesia was undertaken to graft new skin from the back and stomach to the remaining bare areas of the scalp. The third

operation under general anesthesia was an attempt to relieve the deformity of her

582

left hand caused by the webbing scars which bound down the fingers of that hand. A fourth operation under general anesthesia was performed to reduce scars which had grown back on the left hand again webbing the fingers. I cannot envisage the breadth and intensity of the pain experienced by Helen Britain throughout this ordeal.

The undisputed testimony reveals that one of the most tragic aspects of this case is that the horrible mental and emotional trauma caused to this child occurred at an age which medical experts maintain is crucial to a child's entire psyche and personality formation. Helen Britain's persistent emotional and mental disturbance is evidenced by bed wetting, nightmares, refusing to sleep alone, withdrawal, and speech impediments. Dr. Cyril Phillips, a psychiatrist, and Dr. Diamond both indicated that the child manifested to them, even at this early age, emotional illness and retarded mental growth.

The evidence reflects that an award of six hundred thousand dollars for this element of damages alone would not be unreasonable.

Future Physical and Mental Pain. There is clear evidence that the stretching, pulling, and breaking down of scars inherent in growth will continue to cause severe pain and a crippling limitation of motion in varying degrees to all of Helen Britain's upper and lower extremities. Very little can be done to improve the condition of the scalp which will never be able to breathe, sweat or grow hair. There will be risks, trauma and pain, both physical and mental, with each of the

recommended twenty-seven future operations which will extend over most of the child's adult life, if she is in fact fortunate enough to be able to risk undergoing these recommended surgeries. Furthermore, Helen Britain must vigilantly guard against irritation, infection and further injury to the damaged and abnormal skin, scars and grafts because any injury, however slight, can generate cancer in these adynamic areas.

The inherent stresses and tensions of each new phase of life will severely tax this little girl's debilitated and delicate mental and emotional capacity. Throughout her future life expectancy of seventy-five years, it is reasonable to expect, that she will be deprived of a normal social life and that she will never find a husband and raise a family. On top of this, Helen Britain will always be subjected to rejection, stares and tactless inquiries from children and adults.

The court concludes that an award of seven hundred fifty thousand dollars for this element of damages alone would not be excessive.

Future Medical Expenses. A large award for future medical expenses is justified. The uncontradicted testimony was that Helen Britain would need the guidance, treatment and counseling of a team of doctors, including plastic surgeons, psychiatrists and sociologists, throughout her lifetime. Add to this the cost of the twenty-seven recommended operations and the cost of private tutoring necessitated by the child's

583

mental and emotional needs and the jury could justifiably award a figure of two hundred and fifty thousand dollars to cover these future expenses.

Loss of Earning Capacity. The evidence of Helen Britain's disabilities both physical, mental and emotional was such that this court holds that the jury could properly find that these disabilities would prevent her from earning a living for the rest of her life. Not only do the physical impairments to her extremities disable her but her emotional limitations require avoiding stress and the combined effect is the permanent incapacity to maintain serious employment.

The jury was provided with actuarial figures which accurately calculated both the deduction of interest to be earned and the addition of an inflationary buffer, on any award made for future loss of earning capacity. In view of these incontrovertible projections at trial, it was within the province of the jury to award as much as $330,000.00 for the loss of earning capacity.

Permanent Disability and Disfigurement. The award for this element of damage must evaluate in monetary terms the compensation due this plaintiff for the permanent physical, mental and emotional disabilities and disfigurements proved by the evidence adduced at trial. A narration treating Miss Britain's permanent disabilities and disfigurements would be lengthy and redundant; therefore, I resort to listing.

1. The complete permanent loss of 80% of the scalp caused by the destruction of sweat glands, hair follicles and tissue--all of which effects a grotesque disfigurement and freakish appearance.

2. The permanent loss of the normal use of the legs.

3. The permanent impairment of the left fingers and hand caused by recurring webbing and resulting in limited motion.

4. The permanent impairment of the right hand caused by scars and webbing of the fingers.

5. The permanent injury to the left elbow and left arm with ankylosis and resulting in a crippling deformity.

6. The permanent destruction of 40% of the normal skin. As a result of this a large portion of the body is covered by "pigskin." Pigskin resembles the dry, cracked skin of an aged person and is highly susceptible to irritation from such ordinary things as temperature changes and washing.

7. Permanent scars over the majority of the body where skin donor sites were removed.

8. The permanent impairment of speech.

9. The loss of three years of formative and impressionable childhood.

10. Permanently reduced and impaired emotional capacity.

584

11. The permanent impairment of normal social, recreational and educational life.

12. The permanent imprint of her mother's hand on her stomach.

Considering each of the foregoing items, the court concludes that the jury had the prerogative of awarding up to $1,100,000 for this element of damages.

By totaling the estimated maximum recovery for each element of damages, the jury's actual award is placed in proper perspective. According to my calculations the maximum jury award supported by

the evidence in this case could have been $2,980,000. Obviously, the jury's $2,000,000 verdict is well within the periphery established by the maximum award test.

The defendants assert three other grounds for a remittitur. They contend that there was error in the verdict since the verdict exceeded the amount prayed for in the plaintiffs pleadings. This contention fails because the plaintiffs' pleadings were amended subsequent to the jury verdict to conform to the evidence and the verdict of the jury. This amendment was permitted by the court in accordance with law. [Cc]

[Defendants] argue that the introduction of photographs of the plaintiff was inflammatory. Since a part of plaintiff's claim for damages is for disfigurement and the humiliation and embarrassment resulting therefrom, I hold that these photographs were properly admitted to show the condition of the plaintiff as she appeared to others, at the time they were taken. [Cc]

The defendants suggest that the presence of the child in the courtroom and in the corridors of the courthouse in some way inflamed or prejudiced the jury. This allegation is unfounded; the defendants have not pointed out any wrongful conduct on the part of Helen Britain, her parents, or counsel for plaintiffs. Helen Britain was well behaved and quiet the entire time she was in the courtroom.

Accordingly I hold that there was not any bias, prejudice, or any other improper influence which motivated the jury in making its award.

The defendants' motions for a remittitur are denied.

Richardson v. Chapman

Supreme Court of Illinois, 1997.

175 Ill.2d 98, 221 Ill.Dec. 818, 676 N.E.2d 621.

MILLER, J. ***[Plaintiff Keva Richardson was the driver of a car with plaintiff Ann McGregor as a passenger. While they were stopped at a traffic light, their car was struck from behind by a semi-trailer driven by defendant Chapman who was employed by defendant Tandem/Carrier. At the trial, the judge directed a verdict in favor of the plaintiffs on the question of liability. Determining only the plaintiffs' damages, the jury returned verdicts in favor of Richardson and McGregor in the amounts of

585

$22,358,814 and $102,215, respectively. The intermediate appellate court rejected the defendants' challenges to the amounts of damages awarded by the jury and defendants appealed.]

In their initial challenge to the damages verdicts, the defendants complain of certain testimony introduced by plaintiff Richardson concerning the calculation of the present value of her future economic losses. The defendants maintain that Professor Charles Linke, who testified as Richardson's economist, improperly used non-neutral, actual figures in describing to the jury the calculation of present cash value. Richardson's life expectancy at the time of trial, in May 1990, was 54.5 years. Relying on information and figures supplied by Richardson's primary physician, Professor Linke testified that the present cash value of her future medical expenses had a lower bound of $7,371,914 and an upper bound of $9,570,034. The

lower bound figure assumed a discount rate one percentage point higher than the growth rate; the upper bound figure assumed that the two rates would be equal. The difference between the two numbers was based on different assumptions concerning future growth rates and interest rates. Professor Linke also provided testimony regarding the present cash value of Richardson's lost future earnings. Assuming a work history of 27.5 years, Professor Linke found that the present cash value of Richardson's lost income was between $854,107 and $971,944; using a longer work history of 35.8 years, Professor Linke arrived at a range of $1,068,343 to $1,265,363. Again, the differences between the two ranges were based on the witness' different assumptions regarding future growth and interest rates. ***

We conclude that Professor Linke's approach was a reasonable one; by using a differential between the two rates, he did not have to make a prediction of future growth and inflation rates. Professor Linke was consistent in his treatment of inflation, and he did not adopt a method that would undercompensate or overcompensate the plaintiff. [Cc]

The defendants next contend that the damages awarded to the plaintiffs are excessive. Before resolving this question, we will briefly summarize the evidence presented at trial regarding the two women's injuries.

Keva Richardson was 23 years old at the time of the accident. She grew up in Pampa, Texas, and received a bachelor's degree in elementary education in May 1987 from Texas Tech University. While in college, she participated in a number of athletic activities and was,

by all accounts, a popular, happy person. After graduating from college, Keva obtained a position as a flight attendant with American Airlines. She planned to work in that capacity for several years before returning to school to gain a post-graduate degree in education; her ultimate goal was to teach. Keva met Ann McGregor in the flight attendant training program, and the two decided to room together upon completion of their training. At the conclusion of the program, they were assigned to the Chicago area, and they had moved there just several days before the accident occurred.

586

Following the accident, Keva was initially taken to Highland Park Hospital for treatment. Because of the seriousness of her injuries, however, Keva was transferred that morning to Northwestern Memorial Hospital. Dr. Giri Gereesan, an orthopedic surgeon specializing in spinal surgery, determined that Keva had incurred a fracture of the fifth cervical vertebra, which severely damaged her spinal cord and resulted in incomplete quadriplegia. Dr. Gereesan performed surgery on Keva on December 1, 1987, to stabilize her spine so that she would be able to support her head; the surgery did not repair the damage to her spinal cord, and no treatment exists that could do so.

Keva was transferred to the Rehabilitation Institute of Chicago in December 1987, where she came under the care of Dr. Gary Yarkony. Keva was initially dependent on others in all aspects of her daily life. At the Rehabilitation Institute she learned how to perform a number of basic tasks, such as sitting in a wheelchair, transferring from a bed to a wheelchair, brushing her teeth, washing her face,

and putting on loose - fitting tops. Keva's initial stay at the Rehabilitation Institute lasted until April 1988, when she moved to her parents' home in Texas. Keva returned to the Rehabilitation Institute in 1988 and in 1989 for follow-up visits. Keva also required hospitalization in Texas on three subsequent occasions for treatment of conditions arising from the accident.

Testifying in Keva's behalf at trial, Dr. Gary Yarkony, who had served as her primary physician at the Rehabilitation Institute, described Keva's current condition. He explained that she cannot use her legs and that she has only limited functioning in her arms, with loss of control of her fingers and fine muscles in her hands. She suffers pain in her legs and shoulders. Her chest and abdomen are paralyzed, and she has restrictive pulmonary disease. In addition, she has no control over her bladder or bowel functions and requires assistance in emptying them. As a consequence of her physical condition, she is at risk for bladder infections, pneumonia, and pressure ulcers. Keva also suffered a number of facial injuries in the accident. Some of these scars were later repaired through plastic surgery, but others remain.

At trial, Keva's mother, Dixie Richardson, described her daughter's current activities and the level of care necessary to assist her in her daily routine. Keva requires help in taking a shower and getting dressed. She cannot put on underwear, socks, or pants by herself but is able to put on pullover shirts and sweaters. With assistance, she can brush her teeth, apply makeup, and put in her contact lenses. She is unable to cut food or button a sweater. She can push her wheelchair on a smooth, level surface but otherwise needs assistance. In her own testimony, Keva said that she is self-

conscious about her appearance now and the impression she makes on others. She said that the thing she misses most is just being able to get up in the morning and begin her day; now she requires the assistance of others, throughout the day.

587

The jury awarded Richardson a total of $22,358,814 in damages, divided among the following six elements: $258,814 for past medical care; $11,000,000 for future medical care; $900,000 for past and future lost earnings; $3,500,000 for disability; $2,100,000 for disfigurement; and $4,600,000 for pain and suffering. In challenging Richardson's award of damages, the defendants first argue that the sum of the future medical costs found by the jury--$11,000,000--is not supported by the evidence, for it exceeds even the larger of the two figures supplied by Professor Linke, $9,570,034. The defendants contend that the decision to award Richardson nearly $1.5 million more illustrates the jury's failure to properly determine damages in this case.

In response, Richardson argues that the larger award may simply be attributable to the jury's decision to make an award of expenses that she is likely to incur in the future but that were not specifically included in the calculations performed by Professor Linke. Richardson notes that Dr. Yarkony, in compiling for Linke's use the list of likely future medical costs, did not assign specific values to certain items, such as the expenses of future hospitalizations and the costs of wheelchairs and a specially equipped van. Richardson thus argues that the jury's decision to award an amount for future medical costs greater than Professor Linke's higher estimate might

simply reflect the jury's desire to compensate her for those unspecified but likely expenses. We agree with Richardson that the trier of fact enjoys a certain degree of leeway in awarding compensation for medical costs that, as shown by the evidence, are likely to arise in the future but are not specifically itemized in the testimony. [Cc] In the present case, however, the amount awarded by the jury for future medical costs is nearly $1.5 million more than the higher of the two figures claimed at trial by Richardson. Notably, Professor Linke did not rely on the projections by the General Accounting Office (GAO) of the growth of future medical care costs, mentioned in the partial concurrence. Professor Linke explained that the GAO's study included a large number of technology-based items, while the main expense to be incurred by Richardson will be wages for attendant care. Given the disparity between the trial testimony and the jury's eventual award, we will not attribute the entire difference between those sums simply to miscellaneous costs Richardson is likely to incur in the future. For these reasons, we conclude that it is appropriate, by way of remittitur, to reduce by $1 million the nearly $1.5 million differential between the award for Richardson's future medical expenses and the higher figure presented in the testimony. This adjustment allows Richardson recovery for expected future medical costs for which no specific estimates were introduced, yet is not so large that it represents a departure from the trial testimony.

We do not agree with the defendants, however, that the remainder of the award of damages to Richardson, including the sums for pain and suffering, disability, and disfigurement, is duplicative or excessive or

lacks support in the record. The determination of damages is a question reserved to the trier of fact, and a reviewing court will not lightly substitute its opinion for the judgment rendered in the trial court. [Cc] An award of damages will be deemed excessive if it falls outside the range of fair and reasonable compensation or results from passion or prejudice, or if it is so large that it shocks the judicial conscience. [C] When reviewing an award of compensatory damages for a nonfatal injury, a court may consider, among other things, the permanency of the plaintiff's condition, the possibility of future deterioration, the extent of the plaintiff's medical expenses, and the restrictions imposed on the plaintiff by the injuries. [C]

Here, it was the jury's function to consider the credibility of the witnesses and to determine an appropriate award of damages. We cannot say that the present award to Richardson is the result of passion or prejudice, "shocks the conscience," or lacks support in the evidence. ***

The defendants also contend that the jury's award of damages to Ann McGregor is excessive. McGregor was 22 years old at the time of the accident. She grew up in Houston, Texas, and graduated from Southern Methodist University in May 1987 with a degree in psychology. Like Keva Richardson, McGregor was accepted after graduation for a position as a flight attendant with American Airlines. As mentioned earlier, the two women met while enrolled in the flight attendant training program and were sharing an apartment in the Chicago area at the time of the accident. Following the accident, McGregor was taken to Highland Park Hospital, where she was

treated and released that day; she was then off work for about two weeks. A laceration she suffered on her forehead eventually healed, with only minimal scarring. At trial McGregor testified that she continues to suffer from nightmares about the accident. The jury awarded McGregor a total of $102,215 in damages, divided among the following components: $1,615 for past medical expenses, $600 for lost earnings, and $100,000 for pain and suffering.

***[W]e believe that the award of $100,000 for pain and suffering is, in these circumstances, excessive. McGregor was not seriously injured in the accident, incurring a laceration on her forehead, which left only a slight scar. The jury declined to award McGregor any compensation for disfigurement; rather, the bulk of her recovery consisted of compensation for pain and suffering. We conclude that a more appropriate figure for pain and suffering would be $50,000, which would reduce her total damages to $52,215. By way of remittitur, we accordingly reduce the judgment entered in favor of McGregor and against Tandem/Carrier and Chapman to that amount.

[The court then ruled on various matters relating to contribution and indemnity issues among the defendants.]

For the reasons stated, the judgment of the appellate court is affirmed in part, reversed in part, and vacated in part, and the judgment of the circuit court of Cook County is affirmed in part, reversed in part,

589

and vacated in part. ***In the absence of consent to the entry of a remittitur by each plaintiff within 21 days of the filing of this opinion or

any further period in which the mandate is stayed, her individual action will be remanded to the circuit court of Cook County for a new trial on the question of damages. ***

McMORROW, J., concurring in part and dissenting in part: I concur in the opinion of my colleagues in all but one respect: I do not agree with the majority that it is proper to order a remittitur of the jury's award of damages to Keva Richardson for present cash value of future medical expenses or the jury's award to Ann MacGregor for pain and suffering.

In determining the total verdict awarded to Richardson, the jury considered extensive evidence relating to six separate components of damages. As noted by the majority, Richardson "suffered devastating, disabling injuries." The appellate court majority's unpublished opinion describes her condition: "After the collision, doctors determined that the communication connection between Richardson's brain and the rest of her body had become severed and she was rendered a quadriplegic. Richardson was soon placed in traction with tongs affixed to her skull by driving screws into the side of her head. She was also placed in a reforest bed with 25 pound weights attached to her body for traction. Eventually, Richardson underwent surgery to stabilize her spine so it could support the weight of her head which hung like a rag doll's head. In that operation, bone from her hips was grafted to her cervical spine with the use of metal plates and screws. The surgery did not repair the injury to Richardson's spinal cord, nor does medical technology yet exist to rectify the injury."

Other evidence related Richardson's need for assistance every six hours to empty her bladder by catheterization and daily assistance to empty her bowel, over which she permanently lacks control. She has lost the use of her legs, fingers, and the fine muscles of her hand. Her chest and abdomen are paralyzed. She is subject to risk of serious infections and other conditions and, according to the evidence, having a child would be life-threatening. The appellate court opinion further stated that Richardson "may expect to be hospitalized on a regular basis for the balance of her life."

The jury awarded $11 million to compensate Richardson for her future medical needs. To this sum the majority applies a remittitur of $1 million, based on the majority's observation that the jury's award for this element of damages exceeded by $1.5 million the testimony of economist Charles Linke regarding the "upper bound" of the present cash value of Richardson's future medical needs. Linke explained that he calculated a "lower bound" present value ($7.4 million) and an "upper bound" present value ($9.5 million). His figures were derived from different assumptions regarding the relationship of the rate of interest to the rate of growth. In explaining his economic assumptions and methods, Linke also noted that there were different accounting methods that could be used to calculate

Richardson's future medical needs. The one he employed yielded a more conservative figure for medical care than that used by the General Accounting Office, which, according to Linke, would yield the conclusion that "the present value of Keva Richardson's care needs would be approximately 12.1 million dollars." ***

Dr. Yarkony testified, "This is the basic minimum care not covering any hospital admissions for emergencies, complications, and the like." He further testified that in his opinion Richardson would continue to require hospitalizations in the future caused by complications related to her spinal cord injury, including infections, pressure sores, pneumonia, and blood clots. ***

Nothing in the record or the itemized jury verdict indicates that the jury departed from its customary duty to weigh the evidence and assess damages that would fairly compensate Richardson for her permanent and disabling injuries. The jury's award for future medical expenses, which arguably exceeded certain testimony, does not warrant the conclusion that the jury's determination was a departure from the flexible range of damages that was reasonably supported by the facts. There is no indication that the jury's award was the product of passion or prejudice. In fact, with respect to a different component of damages, i.e., Richardson's past and future lost earnings, the jury awarded a sum that was $1,265 million less than the higher of the testimonial estimates presented for that item of damages. If experts' estimates of a person's future income losses or medical expenses were an exact science capable of mathematical precision, there would be no need to have a jury make the final determination of proven damages. ***

Similarly, I depart from the majority's holding that Ann MacGregor's damages award of $100,000 for pain and suffering was excessive. The majority orders a remittitur of $50,000 as a "more appropriate figure for pain and suffering." [C] The majority appears to base its conclusion on the relatively minor injury MacGregor sustained, noting that she suffered a laceration on her forehead that healed with

only minimal scarring. Although the majority views the award of $100,000 as overly generous for a facial laceration that did not result in permanent disfigurement, the majority substitutes its own subjective judgment for the jury's evaluation of the evidence. The record indicates that MacGregor's lacerated forehead took six months to heal. The record further indicates that she suffered ongoing trauma, including recurrent nightmares resulting from the rear-end collision that left the other occupant of the car a quadriplegic. The jury, as finder of fact, had the superior ability to assess the evidence, including MacGregor's testimony relating to her traumatic and painful experience. I am aware of no sound reason to nullify the function of the jury and arbitrarily reduce MacGregor's award for pain and suffering to $50,000. Therefore, I cannot concur in the reasoning or result of the majority with respect to the reduction by remittitur of both plaintiffs' verdicts.

591

For the reasons stated, I concur in part and dissent in part from the judgment of the majority.

JUSTICE Freeman joins in this partial concurrence and partial dissent.

NOTES AND QUESTIONS

1. The principal cases present a catalogue of many of the major elements of damages in a personal injury case. Think about the time and thought plaintiffs' attorneys devoted to developing proof of these items. Although both cases were based on negligence, similar items of damage can occur in actions based on intentional torts or strict liability.

2. The court in the Anderson case rejected defendants' argument that the child's presence inflamed or prejudiced the jury. Generally, a party is entitled to attend the trial and will be excluded only if there is disruptive conduct. Cary v. Oneok, Inc., 940 P.2d 201 (Okla. 1997) (new trial ordered in case involving six-year-old burn victim who had been excluded from the courtroom during the liability phase of the case). This entitlement may be based on the federal Constitution's due process clause or a state constitution's right to jury trial or access to courts clause. Jordan v. Deery, 778 N.E.2d 1264 (Ind. 2002) (finding an ancillary right to be present in courtroom in Indiana Constitution's right to trial by jury and discussing cases in other jurisdictions).

3. In the Richardson case, note the difference in detail between the majority's and the dissent's description of plaintiffs' injuries and treatment. The dissent added detail from the intermediate appellate court opinion which, in turn, was gleaned from the trial transcript. Keep in mind when you are reading appellate opinions that their summary of testimony below is often cooler and more detached than the way it actually was given at the trial court level. In terms of strategy, do you think plaintiff McGregor benefitted from joining her claim with plaintiff Richardson or would she have been better off bringing it separately?

4. Note the courts' recitation of the standard in each of the jurisdictions for granting a new trial based on the amount of the damages. See notes 21-23.

5. Evidence of Damages. Proof of damages is an important part of plaintiffs cause of action, whether based on intentional conduct,

negligence, or strict liability. There have been extensive developments over the past several decades in techniques for presenting this proof. For example, attorneys have made growing use of "demonstrative evidence." This form of evidence consists of tangible items such as charts, photographs, videos, models, and computer simulations. The purpose of this evidence is to bring home to the jury the total extent of plaintiffs injury. Much of this was pioneered by San Francisco attorney Melvin M. Belli, who showed empirically how demonstrative evidence can greatly enlarge the amount of a plaintiffs verdict. See Belli, Demonstrative Evidence and the Adequate Award, 22 Miss.L.J. 284 (1951). Experts may be used to project earnings, to detail plaintiffs medical difficulties, both physical and psychological, and in

a variety of other ways. This is treated in more detail in courses in Evidence and Trial Practice.

6. It is customary to divide damages in a personal injury case into separate categories. One classification is between "special" and "general" damages; another is between "economic" and "non-economic" damages. The two classifications are not always coterminous, but in personal injury cases lost earnings and medical and other expenses are treated as special damages subject to objective measurement of the economic loss, while pain and suffering and emotional distress are treated as general damages whose loss--although real--is fundamentally non-economic. You will sometimes hear attorneys discussing a case ask, as a preliminary question, how much the "specials" are. The specials are all of the

plaintiffs out of pocket expenses or economic losses and usually are the focus of the attorneys' assessment of the value of the case.

Economic Losses

7. Medical Expenses. As the principal cases indicate, the plaintiff is compensated for reasonable medical expenses. Medical expenses may include bills for hospitals, doctors (including psychiatrists), physical therapists, nurses, medication, x-rays, crutches, wheel chairs, braces, travel to a different climate, etc. Past medical expenses are proved at trial by submitting the bills into evidence or through testimony. Future medical expenses (e.g., surgery that the plaintiff will need or medication plaintiff takes) must be proved by expert testimony establishing the anticipated need and predicted cost. Note that in the Richardson case the future medical expenses were proved by the testimony of two experts. Plaintiffs treating physician testified as to the medical care she was likely to need and an economist testified as to the likely cost of those procedures, based on assumptions about the rise in medical care costs over the time period in issue. Plaintiff will be able to recover unless the costs incurred were not related to the tortious injury, were unnecessary (trips to three medical specialists where one would have been reasonable), or excessively high (hourly fees higher than reasonable).

8. What if plaintiff suffers a relatively minor injury but fears developing a more serious condition because the defendant's act put the plaintiff at risk for it? Can plaintiff recover for that increased risk? Petriello v. Kalman, 215 Conn. 377, 576 A.2d 474 (1990) (allowing jury to consider plaintiffs risk of future bowel obstruction due to

surgeon's negligence). Could she recover for her fear of developing the disease? Majca v. Beekil, 183 Ill.2d 407, 233 Ill.Dec. 810, 701 N.E.2d 1084 (1998) (allowing recovery if plaintiff can prove actual exposure to HIV and collecting "fear of' developing AIDS cases from other jurisdictions).

If the plaintiff has no current physical illness or disease but alleges that the defendant negligently exposed the plaintiff to a toxic substance that increased the plaintiffs risk of contracting a disease in the future, may the plaintiff recover for the increased risk itself or for the costs of medical monitoring in order to detect the disease early if it does develop? Compare Caronia v. Philip Morris USA, Inc., 22 N.Y.3d 439, 982 N.Y.S.2d 40, 5 N.E.3d

593

11 (2013) (answering certified question from Second Circuit) (no medical monitoring for smokers with increased risk of lung cancer but no physical injury); Lowe v. Philip Morris USA Inc., 344 Or. 403, 183 P.3d 181 (2008) (same); In re Hanford Nuclear Reservation Litigation, 534 F.3d 986 (9th Cir. 2008) (under Price-Anderson Act, no medical monitoring for exposure to nuclear radiation); and Metro-North Commuter Railroad Co. v. Buckley, 521 U.S. 424 (1997) (not permitted in FELA case) with Bower v. Westinghouse Elec. Corp., 206 W.Va. 133, 522 S.E.2d 424 (1999) (recovery permitted for medical monitoring for exposure to toxic substances); Meyer v. Fluor Corp., 220 S.W.3d 712 (Mo. 2007) (medical monitoring claim permitted for children exposed to lead from lead smelter); Sinclair v. Merck & Co., 195 N.J. 51, 948 A.2d 587 (2008) (medical monitoring permitted for negligent exposure to toxic chemicals but not for

product liability actions); and Exxon Mobil Corp, v. Albright, 433 Md. 303, 71 A.3d 30 (2013) (recognizing medical monitoring as a form of relief--as distinguished from a cause of action--and determining that it should be accomplished through an equity fund administered by a trustee).

9. Lost Wages. If the plaintiff was employed at a fixed wage at the time of injury, the wages lost during the time of injury are relatively easy to calculate. For example, if an attorney who works for the Department of Justice loses two months from work because of an injury suffered in an automobile accident, she will be able to recover from the defendant responsible for her injury for two months' pay. The damages calculation is more complicated if the plaintiff was not employed at the time of the injury. For example, if the attorney was at home caring for two small children at the time of the injury, damages probably would be calculated on the basis of the cost of replacement care for her two children.

10. Loss or Impairment of Future Earning Capacity. If the injury is one from which the plaintiff does not recover and reenter the workforce, the measure of damages will include loss or impairment of earning capacity (sometimes called loss of future earnings). First, the jury must be persuaded that the injury is permanent. See, e.g., Byrum v. Maryott, 26 Md.App. 130, 337 A.2d 142 (1975) (discussion of adequacy of expert witness testimony re permanency of injury). Then, expert testimony is needed to assist the jury in estimating what the plaintiff would have earned during the plaintiffs lifetime. As indicated in the Anderson case, even a very young plaintiff who would not be expected to engage in employment until the distant future may recover for the loss of future earnings. So may a plaintiff

who was, at the time of injury, temporarily unemployed or voluntarily out of the workforce (e.g., while caring for family members or going to school in preparation to starting a new career). The jury is assisted in its estimate of lifetime earnings by the presentation of expert testimony on issues like life expectancy and the earnings of the average high school graduate, violinist, mechanic, fourth grade teacher, used car salesman, minister, nurse, etc., as appropriate. The jury is instructed that it is to rely on tables of life expectancy and average earnings only as a general guideline in determining how long plaintiff might be expected to live and how much he might be expected to earn. The jury may consider how individual factors such as plaintiff's "sex, prior state of health,

nature of daily employment and its perils, manner of living, personal habits, and individual characteristics" will affect the life expectancy figure provided by a mortality table and the likelihood that plaintiff actually would achieve the positions, jobs, or promotions being predicted for him. See Volz v. Dresser, 150 Pa.Super. 371, 28 A.2d 493 (1942) (instructing jury to take into account characteristics of plaintiff in applying mortality tables). But see Cal. Civil Code § 3361, prohibiting the use of race, ethnicity, and gender in the estimates of future lost earnings resulting from personal injury or wrongful death.

What if the plaintiff is claiming he would have earned millions as a professional athlete? Compare Sheppard v. Crow-Barker-Paul No. 1 Ltd. P'ship, 192 Ariz. 539, 968 P.2d 612 (1998) (affirming trial court judge's refusal to let the jury speculate on star high school basketball player's possible earnings during a professional career) with Felder

v. Physiotherapy Assocs., 215 Ariz. 154, 158 P.3d 877 (2007) (expert permitted to testify re plaintiff's potential earnings in major league baseball where plaintiff already was playing on minor league team at time of injury).

What if an undocumented worker suffers a permanent injury? Can he seek future lost wages? See Grocers Supply, Inc. v. Cabello, 390 S.W.3d 707 (Tex. App. 2012) (finding that Texas tort law, which does not require U.S. citizenship or possession of work authorization in order to recover damages for lost earning capacity, is not preempted by federal immigration law); Balbuena v. IDR Realty LLC, 6 N.Y.3d 338, 845 N.E.2d 1246, 812 N.Y.S.2d 416 (2006) (finding that federal immigration law does not preempt worker's common law right to damages for future lost wages but that jury should consider absence of work authorization in determining amount just as it would any other relevant fact or consideration in determining the likely amount of lost future wages); and Escamilla v. Shiel Sexton Co., 73 N.E.3d 663 (Ind. 2017) (although relevant to determination of future earnings, danger of unfair prejudice of evidence of undocumented immigration status substantially outweighs its probative value and it is therefore inadmissible unless defendant can show by a preponderance of evidence that plaintiff actually will be deported). See also Cal. Evid. Code § 351.2 (immigration status cannot be admitted into evidence nor is subject to discovery).

It is loss of likely future earnings that is being calculated and most people do not continue to earn money for their entire lives. Thus, the jury may consider the prospects for change in plaintiffs earning capacity, taking into account not only the nature of the person's employment, but also the fact that in growing older the person may

be expected to earn more, and that a point is ultimately reached at which an older person will earn less or nothing at all. Note that in the Richardson case the economist calculated lost earnings based on two different work life expectancies (27.5 years and 35.8 years). Why did he do that?

11. Damage Calculation: Present Value. In personal injury actions, a plaintiff is awarded a lump sum to compensate for all future pecuniary losses, such as loss of future wages or future medical expenses. Most jurisdictions require that the lump sum award for future losses be reduced to its "present value." That is, the jury is instructed to award the amount of

money in a lump that will produce for the plaintiff the amount the plaintiff would have earned or will need for a future operation. For example, plaintiff is a child whose back was injured. The back injury requires surgery that cannot be performed until the child has stopped growing. Thus, the medical testimony is that the child will need an operation ten years from the time of trial and that the cost of that operation is estimated to be $5,000. The jury must award the child enough money (principal) at the time of trial so that the principal plus the interest it will earn will equal $5,000 at the end of 10 years. Similarly, if the plaintiff is an adult who had been earning $50,000 a year and had a worklife expectancy of 10 years at the time of trial, the jury must award the adult enough money (principal) at the time of trial so that the adult will have an earnings stream of $50,000 a year for the next 10 years with no principal remaining at the end of the 10 years. The present value is computed by formula or by reference to

tables once it has been determined at what interest rate to assume the plaintiff will be able to invest the lump sum (principal). Expert witnesses frequently differ in their assumptions (predictions) of future interest rate(s), usually called the "discount rate" in this context, that should be used. In addition to the Richardson opinion, see generally, Restatement (Second) of Torts § 913A.

12. Future Inflation. Plaintiffs' attorneys have argued that the jury should not merely reduce lump sum awards to present value based on estimated interest payments, but also should consider the countervailing effect of future inflation. They contend that an upward price movement is probable and that valuing future damages in terms of present prices does not fully compensate the victim. To continue the examples used earlier, it may be argued at trial that although the back operation costs $5,000 today, inflation will make its cost $6,000 in ten years and that today's $50,000 a year salary will be $52,000 next year. Most jurisdictions have recognized the need to adjust for expected future inflation in some way. Differences have arisen, however, with respect to the proper means to account for inflation, particularly in times of high inflation, and how to mesh calculations for inflation with those for discount for present value. The method used in a particular case may depend either on the economist providing the expert testimony or the law of the jurisdiction or both.

13. Federal Income Tax. Plaintiffs award for personal injuries is not subject to the federal income tax. Under Section 104(a)(2) of the Internal Revenue Code, a tort victim can exclude from gross income the amount of compensatory damages received on account of personal injuries. Punitive damages, however, are considered

income. O'Gilvie v. United States, 519 U.S. 79 (1996). A problem arises when the award, or a part of it, is to compensate for a loss that would have been subject to income tax. The primary instance is compensation for lost wages. If no reduction is made in the award, the injured plaintiff receives more for wages than if he had not been injured. For this reason, some courts have held that the "tax-free" nature of the award must be taken into account in setting the amount of the award. Caldwell v. Haynes, 136 N.J. 422, 643 A.2d 564 (N.J. 1994) (plaintiff has burden of producing evidence of net income for lost future wages). Other authorities have taken the position that to deduct the anticipated tax saving

from the recovery would nullify the tax benefit conferred by Congress. Spencer v. A-l Crane Svc., Inc., 880 S.W.2d 938 (Tenn.1994).

Most courts have refused to take into account the "tax-free" nature of the award because of concern about the speculative character of the amount of a potential deduction, at least insofar as it applies to future earnings. There is no way of telling what the tax rates will be in the future, nor what exemptions, deductions and other income the plaintiff would have, so as to determine what tax bracket he would be in. For these reasons, most courts have been inclined toward the position that in the case of the average taxpayer no adjustment should be made, and the plaintiff should receive the benefit of the windfall. In fact, most jurisdictions do not tell the jury that the award is tax free. But see Norfolk & Western Ry. Co. v. Liepelt, 444 U.S.

490 (1980) (Supreme Court in Federal Employers' Liability Act case allows jury to be told that award is not subject to income tax).

14. Interest. Tort damages for personal injuries are generally unliquidated. No precise sum of damages is sought by the complaint. The jury must set a value on the loss suffered by plaintiff. Consequently, courts traditionally have not permitted the plaintiff to collect interest on the award until judgment is entered or until a verdict is reached. This rule has been criticized as discouraging settlements because it is to defendant's advantage to keep the money as long as possible without having to pay interest on it. In response to those concerns, a few legislatures have enacted statutes that provide for interest on the amount of the award from the date of the injury, the date of a demand of payment from the plaintiff, the date the cause of action was filed, or the date the expense actually was incurred by the plaintiff. See, e.g., Nev.Rev.Stats.Ann. § 17.130 and N.H.Rev.Stat.Ann. § 524:1-b. The plaintiff must pay federal income tax on any pre-judgment interest. Brabson v. United States, 73 F.3d 1040 (10th Cir.1996).

Non-Economic Losses

15. Physical Pain and Suffering, Mental Anguish. In an action for a personal injury the plaintiff may recover damages for general or non-economic damages. They include not only suffering prior to the trial, but also any suffering reasonably certain to result from the injury in the future. Since pain, suffering and mental anguish are not capable of being reduced to any precise equivalent in money, there can be no fixed standard by which damages for them can be measured. The best that can be done is to leave the question to the jury, subject to

control by the court, to fix a reasonable amount as compensation. It is reversible error if the jury does not make an award for pain and suffering. Bowers v. Sprouse, 254 Va. 428, 492 S.E.2d 637 (1997) (jury award for exact amount of specials is inadequate as a matter of law, even if those damages were controverted; plaintiff experienced pain, suffering, and inconvenience and is entitled to be compensated for that). See also, Red Lake Band of Chippewa Indians v. United States, 1990 WL 515095 (D.D.C. 1990), rev'd on other grounds, 936 F.2d 1320 (D.C.Cir.1991) (In assessing damages in a bench trial in a suit against the United States under the Federal Tort Claims Act, the court noted that plaintiff "spoke little of his emotional distress and inconvenience or annoyance. Indeed, he gave sparse testimony on this. The court takes note of [plaintiff s] stoic nature. It also is

aware of [plaintiff's] age, schooling, and health, and recognizes that he had to speak English in court, when this may not be his tongue of choice. Stoics unwilling or unable to orate on their anger, fear, worry, or pain feel these no less keenly than the voluble. When the law entitles a man to damages he should not be penalized for his reserve. The court has kept all this in mind when finding facts about damages....")

What if plaintiff suffered emotional distress damages without any physical injury? A police officer went through a Burger King drive-thru staffed by two employees, both of whom had criminal records. Due to an uneasy feeling, the police officer lifted the top of the bun and observed a "slimy, clear and white phlegm glob" on the meat patty. DNA testing revealed that it was the saliva of one of the Burger

King employees. Police officer alleged that he suffered ongoing emotional trauma from the incident, including vomiting, nausea, food anxiety, and sleeplessness, and has sought treatment by a mental health professional. Liability under Washington's product liability statute? Bylsma v. Burger King Corp., 176 Wash.2d 555, 293 P.3d 1168 (2013) (answering certified question from Ninth Circuit in the affirmative, if plaintiff can show emotional distress was a reasonable reaction and was manifested by objective symptomatology).

The general damages portion of the award may consist of several different elements. The most common is the physical pain caused by the injury. This may be of relatively short duration and be over by the time of trial (past pain and suffering) or it may be a chronic symptom that the medical experts predict plaintiff will always have (future pain and suffering). Plaintiff must be conscious to recover for this element of damages. Thus, whether the plaintiff was conscious after the accident but before death may be a hotly contested issue in some cases. How might the plaintiff's attorney prove conscious pain and suffering if the plaintiff cannot testify? Ghotra v. Bandila Shipping, Inc., 113 F.3d 1050 (9th Cir.1997) (applying maritime law) (affidavit from doctor opining that it was "highly likely" that decedent was conscious for ten seconds following accident not enough to overcome defendant's motion for summary judgment on the issue of pain and suffering where eyewitness testimony and autopsy report indicated that decedent was not conscious after injury and prior to death).

Loss of Function or Appearance. Plaintiff also may be able to recover for other types of loss. For example, there are holdings that allow a jury to award a recovery for the loss of sense of taste and

smell, Purdy v. Swift & Co., Indus. Indem. Exch., 34 Cal.App.2d 656, 94 P.2d 389 (1939); incontinence, Thoren v. Myers, 151 Neb. 453, 37 N.W.2d 725 (1949); impotency and loss of desire for sexual intercourse, Sullivan v. City and County of San Francisco, 95 Cal.App.2d 745, 214 P.2d 82 (1950); change of personality and change of attitude towards others, Fjellman v. Weller, 213 Minn. 457, 7 N.W.2d 521 (1942); insomnia and inability to drive a car, Napier v. DuBose, 45 Ga.App. 661, 165 S.E. 773 (1932); fear of injury to an unborn child, Domenico v. Kaherl, 160 Me. 182, 200 A.2d 844 (1964); scars and other disfigurements, Gray v. Washington Water Power Co., 30 Wash. 665, 71 P. 206 (1903); and incisions made during emergency surgery to relieve a condition caused by defendant's medical malpractice, even though patient died within hours of

the surgery, Holston v. Sisters of the Third Order of St. Francis, 165 III.2d 150, 650 N.E.2d 985 (1995).

Emotional Distress from Legal Malpractice. Should plaintiff be entitled to pain and suffering damages in a legal malpractice action? Lickteig v. Alderson, Ondov, Leonard & Sween, 556 N.W.2d 557 (Minn. 1996) (emotional distress may be an element of damages only if plaintiff suffers physical injury; if plaintiff was exposed to physical injury due to the negligence of another and develops physical symptoms after emotional distress; or if emotional distress results from a direct invasion of rights such as in slander, libel, malicious prosecution, seduction or other willful, wanton, or malicious conduct) and Schmidt v. Coogan, 181 Wash.2d 661, 335

P.3d 424 (2014) (emotional distress damages are available for attorney negligence only if emotional distress is foreseeable due to the particularly egregious (or intentional) conduct of an attorney or the sensitive or personal nature of the representation--not for loss of compensation in a slip and fall case).

Can you see the policy implications whether to allow such damages in a legal malpractice case? Compare Miranda v. Said, 836 N.W.2d 8 (Iowa 2013) (although emotional distress damages generally require showing of either intentional conduct of defendant or physical injury to plaintiff, such damages were allowed in legal malpractice action in an immigration matter that resulted in parents being separated from their young child) with Dombrowski v. Bulson, 19 N.Y.Sd 347, 948 N.Y.S.2d 208, 971 N.E.2d 338, 341 (2012) ("We see no compelling reason to depart from the established rule limiting recovery in legal malpractice actions to pecuniary damages. Allowing this type of recovery [for emotional distress] would have, at best, negative and, at worst, devastating consequences for the criminal justice system. Most significantly, such a ruling could have a chilling effect on the willingness of the already strapped defense bar to represent indigent accused. Further, it would put attorneys in the position of having an incentive not to participate in post-conviction efforts to overturn wrongful convictions. We therefore hold that plaintiff does not have a viable claim for [emotional distress] damages and the complaint should be dismissed in its entirety.").

Litigation-Induced Stress. Should plaintiff be able to recover for the anxiety and stress that accompanies litigation? Most courts have not recognized it as a separate component of damages. School Dist. v. Nilsen, 271 Or. 461, 534 P.2d 1135 (1975) (this type of stress

inherent in most litigation); Buoy v. ERA Helicopters, Inc., 771 P.2d 439 (Alaska 1989) (litigation-induced depression); Stoleson v. United States, 708 F.2d 1217, 1223 (7th Cir.1983) (applying Wisconsin law) (alleged tortfeasor should have the right to defend himself without thereby multiplying his damages); Picogna v. Board of Education, 143 N.J. 391, 671 A.2d 1035 (1996) (not appropriate element of pain and suffering damages).

16. Loss of Enjoyment of Life. As the cases in note 15 illustrate, most jurisdictions allow plaintiffs to recover for the loss of specific aspects of their lives as part of the recovery for pain and suffering, while some categorize it as a separate element of damages. Golden Eagle Archery, Inc. v. Jackson, 116 S.W.3d 757, 768 (Tex. 2003) ("Courts across the country have struggled

with whether loss of enjoyment of life is compensable at all, and if so, whether it is part of pain and suffering, mental anguish, or physical impairment or is a separate, independent category of damages.") (collecting cases). These are sometimes called "hedonic damages." McGee v. AC and S, Inc., 933 So.2d 770 (2006) (holding that loss of enjoyment of life is a separate element of hedonic damages; dissent traces history of use of term "hedonic" damages and argues that it should not be separated from general damages) and Castro v. Melchor, 142 Hawai'i 1, 414 P.3d 53 (2018) (estate of stillborn child awarded damages for loss of enjoyment of life under state's survival statute). See also McClurg, Dead Sorrow: A Story About Loss and a New Theory of Wrongful Death Damages, 85 B.U.

L. Rev. 1 (2005) (discussing the confusion surrounding the term and its use by various courts to describe different types of damages).

17. Per-Diem. Argument. A controversial technique of counsel for the plaintiff in arguing to the jury has been to break physical and mental suffering down into days, hours, or even minutes, set a value on each unit, and multiply it by the total number of the units that pain and suffering has lasted and may be expected to last. It is not permitted in some jurisdictions because it tends to give the appearance of mathematical precision, through the use of a formula, to something that is by its nature neither mathematical nor precise and because it ignores the fact that once the "threshold" of pain is crossed, the body tends to adjust to it and the suffering to diminish. See, e.g., Affett v. Milwaukee & Suburban Transport Corp., 11 Wis.2d 604, 106 N.W.2d 274 (1960); Reid v. Baumgardner, 217 Va. 769, 232 S.E.2d 778 (1977). About half the jurisdictions, however, permit the argument, assuming that defendant's counsel can point out any flaws in the argument and that the jury will not be misled. See, e.g., Weeks v. Holsclaw, 306 N.C. 655, 295 S.E.2d 596 (1982); Debus v. Grand Union Stores of Vermont, 159 Vt. 537, 621 A.2d 1288 (1993). See also Joseph H. King, Jr., Counting Angels and Weighing Anchors: Per Diem Arguments for Noneconomic Personal Injury Tort Damages, 71 Tenn. L. Rev. 1 (2003) (arguing that courts should not permit the per diem argument to be used) and Campbell, Chao, and Robertson, Time is Money: An Empirical Assessment of Non-economic Damages Arguments, 95 Wash. U. L. Rev. 1 (2017) (concluding that prohibition against use of per diem argument is not justified).

Judicial Control of Amounts Recovered

18. A trial judge (through a motion for a new trial) or an appellate panel (on appeal) can disturb the jury's finding on the amount of the damages only if the verdict is so excessive or so inadequate as to demonstrate that the jury acted contrary to the law--in passion or prejudice rather than according to their instructions. The test for disturbing a jury award on the amount of damages is expressed in various ways. The principal cases referred to the "maximum amount which the jury could reasonably find" and whether the amount is so high (or low) that it "shocks the conscience." Other courts have used terms like "grossly" excessive or inadequate, "inordinate," or "outrageous." Meals v. Ford Motor Co., 417 S.W.3d 414, 425 (Tenn. 2013) ("A jury has wide latitude in assessing non-economic damages. We trust jurors to use their personal experiences and sensibilities to value the intangible

harms such as pain, suffering, and the inability to engage in normal activities. This task is made more difficult in a catastrophic injury case. It is not our role to second-guess the jury and to substitute our judgment; but it is our role to protect against a verdict that is excessive.")

19. If the judicial review of the verdict concludes that the award was grossly excessive or grossly inadequate, the judge(s) must then decide whether to set aside the verdict and grant a new trial on both liability and damages, or to allow the liability portion of the verdict to

stand and to grant a partial new trial on damages alone. Maier v. Santucci, 697 A.2d 747 (Del. 1997) (new trial on damages ordered where jury, in rear-end collision, back injury case, awarded $0 damages to plaintiff after trial court judge had directed a verdict for plaintiff on liability). Usually, a whole new trial is granted. A partial new trial, on damages only, is the appropriate remedy only if the judge is persuaded that whatever influenced the jury to act inappropriately in setting the amount of damages did not also taint the liability verdict. Tedder v. American Railcar Indus., Inc. v. 739 F.3d 1104 (8th Cir. 2014) (FELA action) ("We favor new trials over remittiturs when a court finds that passion or prejudice has influenced a jury's damage award on the theory that such passion or prejudice may also have influenced the jury's determinations in other phases of the trial.")

20. Remittitur and Additur. If the judge decides to grant a new trial on damages alone, the judge may make the grant conditional. To avoid the expense, inconvenience and delay of new trials in these cases, trial courts frequently, in cases of excessive verdicts, grant a motion for a new trial that is conditioned upon the refusal of the plaintiff to accept a lesser amount. This order is called a remittitur and was at issue in both principal cases. When the verdict is inadequate, the trial judge may grant the motion for a new trial conditioned on the defendant's refusal to pay a larger sum set by the court. This order is called an additur or an increscitur. The trial court must explain its reasoning so that the appellate court can ensure that the trial court judge did not merely substitute its opinion for that of the jury's. He v. Miller, 207 N.J. 230, 24 A.3d 251 (2012) (jury's award is entitled to presumption of correctness, which should only be overcome if award

"shocks the conscience of the court or is wide of the mark and pervaded by a sense of wrongness"). It has generally been held that remittitur does not violate the guaranty of jury trial contained in the federal and state constitutions. On the other hand the power of additur has been denied to the federal courts by a 5--4 decision of the Supreme Court, Dimick v. Schiedt, 293 U.S. 474 (1935). The decisions as to the constitutionality of additur under state constitutions are split, with some courts interpreting their state constitutions to permit additur in the state court and others finding that additur in a state court action violates their state constitutions as the Supreme Court had found that it would violate the Seventh Amendment in an action in federal court.

In the Richardson case, what happens after the Illinois Supreme Court decision? Will there be a new trial?

601

Legislative Control of Amounts Recovered

21. In response to tort reform efforts, about half of the state legislatures have passed laws that in some way affect the amount of damages recoverable. Many of these statutes apply only to particular types of claims (e.g., medical malpractice claims, claims against the government), while others cover all tort actions seeking recovery for personal injury, but apply only to non-economic injuries. Compare R.R.S. Neb. § 44-2825 (medical malpractice only, $2,250,000 total recovery) with Md.Cts. & Jud.Proc.Code Ann. § 11--108 (all personal

injury actions, $890,000 for non-economic damages in 2020, increasing $15,000 a year thereafter).

22. Some of the legislative caps on damages have been found unconstitutional, particularly those limited to certain causes of action, but most have survived constitutional scrutiny. Compare Lebron v. Gottlieb Memorial Hosp., 237 III.2d 217, 930 N.E.2d 895 (2010) (cap of $500,000 on noneconomic injuries in medical malpractice actions is unconstitutional violation of separation of powers clause); Estate of McCall v. U.S., 134 So.3d 894 (Fla. 2014) (answering certified question from federal court in FTCA case) (cap of $500,000 for noneconomic damages for wrongful death actions violates equal protection clause of state constitution); North Broward Hospital District v. Kalitan, 219 So.3d 49 (2017) (same for limit on noneconomic damages in medical malpractice cases); and Hilburn v. Enerpipe Ltd., 309 Kan. 1127, 442 P.3d 509 (2019) (statutory cap for noneconomic damages in personal injury actions violates the constitutional guarantee of the right of trial by jury) with Fein v. Permanente Medical Group, 38 Cal.3d 137, 695 P.2d 665, 211 Cal.Rptr. 368 (1985) (legislature may expand or limit recoverable damages so long as its action is rationally related to a legitimate state interest); Miller v. Johnson, 295 Kan. 636, 289 P.3d 1098 (2012) (statutory cap of $250,000 on noneconomic damages in medical malpractice actions had rational basis and thus did not violate state equal protection clause); MacDonald v. City Hosp., Inc., 227 W.Va. 707, 715 S.E.2d 405 (2011) (statutory damages cap of $500,000 did not violate the state constitutional right to a jury trial, separation of powers, equal protection, special legislation, or the "certain remedy" provisions); Arbino v. Johnson & Johnson, 116 Ohio

St.3d 468, 880 N.E.2d 420 (2007) (upholding cap on noneconomic damages on most tort actions, noting that similar statutes previously had been held unconstitutional); and Mayo v. Wise. Inj. Patients and Families Comp. Fund, 383 Wis.2d 1, 914 N.W.2d 678 (2018) (statutory cap on noneconomic damages was not unconstitutional either on its face or as applied to plaintiff). See Chapter 23:3 for further discussion.

23. In addition to the question whether the caps will survive constitutional challenges, the legislative alterations of the common law raise other issues. Is the jury to be told of the cap? How does the cap apply to multiple causes of action arising out of the same incident? Where comparative negligence reduces the verdict by a percentage, which is to be applied first, the percentage reduction or the cap?

602

Montgomery Ward & Co., Inc. v. Anderson

Supreme Court of Arkansas, 1998.

334 Ark. 561, 976 S.W.2d 382.

NEWBERN, J. ***On November 14, 1994, appellee Shirley Anderson was badly injured in a fall while shopping in appellant's Montgomery Ward store in Little Rock. Montgomery Ward personnel sent her to the hospital at the University of Arkansas for Medical Sciences ("UAMS") to be treated. Ms. Anderson had surgical and other medical-services expenses at UAMS totaling $24,512.45. Montgomery Ward moved in limine to prohibit Ms. Anderson from

presenting the total amount billed by UAMS as proof of her medical expenses and asked that her evidence be limited to the actual amount for which she would be responsible to pay. In response, Ms. Anderson stated that, through her attorney, she had reached an agreement with UAMS that UAMS would discount the bill by fifty per cent. Ms. Anderson asserted that the collateral-source rule would prohibit Montgomery Ward from introducing evidence of the discount.

The Trial Court denied the motion in limine, ruling that the negotiated discount with UAMS was a collateral source, and allowed evidence of the entire amount billed by UAMS. Montgomery Ward urges that the ruling and the denial of the motion for new trial made on the same basis were erroneous. ***

We have held that the collateral-source rule applies unless the evidence of the benefits from the collateral source is relevant for a purpose other than the mitigation of damages. [C] The issue, then, is whether the forgiveness of a debt for medical services is a collateral source to be sheltered by the rule. There is no Arkansas authority dealing directly with that precise issue, but our cases explaining the policy behind the rule support the Trial Court's ruling. ***

Although those cases [relied on by the trial court judge] do not directly answer the question in this case, they deal with analogous situations and explain the policy behind the collateral-source rule. A trial court must "exclude evidence of payments received by an injured party from sources 'collateral' to... the wrongdoer, such as private insurance or government benefits...." Bell v. Estate of Bell, 318 Ark. 483, 490, 885 S.W.2d 877, 880 (1994). [Cc] Recoveries from collateral sources "do not redound to the benefit of a tortfeasor,

even though double recovery for the same damage by the injured party may result." Bell v. Estate of Bell, 318 Ark. at 490, 885 S.W.2d at 880; [c].

In the Bell case, we recognized that commentators had criticized the rule as being "incongruous with the compensatory goal of the tort system" and that some jurisdictions had modified or abrogated the rule. ***

We also noted that the rule had been extended to cases in other areas of the law, such as unemployment compensation received during a period later held to have resulted from a wrongful discharge under the Teacher

603

Fair Dismissal Act. [C] In a later case, [c], a defendant argued that the collateral-source rule was inequitable because it resulted in a windfall to the plaintiff. We disposed of the argument by explaining the policy behind the rule as follows: "Whether she received the money from her employer or from an insurance policy, she, rather than the alleged tortfeasor, is entitled to the benefit of the collateral source, even though in one sense a double recovery occurs. [C] The law rationalizes that the claimant should benefit from the collateral source recovery rather than the tortfeasor, since the claimant has usually paid an insurance premium or lost sick leave, whereas to the tortfeasor it would be a total windfall." [C] That statement of policy and the cases cited favor including discounted and gratuitous medical services within the shelter of the collateral-source rule. There is no evidence of record showing that Montgomery Ward had anything to do with procuring the discount of Ms. Anderson's bill by

UAMS. The rationale of the rule favors her, just as it would had she been compensated by insurance for which she had arranged. ***

We recognize four situations in which the rule does not apply.... They are cases in which a collateral source of recovery may be introduced (1) to rebut the plaintiffs testimony that he or she was compelled by financial necessity to return to work prematurely or to forego additional medical care; (2) to show that the plaintiff had attributed his condition to some other cause, such as sickness; (3) to impeach the plaintiffs testimony that he or she had paid his medical expenses himself; (4) to show that the plaintiff had actually continued to work instead of being out of work, as claimed. [Cc] This Court has also allowed evidence of collateral sources when the plaintiff opens the door to his or her financial condition. [Cc] The Trial Court ruled that none of the exceptions applied to the facts at hand, and an examination of the abstract indicates that ruling was correct. There is no testimony by the plaintiff that arguably invokes any of the exceptions.

The Restatement (Second) of Torts § 920A(2) provides guidance on this issue and explains that the general rule is that "[p]ayments made to or benefits conferred on the injured party from other sources are not credited against the tortfeasor's liability, although they cover all or a part of the harm for which the tortfeasor is liable." Comment b to that Restatement section explains that, if the plaintiff is responsible for the benefit received, the law allows the plaintiff to keep it. Further, if the benefit was a gift to the plaintiff from a third party or established for the plaintiff by law, the plaintiff should not be deprived of the advantage that it confers. Another way to state the rule is to say that "it is the tortfeasor's responsibility to compensate for all harm that he

[or she] causes, not confined to the net loss that the injured party receives." Restatement (Second) of Torts § 920A comment b. Comment c (3) indicates that gratuities of cash or services are collateral sources that are not

604

subtracted from a plaintiffs recovery. The comment gives the example of a doctor who does not charge for medical services.

Other authority indicates that a substantial number of jurisdictions addressing the issue have held that the plaintiff may recover the reasonable value of nursing care or services rendered gratuitously for the plaintiffs benefit. [C] The primary issue remaining today is how to value the services, [c], but that issue is determined in this case by the total medical bill submitted to Ms. Anderson by UAMS.

Montgomery Ward cites cases from Massachusetts, New York, and Illinois for the proposition that gratuitous medical services may not be an item of recovery because the policy behind the collateral-source rule does not apply where the plaintiff has incurred no expense or obligation for the services needed. ***

We choose to adopt the rule that gratuitous or discounted medical services are a collateral source not to be considered in assessing the damages due a personal-injury plaintiff. It is the rule recommended by the Restatement (Second) of Torts, and it is consistent with our oft-stated policy of allowing the innocent plaintiff, instead of the tortfeasor defendant, to receive any windfall associated with the cause of action. Accordingly, we hold that the Trial Court did not err by excluding evidence of the UAMS discount as a collateral source.

Affirmed.

NOTES AND QUESTIONS

1. What is a motion in limine, mentioned in the first paragraph of the opinion?

2. What if the health care provider's write-off was negotiated in advance by the plaintiffs health insurance company or managed-care provider like Medicaid or Medicare? Would the evidence of the write-off still be excluded by the collateral source rule? Compare Howell v. Hamilton Meats & Provisions, Inc., 52 Cal.4th 541, 129 Cal.Rptr.3d 325, 257 P.3d 1130 (2011) (the negotiated rate differential is not a collateral payment or benefit subject to the collateral source rule and thus is admissible) and Smith v. Mahoney, 150 A.3d 1200 (Del 2016) (same) with White v. Jubitz Corp., 347 Or. 212, 219 P.3d 566 (2009) (evidence of what Medicare paid to patient's medical providers--reflecting Medicare write-offs--was inadmissible) and Getz v. Peace, 934 N.W.2d 347 (Minn. 2019) (interpreting collateral source statute, Medicaid discounted medical care expenses were paid pursuant to the Social Security Act, so were not to be deducted from jury's damages award).

3. The Common Law Collateral Source Rule. As the principal case suggests, the collateral source or collateral benefits rule is applied when the plaintiff receives compensation from any source collateral to the tortfeasor. Those sources may include health or medical insurance, life insurance, disability insurance, employee benefits (sick leave, vacation pay), or governmental benefits (free care at Veteran's Hospital or through Medicare).

Helfend v. Southern Cal. Rapid Transit Dist., 2 Cal.3d 1, 465 P.2d 61, 84 Cal.Rptr. 173 (1970). But see Washington v. Barnes Hospital, 897 S.W.2d 611 (Mo. 1995) (availability of free public school special education and therapy services admissible in case where plaintiffs expert had testified about the cost of private school education because plaintiff did not pay for or bargain for free services and services were not contingent on plaintiffs financial need or special status as some government programs are). The rule does not apply, however, to payments made by the defendant or by a joint tortfeasor or one who mistakenly thinks he is a tortfeasor, or by an insurance company or other person who makes payment on behalf of a tortfeasor. See, in general, Restatement (Second) of Torts § 920A and note 4, page 429.

4. When benefits are conferred upon the plaintiff gratuitously, as when a plaintiff is nursed without charge by the spouse, the prevailing rule is that plaintiff is entitled to recover the reasonable value of the services from the defendant, since they are a gift to the plaintiff, and not to the defendant, and should not reduce the liability of the latter. Strand v. Grinnell Auto. Garage Co., 136 Iowa 68, 113 N.W. 488 (1907); Wells v. Minneapolis Baseball & Athletic Ass'n, 122 Minn. 327, 142 N.W. 706 (1913). A minority rule, however, does not permit the plaintiff to recover for the value of services provided without charge to plaintiff. See Coyne v. Campbell, 11 N.Y.2d 372, 183 N.E.2d 891, 230 N.Y.S.2d 1 (1962).

5. As the principal case states, plaintiff may recover double when the collateral source rule is applied. This is not usually the case, however. Paid sick leave will reduce the amount of sick leave the plaintiff has to use for illness or other injuries. Health insurance

contracts and government programs providing benefits typically provide that the insured must pay back the benefits that were provided from the proceeds of a judgment or settlement with a tortfeasor. See, for example, Administrative Comm, of Wal-Mart Stores, Inc. Assoc. Health and Welfare Plan v. Shank, 500 F.3d 834 (8th Cir. 2007) (upholding judgment reimbursing health insurance plan for amounts paid on behalf of insured after recovery from third party tortfeasor); US Airways, Inc. v. McCutchen, 569 U.S. 88 (2013) (upholding reimbursement of health insurance plan for amounts paid on behalf of insured from settlement between insured and tortfeasor but requiring plan to pay its share of insured's attorneys' fees); and Coventry Health Care of Mo., Inc. v. Nevils, 137 S.Ct. 1190 (U.S. 2017) (federal statute providing for reimbursement to company providing medical insurance to federal government employee preempts state law that prohibits such reimbursement).

6. Statutory Modifications. About three-quarters of the states have modified the common law collateral source rule in some way and to varying degrees by statute, usually as part of "tort reform" movements. Some of the modifications apply only to particular causes of action (e.g., medical malpractice). About half reverse the common law to provide that the information concerning the collateral source is admissible in evidence (see e.g., Ariz.Rev.Stat. § 12-565) (such weight as the trier of the facts chooses to give it) without indicating what the jury is to do with that information, while others specify that the award is to be reduced by the amount of the collateral

source minus the costs of the benefit (see, e.g., N.Y. C.P.L.R. § 4545(a)). Some of these statutes have been found unconstitutional, while others have survived constitutional challenge. Compare Carson v. Maurer, 120 N.H. 925, 424 A.2d 825 (1980) (unconstitutional) with Barme v. Wood, 37 Cal.3d 174, 689 P.2d 446, 207 Cal.Rptr. 816 (1984) and Reid v. Williams, 964 P.2d 453 (Alaska 1998) (constitutional). The Kansas legislature tried three times (1976, 1986, and 1992) to limit the common law collateral source rule and each time the Kansas Supreme Court found the statute unconstitutional. See Thompson v. KFB Insurance Co., 252 Kan. 1010, 850 P.2d 773 (1993).

7. Loss of Consortium. Most states recognize a claim by the spouse of an injured person for loss of conjugal relations, society, companionship, household services, etc. during the time period that the injured person is recovering or for a permanent loss. The claim is derivative of the injured person's and in most states must be joined in the cause of action of the injured person. Should loss of consortium be available for relationships not formalized by marriage? Should loss of consortium be available for damage to the parent child relationship? See a more detailed discussion of these issues in Chapter 22, Section 2, Family Relations.

8. Expenses of Litigation. Under the English practice, the winning party, whether plaintiff or defendant, recovers his expenses of litigation, including attorney's fees. This is not the practice in the United States in regard to litigation in general, or tort litigation in particular. The practice of having each side bear its own expenses often is referred to as the "American Rule." See Restatement (Second) of Torts § 914. Alaska, which follows the English Rule, is

an exception. Alaska Rules of Civil Procedure, Rule 82. It is sometimes suggested that in a personal injury case, as a practical matter, the award for pain and suffering may have the effect of allowing the plaintiff to pay the attorney and still retain compensation for economic losses.

Chapter 21, Misuse of Legal Procedure, covers the tort action for bringing a suit held to be frivolous or for using legal procedure for an improper purpose--"abuse of process." It also treats statutes and Rules of Court providing for the trial judge to impose a sanction--usually payment of attorney's fees--for conduct of this nature.

9. The Contingent Fee. Lawyers who represent plaintiffs in personal injury litigation usually are paid on the basis of a contingent fee contract. Under this arrangement, the lawyer agrees to render professional services for a fee that is based on a percentage of the amount the client recovers in the case. If there is no recovery, the lawyer receives no fee. The percentage of the contingent fee varies, sometimes depending upon whether the case is settled or tried, or on the size of recovery. A common contingent fee is 30%--40%. If for some reason no figure is set by attorney and client, or there is later a dispute about the amount of the figure, an attorney may bring an action against the former client for a quantum meruit recovery from the client's settlement or judgment. See e.g., Nugent v. Downs, 230 So.2d 597 (La.App.1970) (setting a fee of 30%). In certain situations the amount of the contingent fee may be fixed by statute. For example, the Federal Tort Claims Act makes it a crime for an attorney to obtain a contingent fee greater than 25% of the judgment or settlement of the suit against the United States

Government or 20% of a settlement through the administrative procedure before suit. 28 U.S.C. § 2678. In cases involving minors, settlements--including the allocation of fees--must be approved by the court. Goesel v. Boley Intern. Ltd., 806 F.3d 414 (7th Cir. 2015) (applying Illinois law) (contingent fee arrangement whereby attorneys received one-third of the gross settlement with clients paying the expenses from their two-thirds was approved by court as reasonable).

Jurors are not informed about the contingent fee and they are not to add that fee to their verdict. Thus, it is a basic part of the tort damage system that plaintiff absorbs the costs of bringing a law suit. The contingent fee may result in an attorney being compensated far beyond or far below what would be a "reasonable fee" for the effort expended. Also, it may create a conflict of interest between attorney and client as to whether to recommend or accept a settlement. The lawyer, of course, is obligated by the Rules of Professional Responsibility to place the interests of the client first. On the other hand, the contingent fee system has allowed injured persons of limited means to obtain good legal services when they are injured. Also, individual "fees" look less exorbitant when one considers that plaintiff attorneys also lose cases, thus receiving no compensation for the work on those cases. See Symposium: Contingency Fee Financing of Litigation in America, Third Annual Clifford Seminar on Tort Law and Social Policy, 47 DePaul L. Rev. 227 (1998).

10. The Hourly Fee. In contrast to lawyers who represent plaintiffs, most lawyers who represent defendants are paid for their services

based on an hourly fee for the work done, sometimes affected by the volume of work done by the firm. In many of the cases you have read, the payments to the lawyer for the defendant actually were made by the defendant's liability insurance carrier, which had agreed by contract to indemnify the insured for any expenses associated with defending itself in lawsuits arising from its alleged negligence, including attorney fees. In others, the defendant had no insurance or was self-insured and made the payments. Attorneys working under this system are sometimes accused of doing more work than is necessary to prepare the case for trial or of delaying settlement talks to keep the case, and their payments for services rendered in the meantime, alive. Such conduct would be a violation of the Rules of Professional Responsibility.

11. Champerty and Maintenance. Champerty is an agreement whereby a person with no interest in a lawsuit agrees to aid in or carry on its litigation in consideration of a share of the proceeds. Maintenance is meddling in a lawsuit by assisting either party with means to carry it on. Both were illegal at common law as an "offense against public justice, as it keeps alive strife and contentions, and perverts the remedial process of the law into an engine of oppression." Key v. Vattier, 1 Ohio 132, 143 (1823). For a modern version, see Rancman v. Interim Settlement Funding Corp., 99 Ohio St.3d 121, 789 N.E.2d 217 (2003) (finding void an agreement between an automobile accident victim and company who advanced her funds, with repayment secured by the proceeds of the claim based on the accident). Contingent fee arrangements do not run afoul of these common law principles because the client, not the

attorney, retains control of the litigation, including the settlement decision, and because the client must pay for the out-of-pocket

608

expenses associated with the litigation like court filing fees, costs of obtaining transcripts, and fees of expert witnesses.

12. Litigation Financing. While the litigation is pending, some plaintiffs will receive money from companies related to the anticipated payment of a settlement or judgment. Depending on the agreement, it may be characterized as an assignment, a loan, or as an investment in the lawsuit. Whether the state will permit enforcement of such an agreement varies by the wording of the agreement and by state law. See, for example, Obermayer, Rebmass, Maxwell & Hippel v. West, 725 Fed.Appx. 153 (applying New York law) (agreement enforced because it was not a loan and therefore not unenforceable under New York usury law); Oasis Legal Finance Group, LLC v. Coffman, 361 P.3d 400 (Colo. 2015) (declaratory judgment action brought by litigation finance companies resulted in decision finding their agreements constituted loans and thus were subject to Colorado Consumer Credit Code); and Boling v. Prospect Funding Holdings, LLC, 771 Fed.Appx. 562 (6th Cir. 2019) (applying Kentucky law) (litigation-funding agreements violated champerty statute and were inconsistent with public policy and thus unenforceable). Wisconsin requires the parties to disclose such agreements. Wise. Stat. Ann. § 804.01(2)(bg).

2. Physical Harm to Property

Damages for physical harm to land or chattels is closely tied in with the concept of value, or in other words, what the property is worth. If a chattel is completely destroyed, or is converted by the defendant for his own use, the measure of damages is its entire value at the time and place of the tort. If it is damaged, but not destroyed or converted, the damages are measured by the difference in value before and after the injury. If there is merely deprivation of use, as in the case of dispossession for a brief time, the damages consist of the value of the use of which the plaintiff has been deprived.

Value necessarily involves the idea of some standard by which it can be determined--the financial equivalent of the property, or the harm to it. In the vast majority of the cases, whether the harm is to chattels or to land, the standard set for value is the market value of the property. The theory underlying this is that the plaintiff, given this financial equivalent, can go out on the open market and replace the property by buying other property freely offered for sale. See, generally, Restatement (Second) of Torts § 911.

Market value usually is defined as what the property in question could probably have been sold for on the open market, in the ordinary course of voluntary sale by a leisurely seller to a willing buyer. Thus, it is not the cost to the seller, or the asking price, nor is it what could be obtained on a forced sale. Since value must be looked at from the point of view of one who is complaining of being deprived of the thing valued, it is the highest price that could have been realized, and not the lowest price at which there could reasonably have been a sale.

Market value ordinarily is determined on the basis of the market at the place where the wrong occurred. When there is no available market at that place, there is resort to the nearest market, with allowance made for the costs of transportation to and from it. If the goods were intended by the plaintiff for use, these transportation costs will be added to the market price when determining damages; but if they were intended for sale, they will be deducted.

Market value also is ordinarily determined as of the time of the wrong. There is, however, one group of cases in which subsequent increases in value have been taken into account. These arise where there is conversion of goods of the kind commonly traded on exchanges, such as stocks and bonds, and commodities such as grain. The same exception is made as to cases of breach of contract to sell such goods to the plaintiff. Even here, some courts refuse to consider subsequent increase in value, and adhere strictly to the value at the time of the wrong. Most of the American courts have made some kind of allowance for an increase. See Restatement (Second) of Torts § 927.

Occasionally, chattels have no market value because they are not salable. Or, plaintiff may argue that the market value would be inadequate compensation. In some of these cases, there may be recovery of the value to the owner, as distinguished from value to others. This is true of family heirlooms and other articles that have a purely personal value to the plaintiff and no one else. It is also true, in general, of clothing, books, pictures, furniture and household goods, which will be worth more to the owner than their value to a second-hand store. The "personal value" so awarded is determined by consideration of whatever factors may be relevant, such as

original cost of the property, the use made of it, and its condition at the time of the wrong. See, for example, Campins v. Capels, 461 N.E.2d 712 (Ind.App.1984) ("those items generally capable of generating sentimental feelings, not just emotions peculiar to the owner") (national championship rings); Shaffer v. Honeywell, Inc., 249 N.W.2d 251 (S.D.1976) (trophies won at horse shows); Brown v. Frontier Theatres, Inc., 369 S.W.2d 299 (Tex.1963) (grandmother's wedding veil); Brousseau v. Rosenthal, 110 Mise.2d 1054, 443 N.Y.S.2d 285 (1980) (dog); Southern Express Co. v. Owens, 146 Ala. 412, 41 So. 752 (1906) (unpublished manuscript); Mieske v. Bartell Drug Co., 92 Wash.2d 40, 593 P.2d 1308 (1979) (family's home movies). But see C & O Ry. Co. v. May, 120 Va. 790, 92 S.E. 801 (1917) (no damages other than fair market value allowed for family portraits).

For pets, these other factors might include the animal's training and characteristics as well as veterinary expenses for the animal. Brousseau v. Rosenthal, 110 Mise.2d 1054, 443 N.Y.S.2d 285 (1980) (trained guard dog belonging to elderly woman); Burgess v. Shampooch Pet Industries, Inc., 35 Kan.App.2d 458, 131 P.3d 1248 (2006) (measure of damages may include reasonable and customary cost of necessary veterinary care and treatment even though that exceeds pet's fair market value); and Leith

v. Frost, 387 Ill.App. 3d 430, 326 Ill.Dec. 418, 899 N.E.2d 635 (2008) (same). Most courts have not been persuaded by the argument that the owners of pets should be able to recover emotional distress, sentimental value, or loss of consortium

damages. McDougall v. Lamm, 211 N.J. 203, 48 A.3d 312 (2012) (pet owners can be awarded costs in excess of the animal's market value that represent pecuniary losses associated with medical treatment, damages based on the intrinsic value of the pet, or specific performance of an agreement as between the pet's co-owners but not emotional distress damages); Scheele v. Dustin, 188 Vt. 369, 98 A.2d 697 (2010) (noneconomic damages--as distinct from alternate means of valuing a pet's monetary worth--are not available in trespass to chattels action); Carbasho v. Musulin, 217 W.Va. 359, 618 S.E.2d 368 (2005) (no damages for sentimental value, mental suffering, or emotional distress for death of dog); Barking Hound Village, LLC v. Monyak, 299 Ga. 144, 787 S.E.2d 191 (2016) (fair market value and reasonable vet expenses, but no sentimental value); Kondaurov v. Kerdasha, 271 Va. 646, 629 S.E.2d 181 (2006) (no recovery for emotional distress or mental anguish suffered due to injury to dog); Anzalone v. Kragness, 356 Ill.App. 3d 365, 292 Ill.Dec. 331, 826 N.E.2d 472 (2005) (loss to owner may include an element of the owner's feelings for cat but the amount is severely restricted because pet is item of personal property); Goodby v. Vetpharm, Inc., 974 A.2d 1269, 1272 (Vt. 2009) (no recovery for loss of consortium due to death of cats). See also Restatement (Third) of Torts: Liability for Physical and Emotional Harm § 47, comment m (2012) (recognizing that pets are often quite different from other chattels in terms of emotional attachment, but declining to extend damages for emotional distress for any chattels, including pets).

The Texas Supreme Court refused to expand its common law and referred the plaintiff to the legislature for any change in the law:

"Under Texas common law, the human-animal bond, while undeniable, is uncompensable, no matter how it is conceived in litigation--as a measure of property damages (including 'intrinsic value' or 'special value... derived from the attachment that an owner feels for his pet'), as a personal-injury claim for loss of companionship or emotional distress, or any other theory. The packaging or labeling matters not: Recovery rooted in a pet owner's feelings is prohibited. We understand that limiting recovery to market (or actual) value seems incommensurate with the emotional harm suffered, but pet-death actions compensating for such harm, while they can certainly be legislated, are not something Texas common law should enshrine." Strickland v. Medlen, 397 S.W.3d 184, 198 (Tex. 2013).

A few state legislatures have provided for recovery of modest amounts in addition to market value for loss of pets. See, for example, Tenn. Code Ann. § 44-17-403 (providing for up to $5,000 in noneconomic damages for loss of pet dog or cat that is killed through intentional or negligent act while pet is on property of owner or caretaker or under

control and supervision of owner or caretaker but not including certain situations like professional negligence against veterinarian, dog that was worrying livestock, or those acting on behalf of public health or animal welfare).

When the property is not destroyed or converted, but only damaged, the measure becomes one of the difference in value before and after the wrong. The cost of repairing the land or chattel is admissible in

evidence, on the assumption that it amounts to a restoration of the original value; but it is not conclusive, and may be challenged by either side as excessive or inadequate for the purpose. Restatement (Second) of Torts § 928. The cost of repairs may not exceed the value of the chattel prior to the damage. See Smith v. Brooks, 337 A.2d 493 (D.C.App.1975) (automobile) (cost of repairs can exceed neither the diminution in value caused by accident nor value of car prior to accident).

When there is only temporary deprivation of use, as by dispossession for a brief, limited period, the measure becomes one of the rental value of the property for that period--or in other words, the amount which the owner could have obtained in the market by renting out the property, or the cost to him of renting similar property for the specified time.

Consequential damages may be recovered for the conversion of property, or for harm to it, when they are "proximately" caused. These might include, for example, the reasonable expense of trying to recover possession of the property, or loss of a profitable bargain resulting from deprivation of the goods, and the like. Parroski v. Goldberg, 80 Wis. 339, 50 N.W. 191 (1891) (cost of recovering horses) and Preble v. Hanna, 117 Or. 306, 244 P. 75 (1926) (lost profits while locked out of business). An interesting case in which market value, damages for deprivation of use, and punitive damages all were recovered is Glass v. Brunt, 157 Kan. 27, 138 P.2d 453 (1943) (conversion of equipment resulted in lost sales).

3. Punitive Damages

Punitive damages, sometimes called exemplary or vindictive damages, or "smart money," consist of an additional sum, over and above the compensation of the plaintiff for the harm suffered, awarded for the purpose of punishing the defendant, of admonishing the defendant not to do it again, and of deterring others from following defendant's example. They originated in England in the days of George III, in situations of outrageous abuses of authority by government officers, in cases such as Huckle v. Money, 2 Wils.K.B. 206, 95 Eng.Rep. 768 (1763). Plaintiff, a journeyman printer, was seized by the King's messenger on a general warrant, issued without probable cause, and held in custody for six hours on suspicion of having printed a pamphlet very critical of the King. Although he was treated "very civilly" and given "beef-steaks and beer" and thus suffered little in actual damages, a large jury verdict was upheld because the evidence showed that Magna Charta had been

violated and thus exemplary damages were warranted. These principles were then adopted in the United States.

The policy of awarding punitive damages in tort cases has been a subject of much dispute. It has been condemned as undue compensation to the plaintiff beyond his just deserts, in the form of a criminal fine that should be paid to the state if to anyone and fixed by the caprice of the jury, without any standards, and without any of the usual safeguards of criminal procedure, such as proof of guilt beyond a reasonable doubt, the privilege against self-incrimination, and even the rule against double jeopardy--since, in most places, the

defendant may still be punished for the crime after he has been mulcted in the tort action.

Punitive damages have been defended as a salutary method of discouraging evil motives, as a partial remedy for the refusal of American civil procedure to allow compensation for the expenses of litigation including counsel fees, as a way of diverting plaintiffs desire for revenge into peaceful channels, and as an incentive to bring into court and redress a long array of petty cases of outrage and oppression, that in practice escape the notice of busy prosecuting attorneys occupied with serious crime and that a private individual would otherwise find not worth the trouble and expense of a lawsuit. See, for example, Mathias v. Accor Econ. Lodging, Inc., 347 F.3d 672, 677 (7th Cir. 2003) (applying Illinois law). Plaintiffs, guests at a national hotel chain where they paid about $100 a night for their room, were bitten by bedbugs. Evidence at trial revealed that the hotel had been aware of the infestation for months, had declined the recommendation of its exterminator that the hotel be closed for a thorough treatment, had been moving guests who complained or refunding their money, and had designated some rooms not to be rented until treated. It was one of those rooms that plaintiffs spent the night in. On that particular night, 190 of the hotel's 191 rooms were occupied, even though many of them had been designated as not to be rented until treated. Bedbug bites are not dangerous, but are unsightly and painful. Jury verdict was for $5,000 in compensatory damages and $186,000 in punitive damages. On appeal, hotel argued that the maximum allowable punitive damages award was $20,000 (a four-to-one ratio of punitive damages to compensatory damages). The Seventh Circuit upheld the jury's

verdict, noting that the "defendant's behavior was outrageous but the compensable harm done was slight and at the same time difficult to quantify because a large element of it was emotional. And the defendant may well have profited from its misconduct because by concealing the infestation it was able to keep renting rooms. Refunds were frequent but may have cost less than the cost of closing the hotel for a thorough fumigation. The hotel's attempt to pass off the bedbugs as ticks, which some guests might ignorantly have thought less unhealthful, may have postponed the instituting of litigation to rectify the hotel's misconduct. The award of punitive damages in this case thus serves the additional

613

purpose of limiting the defendant's ability to profit from its fraud by escaping detection and (private) prosecution."

As you read the cases and notes in this section, keep in mind that punitive damages are not a separate, free-standing cause of action but rather a remedy that can be sought based on any properly pled cause of action as long as the jurisdiction's standard for that remedy is met. Cf. Soffer v. R.J. Reynolds Tobacco Co., 187 So.3d 1219 (Fla. 2016) (allowing Engle plaintiffs to pursue punitive damages).

Cheatham v. Pohle

Supreme Court of Indiana, 2003.

789 N.E.2d 467.

Boehm, J. ***

After Doris Cheatham and Michael Pohle divorced in 1994, Pohle retained photographs he had taken of Cheatham in the nude as well as photos of the two engaged in a consensual sexual act. In early 1998, Pohle made photocopies of the photographs, added Cheatham's name, her work location and phone number, her new husband's name, and her attorney's name, and proceeded to distribute at least sixty copies around the small community where both he and Cheatham still lived and worked. Cheatham sued, alleging invasion of privacy and intentional infliction of emotional distress, and the jury awarded her $100,000 in compensatory damages and $100,000 in punitive damages.

Indiana Code section 34--51--3--6, enacted in 1995, provides:

(a) Except as provided in IC 13-25-4-10, when a judgment that includes a punitive damage award is entered in a civil action, the party against whom the judgment was entered shall pay the punitive damage award to the clerk of the court where the action is pending.

(b) Upon receiving the payment described in subsection (a), the clerk of the court shall:

(1) pay the person to whom punitive damages were awarded twenty-five percent (25%) of the punitive damage award; and

(2) pay the remaining seventy-five percent (75%) of the punitive damage award to the treasurer of state, who shall deposit the funds into the violent crime victims compensation fund established by IC 5-2-6.1-40. ***

[Cheatham argued that the new statute providing that 75% of the punitive damages be paid to the state violated the Takings Clauses

found in both the Indiana Constitution and the Fifth Amendment of the United States Constitution and that it violated other provisions of the Indiana Constitution.]

614

I. Punitive Damages in Indiana

In assessing the claim that the allocation statute takes property without just compensation, it is essential to understand the nature of a claim for punitive damages. The purpose of punitive damages is not to make the plaintiff whole or to attempt to value the injuries of the plaintiff. Rather, punitive damages, sometimes designated "private fines" or "exemplary damages," have historically been viewed as designed to deter and punish wrongful activity. As such, they are quasi-criminal in nature. [Cc]

As a matter of federal [Constitutional due process] law, state legislatures have broad discretion in authorizing and limiting the award of punitive damages, just as they do in fashioning criminal sanctions. BMW of N. Am. Inc. v. Gore, 517 U.S. 559 (1996). Victims in a criminal case have no claim to benefit from criminal sanctions. [Cc] For the same reason, it has been consistently held that civil plaintiffs have no right to receive punitive damages. [Cc]

To the extent punitive damages are recoverable, they are a creature of the common law. [Cc] As we have repeatedly held in other contexts, the legislature is free to create, modify, or abolish common law causes of action. [C] And, as a matter of federal constitutional law, no person has a vested interest or property right in any rule of common law. [C] As a result, the General Assembly is free to eliminate punitive damages completely, as other states have done,

and also has wide discretion in modifying this "quasi-criminal" sanction. Indeed, several jurisdictions have chosen not to recognize punitive damages as an acceptable award in any form. [1]

* * *

[1] In Nebraska punitive damages are constitutionally prohibited. [C] In Louisiana, Massachusetts. New Hampshire, and Washington, punitive damages are permitted only if expressly authorized by statute. [Cc]

Indiana, like several other states, has chosen an intermediate ground--permitting juries to award punitive damages and thereby inflict punishment on the defendant, but placing restrictions on the amount the plaintiff may benefit from the award. The facts warranting punitive damages must be established by clear and convincing evidence. [C] Whether punitive damages may be awarded is usually a question of fact. [C]

In sum, Indiana law recognizes a right to assert a claim to be compensated for a cognizable wrong and to recover on that claim to the extent the law allows. But a number of consequences flow from the fundamentally different nature of a claim to punitive damages. The financial condition of the defendant is relevant, [c], which it would not be if the goal were to compensate the plaintiff, as opposed to deterring or punishing the defendant. Proof is required by a clear and convincing standard rather than a preponderance of the evidence standard. [C] For our purposes, the essential point is that because punitive damages do not

compensate the plaintiff, the plaintiff has no right or entitlement to an award of punitive damages in any amount. Unlike a claim for compensatory damages, the trier of fact is not required to award punitive damages even if the facts that might justify an award are found. [C],

II. Claims Under State and Federal Taking Clauses

***[A]ny interest the plaintiff has in a punitive damages award is a creation of state law. The plaintiff has no property to be taken except to the extent state law creates a property right. [C] The Indiana legislature has chosen to define the plaintiffs interest in a punitive damages award as only twenty-five percent of any award, and the remainder is to go to the Violent Crime Victims' Compensation Fund. The award to the Fund is not the property of the plaintiff. Nor is her prejudgment claim a property interest. Rather, the claim she had before satisfaction was, pursuant to statute, a claim to only one fourth of any award of punitive damages. As a result, there is no taking of any property by the statutory directive that the clerk transfer a percentage of the punitive damages award to the Fund.

A claim for punitive damages can be sustained only if it is accompanied by a viable claim for compensatory damages. [Cc] Cheatham thus claims that an award for punitive damages is "connected to" a claim for actual damages. From this, Cheatham reasons that because she has a right to compensatory damages, she must have a right to punitive damages as well. This confuses necessary preconditions with sufficient ones. To be sure, a claim for compensatory damages is a prerequisite to a claim for punitive

damages, but it does not follow that it is adequate to confer a right to that claim.

Several states have statutes that allocate punitive damages to the state in some form similar to the Indiana version. BMW of N. Am., Inc., 517 U.S. at 616, App. to Opinion of Ginsburg, J. (Ginsburg, J., dissenting); [Cc]. Of the state courts that have addressed the issue, only the Colorado Supreme Court has found an unconstitutional taking of property, while statutes in Alaska, Oregon, Georgia, Florida and Iowa have been upheld. ***

[The Court concluded that neither the Takings Clauses of the Federal and Indiana Constitutions nor other provisions of the Indiana Constitution were violated by the statute.] The judgment of the trial court is affirmed.

[The dissenting opinion of DICKSON, J. is omitted.]

NOTES AND QUESTIONS

1. Intentional Torts. Punitive damages are generally permitted when defendant has committed an intentional tort such as assault, battery, false imprisonment, conversion, trespass, malicious prosecution, or intentional infliction of emotional harm, as the defendant did in the principal case. Defendant's conduct need not be motivated by personal hatred; it is enough

if it has the character of "outrage." Jones v. Fisher, 42 Wis.2d 209, 166 N.W.2d 175 (1969) (couple forcibly removed denture from former employee's mouth to hold as collateral because they had loaned her the money to have the dental work done and were upset

when she quit her job before she had paid the money back). Some states permit malice to be inferred from a conscious indifference to the consequences of conduct. Yeakley v. Doss, 370 Ark. 122, 257 S.W.3d 895 (2007) (defendant had admitted that he was intoxicated and at fault for automobile accident; plaintiff entitled to introduce evidence of two prior DWI convictions in support of claim for punitive damages). Others limit them to situations where the plaintiff proves "evil motive, intent to injure, ill will, or fraud, i.e., 'actual malice.'" Exxon Mobil Corp. v. Albright, 433 Md. 303, 71 A.3d 30, 57 (2013). There are times when a technically intentional tort may be committed without malice. For example, a defendant unknowingly buys a stolen article or falsely imprisons a person whom he unreasonably believes to have stolen his property or unwittingly operates on the wrong patient.

In one case, couple seeking to adopt specifically asked for a healthy infant from a healthy family. Adoption agency, pursuant to a policy of not disclosing family information if it was not hereditary and might interfere with the bonding between adoptive parent and child, told them baby was healthy and did not tell them that baby's biological father was a paranoid schizophrenic and that baby's biological mother's father had been hospitalized for treatment of schizophrenia. Adopted baby had numerous behavioral problems as a child and, as a young adult, was diagnosed with paranoid schizophrenia. Couple filed suit against agency for fraud/wrongful adoption. Court found that trial court's granting of summary judgment on behalf of agency on punitive damages claim was appropriate. Although the actions were intentional, they were not malicious or vindictive and thus did

not warrant punitive damages. Ross v. Louise Wise Svs., Inc., 8 N.Y.3d 478, 868 N.E.2d 189, 836 N.Y.S.2d 509 (2007).

2. Negligent Torts. Conduct short of intentional wrongdoing also may be sufficient to justify punitive damages in most jurisdictions. Courts use a variety of formulas to spell this out, including "reckless disregard for the rights of others," Allman v. Bird, 186 Kan. 802, 353 P.2d 216 (1960); or "willful misconduct, wantonness, recklessness, or want of care indicative of indifference to consequences," In re Air Crash Disaster Near Chicago, 644 F.2d 594 (7th Cir.1981), cert, denied, 454 U.S. 878 (1981). Conduct that is merely negligent, even if it causes severe damage, is insufficient to justify punitive damages. Smizer v. Drey, 873 N.W.2d 697 (S.D. 2016) (sanctions imposed against plaintiffs who sought punitive damages where defendant's only conduct was negligently failing to yield before pulling onto road where she struck plaintiffs car). This is usually held to be true of "grossly negligent" conduct when that term is used as a synonym for "extreme carelessness" as opposed to "recklessness." Doe v. Isaacs, 265 Va. 531, 579 S.E.2d 174 (2003) (conduct of hit-and-run drunk driver was gross negligence, but not the willful recklessness that would support punitive damages). But see Williams v. Wilson, 972 S.W.2d 260 (Ky.1998) (new statutory punitive damages standard, which required "subjective awareness" that conduct would result

in human death or bodily harm, violated state constitutional jural rights doctrine because recovery for conduct that was grossly negligent was well- established common law right in Kentucky).

3. Strict Liability in Tort. Should punitive damages be available in a cause of action based on strict liability? Fischer v. Johns-Manville Corp., 103 N.J. 643, 512 A.2d 466 (1986) (defendant unsuccessfully argued that the concept of strict liability for products that theoretically focuses on the condition of the product rather than the conduct of the manufacturer, is incompatible with the concept of punitive damages, which is based on the defendant's malicious conduct); Owens-Illinois, Inc. v. Zenobia, 325 Md. 420, 601 A.2d 633 (1992) (evidence necessary to sustain punitive damages award goes far beyond that necessary to sustain a compensatory damages award in a strict liability claim, but such an approach is open to plaintiff; "actual malice" requirement is satisfied in product liability case by showing of actual knowledge of the defect and conscious or deliberate disregard of the foreseeable harm resulting from the defect).

4. Estate as Defendant. Should punitive damages be available against the estate of a deceased tortfeasor? How are the goals of punishment and deterrence served in that situation? In a case with facts very similar to those of the principal case, plaintiffs former boyfriend distributed photocopies of sexually explicit photographs of her that he had taken during their relationship, including her address, telephone number, and captions that implied that she was a prostitute. The photocopies were distributed throughout the community, including places that would ensure that they would be seen by plaintiff's minor children, her mother, her brother, and her employer. The distribution finally stopped when plaintiff filed a complaint including counts of defamation, intentional infliction of emotional distress, and false light invasion of privacy. The tortfeasor committed suicide before the trial and his sister, the executrix of his

estate, was substituted as a defendant. Should a jury award of punitive damages be upheld? G.J.D. v. Johnson, 552 Pa. 169, 713 A.2d 1127 (1998) (permitting award of punitive damages against estate, but noting that the majority of jurisdictions do not) and Alain Ellis Living Trust v. Harvey D. Ellis Living Trust, 308 Kan. 1040, 427 P.3d 9 (Kan. 2018) (claim for punitive damages survives death of defendant trustee). See also In re Vajgrt, 801 N.W.2d 570 (Iowa 2011) (noting that Iowa is among the approximately thirty states that do not permit awards of punitive damages against estates for the conduct of the decedent). See Chapter 11, Wrongful Death and Survival, note 10, page 653.

5. Arizona voters amended their state constitution to prohibit aliens who were present in the state in violation of federal immigration law from recovering punitive damages. Ariz. Rev. Stat. Const., Art. 2, § 35.

6. Can the plaintiff recover punitive damages if she has suffered no compensable harm? Note that the principal case says that Indiana has such a requirement. Others have deemed it sufficient that the plaintiff prove the elements of her underlying cause of action, even if the jury does not actually award compensatory damages. Clark v. McClurg, 215 Cal. 279, 9 P.2d 505 (1932). Can an award of nominal damages support an award of punitive damages? Jacque v. Steenberg Homes, Inc., 209 Wis.2d 605, 563 N.W.2d 154

(1997) (general rule that compensatory damages are required for award of punitive damages does not apply in case of intentional tort of trespass; defendant bulldozed a path in the snow across plaintiffs

field to deliver a mobile home despite plaintiffs repeated refusals to give permission to defendant to cross his land to make the delivery).

7. In a medical malpractice action, jury found that patient's medical records had been altered in a way that made it more difficult for her to prove her case. The alteration in the records did not, however, affect her treatment so it did not cause any of her damages. Does a showing of actual malice permit the imposition of punitive damages if the malicious conduct did not cause compensable harm? Moskovitz v. Mt. Sinai Medical Ctr., 69 Ohio St.3d 638, 635 N.E.2d 331 (1994) (not necessary that malicious intent required to sustain an award of punitive damages must itself have proximately caused compensable harm as long as plaintiff also proves compensable harm in suit). See also note 2, page 1167, re spoliation of evidence.

8. Legal Malpractice Claims. Suppose an attorney negligently fails to pursue a personal injury claim on behalf of client who was injured in an automobile accident and the client therefore loses the chance to recover compensatory and punitive damages against the driver. Client's damages in the malpractice case against the attorney would include the amount client proves she would have recovered but for the attorney's malpractice. Does the claim against the attorney include the punitive damages client might have obtained from the driver? Compare Ferguson v. Lieff, Cabraser, Heimann & Bernstein, 135 Cal.Rptr.2d 46, 30 Cal.4th 1037, 69 P.3d 965 (2003) (after analysis of public policy issues, court concludes lost punitive damages are not part of claim against legal malpractice defendant); Tri-G, Inc. v. Burke, Bosselman & Weaver, 222 Ill.2d 218, 305 Ill.Dec. 584, 856 N.E.2d 389 (2006) (accord); and Osborne v. Keeney, 399 S.W.3d 1 (Ky. 2012) (accord, surveying cases, but

noting that punitive damages would be available for the legal malpractice if plaintiff can prove malice) with Jacobsen v. Oliver, 201 F.Supp.2d 93 (D.D.C. 2002) (interpreting District of Columbia law to include lost punitive damages as part of legal malpractice damages) and Haberer v. Rice, 511 N.W.2d 279 (S.D. 1994) (accord).

9. The decisions usually hold that punitive damages are a windfall to the plaintiff, not a right and that the jury has complete discretion to refrain from awarding them in any case. In addition to the principal case, see Harrison v. Ely, 120 III. 83, 11 N.E. 334 (1887) (emphasizing that plaintiffs showing of malice authorizes the jury to award punitive damages but does not require it to).

State Farm Mutual Automobile Ins. Co. v. Campbell

Supreme Court of the United States, 2003.

538 U.S. 408, 123 S.Ct. 1513, 155 L.Ed.2d 585.

JUSTICE Kennedy delivered the opinion of the Court.

We address once again the measure of punishment, by means of punitive damages, a State may impose upon a defendant in a civil case. The question is whether, in the circumstances we shall recount, an award

619

of $145 million in punitive damages, where full compensatory damages are $1 million, is excessive and in violation of the Due Process Clause of the Fourteenth Amendment to the Constitution of the United States.

I

In 1981, Curtis Campbell (Campbell) was driving with his wife, Inez Preece Campbell, in Cache County, Utah. He decided to pass six vans traveling ahead of them on a two-lane highway. Todd Ospital was driving a small car approaching from the opposite direction. To avoid a head-on collision with Campbell, who then was driving on the wrong side of the highway and toward oncoming traffic, Ospital swerved onto the shoulder, lost control of his automobile, and collided with a vehicle driven by Robert G. Slusher. Ospital was killed, and Slusher was rendered permanently disabled. The Campbells escaped unscathed.

In the ensuing wrongful death and tort action [including claims brought by Slusher and Ospital's estates against Campbell], Campbell insisted he was not at fault. Early investigations did support differing conclusions as to who caused the accident, but "a consensus was reached early on by the investigators and witnesses that Mr. Campbell's unsafe pass had indeed caused the crash." 65 P.3d 1134, 1141 (Utah 2001). Campbell's insurance company, petitioner State Farm Mutual Automobile Insurance Company (State Farm), nonetheless decided to contest liability and declined offers by Slusher and Ospital's estate (Ospital) to settle the claims for the policy limit of $50,000 ($25,000 per claimant). State Farm also ignored the advice of one of its own investigators and took the case to trial, assuring the Campbells that "their assets were safe, that they had no liability for the accident, that [State Farm] would represent their interests, and that they did not need to procure separate counsel." [C] To the contrary, a jury determined that Campbell was

100 percent at fault, and a judgment was returned for $185,849, far more than the amount offered in settlement.

At first State Farm refused to cover the $135,849 in excess [over the policy limit] liability. Its counsel made this clear to the Campbells: " 'You may want to put for sale signs on your property to get things moving.'" [C] Nor was State Farm willing to post a supersedeas bond to allow Campbell to appeal the judgment against him. Campbell obtained his own counsel to appeal the verdict. ***
